Class Format: partial credit fifth course

Requirements/Evaluation: preparation for weekly coachings

Prerequisites: Permission of the Chamber Music Staff; enrollment limits will depend upon instructor availability. Enrollment in more than one chamber group must be approved by the chair.

Enrollment Limit: 12

Enrollment Preferences: Preference given to more advanced students, to be determined by audition as necessary.

Expected Class Size: 12

Grading: pass/fail option only

Unit Notes: The deadlines for registration follow: Fall (291) -- Registration Deadline: By the end of Add/Drop period and Spring (291) -- Registration Deadline: By the end of Add/Drop period. Registration for Chamber Music must be completed during the drop/add period of each semester. It is recommended that students wishing to take Chamber Music instruction in the fall semester attend the Music Department open house. Open to first year students.

Distributions: No divisional credit

Fall 2024
LSN Section: 01 TBA Ed Gollin
MUS 307 (F)(S) Composition III
Advanced individual instruction in composition. Projects will be initiated largely by the students with guidance from the instructor. Student is responsible for arranging performance of their own work. Student may enroll for up to four semesters by taking these courses in sequence, with the lower numbered course being the prerequisite for the next higher numbered course. May not be taken in conjunction with Music 493 or 494, the honors courses in composition.

Requirements/Evaluation: satisfactory completion of student-initiated projects
Prerequisites: MUS 205, MUS 206, and permission of instructor
Enrollment Limit: 3
Enrollment Preferences: Music majors
Expected Class Size: 2
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Attributes: MUS Materials and Structures

MUS 308 (F)(S) Composition IV
Advanced individual instruction in composition. Projects will be initiated largely by the students with guidance from the instructor. Student is responsible for arranging performance of their own work. Student may enroll for up to four semesters by taking these courses in sequence, with the lower numbered course being the prerequisite for the next higher numbered course. May not be taken in conjunction with Music 493 or 494, the honors courses in composition.

Requirements/Evaluation: satisfactory completion of student-initiated projects
Prerequisites: MUS 205, MUS 206, MUS 307, and permission of instructor
Enrollment Limit: 3
Enrollment Preferences: Music majors
Expected Class Size: 2
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Attributes: MUS Materials and Structures

MUS 316 (F) Music in Asian American History (DPE) (WS)
Cross-listings: AAS 316
Primary Cross-listing
Is "Asian American music" all music made by Asian Americans, music by Asian Americans specifically drawing on Asian heritage, or music engaging
with Asian American issues? This course embraces all three definitions and the full diversity of Asian American musical experience. We will study the historical soundscapes of immigrant communities (Chinese opera in North America; Southeast Asian war refugees) and how specific traumatic political events shaped musical life (Japanese American internment camps). We will encounter works by major classical composers (Chou Wen-Chung; Chen Yi; Tan Dun; Bright Sheng) and will investigate the careers and reception of prominent classical musicians (Midori; Seiji Ozawa; Yo-Yo Ma). Afro-Asian fusions, inspired by civil rights protest movements, manifested in jazz (Jon Jang; Fred Ho; Anthony Brown; Hiroshima; Vijay Iyer) and hip hop (MC Jin; Awkwafina; Desi rappers). Asian Americans have been active in popular music at home and abroad (Don Ho; Yoko Ono; Wang Leehom; Mitski). Finally, we will investigate communal forms of Asian American music making that have crossed racialized and gendered boundaries (taiko drumming; Indonesian gamelan; belly dance; Suzuki method). This seminar is designed to develop research skills, as we pursue original fieldwork, archival research, and oral history interviews.

Requirements/Evaluation: Active class participation; two short papers (5-6 pp.) and a research term paper (12-15 pp.).

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Students with curricular experience in Asian American history or music studies.

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
MUS 316(D1) AAS 316(D1)

Writing Skills Notes: Students will write three papers during the semester: two 5-6 page papers and a 12-15 page research paper, written in stages. Students will receive detailed comments on each paper and at each stage of the research paper process, allowing them to build upon those comments in subsequent writing assignments.

Difference, Power, and Equity Notes: Political and cultural forces of exclusion not only determined Asian American musical participation in American music history but have shaped Asian American styles of music. We will study the history of Asian American political struggles as they have intersected with music and how Asian Americans have at certain points sought allegiance through music with other marginalized groups. We will explore as well popular media representations of Asian American musicians revealing race-based assumptions.

Not offered current academic year

MUS 323  (S)  Arts Organizing in Africa and the Diaspora  (DPE)

Cross-listings: DANC 323 / THEA 321

Primary Cross-listing

At the heart of this class is the question, how do artists and organizations use the performing arts to effect social change in their communities? Drawing from a number of case studies from throughout Africa and the African Diaspora, we will first endeavor to understand and contextualize issues related to education, social uplift, the environment, and the economy as they relate to specific communities. We will then examine how a series of organizations (from grassroots campaigns to multinational initiatives) utilize the performing arts in response to those issues. Among the issues we will discuss at length are: -How do performers and organizations navigate the interplay between showcasing the performance talents of individuals and groups and foregrounding an issue or cause? More broadly, what dilemmas emerge as social and aesthetic imperatives intermingle? -What are the dynamics between people acting on a local level within their communities and their various international partnerships and audiences? -How can government or NGO sponsorship help and/or hinder systemic change? By the end of the semester, students will be equipped with conceptual frameworks and critical vocabularies that can help them ascertain the functions of performance within larger organizations and in service to complex societal issues. Throughout the course, we will watch and listen to a variety of performances from traditional genres to hip-hop, however this class is less about learning to perform or analyze any particular genre than it is about thinking through how performance is used as a vehicle for social change. Case studies will include youth outreach and uplift in Tanzania through the United African Alliance, campaigns to promote girls' education in Benin and Zimbabwe, community-wide decolonizing initiatives through the Yole!Africa Center in the Democratic Republic of Congo, and the cultural reclamation of a mining town in Suriname through the arts organization, Stichting Kibii.

Requirements/Evaluation: Four case study profiles, midterm essay (5-7pages), and a final project. Regular participation in class discussion.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If the course exceeds the maximum enrollment, selection will be made based on students explanations for why they want to take the class.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
DANC 323(D1) THEA 321(D1) MUS 323(D1)

Difference, Power, and Equity Notes: This course interrogates on a fundamental level issues of power and equity. Using the performing arts as a critical lens, we discuss a series of social and environmental challenges that communities of African descent face. These are in direct dialogue with global systems of power and economic factors. Issues include: environment, education, local communities' interactions with multinational corporations, and representation politics in performance.

Attributes: MUS World Music/Ethnomusicology
Not offered current academic year

MUS 381  (S)  Choral Conducting
The purpose of this course is to become fully acquainted with the fundamentals of conducting gesture, score study, and rehearsal technique as it relates to the choral rehearsal. Using the class as the primary practice choir, students will learn to express specific musical ideas and concepts through conducting patterns and body language, and will develop fluency and ease in these mediums through the study of varied repertoire and techniques. Regular videotaping of conducting sessions will provide opportunities for students to study themselves. Repertoire will include a broad survey of works from the early Renaissance to early 21st century, accompanied and a cappella, and issues of conducting ensembles at various skill levels will be addressed.

Class Format: coaching sessions
Requirements/Evaluation: regular conducting assignments and final projects
Prerequisites: MUS 103 and 104
Enrollment Limit: 8
Enrollment Preferences: upperclass students
Expected Class Size: 4
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Not offered current academic year

MUS 391  (F)(S)  Advanced Musical Performance
Individual Instruction in instrumental and vocal lessons offered at the advanced level as a regular full credit course. Intended primarily for music majors, full credit lessons must be approved by the entire music faculty. Students are expected to have demonstrated a high level of accomplishment on their instrument/voice, through at least 4 semesters of partial-credit study with their instructor. MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load; the numbers 391, 392, 491, 492 should be used for four sequence courses in the same instrument; if a different instrument is elected, the numbering sequence should start again at 391; numbers are selected without regard to semester taken or class year of student. To register for the course, a student and their instructor must submit an application to the assistant to the department chair by the Tuesday before the first Friday of the semester. Forms for full credit lessons can be obtained from a student's instructor, or from the assistant to the chair. Information on the registration process is available on the music Department website https://music.williams.edu/courses under "Advanced Musical Performance."

Class Format: individual instruction
Requirements/Evaluation: Lesson preparation, public performance, and progress throughout the semester.
Prerequisites: Intended primarily for music majors. Students should have at least 4 semesters of partial-credit study with their instructor. Completed application, registration and instructor recommendation due by the Tuesday before the first Friday of the semester.
Enrollment Limit: none
Enrollment Preferences: Permission of the instructor and music faculty. Students are expected to have demonstrated a high level of accomplishment on their instrument/voice, through at least 4 semesters of partial-credit study with their instructor.
Expected Class Size: NA
Grading: no pass/fail option, yes fifth course option

Unit Notes: Music majors may register for a total of four semesters, non-majors may register for two semesters. A student must submit an application and registration/billing form for each semester. MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load.

MUS 475 (S) Hearing Through Seeing: Music and Visuality (WS)

We hear music, but seldom is the experience purely aural -- the visual also plays a crucial role. Sound and sight converge when we observe musicians performing in concert venues, patterns of notes and rhythms on the musical score, pictures and text on album and sheet music covers, moving images on screens in films, music videos, and video games. A programmatic work conjures specific images, even whole narratives, in our "mind's eye," or imagination. A work of absolute music, such as a fugue or symphony, can do so as well, although what we envision here may be largely abstract. With hybrid genres, such as opera, musical theater, and dance, the musical and the visual jointly command our attention, often in a spectacular display.

This seminar explores myriad ways that "seeing" mediates our experience of hearing, making, and understanding music. We will examine a broad
range of topics, including synesthesia; visuality in performance and interpretation; visual metaphors such as line, color, and space in music analysis and criticism; music and representation; intersections between music and painting, sculpture, and architecture; operatic staging; illuminated music manuscripts; eye music and graphic notation; and sound and image in digital media.

Class Format: Students will give presentations on the subjects of their papers.

Requirements/Evaluation: evaluation will be based on three 5-6 page papers, three presentations, and class participation

Prerequisites: ability to read music

Enrollment Limit: 8

Enrollment Preferences: junior and senior music majors, and any student with a demonstrated interest in music

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Unit Notes: satisfies the 400-level course requirement for the music major

Distributions: (D1) (WS)

Writing Skills Notes: Students will write three 5-6 page papers and will receive detailed feedback on their writing.

Not offered current academic year

MUS 476 (S) Orality and Literacy in Historical Musical Practice (WS)

Music is an inherently oral/aural, ephemeral art form. Music history is reliant upon, and tends to privilege, its symbolic rendering in fixed notation. Yet, notated music—described by musicologist Nino Pirrotta as "the visible tip of an iceberg... seven-eighths of [which] remain submerged"—tells only a fraction of the story we seek to understand when studying musics of the past. In this seminar, we will address the unique challenges of studying the relationship between orality and literacy in historical musical practice. We will begin by considering the creative role of memory and embodied ritual in oral musical performance and transmission, as well as the ways in which various cultures have attempted to preserve such practices and the inherently transformative process they undergo when fixed in notation. We will then explore the range of theories and methodologies that scholars and performers have taken in approaching oral musical practices of the past in relation to varying levels of textual and musical literacy. Topics may include studies of epic poetry, jazz improvisation, medieval plainchant, troubadour song, improvised counterpoint, son mexicano, Neapolitan lyric song and dance, Ethiopian Christian chant, medieval and early modern instrumental music practices, Arab-Andalusian music, music in the commedia dell'arte, and various examples of contrafacture. Over the course of the semester, students will develop and present their own independent research aimed at producing a collaborative mock conference/performance as a final project for the class.

Requirements/Evaluation: evaluation will be based on three 5-6 page papers, three presentations, a final collaborative conference/performance, and class participation

Prerequisites: ability to read music

Enrollment Limit: 8

Enrollment Preferences: junior and senior music majors, and any student with a demonstrated interest in music

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Unit Notes: satisfies the 400-level course requirement for the music major

Distributions: (D1) (WS)

Writing Skills Notes: Students will write three 5-6 page papers and will receive detailed feedback on their writing.

Class Format: thesis
Grading: pass/fail only

Not offered current academic year

MUS 99  (W) Independent Study: Music
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Distributions: (D1)

Not offered current academic year
Neuroscience is a rapidly growing interdisciplinary field concerned with understanding the relationship between brain, mind, and behavior. The interdisciplinary nature of the field is apparent when surveying those who call themselves neuroscientists. Among these are anatomists, physiologists, chemists, psychologists, philosophers, molecular biologists, computer scientists, linguists, and ethologists. The areas that neuroscience addresses are equally diverse and range from physiological and molecular studies of single neurons, to investigations of how systems of neurons produce phenomena such as vision and movement, to the study of the neural basis of complex cognitive phenomena such as memory, language, and consciousness. Applications of neuroscience research are rapidly growing and include the development of drugs to treat neurodegenerative disorders such as Alzheimer’s disease and Parkinson’s disease, the use of noninvasive techniques for imaging the human brain such as fMRI and near infrared optical imaging, and the development of methods for repair of the damaged human brain such as the use of brain explants and implants. Combining this wide range of approaches and research methods to study a single remarkably complex organ—the brain—and the behavioral outcomes of its activity requires a unique interdisciplinary approach. The Neuroscience Program is designed to provide students with the opportunity to explore this approach.

THE PROGRAM

The program in neuroscience consists of seven courses: The Cell (Biology 101); Introductory Psychology (Psychology 101); Neuroscience (Neuroscience 201); Topics in Neuroscience (Neuroscience 401); and three electives. Either Biology 101 or Psychology 101 must be taken prior to enrolling in the core course, Neuroscience (Neuroscience 201), which is the foundational neuroscience course and provides the background for upper-level electives in the concentration. Ideally, Neuroscience is taken the fall of the sophomore year. Electives are designed to provide in-depth coverage of specific areas within the field and many electives include laboratory experiences. At least one elective course is required from those designated as Group A (Neuroscience courses cross-listed with Biology). At least one elective course is required from those designated as Group B (Neuroscience courses cross-listed with Psychology). A third required elective may come from Group A or Group B offerings or it may come from Group C which consists of courses that are not cross-listed with neuroscience but include significant neuroscience content. Students may also petition the advisory committee to consider courses that are not listed among these groups including neuroscience-related courses that may be taken while studying abroad. Topics in Neuroscience (Neuroscience 401) is designed to provide an integrative culminating experience and is taken by all senior concentrators during the senior year.

Required Courses

**BIOL 101 (F) LEC The Cell**
Taught by: Pei-Wen Chen, Caitlyn Bowman-Cornelius
Catalog details

**NSCI 201 / BIOL 212 / PSYC 212 (F) LEC Neuroscience**
Taught by: Shivon Robinson, Charlotte Barkan
Catalog details

**NSCI 401 (F) SEM Topics in Neuroscience**
Taught by: Matt Carter
Catalog details

**PSYC 101 (F, S) LEC Introductory Psychology**
Taught by: Noah Sandstrom, Marlene Sandstrom, Nate Kornell, Madison Sewell, Jeremy Cone, jdc2 Sandstrom, nsandstr Smith
Students can ask the Neuroscience Program Chair whether courses not listed here might count as electives.

Elective Courses

Three elective courses are required. At least one elective must be from Group A and at least one elective must be from Group B. The third elective may come from Group A, Group B, or Group C. Students may also consult the Chair to consider courses that are not listed among these groups including neuroscience-related courses that may be taken while studying abroad.

Group A

BIOL 209 / NSCI 209(F) TUT Animal Communication
  Taught by: Heather Williams
  Catalog details

BIOL 312 / NSCI 312 LEC Sensory Biology
  Taught by: Heather Williams
  Catalog details

BIOL 314 / NSCI 324(S) LEC Neuroethology
  Taught by: Charlotte Barkan
  Catalog details

BIOL 407 / NSCI 347 SEM Neurobiology of Emotion
  Taught by: Tim Lebestky
  Catalog details

BIOL 437(F) SEM Neural Flexibility: plasticity, modulation and evolution
  Taught by: Charlotte Barkan
  Catalog details

Group B

PSYC 312 / NSCI 322(S) SEM From Order to Disorder(s): The Role of Genes & the Environment in Psychopathology
  Taught by: Victor Cazares
  Catalog details

PSYC 313 / NSCI 313(F) SEM Opioids and the Opioid Crisis: The Neuroscience Behind an Epidemic
  Taught by: Shivon Robinson
  Catalog details

PSYC 314 / NSCI 314 SEM Learning and Memory in Health and Disease
  Taught by: Shannon Moore
  Catalog details

PSYC 316 / NSCI 316 SEM Neuroscience of Decision-Making
  Taught by: Yunshu Fan
  Catalog details

PSYC 319 / NSCI 319 / STS 319(S) TUT Neuroethics
  Taught by: Noah Sandstrom
  Catalog details

Group C

BIOL 204(S) LEC Animal Behavior
  Taught by: Manuel Morales
  Catalog details

BIOL 421 TUT Thermoregulation: From Molecules to Organisms
  Taught by: Steven Swoap
  Catalog details

PSYC 335(F) SEM Early Experience and the Developing Infant
  Taught by: Amie Hane
  Catalog details

PSYC 351 SEM Clinical Neuropsychology
  Taught by: Anna Miley Akerstedt
  Catalog details

THE DEGREE WITH HONORS IN NEUROSCIENCE

The degree with honors in Neuroscience provides students with the opportunity to undertake an original research project under the supervision of one or more of the Neuroscience faculty. In addition to completing the requirements of the Neuroscience Program, candidates for an honors degree
must enroll in Neuroscience 493-W31-494 and write a thesis based on an original research project. Presentation of a thesis, however, should not be interpreted as a guarantee of a degree with honors. Students interested in pursuing a degree with honors should contact the Neuroscience Advisory Committee by winter study of their junior year.

**STUDY ABROAD**

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions). Securing syllabi is often difficult, so a discussion with the program Chair is certainly necessary. Under no circumstances should a student assume that a course taken at another institution will count toward the concentration.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

The program Chair and advisory committee will consider the course title, course description, and complete syllabus, including readings/assignments. Exams or other written work will also be considered. Written work may be requested if the course description suggests that it is only tangentially related to the field of neuroscience. Written work would, therefore, need to demonstrate that there was sufficient emphasis on neuroscience material.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes. Generally there is a maximum of 2 credits that can be completed through a study abroad program.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

**Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. NSCI 201 and NSCI 401 cannot generally be completed abroad. NSCI should be taken during the sophomore year if possible and includes a laboratory component that is rarely comparable in study abroad courses.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options?** (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

NSCI 201 is only taught during the fall semester. As such, students planning to study away should plan to take it during the sophomore year.

**Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:**

Some students (rarely) have failed to discuss the course in advance of their study abroad experiences. They may also have assumed that approval of a course by another department (e.g., Biology or Psychology) would necessarily mean that they would receive Neuroscience credit for the course. This is not necessarily the case.

---

**NSCI 201 (F) Neuroscience**

**Cross-listings:** BIOL 212 / PSYC 212

**Primary Cross-listing**

This course is designed to give an overview of the field of neuroscience progressing from a molecular level onwards to individual neurons, neural circuits, and ultimately regulated output behaviors of the nervous system. Topics include a survey of the structure and function of the nervous system, basic neurophysiology and neurochemistry, development, learning and memory, sensory and motor systems, and clinical disorders. Throughout the course, many examples from current research in neuroscience are used to illustrate the concepts being considered. The lab portion of the course will emphasize a) practical hands-on exercises that amplify the material presented in class; b) interpreting and analyzing data; c) presenting the results in written form and placing them in the context of published work; and d) reading and critiquing scientific papers.

**Requirements/Evaluation:** Evaluation will be based on participation in discussion groups, exercises, problem sets and quizzes performed in small groups, lab reports, midterm exams, and a final exam.

**Prerequisites:** PSYC 101 or BIOL 101; open to first-year students only with permission of instructor
**Enrollment Limit:** 72  
**Enrollment Preferences:** Sophomores and Biology and Psychology majors  
**Expected Class Size:** 72  
**Grading:** yes pass/fail option, no fifth course option  
**Distributions:** (D3)  
**This course is cross-listed and the prefixes carry the following divisional credit:**  
BIOL 212(D3) NSCI 201(D3) PSYC 212(D3)

**NSCI 209 (F) Animal Communication (WS)**  
**Cross-listings:** BIOL 209  
**Secondary Cross-listing**  
Animal communication systems come in as many varieties as the species that use them. What they have in common are a sender that encodes information into a physical signal and a receiver that senses the signal, extracts the information, and adjusts its subsequent behavior accordingly. This tutorial will consider all aspects of communication, using different animal systems to explore different aspects of the biology of signaling. Topics will include the use of syntax to carry meaning in chickadee calls, synchronous signaling by fireflies, gestural communication by primates, long-distance chemical attractants that allow male moths to find the object of their desire, and cultural evolution within learned signaling systems.  
**Requirements/Evaluation:** evaluation will be based on five 5-page papers, five short response papers, and the student's effectiveness in tutorial discussions.  
**Prerequisites:** BIOL 101 and 102; open to sophomores, juniors, and seniors  
** Enrollment Limit:** 10  
** Enrollnent Preferences:** Biology majors and Neuroscience concentrators who need a Biology elective to complete the concentration; then sophomores.  
** Expected Class Size:** 10  
** Grading:** no pass/fail option, no fifth course option  
** Distributions:** (D3) (WS)  
**This course is cross-listed and the prefixes carry the following divisional credit:**  
NSCI 209(D3) BIOL 209(D3)  
**Writing Skills Notes:** This course is a tutorial, and each student will write five position papers and five response papers. Extensive feedback will be provided; students will be required to rewrite one position paper, and may rewrite any of them.  
**Attributes:** COGS Related Courses NSCI Group A Electives

**NSCI 312 (F) Sensory Biology**  
**Cross-listings:** BIOL 312  
**Secondary Cross-listing**  
How do animals sense properties of the physical world? How do they convert physical or chemical energy to a signal within a cell that carries
information? How is that information represented? What are the limits on what can be sensed? We will look for answers to these questions by investigating the molecular and cellular mechanisms of sensory transduction and how these mechanisms constrain the types of information that the nervous system encodes and processes. We will also ask how natural selection shapes the type of sensory information that animals extract from the world, and what adaptations allow some species to have "special" senses. Some of the examples we will consider are: bat echolocation (hair cells in the ear), detecting visual motion (amacrines cells in the mammalian retina), the constant reshaping of the olfactory system (chemical mapping of odors), what makes a touch stimulus noxious, and enhanced color vision (in birds, bees, and shrimp). Laboratory exercises will focus on the nematode C. elegans, an important model system, to explore and extend how we understand touch, temperature sensation, chemosensation, and light sensation.

Requirements/Evaluation:  Four take-home exams, an independent group research project (proposal, followed by results/discussion), presentation about a non-standard sensory system, many short online quizzes, and lab + class participation.

Prerequisites:  BIOL 101 and either BIOL 212/NSCI 201 or BIOL 205

Enrollment Limit: 24

Enrollment Preferences: Preference to senior Biology majors who need a 300-level course; then to senior Neuroscience concentrators who need a Group A elective; then to Biology majors. Not open to students who have taken Biology 213.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

NSCI 314 (S)  Learning and Memory in Health and Disease

**Cross-listings:** PSYC 314

**Secondary Cross-listing**

This class will examine the neuroscientific basis of different types of learning and memory (such as declarative memory, motor memory, and associative memory), including the brain circuits, cellular mechanisms, and signaling pathways that mediate these different processes. In addition, we will explore how these processes can be disrupted in different diseases and disorders (such as Alzheimer's disease or post-traumatic stress disorder) and we will discuss the strategies and targets for therapeutic intervention. Class meetings will include a mix of lectures, discussions, and student presentations. Critical evaluation of peer-reviewed studies involving both human and animal models will serve as a foundation for class discussions. Working in small teams, students will also design and conduct an empirical project related to the course material.

**Requirements/Evaluation:** In-class presentations and participation in discussions, completion of an empirical research project which will include a project proposal (3-5 pages), data collection and analysis, and a final report (10-20 pages) along with a poster presentation.

**Prerequisites:** PSYC 212/NSCI 201/BIOL 212

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors and Neuroscience concentrators

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

NSCI 316 (S)  Neuroscience of Decision-Making

**Cross-listings:** PSYC 316

**Secondary Cross-listing**

Humans are constantly making decisions: big and small, conscious and unconscious. This seminar will explore different aspects of the decision-making process, including (1) the algorithms for decision-making, (2) the neurological basis of decision-making and (3) the psychological, social, and physiological factors that influence our decision-making. We will examine how scientific approaches can help us understand complex social issues related to decision making. For example: how can stereotypes be understood as a failure in belief updating; how does confirmation bias lead to partisanship; and how to think of xenophobia from the "explore-exploit trade-off" perspective? In this course, we will explore how the brain and its neural networks contribute to these phenomena. The laboratory component of the course will introduce the research tools for studying different aspects of decision-making, including experimental paradigms, computational models and methods of analysis. Students will apply these tools to collaboratively design and conduct behavioral experiments and will analyze neural recording data to understand the relationship between neural activity and decision-making behaviors. Over the course of the semester, students will have the opportunity to develop skills in computer programming to better understand computational models and data analysis.

**Requirements/Evaluation:** Class presentations, participation in discussions, keeping a decision journal, short response papers and laboratory assignments, participation and presentation of empirical laboratory studies.

**Prerequisites:** PSYC 212 (same as BIOL 212 or NSCI 201) or permission of instructor.

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors, Neuroscience concentrators, and Cognitive Science concentrators

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

NSCI 319 (S) Neuroethics (WS)

Cross listings: PSYC 319 / STS 319

Secondary Cross-listing

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation: six 5-page position papers and five 2-page response papers as well as participation in discussions

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 319(D3) STS 319(D2) NSCI 319(D3)

Writing Skills Notes: In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

NSCI 322 (S) From Order to Disorder(s): The Role of Genes & the Environment in Psychopathology

Cross listings: PSYC 312

Secondary Cross-listing

This course examines how experimental methods in neuroscience can be used to understand the role of nature (genes) and nurture (the environment) in shaping the brain and behavior. In particular, we will explore how neuroscience informs our understanding of psychiatric disorders such as anxiety, depression, and schizophrenia. We will investigate the biological underpinning of these disorders as well as their treatments. Readings will include human studies as well as work based on animal models. Topics will include: the ways in which environmental and genetic factors shape risk and resiliency in the context of psychiatric disease, the neural circuits and peripheral systems that contribute to psychopathology, and the mechanisms through which interventions may act. In the laboratory component of the course, students will gain hands-on experience in using animal models to study complex behavior and their associated neural mechanisms.

Requirements/Evaluation: class presentations, participation in discussions, project proposal (5 pages), empirical project paper (5-7 pages), poster and poster presentation, participation in all phases of the empirical project research experience (experiment design, data collection, data graphing, data analysis) including oral and written presentation of key findings.

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Secondary Cross-listing

How does an animal experience its environment? What mechanisms allow an animal to select and generate behaviors? In this course we will use a comparative approach to examine how nervous systems have evolved to solve problems inherent to an animal's natural environment. We will discuss how animals sense physical and chemical properties of their surroundings and convert this information to a signal encoded in their brain. We will explore how nervous systems of diverse species are adapted to extract sensory information that is relevant to their survival—such as sound, light, and smell. We will also examine how neural circuits control muscles to generate motor behaviors such as locomotion and vocalization and how sensory information is integrated to influence behavior. To highlight the discovery process, we will read and discuss primary research articles that complement course content. During labs we will use a variety of approaches such as electrophysiology, optogenetics, behavior, and data analysis to understand sensory and motor systems in several different organisms.

Requirements/Evaluation:  Participation in class and lab, several take-home exams, independent group research project and presentation, and short written class and lab assignments.

Prerequisites:  BIOL 212 or BIOL 205

Enrollment Limit:  24

Enrollment Preferences:  Senior, then junior, Biology majors and NSCI concentrators who need a 300-level course or a NSCI elective

Expected Class Size:  24

NSCI 347  (S)  Neurobiology of Emotion

Cross-listings:  BIOL 407

Secondary Cross-listing

Emotion is influenced and governed by a number of neural circuits and substrates, and emotional states can be influenced by memory, cognition, and many external stimuli. We will read and discuss articles about mammalian neuroanatomy associated with emotion as defined by classic lesion studies, pharmacology, electrophysiology, fMRI imaging, knockout and optogenetic mouse studies, for investigating neural circuit function in order to gain an understanding of the central circuits and neurotransmitter systems that are implicated in emotional processing. We will focus initially on the neural circuits involved in fear, as a model for how human and animal emotion and physiology is studied, with special sessions on emotional responses to music and art, as well as discussions about burgeoning neurobiological research into the emotion of disgust. The larger goal of the course is to give students opportunities and experience in critical evaluation and discussion of primary scientific literature, and to develop and refine strategies on how
to use scientific evidence in building arguments in essays.

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL212/NSCI201; open to juniors and seniors. Sophomores must get instructor's consent prior to enrolling.

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not taken a 400-level Biology course; then to eligible NSCI concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

NSCI 401  (F)  Topics in Neuroscience

Neuroscientists explore issues inherent in the study of brain and behavior. The overall objective of this seminar is to create a culminating senior experience in which previous course work in specific areas in the Neuroscience Program can be brought to bear in a synthetic, interdisciplinary approach to understanding complex problems. The specific goals for students in this seminar are to evaluate original research and critically examine the experimental evidence for theoretical issues in the discipline. Topics and instructional formats will vary somewhat from year to year, but in all cases the course will emphasize an integrative approach in which students will be asked to consider topics from a range of perspectives including molecular,
cellular, systems, behavioral and clinical neuroscience. Previous topics have included autism, depression, stress, neurogenesis, novel neuromodulators, language, retrograde messengers, synaptic plasticity, and learning and memory.

Requirements/Evaluation: Participation in class discussion, presentation of research articles, several short papers

Prerequisites: Open only to seniors in the Neuroscience program

Enrollment Limit: 20

Enrollment Preferences: Senior Neuroscience concentrators

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

**NSCI 31 (W) Senior Thesis: Neuroscience**
To be taken by students registered for Neuroscience 493-494.

**Class Format:** thesis

**Grading:** pass/fail only

Not offered current academic year

**NSCI 99 (W) Independent Study: Neuroscience**
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

Not offered current academic year
To engage in philosophy is to ask a variety of questions about the world and our place in it—questions that we confront in our everyday lives or that underlie our ordinary practices. What is a good, meaningful, or happy human life (ethics and politics)? What do we owe non-human species and future generations (applied ethics/practical philosophy)? Does god exist? (metaphysics)? What can we know, and what makes a belief or statement true (epistemology)? Are there objective standards for judging works of art? Thus, philosophers also address questions relevant to many disciplines.

The program in philosophy is designed to aid students in thinking about such questions, by acquainting them with influential work in the field, past and present, and by giving them tools to grapple with these issues themselves. The program emphasizes training in clear, critical thinking and in effective writing. Most of our courses are offered as small seminars or tutorials in which students have multiple opportunities to develop skills in reasoning and writing interpretive and critical essays.

### MAJOR

The Philosophy major consists of nine semester courses: three required courses and six electives. The required courses are: any 100-level philosophy course, Philosophy 201 (History of Ancient Greek Philosophy) or Philosophy 202 (History of Modern Philosophy), and Philosophy 401 (Senior Seminar). The six electives are structured by a distribution requirement. Students must take at least one course in each of three areas: Contemporary Metaphysics and Epistemology [M&E], Contemporary Value Theory [V], and History [H]. These requirements apply to majors in the Class of 2018 and after.

Courses taught in other departments at Williams or at other institutions will not count toward the distribution requirement (Williams-Exeter tutorials may count, however, with the approval of the Department Chair). Up to two cross-listed courses taught in other departments may count as electives toward the major. No more than one 100-level course may count toward the major (and one 100-level course is required for the major—no exceptions).

**We recommend the following trajectory through the major:**

- By the end of the first year, take a 100-level philosophy course (this is typically the first step in the major) and one other philosophy course.
- By the end of the second year, complete a 100-level philosophy course, Phil 201 or Phil 202, and at least one other philosophy course. (If you will be away for the whole of your junior year, you should complete at least five courses by the end of the second year, preferably six.)
- By the end of the junior year, complete a 100-level philosophy course, Phil 201 or Phil 202, and at least four other philosophy courses.
- Other recommendations: take at least one tutorial; distribute your six electives evenly across the three distribution baskets; take a logic course; and take both PHIL 201 and PHIL 202.

### The Degree with Honors in Philosophy

The degree with honors in Philosophy is awarded to students who have demonstrated outstanding achievement in a program of study that extends beyond the requirements of the major. This additional required work can take the form either of a senior essay written over one semester plus winter study (maximum 40 pages) or a year-long thesis (maximum 75 pages). Students planning to pursue a degree with honors must first write a brief proposal after having consulted with an advisor, then submit the proposal to the Department in mid-March (before spring break) of the junior year. To be eligible for honors candidates must have GPAs of 3.6 or higher in their courses in philosophy at the end of the junior and senior years. A
recommendation for graduation with honors will be made on the basis of the thoroughness, independence, and originality of the student’s written work as well as their performance in a defense that will be organized by their advisor in consultation with the Chair.

STUDY AWAY

The Williams-Exeter Programme at Oxford (WEPO): the first full Oxford philosophy tutorial will count as the equivalent of two full-semester philosophy courses at Williams; the second full Oxford philosophy tutorial will count as the equivalent of one full-semester philosophy course at Williams, for a total of three Williams philosophy courses. Courses must be pre-approved by the Chair of the Philosophy Department, who will also determine which, if any, courses will count toward the philosophy major distribution requirements.

Courses taken in other Study Away programs: Students may petition the Philosophy Department for credit for philosophy courses taken at their Study Away institution. They should consult with the department Chair before they commit to a program. Final determinations will be made on the basis of the course syllabus and the quality of the student’s written work for the course. Typically, courses taken while studying away will not fulfill distribution requirements for the philosophy major at Williams.

PHILOSOPHY RELATED COURSES

The following courses offered in other departments, while not cross-listed with Philosophy, may be of interest to philosophy students:

- PSCI 130(F, S) SEM Introduction to Political Theory
  - Taught by: Laura Ephraim, Mark Reinhardt

- REL 308 / SOC 308 / STS 308 SEM What is Power?
  - Taught by: Jason Josephson Storm
  - Catalog details

PHIL 109  (F)  Skepticism and Relativism  (WS)

Intellectually, we are ready skeptics and relativists. We doubt, we point out that no one can be certain in what she believes, and we are suspicious of declarations of transcendent reason or truth (unless they are our own). Emboldened by our confidence in skeptical arguments, we claim that knowledge is inevitably limited, that it depends on one's perspective, and that everything one believes is relative to context or culture. No domain of inquiry is immune to this destructive skepticism and confident relativism. Science is only "true" for some people, agnosticism is the only alternative to foolish superstition, and moral relativism and, consequently, nihilism are obvious. But is the best conclusion we can come to with respect to our intellectual endeavors that skepticism always carries the day and that nothing at all is true? In this tutorial, we will investigate the nature of skepticism and the varieties of relativism it encourages. Our readings will come primarily from philosophy, but will be supplemented with material from anthropology, physics, psychology, and linguistics. We will look at relativism with respect to reason and truth in general as well as with respect to science, religion, and morality. Along the way, we will need to come to grips with the following surprising fact. With few exceptions, thoroughgoing skepticism and relativism have not been the prevailing views of the greatest minds in the history of philosophy. Were they simply too unsophisticated and confused to understand what is for us the irresistible power of skepticism and relativism? Or might it be that our skepticism and relativism are the result of our own laziness and failure? Of course, this question cannot really be answered, nor is there any value in trying to answer it, and any "answer" will only be "true" for you. Right?

Requirements/Evaluation: participants will present substantial written work in the tutorial every other week, and will be responsible for commenting on their tutorial partner's work.

Prerequisites: none; this tutorial is an appropriate first course in PHIL.

Enrollment Limit: 8

Enrollment Preferences: This tutorial is specifically designed for first-year students, and they will be given absolute preference. Do not write to the instructor indicating a special interest, this will make no difference. If oversubscribed, students will be selected randomly.

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option
PHIL 110 (F) History of Modern Moral and Political Philosophy (WS)

This course is a survey of 17th-, 18th-, and 19-century moral and political philosophy. We will consider what, if anything, justifies the rules of morality and law, and we will consider the nature, value, and limits of freedom. We will ask whether our individual actions and our social and political structures are based in our self-interested desires, our natural instincts, or our rationality. Authors will include: Hobbes, Locke, Rousseau, Hume, Kant, Smith, Marx, and Mill.

Requirements/Evaluation: Students will write a number of short essays.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

PHIL 115 (S) Personal Identity (WS)

Through lectures, discussions, close readings and assigned writings, we will consider a variety of philosophical questions about the nature of persons, and personal identity through time. Persons are subjects of experiences, have thoughts and feelings, motivation and agency; a person is thought of as continuous over time, and as related to, recognized and respected by other persons. Thus, the concept of person plays a significant role in most branches of philosophy, e.g. metaphysics, epistemology, moral and political philosophy, philosophy of mind. Conceptions of person are equally important in science (especially in psychology), law, and the arts. Questions about persons are of central importance for a myriad of our theories and practices, and for the ways in which we live our lives. The aim of this course is to explore and evaluate a number of rival conceptions of persons and personal identity over time. Some of the questions which we will discuss are: What is a person? How do I know that I am one? What constitutes my knowledge of myself as a person, and does that knowledge differ in any significant respect from my knowledge of physical objects and of other people? Our starting and central question will be: What makes me the particular person that I am, and how is my identity as this individual person preserved over time? The course will place special emphasis on developing students' intellectual skills in close, analytical reading; reconstructing and evaluating claims and reasons that support them; producing original ideas and arguments, orally and in writing; responding to the claims and arguments presented in texts and in class; and writing clear, polished, well-argued papers.

Requirements/Evaluation: Class attendance, preparedness and participation; additional small group weekly meetings, and reports from these meetings (group members rotate in writing the report); 12 short writing assignments. No final paper and no exam.

Prerequisites: none; open to first year students

Enrollment Limit: 19

Enrollment Preferences: freshmen, sophomores, and philosophy majors who need a 100 level course to satisfy requirement for the major

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Unit Notes: meets 100-level PHIL major requirement
**PHIL 116 (S) Mind, Knowledge, and Reality (WS)**

This course is an introduction to philosophy through three major themes: The nature of the universe, the existence of gods, and the mind/body problem. Throughout, we will appeal to reason and evidence in forming our best beliefs. Our discussions will range over historical and contemporary works in the Western tradition.

**Requirements/Evaluation:** active participation; four (5-6 page) essays

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Strong preference given to first-years and sophomores; do not contact the instructor to plead for special enrollment consideration.

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets 100-level PHIL major requirement

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will craft 4 six page essays, and each will receive extensive comments on structure and composition with an eye toward developing skills in philosophical writing.

---

**PHIL 117 (S) Arguing about God (WS)**

"Faith is a fine invention," according to Emily Dickinson's poem, "when gentlemen can see; but microscopes are prudent in an emergency." This introduction to philosophy will see how far the microscopes of reason and logic can carry us in traditional arguments about the existence and nature of God. We will closely analyze classical arguments by Augustine, Avicenna, Aquinas, Anselm, Maimonides, Descartes, and others. Pascal's wager is a different approach: it argues that even though proof of the existence of God is unavailable, you will maximize your expected utility by believing. We will examine the wager in its original home of Pascal's Pensees, and look at William James' related article, "The Will to Believe." The millennia old problem of whether human suffering is compatible with God's perfection is called "the problem of evil." We will examine this issue in Hume's Dialogues Concerning Natural Religion, classic sources and contemporary articles. Students should be aware that, in the classic tradition, this class resembles a logic course.

**Class Format:** seminar

**Requirements/Evaluation:** 5 short papers

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** meets 100-level PHIL major requirement

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Five 4 or 5 page papers, evenly spaced throughout the semester. Students will receive timely comments on their writing skills, with suggestions for improvement.
PHIL 118  (F)  Meaning, Communication and Society  (DPE)

The primary way we interact with others is through the use of language. We use language to communicate meanings in order to accomplish a variety of goals: to convey information, make requests, establish rules, utilize power, issue protests, and much more. We coordinate our lives through sounds from mouths, signs from hands, and squiggles on paper because somehow sounds, signs, and squiggles have meanings. This course is an investigation into how language is used to express meaning, and how such expression can have real interpersonal and societal impact. Using resources from philosophy and linguistics, we will study various ways in which literal and non-literal uses of language influence our social lives. Of particular interest will be how language can be used to establish, reinforce, and resist power relationships involving race and gender.

Class Format: This class will have both lecture and seminar elements.
Requirements/Evaluation: 5-6 papers over the course of the semester.
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Preference given to first year students and philosophy majors.
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
Difference, Power, and Equity Notes: This course has a focus on the role of language in relationships involving power, oppression, and group inclusion between individuals belonging to various socio-political identities.
Attributes: Linguistics

Fall 2024
SEM Section: 01    MR 2:35 pm - 3:50 pm     Christian  De Leon

PHIL 119  (F)(S)  Why Obey the Law?  (WS)

What social and political arrangements are most conducive to fostering human well-being and the common good? What makes governmental authority legitimate? A foundation in reason and morality? Popular sovereignty? Does might make right? We turn first to two of Plato's most famous dialogues, *The Apology* and *The Republic* in which we encounter Socrates' trial for impiety and corrupting the youth, and, Socrates effort to defeat an argument that might makes right, that only the weak agree to obey the law, by envisioning an ideal (non-democratic) city-state ruled by benevolent philosopher-kings. The rest of the course is devoted to figures in the history of modern political philosophy, both defenders and critics of democratic liberalism (egs., Hobbes, Locke, Rousseau, Marx, J.S. Mill, Nietzsche, W.E.B Dubois, etc.). We conclude with contemporary reflections on the fate of democracy today.

Class Format: Class participation will involve individual and group activities meant to give you practice in thinking quickly, working with others, and building arguments.
Requirements/Evaluation: Six pass/fail short response essays of approximately 500 words each in which students write about a particular part of the assigned text (such as explaining what a passage means, drawing connections between different parts of the text, identifying an argument, responding to an argument, etc); two 5-page papers based on prompts; participation.
Prerequisites: None. Open to any student interested in the sources of our current understandings of government, the basis of its authority, and strengths and weaknesses of democracy.
Enrollment Limit: 19
Enrollment Preferences: Majors, first years, and sophomores will normally receive preference if the course over enrolls.
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Unit Notes: meets 100-level Phil major requirement
Distributions: (D2) (WS)
Writing Skills Notes: The professor and the teaching assistant will provide detailed comments on short and longer essays and provide occasional peer review opportunities, handouts and discussions of frequent types of errors, different approaches to writing and drafting, and the importance of
PHIL 122  (F)  Philosophical Approaches to Contemporary Moral Issues  (WS)

In this tutorial we will examine a number of prominent and controversial social issues, using our study of them both as an opportunity to better understand the moral dimensions of those issues in and of themselves, and to consider the ways in which selected classical and contemporary moral theories characterize and address those moral dimensions. Topics will depend to some extent on student interest, but are likely to include concerns that fall under such headings as euthanasia, conscientious eating, abortion, the ethics of protest, and Covid-19. The course will use a case-based approach to examine these issues, and so in most weeks we will (1) read philosophical articles focused on a key concept or set of arguments central to the issue, and (2) consider in detail one morally complex case in which the concept or arguments have special application or relevance. In addition, we will devote several class meetings interspersed throughout the semester to reading foundational sources in ethical theory.

Class Format: Groups of three students (rather than the more conventional two students) will meet weekly with the professor.

Requirements/Evaluation: three tri-weekly tutorial papers and two short papers, oral commentaries, and tutorial discussion

Prerequisites: none; this course is suitable for first-year students

Enrollment Limit: 15

Enrollment Preferences: first-year students, sophomores, Philosophy majors, and those who have previously been dropped from the course for over-enrollment

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (WS)

Writing Skills Notes: Students will write three tutorial papers of 5-7 pages in length, one of which they will revise and resubmit, as well as two 2-3 page papers. In each, students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Attributes: JLST Interdepartmental Electives

Not offered current academic year

PHIL 123  (F)  Objectivity in Ethics  (WS)

Are moral beliefs simply expressions of opinion, or can we construct good arguments on their behalf? In this course we’ll examine several influential attempts to provide a rational foundation for morality, along with Nietzsche’s wholesale rejection of these efforts. Readings will include work by Plato, Hobbes, Kant, Mill, Nietzsche, and contemporary authors.

Requirements/Evaluation: Participation in discussion; short response papers; four 5-page papers, evenly spaced throughout the semester

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: First-years and sophomores, and students who need to fulfill their 100-level requirement for the philosophy major

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Unit Notes: Meets 100-level PHIL major requirement

Distributions: (D2)  (WS)

Writing Skills Notes: Four 5-page papers, evenly spaced throughout the semester. Students will receive timely comments on their writing skills, with
PHIL 126 (S) Paradoxes (WS)

There are three grains of sand on my desk. This is unfortunate, but at least there isn’t a heap of sand on my desk. That would be really worrisome. On the other hand, there is a heap of sand in my backyard. I don’t know how exactly how many grains of sand are in this heap, but let’s say 100,000. My daughter removes one grain of sand. I don’t know why, she just does. It seems like there is still a heap of sand in my backyard. In fact, it seems like you can’t change a heap of sand into something that isn’t a heap of sand by removing one grain of sand. Right? But now we have a problem. By repeated application of the same reasoning, it seems that even after she removes 99,997 grains of sand—I don’t know what she wants with all this sand, but I’m starting to worry about that girl—there is still a heap of sand in my backyard. But three grains isn’t enough for a heap. So there is not a heap in my backyard. Now I’m confused. Where did my reasoning go wrong? What we have here is an example of the *sorites* paradox. It is a paradox, because I started with seemingly true statements and used valid reasoning to arrive at contradictory conclusions. We can learn a lot about logic, language, epistemology and metaphysics by thinking through and attempting to resolve paradoxes. In this class, we’ll work together to think through some ancient and contemporary paradoxes. We’ll also work on writing lucid prose that displays precisely the logical structure of arguments, engages in focused critique of these arguments, and forcefully presents arguments of our own. Other topics could include: Zeno’s paradoxes of motion and plurality, the liar’s paradox, the surprise-exam paradox, paradoxes of material constitution, *Newcomb’s Problem*, and the *Prisoner’s Dilemma*.

Requirements/Evaluation:  
(i) short response papers;  
(ii) midterm paper (~5-6 pages)  
(iii) Final term-paper (~10 pages) in multiple drafts;  
(iv) Active and informed participation in class discussions.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: First and second year students. Prospective philosophy majors.

Expected Class Size: 15-19

Grading: no pass/fail option, yes fifth course option

Unit Notes: Meets 100-level PHIL major requirement

Distributions: (D2)  (WS)

Writing Skills Notes: Students will write a number of short papers. Both the content and the writing will be evaluated. These papers will focus on clear and precise presentation and evaluation of arguments. There will be a midterm paper revising an earlier short paper. There will be a final term-paper written in multiple drafts.

Spring 2025

SEM Section: 01  TF 2:35 pm - 3:50 pm  Keith E. McPartland

PHIL 127 (F)(S) Meaning and Value (WS)

What gives an individual life meaning? Pleasure? Success in fulfilling desires? Flourishing in ways distinctive to a rational agent or a human being (including, for example, developing rational capacities and self-mastery, succeeding in worthwhile projects, cultivating relationships, living morally, developing spiritually)? Can we be mistaken about how well our lives are going, or about what has value? What are the main sources of uncertainty here? Does the fact that our lives will end threaten their meaning? How can science contribute to our understanding of these issues? We’ll examine these and related questions through historical and contemporary readings. This course aims to teach skills required for good philosophical thinking, including those involved in reading texts closely, reconstructing and evaluating arguments, articulating ideas clearly in discussion, and crafting well-structured and carefully-reasoned papers.

Class Format: Students will meet in trios for this tutorial. We will meet on a fixed weekly schedule agreed to by the instructor and participants.

Requirements/Evaluation: Four lead tutorial papers (5-6 pages in length), seven critiques (2 pages in length), and one rewrite.

Prerequisites: First-years and sophomores only.

Enrollment Limit: 12

Enrollment Preferences: First-years and sophomores, and students who need to fulfill their 100-level requirement for the philosophy major. This tutorial is an appropriate first course in PHIL.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option
Unit Notes: This tutorial meets the 100-level PHIL major requirement.

Distributions: (D2) (WS)

Writing Skills Notes: Each student will write a lead tutorial paper (5-6 pages in length) or a peer critique (2 pages) in alternating weeks. The instructor will provide timely comments on writing skills, with suggestions for improvement.

TUT Section: T1 TBA Melissa J. Barry
Spring 2025
TUT Section: T1 TBA Melissa J. Barry

PHIL 129 (S) Language and the Mind

Cross-listings: COGS 129

Primary Cross-listing
Many animals communicate, but only humans can use language. What is language? Is the ability to learn it specialized, or just a matter of having enough cognitive processing power? Do successes of large language models and AI chat bots confirm or challenge traditional linguistic theory? Does language in any way determine, shape, or enable thought? How sophisticated could a mind without language be? Does knowledge of language require consciousness? In this course we will investigate (a) what makes language stand out from other kinds of communication system and (b) what makes human minds uniquely capable of acquiring language. Drawing on debates about the evolution of language, Chomskyian universal grammar, the computational theory of mind, and more, we will explore the philosophical consequences of our existence as linguistic creatures.

Requirements/Evaluation: Short reading responses (approx. 2 pages) every other week, two exams

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Priority given to first and second years

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 129(D2) COGS 129(D2)

Attributes: Linguistics

Not offered current academic year

PHIL 201 (F) History of Ancient Greek Philosophy

Cross-listings: CLAS 203

Primary Cross-listing
Very few people believe that everything is water, that we knew everything before birth, that philosophers ought to rule the state, or that the earth is at the center of the cosmos. Why then should we spend our time studying people who in addition to having these surprising beliefs have been dead for 2500 years? First of all, Greek thinkers, especially Plato and Aristotle, radically shaped the trajectory of Western thought in every area of philosophy. No one can have an adequate understanding of Western intellectual history without some familiarity with the Greeks, and we might think that an understanding of our intellectual history can deepen our understanding of our own situation. More importantly, many of the thinkers that we will read in this class are simply excellent philosophers, and it is worthwhile for anyone interested in philosophical problems to read treatments of these problems by excellent philosophers. We will begin the course by looking briefly at some of the Presocratic philosophers active in the Mediterranean world of the seventh through fifth centuries BCE, and some of the sophists active in the fifth century. We will then turn to several of Plato's dialogues, examining Plato's portrayal of Socrates and his development of a new and profoundly powerful philosophical conception. Finally, we will examine some of Aristotle's works on metaphysics, epistemology and ethics, considering some of the ways Aristotle's thought responds to that of predecessors.

Requirements/Evaluation: There will be a midterm and final exam. There will also be short writing assignments.

Prerequisites: None
**PHIL 203 (S) Introductory Logic (QFR)**

Logic is the study of reasoning and argument. More particularly, it concerns itself with the differences between good and bad reasoning, between strong and weak arguments. This course is an introduction to the precise characterization of good logical reasoning. We will learn a formal language, Monadic First-Order Logic, designed to cleanly represent good inference patterns. Learning this language will primarily involve learning two skills: (i) translation between sentences of English and formulas of the logical language, and (ii) proving the validity of logical arguments using a system of natural deduction. No prior mathematical/logical/formal experience is assumed for this course.

**Requirements/Evaluation:** A midterm, a final, frequent problem sets.

**Prerequisites:** none

**Enrollment Limit:** 40

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** This course teaches two formal languages of logic: sentential logic and predicate logic.

---

**PHIL 202 (S) History of Modern European Philosophy**

This course is a survey of 17th- and 18th-century metaphysics and epistemology. Topics will include: What can we know through our senses? Can we know anything through reason alone? What is the mind? What is the body? What is the relationship between the mind and the body? What are space and time? Are we rationally justified in drawing causal inferences? Are we justified in believing in God? Authors will include: Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant.

**Requirements/Evaluation:** 3 mid-term papers, and a final exam

**Prerequisites:** It is recommended that students have taken a 100-level Philosophy course, though not strictly required.

**Enrollment Limit:** 15

**Enrollment Preferences:** Enrollment preference will be given to majors, prospective majors, students who have taken a 100-level PHIL course, and first-years and sophomores.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Philosophy majors must take either PHIL 201 or PHIL 202 (and can take both)

**Distributions:** (D2)

**Quantitative/Formal Reasoning Notes:** This course teaches two formal languages of logic: sentential logic and predicate logic.
PHIL 206 (S) Philosophy and Tragedy  (WS)

Tragedy and philosophy were two of the finest achievements of classical Athenian civilization, and each attempts to reveal to the reader something fundamental about our shared human condition. The worldview that underlies classical tragedy, however, seems markedly different from the one that we find in classical philosophy. While Plato and Aristotle differ on many points, they share the belief that the cosmos and the human place within it can be understood by rational means. Furthermore, they share the conviction that the most important components of a successful life are within the control of the individual human being. The picture that we find in the works of the tragedians, Aeschylus, Sophocles and Euripides is markedly different. The tragedians emphasize the ways in which the cosmos and our role in it resists any attempt to be understood, and emphasize the ways in which the success or failure of our lives often turns on things completely beyond our control. The view of the tragedians can lead to a thoroughgoing nihilism according to which --the best thing of all [for a human being] is never to have born-but the next best thing is to die soon (Aristotle's Eudemus as quoted in Nietzsche's Birth of Tragedy; see also Sophocles' Oedipus at Colonus).* Despite these rather grim pronouncements, tragic drama has continued to fascinate and educate generations. Furthermore, philosophers have continued to revisit the existential questions vividly raised by Greek tragedy. In this course, we will examine a number of Greek tragedies and philosophical writing on tragedy and the tragic. We will read the Oresteia and Prometheus Bound by Aeschylus, Sophocles' Theban Cycle, and the Hippolytus, Bacchae and Philoctetes by Euripides. As we read through these plays, we will also examine a number of philosophical works about tragedy. We will begin with Aristotle’s Poetics and will continue with Hume’s Of Tragedy, Hegel’s various writings on tragedy, and Nietzsche’s The Birth of Tragedy. If possible, we will arrange to see a live performance of a Greek tragedy.

Requirements/Evaluation: five papers, five responses and a final paper in multiple drafts; each week one student will write a paper responding to the week’s readings and the other student will write a response to that paper

Prerequisites: none;

Enrollment Limit: 10

Enrollment Preferences: Philosophy and Classics Majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: Satisfies the philosophy department history (H) requirement.

Distributions: (D2) (WS)

Writing Skills Notes: This is a tutorial in which each student will write 5 papers and 5 paper responses. We will spend a good bit of time discussing writing mechanics and skills as we discuss the papers.

Not offered current academic year

PHIL 207 (S) Contemporary Philosophy of Mind

The philosophy of mind has been one of the most active areas of philosophical inquiry over the last century. Whether the mind can be fully understood within a scientific framework has taken on an exciting urgency. In this course we will investigate the broad topics of consciousness and thought by surveying the many approaches to mind that yield the contemporary debates.

Requirements/Evaluation: weekly two page papers on focused topics and two 8- to 10-page papers

Prerequisites: at least one prior 100- or 200-level PHIL or COGS course

Enrollment Limit: 19

Enrollment Preferences: prospective Philosophy majors and Cognitive Science concentrators

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: COGS Interdepartmental Electives PHIL Contemp Metaphysics + Epistemology Courses

Not offered current academic year
PHIL 211  (S)  Ethics of Public Health  (WS)

From questions about contact tracing apps to racial and age disparities in health risk and outcomes, the COVID-19 pandemic has foregrounded the importance of ethics as a key concern in public health policies and activities. Moreover, the ethical issues that are implicated in responses to the pandemic reflect the range of those manifested across the field of public health as a whole. In this course, we will survey the ethics of public health through the lens of the COVID-19 pandemic, investigating concepts and arguments that are central to the ethics of public health research and practice. For example, we will examine the ethics of disease surveillance, treatment and vaccine research, resource allocation and rationing, compulsion and voluntariness in public health measures, and social determinants of health outcomes, among other topics. To do this, we will need to become familiar with key ethical theories; think deeply about such concepts as privacy, paternalism and autonomy, exploitation, cost-benefit analysis and justice; and compare the function of these concepts in the context of the COVID-19 pandemic with the way they work in responses to other public health concerns.

Requirements/Evaluation:  Biweekly 5-7 page papers, oral commentaries, and tutorial discussions.

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  declared and prospective Philosophy majors and Public Health concentrators, students with a specific curricular need for the course, and students with a high level of interest who are unlikely to have an opportunity to take the course in a future term

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Unit Notes:  Public Health concentrators may use either PHIL 211T Ethics of Public Health or PHIL 213T Biomedical Ethics to fulfill their 3-elective requirement, but they may not use both courses to do so.

Distributions:  (D2)  (WS)

Writing Skills Notes:  Students will write five biweekly papers of 5-7 pages in length, one of which they will revise and resubmit. In each of the tutorial papers students will describe and evaluate arguments in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Attributes:  PHIL Contemporary Value Theory Courses  PHLH Bioethics + Interpretations of Health

Not offered current academic year

PHIL 212  (F)  Ethics and Reproductive Technologies  (WS)

Cross-listings:  WGSS 212 / STS 212

Primary Cross-listing

In her groundbreaking book, The Tentative Pregnancy, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace--or to let us think we can replace--chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society’s interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as contraception, abortion, in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, uterine transplants, and "artificial wombs." Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

Class Format:  discussion

Requirements/Evaluation:  active participation in class discussions, three or four short reflection papers, and two longer papers (5-7 and 7-10 pages)

Prerequisites:  none, but introductory-level course in PHIL and/or WGSS recommended

Enrollment Limit:  19

Enrollment Preferences:  WGSS and PHIL majors (declared or prospective), PHLH and STS concentrators (declared or prospective)

Expected Class Size:  19

Grading:  yes pass/fail option,  yes fifth course option
PHIL 213  (S)  Biomedical Ethics  (WS)

Much like the construction of medical knowledge itself, it is from specific cases that general principles of biomedical ethics arise and are systematized into a theoretical framework, and it is to cases they must return, if they are to be both useful and comprehensible to those making decisions within the biomedical context. In this tutorial we will exploit this characteristic of biomedical ethics by using a case-based approach to examining core concepts of the field. The first portion of the course will be devoted to developing and understanding four moral principles which have come to be accepted as canonical: respect for autonomy, beneficence, nonmaleficence, and justice. The remainder of the course will consider key concepts at the core of medical ethics and central issues for the field, such as privacy and confidentiality, the distinction between killing and "letting die," and therapy vs. research. To this end, each week we will (1) read philosophical material focused on one principle or concept, and (2) consider in detail one bioethics case in which the principle or concept has special application or relevance. In some weeks, students will be asked to choose from a small set which case they would like to address; in others the case will be assigned.

Requirements/Evaluation:  bi-weekly papers, oral commentaries, and tutorial discussions

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  PHIL majors, PHLH concentrators, those who have a curricular need for the course, those who have been dropped from the course in previous semesters due to over enrollment

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (WS)

Writing Skills Notes:  Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and resubmit. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

PHIL 221  (F)  Introduction to Formal Linguistics  (QFR)

Cross-listings:  COGS 224

Secondary Cross-listing

The sentence "Every cookie is chocolate chip and three of them are oatmeal raisin" is a perfectly grammatical sentence of English, but it's self-contradictory. What does it take to realize this fact? One must grasp the meanings of the various parts of the sentence. In particular, one must grasp that "three of them" picks out a subset of the group picked out by "every cookie", and that there's no such thing as a cookie that is both chocolate chip and oatmeal raisin. There two ways to understand "Many students took every class". According to one, there is a single group of
students that had their hands extremely full this semester. According to the other, every class was well-populated, potentially by different groups. The reason for this is that there are two underlying structures that the original sentence can realize. This course serves as an introduction to formal methods in the scientific study of language. Our goal will be to characterize phenomena like those above with logical and mathematical precision. The focus will be on model-theoretic semantics, the sub-field of linguistics that studies meanings. Along the way we will discuss principles of syntax, the sub-field that studies sentence structures, and pragmatics, the sub-field that studies inferences of non-literal content. This is a formal course, but no prior logical or mathematical background will be expected. Starting from scratch, students will learn the building blocks of current-day linguistic research. This introduction will be of use to students interested in language from a variety of perspectives, including philosophy, cognitive science, and computer science.

**Requirements/Evaluation:** Weekly problem sets, plus a final project (paper/presentation/other type, to be discussed with instructor)

**Prerequisites:** No prerequisites

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to seniors and philosophy/cognitive science majors.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Nietzsche, Marx and Freud have had a profound influence on literature, philosophy, and critical theories of the 20th and 21st centuries. In this tutorial we will treat them as diagnosticians of modernity who engaged in unveiling illusions and opening up possible alternative human futures. Each questioned the emancipatory effects of dominant understandings of reason and freedom as well as idealist and humanist accounts of moral progress in history; each aimed to liberate human beings from unnecessary suffering. We will focus on questions concerning their distinctive diagnostic and critical methods, the problems they identified, and their respective understandings of religion and modern science.

Class Format: We may also meet in a seminar format once or twice during the semester.

Requirements/Evaluation: Bi-weekly papers, 2-3 page commentaries, and tutorial discussions.

Prerequisites: One of the following: 100-level Philosophy course or permission of instructor. Exposure to history of modern European philosophy and/or intellectual history will be very helpful.

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors or prospective majors and students with background and interest in modern philosophy and critical theories more generally.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students write five or six 5-6 page tutorial papers. Each will receive regular feedback to improve their ability to present clear, well-supported and engaging written arguments and interpretations.

Spring 2025

TUT Section: T1 TBA Jana Sawicki
In this course we will explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures interactions with and within the health care system. To do this we will explore topics that might traditionally be considered "women's issues" in healthcare, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

**Class Format:** discussion

**Requirements/Evaluation:** active participation in class discussions; periodic short papers (2-3 pages); midterm and final paper (5-7 and 7-10 pages, respectively); and one oral presentation

**Prerequisites:** none, although previous coursework in WGSS is desirable

**Enrollment Limit:** 19

**Enrollment Preferences:** prospective and declared majors or concentrators in PHIL, WGSS, STS, and PHLH, especially those who need the course to satisfy major or concentration requirements

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** meets Contemporary Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 228(D2) WGSS 228(D2) STS 228(D2)

**Writing Skills Notes:** Students will write periodic short papers (2-3 pages each), a midterm paper (5-7 pages) and a final paper (7-10 pages). Short papers focus on concepts, arguments, and writing skills needed in the midterm and final papers, in which students are expected to describe and evaluate arguments from assigned readings, and to present clear and effective arguments in support of their own ethical positions. Students receive feedback on all papers and have the opportunity to revise midterm and final papers.

**PHIL 231 (F) Ancient Political Thought**

**Cross-listings:** PSCI 231

**Secondary Cross-listing**

The core activity of this seminar is the careful reading and sustained discussion of selected works by Plato and Aristotle, but we will also engage such other thinkers as Epictetus and Augustine, and, from a political and theoretical point of view, selections from the Hebrew Bible and New Testament. Among the questions that we will address: What is justice? How can it be known and pursued? How is political power generated and exercised? What are the social and ethical prerequisites--and consequences--of democracy? Must the freedom or fulfillment of some people require the subordination of others? Does freedom require leading (or avoiding) a political life? What distinguishes that kind of life from others? What does it mean to be "philosophical" or to think "theoretically" about politics? Although we will attempt to engage the readings on their own terms, we will also ask how the vast differences between the ancient world and our own undercut or enhance the texts' ability to illuminate the dilemmas of political life for us.

**Class Format:** discussion

**Requirements/Evaluation:** three 7- to 8-page papers

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Political Science majors

**Expected Class Size:** 18

PHIL 232  (S)  Modern Political Thought
Cross-listings:  PSCI 232

Secondary Cross-listing
This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and of politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation: three papers of 4-6 pages; class participation; brief informal writing tasks inside and outside of class meetings
Prerequisites: none; open to all
Enrollment Limit: 25
Enrollment Preferences: Political Theory concentrators, then Political Science majors
Expected Class Size: 25
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)

Attributes: PSCI Political Theory Courses
Not offered current academic year

PHIL 236  (S)  Contemporary Ethical Theory
This course will examine central questions in normative ethics, including the following: Which features of actions are morally important and why (e.g., their motive, intrinsic nature, or consequences)? Which characteristics of persons give them moral status? How should moral equality be understood, and what is its foundation? When should we give morality priority over personal commitments and relationships, and why? Are we capable of disinterested altruism, or are we motivated solely by self-interest? By which methods should we pursue answers to these questions? We will examine these and related issues by looking in depth at contemporary defenses of consequentialist, deontological, and contractualist theories.

Requirements/Evaluation: Weekly seminar discussion questions; midterm paper (8-10 pages); final paper (10-12 pages)
Prerequisites: At least one previous PHIL course or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Current and prospective philosophy majors
Expected Class Size: 10-15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: PHIL Contemporary Value Theory Courses
Not offered current academic year
PHIL 239 (S) The Ethics of Artificial Intelligence

Cross-listings: STS 239

Primary Cross-listing

Human beings will someday live alongside artificially intelligent beings who equal or exceed us. The rise of AI will be a tectonic shift for culture, technology, and our fundamental sense of ourselves. When AI is fully realized, it is likely to be amongst the most important things to happen to our species. Some challenges we face are broad and about the future. How can we ensure that AI's will act morally? Is a world with AI's overall better or worse for us? How do we create legal and policy frameworks that cover a new kind of thinking being? If they are conscious, will AI's have dignity and rights? Other questions are pressing and immediate: Artificial intelligence techniques are used today to help decide whether someone gets a bank loan, is eligible to be released on bail, or in need of particular medical treatment. And right now there are autonomous vehicles deciding how to behave in traffic, and autonomous weapons capable of delivering lethal force. Is it moral for us to pass along these sorts of decisions to AI's? What if they are biased, unbeknownst to us? What if they are more fair? How should we understand intellectual and creative work in an era of generative models that take on some aspects of thought? In this course we will engage ethical questions surrounding the seeming inevitability of AI.

Class Format: mixture of lectures and discussion

Requirements/Evaluation: four short (3- to 4-page) writing assignments and a final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: CSCI or PHIL majors or STS or COGS concentrators

PHIL 241 (S) Contemporary Metaphysics

Our focus in this class is going to be on the nature of causation. We make causal judgments constantly in our everyday lives and in scientific contexts. It turns out, however, to be surprisingly difficult to say what causation is. We will begin the course by looking at Hume's and Kant's discussion of causation. We will then turn to a variety of more recent attempts to give a clear characterization of causation. In addition to examining general accounts of causation, we will examine particular problems that come up in thinking about mental causation and causation in indeterministic contexts.

Requirements/Evaluation: one 10 page midterm paper and one 15 page final paper which will involve draft and revision, possible short response papers, and active participation in seminar

Prerequisites: one PHIL course; familiarity with formal logic helpful but not required; or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Philosophy Majors

**PHIL 244 (S) Environmental Ethics (WS)**

**Cross-listings:** ENVI 244

**Secondary Cross-listing**

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature, among others. Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

**Requirements/Evaluation:** five essays (5-7 pages each) and five prepared oral responses to partners’ essays; evaluation will be based on essays, oral responses, and quality of discussion

**Prerequisites:** ENVI 101 or one course in PHIL

**Enrollment Limit:** 10

**Enrollment Preferences:** declared and prospective Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 244(D2) PHIL 244(D2)

**Writing Skills Notes:** Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

PHIL 245 (S) Mind and Persons in Indian Thought

Cross-listings: ASIA 244 / REL 244

Secondary Cross-listing

In this course, we follow the Indian philosophical conversation concerning the self and the nature of consciousness, particularly as they are found in its various Yogic traditions. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holist views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central questions that have challenged philosophers in both traditions.

Class Format: discussion

Requirements/Evaluation: full attendance and participation, three short essays (6 pages each)

Prerequisites: none

LEC Section: 01  M 7:00 pm - 9:40 pm  Georges B. Dreyfus

PHIL 251 (S) Offensive Art

Twenty-four centuries ago Plato argued for censorship of art. In the last century New York City mayor Rudy Giuliani attempted to shut down the Brooklyn Museum "Sensations" exhibit because he claimed it offended Christians, and the Cincinnati Contemporary Arts Center was prosecuted for exhibiting allegedly obscene photographs by Robert Mapplethorpe. Just today (15 February 2022) The New York Times removed some solutions from their recently purchased game Wordle, saying that words such as "pussy", "slave", and "wench" are "offensive or insensitive". At Williams College a mural was removed from The Log and Herman Rosse's painting "Carnival of Life" was removed from the '62 Center. What should be done about offensive art? What is offensive art? Does it matter who is offended? Does offensive art harm? Is there a difference between being offended and being harmed? Is there a difference between cultural appropriation and cultural appreciation? What are the responsibilities of museum curators and theater producers when presenting art that might offend? Who gets to decide the answer to these questions; indeed, who gets to decide what questions to ask? We will attempt answers by studying classical works (such as Plato's Republic and John Stuart Mill's On Liberty), contemporary articles, and works of art in various media. Trigger Warning: all the works of art studied in this class will be chosen partly because they have offended a significant number of people. You are very likely to be offended by some of the art we discuss. This will be the only trigger warning for the class; if you don't want to be offended then this course is not for you.

Requirements/Evaluation: several short responses (including op-eds on current controversies) and longer final projects (a 12- to 15-page paper or equivalent work in other media)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: seniors, juniors, then sophomores in that order

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option
PHIL 272 (S) Free Will and Responsibility (WS)

Cross-listings: JLST 272

Primary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? We're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The key question, then, is whether, and how, agency is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Requirements/Evaluation: Six tutorial papers (5-6 pages in length) and five critiques (2-3 pages in length)

Prerequisites: one PHIL course (or permission of instructor; please email with any questions)

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 272(D2) JLST 272(D2)

Writing Skills Notes: Students will write a tutorial paper (5-6 pages in length) every other week, and a peer critique (2-3 pages in length) in alternating weeks, evenly spaced throughout the semester. The instructor will provide timely comments on writing skills, with suggestions for improvement.

Attributes: JLST Theories of Justice/Law PHIL Contemporary Value Theory Courses

PHIL 274 (F) Messing with People: The Ethics of Human Experimentation (WS)

The Tuskegee Syphilis Study and Stanley Milgram's Obedience experiments are infamous. Yet, other lesser known experiments are equally important landmarks in research ethics that continue to shape the design, conduct, and regulation of research involving human participants. In this tutorial we'll closely examine a series of contemporary and historical cases of human experimentation (roughly, one case per week) with an eye toward elucidating the moral norms that ought to govern such research. A number of conceptual themes will emerge throughout the course of the term, including notions of exploitation and coercion, privacy and confidentiality, and the balance between public interests and individual rights. The cases will be drawn from different domains of research, including clinical medicine, public health, social and behavioral sciences, and education. Specific issues are likely to include the ethics of placebo research; deception in research; studies of illicit/illegal behavior; genetic research; research involving social media; experimentation with children, pregnant people and fetuses; research involving persons with mental illness, justice and research with marginalized populations, among other topics.

Requirements/Evaluation: evaluations will be based on written work, on biweekly papers, oral commentaries, and tutorial discussions

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors (declared and prospective); Public Health concentrators (declared and prospective)

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)
Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and resubmit. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

PHIL 288  (F) Embodiment and Consciousness: A Cross-Cultural Exploration

Cross-listings:  REL 288

Secondary Cross-listing

This course examines some of the central questions raised by the study of the consciousness: the place of intentionality, the role of emotions, the relation with the body, the nature of subjectivity, the scope of reflexivity, the nature of perceptual presence, etc. In confronting these difficult questions, we do not proceed purely theoretically but consider the contributions of various observation-based traditions, from Buddhist psychology and meditative practices to phenomenology to neurosciences. We begin by examining some of the central concepts of Buddhist psychology, its treatment of the mind as a selfless stream of consciousness, its examination of the variety of mental factors and its accounts of the relation between cognition and affects. We also introduce the practice of meditation as a way to observe the mind and raise questions concerning the place of its study in the mind-sciences. We pursue this reflection by examining the views of James, Husserl, Sartre and Merleau-Ponty, particularly as they concern the methods for the study of the mind and the relation between consciousness, reflexivity and the body. In this way, we develop a rich array of analytical tools and observational practices to further our understanding of the mind. But we also question the value of these tools based on first person approaches by relating them to the third person studies of the mind. In this way, we come to appreciate the importance of considering the biology on which mental processes are based and the light that this approach throws on the nature of consciousness. We conclude by considering the relation between first and third person studies of the mind, focusing on the concept of the embodied mind as a fruitful bridge between these different traditions.

Requirements/Evaluation: regular practice of meditation, a class presentation, a short essay (6-pages); a long final research paper (15 pages)

Prerequisites: any introduction to philosophy and at least two upper level courses in PHIL, at least one of which meets the Contemporary Metaphysics or Epistemology distribution requirement for the major, no exceptions;

Enrollment Limit: 18
Enrollment Preferences: Religion and Philosophy majors

PHIL 306  (S) The Good Life in Greek and Roman Ethics

Cross-listings: CLAS 306

Primary Cross-listing

Most thoughtful human beings spend a good deal of time musing about how we ought to live and about what counts as a good life for a human being. The philosophers of ancient Greece and Rome were among the first thinkers to develop rigorous arguments in response to such musings. Much of the moral philosophy produced in Greece and Rome remains as relevant today as when it was written. In this course, we will examine some central texts in ancient Greek and Roman moral philosophy. We will begin by reading some of Plato’s early dialogues and his Republic. We will then turn to Aristotle’s Nicomachean Ethics. We will then examine writings in the Stoic and Epicurean traditions, as well as Cicero’s On the Ends of Good and Evil. As we proceed through the course, we will look at the way in which each thinker characterizes happiness, virtue and the relation between the two. We will also pay close attention to the way in which each of these thinkers takes the practice of philosophy to play a key role in our realization of the good
human life.

Requirements/Evaluation: several short response pieces; a final paper of 10-15 pages; active participation in seminar discussion
Prerequisites: Phil 201 will be helpful but is not necessary.

PHIL 314 (S) Linguistic Meaning and Reference
"The 100th US President will be shorter than Aristotle was" is a sentence that is either true or false, we don't know which. Either way, it's true/false thanks to a special relationship it has to somebody in the far future and to somebody in the distant past. What is the nature of that relation? How does it work? What makes it possible? In this course we will investigate reference, a central topic in the philosophy of language. We will discuss competing theories about how different representational types refer, including names (like "Aristotle"), definite descriptions (like "the 100th US President"), indexicals (like "you"), and even non-verbal deixis (like pointing gestures). Of particular interest will be the relation between reference and linguistic meaning. Is reference all there is to meaning, or is there more to what some (or all) referring expressions mean? We'll explore this topic with an eye toward making connections with philosophical questions about the mind--do thoughts refer in the same way that words do? Must a speaker's linguistic reference always match their mental reference?
Requirements/Evaluation: 4-5 papers across the semester.
Prerequisites: At least one philosophy course
Enrollment Limit: 13
Enrollment Preferences: Priority given to philosophy majors and seniors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
PHIL 315 (S) Kant’s Critique of Pure Reason

Kant’s *Critique of Pure Reason* is perhaps the most significant text in the history of philosophy. It puts an end to the Early Modern traditions of Rationalism and Empiricism, and it stands at the beginning of both the Analytic and Continental traditions in contemporary philosophy. Love it or hate it, you cannot ignore it. In this course, we will study the most important and influential chapters of the *Critique* with the help of some secondary literature.

Requirements/Evaluation:  Student will be required to write three 8-10 page papers.

Prerequisites:  PHIL 202

Enrollment Limit:  10

Enrollment Preferences:  Philosophy majors

PHIL 319 (F) Topics in Philosophy of Race: Hegel and Africana Philosophy  (DPE)

Cross-listings:  AFR 327

Primary Cross-listing

How are individual and social subjects formed, and how do they connect to questions of race? What is the nature of consciousness and how can it be unhappy, false or double? What do we mean when we talk about racial capitalism? This course introduces philosophy students to these and related questions through a parallel reading that brings together 19th century German philosopher Hegel and a tradition of Africana philosophy running through Douglas, Du Bois, Fanon, Gilroy, Hartman and Wynter. While Hegel studies tends to occur in isolation from philosophers in the Africana tradition, many of the above explicitly refer to and take up questions in Hegel. This course argues that by reference to the historically specific modes of subjectivity and sociality that resulted from the Transatlantic Slave Trade and the Haitian Revolution, for instance, we can better understand and address long-standing questions in European Social Philosophy. Topics to be considered include the nature of freedom (both individual and social), the master/slave dialectic and subject constitution, self-consciousness and double consciousness, the stages of history, and racial capitalism

Requirements/Evaluation:  Progressive writing assignments including 4 exegetical commentaries, one 5 page paper and one 10-12 page final paper.

Prerequisites:  One prior 100 level philosophy course or permission of instructor.

Enrollment Limit:  15

Enrollment Preferences:  Preference given to philosophy majors and Africana studies concentrators.

Expected Class Size:  10-15

Grading:  yes pass/fail option,  yes fifth course option

Difference, Power, and Equity Notes:  Course material involves self-conscious and critical engagement with the history of racial subject formation as well as Africana philosophy, and thinking about how power’s distribution connects to questions of race.

Attributes:  PHIL History Courses

Not offered current academic year
PHIL 321 (S) Introduction to Critical Theory: The Enlightenment and Its Critics (DPE) (WS)

Cross-listings: WGSS 322

Primary Cross-listing

We often associate modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress with the Enlightenment. How can we reconcile this faith with the persistence of domination today? Critical theory aims not merely to understand the “struggles and wishes of the age” as Marx one described it, but with emancipation from domination. Understood in this way, critical theory is identified closely with the intellectual tradition of the Frankfurt School. In this tutorial, will read works in critical theory from the 18th century to the present, some from the Frankfurt tradition, and some not. We will focus on particular topics, examples of which are the following: normative critique, capitalism, authoritarianism, mass culture, enlightenment and reason, progress, violence, the domination of nature, white supremacy, patriarchy and colonialism.

Class Format: students will work in pairs and meet for 75 minutes each week with the professor

Requirements/Evaluation: Each student will write and present a 5 or 6-page paper every other week and a commentary on their partner’s essay on alternate weeks; evaluations are based on written work as well as level of preparation and the quality of intellectual engagement in tutorial meetings

Prerequisites: PHIL 202, Kant course, modern political theory, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors and students with background in modern political theory, or other relevant demonstrated background.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 321(D2) WGSS 322(D2)

Writing Skills Notes: The tutorial format requires significant writing (six 2500-3000 word papers, and six 1000-1250 word commentaries), weekly commentary on writing, and instructor comments on papers.

Difference, Power, and Equity Notes: In this course power, difference, domination and the prospects of and obstacles to liberatory political struggle are central topics.

PHIL 326 (S) Foucault Now (DPE) (WS)

Cross-listings: WGSS 336

Primary Cross-listing

If we think of Michel Foucault as engaged in writing histories, or genealogies, of his own present designed to undercut the sense of the obviousness of certain practices and ways of thinking, categorizing, and knowing, we can easily imagine that he might now be questioning different aspects of our contemporary “present” than the ones standardly associated with his name, namely, panopticons and surveillance, discipline, criminalization, the biopolitics of health, the normal and the abnormal, etc. In this course we address the question: How is the present we find ourselves living today different from the one that the author Foucault wrote about in the 1960s, 70s and early 80s before his untimely death in 1984? What differentiates today from yesterday? And what present practices and ways of thinking and knowing might be questioned using Foucault’s tools, genealogy in particular, for resisting unnecessary constraints on freedom and the perpetuation of unnecessary suffering? What is his legacy today? In this tutorial you will read from a selection of Foucault's texts (books, lectures, interviews) in order to acquire a firm grasp of his method of “critique” and his way of looking at the interconnections between forms of power and the knowledge associated with particular disciplines. We will also read more recent work by Foucault inspired scholars on topics such as the biopolitics of gender, the genealogy of terrorism, the informational person (how we become our data), and neoliberal subjects.

Class Format: I may use a seminar format at least twice during the semester.

Requirements/Evaluation: evaluation will be based on written work (six 5- to 6-page papers, and six 2-3 page commentaries on their partner's papers) as well as the quality and level of preparation and intellectual engagement in our weekly meetings.

Prerequisites: Relevant background in critical theory, social theory, political theory or philosophy.
Enrollment Limit: 10

Enrollment Preferences: I will give preference to philosophy majors and to upper class students with a demonstrated background in critical theories. Some sophomores may be eligible.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 336(D2) PHIL 326(D2)

Writing Skills Notes: This is a tutorial. Students will write five or six 5-6-page papers during the course of the semester and receive significant feedback on each paper. At the end of each tutorial meeting the student is asked to reflect on how they would approach the paper differently if they were to rewrite it.

Difference, Power, and Equity Notes: In this course we address power and domination, reflect on the difference between them, and treat power relations as not only an inevitable feature of any society, but as both enabling and constraining. Moreover, we will read material that uses Foucauldian tools to address contemporary issues involving sexism and racism, digital surveillance, and the abolition of prisons.

PHIL 328 (F) Kant’s Ethics

Although Kant initially planned for his magnum opus to comprise theoretical and practical chapters, his metaphysics and epistemology take up all of his Critique of Pure Reason while his ethics is spread out over a series of works—Groundwork of the Metaphysics of Morals, Critique of Practical Reason, Religion within the Boundaries of Mere Reason, and The Metaphysics of Morals. These latter writings of Kant’s had a tremendous influence on the development of subsequent moral philosophy and indeed set the stage for contemporary discussions of the nature of practical reason, motivation, freedom, and morality. Our seminar will have two aims: (1) to reconstruct the single most compelling moral theory from Kant’s various ethical writings, and (2) to trace the influence of Kant’s ethics in contemporary philosophy.

Requirements/Evaluation: weekly seminar discussion questions; 8-10-page midterm paper; 12-14-page final paper

Prerequisites: two courses in PHIL (including a 100-level PHIL course; PHIL 201 or 202 recommended); or permission from the instructors

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

PHIL 329 (F) Four Challenging Moral Philosophers (DPE) (WS)

Elizabeth Anscombe, Philippa Foot, Amelie Rorty, and Cora Diamond all challenged the prevailing philosophical tenets of their times. Anscombe and Foot resurrected virtue ethics for Anglo-American philosophy and made moral psychology academically respectable. (Foot also invented the infamous trolley car thought experiment.) Rorty challenged the very concept of morality and questioned all moral theory. Diamond investigated the methodology of moral philosophy, paying special attention to the role of literature. In order to hit the ground running, students will be expected to read The Women Are Up to Something: How Elizabeth Anscombe, Philippa Foot, Mary Midgley, and Iris Murdoch Revolutionized Ethics by Benjamin J. B. Lipscomb before the first meeting, preferably over the summer.

Requirements/Evaluation: Tutorial papers and rewrites

Prerequisites: At least three PHIL courses, including at least one in moral philosophy.

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors, seniors, juniors in that order
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Students will meet with the instructor in pairs for an hour each week; a 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their five papers

Difference, Power, and Equity Notes: Our four challenging moral philosophers are all women in a field dominated by men. They all challenged the prevailing philosophical tenets of their times.

Attributes: PHIL Contemporary Value Theory Courses

Not offered current academic year

PHIL 330  (S)  Plato  (WS)

Cross-listings: CLAS 330

Primary Cross-listing

Plato is one of the most important and influential thinkers in the history of the western tradition. His depiction of the trial and death of Socrates is one of the classics of western literature, and his views on ethics and politics continue to occupy a central place in our discussions 2400 years after they were written. It is, in fact, quite difficult to get through any course of study in the liberal arts without some familiarity with Plato. Nevertheless, comparatively few people realize that the views we commonly think of as "Platonic" represent only one strand in Plato's thought. For example, we commonly attribute to Plato a theory of the Forms on the basis of his claims in the so-called "middle dialogues" (mainly Republic, Phaedo, and Symposium). However, in his philosophically more sophisticated and notoriously difficult later dialogues (such as the Parmenides, Philebus, Sophist and Statesman), Plato engages in radical criticism and revision of his earlier views. In this course, we will spend the first third of the semester attempting to understand the metaphysics and epistemology in Plato's middle dialogues. We will spend the balance of the semester coming to grips with Plato's arguments in the later dialogues. We will read several complete dialogues in translation, and will also read a wide variety of secondary source material.

Class Format: lecture/discussion; this class will be a roughly equal mixture of lectures, student presentations, and seminar discussion

Requirements/Evaluation: students will be expected to prepare a seminar presentation, to write several focused short analytical pieces, and to write a 15- to 20-page term paper in multiple drafts

Prerequisites: PHIL 101, PHIL 102 or permission of instructor; a prior course in logic will be extremely helpful, but is not necessary

Enrollment Limit: 15

Enrollment Preferences: upper-level Philosophy and Classics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

CLAS 330(D1) PHIL 330(D2)

Writing Skills Notes: Instructor will provide regular commentary on papers.

Attributes: PHIL History Courses

Not offered current academic year

PHIL 333  (F)  Kant on Beauty, Life, and History

In this course, we will study Kant's theories of aesthetic and teleological judgments. Aesthetic judgments are puzzling, since we call things "beautiful" because they cause us to feel pleasure, and yet we expect others to find the same things beautiful as we do (e.g., the sunset over the Taconic Ridge), while we do not generally expect others to find the same things pleasurable as we do (e.g., your favorite ice cream flavor at Lickety). Teleological judgments are likewise puzzling, since we often explain living things as designed for certain purposes (e.g., the hummingbird's long bill is for accessing nectar deep inside flowers) or as striving for certain goals (e.g., the sunflower turns toward the sun to take in energy), and yet we are committed to a scientific world-view, where nature is governed by mechanistic causal laws. Indeed, we sometimes describe human history as progressive (aiming toward greater rationality, morality, equality, or freedom, e.g.), even though we regard individual humans as free to choose whether to act well or poorly. Our course will consider Kant's attempts to account for these sorts of paradoxical judgments.

Requirements/Evaluation: A midterm and a final essay.
**PHIL 335  (S)  Contemporary Metaethics**

We speak as if moral judgments can be true or false, warranted or unwarranted. But how should objectivity in this domain be understood? Is moral objectivity like scientific objectivity, assuming that we have a clear sense of what that involves? If not, should this concern us? What are other models for understanding moral objectivity? While answers to such questions are implicit in historically important accounts of morality, these issues became the topic of explicit, sustained debate in the twentieth and twenty-first century. Our focus will be on recent influential work in this area. We will examine several different approaches in depth, including realism, constructivism, expressivism, and skepticism.

**Class Format:** seminar

**Requirements/Evaluation:** weekly seminar discussion questions; 8-10-page midterm paper; 12-14-page final paper

**Prerequisites:** two courses in PHIL (including a 100-level PHIL course; PHIL 201 or 202 recommended); or permission from the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** current and prospective Philosophy majors

**Expected Class Size:** 10-12

**Grading:** no pass/fail option, yes fifth course option

**Attributes:** PHIL Contemporary Value Theory Courses

*Not offered current academic year*

---

**PHIL 336  (F)  Political Liberalism and its Critics  (WS)**

Political liberalism has been both celebrated and lamented. The philosopher John Rawls is widely credited with reviving liberalism in the late 20th century and providing its most persuasive defense. In this tutorial, we'll read portions of Rawls' major works, *A Theory of Justice* and *Political Liberalism*, and trace how his theory evolved in response to an array of critics, including libertarians, perfectionists, communitarians, feminist philosophers, and critical race theorists. Among other things, these critics challenged Rawls' interpretation and defense of the social contract framework, the ideals of freedom and equality, the content of principles of justice, political neutrality about the good, the nature of the self, the division between public and private spheres, and the distinction between ideal and non-ideal theory. We'll examine these criticisms in depth. If time permits, we'll also look briefly at some recent post-Rawlsian debates about the nature of distributive justice (e.g., luck vs. relational egalitarianism, or global justice).

**Class Format:** This tutorial will meet on a fixed weekly schedule agreed to by the instructor and participants.

**Requirements/Evaluation:** Six tutorial papers (5-6 pages in length) and six critiques (2-3 pages in length)

**Prerequisites:** Two previous PHIL courses (including a PHIL 100-level course), or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Current and prospective philosophy majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)  (WS)

**Writing Skills Notes:** Students will write a tutorial paper (5-6 pages in length) every other week, and a peer critique (2-3 pages in length) in alternating weeks, evenly spaced throughout the semester. The instructor will provide timely comments on writing skills, with suggestions for improvement.

**Attributes:** PHIL Contemporary Value Theory Courses

*Not offered current academic year*
PHIL 337  (S)  Justice in Health Care  (WS)

Justice is a notoriously complex and elusive philosophical concept, the conditions of which are even more difficult to articulate within real world institutions and contexts than in the abstract. In this course we'll explore justice as a fundamental moral principle and as a desideratum of the US health care system. The first portion of the course will be devoted to considering general theories of justice as well as alternative conceptions of justice specifically within the health care context. While social justice and distributive justice are deeply intertwined in the health care context and we will discuss both, we will focus primarily on the concept of distributive justice. This theoretically oriented work will provide the background for subsequent examination of specific topics, which may include, among others: justice in health care financing and reform; justice in health care rationing and access to health care, with particular attention to the intersections of rationing criteria with gender, sexuality, race, disability, and age; justice in the procurement and allocation of organs for transplantation; obesity and personal responsibility for illness; and justice in medical research, including "double standards" for research conducted in low resource settings.

Requirements/Evaluation:  biweekly papers, oral commentaries, and tutorial discussions

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  PHIL majors, PHLH concentrators, those with curricular need for the course, those who have been dropped from the course in previous semesters due to over enrollment, and those who are unlikely to have an opportunity to take the course in a later term

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (WS)

Writing Skills Notes:  Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Attributes:  JLST Interdepartmental Electives  PHIL Contemporary Value Theory Courses  PHLH Bioethics + Interpretations of Health

PHIL 338  (F)  Intermediate Logic  (QFR)

Cross-listings:  MATH 338

Primary Cross-listing

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.

Requirements/Evaluation:  problem sets and exams

Prerequisites:  some class in which student has studied formal reasoning

Enrollment Limit:  20

Enrollment Preferences:  Philosophy majors; juniors and seniors

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
**PHIL 338 (D2) MATH 338 (D3)**

**PHIL 345 (S) Alienation**

What does it mean to feel or to be alienated? Wanting things just because other people do? Not being able to identify with our social and political institutions? Or does it mean the narrowing of our activities, becoming workers who carry out tiny parts of broader processes that we can’t see and that we can't control? How do ideas of alienation and meaninglessness have to do with ways that social life is organized -- with the capitalist economy, for one, but also with institutions like race and gender? This course traces different views of alienation and its critique that runs through Lukacs, Marx, Fanon, Kierkegaard, Rousseau, de Beauvoir and others. We'll also look at less conventional forms of alienation critique as part of our inquiry: Afrofuturist fiction by Octavia Butler, work on ornamentalism by Anne Anlin Cheng, and films like A Woman Under the Influence.

**Requirements/Evaluation:** Progressive writing assignments including: One argument reconstruction, One 6-8 page paper, commentaries on fellow student work, and one final 10-12 page paper.

**Prerequisites:** At least one prior philosophy course

**Enrollment Limit:** 19

**Enrollment Preferences:** Philosophy majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** PHIL Contemporary Value Theory Courses

Not offered current academic year

**PHIL 355 (S) Other Minds**

We will discuss, in this course, several different kinds of problems concerning other minds. Our starting point will be the traditional philosophical problem of solipsism - the skeptical challenge to our belief in the existence of other minds. Since I cannot have direct access to anyone else's experiences, how do I know that I am not the only being in the world that has experiences? What gives me the idea that there are others like me? What justifies my application of the same psychological concepts (such as sad, curious, intends, fears) to myself and to others? How do I check whether the application is correct? Is self-knowledge a different kind of knowledge than knowledge of other minds? After considering these philosophical questions and various answers that have been given to them, we will turn our attention to natural, everyday questions about others. How do we manage to understand each other? Do we directly observe each other's psychological lives? Or do we make inferences, or form theories? To what extent can we really know one another, and can we refine and deepen our understanding? Is knowledge of other minds crucial for our ethical practices? Are there people who lack the capacity for such knowledge? If so, are they exempt from at least some of our ethical expectations? Finally, how far can our understanding of others go? For example, how do we understand 'inner lives' of infants, of people with dementia, of people with schizophrenia, or of people without any empathy whatsoever? How do we understand mental lives of non-human animals? For that matter, how do non-human animals understand us? Is it true that other minds will always remain unknown and inscrutable to a considerable degree? The literature on other minds is vast and heterogeneous. In addition to a number of philosophical texts, we will be reading in a wide area of contemporary scientific research: on 'mindreading', social cognition, empathy, and on so-called psychopathology. Time permitting, we will also consider the role of narrative fiction (in literature and film) in expanding and deepening our knowledge of other minds.

**Requirements/Evaluation:** Class attendance, preparedness and participation; Additional small group meetings, and rotating reports from these meetings; Weekly short assignments, oral or written. Some of these will be tutorial-style presentations, followed by comments by another student. A midterm paper, 5-6 pages long; A final paper, 7-8 pages long

**Prerequisites:** Declared Philosophy major or 4 Philosophy courses (one of which should be a Writing Skills course) or (exceptionally) consent of the instructor
Enrollment Limit: 12
Enrollment Preferences: Philosophy majors

PHIL 379  (S)  American Pragmatism
Cross-listings: AMST 379

Primary Cross-listing
Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

Requirements/Evaluation: final paper, several short assignments
Prerequisites: at least three PHIL courses
Enrollment Limit: 25
Enrollment Preferences: Philosophy and American Studies majors, then seniors and juniors of any major
Expected Class Size: 12-15
Grading: yes pass/fail option, yes fifth course option

PHIL 390  (S)  Discourse Dynamics  (WS)
Cross-listings: COGS 390

Secondary Cross-listing
It'd be perfectly natural to say "I might've left the stove on", then check the stove, then say "I didn't leave the stove on". But perform those exact same steps in a different order--check the stove, say "I didn't leave the stove on", then say "I might've left the stove on"--and something's gone quite wrong. Conversation is dynamic--the back and forth exchange of information is a process that grows and adapts to the surrounding context. The order in which you say things matters, and it matters for what you communicate what actions you take and what events happen around you. In this course, we will investigate dynamic communicative phenomena and discuss competing theoretical explanations about how they're interpreted. Of particular interest will be the extent to which discourse dynamics are built into the meanings of linguistic expressions vs. the extent to which they're consequences of our rational cognition. Is a sentence's relation to previously uttered sentences similar to its relation to extra-linguistic events? How much inference goes into interpreting what's said? In pursuing the answers to these questions, we will discuss both classic and contemporary theories from philosophy and linguistics.

Requirements/Evaluation: Four short papers (3-4 pages), take-home midterm paper (5-7) pages, take-home final paper (6-8 pages)
**Prerequisites:** At least one philosophy or cognitive science course (any level), or permission of instructor.

**Enrollment Limit:** 19

**Enrollment Preferences:** Preference given to seniors and philosophy/cognitive science majors, then to students who have taken 200-Level Intro to Formal Linguistics

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

The instructional Physical Education Program at Williams is an integral part of the student’s total educational experience. As a part of the liberal arts concept, the program develops the mind-body relationship, which is dependent upon the proper integration of physical and intellectual capacities. The main objective of the physical education program is to develop in each student an appreciation of physical fitness and wellness, and to expose them to a variety of activities that are suitable for lifetime participation.

Four credits of Physical Education represent one of the requirements for the College degree. There are five physical education units during the year. In the fall academic semester, there are two six-week physical education quarters. Winter Study is another unit, and there are two physical education quarters in the spring academic semester. Two different activities must be completed in the fulfillment of the requirement. Students must complete two physical education credits during the first year, all four physical education credits must be completed by the end of sophomore year if the student wishes to study abroad.

A schedule listing all courses offered is issued to every student before each quarter and Winter Study. Classes may vary according to availability of instructors and interest of students. More information can be found at athletics.williams.edu/physical-education.

The following courses are offered at various times during the year:

- Aerobic and Core Conditioning
- Aqua Fitness
- Badminton
- Basketball
- Boot Camp
- Bouldering
- Circuit Training
- Dance (African, Ballet, Modern)
- Futsal/Indoor Soccer
- Golf
- Hiking

How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. Williams Astronomy courses are for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astronomy major and the Astrophysics major, both administered by the Department of Physics and Astronomy, are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Williams Astronomy site can be found at astronomy.williams.edu.

**ASTRONOMY MAJOR**

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

**Major Requirements for Astronomy**

- Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond
- Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)
- Two 400-level Astronomy courses
- Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement
- Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics
- Mathematics 140 Calculus II
- Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. A typical path through the major will begin with Physics 141, which is suitable for students with one year of high school physics and a background in calculus. However, students without high school physics may begin with Physics 131, and students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of
Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.

THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Department of Physics and Astronomy to determine their most appropriate route through the major. An essential ingredient in such students’ undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Physics 141 is recommended for students with one year of high school physics and a background in calculus. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

- Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond
- Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement
- Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics
- Physics 201 Electricity and Magnetism
- Physics 202 Waves and Optics
- Physics/Mathematics 210 Mathematical Methods for Scientists
- Physics 301 Introductory Quantum Physics
- Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus
- Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following:
  - Astronomy 211 Astronomical Observing and Data Analysis
  - Physics 302 Statistical Physics
  - Physics 402T Applications of Quantum Mechanics
The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

Honors candidates will also be required to attend departmental colloquium talks.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

STUDY ABROAD

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then
Have you ever wondered what makes the Sun and stars shine and what they are made of? Do they evolve, and if so, how do they change? What are black holes, and how can they form? How do we find planets around other stars? Astronomy 101, a non-major, general introduction to the part of contemporary astronomy that includes how stars form and die, will provide answers to these questions. We will pay special attention to exciting discoveries made in the past decade. Thousands of exoplanets have been discovered, with their atmospheres being studied in detail by the James Webb Space telescope. For the first time, gravitational waves from merging black holes have been detected. In this course we will discuss the basic methods and instruments used in these and other astronomical observations and what they can teach us about the life cycle of stars. We will discuss what happens at the centers of stars, how stars evolve, and why some stars explode and form neutron stars and black holes. This course is independent of and on the same level as ASTR 102 (solar system) and 104 (galaxies/cosmology); students who have taken these courses are welcome.

**Class Format:** lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester.

**Requirements/Evaluation:** two hour tests, a final exam, an observing portfolio, and lab reports

**Prerequisites:** none

**Enrollment Limit:** 48;12/lab

**Enrollment Preferences:** first and second-year students

**Expected Class Size:** 30/lec

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** non-major course

**Distributions:** (D3)

**ASTR 102 (S) Our Solar System and Others**

What makes Earth different from all the other planets? What have NASA's Curiosity and Perseverance on Mars found about that planet's past running water and suitability for life? How has knowledge about Pluto and the outer solar system been transformed by NASA's flybys? Will asteroids or comets collide with the Earth again? What is the new James Webb Space Telescope revealing about exoplanets and their atmospheres? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system (and the systems of planets around other stars), will provide answers to these questions and more. We will cover the historical development of humanity's understanding of planetary systems, examining contributions by Copernicus, Galileo, Newton, Einstein, and others and the more recent discoveries of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and space telescopes such as the Hubble, James Webb, and Kepler/K2/TESS missions. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

**Class Format:** lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observing TAs will be available for consultation, in addition to the instructors, throughout the semester.
ASTR 104  (S)  The Milky Way Galaxy and the Universe Beyond
How was the Universe created, and how has it evolved to its presently observed structure? This course will start at the Big Bang, the beginning of everything, and move forward from there. About five centuries ago Galileo Galilei used his own primitive telescope to make many astronomical discoveries: observing the moons of the Jupiter, craters on the Moon, and Sun spots to name a few. Galileo also noticed that stars are not spread on the celestial sphere at random but form a disk like structure, which we now call the Milky Way Galaxy -- our cosmic home. Almost a hundred years ago Edwin Hubble discovered that the Universe contains many galaxies and that they are moving away from each other. Hubble discovered that the Universe -- the largest physical object -- expands, so it had a beginning. In this course we will explore the tools and techniques that astronomers use to study stars and galaxies. From the discovery of the Milky Way to the expanding Universe, we will cover the key concepts and discoveries that have shaped our understanding of the cosmos. During recent decades astronomers have made exciting -- and unsettling -- new discoveries: it turns out that most of matter in the Universe does not emit light and most probably is composed of particles of unknown origin, and that the expansion of the Universe is now accelerating, pushed by a mysterious dark energy. At this point, astronomers have evidence to show that at early epochs the Universe was very dense and very hot. This early epoch is called the Big Bang. How the Big Bang happened is not known yet but there are several interesting hypotheses that our Universe could be one of many. This course will introduce important highlights in the observation and interpretation of remarkable astronomical phenomena and explore these many mysteries.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. Current astronomical discoveries will be discussed at the beginning of each class and by email throughout the semester.

Requirements/Evaluation:  two hour tests, a final exam, lab reports, and an observing portfolio
Prerequisites: none
Enrollment Limit:  25
Enrollment Preferences:  first-years
Expected Class Size:  15
Grading:  yes pass/fail option,  no fifth course option
Unit Notes:  non-major course
Distributions:  (D3)

ASTR 111  (F)  Introduction to Astrophysics  (QFR)
The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the
classes of other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

**Class Format:** The class has weekly afternoon laboratory sessions, which will alternate between 'hands-on' activities and problem-solving/discussion sessions. Nighttime observing sessions will occur throughout the semester.

**Requirements/Evaluation:** weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio

**Prerequisites:** a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

**Enrollment Limit:** 28; 14/lab

**Enrollment Preferences:** potential Astronomy majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

**Fall 2024**

**LEC Section:** 01  TR 11:20 am - 12:35 pm  Anne Jaskot

**LAB Section:** 02  M 1:10 pm - 3:50 pm  Kevin Flaherty, Anne Jaskot

**LAB Section:** 03  R 1:10 pm - 3:50 pm  Kevin Flaherty, Anne Jaskot

**ASTR 206 (S) Astrobiology (QFR)**

This course will focus on the development of complex life and its observational signatures, both on Earth and on other worlds. We will first investigate the conditions that have led to the development of complex life on Earth. We will view Earth over time from an outsider's perspective and challenge preconceptions about the basic requirements for life. We will also explore the 'hot spots' in the search for life beyond Earth in our Solar System. Observations in the next decade may reveal biosignatures in the atmospheres of exoplanets. We will learn about these future observations, while also interacting with current research-grade data for other planets and learning about the methods used to constrain the physical conditions on other worlds. Using quantitative models, we will test the stability of Earth-like planets to the variable and potentially hostile conditions of evolving solar systems.

**Requirements/Evaluation:** weekly problem sets, one paper, two mid-term exams, and a final exam

**Prerequisites:** Math 130 and at least one prior physical science course (either Astronomy, Physics, Geosciences, or Chemistry), or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Science majors, with preference given to students majoring in Astronomy, Astrophysics, or Geosciences

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** In this course students will make quantitative comparisons between environmental conditions on Earth, other planetary bodies, and models. The students will also examine observations regarding the detection and characterization of planetary bodies, including contemporary data.

---

**Spring 2025**

**LEC Section:** 01  MR 2:35 pm - 3:50 pm  Jason E. Young

**ASTR 211 (S) Astronomical Observing and Data Analysis (QFR)**

How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific...
data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24" telescope and from data archives.

Class Format: discussion, computer lab work, and observing

Requirements/Evaluation: weekly problem sets, lab work, and observing projects

Prerequisites: MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

Enrollment Limit: 14

Enrollment Preferences: Astronomy or Astrophysics majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

Not offered current academic year

ASTR 220 (S) New Discoveries with the James Webb Space Telescope

Launched in December 2021, the James Webb Space Telescope (JWST) has delivered new views of the universe and is reshaping our understanding of our solar system, planets around other stars, star formation, and galaxies in the early universe. The beautifully detailed images have also generated intense public interest and are often the subject of science articles in the news. Through JWST's new observations, this course will explore both cutting-edge astronomical science and science communication. We will focus on open questions in each of JWST's four themes: Other Worlds, Star Lifecycle, Galaxies Over Time, and Early Universe. We will discuss the science behind these questions, recent discoveries, and how astronomers are using JWST to learn more. We will also learn about astronomical observations, how JWST works, and how astronomers collect and evaluate scientific evidence. Students will discuss how discoveries are communicated to the public, analyze stories in popular media, and create their own versions of public astronomy communications.

Requirements/Evaluation: weekly homework questions and short writing assignments, class participation, mid-term written article, and final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Astronomy/Astrophysics majors and prospective majors, sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: non-major course

Distributions: (D3)

LEC Section: 01 MR 1:10 pm - 2:25 pm Anne Jaskot

ASTR 240 (F) Great Astronomers and Their Original Publications (WS)

Cross-listings: LEAD 240 / STS 240

Primary Cross-listing

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (Principia Mathematica: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are
often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); George Ellery Hale (Mt. Wilson Observatory 100" telescope, 1917; Palomar Observatory 200" telescope, 1948), Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams’ Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452)

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 240(D3) LEAD 240(D2) STS 240(D2)

Writing Skills Notes: Comments on submitted papers will aid in writing skills

Attributes: LEAD Facets or Domains of Leadership

Not offered current academic year

ASTR 330  (S)  The Nature of the Universe

This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves, galaxies and quasars, dark matter, and the formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a multiverse.

Class Format: lecture/discussion, three hours per week

Requirements/Evaluation: two midterm exams, a small observing portfolio, occasional quizzes, and a final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors; preference given to seniors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors

Distributions: (D3)

Not offered current academic year

ASTR 402  (S)  Between the Stars: The Interstellar Medium  (QFR)

The matter between the stars--the interstellar medium--tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to
measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of “forbidden” lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

Class Format: Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.

Requirements/Evaluation: weekly problem sets, 10-page final paper, and observing projects

Prerequisites: ASTR 111 and PHYS 201 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

Spring 2025

TUT Section: T1  TBA  Anne Jaskot

ASTR 404  (S) Unsolved Problems in Galaxy Evolution

In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.

Requirements/Evaluation: student's papers, responses to the partner's papers, and problem sets

Prerequisites: ASTR 111 and PHYS 142 or 151 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Juniors and Seniors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Not offered current academic year

ASTR 410  (S) Compact Stellar Remnants: White Dwarfs, Neutron Stars and Black Holes

A star is a very interesting, very complicated physical object. Properties of stars and their evolutionary paths depend on an intricate interplay of different physical phenomena with gravity, nuclear interactions, radiation processes and even quantum and relativistic effects playing important roles. Using basic physics we will construct simple models of stars and discuss their evolution, concentrating on the key physical processes that play the dominant role at different evolutionary stages. We will discuss late stages of stellar evolution and concentrate on the basic properties of three possible remnants: white dwarfs, neutron stars and black holes. Radio and X-ray pulsars, supernovae including Type Ia and Gamma Ray Bursts will be discussed as well as observational confirmation of existence of black holes. We will explore extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences. We will also discuss the recent exciting detection of gravitational waves by the LIGO/VIRGO laser interferometric detectors.

Class Format: discussion three hours per week

Requirements/Evaluation: classroom participation, homework assignments, a midterm exam and a final exam
**ASTR 413 (F) Building Stars: A Physical Model of Stellar Structure** (QFR)

How does the Sun shine? How does the Sun evolve with time? What physical processes determine the power output of the Sun? In this course we will explore our modern understanding of how stars work, and why they have a range of sizes, temperatures, and luminosities. As we go, we will discuss the laws of physics at work in our Sun and other stars. Over the course of the semester, we will build a working computer model of the Sun using the basic laws of nuclear fusion, radiative transfer, thermal mechanics, and hydrostatic equilibrium.

**Class Format:** Lectures will include time for computer programming work

**Requirements/Evaluation:** weekly problem sets, weekly coding homework assignments, two mid-term exams, and a final project

**Prerequisites:** PHYS 142 or 151, any prior class that makes use of programming, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Astronomy, Astrophysics, or Physics majors, with first preference to Astronomy or Astrophysics majors

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** In this course, students will use differential equations and numerical coding techniques to test and explore the relationships between physical laws using the Sun and other stars as examples. They will make quantitative comparisons between their calculations and observed stellar properties.

---

**ASTR 493 (F) Senior Research: Astronomy**

An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy, as discussed under the heading of the degree with honors in Astronomy above. This is part of a full-year thesis (493-494).

**Prerequisites:** permission of department

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)
### ASTR 495 (F) Senior Research: Astrophysics

**Cross-listings:** PHYS 495  

**Primary Cross-listing**

An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy or Physics, as discussed under the heading of the degree with honors in Astrophysics above.

**Prerequisites:** permission of department

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 495(D3) PHYS 495(D3)

---

### ASTR 496 (S) Senior Research: Astrophysics

**Cross-listings:** PHYS 496  

**Primary Cross-listing**

An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy or Physics, as discussed under the heading of the degree with honors in Astrophysics above.

**Prerequisites:** permission of department

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 496(D3) PHYS 496(D3)

---

### ASTR 497 (F) Independent Study: Astronomy or Astrophysics

Astronomy independent study.

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

---

### ASTR 498 (S) Independent Study: Astronomy or Astrophysics (QFR)

Astronomy/Astrophysics independent study, directed by one of the Astronomy faculty: Pasachoff/Jaskot/Flaherty

**Requirements/Evaluation:** Regular work with the instructor; submitted presentations and papers as agreed upon

**Prerequisites:** suitable Astronomy/Astrophysics/Physics/Math-Stats-Geosciences/Chemistry courses

**Enrollment Limit:** 10
Enrollment Preferences: research topic
Expected Class Size: 5
Grading: no pass/fail option, no fifth course option
Distributions: (Q3) (QFR)
Quantitative/Formal Reasoning Notes: Substantial quantitative and formal reasoning are involved

Spring 2025
IND Section: 01   TBA   David R. Tucker-Smith

ASTR 499 (F)(S) Physics and Astronomy Colloquium
Cross-listings: PHYS 499
Secondary Cross-listing
Physicists and Astronomers from around the country come to explain their research. Students of Physics and Astronomy at any level are welcome. Registration is not necessary to attend. A non-credit course.
Class Format: colloquium
Requirements/Evaluation: not a for-credit course
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: none
Grading: non-graded
Unit Notes: registration not necessary to attend
Distributions: No divisional credit
This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 499 No divisional credit ASTR 499 No divisional credit

Fall 2024
LEC Section: 01   F 2:35 pm - 3:50 pm   David R. Tucker-Smith
Spring 2025
LEC Section: 01   F 2:35 pm - 3:50 pm   David R. Tucker-Smith

Winter Study

ASTR 31 (W) Senior Research: Astronomy
To be taken by students registered for Astronomy 493, 494.
Grading: pass/fail only
Not offered current academic year

ASTR 32 (W) Senior Research: Astrophysics
Cross-listings: PHYS 32
Primary Cross-listing
To be taken by students registered for Astrophysics 495, 496.
Class Format: independent study
Grading: pass/fail only
This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 32 ASTR 32
Not offered current academic year

ASTR 99 (W) Independent Study: Astronomy or Astrophysics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Grading: pass/fail only

Not offered current academic year
How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. Williams Astronomy courses are for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astronomy major and the Astrophysics major, both administered by the Department of Physics and Astronomy, are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Williams Astronomy site can be found at astronomy.williams.edu.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)

Two 400-level Astronomy courses

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics

Mathematics 140 Calculus II

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. A typical path through the major will begin with Physics 141, which is suitable for students with one year of high school physics and a background in calculus. However, students without high school physics may begin with Physics 131, and students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of
Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.

THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Department of Physics and Astronomy to determine their most appropriate route through the major. An essential ingredient in such students’ undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Physics 141 is recommended for students with one year of high school physics and a background in calculus. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

- Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond
- Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement
- Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics
- Physics 201 Electricity and Magnetism
- Physics 202 Waves and Optics
- Physics/Mathematics 210 Mathematical Methods for Scientists
- Physics 301 Introductory Quantum Physics
- Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus
- Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following:
  - Astronomy 211 Astronomical Observing and Data Analysis
  - Physics 302 Statistical Physics
  - Physics 402T Applications of Quantum Mechanics
Physics 405T Electromagnetic Theory
Physics 411T Classical Mechanics;
Physics 418 Gravity

The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

Honors candidates will also be required to attend departmental colloquium talks.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

STUDY ABROAD

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then
ASTR 101  (F)  Stars: From Suns to Black Holes

Have you ever wondered what makes the Sun and stars shine and what they are made of? Do they evolve, and if so, how do they change? What are black holes, and how can they form? How do we find planets around other stars? Astronomy 101, a non-major, general introduction to the part of contemporary astronomy that includes how stars form and die, will provide answers to these questions. We will pay special attention to exciting discoveries made in the past decade. Thousands of exoplanets have been discovered, with their atmospheres being studied in detail by the James Webb Space telescope. For the first time, gravitational waves from merging black holes have been detected. In this course we will discuss the basic methods and instruments used in these and other astronomical observations and what they can teach us about the life cycle of stars. We will discuss what happens at the centers of stars, how stars evolve, and why some stars explode and form neutron stars and black holes. This course is independent of and on the same level as ASTR 102 (solar system) and 104 (galaxies/cosmology); students who have taken these courses are welcome.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester.

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 48;12/lab

Enrollment Preferences: first and second-year students

Expected Class Size: 30/lec

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

Fall 2024

LEC Section: 01  TR 9:55 am - 11:10 am  Jason E. Young
LAB Section: 02  T 1:00 pm - 2:30 pm  Kevin Flaherty
LAB Section: 03  T 2:30 pm - 4:00 pm  Kevin Flaherty
LAB Section: 04  W 1:00 pm - 2:30 pm  Kevin Flaherty
LAB Section: 05  W 2:30 pm - 4:00 pm  Kevin Flaherty

ASTR 102  (S)  Our Solar System and Others

What makes Earth different from all the other planets? What have NASA's Curiosity and Perseverance on Mars found about that planet's past running water and suitability for life? How has knowledge about Pluto and the outer solar system been transformed by NASA's flybys? Will asteroids or comets collide with the Earth again? What is the new James Webb Space Telescope revealing about exoplanets and their atmospheres? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system (and the systems of planets around other stars), will provide answers to these questions and more. We will cover the historical development of humanity's understanding of planetary systems, examining contributions by Copernicus, Galileo, Newton, Einstein, and others and the more recent discoveries of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and space telescopes such as the Hubble, James Webb, and Kepler/K2/TESS missions. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observing TAs will be available for consultation, in addition to the instructors, throughout the semester.
ASTR 104  (S)  The Milky Way Galaxy and the Universe Beyond

How was the Universe created, and how has it evolved to its presently observed structure? This course will start at the Big Bang, the beginning of everything, and move forward from there. About five centuries ago Galileo Galilei used his own primitive telescope to make many astronomical discoveries: observing the moons of the Jupiter, craters on the Moon, and Sun spots to name a few. Galileo also noticed that stars are not spread on the celestial sphere at random but form a disk like structure, which we now call the Milky Way Galaxy -- our cosmic home. Almost a hundred years ago Edwin Hubble discovered that the Universe contains many galaxies and that they are moving away from each other. Hubble discovered that the Universe -- the largest physical object -- expands, so it had a beginning. In this course we will explore the tools and techniques that astronomers use to study stars and galaxies. From the discovery of the Milky Way to the expanding Universe, we will cover the key concepts and discoveries that have shaped our understanding of the cosmos. During recent decades astronomers have made exciting -- and unsettling -- new discoveries: it turns out that most of matter in the Universe does not emit light and most probably is composed of particles of unknown origin, and that the expansion of the Universe is now accelerating, pushed by a mysterious dark energy. At this point, astronomers have evidence to show that at early epochs the Universe was very dense and very hot. This early epoch is called the Big Bang. How the Big Bang happened is not known yet but there are several interesting hypotheses that our Universe could be one of many. This course will introduce important highlights in the observation and interpretation of remarkable astronomical phenomena and explore these many mysteries.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. Current astronomical discoveries will be discussed at the beginning of each class and by email throughout the semester.

Requirements/Evaluation:  two hour tests, a final exam, an observing portfolio, and lab reports

ASTR 111  (F)  Introduction to Astrophysics  (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the
other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: The class has weekly afternoon laboratory sessions, which will alternate between 'hands-on' activities and problem-solving/discussion sessions. Nighttime observing sessions will occur throughout the semester.

Requirements/Evaluation: weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio

Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28; 14/lab

Enrollment Preferences: potential Astronomy majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

Fall 2024

LEC Section: 01 TR 11:20 am - 12:35 pm Anne Jaskot
LAB Section: 02 M 1:10 pm - 3:50 pm Kevin Flaherty, Anne Jaskot
LAB Section: 03 R 1:10 pm - 3:50 pm Kevin Flaherty, Anne Jaskot

ASTR 206 (S) Astrobiology (QFR)
This course will focus on the development of complex life and its observational signatures, both on Earth and on other worlds. We will first investigate the conditions that have led to the development of complex life on Earth. We will view Earth over time from an outsider's perspective and challenge preconceptions about the basic requirements for life. We will also explore the 'hot spots' in the search for life beyond Earth in our Solar System. Observations in the next decade may reveal biosignatures in the atmospheres of exoplanets. We will learn about these future observations, while also interacting with current research-grade data for other planets and learning about the methods used to constrain the physical conditions on other worlds. Using quantitative models, we will test the stability of Earth-like planets to the variable and potentially hostile conditions of evolving solar systems.

Requirements/Evaluation: weekly problem sets, one paper, two mid-term exams, and a final exam

Prerequisites: Math 130 and at least one prior physical science course (either Astronomy, Physics, Geosciences, or Chemistry), or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Science majors, with preference given to students majoring in Astronomy, Astrophysics, or Geosciences

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course students will make quantitative comparisons between environmental conditions on Earth, other planetary bodies, and models. The students will also examine observations regarding the detection and characterization of planetary bodies, including contemporary data.

Spring 2025

LEC Section: 01 MR 2:35 pm - 3:50 pm Jason E. Young

ASTR 211 (S) Astronomical Observing and Data Analysis (QFR)
How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific
data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24” telescope and from data archives.

**Class Format:** discussion, computer lab work, and observing

**Requirements/Evaluation:** weekly problem sets, lab work, and observing projects

**Prerequisites:** MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

**Enrollment Limit:** 14

**Enrollment Preferences:** Astronomy or Astrophysics majors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

Not offered current academic year

**ASTR 220 (S) New Discoveries with the James Webb Space Telescope**

Launched in December 2021, the James Webb Space Telescope (JWST) has delivered new views of the universe and is reshaping our understanding of our solar system, planets around other stars, star formation, and galaxies in the early universe. The beautifully detailed images have also generated intense public interest and are often the subject of science articles in the news. Through JWST's new observations, this course will explore both cutting-edge astronomical science and science communication. We will focus on open questions in each of JWST's four themes: Other Worlds, Star Lifecycle, Galaxies Over Time, and Early Universe. We will discuss the science behind these questions, recent discoveries, and how astronomers are using JWST to learn more. We will also learn about astronomical observations, how JWST works, and how astronomers collect and evaluate scientific evidence. Students will discuss how discoveries are communicated to the public, analyze stories in popular media, and create their own versions of public astronomy communications.

**Requirements/Evaluation:** weekly homework questions and short writing assignments, class participation, mid-term written article, and final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Astronomy/Astrophysics majors and prospective majors, sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** non-major course

**Distributions:** (D3)

Spring 2025

LEC Section: 01  MR 1:10 pm - 2:25 pm  Anne Jaskot

**ASTR 240 (F) Great Astronomers and Their Original Publications** (WS)

**Cross-listings:** LEAD 240 / STS 240

**Primary Cross-listing**

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (*Principia Mathematica*: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are
often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams' Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452)

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 240(D3) LEAD 240(D2) STS 240(D2)

Writing Skills Notes: Comments on submitted papers will aid in writing skills

Attributes: LEAD Facets or Domains of Leadership

Not offered current academic year

ASTR 330 (S) The Nature of the Universe

This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves, galaxies and quasars, dark matter, and the formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a multiverse.

Class Format: lecture/discussion, three hours per week

Requirements/Evaluation: two midterm exams, a small observing portfolio, occasional quizzes, and a final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors; preference given to seniors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors

Distributions: (D3)

Not offered current academic year

ASTR 402 (S) Between the Stars: The Interstellar Medium (QFR)

The matter between the stars—the interstellar medium—tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to
measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

**Class Format:** Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.

**Requirements/Evaluation:** weekly problem sets, 10-page final paper, and observing projects

**Prerequisites:** ASTR 111 and PHYS 201 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** juniors and seniors

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

Spring 2025

TUT Section: T1 TBA Anne Jaskot

**ASTR 404 (S) Unsolved Problems in Galaxy Evolution**

In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.

**Requirements/Evaluation:** student's papers, responses to the partner's papers, and problem sets

**Prerequisites:** ASTR 111 and PHYS 142 or 151 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Juniors and Seniors

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**Not offered current academic year**

**ASTR 410 (S) Compact Stellar Remnants: White Dwarfs, Neutron Stars and Black Holes**

A star is a very interesting, very complicated physical object. Properties of stars and their evolutionary paths depend on an intricate interplay of different physical phenomena with gravity, nuclear interactions, radiation processes and even quantum and relativistic effects playing important roles. Using basic physics we will construct simple models of stars and discuss their evolution, concentrating on the key physical processes that play the dominant role at different evolutionary stages. We will discuss late stages of stellar evolution and concentrate on the basic properties of three possible remnants: white dwarfs, neutron stars and black holes. Radio and X-ray pulsars, supernovae including Type Ia and Gamma Ray Bursts will be discussed as well as observational confirmation of existence of black holes. We will explore extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences. We will also discuss the recent exciting detection of gravitational waves by the LIGO/VIRGO laser interferometric detectors.

**Class Format:** discussion three hours per week

**Requirements/Evaluation:** classroom participation, homework assignments, a midterm exam and a final exam
Prerequisites: PHYS 201 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: physics, astrophysics, and astronomy majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

ASTR 413  (F)  Building Stars: A Physical Model of Stellar Structure  (QFR)
How does the Sun shine? How does the Sun evolve with time? What physical processes determine the power output of the Sun? In this course we will explore our modern understanding of how stars work, and why they have a range of sizes, temperatures, and luminosities. As we go, we will discuss the laws of physics at work in our Sun and other stars. Over the course of the semester, we will build a working computer model of the Sun using the basic laws of nuclear fusion, radiative transfer, thermal mechanics, and hydrostatic equilibrium.

Class Format: Lectures will include time for computer programming work
Requirements/Evaluation: weekly problem sets, weekly coding homework assignments, two mid-term exams, and a final project
Prerequisites: PHYS 142 or 151, any prior class that makes use of programming, or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Astronomy, Astrophysics, or Physics majors, with first preference to Astronomy or Astrophysics majors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: In this course, students will use differential equations and numerical coding techniques to test and explore the relationships between physical laws using the Sun and other stars as examples. They will make quantitative comparisons between their calculations and observed stellar properties.

Winter Study

ASTR 31 (W) Senior Research: Astronomy
To be taken by students registered for Astronomy 493, 494.
Grading: pass/fail only
Not offered current academic year

ASTR 32 (W) Senior Research: Astrophysics
Cross-listings: PHYS 32
Primary Cross-listing
To be taken by students registered for Astrophysics 495, 496.
Class Format: independent study
Grading: pass/fail only
This course is cross-listed and the prefixes carry the following divisional credit:
Not offered current academic year

**ASTR 99 (W) Independent Study: Astronomy or Astrophysics**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Grading:** pass/fail only

Not offered current academic year
What is light? How does a laser work? What is a black hole? What are the fundamental building blocks of the universe? Physics majors and Astrophysics majors study these and related questions to understand the physical world around us, from the very small to the very large. A physics student practices the experimental methods used to learn about this world and explores the mathematical techniques and theories developed to explain these physical phenomena. A Physics major or Astrophysics major serves as preparation for further work in physics, astrophysics, applied physics, other sciences, engineering, medical research, science teaching and writing, and other careers involving critical thinking, problem-solving, and insight into the fundamental principles of nature.

ASTRONOMY AND ASTROPHYSICS MAJORS
The Department of Physics and Astronomy offers three distinct majors, in Physics, Astrophysics, and Astronomy. More information about the Astrophysics and Astronomy majors can be found on the Astronomy site.

PHYSICS MAJOR
Introductory Courses
Students considering a major in physics should take both physics and mathematics as first-year students. Students typically begin with Physics 141 and Mathematics 150 or 151 (multivariable calculus); students who wish to begin with Physics 131 should consult with the department.

Physics 131 Introduction to Mechanics. This is designed as a first course in physics. It is suitable for students who either have not had physics before or have had some physics but are not comfortable solving “word problems” that require calculus.

Physics 141 Mechanics and Waves. Students in this course should have solid backgrounds in science and calculus, either from high school or college, including at least a year of high school physics.

The Department of Mathematics will place students in the appropriate introductory calculus course. The physics major sequence courses all make use of calculus at increasingly sophisticated levels. Therefore, students considering a Physics major should continue their mathematical preparation without interruption through the introductory calculus sequence (Mathematics 130, 140, and 150 or 151). Students are encouraged to take Physics 210 as early as possible.

ADVANCED PLACEMENT
Students with unusually strong backgrounds in calculus and physics may place out of Physics 141 and either: 1) begin with the special seminar course Physics 151 in the fall (typically followed by Physics 210 in the spring), or 2) begin with Physics 142 in the spring (possibly along with Physics 210). Students may take either 151 or 142 but not both. On rare occasions a student with an exceptional background will be offered the option of enrolling in Physics 201.

Placement is based on AP scores, consultation with the department, and results of a placement exam administered during First Days. The exam can also be taken later in the year by arrangement with the department chair. The exam covers classical mechanics, basic wave phenomena, and includes some use of calculus techniques.

REQUIREMENTS FOR THE MAJOR
A total of ten courses, nine in physics and one in mathematics, are required to complete the Physics major.

**Required Physics Sequence Courses (7)**

Physics 141 Mechanics and Waves

Physics 142 Foundations of Modern Physics

or Physics 151 Seminar in Modern Physics

Physics 201 Electricity and Magnetism

Physics 202 Waves and Optics

Physics 210 Mathematical Methods for Scientists

Physics 301 Quantum Physics

Physics 302 Statistical Mechanics and Thermodynamics

**Required Mathematics Course (1)**

Mathematics 150 or 151 Multivariable Calculus

Students entering with Advanced Placement in mathematics may obtain credit toward the major for the equivalent Mathematics 150 or 151 taken elsewhere.

**Elective Courses (2)**

At least two more physics courses above the 100 level (or other approved courses as noted below) must be taken, bringing the total number of courses for the major to ten.

Students who place out of Physics 141 must substitute one additional elective course, for a total of ten courses.

Students who place out of both Physics 141 and 142 and begin their studies in Physics 201 must substitute one additional elective course, for a total of nine courses.

**Options**

- Mathematics 209 or 309 may substitute for Physics 210.
- Astronomy 111 may count in place of Physics 141 if a student places out of 141 (see “advanced placement” above).
- An additional Astronomy or Astrophysics course above the introductory level that is acceptable for the astrophysics major may be counted.
- Two approved Division III courses may be substituted for one Physics course. Approval is on an individual basis at the discretion of the department chair.
- Honors work is in addition to completion of the basic major so Physics 493 and 494 do not count towards the ten courses in the major.

**PREPARATION FOR ADVANCED STUDY**

Students who wish to do graduate work in physics, astrophysics, or engineering should elect courses in both physics and mathematics beyond the minimum major requirements. The first-year graduate school curriculum in physics usually includes courses in quantum mechanics, electromagnetic theory, and classical mechanics that presuppose intermediate level study of these subjects as an undergraduate. Therefore, students planning graduate work in physics should elect all of the following courses:

- Physics 402T Applications of Quantum Mechanics
- Physics 405T Electromagnetic Theory
- Physics 411T Classical Mechanics

**ADVISING**

Both majors and non-majors are encouraged to consult with the department chair or course instructors about course selections or other matters.

**THE DEGREE WITH HONORS IN PHYSICS**

The degree with honors in Physics will be awarded on the basis of a senior thesis presenting the results of a substantial experimental or theoretical investigation carried out under the direction of a faculty member in the department. There is no rigid grade point average required for admission to the program or for the awarding of the degree with honors, but it is normally expected that honors students will maintain at least a B
average in physics and mathematics. Students will normally apply for admission to the program early in the spring of their junior year and during senior year these students will normally elect Physics 493, W31, and 494 in addition to the usual requirements for the major. At the end of winter study, the department will decide whether the student will be admitted to honors candidacy. Both a written thesis and a colloquium presentation of the results are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill them with unusually high distinction.

Honors candidates will also be required to attend departmental colloquium talks.

STUDY ABROAD

The physics community is international in scope and a career in physics (or a related field) can provide many opportunities for travel and contact with individuals from outside the United States. The physics major at Williams is a carefully structured four-year program designed to prepare students who are so inclined for graduate study at leading research institutions. While it is possible to complete the major requirements in three years, such a major will not usually not lead to further study in the field. With careful early planning on the part of a student, and close consultation with the department chair, it is possible to complete a strong major and still study abroad provided the foreign institution can provide courses which reasonably substitute or supplement those in the Williams major program. Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Here are answers to frequently asked questions related to study abroad:

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. The laboratory component of Physics 301 serves as our “advanced lab course.” Students often cannot get equivalent experience abroad and must take this when they return senior year (non-credit). Unless there has been a recent change, our own Oxford Program is one place students cannot get lab experience.

OPTIONS FOR NON-MAJORS

Many students want to take a self-contained and rigorous full-year survey of physics. For such students, the most appropriate sequence will be either Physics 131 or Physics 141 followed by Physics 132, depending on the student’s background in science and mathematics (see Introductory Courses above). Either of these sequences satisfies the physics requirement for medical school.

The department also offers one-semester courses designed for non-majors, including Physics 107, Physics 108, and Physics 109.

PHYS 108  (S)  Energy Science and Technology  (QFR)

Cross-listings: ENVI 108

Primary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating and lighting, and energy storage. Students will learn to compare the efficiencies and environmental impacts of various
**Prerequisites:** MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead

**Enrollment Limit:** 24 per lab

**Enrollment Preferences:** seniority

**Expected Class Size:** 60

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This class will have weekly problem sets requiring substantial quantitative reasoning

---

**PHYS 132 (S) Electromagnetism and the Physics of Matter (QFR)**

This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.

**Class Format:** lecture three hours per week, laboratory three hours approximately every other week, and conference section 1 hour approximately every other week

**Requirements/Evaluation:** weekly problem sets, labs, quizzes and exams

**Prerequisites:** PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)

**Enrollment Limit:** 22 per lab

**Enrollment Preferences:** sophomores

**Expected Class Size:** 60

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Significant homework, exams, quizzes requiring mathematical and physical reasoning.

---

**PHYS 141 (F) Mechanics and Waves (QFR)**

This is the typical first course for a prospective physics major. It covers most of the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

**Class Format:** lecture, three hours per week; laboratory, three hours approximately every other week; conference section, 1.5 hours approximately every other week

**Requirements/Evaluation:** weekly problem sets, labs, two 1-hour exams, and a final exam, all of which have a substantial quantitative component
Prerequisites: High school physics (strongly recommended) and MATH 130 or equivalent placement, or permission of the instructor. High school physics at the AP, IB, or equivalent level is neither required nor expected.

Enrollment Limit: 24 per lab

Enrollment Preferences: first-year students and science majors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Unit Notes: PHYS 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course consists of lectures, problem-solving conferences, lab exercises, problem sets and exams, all of which have a substantial quantitative component.

Fall 2024

LEC Section: 01 MWF 11:00 am - 11:50 am Betul Pamuk
LAB Section: 02 M 1:00 pm - 4:00 pm Betul Pamuk
LAB Section: 03 T 1:00 pm - 4:00 pm Betul Pamuk

PHYS 142 (S) Foundations of Modern Physics (QFR)

Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity, which extends physics into the realm of high speeds and high energies, requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our expectation of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system.

This course will survey ideas from each of these three arenas, and can serve either as a terminal course for those seeking to complete a year of physics or as the basis for future advanced study of these topics.

Class Format: lecture, three hours weekly; laboratory, 2-3 hours most weeks, alternating between 'hands-on' sessions and problem-solving/discussion sessions

Requirements/Evaluation: weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 141 and MATH 130, or equivalent; PHYS 131 may substitute for PHYS 141 with the permission of instructor; students may not take both PHYS 142 and PHYS 151

Enrollment Limit: 14/L

Enrollment Preferences: first-year students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Heavily problem-solving focused, involving algebraic manipulations, single-variable calculus, generating and reading graphs, etc.

Spring 2025

LEC Section: 01 MWF 11:00 am - 11:50 am Graham K. Giovanetti
LAB Section: 02 M 1:00 pm - 4:00 pm Graham K. Giovanetti
LAB Section: 03 T 1:00 pm - 4:00 pm Graham K. Giovanetti

PHYS 151 (F) Seminar in Modern Physics (QFR)

Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our
notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course covers the same core material as PHYS 142 but in a small seminar format for students with strong prior preparation in physics.

**Class Format:** lecture/discussions plus one 3-hour lab per week

**Requirements/Evaluation:** class participation, weekly lab assignments, weekly problem sets, exams

**Prerequisites:** placement by the department (see "advanced placement" section in the description about the department). Students may take either PHYS 142 or PHYS 151 but not both

**Enrollment Limit:** 18

**Enrollment Preferences:** first-years

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** this is a small seminar designed for first-year students who have placed out of PHYS 141

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** all assignments in the course have a substantial quantitative component

---

**PHYS 201  (F) Electricity and Magnetism  (QFR)**

The classical theory of electricity and magnetism is very rich yet it can be written in a remarkably succinct form using Maxwell's equations. This course is an introduction to electricity and magnetism and their mathematical description, connecting electric and magnetic phenomena via the special theory of relativity. Topics include electrostatics, magnetic fields, electromagnetic induction, DC and AC circuits, and the electromagnetic properties of matter. The laboratory component of the course is an introduction to electronics where students will develop skills in building and debugging electrical circuits.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** problem sets, labs/conference section assignments, two midterms, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 142 OR 151; MATH 150 or 151; with a preference for MATH 151

**Enrollment Limit:** 10 per lab

**Enrollment Preferences:** prospective physics majors, then by seniority

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course involves significant problem-solving and mathematical analysis of phenomena using calculus, numerical methods, and other quantitative tools.

---

**PHYS 202  (S) Vibrations, Waves and Optics  (QFR)**

Waves and oscillations characterize many different physical systems, including vibrating strings and springs, waves at the beach, or those that we hear as sound or see as light. Quantum mechanics describes particles with wave functions, and gravitational waves distort the very fabric of the universe. Despite these diverse settings, waves exhibit several common characteristics, so understanding of a few simple systems can provide insight into a wide array of phenomena. In this course we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then
move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. We conclude with a focus on electromagnetic waves and in particular on optical examples of wave phenomena such as interference, diffraction, and lasers. Throughout the course we will introduce and develop mathematical tools which will continue to see use in higher-level physics.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** problem sets, labs, midterm examinations, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 201; co-requisite: PHYS/MATH 210 or MATH 309 or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** sophomores

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Weekly problem sets and laboratories which develop and use quantitative skills.

---

**PHYS 210 (S) Mathematical Methods for Scientists** (QFR)

**Cross-listings:** MATH 210

**Primary Cross-listing**

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

**Class Format:** three hours per week

**Requirements/Evaluation:** several exams and weekly problem sets, all of which have a substantial quantitative component

**Prerequisites:** MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

**Enrollment Limit:** 50

**Enrollment Preferences:** sophomores and juniors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 210(D3) MATH 210(D3)

**Quantitative/Formal Reasoning Notes:** This course will have weekly problem sets using advanced calculus methods

---

**PHYS 234 (S) Introduction to Materials Science** (QFR)

**Cross-listings:** GEOS 234

**Primary Cross-listing**

Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or
mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

**Class Format:** lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

**Requirements/Evaluation:** weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

**Prerequisites:** high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** based on students’ scientific background and seniority

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course does not count toward the Geosciences major.

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Weekly problem sets and exams all have a substantial quantitative component.

**Attributes:** MTSC Courses

---

**Spring 2025**

**LEC Section: 01** MR 2:35 pm - 3:50 pm Katharine E. Jensen

**PHYS 301 (F) Quantum Physics (QFR)**

This course serves as a one-semester introduction to the formalism, and phenomenology of quantum mechanics, beginning with a discussion of the Schrodinger wave equation, the concept of matter waves, and wave-packets. With this introduction as background, we will continue our discussion with a variety of one-dimensional problems such as the particle-in-a-box and the harmonic oscillator. We then extend this work to systems in two and three dimensions, including a detailed discussion of the structure of the hydrogen atom. Along the way we will develop connections between mathematical formalism and physical predictions of the theory. Finally, we conclude the course with a discussion of angular momentum and spins, with applications to atomic physics, entanglement, and quantum information.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** weekly problem sets, laboratory reports / write-ups, a midterm exam, and final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 202 and PHYS/MATH 210 or MATH 309

**Enrollment Limit:** 8 per lab

**Enrollment Preferences:** physics majors

**Expected Class Size:** 24

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Phys 301 relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

**LAB Section: 02** M 1:00 pm - 4:00 pm Charlie Doret, Frederick W. Strauch

**LAB Section: 03** W 1:00 pm - 4:00 pm Charlie Doret, Frederick W. Strauch
PHYS 302 (S) Statistical Mechanics & Thermodynamics (QFR)

Macroscopic objects are made up of huge numbers of fundamental particles interacting in simple ways—obeying the Schrödinger equation, Newton’s and Coulomb’s Laws—and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we will develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety of physical questions, including the behavior of gases, polymers, heat engines, biological and astrophysical systems, magnets, and electrons in solids.

Class Format: lecture/discussion three hours per week and weekly laboratory work

Requirements/Evaluation: weekly problem sets and labs, plus exams, all of which have a substantial quantitative component

Prerequisites: required: PHYS 201, PHYS/MATH 210 or MATH 309; recommended: PHYS 202, PHYS 301

Enrollment Limit: 14 per lab

Enrollment Preferences: physics majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: weekly problem sets, exams, and labs, all of which have a substantial quantitative component

Spring 2025
LEC Section: 01 MWF 8:30 am - 9:45 am Daniel P. Aalberts

LAB Section: 03 R 1:10 pm - 3:50 pm Daniel P. Aalberts

PHYS 312 (F) Philosophical Implications of Modern Physics (QFR)

Cross-listings: PHIL 312 / STS 312

Primary Cross-listing

Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Requirements/Evaluation: attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper

Prerequisites: MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors and Physics majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 312(D3) PHIL 312(D2) STS 312(D2)

Attributes: PHIL Contemp Metaphysics + Epistemology Courses

Not offered current academic year

PHYS 314 (S) Controlling Quanta (QFR)

This course will explore modern developments in the control of individual quantum systems. Topics covered will include basic physical theories of atoms coupled to photons, underlying mathematical tools (including Lie algebras and groups), and computational methods to simulate and analyze quantum systems. Applications to quantum computing, teleportation, and experimental metaphysics (Bell's inequality) will also be discussed.
**PHYS 315 (F) Computational Biology** (QFR)

**Cross-listings:** CSCI 315

**Primary Cross-listing**

This course will provide an overview of Computational Biology, the application of computational, mathematical, statistical, and physical problem-solving techniques to interpret the rapidly expanding amount of biological data. Topics covered will include database searching, DNA sequence alignment, clustering, RNA structure prediction, protein structural alignment, methods of analyzing gene expression, networks, and genome assembly using techniques such as string matching, dynamic programming, hidden Markov models, and statistics.

**Requirements/Evaluation:** weekly Python programming assignments, code reviews, problem sets, plus a few quizzes and a final project

**Prerequisites:** programming experience (e.g., CSCI 136) and mathematics (PHYS/MATH 210 or MATH 150) and physical science (PHYS 142/151, or CHEM 101/15X), or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** if over-enrolled, a questionnaire will be circulated

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** problem sets and programming assignments

**Attributes:** BIGP Courses

---

**PHYS 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab** (QFR)

**Cross-listings:** BIOL 319 / CHEM 319 / CSCI 319 / MATH 319

**Secondary Cross-listing**

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with
independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** The lab for this course will meet for two afternoons per week. Some lab sessions will be shorter than 3 hours.

**Requirements/Evaluation:** lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors, then juniors, then sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**
BIOL 319(D3) CHEM 319(D3) CSCI 319(D3) PHYS 319(D3) MATH 319(D3)

**Quantitative/Formal Reasoning Notes:** Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

**Attributes:** BIGP Courses BIMO Interdepartmental Electives

Not offered current academic year

---

**PHYS 321 (S) Introduction to Particle Physics** (QFR)
The Standard Model of particle physics incorporates special relativity, quantum mechanics, and almost all that we know about elementary particles and their interactions. This course introduces some of the main ideas and phenomena associated with the Standard Model. After a review of relativistic kinematics, we will learn about symmetries in particle physics, relativistic wave equations, elements of quantum field theory, Feynman diagrams, and selected applications of quantum electrodynamics, the weak interactions, and quantum chromodynamics. We will conclude with a discussion of spontaneous symmetry breaking and the Higgs mechanism.

**Requirements/Evaluation:** weekly problem sets, a midterm exam, and a final exam

**Prerequisites:** PHYS 301

**Enrollment Limit:** 20

**Enrollment Preferences:** By seniority

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Exams and problem sets all have a significant quantitative component.

---

Spring 2025

LEC Section: 01 TR 11:20 am - 12:35 pm David R. Tucker-Smith

**PHYS 402 (S) Applications of Quantum Mechanics** (QFR)
This course will explore a number of important topics in the application of quantum mechanics to physical systems, including perturbation theory, the variational principle and the semiclassical interaction of atoms and radiation. The course will finish up with three weeks on quantum optics including an experimental project on non-classical interference phenomena. Applications and examples will be taken mostly from atomic physics with some discussion of solid state systems.

**Requirements/Evaluation:** weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 301

**Enrollment Limit:** 10 per sec
Enrollment Preferences: Physics and Astrophysics Majors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course has weekly problem sets, all of which have a substantial quantitative component.

Spring 2025
TUT Section: T1  F 1:10 pm - 2:25 pm  Betul Pamuk

PHYS 405  (F) Electromagnetic Theory  (QFR)
This course builds on the material of Physics 201, and explores the application of Maxwell's Equations to understand a range of topics including electric fields and matter, magnetic materials, light, and radiation. As we explore diverse phenomena, we will learn useful approximation techniques and beautiful mathematical tools. In addition to weekly tutorial meetings, the class will meet once a week as a whole to introduce new material.

Class Format: Class will meet once as a whole to introduce new material and for informal discussion.

Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, and a final exam or final project, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 209 or MATH 309
Enrollment Limit: 30

Enrollment Preferences: Preference will be given to physics and astrophysics majors.
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Physics courses are all heavily dependent on QFR skills. Phys 405 will feature extensive use of vector calculus and differential equations while also asking students to develop facility with approximation techniques in solving complex problems throughout the semester.

Not offered current academic year

PHYS 411  (F) Classical Mechanics  (QFR)
This course will explore advanced topics in classical mechanics. Central ideas include the calculus of variations, the Lagrangian and Hamiltonian formulations of mechanics, phase space, central-force motion, non-inertial reference frames (including implications for physics on a rotating Earth), rigid-body rotations, and non-linear dynamics & chaos, with additional topics from continuum and fluid mechanics as time permits. Numerical and perturbative techniques will be developed and used extensively. We will also examine the ways in which classical mechanics informs other fields of physics. In addition to weekly tutorial meetings the class will meet weekly as a whole to introduce and discuss new material.

Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, a final project, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 309
Enrollment Limit: 30

Enrollment Preferences: majors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: weekly problem sets requiring substantial quantitative reasoning using analytical and numerical methods.

Fall 2024
TUT Section: T1  F 1:10 pm - 2:25 pm  Katharine E. Jensen, Frederick W. Strauch
PHYS 418 (S) Gravity (QFR)
This course is an introduction to Einstein's theory of general relativity. We begin with a review of special relativity, emphasizing geometrical aspects of Minkowski spacetime. Working from the equivalence principle, we then motivate gravity as spacetime curvature, and study in detail the Schwarzschild geometry around a spherically symmetric mass. After this application, we use tensors to develop Einstein's equation, which describes how energy density curves spacetime. With this equation in hand we study the Friedmann-Robertson-Walker geometries for an expanding universe, and finally, we linearize Einstein's equation to develop the theory of gravitational waves.

Requirements/Evaluation: weekly problem sets, a midterm exam, and a final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 301 or PHYS 405 or PHYS 411, or permission of instructor
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: All problem sets and exams will have a substantial quantitative component.

PHYS 451 (F) Condensed Matter Physics (QFR)
Condensed matter physics is an important area of current research and serves as the basis for modern electronic technology. We plan to explore the physics of metals, insulators, semiconductors, superconductors, and photonic crystals, with particular attention to structure, thermal properties, energy bands, and electronic properties.

Requirements/Evaluation: weekly readings and problem sets, and exams
Prerequisites: PHYS 301 (may be taken simultaneously); or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Physics majors
Expected Class Size: 6
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: serious problem sets

Winter Study  -----------------------------------------------

**PHYS 22  (W) Research Participation**

Several members of the department will have student projects available dealing with their own research or that of current senior thesis students. Approximately 35 hours per week of study and actual research participation will be expected from each student.

**Class Format:**  to be arranged with instructor

**Requirements/Evaluation:**  students will be required to keep a notebook and write a 5-page paper summarizing their work

**Prerequisites:**  permission of instructor

**Enrollment Limit:**  1-2

**Enrollment Preferences:**  permission of instructor

**Grading:**  pass/fail only

Not offered current academic year
PHYS 31 (W) Senior Research: Physics
To be taken by students registered for Physics 493, 494.

Class Format: thesis
Grading: pass/fail only

Not offered current academic year

PHYS 32 (W) Senior Research: Astrophysics
Cross-listings: ASTR 32

Secondary Cross-listing
To be taken by students registered for Astrophysics 495, 496.

Class Format: independent study
Grading: pass/fail only

This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 32ASTR 32

Not offered current academic year

PHYS 99 (W) Independent Study: Physics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
POLITICAL ECONOMY (Div II)
Chair: Professor Darel E. Paul

Advisory Committee

- Jon M. Bakija, Chair of Economics and W. Van Alan Clark ’41 Third Century Professor in the Social Sciences
- William M. Gentry, Carl Van Duyne Professor of Economics
- Cathy M. Johnson, James Phinney Baxter III Professor of Political Science; on leave Fall 2023
- Sara LaLumia, David A. Wells Professor of Economics
- James E. Mahon, Woodrow Wilson Professor of Political Science
- Nicole E. Mellow, Chair and Ephraim Williams Professor of Political Science; affiliated with: Political Science, Leadership Studies
- Darel E. Paul, Professor of Political Science, Chair of Political Economy Program; affiliated with: Political Science, Political Economy
- Sidney A. Rothstein, Assistant Professor of Political Science; on leave 2023-2024
- Lara D. Shore-Sheppard, Dean of the Faculty, Kimberly A. ’96 and Robert R. ’62 Henry Professor of Economics; affiliated with: Dean of the Faculty's Office, Economics
- Anand V. Swamy, Chair of the Executive Committee for the Center for Development Economics and The Willmott Family Third Century Professor of Economics; affiliated with: Economics, Center for Development Economics
- Owen Thompson, Associate Professor of Economics
- David J. Zimmerman, Professor of Economics and Orrin Sage Professor of Political Economy

Political Economy at Williams is the study of political and economic forces as they combine to produce public policy. These outputs of the political system are shaped by social forces, nongovernmental organizations, state institutions, markets, knowledge structures, political ideologies, normative goals, and moral values. Policy analysis seeks to both understand and evaluate public policies in their formulation, implementation, and effectiveness. The study of public policy is inherently interdisciplinary, and the Political Economy Program self-consciously incorporates the central analytical approaches of both Political Science and Economics, seeking to surmount the sometimes artificial barriers of specialization that may characterize a single discipline.

The Political Economy major takes students from introductory courses in Economics and Political Science all the way to a senior year group project of independent student research and concrete policy proposals. Three introductory courses and four electives in these two fields complement four courses peculiar to the Political Economy major. Three of these four — POEC 250, POEC 401 and POEC 402 — are taught jointly by a political scientist and an economist, and the major's culmination is a public presentation of student senior policy projects. As part of these projects, the major includes (within POEC 402) a class trip to Washington, DC during the first Sunday through Wednesday of spring break. All majors are required to participate in this trip. Given the program’s public policy orientation, majors must also have an active learning experience (such as an internship or a public policy-related winter study course) to fulfill an experiential education requirement.

MAJOR

The Political Economy major requires students to complete eleven (11) courses: three introductory courses in Economics and Political Science; one empirical methods course; three courses specific to the Political Economy Program; and four electives. The electives are organized into two categories — 'skills' courses and 'depth' courses — and must be completed across the major's two foundational departments. Finally, all majors are required to fulfill an experiential education requirement, the purpose of which is to get students out into the world interacting with people in cases where the stakes are real. This often involves some element of community service, participation in the political process, or taking part in the making of or analysis of public policy beyond a purely academic engagement. This requirement is usually fulfilled through an internship or a winter study course, and must be approved by the chair prior to the student taking POEC 402 in the spring of senior year.

Three Introductory Courses
1. ECON 110: Principles of Microeconomics
2. ECON 120: Principles of Macroeconomics
3. PSCI 110: Introduction to American Politics

One Empirical Methods Course
4. POEC 253: Empirical Methods in Political Economy or ECON 255: Econometrics
Three Political Economy Program Courses

5. POEC 250: Economic Liberalism and Its Critics
6. POEC 401: Contemporary Problems in Political Economy
7. POEC 402: Political Economy of Public Policy Issues

Four Elective Courses

8. One ECON skills elective
9. One PSCI skills elective
10. One PSCI depth elective
11. One PSCI or ECON depth elective

Majors are required to take four electives, two each in two different categories across the two foundational departments of Economics and Political Science.

The first category is “skills” electives. Students are required to take two such electives. One must be a course in Economics that develops the econometric analytic skills of the student. The other must be a course in Political Science that develops the social science research skills of the student.

The second category is “depth” electives. Students are required to take two such electives on topics related to public policy in courses that are neither survey nor introductory. One must be a course in Political Science. The other may be taken in either Political Science or Economics.

Below are the courses that currently fulfill the “skills” and “depth” electives requirements. Note that all “skills” electives are simultaneously “depth” electives, but obviously students may not 'double count' a single course as fulfilling two distinct major requirements.

CREDIT FOR COURSEWORK DONE ELSEWHERE

The three core Political Economy Program courses (POEC 250, 401, and 402) must be completed at Williams without exception. Students are strongly encouraged to complete the empirical methods course (POEC 253 or ECON 255) and PSCI 110 at Williams, as versions of these courses offered elsewhere are usually highly imperfect substitutes that will not provide adequate preparation for the senior seminars; students may in rare cases be able to complete either of these requirements during study at another college or university (e.g. during study abroad), but only with prior permission from the chair.

The four electives may be completed during study at another college or university (e.g. during study abroad) with permission of the chair. In
general, it is much easier to satisfy the “depth” electives abroad than the “skills” electives as the “skills” electives are based on pedagogy as well as subject matter. The policy of the Program is to grant credit for one course per semester abroad and two courses per year abroad. In extraordinary circumstances, credit for three courses for an entire year abroad may be granted with permission of the chair. Credit for A levels and IB exams in Economics and for introductory microeconomics and macroeconomics classes taken at other colleges and universities (subject to approval by the Economics department study away coordinator) is given consistent with the current policy of the Economics Department.

Students who score a 5 on the AP exam in Microeconomics or Macroeconomics may receive credit towards the major for the cognate introductory economics course(s). Students whose Economics Department placement exam scores allow them to place out of ECON 110 and/or ECON 120 may also receive credit towards the major for the corresponding class. No substitute higher-level coursework is required for majors receiving credit in this way (thus effectively reducing the number of required courses from 11 to 10 or 9). Students may not substitute AP credit for PSCI 110.

**RECOMMENDED PROGRESSION THROUGH THE REQUIRED MAJOR COURSES**

First-years who are considering a Political Economy major should take the three introductory classes in their first year at Williams: [1] ECON 110 Principles of Microeconomics; [2] ECON 120 Principles of Macroeconomics; and [3] PSCI 110 Introduction to American Politics. ECON 110 is a pre-requisite for POEC 253 and ECON 255 while ECON 110 & 120 are pre-requisites for POEC 250, POEC 401, POEC 402, and nearly all ECON electives in the major. PSCI 110 is a pre- or co-requisite for POEC 250, and is a pre-requisite for POEC 401 and POEC 402. PSCI 110 should ideally be taken in the first year and must be taken no later than sophomore year. Most importantly, upper class students are not admitted to the course.

Please note that by College rule, students may take only their first course in the major pass/fail.

Prospective Political Economy majors should also ensure that their math coursework is sufficient. MATH 130 (Calculus I) or the equivalent is a prerequisite for the POEC methodology requirement (POEC 253 or ECON 255). Students might also consider taking STAT 161 or STAT 201 in their first year as that would give them the option of taking ECON 255 as sophomores or juniors.

Majors will ideally take POEC 250 in their sophomore year. POEC 401, taken fall of senior year, requires POEC 253 or ECON 255 as a prerequisite, so the methodology requirement must be completed in the sophomore or junior year. Note that both POEC 250 and POEC 253 are offered only once per year in the fall semester. Students should also get started on their electives during sophomore and junior years.

**THE DEGREE WITH HONORS IN POLITICAL ECONOMY**

Due to the special demands of this interdisciplinary major, the only route to honors in Political Economy is the thesis. Seniors may pursue the honors thesis course (Political Economy 493-W31) during the fall semester and winter study period. The third course contributing to such an honors program would normally be an elective in Political Science or Economics taken during the junior year. This course, which may be one of the required electives, must be closely related, indeed must prepare the ground for the honors thesis.

Juniors in the Political Economy major with a minimum 3.5 GPA in the program may apply for the honors thesis program by means of a written proposal submitted to the chair by mid-April. Written guidelines for such proposals are available on the program website. The proposal should have been discussed with at least two faculty members, and at least one faculty advisor from each discipline must be solicited by the student prior to submission of the proposal.

Final decisions about admission to the honors program will be made in late May after spring grades become available.

To achieve the degree with honors in Political Economy, the thesis must be completed by the end of winter study period and be judged of honors quality by a committee consisting of the two advisors and a third reader. A thesis judged to be of particular distinction will qualify its author for the degree with highest honors.

**STUDY ABROAD**

Despite the fact that Political Economy requires more courses than the typical major, many Political Economy majors go abroad. Typically the major credits obtained abroad are the electives. Since POEC 250 and POEC 253 are only offered in the fall, students considering spending only one semester abroad typically find spring to be the better choice. Nonetheless, many majors study away for the fall or the whole year. If you expect to be away during the fall of your junior year, it is critical that you either: (a) take POEC 253 fall of your sophomore year; or (b) complete MATH 130 as well as STAT 161 or 201 early enough that you can take ECON 255 (which is offered every semester) before the end of junior year. In addition, if you expect to be away fall of junior year, it is a good idea to take POEC 250 fall of sophomore year.

**TRANSITIONING TO THE NEW MAJOR STRUCTURE**

Students in the graduating classes of 2025 and 2026 may receive major credit for courses taken under the old major structure that are no longer granted credit under the new major structure. This includes: the former PSCI 202, 203 and 204 which will be credited to majors as a “depth” elective; and any elective granted credit at the time of enrollment regardless of its current elective category status. All majors regardless of graduation year are required to complete two Political Science electives and one Economics elective, with the fourth elective coming from either department—i.e. they must abide by the departmental distribution of electives in the new major structure.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.
Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the program chair.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description for “depth” electives. A full syllabi is generally required for “skills” electives.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

There is an effective limit of 2-3.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Only Economics or Political Science courses can be awarded credit, and they must satisfy one of the elective categories (or in rarer cases one of the ECON or PSCI intro requirements).

Are there specific major requirements that cannot be fulfilled while on study away?

Yes.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The POEC major requires 3 specific POEC courses (250, 401, and 402), and one empirical methods course (POEC 253 or ECON 255). The POEC courses are only offered in a single semester (fall for 250, 253, and 401 and spring for 402), and 401 and 402 must be taken in the senior year. 253 can be replaced with ECON 255, which is offered in fall or spring, but ECON 255 has an additional prerequisite of STAT 161, STAT 201, or STAT 202. Studying abroad in POEC requires careful planning.

POEC 250  (F)  Economic Liberalism and Its Critics

Cross-listings:  PSCI 238 / ECON 299

Primary Cross-listing

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Joseph Schumpeter, Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant topics relevant to the themes of the course, with applications to current public policy issues, such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; social media and addiction; economic nationalism; behavioral economics; climate change and intergenerational equity; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: This course uses a flipped classroom approach. Before each class meeting, students watch a lecture video, and (at least six times) write an essay relating to the assigned reading and video. In-person class time is devoted primarily to Socratic discussion.

Requirements/Evaluation: six short essays and a final exam

Prerequisites:  ECON 110 and 120 or equivalent; PSCI 110 (formerly PSCI 201; may be taken concurrently with POEC 250); open to non-majors

Enrollment Limit:  30

Enrollment Preferences:  Political Economy majors and sophomores intending a Political Economy major

Expected Class Size:  25

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
POEC 250(D2) PSCI 238(D2) ECON 299(D2)

Attributes: AMST Critical and Cultural Theory Electives  POEC Required Courses

Fall 2024

SEM Section: 01    MR 2:35 pm - 3:50 pm     James E. Mahon,  William M. Gentry

POEC 253  (F)  Empirical Methods in Political Economy  (WS) (QFR)
This course introduces students to common empirical tools used in policy analysis and implementation. Students will develop skills in statistical literacy to become critical consumers of public policy-relevant research. The emphasis in the course is split between an intuitive understanding of statistical foundations, and applications in data visualization and science communication. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; effective data visualization; statistical inference and hypothesis testing; and multiple regression analysis. A particular focus will be placed on understanding causality, the challenges of estimating causal relationships, and the design of evidence-based policy. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.

Requirements/Evaluation:  Problem sets, group project, midterm exam, final exam

Prerequisites:  MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255

Enrollment Limit:  20

Enrollment Preferences:  Political Economy majors, Environmental Policy majors and sophomores

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Unit Notes:  does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major

Distributions:  (D2)  (WS) (QFR)

Writing Skills Notes:  Students will write 3 coding-intensive data briefs over the course of the semester. Creation of original exhibits from publicly accessible data, use of citation management systems, and clarity in technical writing will be emphasized.

Quantitative/Formal Reasoning Notes:  The course teaches econometrics, i.e. statistics as economists use it, with applications in economics, political science, and other fields.

Attributes:  POEC Required Courses

Fall 2024

LEC Section: 01    TR 8:30 am - 9:45 am     Shyam  Raman

POEC 397  (F)  Independent Study: Political Economy
Open to juniors or seniors majoring in Political Economy, with approval of a faculty supervisor and the chair.

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)

Fall 2024

IND Section: 01    TBA     Darel E. Paul

POEC 398  (S)  Independent Study: Political Economy
Open to juniors or seniors majoring in Political Economy, with approval of a faculty supervisor and the chair.

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)
POEC 401 (F) Contemporary Problems in Political Economy

This course examines contemporary problems in political economy at and across diverse spatial scales. Using both Economics and Political Science methods of analysis, students will study the way societies respond to the myriad risks facing its citizens. The goal of this course is both to build upon theoretical debates encountered in POEC 250 as well as to prepare students for the public policy analysis they will do in POEC 402.

Requirements/Evaluation: two 7-10 page papers; multiple in-class group presentations; class participation

Prerequisites: ECON 110 and 120; PSCI 110 (formerly 201); POEC 253 or ECON 255 or equivalent, or permission of instructor; open to non-majors

Enrollment Limit: 20

Enrollment Preferences: Political Economy majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: required for the Political Economy major

Distributions: (D2)

Attributes: POEC Required Courses

POEC 402 (S) Political Economy of Public Policy Issues

In this course, students form groups that conduct a political and economic analysis of a public policy issue of their choosing. They do extensive reading, conduct interviews in Washington, D.C. (during spring recess), write a major report on their findings and recommendations, and present and defend their findings in a public talk. Students visit Washington, D.C. Sunday night through Wednesday of the first week of spring vacation to conduct interviews relating to their group projects. This is a course requirement.

Class Format: student presentations

Requirements/Evaluation: group policy projects including an 80- to 100-page paper and 2-hour presentation

Prerequisites: POEC 250; POEC 253 or ECON 255; POEC 401; open only to Political Economy majors

Enrollment Limit: 20

Enrollment Preferences: open only to Political Economy majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: required for the Political Economy major

Distributions: (D2)

Attributes: POEC Required Courses

POEC 493 (F) Honors Thesis: Political Economy

Due to the special demands of this interdisciplinary major, the only route to honors in Political Economy is the thesis, a substantial and original work of scholarship. Students pursue the honors thesis course (Political Economy 493-W31) during the fall semester and winter study period. They work closely with two faculty advisors -- one in Economics, one in Political Science -- throughout the thesis process.

Grading: no pass/fail option, no fifth course option
Winter Study

POEC 31 (W) Honors Thesis: Political Economy
To be taken by students registered for Political Economy 493.
Class Format: thesis
Grading: pass/fail only
Not offered current academic year

POEC 99 (W) Independent Study: Political Economy
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
POLITICAL SCIENCE (Div II)
Chair: Professor Nicole Mellow

- Cheryl Shanks, Professor of Political Science; on leave Fall 2023
- Matthew Tokeshi, Assistant Professor of Political Science
- Mason B. Williams, Associate Professor of Leadership Studies and Political Science; affiliated with: Leadership Studies, Political Science

Political science is interested in the question of power—how it is created, exercised, justified, and challenged to engage in problem solving, facilitate citizen action, and participate in world-making. Political scientists study democracy, war, group conflicts, law, rights, wealth distribution, and authority, as well as the individuals, institutions, and social forces that shape them. As a social science, the study of politics considers both the dynamics and ethics of power, which in turn involves conceptions of community, identity, justice, and citizenship. The effort to understand politics aims not only to describe and explain, but also to improve collective life. To this end, the Political Science Department strives to cultivate in its students the habits and skills of clear thought, rigorous analysis, and effective argumentation in writing and speech.

The Political Science major requires nine courses. Traditionally, students organize their major through the subfields that structure the discipline of political science (American politics, international relations, political theory, and comparative politics). Occasionally, students propose and develop individual concentrations that reflect their particular interests, regardless of subfields.

MAJOR

Subfield Concentration Route: Upon declaring a major, students choose one subfield: American politics, international relations, political theory, or comparative politics. The subfield concentration draws at least four (4) of the nine courses from one subfield including the appropriate core course from 110-140, two electives of the student’s choice at the 200 or 300 level and the senior seminar in the student’s subfield. Students selecting political theory as their subfield concentration must take Political Science 231 or Political Science 232 as one of their four subfield courses, in addition to taking Political Science 130 and prior to taking Political Science 430. With permission of the department chair, students may take a senior seminar in a different subfield, providing they take a third elective in the subfield of concentration. In addition, students must take courses in two subfields outside the subfield of concentration to satisfy the breadth requirement (all methods courses also count toward the breadth requirement). The faculty advisor must approve the student plan. Students must take at least one 300-level course and one 300- or 400-level research (R) course to complete the major.
In rare circumstances, students may devise a concentration of their own. In this event, the student prepares a curricular plan in consultation with a faculty advisor, explaining the nature of the concentration, why it cannot be accommodated in the traditional subfield structure, and the courses the student will take. The individual concentration also requires nine (9) courses, with at least five (5) thematically linked courses constituting the concentration. Of these five courses, one is from the 110-140 core courses, three are electives at the 200 or 300 level, and one is a senior seminar. In addition, students pursuing an individual concentration must take at least two other courses that illustrate breadth in political science. To complete the requirement, the student has their choice of any two other courses within the Political Science Department. The faculty advisor and the department chair must approve the student plan. Students must take at least one 300-level course and one 300- or 400-level research course to complete the major. (Many senior seminars are also research courses but, especially in political theory, not all are.) In addition, no more than two 100-level elective courses (courses outside of the 110-140 core courses) can count toward the major.

Individual Concentration Route: In rare circumstances, students may devise a concentration of their own. In this event, the student prepares a curricular plan in consultation with a faculty advisor, explaining the nature of the concentration, why it cannot be accommodated in the traditional subfield structure, and the courses the student will take. The individual concentration also requires nine (9) courses, with at least five (5) thematically linked courses constituting the concentration. Of these five courses, one is from the 110-140 core courses, three are electives at the 200 or 300 level, and one is a senior seminar. In addition, students pursuing an individual concentration must take at least two other courses that illustrate breadth in political science. To complete the requirement, the student has their choice of any two other courses within the Political Science Department. The faculty advisor and the department chair must approve the student plan. Students must take at least one 300-level course and one 300- or 400-level research course to complete the major. (Many senior seminars are also research courses but, especially in political theory, not all are.) In addition, no more than two 100-level elective courses (courses outside of the 110-140 core courses) can count toward the major.

**ADVISEMENT**

When a student chooses to major in Political Science (usually at the end of the sophomore year), they may register with any Political Science faculty member. The registering faculty member will ask for preferences for a permanent faculty advisor and an effort will be made to match students with their preferred advisor though this cannot be guaranteed. In all cases, students will be paired by the beginning of junior year with an advisor who will continue with them through graduation.

**COURSE NUMBERING**

The course numbering used by the Political Science Department reflects the format and specialization of a course. The 100-level courses are divided between our core courses and electives. The core courses, numbered from 110-140, serve as introductions both to the substance of politics and the subfields organizing the study of politics. The introductory subfield course must be completed before the senior year and preferably before junior year. The 100-level electives are designed to address political topics from multiple subfield perspectives; many are seminars designed for first-year students. The 200-level courses are electives that delve into political processes, problems, and philosophies, typically within one of the four subfields though occasionally in ways that cut across subfields. 100-level and 200-level courses have no prerequisites. 300-level courses are more specialized seminars and have prerequisites. 400-level courses are senior seminars offered for students in the major; senior seminars also are open to juniors and to non-majors if space permits. In general, the main subfield of non-core courses can be read from the middle digit of the course number: 0, 1 or 5 for American politics; 2 or 6 for international relations; 3 or 7 for political theory; 4 or 8 for comparative politics. Because the relevant course number may not be available, and as some courses may not fit the subfields or may fit multiple subfields, please check the “attributes” entry to confirm how the course is categorized by the department.

**WINTER STUDY PROJECT**

The department welcomes relevant WSP 99 proposals that can make important contributions to the student’s understanding of public affairs and politics. Majors, seniors, and students without previous WSP 99 experience have preference.

**THE JUNIOR YEAR ABROAD**

A major in Political Science can be readily and usefully combined with study off-campus. Generally, only one course taken per semester abroad in a program approved by the College may be counted toward the requirements for a degree in Political Science.

**FAQ**

- Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.
- Can your department or program typically pre-approve courses for major/concentration credit?
  - Yes, in many cases, though students should be sure to contact the department.
- What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
  - Course title and description, though sometimes a syllabus may be needed. How much we need may depend on our familiarity with the institution or program.
- Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
  - Yes. Typically we allow not more than one course per semester, or two per year, to count for major credit.
- Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
  - No, although this depends on the course. If, after considering description and institution, we feel it is not rigorous enough, we will not count it.
- Are there specific major requirements that cannot be fulfilled while on study away?
  - Yes. We do not allow the senior seminar requirement, nor the research requirement, to be fulfilled by study abroad.
Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. One such required course (either Ancient or Modern Political Thought for those specializing in political theory within the major) can be fulfilled by an appropriate study abroad course.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

When issues arise that’s almost always because the student did not keep department adequately informed of evolving plans.

PREPARATION FOR GRADUATE STUDY
The Department recommends that students contemplating graduate school, especially if they plan to study fields outside of political theory, take a course in research methods, such as PSCI 493, and/or a class in quantitative methods, such as POEC 253.

THE DEGREE WITH HONORS IN POLITICAL SCIENCE
To become a candidate for honors, the student must apply in the second semester of their junior year for PSCI 493(F), the Senior Thesis Research Design Seminar, by (1) submitting a “statement of interest and qualifications” and (2) having a record of academic excellence in Political Science, generally a major GPA of 3.5 or above. Accepted students who write a successful thesis research proposal in PSCI 493 will then be invited to continue on to PSCI 494(S), Senior Thesis Research and Writing Workshop. Also required for these students is participation in the senior thesis winter study course (PSCI 31). The fall and spring semester senior thesis courses are in addition to the required nine (9) courses for the major. Additional details can be found at the department website.

PSCI 110  (F)(S)  Introduction to American Politics: Power, Politics, and Democracy in America
Begun as an experiment over 200 years ago, the United States has grown into a polity that is simultaneously praised and condemned, critiqued and mythologized, modeled by others and remodeled itself. This course introduces students to the dynamics and tensions that have animated the American political order and that have nurtured these conflicting assessments. Topics include the founding of the American system and the primary documents (the Declaration of Independence, the Constitution, and the Federalist Papers), the primary institutions of national government then and now (Congress, the presidency, and the Supreme Court), and the politics of policy-making in the United States. We study structures, processes, key events, and primary actors that have shaped American political development. In investigating these topics, we explore questions such as these: How is power allocated? What produces political change? Is there is a trade-off between democratic accountability and effective governance? How are tensions between liberty and equality resolved? Do the institutions produce good policies, and how do we define what is good?

Requirements/Evaluation: depending on the section, some combination of response papers, short-to-medium papers, multimedia projects (podcasts, videos), exams, discussion groups, and class participation

Prerequisites: this is an introductory course, open to first-year students and sophomores; juniors and seniors may enroll only with the permission of instructor and under special circumstances

Enrollment Limit: 30

Enrollment Preferences: first-years and sophomores

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

PSCI 120  (F)(S)  Introduction to International Relations: World Politics
This course provides an overview of the central theories, concepts and debates in international relations. Students evaluate competing answers to
central questions in the field: What are the implications of an anarchic political structure for order and justice in world politics? What are the primary causes of international war and conflict? Are there necessary conditions for peace and stability? What role do moral and legal considerations play in world politics? How has globalization changed the way that the international system operates?

Requirements/Evaluation: Depending on the semester and instructor, some combination of essays, a midterm paper, one or two short response papers, a group project and presentations, a podcast, and an in-person final exam.

Prerequisites: This is an introductory course, open to first-year students and sophomores; juniors and seniors may enroll only with the permission of instructor and under special circumstances.

Enrollment Limit: 25

Enrollment Preferences: first-year students and sophomores

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

PSCI 130 (F)(S) Introduction to Political Theory

Is politics war by other means? Is it merely a practical way to meet our needs? Or is it, rather, the activity through which citizens pursue justice and the good life? And what is justice? How can it be established and secured? Where does it apply? To whom? What are the powers and obligations of citizenship? Who decides? On what basis? Political theory addresses questions such as these as it investigates the fundamental problems of how people can, do, and ought to live together. The questions have sparked controversy since the origins of political thinking; the answers remain controversial now. This course addresses the controversies, drawing examples from struggles over such matters as racism, colonialism, revolution, political founding, economic order, and the politics of sex and gender, while focusing on major works of ancient, modern, and contemporary theory by such authors as Plato, Aristotle, Machiavelli, Hobbes, Rousseau, Mill, Marx, Nietzsche, Beauvoir, Arendt, Fanon, Rawls, Foucault, and Young. Themes may include power, authority, freedom, justice, equality, democracy, neoliberalism, feminism, and violence, though the emphases will vary from semester to semester.

Requirements/Evaluation: Three papers, class participation, and occasional informal writing/Glow posts. The spring 2025 sections may include a podcast option and a final exam.

Prerequisites: none; this is an introductory course, open to all, including first-year students

Enrollment Limit: 25

Enrollment Preferences: first-years and sophomores

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

PSCI 140 (F) Introduction to Comparative Politics

The comparative study of politics looks mainly at what goes on inside countries, the domestic dynamics of power, institutions, and identities. This class considers analytic concepts central to the study of politics generally—the state, legitimacy, democracy, authoritarianism, clientelism, nationalism—to comprehend political processes and transformations in various parts of the world. Themes include: Where does political power come from? Does economic development drive political change, or the other way around? What is democracy, how does it arise, and how might it fail? How does international war leave its mark on domestic politics? How do religion and politics interact? Materials include classic texts, recent theoretical works, journalism, commentary, fiction, and a variety of sources related to current events around the world.

Class Format: directed discussion

Requirements/Evaluation: Three 3-page papers, a short interpretive exercise, and a short final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first-years and sophomores

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

PSCI 146 (S) The world of wealth and work: An introduction to the politics of capitalism (DPE)

From the Googleplex to derelict factories in Ohio, from our personal lives to the halls of high politics, from the sugar fields of Brazil to the corner offices of Wall Street, we are all navigating the same system: capitalism. This course will give students a map. Drawing on political science and political economy, we will ask fundamental questions about capitalism: Why are some parts of the world so much richer than others? Is sustainable economic growth possible? Why do some jobs pay more than others? Why do some things cost money but other things are free? What is the relationship between economic exploitation and race, gender, and other identities? Why are we working all the time? Can a democratic society have a capitalist economy? Students will explore these questions and engage themes central to the study of capitalism, including financialization, intersectionality, racial order, neoliberalism, class, contradiction, and accumulation. The course is designed for first-year students, especially those who have taken one or fewer political science courses.

Requirements/Evaluation: Class participation; regular reading responses; two short papers; two presentations; final exam

Prerequisites: None

Enrollment Limit: 30

Enrollment Preferences: First-years and sophomores

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course revolves around relationships of power in capitalism. We explore how those relationships interact with questions of difference and norms of equity.

PSCI 155 (F) Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

Cross-listings: LEAD 155
Secondary Cross-listing
This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. The first part of the course will examine key theoretical problems that have occupied political thinkers from Plato and Confucius to Machiavelli and the American framers: What makes a leader successful? What kinds of regimes best serve to encourage good leaders and to constrain bad ones? What is the relationship between leadership and morality—can the ends justify the means? What functions does leadership fill, and what challenges do leaders face, in modern democratic states? The second half of the course will look at leaders in action, charting the efforts of politicians, intellectuals, and grassroots activists to shape the worlds in which they live. Case studies will include anti-slavery politics and the American Civil War; the global crises of the 1930s and 1940s; and the social movements of the 1960s and 1970s. In addition to active class participation, students will be expected to write a 5-page proposal for a research paper on a leader of their choice, a 10-page research paper, an in-class midterm exam, and a cumulative, in-class final exam.

Requirements/Evaluation: active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and a cumulative in-class final exam

Fall 2024
SEM Section: 01 TF 2:35 pm - 3:50 pm Mason B. Williams

PSCI 158 (F) Power to the People?

Popular unrest. The resurgence of authoritarian styles and practices in politics. Democratic collapse. Political tumult around the globe in recent decades has put elites, and others, on edge as young democracies have collapsed and longer standing ones appear to be stumbling. In the United States, basic stability and democratic expansion have been accompanied by increasing citizen distrust of institutions, growing social divisions, contestation over basic citizenship rights, and political violence. The pandemic, related economic distress, social protests and insurrection have only sharpened the precarious state of U.S. democracy. Acute observers have long seen the U.S. as a harbinger of the promise and peril of modern democracies. What is the fate of democracy in the U.S.? What does that portend, if anything, for other democracies, or for the general principle of popular sovereignty—the idea that the people govern themselves? We investigate these and related questions, primarily through active, project-based group research activities, guided by political theory and empirical research in the social sciences. Our investigation will include substantial class-time collaboration with a similarly structured undergraduate course taught by a sociologist at Johns Hopkins University and may include an optional weekend research trip.

Requirements/Evaluation: active class participation, three 4-page essays, multiple group assignments, and class presentations

Prerequisites: first-year students

Enrollment Limit: 14

Enrollment Preferences: first-year students

PSCI 160 (F) Refugees in International Politics (DPE) (WS)
Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be—how a crisis can be chronic, and for whom this chronic crisis is a solution. We investigate who refugees are, in international law and popular understanding; read refugee stories; examine international and national laws distinguishing refugees from other categories of migrants; evaluate international organizations’ roles in managing population displacement; look at the way that images convey stereotypes and direct a type of aid; consider refugee camps in theory and example; and reflect on what exclusion, integration, and assimilation mean to newcomers and host populations. In whose interest is the prevailing system? Who might change it, and how?

Requirements/Evaluation: Ten essays: five lead, five response. The first two weeks’ essay grades will be unrecorded.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, to be selected randomly from list of those enrolled.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: In addition to writing every week, students will have a chance work on specific skills cumulatively.

Difference, Power, and Equity Notes: This course examines the way in which home states categorize people and oppress some, producing refugees; the way that host states categorize people and oppress some, using immigration to shore up the prevailing ethnic hierarchy; and why we worry about some of these categories of oppression more than others.

PSCI 208 (F) Wealth in America (WS)

The pursuit of wealth is an important feature of American political identity, captured by the ideas of the American dream and the Protestant work ethic. The accumulation of wealth has been lauded as both a worthy individual activity and a vital component of the nation's public interest. Yet inequality in wealth may conflict with the political equality necessary for democratic governance and public trust, leading to concerns that we are sacrificing community, fairness, and opportunity for the benefit of a small portion of the population. This course focuses on questions about the public value of wealth and its accumulation, which have become more pressing now that the richest one percent of Americans own about 40 percent of privately held wealth. Some readings will be historical, particularly those focusing on American political thought and the politics of the Gilded Age. Most readings will focus on contemporary political debates about the accumulation, concentration, and redistribution of wealth.

Requirements/Evaluation: four 5-page papers and a final 10-page paper that is a revision and extension of a short paper

Prerequisites: none; not suitable for first-year students

Enrollment Limit: 19

Enrollment Preferences: Political Science majors with concentration in American politics and Political Economy majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Unit Notes: American concentration

Distributions: (D2) (WS)

Writing Skills Notes: Four 5-page papers, peer review, and a revision of extension of one of these papers into a 10-page paper at the end of the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

PSCI 209 (F) Poverty in America
Although some protest that the U.S. is heading toward European-style socialism, social welfare programs in the U.S. differ in important ways from those in other wealthy and democratic nations. This course focuses on the adoption and development of policies to address poverty and inequality in the U.S. The issues we will explore include: What is poverty, and how do Americans perceive its dangers to individuals as well as the political community? What economic, historical, and sociological theories have been advanced to explain poverty? Why has the U.S. adopted some approaches to reduce poverty but not others? What enduring political conflicts have shaped the U.S. welfare state?

Requirements/Evaluation: class participation, two or three short papers, and a final paper

PSCI 211 (S) Do the People Govern? U.S. Public Opinion and Mass Political Behavior

America’s founding documents explicitly state that the will of the people is the authority upon which our government rests. But do the people actually govern, and should they? Pessimists point out that most Americans know very little about politics and lack coherent political views, are easily manipulated by media and campaigns, and are frequently ignored by public officials anyway. Optimists counter that, even if individuals are often ignorant and/or confused about politics, in the aggregate, the public sends a coherent signal to public officials, who usually carry out the public’s general wishes. In addition to engaging this debate about what the public thinks about politics, we will also explore how people behave in the political realm. What are the forces that shape whether citizens pay attention to politics, vote, work on campaigns, protest, or engage in other types of political action? How do resource gaps tied to inequalities in society (such as race, class, and gender) influence political behavior? And how do institutions such as the media and campaigns encourage or discourage it?

Requirements/Evaluation: class participation, one to two short papers (5-7 pages), one medium paper (8-12 pages), an oral presentation, and a final exam

PSCI 212 (S) From Tocqueville to Trump: Leadership and the Making of American Democracy (DPE)

Cross-listings: LEAD 205

Secondary Cross-listing
America's founders didn't mean to create a democracy as we would now understand the term. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy— and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy—and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America's democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?

Requirements/Evaluation: 5-page document analysis, 10-page review essay, midterm and final in-class exams

PSCI 213 (F) Mass Media and American Politics

According to recent estimates, the average American spends 11 hours per day consuming media—that is, watching television and movies, reading print sources, listening to music, radio, and podcasts, and scrolling social media. How does all of that media consumption influence the American political system? Scholars, practitioners, and observers of American politics have debated whether the net effect is positive or negative. Critics argue that today's media is shallow and uninformative, a vector of misinformation, and a promoter of extremism and violence. Some defenders argue that the media is a convenient scapegoat for problems that are endemic to human societies, while others claim that it actually facilitates political action aimed at addressing long-ignored injustices. In addition to addressing this important question about the health of American democracy, students will learn how the traditional media and social media influence Americans' political attitudes and behaviors. Among the topics we will discuss are the incentives, norms, and practices of news-making organizations; how politicians try to sway the public during campaigns; how the media covers campaigns; and how the media influences Americans' racial attitudes.

Requirements/Evaluation: two short (4-5 page) papers, one non-written assignment roughly equivalent to a 8-12 page paper in terms of workload, a final exam, and class participation

PSCI 214 (S) Racial and Ethnic Politics in America

Not offered current academic year
Arguably, the dominant discourse in American politics today is about race. Race is connected to salient issues like immigration and police conduct; to politicians across the political spectrum; and (some argue) to virtually everything in American politics, including fundamental concepts that have no manifest racial content, like partisanship and the size and scope of government. We will evaluate the role of race as it relates to public opinion, political behavior, campaigns, political institutions, and public policy debates, with special attention devoted to the nature of racial attitudes. Most of the course will focus on the historical and contemporary relations between whites and African Americans, but we will also explore topics involving other pan-ethnic communities, particularly Latinos and Asian Americans.

Requirements/Evaluation: class participation, one to two short papers (5-7 pages), one medium paper (8-12 pages), an oral presentation, and a final exam

Prerequisites: none

PSCI 215  (S)  Race and Inequality in the American City  (DPE)

Cross-listings: LEAD 215

Primary Cross-listing

In the past half-century, American cities have gotten both much richer and much poorer. The making of "luxury cities" has gone hand-in-hand with persistent, concentrated poverty, extreme racial segregation, mass incarceration, and failing public services-social problems borne primarily by people of color. This course will examine the political underpinnings of inequality in American cities, with particular attention to the racialization of inequality. Among the topics we will cover are: the structures of urban political power; housing and employment discrimination; the War on Crime and the War on Drugs (and their consequence, mass incarceration); education; and gentrification. We will ask: How have city leaders and social movements engaged with urban problems? How have they tried to make cities more decent, just, and sustainable? Under what circumstances has positive leadership produced beneficial outcomes, and in what circumstances has it produced perverse outcomes? We will engage primarily with political science, but also with scholarship in other disciplines, including sociology, history, geography, and legal studies, all of which share an interest in the questions we will be exploring. Students will leave this course with a deeper understanding of contemporary urban problems, a knowledge of the political structures within which those problems are embedded, and a better sense of the challenges and opportunities leaders face in contemporary urban America.

Requirements/Evaluation: class participation; several short essays and a longer paper with presentation

PSCI 216 (S) American Constitutionalism I: Structures of Power

Cross-listings: LEAD 216

Primary Cross-listing

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on structures of power -- the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to spurring commerce; the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the contemporary conservative ascendancy. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional power and constitutional meaning in American history.

Class Format: discussion

Requirements/Evaluation: three essays (3-4 pages, 5-6 pages, 7-8 pages), a two-part final exam, and class participation

PSCI 218 (S) The American Presidency  
Cross-listings: LEAD 218  
Primary Cross-listing  
Impeachments. Investigations. Polarization. Did Donald Trump's tenure fundamentally alter the institution of the presidency? Or are its most significant features enduring? To study the presidency is to study human nature and individual personality, but also constitution and institution, rules and norms, bureaucracy and administration, strategy and contingency. This course examines the problems and paradoxes that attend the exercise of the most powerful political office in the world's oldest democracy: Can an executive office be constructed with sufficient energy to govern and also be democratically accountable? What are the limits on presidential power and what are the expectations of presidential performance? How much do we attribute the shaping of politics and policy outcomes to the agency of the individual in the office and to what extent are they the result of underlying structural, cultural, and institutional factors? How is the office and purpose of the presidency affected by an economic order predicated on private capital? By the character of the occupant? To answer these questions, we examine topics such as presidential selection; the bases of presidential power; character and leadership; inter-branch interactions; party, social movement, and interest group relations; and media interactions. Attention will focus largely on the modern, twentieth and twenty-first century, presidency, though older historical examples will also be used to help us gain perspective on how the presidency has changed over time and what the implications are for democratic governance.  
Class Format: The course will feature both seminar discussion and several small group research projects.

Primary papers are due to respondent/professor 48hrs before the tutorial meets; response papers are emailed to the professor 2hours before the weekly tutorial meets. Readings include: We Charge Genocide; Williams J. Maxwell, F. B. Eyes: How J. Edgar Hoover's Ghostreaders Framed African American Literature; Chalmers Johnson, Blowback: The Costs and Consequences of American Empire; Hugh Wilford, The Mighty Wurlitzer: How the CIA Played America; "Part III Supervision and Control of the CIA," Rockefeller Commission Report; Malcolm X Speaks; Sam Greenlee, The Spook Who Sat By the Door; and, The Murder of Fred Hampton. The tutorial is open to all students.  
Requirements/Evaluation: Attend all classes; submit completed papers 24hours before seminar meets.
**Difference, Power, and Equity Notes:** This tutorial examines the Cold War between the US and the USSR and attempts to use intellectuals to shape and promote the objectives of powerful state entities. The power struggle between the two "superpowers" impacted cultural production and authors. Some of those authors influenced or enlisted into the Cold War sought equity and equality for their communities and eventually fought against the very political powers that employed them.

Not offered current academic year

**PSCI 222 (F) International Relations in the Cyber Age**

This is a class about international politics in the age of cyberweapons. At a general level, it focuses on a set of core conceptual questions: How has the advent of cyberweapons changed how international politics works? Are cyberweapons that target critical infrastructure similar to nuclear weapons, or is that comparison fundamentally flawed? Do concerns about information security alter states' most basic political calculations? How can we expect cyberweapons to shape the future of warfare, intelligence, and security competition? How effective are strategies like cross-domain deterrence? Should the world try to regulate the use of these technologies and, if so, how exactly? The course begins with several sessions that provide a technical overview of key information security concepts and an examination of some prominent hacks. In addition, the beginning of the course will include several classes on the theoretical implications of the advent of the cyber age, as well as a brief historical overview of information security in the post-World War II period. From there, the course will cover a number of important topics and case studies, such as Stuxnet, NotPetya, cyber espionage, intellectual property theft, threats to critical infrastructure, misinformation, propaganda, election interference, the potential implications of quantum computing, and the prospects for the establishment of an international cyber arms control regime. In general, the course will focus on competition between some of the world's premier cyber powers, such as China, Iran, Israel, North Korea, Russia, and the United States.

**Requirements/Evaluation:** Weekly quizzes, classroom participation; two analytical essays, 6-7 pages in length; Final exam

**Prerequisites:** None

**PSCI 223 (F) International Law**

International law embodies the rules that govern the society of states. It spells out who can be a sovereign state and how to become one, what states can do, what they cannot do, and who can punish transgressions. It also creates status for other actors, such as international organizations, soldiers, national liberation movements, refugees, terrorists, transnational air and sea shipping companies, and multinational corporations. International law is similar to domestic law, with one very crucial difference: it is not enforced by a centralized, sovereign state. There is no world government. In most other respects, it is the same: it protects the status quo, maintaining the unequal distribution of power among its members; it spells out legitimate and illegitimate ways of resolving conflicts of interest; it is biased toward the powerful and legitimates their interests; it tells its members how to act to coordinate their interests and minimize direct conflict; some of it is purely aspirational, some of it necessary for survival. Like domestic law, it is enforced only some of the time, and then against the weak more than the strong. Yet, law is still where we look for justice and, perhaps, for power to be tamed.

**Requirements/Evaluation:** Weekly quizzes, Glow posts, two papers on assigned topics, two group projects (video, audio, or paper)

**Prerequisites:** None, although those who have not taken an introduction to international relations at Williams will be required to review one lecture ppt,
PSCI 224  (F) Neo-liberalism: What Is It and Why Does It Matter?
We live in the era of neo-liberalism. But what does this mean? This course will focus on neo-liberalism in comparative perspective, looking mainly at the US and Europe. It will consider how neo-liberalism is defined, the role of states in making and maintaining neo-liberalism, the centrality of markets to neo-liberal conceptions, and the kinds of politics that produced and are produced by neo-liberalism. Economically, the course will look at the institutional configuration of neo-liberalism, changes in economies, growing inequality, the financial crises, and prevalence of debt. Politically, the course will address changes in the role of government, what governments do and do not do, the growing influence of financial interests, the role of identities in mobilizing support for and legitimating governments, and the impact of these developments on the status of citizenship and democracy.

Requirements/Evaluation: three papers: one 3-page, one 5-page, and one 10-page paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Political Science majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: POEC Depth PSCI Comparative Politics Courses PSCI International Relations Courses

PSCI 225  (S) International Security
Cross-listings: LEAD 225

Primary Cross-listing
This is a course about war and peace. It deals with some of the most foundational questions that concern scholars of security studies: What accounts for great power conflict and cooperation? Is intense security competition between major states inevitable, or can they get along, provided their main interests are protected? Does the structure of the international system necessarily cause conflict? Do particularly aggressive states? Can wars occur "by accident"? When and why do states choose to use military force? What role does statecraft play in matters of war and peace? How do nuclear weapons affect great power politics? The course will consider these questions from an interdisciplinary perspective that combines political science concepts with an historical approach to the evidence. The bulk of the course deals with the major events in the history of great power politics, such as the causes and conduct of World War I and World War II; the origins and course of the Cold War; the nuclear revolution; and the post-Cold War period. The course concludes with an examination of a number of major contemporary policy debates in security studies.

Requirements/Evaluation: class participation, two 6- to 8-page papers, final
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Political Science majors
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)

PSCI 225 (S) Nuclear Weapons and World Politics

Cross-listings: LEAD 226

Primary Cross-listing
This is a course about international politics in the nuclear age. The class will address a combination of conceptual, empirical, and policy questions, such as: Have nuclear weapons had a "revolutionary" effect on world politics, such that, fundamentally, international relations no longer works in more or less the same way that it did before the advent of nuclear weapons in 1945? Do nuclear weapons have an essentially stabilizing or destabilizing effect? How, if at all, do nuclear weapons affect how political disputes run their course? How significant of a threat are concerns like nuclear proliferation, nuclear terrorism, and nuclear accidents? How does a state's nuclear posture affect basic political outcomes? Is it possible to return to a world without nuclear weapons? The course will focus on these questions using an interdisciplinary perspective that leverages political science concepts, historical case studies, and contemporary policy debates to generate core insights. It will not only survey the history of the nuclear age--and of individual countries' nuclear development--but also grapple with important contemporary policy dilemmas in the nuclear realm.

Requirements/Evaluation: class participation; two 6-8 page papers; short in-class presentations; final exam

Prerequisites: PSCI 202 or a significant amount of other PSCI coursework

Enrollment Limit: 25

Enrollment Preferences: Preference to students majoring in political science, particularly in the international relations subfield, and/or doing a concentration in leadership studies

Expected Class Size: 20-25
Grading: no pass/fail option, yes fifth course option

PSCI 227 (F) International Relations of the Middle East

Cross-listings: LEAD 227

Primary Cross-listing
This is a course about the Middle East in international politics. The structure of the course combines political science concepts with a detailed survey of the region's diplomatic history. The basic format of the course will be to combine brief lectures--either posted on the class website beforehand or given at the start of each class--with an in-depth discussion of each class session's topic. The goal of these discussions is to generate debates over the conceptual, historical, and policy significance of the subjects that we cover. Specifically, the first section of the course will cover the emergence of the Persian Gulf as an area of strategic importance in international politics; U.S. policy toward Saudi Arabia and Iran after World War II; the origins of the Arab-Israeli dispute; the June 1967 and October 1973 Middle East conflicts; Egyptian-Israeli peace; the Iranian Revolution and the Iran-Iraq War; the 1991 Persian Gulf War and its consequences; and the rise of Al Qaeda, Hezbollah, and Hamas. The second part of the course focuses on the Iraq War and its consequences; the rise of ISIS; the Arab Spring; Turkey's changing foreign relations; and the war in Syria. The last section of the course covers contemporary policy challenges confronting the Middle East.

Requirements/Evaluation: class participation, two 6- to 8-page papers, final
Enrollment Preferences: Political Science majors with an International Relations concentration, History majors

Enrollment Limit: 25

Expected Class Size: 20-25

Grading: no pass/fail option, yes fifth course option

PSCI 228 (S) International Organization

Tens of thousands of international organizations populate our world. IGOs, whose members are sovereign states, range from the Nordic Association for Reindeer Research to NATO and the UN; INGOs, whose members are private groups and individuals, include the International Seaweed Association as well as Doctors Without Borders and Human Rights Watch. We will investigate theories about where they come from, what they do, and to whom they matter, and explore controversies surrounding their agency, legitimacy, efficiency, and accountability. We cover the history, structures, and functions of international organizations using case studies.

Requirements/Evaluation: two short papers, a presentation, one longer paper, one group project.

Prerequisites: none, but the introduction to international politics (202) is strongly recommended. If you have not taken that, you will need to go through a four-hour online tutorial I have set up by the end of our first week. Open to first-year students

Enrollment Limit: 25

Enrollment Preferences: Political Science majors, Political Economy majors, Public Health concentrators

PSCI 231  (F)  Ancient Political Thought

Cross-listings:  PHIL 231

Primary Cross-listing

The core activity of this seminar is the careful reading and sustained discussion of selected works by Plato and Aristotle, but we will also engage such other thinkers as Epictetus and Augustine, and, from a political and theoretical point of view, selections from the Hebrew Bible and New Testament. Among the questions that we will address: What is justice? How can it be known and pursued? How is political power generated and exercised? What are the social and ethical prerequisites--and consequences--of democracy? Must the freedom or fulfillment of some people require the subordination of others? Does freedom require leading (or avoiding) a political life? What distinguishes that kind of life from others? What does it mean to be "philosophical" or to think "theoretically" about politics? Although we will attempt to engage the readings on their own terms, we will also ask how the vast differences between the ancient world and our own undercut or enhance the texts' ability to illuminate the dilemmas of political life for us.

Class Format:  discussion

Requirements/Evaluation:  three 7- to 8-page papers

PSCI 232  (S)  Modern Political Thought

Cross-listings:  PHIL 232

Primary Cross-listing

This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and of politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation:  three papers of 4-6 pages; class participation; brief informal writing tasks inside and outside of class meetings

Prerequisites:  none; open to all

PSCI 234 (S) Freedom

We all want to be free—at least most of us say we do. The desire for political freedom is as old as the ancient world and as new as today's movements and liberation struggles. But what do we mean when we claim to want freedom? What institutions and social conditions make political freedom possible? For instance, do the claims of individual freedom conflict with those of community? With equality? With authority? Does freedom make us happy? Is it what we really want? And if it is, will we find it by engaging or turning away from politics? This course confronts these questions through readings drawn from a variety of classic and contemporary sources, including works of fiction, autobiography, journalism, law, philosophy and political theory, and social science. Our discussions will address such topics as activism and stoicism; equality and economic freedom; sexual freedom and gender politics; freedom of speech and religion; citizenship, migration, and cosmopolitanism; racism and colonialism; mass incarceration; and the uses and limits of state power. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, T. 4:45-8:30 pm*

Requirements/Evaluation: Class attendance and active participation, short essays, and a final paper.

Prerequisites: Not open to first-year students.

Enrollment Limit: 9

Enrollment Preferences: Final selection will be made on the basis of statements of interest solicited after pre-registration, and interviews with the instructor.

PSCI 236 (S) Feminist Legal Theory (DPE)

Cross-listings: WGSS 236

Primary Cross-listing

What can a critical analysis of gender and sexuality bring to the study of law, constitutions, legal interpretation, and the task of judging? Well-known contributions by feminist theorists include the conceptualization and critique of anti-discrimination frameworks, the legal analysis of intersecting systems of social subordination (particularly gender, race, class, sexuality, disability), and the theorization of "new" categories of rights (e.g. sexuate rights). Accompanying these interventions in the legal field is a deep and sustained inquiry into the subject of law: Who can appear before the law as the proper bearer of civil and human rights? What kinds of violations and deprivations can be recognized as harms in need of redress? Who gets to make these judgments, and according to what rules? While our examples will be drawn mainly from family law, the regulation of sex/reproduction, and workplace discrimination, the main task of this course will be to deepen our understanding of how the subject of law is constituted. Illustrative cases to aid our inquiry will be drawn primarily from the USA and Canada, with additional examples from India, South Africa, and possibly European law. Theorists we read will represent many kinds of feminist work that intersect with the legal field, including academic studies in political theory, philosophy, and cultural theory, along with contributions from community organizers engaged in anti-violence work and social justice advocacy.

Requirements/Evaluation: One oral presentation; three 6-8 page papers; regular class participation.

Prerequisites: None.

Enrollment Limit: 25

Enrollment Preferences: Preference will be given to PSCI and WGSS majors and JLST concentrators.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

PSCI 238  (F) Economic Liberalism and Its Critics

Cross-listings: POEC 250 / ECON 299

Secondary Cross-listing

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Joseph Schumpeter, Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant topics relevant to the themes of the course, with applications to current public policy issues, such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; social media and addiction; economic nationalism; behavioral economics; climate change and intergenerational equity; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: This course uses a flipped classroom approach. Before each class meeting, students watch a lecture video, and (at least six times) write an essay relating to the assigned reading and video. In-person class time is devoted primarily to Socratic discussion.

Requirements/Evaluation: six short essays and a final exam

Prerequisites: ECON 110 and 120 or equivalent; PSCI 110 (formerly PSCI 201; may be taken concurrently with POEC 250); open to non-majors

PSCI 240  (S) Political Theory and Comparative Politics

We live in a society that takes liberalism and capitalism for granted, as the norm that naturally centers collective life. This course draws on foundational thinkers in political theory and comparative politics to explore that premise. To that end, the course will discuss the origins, logic, and meaning of liberalism and capitalism and the relationships between them. Asking whether liberal thought, to borrow the famous joke about economists, assumes the can openers of liberalism and capitalism, taking as given that which is constructed historically, the course will look at leading theories about the role states play in constituting and maintaining capitalist economies, the definition and nature of power in liberal societies, and, more recently, the connection between identities, politics, classes, and states. The readings include Alexis de Tocqueville, Karl Marx, Max Weber, Karl Polanyi, Barrington Moore, Robert Putnam, Michel Foucault, and Edward Said.

Class Format: discussion

PSCI 241  (S)  Meritocracy

Cross-listings: SOC 241

Primary Cross-listing

Although fewer than 1% of Americans have a degree from the country’s top 30 colleges and universities, 39% of Fortune 500 CEOs, 41% of federal judges, 44% of the writing and editorial staff at the New York Times, 64% of Davos attendees, and 100% of Supreme Court justices do. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy—rule by the intelligent—in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

Requirements/Evaluation: one short paper, one long paper, take-home final exam, discussion questions, class participation

Prerequisites: none

PSCI 245  (S)  South African Politics

The course deals with South African politics since the end of apartheid. The readings will address the politics, policies, and composition of the African National Congress (ANC), the growth of black economic elites and the black middle class, the persistence of poverty and extreme inequality, expanding corruption, and why the ANC continues to prevail politically and electorally in spite of on-going poverty and worsening inequality, governmental failures, and corruption. It will pay particular attention to the ANC and corruption, and it will address why, thus far, the ANC has won national elections handily amidst growing dissatisfaction with overt and pervasive official corruption and misgovernment and the role racial solidarities and memories play in sustaining the ANC in office.

Requirements/Evaluation: Two 10-12 page papers and class participation.

Prerequisites: None.

PSCI 246  (F)  Introduction to Capitalism
Must we choose between “socialism or barbarism?” A century after Rosa Luxemburg's challenge, it is clear that socialism did not win. Does this mean that we have descended to barbarism? Tracing the path of capitalist development in the rich democracies suggests a range of responses. Some states have developed robust institutions that provide for citizens’ basic needs and check the power of business; others leave the poor threatened by starvation and workers exposed to exploitation. How and why has capitalism evolved in different forms in different countries? This course introduces students to capitalism by examining the struggles between social groups that lead to variation in distributional outcomes and economic performance. Students will develop a conceptual toolkit to study the politics of capitalism based in the economic history of the rich democracies (Europe, United States) in the twentieth century. The second half of the course challenges students to apply this toolkit to the twenty-first century, focusing on attempts to transition from industrial manufacturing to services. We engage pressing questions around technological innovation, populism, financialization, and globalization.

Requirements/Evaluation:  Class participation, two presentations, three essays.
Prerequisites: None.

Attributes: GBST East Asian Studies  POEC Depth  PSCI Comparative Politics Courses

PSCI 248  (F)  The USA in Comparative Perspective  (WS)
Politics in the USA is often considered unique and incomparable, and US political science separates the study of American politics from comparative politics. This course overcomes this divide, considering politics and society in the United States comparatively, from a variety of viewpoints and by authors foreign and American, historical and contemporary. Important topics include: the colonial experience and independence; race relations and the African diaspora; national identity and authoritarian populist nationalism; war and state-building; American exceptionalism, religion, and foreign policy; criminal justice; and the origins and shape of the welfare state. (As the list suggests, the most common comparisons are with Latin America and
Western Europe, but several of our authors look beyond these regions.)

**Class Format:** a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

**Requirements/Evaluation:** five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** sophomores and students who have been denied enrollment in the course previously

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Assignments are graded and returned weekly. After each student has written one long paper and one response, professor meets with them individually to discuss the composition and presentation of each genre. For the final class, students bring a one-page response written in “E-prime,” English without the verb “to be.”

---

**PSCI 250 (F) Political Psychology**

This course will examine the role of psychology in politics. The goal is to develop a rich understanding of the foundations of public opinion and political behavior. We will examine the role of social identities, partisan affiliation, concrete interests, values, issues, and ideology in shaping opinion and behavior, as well as the role of external forces such as campaigns, the media, and political elites. Along the way, we will consider a number of longstanding questions in the study of politics, such as: Is the public rational? What are the root causes of racism? How does racism influence political choices? Why do people identify with political parties? Why do people vote or engage in other types of political action? How does the mass media and campaigns influence public opinion?

**Requirements/Evaluation:** class participation, 1-2 short papers (5-7 pages), 1 medium paper (8-12 pages), an oral presentation, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** If the course over-enrolls, please give first enrollment preference to political science majors, followed by political economy majors.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

---

**PSCI 251 (S) Thinking and Acting Politically in the Long Civil Rights Movement**

**Cross-listings:** AFR 258

**Primary Cross-listing**

In this course, students will explore the various theories of political action that animated the Long Civil Rights Movement. Students will examine how these theories helped frame the political ideals, ideologies, and behaviors of multiple sects of the Black Freedom struggle. By analyzing the political thought of thinkers like Ella Baker, Amzie Moore, Paul Murray, Florynce Kennedy, Fannie Lou Hamer, Robert F. Williams, and Martin Luther King, Jr.--among others, students will appreciate how their experiences influenced their approach to politics in diverse ways. Subsequently, students will evaluate the theories’ arguments and political actions while determining which frameworks should motivate contemporary political organizing. By challenging the charismatic leader model of teaching and learning Civil Rights politics, students will understand the Civil Rights Movement as a grassroots movement buoyed by the political activities and energies of ordinary Black citizens. Moreover, they will develop a broader understanding of the mechanics of grassroots organizing and mobilize their studies appropriately to argue persuasively how ordinary people should contest injustice by considering tactics, mobilization strategies, political visions and ideologies, and strategic dilemmas. Consequently, they will not view Civil Rights history and theory as an episode of the past but as a force that continues to shape our political imaginations.

**Requirements/Evaluation:** several short papers, class participation involving weekly writing, group projects, oral presentations
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Political Science majors and prospective majors, Africana Majors
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

PSCI 252  (F)  Campaigns and Elections
The 2022 midterm elections are happening in November. Though midterm elections historically generate less involvement than presidential elections, much is at stake in the upcoming midterms, as control of Congress and statehouses will likely determine what, if anything, President Biden achieves in the remainder of his term. This course will examine how we conduct the most fundamental of democratic processes in the United States: the people's choice of their representatives. We will examine factors that shape election outcomes such as the state of the economy, issues, partisanship, ideology, social identities with a special focus on race, interest groups, media, and the candidates themselves. A central question we will consider throughout the course if how "democratic" the conduct of campaigns actually is. For instance, does the citizenry have the motivation and capacity to hold public officials accountable? How do resource gaps tied to inequality in society (such as race and class) influence who votes and for whom? Do the mass media and political elites inform or manipulate the public? How closely do candidates resemble the constituencies they represent, and does it matter? We will apply our learning on many of these topics to the ongoing 2022 midterm elections.
Requirements/Evaluation: class participation, 1-2 short papers (5-7 pages), 1 medium paper (8-12 pages), an oral presentation, and a final exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: poli sci majors

PSCI 253  (S)  The Tragedy of Venezuela
The recent history of Venezuela offers a window into many of the most important political and economic issues faced by people in developing countries. Why does an abundance of oil seem to solve some problems while often leading to perverse economic and political outcomes? How can democracy be made to work better for ordinary people? What does it mean for a government to be truly sovereign? How does corruption grow and what can we do about it? When should we leave important decisions to technocratic experts? What does it mean today to be progressive? The course first briefly reviews Venezuelan post-Independence history, with an emphasis on the post-1958 democratic settlement. It then explores more deeply the reasons for the breakdown of this settlement, the rise of Hugo Chavez, and the decay of the "21st Century Socialist" regime under Chavez and Maduro. Materials include biographies, documentary films, short videos, economic data, and news reports.
Class Format: discussion
Requirements/Evaluation: a map quiz and four short papers
Prerequisites: a course in comparative politics and a course in economics, or permission of the instructor
Enrollment Limit: 25
Enrollment Preferences: sophomores and PSCI majors
PSCI 255 (F) Comparative Politics of South Asia

South Asia is home to around 2 billion people (over 24% of the world), making it the most populous and densely populated region in the world. The region is also one of the poorest in the world and lags in human development. Ethnic, linguistic, and religious diversity is offset by common cultural traditions and practices that serve to unite the people of the Indian Subcontinent. The course introduces students to the comparative politics of South Asia, highlighting the complexities and potential of the region. Every week we explore a different component of South Asian politics. The course covers the creation of the states of modern South Asia, partition and independence, democratization, electoral politics and political parties, economic and social development, ethnic identity and conflict, and the contemporary regional challenges of democratic backsliding and climate change.

Requirements/Evaluation: three 5-7 page papers or one research paper; presentation; class participation

Prerequisites: no pre-requisites

PSCI 256 (S) Electoral Politics in the Developing World

Electoral politics in the developing world often differs from democratic politics in Western Europe and the U.S. Electoral volatility, decrepit state institutions, weak parties, clientelism, and electoral violence in developing democracies complicate foundational theories on representation and accountability. The course surveys the electoral politics of low and middle-income democracies in the developing world, investigating its similarities and differences with the historical and contemporary politics of developed democracies. It examines work on electoral systems, formal and informal institutions, bureaucratic politics, political parties, party systems, clientelism, ethnic politics, and political violence. We will draw on case studies from Latin America, Africa, South Asia, Southeast Asia, and the Middle East to analyze the effectiveness of these theories. Assignments focus on crafting solutions to contemporary political challenges in the developing world.

Requirements/Evaluation: one to two papers, midterm, group policy brief, presentation

Prerequisites: no prerequisites

Enrollment Limit: 25

Enrollment Preferences: preference given to political science majors

PSCI 259 (S) George Orwell: Capitalism, Socialism and Totalitarianism

It is hard to overstate the enduring influence of George Orwell on political discourse in the 20th century and beyond. Before his death in 1950 at the young age of forty six, Orwell produced a stunningly large and diverse body of work in the fields of journalism, literature, and political commentary. Much of this work was inspired by his own experiences as a police officer in Burma, several years working and traveling with destitute workers in England and France, as well as his experiences fighting against fascism during the Spanish Civil War in the late 1930s. While a fairly obscure and struggling author for much of his life, Orwell achieved worldwide fame after the Second World War with the publication of Animal Farm (1945) and
1984 (1949). This tutorial has two main objectives. First, it will introduce students to Orwell's most important books and essays in the context of a turbulent political era marked by the Great Depression, the rise of totalitarianism, world war, and the emerging Cold War. Second, the tutorial will examine the past and ongoing uses and abuses of Orwell's legacy by scholars and analysts on both the political left and the right. As Louis Menand argues, "almost everything in the popular understanding of Orwell is a distortion of what he really thought and the kind of writer he was." The course will conclude by examining what Orwell's thought contributes to a consideration of current issues ranging from the emergence of cancel culture to the possibilities of democratic socialism in the 21st century.

Requirements/Evaluation: 4 lead essays of 5-6 pages and 4 response essays of 2 pages.

Prerequisites: At least one introductory political science course.

Enrollment Limit: 10

Enrollment Preferences: Declared and prospective political science majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: This course could also be listed in other subfields.

PSCI 261 (F) The Arab-Israeli Conflict (WS)
This tutorial will cover the Arab-Israeli dispute—from both historical and political science perspectives—from the rise of the Zionist movement in the late nineteenth century to the present day. It will examine the various explanations that scholars have offered for why the conflict has persisted for so long, how it has evolved over time, the role that outside powers have played in shaping it, and how its perpetuation (or settlement) is likely to impact Middle East politics in the future. More specifically, the class will examine the origins of the Zionist movement; the role that the First World War played in shaping the dispute; the period of the British mandate; the rise of Palestinian nationalism; the Second World War and the creation of the state of Israel; the 1948, 1956, 1967, and 1973 Arab-Israeli wars; Israel's 1982 invasion of Lebanon and its consequences; the promise and ultimate collapse of the Oslo peace process during the 1990s and early 2000s; the rise of groups such as Hamas, Hezbollah, and Palestinian Islamic Jihad; the rightward shift in Israeli politics since 2000; the intensification of Israeli-Iranian antagonism and its implications; the shift in Israel's relations with the Sunni Arab world that has occurred in recent years; and the future of the conflict.

Requirements/Evaluation: Biweekly response papers; Biweekly critiques of partner's response papers; Class participation; Final analytical essay

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Political Science Majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: This class will require students either to write a paper or critique their partner's paper on a weekly basis. Students will also be required to redraft their papers—based on feedback from both their partner and the instructor—with the goal of improving their ability to make compelling arguments in writing.

PSCI 268 (S) The Israeli-Palestinian Conflict
This is an introductory course on the conflict between Israelis and Palestinians. Approaching the issue historically, the course begins by addressing the development of Zionism as a movement, the arrival of Zionists in Mandate Palestine, the pursuit by Zionists of statehood and the in-gathering of Jews, and the responses of neighboring Arab states and local Palestinians to these processes. Drawing on the writings of both Zionists and Palestinians, the course will examine debates among both, how Palestinians responded to the growing presence of Zionists, and how Zionists
conceived of Palestinians and Palestinian nationalism (both secular and religious) before, during, and after the foundation of the state of Israel. After dealing with the pre-history of the state and the nakba, the course will address recent Israeli settlement policies on the West Bank, the controversies surrounding the Oslo Agreement, and the contemporary situations in the West Bank and Gaza. Finally, the course will address contemporary controversies about the prospects and feasibility of the "one-state" and "two-state" "solutions" to the Palestinian issue, and the implications of resolving, or not resolving, the Palestinian issue to the mutual satisfaction of Israelis and Palestinians.

**Requirements/Evaluation:** two papers totaling 20 pages and final examination

**PSCI 280 (S) Silicon Valley: Digital Transformation and Democracy (WS)**

Nearly every country in the world seeks to drive economic growth by promoting digital technologies. The universal model is Silicon Valley. In this tutorial, students will examine the origins of the Silicon Valley model and other countries' attempts to emulate it. Departing from "just so" stories of technological determinism, we take up the lens of comparative political economy to investigate the politics that allowed US tech firms to shape economic policy to meet their interests. It is no accident that tech became a symbol for economic growth in the 1970s, precisely when it also began to build powerful alliances in Washington. After investigating the origins of the Silicon Valley model, we trace attempts to adopt it in Europe and Asia, which highlight the model's political contingencies and some of the more salient conflicts over the tech sector. We focus on the ways in which the Silicon Valley model can threaten social welfare through economic inequality and precarious employment, and engage a variety of perspectives, including workplace ethnography, to examine these threats, as well as potential regulatory responses. The course concludes by considering what policies could be appropriate for supporting, while also regulating, the tech sector in the twenty-first century.

**Requirements/Evaluation:** Five 5-page papers; five 2-page responses; participation

**Prerequisites:** One introductory course in political science and/or permission of the instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference will be given to sophomores and juniors majoring in PSCI and POEC.

**Expected Class Size:** 10

**PSCI 290 (F) How Change Happens in American Politics (WS)**

Cross-listings: LEAD 290

Primary Cross-listing

An unprecedented assault on the U.S. Capitol, the rise of white nationalism, a pandemic, economic volatility, racial reckoning, the overturning of Roe v. Wade, and rapidly evolving environmental crises -- American politics in the last four years has been tumultuous. What might we expect to come next? From the Founding to the present, the American political order has undergone cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably stable and enduring. How can this be? Where do we find continuities and where upheavals? Who or what has been responsible for the continuities, and who or what for the changes? What sorts of transformations have been possible, and why -- what marriage of individual action and contextual factors have created political change in the past and in the present? Finally, what are the costs of change (and of
continuity) -- and who pays them? In this tutorial, we assess American political change, or lack of, to gain a sense of the role that political leaders have played in driving change. We examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including war, economic developments, demographic change, and constitutional and institutional practices. We consider general models of change, as well as specific case studies, including civil rights and social justice for racial and ethnic groups, gender equality and family relations, and reactionary or traditionalist politics. Finally, we will look at arguments that America has been "exceptional" -- or, unlike other countries -- as well as critiques of these arguments to help us gain an understanding of future prospects for political transformation.

**Requirements/Evaluation:** participation in weekly meetings as well as 4 lead essays (5-6 pages) and 4 critiques (2 pages)

PSCI 291  (S)  American Political Events  (WS)

Scandals. Wars and assassinations. Contested elections, Supreme Court decisions, and constitutional amendments. As large as they loom in our daily experience and our historical memory, these sorts of events--concrete, discrete things that happen in and around the political world--are often underestimated as catalysts of political change. Indeed, in the study of American political development, we often look to complex processes and underlying causes as explanations for how and why ideas, institutions, and policies both emerge and evolve. Yet for all our focus on long-term and subtle causal mechanisms, events often serve as political turning points in ways that vary over time, last for extended periods of time, and are not always entirely predictable at the time. Beginning from the presumption that change often has proximate as well as latent causes, this tutorial focuses on events as critical junctures in American politics. Our concern with these events is not with why they happened as or when they did but, rather, with how they altered the American political order once they did--with how they caused shifts in political alignments, created demands for political action, or resulted in a reordering of political values. Over the course of the semester, we will look at ten different types of events, ranging from those that seem bigger than government and politics (economic collapse) to those that are the daily grist of government and politics (speeches), in each instance juxtaposing two different occurrences of a particular category of event. In so doing, we will seek to use controversial and consequential moments in American politics as a window into deeper questions about political change and the narratives we tell about it.

**Requirements/Evaluation:** five 5-to 7-page essays, five 2- to 3-page critiques, and a recorded oral final reflection

**Prerequisites:** none

PSCI 305 (F) Environmental Political Thought (WS)

Cross-listings: STS 305

Primary Cross-listing

In the face of planetary crisis, it is as difficult as it is crucial to find the time and calm "to think what we are doing" (Hannah Arendt's famous line). This course aims to hold space for that thinking; to collaboratively find the presence of mind to take the measure of the doings that caused, and that may redress, the awful reality of earth's degradation. To do so, we will read, discuss, and write about some of the most significant book-length works of environmental political thought published in the last five years. These books conceptualize and intervene into the politics of phenomena such as climate change, species depletion, toxic pollution and (a special interest of the instructor) waste by applying--and sometimes reinventing--approaches from political theory, political economy, science & technology studies, philosophy, and critical theory. They consider the enmeshment of environmental problems with racism, colonialism, economic inequality, and speciesism, among other modalities of power, and weigh the promise of political action and organization to reconstitute relationships among earth's human and more-than-human elements. By interpreting, evaluating, applying and extending the arguments of these books in discussion and writing, students will be challenged to scrutinize their preconceptions and develop, support and articulate original arguments about politics and the environment.

Requirements/Evaluation: Four mini-essays of 2-3 pages each; one final paper of 7-10 pages that incorporates substantially revised material from at least one mini-essay; class participation

PSCI 307 (F) American National Identity and State Power (WS)

Debates over American national identity, or what it means to be an American, have intensified in recent years, with a resurgent white Christian nationalism challenging progressive aspirations for a multiracial, environmentally sustainable, liberal democracy. At the same time, Republicans and Democrats fight over the scope and limits of government power on policies ranging from taxation and spending, to abortion, immigration, healthcare, policing, gun ownership, and voting rights. Are these conflicts related, and if so, how? Does how Americans define themselves as a nation inform the shape of the American state and the types of policies it creates? Or is it the reverse? Does the state and its policies make the nation, as many scholars claim? This tutorial investigates the relationship between state and nation over time in the United States. We will explore conflicts over how "the people" are defined in different moments, and we will examine how these conflicts connect to the exercise of state power in areas including territorial expansion, census taking, public health, immigration, social welfare, and policing.

Requirements/Evaluation: Five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

Prerequisites: At least one political science class or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: Political science majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)
Writing Skills Notes: Extensive written feedback will be provided on tutorial essays and critiques. Additionally, the tutorial sessions will include attention to the quality of the written argument in the paper that is the focus of each session. At the end of the semester, students will be required to revise one of the tutorial papers incorporating the feedback, oral and written, provided by their tutorial partner and the instructor.

PSCI 310  (F) New York City Politics: The Urban Crisis to the Pandemic  (WS)
Cross-listings: LEAD 332

Primary Cross-listing
This course examines New York City's political history from the 1970s to the present—a period during which the city underwent staggering economic and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth—but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy—how those contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrisms, and progressivism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

Requirements/Evaluation: active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: Political Science majors and Leadership Studies concentrators

PSCI 311  (F) Congress
Cross-listings: LEAD 311

Primary Cross-listing
Even before the pandemic, scholars, pundits, and the public thought Congress was in a state of crisis. Riven by polarized partisanship and gridlock, the most powerful assembly in the world seemed incapable of representing citizens and addressing problems. This seminar focuses on how Congress organizes itself to act as a collective body. In an organization comprised of equals, how and why do some senators and representatives acquire more power and authority than others? How does Congress act as an institution and not just a platform for 535 individuals? Why does Congress not act, especially when the U.S. confronts so many pressing problems, and how do legislators justify inaction? In what ways does this institution promote or hinder the legitimacy, responsiveness, and responsibility expected of a democratic governing institution?

PSCI 315  (S)  Parties in American Politics

Cross-listings: LEAD 315

Primary Cross-listing

Is the American party system what's wrong with American politics? It has been said that parties are essential to democracy, and in the U.S., political parties have played a central role in extending democracy, protecting rights, and organizing power. But their worth is a continuing subject of debate. Although parties have been celebrated for linking citizens to their government and providing the unity needed to govern in a political system of separated powers, they have also been disparaged for inflaming divisions among people andgrid-locking the government. Other critics take aim at the two-party system with the claim that the major parties fail to offer meaningful choices to citizens. This course will investigate this debate over parties by examining their nature and role in American political life, both past and present. Throughout the course, we will explore such questions as: What constitutes a party? For whom do they function? How and why have they changed over time? Why a two-party system, and what role do third parties play? Is partisanship good or bad for democracy? For governance? What is the relationship between parties and presidents? How does partisanship become tribalism or polarization, and can this be prevented? We will explore answers to these questions through seminar discussion, analytic essays, and independent research culminating in the writing of a longer (15 to 20 page) research paper.

Requirements/Evaluation: In addition to active seminar participation, students will be responsible for writing two shorter (5-7 page) papers and a longer research paper (15-20 pages).

Prerequisites: prior political science course at the 200 or 300 level

PSCI 316  (F)  Policy Making Process

Politics as usual. It's a phenomenon we all love to hate. But what does it mean? When government policy is decided by politics, does that mean the policy is necessarily bad? Can we get rid of politics in policy making or improve on it somehow? What would "politics as unusual" look like anyway? This class examines the policy making process with particular emphasis on the United States: How do issues get defined as problems worthy of government attention? What kinds of alternatives are considered as solutions to these problems? Why do we end up with some policies but not others? Do certain kinds of processes yield better policies than others? How should we decide what constitutes a good policy?

Requirements/Evaluation: several short papers, research paper, class participation

Prerequisites: one course in PSCI or permission of instructor

Enrollment Limit: 14
Enrollment Preferences: Political Science and Political Economy majors, and students with an interest in public policy

PSCI 319 (F)(S) Marine Policy (DPE) (WS)

Cross-listings: ENVI 351 / CAOS 351

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 319(D2) ENVI 351(D2) CAOS 351(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

Cross-listings: LEAD 320

Secondary Cross-listing

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious—or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history—including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write an 18-20 page research paper on a topic of their choice related to the core themes of the course.

Requirements/Evaluation: Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites: previous course in Leadership Studies, or Political Science, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Leadership Studies concentrators, Political Science majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 321 (F) Immigration Politics in the U.S.

The U.S. Census Bureau estimates that non-Hispanic whites will no longer be the majority racial group in the U.S. by 2044. This demographic change is fueled by past and current immigration, and the politics surrounding American immigration policy have intensified as a result. Donald Trump's rise to the presidency was fueled in part by his pledge to build a wall between the U.S. and Mexico. Meanwhile, efforts to reform the nation's immigration laws have been stuck in gridlock for years. How did we get to this point and what does the future hold? Why is immigration policy so contentious? What is at stake, and what do different groups believe to be at stake? To answer these questions, we will examine immigration from a multidisciplinary lens, but with special attention to immigration politics and policy. We will examine the history of immigration to the U.S. and the policies that have shaped it; recent developments in electoral and protest politics; the policy initiatives of recent presidential administrations, Congress, and state and local governments; and the incorporation of immigrants into U.S. society and politics, past and present.

Requirements/Evaluation: one 2- to 3-page paper; one 5- to 7-page paper; one oral presentation; one 15- to 20-page research paper; and class participation

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Political Science majors

PSCI 323 (S) Law and Politics of the Sea

Cross-listings: CAOS 323

Primary Cross-listing

Can international law save the seas? That is one current bet. The sea law regime centers on the United Nations Convention on the Law of the Sea (UNCLOS), which gathers into one place what most countries consider to be scattered ancient laws about piracy, transit through other countries’ territorial waters, fishing, jurisdiction over ships, and so forth. It also creates ocean zones, with rules for each, and a system for taxing firms that it licensed to exploit minerals on the high seas, and sharing the proceeds with developing countries. It seeks to mitigate conflicts among countries and companies as they energetically compete to exploit the seas. In 2023, UNCLOS launched a follow-on treaty, the Agreement on the Conservation and Sustainable Use of Marine Biological Diversity of Areas Beyond National Jurisdiction (BBNJ), which adds areas in the high seas that all nations commit to protect. This course explores the politics and practices that arise from UNCLOS and BBNJ. We engage with the agreements’ history, content, and exclusions, examine the incentives they provide states and criminals, and assess the way that geopolitical and climate collapse create new opportunities and constraints for states, firms, international organizations, and activists. Topics include piracy, naval officers’ guidelines, conflict in the South China Sea, bonded labor, refugee quarantine on islands, marine genetic resources, Arctic transit, and ocean pollution. This is a way to understand major deals regarding the oceans; it is also a way to understand what it means to consider an international legal agreement a solution to something.

Requirements/Evaluation: Three 6-page papers, longer final paper, class participation including weekly writing

Prerequisites: Introduction to International Relations, and/or International Law, or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Political science majors, Marine Studies majors, seniors

PSCI 326 (S) The Cyber Revolution (WS)

This is a course about how the advent of digital technologies, and especially those related to cybersecurity, have reshaped international politics, as well as how they might affect the world order in the future. At its most basic level, it addresses a question that is of fundamental importance to both scholars and policymakers alike: Have cyberweapons and digital technologies revolutionized the way that international politics works, in a manner similar to the impact that nuclear weapons have had on the international system since 1945? Specifically, the course will focus on what is known as the “theory of the cyber revolution”; threats to critical infrastructure; the most significant cyberattacks that have occurred to date, namely, the US-Israeli Stuxnet attack on Iran's nuclear facilities in 2006-2010 and Russia’s NotPetya attack on Ukraine in 2017; zero-day markets; information warfare and its effects on, respectively, authoritarian and democratic political systems; and the role that critical information technologies—such as advanced semiconductors, quantum computing, and artificial intelligence systems—might play in the evolution of international security competition in future decades.

Requirements/Evaluation: Biweekly analytical essays, biweekly critiques, final paper, class participation

Prerequisites: PSCI 120

Enrollment Limit: 10

Enrollment Preferences: Preference given to PSCI majors, especially those concentrating in the international relations subfield

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (WS)

Writing Skills Notes: Students will be writing biweekly analytical essays, biweekly critiques of their partner's work, and a final paper. Moreover, they will be providing peer review of one another's work throughout the semester.

PSCI 329  Politics of the Powerless
American politics is often unequal, and well-organized advantaged interests tend to triumph. What do disadvantaged interests do in light of these power dynamics? Give up? Compromise? Struggle on? Why do relatively powerless interests sometimes win in American politics? Is it because they have an exceptional leader? A phenomenal strategy? Fortuitous events? This course examines the political dynamics of disputes in which disadvantaged interests push for major change. We will study past campaigns and then research and discuss contemporary reform efforts.

Requirements/Evaluation: class discussion, two short papers, and research paper

Prerequisites: one course in Political Science or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Political Science majors with interest in American politics

Expected Class Size: 14

Grading:

PSCI 332  (S)  The Body as Property  (DPE)
From an ethical standpoint, human bodies are fundamentally different from objects that can be owned, acquired, and exchanged. Yet history furnishes us with countless examples of laws, administrative rules, and social conventions that treat the human body as a form of property. The institution of slavery is a particularly egregious example. But there are other examples of treating the body as property that seem more ambiguous, or even benign: the employment contract in which bodily services are offered in exchange for payment; the feminist slogan "my body, my choice"; or even the every-day transfer of bodily properties into creative projects that then become part of the things people own --- chairs, tables, houses, music, art, and intellectual property. If it is not itself a form of property, how can we explain the use of the human body to acquire possessions, create wealth, and mediate the exchange of other kinds of property? These and other tensions between the concept of property and that of humanity will be the focus of this course. How is property defined, and how far should law go to erode or reinforce distinctions between property and humanity? Course readings focus on Locke, Hegel, Marx, and critical perspectives from feminist theory, critical theory, and critical legal studies (Cheryl Harris, Alexander Kluge, Oskar Negt, Carole Pateman, Rosalind Petchesky, and Dorothy Roberts, among others).

Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a 2-3-page final reflection essay.

Prerequisites: prior coursework in political theory, cultural theory, philosophy, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Political Science majors (priority given to those concentrating in Political Theory ); Justice & Law Studies concentrators (priority given to those with extensive JLST coursework).

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

Difference, Power, and Equity Notes: The course fulfills the Difference, Power, and Equity (DPE) requirement by examining how, in the context of legally-sanctioned power relations, bodily differences are constructed, monetized, and used to generate wealth. Race, class, and gender inequalities are central to the analysis.

PSCI 334 (S) Theorizing Global Justice

While economic exchanges, cultural convergence, and technological innovations have brought people in different parts of the world closer together than ever before, globalization has also amplified differences in material wealth and social inequalities. Ill health, inadequate sanitation, and lack of access to safe drinking water are increasingly common. Yet, more than ever before, the means exist in affluent regions of the world to alleviate the worst forms of suffering and enhance the well-being of the poorest people. How are we to understand this contradiction as a matter of justice? What is the relationship between justice and equality, and what do we owe one another in a deeply divided world? Course readings will engage your thinking on the central debates in moral philosophy, normative approaches to international political economy, and grassroots efforts to secure justice for women and other severely disadvantaged groups. Key theorists include Amartya Sen, Martha Nussbaum, John Rawls, Thomas Pogge, Nancy Fraser, Paul Farmer, Vandana Shiva, Majid Rahnema, and Enrique Dussel.

Class Format: discussion

Requirements/Evaluation: oral presentation, weekly blog posts, and three papers (3 pages, 7 pages and 8-10 pages)

PSCI 337 (S) Visual Politics

Cross-listings: ARTH 337 / AMST 370

Primary Cross-listing

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to the optical systems of military drones and contemporary forms of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, neuroscience, and STS. Possible authors include Arendt, Bal, Belting, Benjamin, Browne, Buck-Morss, Butler, Campt, Clark, Crary, Deleuze, Deleuze, Foucault, Freedberg, Hobbes, Kittler, Mercer, Mitchell, Mulvey, Plato, Rancièr, Scott, Sexton, Starr, Virilio, Warburg, and Zeki.

Requirements/Evaluation: regular, engaged class participation, several Glow posts, and *either* three 7- to 8-page papers *or* on short and one much longer paper.

Prerequisites: at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Political Science and Art History majors (including students in the grad program); then qualified students from all disciplines welcome, space permitting

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 344 (S) Palestinian Nationalism

Palestinian Nationalism: This tutorial will cover the history, bases of support, objectives, and accomplishments and failures of Palestinian nationalism over the past century. It will address how the Palestinian nation has been defined, who has defined it, what factions and classes have controlled its organizations, and the reasons why it has failed to achieve its goals. The tutorial will address the evolution of Palestinian nationalism historically and thematically, employing both primary and secondary sources. The readings will consist mostly of Palestinian authors, with an emphasis on documents, histories, and political analyses. Two questions will anchor the tutorial: how is the nation defined and what, if any, class interests are folded into various definitions?

Requirements/Evaluation: Read the assigned materials, write a 5-page paper every other week, and comment on the student's partner's paper in the other weeks.

Prerequisites: Political Science Majors and students with background in Middle East

Enrollment Limit: 10

Enrollment Preferences: Political Nationalism

PSCI 345 (F) The Meaning of Life and Politics in Ancient Chinese Thought

Cross-listings: ASIA 345

Primary Cross-listing

How can we live a good life? What standards should we use to judge how political power is constituted and used? This class will involve students in close reading of, and exegetical writing about, core texts of ancient Chinese philosophy in English translation. The purpose is to gain an understanding of a number of different perspectives on life and politics, especially Confucianism, Legalism and Daoism. While the primary focus will be on the meaning of the texts in the context of their own times, contemporary applications of core concepts will also be considered. The class will begin with background readings, since no prior work in Chinese philosophy or history is assumed. Then the class will read significant portions of the following canonical works: Yi Jing, Analects, Mencius, Daodejing, Zhuangzi, and Han Feizi.

Requirements/Evaluation: two 5-page papers and one 15-page paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference to seniors but all are welcome.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

PSCI 349 (S) Cuba and the United States (DPE) (WS)

We examine the long and deeply felt history of dependence and conflict between Cuba and its colossal neighbor to the north. The course begins with the political economy of the colony, then covers the Cuba- US relationship from José Marti and 1898 through the Cold War to the present, emphasizing the revolutionary period. Tutorial topics include: sovereignty and the Platt Amendment; culture and politics; race and national identity;
policies on gender and sexual identity; the institutions of "popular power"; the post-Soviet "Special Period"; the evolution of the Cuban exile community in the US; and the fraught agenda of reform and generational transition. Materials include journalism, official publications, biographies, travel accounts, polemics, policy statements of the US government, and a wide range of academic works.

**Class Format:** a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

**Requirements/Evaluation:** five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class

**Prerequisites:** any course on Latin America or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Political Science majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Assignments are graded and returned weekly. After each student has written one long paper and one response, the professor meets with them individually to discuss the composition and presentation of each genre. For the final class, students write a one-page paper in E' (E-prime), English without the verb "to be."

**Difference, Power, and Equity Notes:** Among other topics, the course describes an independence war fought by insurgents dedicated to color-blind citizenship (even as the "civilized world" embraced scientific racism); neo-colonialism under the Platt Amendment and after; race and the Revolution; gender and the changing treatment of sexual identity under the Revolution; and the categorical power differences that arise when only one political party is permitted to organize.

**PSCI 353 (S) What is Democracy?**

This is a research course that will investigate the meaning of democracy through readings and a research paper. The readings will begin with claims that democracy consists of government by elites, that the democratic component consists of elections that amount to choosing between rival slates of elites, and that agreements among elites set the boundaries for permissible democratic decision making. To examine this claim, the readings will address two fundamental issues. First, it will consider the the terms of American foreign policy after the Cold War, how it sets these, and continuities and discontinuities between the Clinton and Bush administrations. Where did Democratic and Republican foreign policy elites agree and disagree and what happened to proposals that were outside the elite consensus? Second, the course will consider the prelude and official responses to the 2008-11 financial crisis. What policies paved the way for and resolved the crisis, how were they reached, and who participated in formulating them? In other words, to what extent and in what respects were these fundamental turning points made "democratically"? Having done preliminary reading on these two issues, students will conduct in-depth research into aspects of one of these questions and write a research paper.

**Requirements/Evaluation:** One 5 page paper, 25 page research paper, presentation of paper to class, and class participation.

**Prerequisites:** Instructors permission.

**Enrollment Limit:** 14

**Enrollment Preferences:** Political Science majors or prospective majors, sophomores, juniors, and seniors, and permission of instructor.

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

PSCI 356 (S) Democratization in India and Pakistan
Cross-listings: GBST 357 / ASIA 356

Democratization has had both successes and failures in postcolonial South Asia. The region is home to the world's largest democracy in India, often cited as an unlikely and puzzling success story. At the same time, periods of democratic rule in Pakistan and Bangladesh are broken up by military interference, Sri Lanka's democracy is plagued by ethnic conflict, and Afghanistan has been unable to sustain democracy due to weak state institutions. What explains this diverse and uneven pattern of democracy in South Asia? The course delves into theories on political parties, ethnic politics, electoral institutions, civil-military relations, political violence, state-building, inter-state conflict, and civil wars to understand the variation in regime type in the region. It covers domestic and international factors that lead to democratization and democratic backsliding. We will focus on the role of political parties in democratization; the emergence of political dynasties; changes in the characteristics of the political elite; investigate claims of democratic deepening; and examine the effect of inter-state wars, land disputes, and insurgencies on democratic stability in the region.

Requirements/Evaluation: three 5 to 7-page papers or one research paper; presentation; class participation
Prerequisites: previous course in political science or permission of the instructor
Enrollment Limit: 16

PSCI 357 (S) Senior Seminar: Leadership and the Anxieties of Democracy (WS)
Cross-listings: LEAD 425

Secondary Cross-listing
This course, the senior capstone for Leadership Studies, examines the challenges and opportunities facing political leaders in contemporary liberal democracies. We will begin by seeking to place our current moment in the longer arc of history, examining the distinctive institutional and structural
constraints facing contemporary political leaders and examining in detail previous eras in which the American political system has come under great pressure. Then, we will look at some important factors that shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and fraying institutions. While the course will focus primarily on the United States, our conceptual framework will be global. Our primary questions will be these: Why does transformative leadership seem so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world? As a final assignment, students will craft an 18-20-page research paper on a topic of their choice related to the themes of the course.

Requirements/Evaluation: Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites: LEAD 155 or permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: Open to Leadership Studies concentrators or with the permission of the instructor; preference given to Political Science majors

PSCI 360  (F) Right-Wing Populism

After the fall of the Berlin Wall in 1989, the political scientist Francis Fukuyama famously declared "the end of history". From now on only liberal democracy, free market capitalism, and global integration had a future. Everything else -- including political ideology, nationalism, conservative religion, and sovereignty -- was consigned to the ash heap. Thirty years later the future looks seriously derailed. A right-wing populism marked by Brexit, Trump, Le Pen, and a host of 'far-right' political movements in the very heartland of democratic globalizing capitalism has shaken liberal certainties. This course is an investigation into contemporary right-wing populism in Europe and North America in its social, economic, and political context. We will discuss theories of right-wing populism's appeal from both left and right perspectives. We will also investigate specific cases of right-wing populism including France's National Rally and Eric Zemmour, the Netherlands' Geert Wilders, Sweden's Sweden Democrats, Hungary's Fidesz, Poland's Law and Justice Party, and America's Trumpism and QAnon. We will also reflect on important electoral tests of right-wing populism in 2024, especially the US presidential election and (perhaps) the UK general election.

Requirements/Evaluation: two short papers; one research proposal; every-class discussion questions; class participation.

PSCI 361 (S) Black Political Thought

Cross-listings: AFR 364

Primary Cross-listing

This seminar will introduce students to the study of Black Political Thought as a set of critical normative and diagnostic gestures that help theorize the Black experience. By thrusting students into the "problem space" of Black Political Thought, students will examine the historical and structural conditions, normative arguments, theories of action, ideological conflicts, and conceptual evolutions that help define African American political imagination. Students will take up the central philosophical questions that shaped the tradition from the early nineteenth century to the present by engaging historical thinkers like Anna Julia Cooper, W.E.B. DuBois, Frantz Fanon, Ida B. Wells-Barnett, and Ella Baker and contemporary theorists like Saidiya Hartman, Charles Mills, bell hooks, and Frank Wilderson--among others. Guided by a Black diasporic consciousness, students will explore the canon's structural and ideological accounts of slavery, colonialism, patriarchy, racial capitalism, Jim Crow, and state violence and, subsequently, critique and imagine visions of Black liberation. With a theoretical grounding in the "Black radical tradition," students will leave this course with the conceptual resources and philosophical tools needed to realize political theory's potential as an instrument they can employ in their daily lives to normatively and diagnostically evaluate political, economic, cultural, and social institutions.

Requirements/Evaluation: Weekly discussion questions; two (1-2 pages) short reading responses; and three essay-style writing assignments, including one short (3-4 pages), one medium (5-6 pages), and one longer (10-12 pages)

Prerequisites: at least one prior course in political theory or permission of the instructor

PSCI 361 (S) Modern Jewish Political Theory

Cross-listings: REL 330 / JWST 492

Secondary Cross-listing

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst bourgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track

PSCI 376  (S)  The Impact of Black Panther Party Intellectuals on Political Theory  (DPE) (WS)

Secondary Cross-listing

This seminar examines the historical and contemporary impact of the Black Panther Party--and key allies such as Angela Davis--on political theory. Texts include: narratives from 1966-2016; memoirs; political critiques; theoretical analyses; interviews; speeches; government documents. The seminar will examine: original source materials; academic/popular interpretations and representations of the BPP; hagiography; iconography; political rebellion, political theory. Readings: Liberation, Imagination and the Black Panther Party; Soledad Brother: The Prison Writings of George Jackson; Mao’s Little Red Book; The Communist Manifesto; Still Black, Still Strong; Imprisoned Intellectuals; Comrade Sisters: Women in the Black Panther Party.

Requirements/Evaluation:  Requirements: students attend each seminar class and come prepared to discuss the readings; participate in discussions; present a collective analysis with Q/A for the seminar; submit a mid-term paper and a final paper or a group project.

Prerequisites: None.

Enrollment Limit: 19

Enrollment Preferences:  Juniors and Seniors with previous courses taken in Africana Studies, American Studies, Political Science, Philosophy.

Expected Class Size: 19

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE)  (WS)

PSCI 378  (F)  Origins of the State

When and how did the state come into existence as a form of political organization? This course explores theories of state origins that refer back to an invented past or are simply located in "once upon a time." We will ask how political myths and philosophical speculation on human "prehistory" draw boundaries between past and present, as well as between self and other. Paying attention to common oppositions such as nature/civilization, primitive/advanced, anarchy/social order, feminine/masculine, ruler/ruled and stasis/progress, we will investigate how these antagonisms work together to create the idea of the state that still dominates political imagination today. Course readings touch briefly on social contract theories (Locke, Hobbes, Rousseau, Kant) before turning to the core material for our exploration: alternative narratives of the origins of the state based on ancient Greek and Roman mythology and the political projects of modern-day socialists (Marx, Engels, Bebel, and more recent writers). How did it come to be that the socialist imagination comingled ancient myths with modern ethnological studies of non-European peoples--studies written largely from a colonialist standpoint? Must the figures of "woman" and "native" be continually pressed into the service of state theory, even in a supposedly alternative account? More broadly, how do socialist theories relate to other well-known theories of the state, e.g. as a monopoly on the legitimate use of violence (Weber), a form of colonization of lands and peoples (postcolonial studies and Critical Indigenous Theory), and a patriarchal institution controlling productive and reproductive labor (feminist theory)? (Please note that this is not a history course. It is a study of political myth-making and the concept of the state in political theory.)
Requirements/Evaluation: oral presentation and three papers (3 pages, 5 pages and 12-15 pages)
Prerequisites: Not open to first-year students.

Secondary Cross-listing
This seminar focuses on the entwined histories of liberation movements against racism, enslavement, and imperialism in the US, Cuba and Africa. Readings include: Hugh Thomas, Cuba: A History; Che Guevara: The Motorcycle Diaries; Walter Rodney, How Europe Underdeveloped Africa; Laird Bergad, The Comparative Histories of Slavery in Brazil, Cuba, and the United States; Thomas Sankara, Women's Liberation and the African Freedom Struggle; Nelson Mandela and Fidel Castro, How Far We Slaves Have Come! Students will read and analyze texts, screen documentaries, collectively compile a comprehensive bibliography, and present group analyses. The seminar is open to all students; however, priority is given to seniors majoring in American Studies.

Requirements/Evaluation: Reading and analysis of texts, collective compilation of a comprehensive bibliography, presentation of group analyses; two brief papers due at midterm and the end of the semester
Prerequisites: None
Enrollment Limit: 12
Enrollment Preferences: Seniors majoring in American Studies
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option

PSCI 380  (S)  Sex Marriage Family

Cross-listings: SOC 390

Primary Cross-listing
Something has happened to America over the past fifteen years. Large minorities of young adults, especially young men, are now celibate. Cohabitation has skyrocketed but marriage is disappearing, and the country's birth rate is at an all-time low. Not surprisingly, loneliness has become epidemic. A similar story can be told for most other developed countries. The implications for political polarization, economic growth, social insurance programs, public health, military defence, even national survival are grim. What is the cause of this loss of faith in the future? Can public policy reverse these trends? This course is an investigation into relations between the sexes in the developed world, the fate of children and the family, and
government attempts to shape them. The course investigates family models in historical and comparative context; the family and the welfare state; the economics of sex, gender, marriage, and class inequality; the dramatic value and behavioral changes of Gen Z around sex, cohabitation, and parenthood; and state policies to encourage partnership/marriage and childbearing.

Requirements/Evaluation: Two short papers, research paper proposal, every-class discussion questions, class participation.
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Political Economy, Political Science, and Sociology majors and prospective majors

PSCI 381 (S) The Conservative Welfare State

Conservatives in the United States are traditionally hostile to state power in general and the welfare state in particular. In much of the rest of the world, however, conservatives harbor no hatred of the state and, when in power, have constructed robust systems of social welfare to support conservative values. This course offers an analysis of the conservative welfare state with particular interest in public policies around social insurance, employment, the family, and immigration. The course traces the conservative welfare state's development from its origins in late nineteenth and early twentieth century corporatism, through the rise of Christian Democracy and the consolidation of conservative welfare regimes in continental Europe after World War Two, to its contemporary challenges from secularism, feminism, and neoliberalism. The course also investigates divergent conservative models in East Asia and Latin America as well as new 'illiberal' welfare states in contemporary Hungary and Poland. It concludes with a discussion of the prospects of right-populist politics in the United States.

Requirements/Evaluation: Two short papers, research paper proposal, every-class discussion questions, class participation.
Prerequisites: One course in Political Science
Enrollment Limit: 19
Enrollment Preferences: Juniors and seniors majoring in Political Science or Political Economy

PSCI 387 (S) The Firm

The rise of gigantic tech firms--Google, Apple, Facebook, Amazon--has sparked widespread worries about the role of business power in capitalist democracy. Are these firms monopolies? How can they be better regulated? Should they be? This course studies the politics of business by centering analysis on the firm. From the perspective of the workplace, we investigate the firm as an arena of power, where workers and managers meet each other in continuous contests for control. From the perspective of the public sphere, we investigate the firm as an actor whose power maps uneasily onto the channels of democratic representation. Approaching the firm as both arena and actor in a number of capitalist democracies, we will compare the politics of business across different sectors, but will focus especially on tech and finance.

Requirements/Evaluation: Class participation; two 5- to 7-page essays; one presentation; one final essay.
Prerequisites: One introductory course in political science or economics, and/or permission of the instructor.

PSCI 413 (S) Senior Seminar in American Politics: Polarized America

With red states and blue states, partisan divisions in Congress, and even disputes about wearing masks to protect against the coronavirus, few question the fact of a polarized America. But what is the polarization about and what caused it? Is it manufactured by a political elite using the rules of the game to maintain power while ignoring the concerns of the people? Is it a capitalist strategy to divide the public in order to advance the interests of the wealthy corporate elite? Does it reflect a polity divided by racial and ethnic tensions with different visions of the nation's past and future? Does it reflect increased inequality in a fast-changing global economy? How can a government of separated institutions operate and come to collective decisions given this discord? Can the framers' vision of deliberative, representative government meet the challenges of a polarized polity?

Requirements/Evaluation: class participation, weekly writing assignments, two short papers, final project

Prerequisites: At least one course in American politics

Enrollment Limit: 16

Enrollment Preferences: Seniors majoring in political science with concentration in American politics

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: PSCI American Politics Courses

PSCI 415 (S) Senior Seminar: The Rites of American Politics

Custom and tradition abound in American politics. As adherents of a political creed, we recite the Pledge of Allegiance before school and sing the Star-Spangled Banner before football. As wielders of political agency, we fashion signs to convey maxims with wit and devise chants to imbue marches with force. As skeptics of political officeholders, we observe the familiar patterns of grandstanding when legislators interrogate witnesses at committee hearings and the distinctive cadence of interruption when judges question advocates at oral arguments. As members of a political community, we fill out forms to pay into the coffers of governmental programs and wait in lines to secure the documents that confer governmental benefits. From the patriotic to the participatory, the performative to the pedestrian, our political acts -- shared with and repeated by others across our great national expanse each and every day -- are always more textured, more illuminating, and more consequential than we could possibly realize in the moment. But what, exactly, do they mean? And how, precisely, do they matter? Proceeding from the idea that these sorts of ubiquitous cultural practices are fundamentally and constitutively relevant for our politics, that they both reflect and instigate fissures and junctions in the political order, this course focuses, quasi-anthropologically, on the choreography of American politics -- the narrative mythology, visual symbolism, ceremonial rituals, linguistic tropes, and behavioral habits that sustain America as a polity and shape Americans as a people. Our interest is in the rites that attend not
only to our own citizenship but also to our very consciousness as political beings; our purpose is equally to identify, to interpret, and to investigate them.

Requirements/Evaluation: two 3-4 page essays, one 6-8 page mini research paper, an experiential project, a final portfolio of revised work accompanied by a 2-3 page reflection, and class participation

Prerequisites: senior standing in Political Science or permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: senior Political Science majors concentrating in American politics

PSCI 420 (F) Senior Seminar: The Nuclear Revolution

Cross-listings: LEAD 330

Primary Cross-listing

This is a course about international politics in the nuclear age. In broad terms, it focuses on a very basic question: Does international politics still work essentially the same way as it did in the prenuclear era, or has it undergone a "revolution," in the most fundamental sense of the word? The structure of the course combines political science concepts and historical case studies, with the goal of generating in-depth classroom debates over key conceptual, historical, and policy questions. The basic format of the course will be to combine very brief lectures with detailed class discussions of each session's topic. The course will begin--by focusing on the Manhattan Project--with a brief technical overview of nuclear physics, nuclear technologies, and the design and effects of nuclear weapons. The course will then examine the following subjects: the dropping of the atomic bombs on Japan; theories of the nuclear revolution; the early Cold War period; the development and implications of thermonuclear weapons; the Berlin and Cuban missile crises; nuclear accidents; nuclear terrorism and illicit nuclear networks; the future of nuclear energy; regional nuclear programs; preventive strikes on nuclear facilities; nuclear proliferation; and contemporary policy debates.

Requirements/Evaluation: class participation, three 8- to 10-page papers

Prerequisites: PSCI 202

Enrollment Limit: 15

Enrollment Preferences: Political Science major seniors with an International Relations concentration

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

PSCI 421 (F) Senior Seminar: The Liberal Project in International Relations

The most powerful actors in global politics are liberal ones, and a liberal project around democratic states, international law and organizations, and free trade dominates the global agenda. This course is an investigation into this global liberal project, engaging both theory and practice. We will discuss signature liberal theorists both classic and current as well as some of their most notable critics. We will also attend to empirical evaluations of signature liberal efforts around democratization, development, and human rights. The course ends with a discussion of the successes and failures of
the European Union as the principal embodiment of the liberal project today.

**Requirements/Evaluation:** 1-3 papers of 5-7 pages, short oral presentations, daily discussion questions, 12-15 page final paper, class participation

**Prerequisites:** senior Political Science major or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** senior Political Science majors concentrating in International Relations

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** PSCI International Relations Courses

Not offered current academic year

PSCI 423 (S) Senior Seminar: Humanitarianism (DPE)

Since the mid-1980s, humanitarianism has been one dominant attitude that powerful and privileged countries, organizations and people have adopted with regard to poverty or disaster elsewhere. Humanitarianism aims at rescue, striving to keep marginal people alive until some solution can be found. It aims not to address crises' causes nor to assist with solutions—which it considers political—just to keep human bodies alive. Critics contend that humanitarianism produces harm, provides structural incentives for people to do more or less than they need to, and deepens inequality between actors and targets. They contend that it legitimates a view of the status quo, in which such terrible things are bound to happen without real cause. This course confronts humanitarianism as an ideology through reading its defenders and critics, and as a political strategy assessing its usefulness, to whom.

**Class Format:** three students start class discussion every day; one reads a short (4-page) essay and two read shorter (two-page) essays

**Requirements/Evaluation:** three longer essays, six shorter essays, constructive participation

**Prerequisites:** PSCI 202 and at least one elective in international relations

**Enrollment Limit:** 16

**Enrollment Preferences:** Political science seniors then juniors; other seniors, then juniors

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course asks students to investigate the way that assumptions about superiority, and "helping practices" adopting those assumptions, can either reinforce or undermine unequal social and political outcomes and categories. We evaluate liberal and postcolonial (structural violence) models of international aid.

**Attributes:** PSCI International Relations Courses

PSCI 426 (F) The Arab-Israeli Conflict (WS)

The Arab-Israeli dispute receives more attention than arguably any other ongoing conflict in international politics, and for very good reason. The fact that it has lasted as long as it has--well over a century--been characterized by a remarkable (and depressing) degree of intensity; involved competing nationalisms, as well as different religions, cultures, and ethnicities; centered on territorial claims over land that is of special significance; and been connected to a number of important geopolitical questions, including ones involving great power competition, has made it a major focus of scholars of the Middle East, international relations analysts, and, of course, the general public. The issue is also of special interest, for a variety of reasons, in American political discourse. This seminar will examine the conflict in depth, beginning with its origins in the late nineteenth century, and ending with how it might run its course in the future. Specifically, the course will begin with an overview of the dispute's history and most salient aspects. Thereafter, it will cover Zionism and the Palestinian nationalist cause; the creation of the state of Israel and the 1948-1949 Arab-Israeli war; the June 1967 war; the debate, and controversy, over the "Israel lobby" in the United States; the October 1973 war and its aftermath; the road to the 1979 Egyptian-Israeli peace treaty; the arguably underappreciated role that nuclear weapons have played in the conflict; the rise and collapse of the Oslo peace process in the 1990s, as well as the outbreak of the Second Intifada in 2000; and the future of the dispute.

**Requirements/Evaluation:** class participation, three critical analytical essays, peer critiques/exchanges, final paper

**Prerequisites:** PSCI 120 and at least one other PSCI course from the international relations subfield
Enrollment Limit: 19
Enrollment Preferences: Political science majors, especially seniors, will be given priority for enrollment.
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (WS)
Writing Skills Notes: Students will need to do a large amount of analytical writing in this course, as well as critique and edit one another's papers. There will also be a component of the class that involves doing writing workshops.

PSCI 431  Senior Seminar in Political Theory: Rethinking the Political

What is politics? The question, an important part of political theory at least since Socrates, has taken on renewed significance in recent years, as theorists have sought to rethink the political in response to twentieth century dictatorships and world wars; feminist, queer, anti-racist, post- and decolonial struggles; the transformations wrought by neoliberal globalization; the emergence of “algorithmic governance”; the recent resurgence of populist nationalism; and deepening recognition of climate crises. This seminar engages some of the major attempts at rethinking produced in the 20th and 21st centuries, particularly at those that, characterizing liberalism as masking structures of subordination and elements of conflict in political life, undervaluing the importance of citizen action and public space, or being ill-suited to altered technological and ecological conditions, seek to rework or move beyond it. In addition to those who argue for an expanded and emancipatory conception of politics, we will consider arguments against politics as primary path to improvement or focus of commitment. Authors read may include Schmitt, Strauss, Rawls, Arendt, Wolin, Rancière, Brown, Connolly, Hartman, Sharpe, Moten, Wynter, Sexton, Edelman, Muñoz, Coulthard, Simpson, Lazzarato, Haraway, Latour.

Requirements/Evaluation: Regular, engaged class participation; short Glow posts; one 6-8 page paper; one 10-12 page paper
Prerequisites: Junior or senior standing and two or more theory courses or consent of instructor. Non-majors with theory interests and backgrounds are welcome
Enrollment Limit: 15
Enrollment Preferences: Juniors and seniors concentrating in political theory
Expected Class Size: 11
Grading:
Distributions: (D2)
Attributes: PSCI Political Theory Courses

Not offered current academic year

PSCI 432  (S) Senior Seminar: Critical Theory

This seminar focuses on the political thought of Herbert Marcuse, investigating the influences of leftist social movements of the 1960s on his critical theory. Marcuse famously supported the aims of student activism, feminism, black liberation movements and Third World anti-colonialism during that period, publicly affirming their efforts to integrate ethical idealism with concrete concerns for the economic wellbeing and political freedom of oppressed groups. Drawing on Freud, and challenged by his philosophical exchanges with Angela Davis, Marcuse came to the view that these movements were addressing not only material deprivations such as poverty and structural oppression, but also the effects of social alienation and a damaged psychic life. He saw these movements as successfully bridging the long-standing tension between the ideal elements of our humanity and the physical conditions for human existence (a tension represented in philosophy by the contrast between Kant and Marx). Yet he stopped short of identifying new social movements with the Marxist notion of a revolutionary class. Why this hesitation? Was his caution warranted? To provide a broader context for Marcuse's critical theory, we will read a selection of his writings alongside related texts by Kant, Marx, Freud, and Davis. Looking at but also beyond his political solidarity with the emancipatory movements of the 1960s, we will then consider how Marcuse's work can be placed in conversation with more recent critical theory, including ideas emerging from the Occupy Wall Street movement and feminist approaches to aesthetics and psychoanalytic theory.

Requirements/Evaluation: regular class participation, short (1 pg) response papers, and drafts leading up to a 15-page final essay
Prerequisites: junior or senior standing required; in addition, prior coursework in political theory, cultural theory, philosophy, or permission of

PSCI 433 (S) Senior Seminar: Dignity

Cross-listings: JLST 433

Primary Cross-listing

Discredited over the centuries by skeptics of many ideological persuasions, dignity has nevertheless remained central to the vocabulary of political protest movements from the left and the right. In the post-WWII period, dignity has also served as the grounding principle for international human rights conventions and national constitutions. But what is the meaning of dignity? Does dignity belong specifically to the human species, or is it equally the property of all living beings? If everybody, or perhaps everything, has its own dignity, what could the concept possibly add to our understanding of social relations, political processes, and legal judgments? Course readings will be as wide-ranging as the concept is broad. Some of our touchstones will be: Kant's moral philosophy, writings from the nineteenth-century abolitionist movement, Marxist theories of the dignity of labor, international human rights conventions, and court cases from Germany, Namibia, South Africa and the United States.

Requirements/Evaluation: Regular class participation, short (1 pg) response papers, and drafts leading up to a 15-page final essay.

Prerequisites: Junior or senior standing required; in addition, JLST concentration or prior coursework in political theory/cultural theory/philosophy.

Enrollment Limit: 12

Enrollment Preferences: Senior political science majors with concentration in political theory; JLST concentrators.

SEM Section: 01    TF 2:35 pm - 3:50 pm    Nimu Njoya

PSCI 440 (F) Settler Colonialism: What is it and what does it do?

What is "settler colonialism" and what does it do? We hear the term often, and it carries connotations -- usually of illegitimacy. But knowing that something is, or is supposed to be, bad does not tell us what it is. It does not tell us either whether or when a society that originated in what is called settler colonialism can outgrow its origins or whether it is forever defined by them. This course will consist of two parts. First, it will read several theoretical works on settler colonialism, identifying several key issues, and then will read a long account of the rise and fall of settler colonialism in Algeria. We will consider what settler colonialism is, what forms it comes in, and how it differs from other forms of colonialism, what prompts it, whether settlers, who usually are meant to be loyal to their colonial patrons remain loyal and when they shift to rebellion, and the nature of the colonial power (which is not always a state). We will also will consider the impact and responses of the prior populations. Do they choose to co-exist, co-operate, resist? And what does the imposition of settler colonialism do to their loyalties and collective identities? Do they retain their old identities or form new ones, and do the distinct groups that are amalgamated into the 'colonized' by natives become united or maintain earlier differences? Does their resistance build on their experiences with colonialism or does it revert to previous ways? And why does resistance almost always take the form of nationalism? The second part of the course will consist of a 25-page research paper on one aspect or another of the issue of settler colonialism. We will work together on how to define and refine a topic and how to pursue it. Students also will present the core of their paper to the class.
Authoritarian regimes are plentiful in the world today. Some appear durable and resilient; they are not simply transient political failures awaiting a breakthrough to democracy. This course will consider the history and contemporary experience of authoritarian regimes, beginning with political philosophical analyses of classical theorists such as Montesquieu, Moore, and Arendt. Attention then turns to how post-World War II authoritarianism has been understood from a variety of perspectives, including: the "transitions to democracy" approach; analysis of problems of authoritarian control and authoritarian power-sharing; and examination of "authoritarian reliance," among others.

Requirements/Evaluation: 3 papers of 5-7 pages, discussion leadership, oral report on an authoritarian regime of student's choice, class participation.

PSCI 494  (S) Senior Thesis Research and Writing Workshop
Reserved for and required of those students invited to continue in the honors program following the department's approval of their research proposal at the end of the fall semester seminar, the spring semester Senior Thesis Research and Writing Workshop provides a focused forum for the exchange of ideas among thesis writers, who will regularly circulate excerpts of their work-in-progress for peer review and critique. During this time, students will work primarily with their assigned faculty advisor, with the workshop leader's primary role becoming one of coordination, troubleshooting, and general guidance. Near the end of the semester, students will receive feedback on their complete draft from their advisor and two additional faculty readers selected by the workshop leader; following revisions, the final work—a roughly 35 page piece of original scholarship—will be submitted to and evaluated by a committee of faculty chosen by the department for the awarding of honors as well as presented publicly to the departmental community at an end-of-year collective symposium.

Requirements/Evaluation: a roughly 35 page piece of original scholarly work that will be submitted to an advisor and faculty readers and then revised in accordance with their feedback, peer review of other thesis writers' work-in-progress, public presentation at an end-of-year collective symposium
Prerequisites: PSCI 493 and departmental approval at the conclusion of that course

**Winter Study *******************************************************************************

**PSCI 14 (W) JA SelCom: A Case Study in Selection Processes**

As a member of SelCom (SELection COMmittee), you will become a cohort with current members of JAAB (the Junior Advisor Advisory Board) to select the next class of JAs. You will participate in every step of the JA application evaluation process -- reading written applications, conducting interviews, discussing applicants with SelCom, and deciding on the final makeup of next year's JA class. Every SelCom member will complete anti-bias training at the beginning of Winter Study; working through biases to make thoughtful evaluations is crucial to this process. This is a fantastic opportunity for students who want to take on a leadership role that requires critical thinking and collaboration. Your input will help to shape the entry system, the JA role, and the very essence of the Williams community in the coming school year. The SelCom schedule is roughly as follows (subject to change). SelCom will likely meet 4-5 days per week. Week 1: SelCom members will undergo anti-bias training and then spend the first week conducting interviews with applicants and cleaning transcripts to ensure readability. Week 2-3: The committee will discuss applications with identifying information blinded to help mitigate bias in the selection process. Week 3-4: SelCom will revisit applications with consideration given to the personal identity of each applicant. The committee will then extend offers to a select number of candidates. Members may reconvene at some point in the spring semester (after the initial round of JA offers have been accepted or rejected) to determine which applicants on the waitlist should receive offers.
If you are interested in serving on SelCom during winter study, you must fill out this application form by October 29 at 11:59pm:
https://docs.google.com/forms/d/e/1FAIpQLSeIDaCz1P2OhKnKBqlArAv8GPxdQXE0QIqWAWAJigayF95prQ/viewform. JAAB will decide which applicants will serve on SelCom and inform all applicants of their application status by the end of the day on Monday, November 3. SelCom applicants who are not selected to serve on SelCom will have until November 12 (winter study registration deadline) to enroll in another winter study course.

Requirements/Evaluation: Attendance and active participation

Prerequisites: Anyone wanting to register for the SelCom Winter Study class needs to fill out the application form.

Enrollment Limit: 25

Enrollment Preferences: Open to students who are in the classes of 2025, 2024.5, 2024, 2023.5, and 2023 AND who are not applying for the JA role for the 2023-2024 academic year.

Expected Class Size: NA

Grading: pass/fail only

Attributes: EXPE Experiential Education Courses

Not offered current academic year

PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits

This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors and members of the Political Science Department are available to help students find placements. Students can also email clia@williams.edu for the most up-to-date information. Students should then make their own contracts with the institution or agency. The student's fieldwork mentor should send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. Interested students should reach out to Paula Consolini at pconsoli@williams.edu by October 30th. A group meeting of all students will occur before winter study to prepare and after to discuss the experience. During winter study, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. Every year, course instructors arrange for some distinct sections of this course to provide specialized fieldwork opportunities in the area for small groups of students.

Requirements/Evaluation: A 10-page paper or comparable creative work such as a program or project design, video, webpage, or set of infographics.

Prerequisites: Interested students must complete the course interest form located at https://forms.gle/iXyDxFTd27Z9FkiMA or email CLIA Director Paula Consolini at clia@williams.edu before the Winter Study Course registration deadline.

Enrollment Limit: 25

Enrollment Preferences: Political science majors

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: Paula Consolini will co-teach.

PSCI 22 (W) LIFT: Learning Intervention for Teens

This mentorship-based course pairs Williams students with teenagers involved in the Berkshire County juvenile justice system, usually due to truancy. LIFT is an official Commonwealth of Massachusetts probation diversion program. Sponsored by Pittsfield Chief of Police Mike Wynn ’93 and Professor Cheryl Shanks, the course is entirely run on a day-by-day basis by Williams students who have served as mentors in the past. Williams students provide positive mentorship, helping the teens to envision, construct, and present an independent project of the teen’s choosing. Past topics have ranged from teen parenting to who is the best point guard, from the history of the quesadilla to the biological process by which the horned lizard shoots blood from its eyes. The project and other course activities aim to cultivate initiative, creativity, focus, and skills in areas such as goal-setting, research, and communication, and to show teens that school can empower them, and not just be another form of incarceration. The course culminates with a presentation in which each mentor/mentee pair formally presents their work to an audience that includes judges and probation officers in the juvenile
court system, state elected officials, chiefs of police, district attorneys, the teens’ peers and families, and faculty and community members. Williams students are expected to attend trainings, meet with their teens three times a week, co-facilitate a final presentation, and contribute to a common log detailing their meetings. Because LIFT is an after-school program, this course meets Tuesday through Thursday from 3:30-5:30pm. Williams students will additionally meet Mondays from 4:00 to 5:00 pm. Absences cannot be accommodated: the teens cannot be let down. Williams students will undergo training as well as a criminal background check prior to the start. To apply, please fill out this form: https://forms.gle/iWvi5fsuVPFLdpJE9 Also register on PeopleSoft. The student leaders, Aliza Cotton and Michael LesStrang, will select the applicants, with some advice from the dean’s office and course sponsors, and Professor Shanks will inform those who registered whether they were accepted.

Class Format: The group meets as a whole; additionally, pairs meet separately. At times this is in a classroom, at other times, the library or makerspace or studio.

Requirements/Evaluation: Successful mentorship throughout the term, contribution to the mentors' log, and final joint presentation.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Students will be evaluated based on a statement of application.

Expected Class Size: 10

Grading: pass/fail only

Unit Notes: Mike Wynn just retired as the Chief of the Pittsfield Police Department. He graduated from Williams in 1993.

PSCI 30 (W) Senior Essay: Political Science

Political Science senior essay.

Class Format: senior essay

Grading: pass/fail only

Not offered current academic year

PSCI 31 (W) Senior Thesis: Political Science

To be taken by students registered for Political Science 493-494.

Class Format: thesis

Grading: pass/fail only

Not offered current academic year

PSCI 32 (W) Individual Project: Political Science

To be taken by students registered for Political Science 495 or 496.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year

PSCI 33 (W) Advanced Study in American Politics

Class Format: independent study

Grading: pass/fail only

Not offered current academic year

PSCI 99 (W) Independent Study: Political Science

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a
faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
PSYCHOLOGY
(Div III, with some exceptions as noted in course descriptions)

Chair: Professor Noah Sandstrom

- Victor A. Cazares, Assistant Professor of Psychology; affiliated with: Psychology, Neuroscience; on leave 2023-2024
- Jeremy D. Cone, Associate Professor of Psychology
- Eliza L Congdon, Assistant Professor of Psychology
- Rebecca J. Crochiere, Assistant Professor of Psychology
- Susan L. Engel, Senior Lecturer in Psychology; Senior Faculty Fellow, Rice Center for Teaching; The Class of 1959 Director of Program in Teaching
- Yunshu Fan, Visiting Assistant Professor of Psychology
- Steven Fein, Professor of Psychology
- Alex Flores, Assistant Professor of Psychology; on leave Fall 2023
- Martin Forster, STINT - Research Scholar
- Cynthia Guo, Visiting Assistant Professor of Psychology
- Amie A. Hane, Professor of Psychology; affiliated with: Psychology, Public Health, Neuroscience; on leave Spring 2024
- Kris N. Kirby, Professor of Psychology
- Nate Kornell, Professor of Psychology, Chair of Cognitive Science Program; affiliated with: Psychology, Cognitive Science; on leave Fall 2023
- Jennifer McQuaid, Visiting Lecturer in Psychology
- Shivon A. Robinson, Assistant Professor of Psychology; affiliated with: Psychology, Neuroscience
- Marlene J. Sandstrom, Hales Professor of Psychology; on leave 2023-2024
- Noah J. Sandstrom, Chair and Professor of Psychology; affiliated with: Psychology, Neuroscience
- Kenneth K. Savitsky, Professor of Psychology
- Madison Sewell, Visiting Assistant Professor of Psychology
- Catherine B. Stroud, Professor of Psychology

MAJOR
For the degree in Psychology, students must complete a minimum of nine courses as outlined below:

- PSYC 101 Introductory Psychology
- PSYC 201 Experimentation and Statistics

Three 200-level courses from the list below:

- COGS/PHIL/PSYC 222 Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
- NSCI 201/BIOL 212/PSYC 212 Neuroscience
- PSYC 221 Cognitive Psychology
- PSYC 232 Developmental Psychology
- PSYC 242 Social Psychology
- PSYC 252 Psychological Disorders
- PSYC 272 Psychology of Education
Either PSYC 221 or 222, but not both, can count towards the three required 200-level courses.

Three 300-level courses from at least two of the areas listed below:

- Area 1: Behavioral Neuroscience (courses with middle digit 1)
- Area 2: Cognitive Psychology (courses with middle digit 2)
- Area 3: Developmental Psychology (courses with middle digit 3)
- Area 4: Social Psychology (courses with middle digit 4)
- Area 5: Clinical Psychology (courses with middle digit 5)
- Area 6: Other/Interdisciplinary Psychology (courses with middle digit 6)
- Area 7: Educational Psychology (courses with middle digit 7)

At least one of these courses must be from among those carrying the format designation Empirical Lab Course.

One 400-level Psychology course.

Students who place out of Psychology 101 are still required to take nine courses to complete the major.

The department recommends that students take Psychology 201 in their sophomore year. The department requires that 201 be completed by the end of the junior year.

**COURSE NUMBERING RATIONALE**

As is the case in all departments, the first digit of a Psychology course number indicates the relative level of the course. Where appropriate, the second digit corresponds to the Areas listed above.

**THE DEGREE WITH HONORS IN PSYCHOLOGY**

Students who are candidates for honors need only two 300-level courses from two different areas, but they must enroll in Psychology 493-W31-494 and write a thesis based on original empirical work. Presentation of a thesis, however, should not be interpreted as a guarantee of a degree with honors. Guidelines for pursuing the degree with honors are available from the department.

**STUDY ABROAD**

With some advance planning, studying abroad (especially for one semester) can easily be worked into the psychology major. To facilitate this, we recommend that students:

- Meet with the Study Abroad advisor as soon as they decide that they are interested in studying abroad.
- Take PSYC 201 (Experimentation and Statistics) in the sophomore year.

Think ahead to the 300-level courses they are interested in taking so that they can fulfill the 200-level prerequisites before they go away or, if possible, while they are away. In our experience, study abroad programs in the following places are most likely to offer psychology courses: England, Ireland, Scotland, Spain, Australia, New Zealand, Hawaii, and Scandinavia. Students should procure the descriptions of the psychology courses they are considering taking and bring them to their meeting with the advisor.

There are some costs to studying away, particularly for the year. This limits students’ opportunity to choose the particular 300-level courses they would like to take and they must sometimes settle for those that are open, those which happen to be offered, or those for which they have the prerequisites, once they return in their senior year. Many students who are keen on psychology begin doing research with professors during their junior year, and for some this leads to an honors thesis in the senior year, summer research, etc. If you are going away for the entire year and do not make such connections with a professor ahead of time (i.e., before you go), you may lose out on some of these opportunities to deepen your involvement in the major on campus. On the other hand, studying abroad can be an invaluable learning experience, so you need to think carefully, in consultation with your advisor and/or the Study Abroad advisor, about the costs and benefits of it. Very occasionally, a student who just begins taking psychology courses late in the sophomore year and wishes to go abroad for the year finds that they are not able to do both, or is restricted in the choice of study-abroad programs.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**
Course title and description, complete syllabus, including readings/assignments, and exams or other written work. In addition, the course content cannot overlap substantially with material already taken at Williams.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Students are required to take at least one empirical project course (which includes a lab component and data collection). This must be completed at Williams.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. The empirical project course must be completed here (see answer to previous question above). Other major requirements that must be completed here are the Senior Seminar and our Statistics and Experimentation course (PSYC 201). On very rare occasions students have been given credit for PSYC 201 taken elsewhere, but this is extremely unlikely. Most institutions break the material up into two different courses, or don’t include all of the components that we feel are an important foundation for the major.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Students should be sure that have taken PSYC 201 PRIOR to their senior year at the latest. It is best to take it during sophomore year whenever possible.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

There have been instances.

PSYC 100  (W)  Intensive: Social Psychology
A survey of theory and research in social psychology. Topics include conformity, group dynamics, stereotyping and prejudice, aggression, altruism, attraction and love, the self, social perception, attitudes and attitude change, and cultural psychology. Applications in areas such as advertising, law, economics and business, and politics will also be discussed.

Requirements/Evaluation: two in-class exams, one paper (5 pages), and a final exam
Prerequisites: permission of a dean
Enrollment Limit: 25
Enrollment Preferences: students who need to make up a deficiency
Expected Class Size: NA
Grading: no pass/fail option, no fifth course option
Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar’s Office will register students in PSYC 100 and PSYC 40.
Distributions: (D3)
Not offered current academic year

PSYC 101  (F)(S)  Introductory Psychology
An introduction to the major subfields of psychology: behavioral neuroscience, cognitive, developmental, social, and psychological disorders and treatment. The course aims to acquaint students with the major methods, theoretical points of view, and findings of each subfield. Important concepts are exemplified by a study of selected topics and issues within each of these areas.

Class Format: Lectures will be presented during the scheduled time. To complement the lectures, students will participate in two short discussions/laboratory experiences that will be offered at a variety of times outside the lecture period.

Requirements/Evaluation: five unit quizzes, a final exam, and two brief lab reports (or related brief reports, depending on the availability of labs)
Prerequisites: none
**Enrollment Limit:** 180  
**Enrollment Preferences:** First-year students and sophomores  
**Expected Class Size:** 180  
**Grading:** yes pass/fail option, yes fifth course option  
**Distributions:** (D3)  
**Attributes:** NSCI Required Courses  TEAC Teaching Sequence Courses

**PSYC 127 (S) The Psychology of Success (WS)**

This course will examine the psychology of success from a scientific perspective. After considering what success means, we will examine two broad influences on success: personality (e.g., intelligence, grit, and mental illness) and environment (e.g., schooling, parenting, and practice). We will talk about barriers to success, the search for success, and the cost of searching for success. Each week we will read a book or a set of articles (or possibly documentaries or podcasts). One partner will write a paper and the other will write a response. This course is not meant to make you more successful; the goal is to think critically about important issues, use evidence to make arguments, be skeptical, and practice writing and speaking in a convincing and engaging way.

**Requirements/Evaluation:** written work and discussion of that work; a five-page paper will be due every other week and a one-page response will be required other weeks  
**Prerequisites:** none

### Not offered current academic year

**PSYC 201 (F)(S) Experimentation and Statistics (QFR)**

An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret results, and write research reports. Students conduct a series of research studies in different areas of psychology that illustrate basic designs and methods of analysis. You must register for lab and lecture with the same instructor.

**Requirements/Evaluation:** research reports, exams, and problem sets  
**Prerequisites:** PSYC 101; not open to first-year students except with permission of instructor

### Not offered current academic year

**Attributes:** COGS Related Courses  PHLH Statistics Courses
PSYC 212 (F) Neuroscience

Cross-listings: BIOL 212 / NSCI 201

Secondary Cross-listing

This course is designed to give an overview of the field of neuroscience progressing from a molecular level onwards to individual neurons, neural circuits, and ultimately regulated output behaviors of the nervous system. Topics include a survey of the structure and function of the nervous system, basic neurophysiology and neurochemistry, development, learning and memory, sensory and motor systems, and clinical disorders. Throughout the course, many examples from current research in neuroscience are used to illustrate the concepts being considered. The lab portion of the course will emphasize a) practical hands-on exercises that amplify the material presented in class; b) interpreting and analyzing data; c) presenting the results in written form and placing them in the context of published work; and d) reading and critiquing scientific papers.

Requirements/Evaluation: Evaluation will be based on participation in discussion groups, exercises, problem sets and quizzes performed in small groups, lab reports, midterm exams, and a final exam.

Prerequisites: PSYC 101 or BIOL 101; open to first-year students only with permission of instructor

Enrollment Limit: 72

Enrollment Preferences: Sophomores and Biology and Psychology majors

Expected Class Size: 72

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 212(D3) NSCI 201(D3) PSYC 212(D3)

Attributes: COGS Interdepartmental Electives NSCI Required Courses PSYC 200-level Courses

PSYC 221 (S) Cognitive Psychology

This course surveys research on human cognition. Topics include perception, attention, learning, memory, categorization, language, judgment, decision making, reasoning, and problem solving.

Requirements/Evaluation: Three essay exams

Prerequisites: PSYC 101 or permission of instructor
Enrollment Limit: 50
Enrollment Preferences: Psychology majors
Expected Class Size: 50
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)
Attributes: COGS Interdepartmental Electives  PSYC 200-level Courses  TEAC Teaching Sequence Courses

Spring 2025
LEC Section: 01    MR 2:35 pm - 3:50 pm     Kris N. Kirby

PSYC 222  (F) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
Cross-listings: PHIL 222 / COGS 222

Secondary Cross-listing
This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.
Requirements/Evaluation: midterm and final exams, and weekly exercises
Prerequisites: PSYC 101 or any PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended.
Enrollment Limit: 25
Enrollment Preferences: sophomore and first-year students, with additional preference given to students who satisfy more of the prerequisites. Do not contact the instructor to plead for special enrollment consideration.
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 222(D2) PSYC 222(D3) COGS 222(D2)
Attributes: Linguistics  PHIL Contemp Metaphysics + Epistemology Courses  PSYC 200-level Courses

Fall 2024
LEC Section: 01    TR 11:20 am - 12:35 pm     Joseph L. Cruz

PSYC 232  (F)(S) Developmental Psychology
An introduction to the study of human growth and development from conception through emerging adulthood. Topics for discussion include prenatal and infant development, perceptual and motor development, language acquisition, cognitive development, and social and emotional development. These topics form the basis for a discussion of the major theories of human development, including those about early experience, neural plasticity, dynamic systems, information processing, social learning, attachment, parenting, and family systems.
Requirements/Evaluation: attendance and active class participation, 3 exams (2 midterms and final), and regular writing assignments
Prerequisites: PSYC 101
Enrollment Limit: 50
Enrollment Preferences: Preference will be given to sophomores and junior psychology majors and senior psychology majors who still need to fulfill a 200-level requirement.
Expected Class Size: 50
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)
PSYC 242  (F)(S)  Social Psychology
A survey of theory and research in social psychology. Topics include conformity, group dynamics, stereotyping and prejudice, aggression, altruism, attraction and love, the self, social perception, attitudes and attitude change, and cultural psychology. Applications in areas such as advertising, law, economics and business, and politics will also be discussed.

Requirements/Evaluation: two in-class exams, one paper (5 - 10 pages), and a final exam
Prerequisites: none
Enrollment Limit: 50
Enrollment Preferences: Psychology majors with fewer than three 200-level courses will receive priority followed by sophomores.
Expected Class Size: 50Fa/140Sp
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)
Attributes: PSYC 200-level Courses  TEAC Teaching Sequence Courses

PSYC 252  (F)(S)  Clinical Psychology
A study of the phenomenology, etiology, and treatment of psychopathology: depression, bipolar disorder, the schizophrenias, anxiety disorders, personality disorders, eating disorders, substance use disorders, and other health-related issues. The course emphasizes an integrative approach which analyzes theories and research from psychological, biological, interpersonal, and sociocultural perspectives.

Class Format: In the Fall semester, class will only meet 2 of the 3 possible days each week, determined by the instructor.
Requirements/Evaluation: short papers, 2 in-class exams, and participation
Prerequisites: PSYC 101 or 5 on the AP Psychology test; open to first-year students
Enrollment Limit: 50
Enrollment Preferences: Psychology majors, then sophomores, then by seniority
Expected Class Size: 50
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)
Attributes: PHLH Methods in Public Health  PSYC 200-level Courses

PSYC 272  (S)  Psychology of Education
This course introduces students to a broad range of theories and research on education. What can developmental research tell us about how children learn? What models of teaching work best, and for what purposes? How do we measure the success of various education practices? What is the best way to describe the psychological processes by which children gain information and expertise? What accounts for individual differences in learning, and how do teachers (and schools) address these individual needs? How do social and economic factors shape teaching practices and the educational experiences of individual students? The course will draw from a wide range of literature (research, theory, and first-hand accounts) to consider key questions in the psychology of education. Upon completion of the course, students should be familiar with central issues in pre-college education and know how educational research and the practice of teaching affect one another.

**Class Format:** discussion

**Requirements/Evaluation:** two exams and a final project

**Prerequisites:** PSYC 101

**Enrollment Limit:** 50

**Enrollment Preferences:** Psychology majors and those who plan to become teachers

**Expected Class Size:** 50

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

---

**PSYC 312 (S) From Order to Disorder(s): The Role of Genes & the Environment in Psychopathology**

**Cross-listings:** NSCI 322

**Primary Cross-listing**

This course examines how experimental methods in neuroscience can be used to understand the role of nature (genes) and nurture (the environment) in shaping the brain and behavior. In particular, we will explore how neuroscience informs our understanding of psychiatric disorders such as anxiety, depression, and schizophrenia. We will investigate the biological underpinning of these disorders as well as their treatments. Readings will include human studies as well as work based on animal models. Topics will include: the ways in which environmental and genetic factors shape risk and resiliency in the context of psychiatric disease, the neural circuits and peripheral systems that contribute to psychopathology, and the mechanisms through which interventions may act. In the laboratory component of the course, students will gain hands-on experience in using animal models to study complex behavior and their associated neural mechanisms.

**Requirements/Evaluation:** class presentations, participation in discussions, project proposal (5 pages), empirical project paper (5-7 pages), poster and poster presentation, participation in all phases of the empirical project research experience (experiment design, data collection, data graphing, data analysis) including oral and written presentation of key findings.

**Prerequisites:** PSYC 212 (same as BIOL 212 or NSCI 201)

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors and Neuroscience concentrators

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**LAB Section: 02** W 1:00 pm - 4:00 pm  Victor A. Cazares

**PSYC 313 (F) Opioids and the Opioid Crisis: The Neuroscience Behind an Epidemic**
Opioid misuse, including addiction, has emerged as a major health epidemic in the United States. This course will explore the science of opioids as well as the historical and societal context surrounding their use. We will examine the neurobiological mechanisms through which opioids interact with pain pathways and reward circuits within the brain and we will explore how changes in these systems contribute to opioid tolerance, dependence, and addiction. We will consider how genetic, environmental and behavioral factors can powerfully influence these processes. Finally, we will consider alternative approaches to pain management as well as interventions for the treatment of opioid use disorder. Critical evaluation of peer-reviewed primary literature from animal and human studies will serve as a foundation for class discussions. Evaluation will be based on class presentations, participation in discussions and written assignments.

Requirements/Evaluation: class presentations, participation in discussions, three position papers (approximately 2 pages double-spaced), an APA style literature review (approximately 5-7 pages double-spaced), a research proposal (approximately 5-7 pages double spaced) and an oral presentation of the project proposal.

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)

Enrollment Limit: 19

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Fall 2024

SEM Section: 01 MR 2:35 pm - 3:50 pm Shivon A. Robinson

PSYC 314 (S) Learning and Memory in Health and Disease

This class will examine the neuroscientific basis of different types of learning and memory (such as declarative memory, motor memory, and associative memory), including the brain circuits, cellular mechanisms, and signaling pathways that mediate these different processes. In addition, we will explore how these processes can be disrupted in different diseases and disorders (such as Alzheimer's disease or post-traumatic stress disorder) and we will discuss the strategies and targets for therapeutic intervention. Class meetings will include a mix of lectures, discussions, and student presentations. Critical evaluation of peer-reviewed studies involving both human and animal models will serve as a foundation for class discussions. Working in small teams, students will also design and conduct an empirical project related to the course material.

Requirements/Evaluation: In-class presentations and participation in discussions, completion of an empirical research project which will include a project proposal (3-5 pages), data collection and analysis, and a final report (10-20 pages) along with a poster presentation.

Prerequisites: PSYC 212/NSCI 201/BIOL 212

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
NSCI 314(D3) PSYC 314(D3)

Not offered current academic year
Humans are constantly making decisions: big and small, conscious and unconscious. This seminar will explore different aspects of the decision-making process, including (1) the algorithms for decision-making, (2) the neurological basis of decision-making and (3) the psychological, social, and physiological factors that influence our decision-making. We will examine how scientific approaches can help us understand complex social issues related to decision making. For example: how can stereotypes be understood as a failure in belief updating; how does confirmation bias lead to partisanship; and how to think of xenophobia from the "explore-exploit trade-off" perspective? In this course, we will explore how the brain and its neural networks contribute to these phenomena. The laboratory component of the course will introduce the research tools for studying different aspects of decision-making, including experimental paradigms, computational models and methods of analysis. Students will apply these tools to collaboratively design and conduct behavioral experiments and will analyze neural recording data to understand the relationship between neural activity and decision-making behaviors. Over the course of the semester, students will have the opportunity to develop skills in computer programming to better understand computational models and data analysis.

**Requirements/Evaluation:** Class presentations, participation in discussions, keeping a decision journal, short response papers and laboratory assignments, participation and presentation of empirical laboratory studies.

**Prerequisites:** PSYC 212 (same as BIOL 212 or NSCI 201) or permission of instructor.

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors, Neuroscience concentrators, and Cognitive Science concentrators

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

---

**Neuroethics** (WS)

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

**Requirements/Evaluation:** six 5-page position papers and five 2-page response papers as well as participation in discussions

**Prerequisites:** PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Psychology majors and Neuroscience concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**PSYC 319(D3) STS 319(D2) NSCI 319(D3)**

**Writing Skills Notes:** In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will
choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

PSYC 326 (S) Choice and Decision Making

Despite the impression many people have, we really are amazingly good decision makers most of the time. Even so, we do make mistakes; occasionally we even make choices that we know are likely to turn out badly for us. In this course we will survey theoretical and experimental approaches to understanding both our strengths and weaknesses as decision makers. Topics include adaptive rationality, the debate over cognitive biases, fast and frugal heuristics, impulsivity and self-control, addictions and bad habits, paternalism, and moral decision making.

Requirements/Evaluation: problem sets, essay papers, and class participation

Prerequisites: PSYC 221 or 222 or permission of instructor; permission is typically given to students who have successfully completed ECON 110

Enrollment Limit: 19

Enrollment Preferences: senior Psychology majors who need the course to fulfill the major

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)

Spring 2025

SEM Section: 01 MR 1:10 pm - 2:25 pm Kris N. Kirby

PSYC 327 (S) Cognition and Education

This class will examine two interrelated topics in education. One is societal issues in schooling, such recruiting teachers, tracking, international differences, and fads. The other is principles in the cognitive psychology of learning, such as metacognition, spacing effects, and retrieval practice, that can be used to enhance learning. Most of the readings will be scientific articles.

Requirements/Evaluation: Daily quizzes, student presentations, empirical research papers, an essay, and class participation

Prerequisites: PSYC 221 or 222

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

PSYC 332 (S) Children's Mathematical Thinking and Learning

Are babies statistical experts? Will I ever be good at calculus? What are we born with and what do we learn? Before children are ever taught formal mathematics in a classroom, they are confronted with situations where they must use their informal understanding of geometry, space, and number to successfully navigate their environments. In this course we read and discuss both foundational and cutting-edge articles from neuroscience, cognitive
science, education, and psychology to understand how humans bridge this gap between the informal and formal mathematical worlds. We will also tackle questions such as: How do culture and language affect numerical understanding? What are the sources of children's mathematical misconceptions? What are the effects of early environmental input or input deprivation on mathematical development? What do we know about gender differences in math achievement? How do stereotypes, prejudice, and math anxiety affect math performance? For your laboratory component, you will work with a small group of other students to develop an original research project that tests a specific hypothesis about children's mathematical thinking and learning. Data will be collected either online or in community schools, with the permission of parents, teachers, and children. Your results will be written-up in your final paper, which will be in the style of an empirical journal article.

Class Format: community-based data collection in local schools
Requirements/Evaluation: class participation, discussion leader, weekly open-notes reading quizzes, individual 12- to 15-page final paper based on empirical group research project
Prerequisites: PSYC 201 and PSYC 232 or permission of the instructor
Enrollment Limit: 16
Enrollment Preferences: Psychology majors, upperclassmen, students with a demonstrated interest in the course material

PSYC 335 (F) Early Experience and the Developing Infant
The period from conception to age three is marked by impressive rapidity in development and the plasticity of the developing brain affords both fetus and infant an exquisite sensitivity to context. This course delves into the literature that highlights the dynamic interactions between the developing fetus/infant and the environment. The course readings span a range of disciplines and cover a diversity of hot topics in the study of prenatal and infant development, including empirical research drawn from the developmental, neuroscience, psychopathology, and pediatric literatures.

Requirements/Evaluation: active class participation, weekly three-page papers, two oral presentations (20 minutes each and using PowerPoint), a midterm, and one final 12-15 page paper
Prerequisites: PSYC 201, PSYC 212, and PSYC 232 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Psychology majors and Neuroscience concentrators

PSYC 336 (S) Identity Development in Adolescence and Young Adulthood
Who am I? How do others see me, and how do I want them to see me? What are my core values? Who do I want to become? These questions underlie what some theorists consider to be the fundamental developmental task of adolescence and young adulthood: Identity development. In this course, we will read and discuss the theoretical and empirical literature to understand how adolescents and young adults develop a unique, multifaceted sense of self. We'll explore how the biological, cognitive, and social transitions of this period prompt the development of identity. We'll also emphasize the role of family, peers, school, social media, and youths' own agency in informing their identity development. Special attention will be paid
to the topics of gender identity, racial and ethnic identity, sexual orientation, and personality.

Requirements/Evaluation: class participation, serving as discussion leader several times during the semester, one-page response papers due every class, one 5-7 page essay, individual 10-12 page research proposals, research proposal presentation

Prerequisites: PSYC 232 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Psychology majors

PSYC 338 (S) Inquiry, Invention and Ideas

Children tinker, explore and create, but some more than others, and under some conditions more than others. What leads children to investigate, invent and build their own ideas? We will examine the development of curiosity, invention, and the ability to have or construct an idea. We will also look at what accounts for individual differences between children, including the role of intelligence, creativity, social cues, and opportunity. We will look at how these processes unfold at home and in school, and discuss the educational implications of the research we read, and the research we conduct.

Requirements/Evaluation: three 3- to 5-page thought papers, one empirical project, and a final journal-style paper reporting on your research.

Prerequisites: PSYC 101, and PSYC 232 or PSYC 272, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: preference given to Psychology majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

PSYC 341 (F) The Social Psychology of Prejudice

Cross-listings: WGSS 339

Primary Cross-listing

This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people’s perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider sources of prejudice and processes through which it is maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education, sports, and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.

Class Format: empirical lab course

Requirements/Evaluation: weekly brief papers, oral reports, two longer papers

Prerequisites: PSYC 201 and 242

Enrollment Limit: 16

Enrollment Preferences: senior, then junior Psychology majors
Expected Class Size: 16
Grading: yes pass/fail option, yes fifth course option

PSYC 342 (F) Social Judgment
This course focuses on how people make judgments and decisions in their social lives and why they are sometimes biased and irrational in their choices. We will place a strong emphasis on exploring how ideas from the judgment and decision-making literature can aid in our understanding of social psychological phenomena, including planning for the future, understanding other people, and resolving interpersonal conflicts. We will also place an emphasis on people’s judgments and decisions as they pertain to their happiness and well-being, exploring how concepts in the judgment and decision-making literature can help us to understand why certain types of outcomes are more satisfying than others and why people sometimes choose in ways that fail to maximize their well-being. As we explore these questions, we will survey a variety of methods and perspectives, ranging from classic social psychological experiments to techniques imported from behavioral economics and cognitive psychology.

Requirements/Evaluation: a series of short papers; written and oral report of a research proposal
Prerequisites: PSYC 242 and PSYC 201, or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Psychology majors
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

PSYC 344 (S) Contemporary Social Psychology
This course surveys recent and cutting-edge findings published in social psychology in the last few years--research that builds on old classics, as well as research that opens up new lines of inquiry. We’ll consider the latest research in each of the major subareas of social psychology (social influence, social cognition, and social relations). We’ll also consider recent applications of social psychological thinking in law, business, health, and well-being. Throughout the course, we’ll think about not just new ideas and new content areas but also about new methods and scientific approaches, modern data analytic strategies, and novel data sources (such as behavior on social media or linguistic analyses of text).

Requirements/Evaluation: a series of papers; written and oral reports of research
Prerequisites: PSYC 242
Enrollment Limit: 16
Enrollment Preferences: Psychology majors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Attributes: PSYC Area 4 - Social Psychology PSYC Empirical Lab Course
**PSYC 345  (S)  Psychology and Politics**

This course will explore the field of political psychology primarily from a social psychological perspective, though also from a political science perspective. The goal of this course is to develop an understanding of how people's personalities, identities, and social contexts shape their political attitudes and behavior. Topics will include polarization, partisanship, political engagement, authoritarianism and belief in conspiracy theories, stereotyping and prejudice, media effects, and emotion. Throughout the course, we will consider the relationship between psychology and our political institutions. We will evaluate how psychology can be used to help our institutions better embody democratic values and, conversely, how it has been used to further anti-democratic actions as well.

**Requirements/Evaluation:** Class participation, weekly reaction papers on course readings (1-2 pages), constructive participation in the empirical research project, independent write-up of the research project (10-20 pages), poster/oral presentation of the project.

**Prerequisites:** PSYC 201 and PSYC 242 or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3)

**Attributes:** PSYC Area 4 - Social Psychology  PSYC Empirical Lab Course

---

**PSYC 346  (F)  Environmental Psychology**

**Cross-listings:** ENVI 346

**Primary Cross-listing**

This is a course on contemporary social psychology as it pertains to the natural environment. Our two primary questions in this course are: (1) how can research and theory in social psychology help us understand the ways in which people engage with threats to the natural environment?, and (2) how can social psychology help us encourage environmentally responsible behavior and sustainable practices? Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of environmental solutions.

**Requirements/Evaluation:** a series of papers, two essay exams, written and oral reports of research

**Prerequisites:** PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

**Enrollment Limit:** 19

**Enrollment Preferences:** Psychology majors, Environmental Studies majors, and Environmental Studies concentrators

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

**PSYC 351  (F)  Clinical Neuropsychology**
Clinical neuropsychology is a fascinating interdisciplinary subfield within clinical psychology that investigates the relationship between brain functions and behavior, including emotions and cognition. In this course, we will consider different cognitive functions, as well as an array of pediatric and adult neurological disorders, such as epilepsy, Parkinson's disease, stroke, and traumatic brain injury. Course goals include understanding the behavioral and cognitive characteristics associated with disorders and their underlying biology, how assessment tools are used in the diagnostic process, and how interventions may be implemented to improve function. To achieve these goals, we will discuss case studies and research articles, and we will take a hands-on approach by learning how to administer and interpret neuropsychological tests, paying particular attention to their strengths, limitations, and generalizability. We will also explore how neuropsychological test results can inform clinical interventions. Throughout these discussions, we will consider the ethical issues associated with neuropsychological testing and intervention.

Class Format: Class will only meet 2 of the 3 possible days each week, determined by the instructor.

Requirements/Evaluation: Attendance and active participation in class and online discussions, three 2-page papers with peer review, one group project/presentation, one final case report (5-7 pages)

Prerequisites: PSYC 201 and PSYC 252 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Psychology majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Attributes: NSCI Group C Electives PSYC Area 5 - Clinical Psychology

Not offered current academic year

PSYC 353 (F) Family and School-Based Interventions

The development of child psychopathology is influenced by a complex interplay of factors related to the individual (e.g., genetic risk), the family (e.g., instances of abuse), the school environment (e.g., incidents of bullying), and the broader context (e.g., socioeconomic factors like poverty). In comparison to adults, the manifestation of symptoms in children and adolescents is more directly linked to their immediate surroundings. Consequently, interventions primarily centered around the family and school settings are commonly employed in the prevention and treatment of psychological and behavioral issues. Throughout this course, we will delve into the associations between risk and protective factors from various settings and the emergence of externalizing and internalizing symptoms in children and adolescents. A comprehensive examination of the role of parenting and family dynamics in the origins of disorders in children will be undertaken. Our discussions will also encompass a spectrum of practical and ethical considerations associated with working with children and families. The objectives of this course include gaining an enhanced understanding of crucial risk and protective factors, exploring how such knowledge can be applied at the individual, family, and population levels, and grasping the utilization of behavior analysis and case conceptualization as tools for crafting precise and effective interventions for children and adolescents. To accomplish these objectives, we will analyze case studies and research articles, adopting a hands-on approach to applying knowledge of risk and protective factors in both assessment and intervention design. Emphasis will be placed on addressing the myriad practical and ethical challenges linked to working with children and families during these discussions.

Requirements/Evaluation: Attendance and active participation in discussions, two 5-7 page written papers, and one group project/presentation.

Prerequisites: PSYC 201 and PSYC 252 or permission of instructor.

Enrollment Limit: 19

Enrollment Preferences: Psychology majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Fall 2024

SEM Section: 01 TR 9:55 am - 11:10 am Martin Forster

PSYC 354 (F) Health Psychology
In this course, students will contrast the traditional biomedical model of health with the biopsychosocial model of health with a goal of understanding how biological, psychological, and sociocultural factors influence health and well-being. We will explore psychological theory and research that targets health promotion, disease prevention, and management of chronic illness. Course readings will include empirical articles, excerpts from popular science books, and news/media articles on public health issues. Discussions will center on using the biopsychosocial model to better understand health processes (e.g., stress, substance use, physical inactivity) and outcomes (e.g., insomnia, diabetes, heart disease), with a special focus on health disparities among historically disadvantaged groups in the United States. Students also will learn about cognitive, behavioral, and mindfulness-based treatments ("behavioral medicine") that promote healthy behavior and the management of chronic illness/disease (e.g., pain, HIV/AIDs, cancer). All students will design and conduct an empirical research project based on the course material.

Requirements/Evaluation: class presentations, reading responses, participation in class discussions, completion of an empirical project, APA-style empirical paper (10-20 pages double-spaced) and poster/oral presentation of the empirical project.

Prerequisites: PSYC 201 and PSYC 252, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

PSYC 355 (S) Psychotherapy: Theory and Research

Psychotherapy is young. Barely 100 years old, it is a psychological endeavor that attempts to promote change and healing through social interaction. How does talking with a psychotherapist facilitate change -- emotionally, cognitively, behaviorally? How exactly does psychotherapy help people achieve relief from psychological disorders and other identified problems? In this course, we will study some of the key modalities of psychotherapy by examining the theories and scientific research that surround them. We will also examine the sociocultural and political contexts in which these approaches evolved. We will engage in close reading and critical analysis of primary source theoretical papers, the "raw data" (videotapes and transcripts) of therapy sessions, case studies, and contemporary empirical research on the outcomes and change processes of psychotherapy. Students will learn how to evaluate the efficacy claims of both standard and new therapies and about the mechanisms by which those therapies work. Current controversies in psychotherapy and psychotherapy research will be addressed and debated as well. All students will design and conduct an empirical research project based on the course material.

Requirements/Evaluation: attendance and active class participation, daily writing responses of 5-10 sentences related to course readings, 5 thought papers (2-3 pages in length), 2 small group oral presentations, and a 10-15 page final empirical project

Prerequisites: PSYC 201 and PSYC 252

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

PSYC 356 (F) Asylum: Understanding the Psychological Effects of Persecution, Trauma, and the Migration Experience

Asylum is a specific form of humanitarian relief granted to an individual who can legally establish a history of previous persecution, or fear of future persecution, on account of their race, religion, nationality, political opinion, or membership in a particular social group. What are the psychological effects of being physically and emotionally persecuted because of who you are, what you believe, and/or your identity? Using the framework of
asylum, we will study the effects of persecution, loss, and displacement on mental health and well-being, and the psychological impacts of traumatic stress and of seeking asylum in the United States. Through close reading of empirical studies, case studies, narratives, and legal writing, we will consider the psychological outcomes most frequently reported by asylum seekers, as well as the effects of traumatic stress on attachment and interpersonal relationships, family functioning and the capacity for recovery and post-traumatic growth. We will explore various types of persecution (e.g., gender-based violence, gang-violence, political persecution, and family separation) and their global health context. Finally, we will examine the social determinants, legal frameworks, and social justice implications of therapeutic interventions and resettlement. Students will also explore the clinical literature on psychological outcomes and how this research is informing both psychotherapy and social service interventions in the US and humanitarian settings across the globe. Guest speakers will punctuate our time over the semester, so that students can understand the role of lawyers, clinicians (medical and psychological) and global mental health researchers in addressing issues of forced displacement.

Requirements/Evaluation: Attendance and active participation, weekly reaction exercises (brief papers and presentations), and a final paper on an asylum-related topic of particular interest to the student.

Prerequisites: PSYC 252 is encouraged but not required. Students who have not taken PSYC 252 are encouraged to contact the instructor.

Enrollment Limit: 19

Enrollment Preferences: Psychology majors will have priority, but non-majors with interests in issues of asylum are encouraged to register.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

PSYC 357  (F)  Clinical Psychology & Social Justice: Centering Marginalized Perspectives  (DPE)

In this course, students will evaluate the critical question of whether and how clinical psychology can address mental health disparities and promote social justice. Students will gain a substantive understanding of research and theory examining psychopathology, including historical perspectives, expression and conceptualization of psychopathology, etiological theories from varied disciplines, and intervention and prevention strategies. We will take a liberation psychology and intersectional approach to examine the ways in which various intersecting systems of oppression and privilege shape the mental health and lived experiences of individuals and communities. Throughout the course, we will center topics and people that have been epistemically excluded from the field of clinical psychology. Topics such as racism, discrimination, resistance, pride, collective care, and queer affirming interventions will be addressed and the voices of those with marginalized identities (for example, due to their race, ethnicity, gender identity, sexual orientation, immigration status) will be highlighted. Students will evaluate current research and theory with attention to bias, inequities, methodological rigor, and potential usefulness for promoting social justice, through prevention, intervention, and policy.

Requirements/Evaluation: Course requirements include: a) reading empirical articles; b) participating in class discussions; c) completing daily assignments; d) a 2-page research proposal (double-spaced); e) conducting a research project in a small group; f) a short presentation on a student-selected topic and reading; and g) a final research paper based upon the small group research project (approximately 15 double-spaced pages).

Prerequisites: PSYC 201. PSYC 252 recommended.

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)  (DPE)

Difference, Power, and Equity Notes: Students will examine how clinical psychology can address mental health disparities & promote social justice. To do so, students will: use scientific reasoning & quantitative skills to critically examine how intersecting systems of oppression and privilege shape the mental health of individuals & communities; evaluate research and theory with attention to bias, inequities, and usefulness for promoting social justice; and conduct a research project using socially just research practices.

Attributes: PSYC Area 5 - Clinical Psychology  PSYC Empirical Lab Course
**PSYC 358 (S) Developmental Psychopathology: Trajectories of Risk and Resilience**

Why do some youth develop psychopathology in the face of adversity whereas others do not? How do we define psychological disorders in youth? Is resilience a static trait, or can it be promoted? How do we prevent youth from developing psychopathology? In this course, students will address these and other questions using a risk and resilience framework that examines the interactions among multiple risk and protective factors in the pathway to psychopathology. Specifically, students will examine the interactions between individual characteristics (e.g., neurobiological, interpersonal, cognitive, and emotional factors) and environmental contexts (e.g., family, school, peer, early adversity, poverty) in the development of risk and resiliency. Application of etiological models and empirical findings to prevention and intervention approaches will be explored. Throughout the course, students will evaluate current research based upon theory, methodological rigor, and clinical impact.

**Requirements/Evaluation:** Evaluation will be based on oral participation, daily assignments, 1 presentation, and four 5-page position papers.

**Prerequisites:** PSYC 252; PSYC 201 recommended

**Enrollment Limit:** 19

**Enrollment Preferences:** Psychology majors and Public Health concentrators

**PSYC 361 (F) Nonviolence and Positive Psychology**

In this course we will explore the theory and practice of nonviolence in the context of empirical research in Positive Psychology. Nonviolence refers to choosing not to threaten or injure others, and its practice requires cultivating personal qualities that enable such a choice. Positive Psychology refers to the scientific study of those personal qualities that enable people to live happy and fulfilling lives. We will begin by studying the history and moral theories of nonviolence. Using research from across the subdisciplines of psychology, we will then evaluate the empirical claims of those theories regarding psychological benefits of nonviolence to the practitioner, attitude change in the adversary, and effects on the larger community. An important focus of the course will be to critically assess the research methods and data analyses used in these studies. Topics will include self-control, gratitude, empathy, forgiveness, tolerance, courage, aggression, resisting violent assault, and civil disobedience.

**Class Format:** Class meetings will be primarily discussion-based

**Requirements/Evaluation:** Class attendance and participation, discussion leadership, literature searches for relevant empirical research papers, short papers in the form of research summaries, and a final paper in the form of an empirical research proposal.

**Prerequisites:** Any 200-level course in PSYC or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Psychology majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3)

**Attributes:** PSYC Area 6 - Other/Interdisciplinary Psychology

---

**PSYC 362 (F) Cultural Psychology**

What is culture? How does culture influence the way we think and behave? How does it affect the neuro underpinnings in our brain? How is culture represented, impacted, and transformed in the digital age? This course will introduce you to the field of cultural psychology, and explore the role of cultural meanings, practices, and institutions on human psychology. We will discuss how culture emerges through evolution and examine how the same psychological processes that give rise to rich cultural practices also bear negative consequences on our society, such as stereotype and
prejudice. We will also examine how human culture is transformed through digitalization, immigration, and globalization, and how it is represented on mass media and social media. Through the course, you will learn to critically examine human behaviors in the contexts of diverse cultural beliefs, to reflect on your own upbringings through a cultural lens, and to gain an appreciation for cultures other than your own.

**Requirements/Evaluation:** Students are expected to participate in and periodically lead class discussions. As part of this, students must complete assigned readings prior to class meetings. Finally, students will participate in an individual or small-group project culminating in a written and oral presentation.

**Prerequisites:** PSYC 201 and at least one other 200-level psychology course

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology majors

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** PSYC Area 6 - Other/Interdisciplinary Psychology  PSYC Empirical Lab Course

Not offered current academic year

**PSYC 372 (F) Advanced Seminar in Teaching and Learning**

This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students' learning? What does it take to be an educated person?

**Requirements/Evaluation:** this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

**Prerequisites:** PSYC 232 or PSYC 272 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Psychology majors and those who plan to become teachers

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** EXPE Experiential Education Courses  PSYC Area 7 - Educational Psychology  TEAC Teaching Sequence Courses

Not offered current academic year

**PSYC 397 (F) Independent Study: Psychology**

Open to upperclass students with permission of the instructor and department. Students interested in doing an independent study should make prior arrangements with the appropriate professor. The student and professor then complete the independent study proposal form available at the Registrar’s Office and should submit it to the department chair for approval prior to the beginning of the drop/add period.

**Requirements/Evaluation:** Determined by individual instructors

**Prerequisites:** Permission of instructor

**Enrollment Limit:** none

**Enrollment Preferences:** Upperclass students

**Expected Class Size:** NA

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

Fall 2024
PSYC 398 (S) Independent Study: Psychology
Open to upperclass students with permission of the instructor and department. Students interested in doing an independent study should make prior arrangements with the appropriate professor. The student and professor then complete the independent study proposal form available at the Registrar’s Office and should submit it to the department chair for approval prior to the beginning of the drop/add period.

Requirements/Evaluation: Determined by individual instructors
Prerequisites: Permission of instructor
Enrollment Limit: none
Enrollment Preferences: Upperclass students
Expected Class Size: NA
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)

Spring 2025

PSYC 403 (F) The Psychology of Love
This seminar will examine psychological approaches to the study of attraction, affiliative bonds, attachment, and relationship health across the lifespan. These topics will be introduced via review articles, books, and films. Students will analyze these topics more deeply with presentations and student-led discussions of original research articles from across multiple perspectives and subdisciplines of psychology.

Requirements/Evaluation: participation in class discussion, selection and presentation of relevant empirical papers, four position papers, and a final presentation
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: senior Psychology majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

Fall 2024

PSYC 405 (F) Why We Believe What We Believe
As scientists, we aspire to hold beliefs that are based in evidence. As humans, however, we are likely to embrace beliefs influenced by a variety of social, historical, cultural, political, racial, and religious factors. In this class, we will explore the question of why we cling to certain beliefs, even in the face of significant contradictory evidence. For example, what assumptions do we make about social situations and why are we so convinced these assumptions are correct? How does our culture affect our views of social phenomena such as psychological disorders, parenting, or educational systems and why do we hold on to them so fiercely? What assumptions do we make about the nature of memory, emotions, and cognitions and are these assumptions valid? Are there "defensive moves" that we make when we are challenged racially, even when we are committedly antiracist? And, if so, why? In class, we will explore source material from popular culture (books, films, podcasts, and popular press articles) related to some of these issues and we will examine claims made about different belief systems. We will then critically evaluate these claims by exploring the available empirical psychological evidence. The format of this class is student-led discussions.

Requirements/Evaluation: Students will be required to develop and lead rigorous generative discussions with their classmates several times during the semester. In addition, students will be expected to actively participate in discussions and to write three 5-7 page position papers.
Prerequisites: none
PSYC 406  (F)  Are there any universal psychological phenomena? (DPE)

In this course, we will critically examine the ways culture, identities, power, systems, and privilege have shaped our understanding of human behavior as well as the consequences for policy, education, intervention, and prevention. Students will: a) evaluate the ways in which unmeasured cultural variables may have influenced the findings of seminal research articles and psychological theories; b) identify new methodological approaches, concepts, and processes that are revealed when we centralize people and topics that have been excluded from the research literature; c) examine ways the field has contributed to structural oppression and inequities; and d) design studies that provide robust tests of universality, elucidate the limits of universality, and have implications for addressing inequities. This student-led course will allow students to identify topics of interest in multiple sub-disciplines of psychology, select empirical readings, and lead class discussion.

Requirements/Evaluation: Course requirements include reading empirical articles, participating in class discussions, selecting relevant topics and readings for class discussions, leading 2 class discussions, and writing three empirically-based papers (approximately 5 pages double-spaced).

Prerequisites: None

PSYC 407  (F)  Success and Failure

The theme of this psychology senior seminar will be success. We will discuss the path to personal success, including the relative importance of hard work, genetic talent, and luck; barriers to success like poverty and discrimination; the importance of parents, family, teachers, and friends; and what we really mean by success. For each topic we cover, we will read a book or watch a film, then delve deeper by reading and discussing scientific journal articles. Class meetings will be student-led discussions. Students will write three 5-7 page papers. The larger goal will be to practice useful life skills such as how to lead and participate in a meeting (i.e., a class discussion), how to write engagingly and convincingly, and how to assess an argument skeptically and discuss it using evidence.

Class Format: student-led discussions

Requirements/Evaluation: participate in and lead class discussions, choose class reading assignments, and write essays

Prerequisites: senior Psychology majors or permission of instructor in rare cases

Enrollment Limit: 10

Enrollment Preferences: senior Psychology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)
PSYC 409  (F)  Growing Up
Growing up is a universal human experience, yet humans are shaped by distinct forces as they navigate infancy, childhood, adolescence, and adulthood. This seminar will zoom in on five key inflection points in the human lifespan (times when our environment or the choices we make may have an outsized impact on our life's trajectory): 1) birth/infancy, 2) school entry, 3) adolescence, 4) emerging adulthood, and 5) death/dying. We will discuss popular media depictions of humans in each of these transition points (such as the film Babies, and the book Being Mortal). We will then compare, contrast, and evaluate these popular depictions of "growing up" or "growing old" with accounts from empirical research from all sub-disciplines of psychology. The empirical evidence will take the form of journal articles that match the themes of the media depiction but use the scientific method to try to characterize the cultural and personal forces that most affect the human experience and shape a person's identity in key moments of the lifespan. The course will be guided by broad questions such as -- To what extent do humans shape their own destiny versus being shaped by cultural, environmental, or genetic forces beyond their control? Are there some types of experience that are stronger predictors of long-term outcomes than others? Are there any human experiences that are truly universal? What can psychology, as a field, tell us about "growing up" as a human on this planet, and where might it fall short?

Class Format: Class will only meet 2 of the 3 possible days each week, determined by the instructor.

Requirements/Evaluation: Students are expected to co-lead discussions several times during the semester, choose empirical readings, participate in discussions, and write a total of three 5-7-page evidence-based argument papers.

Prerequisites: None

Enrollment Limit: 14

Enrollment Preferences: Open only to senior psychology majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)

Not offered current academic year

PSYC 410  (F)  Psychology of the Internet
This course will explore the impact of the internet and digital technologies on human behavior, cognition, and society. We will draw from theoretical frameworks and empirical research across psychological subdisciplines as well as popular media sources. Specific topics will include online identity formation, digital communities, the psychological effects of social media, the proliferation of conspiracy theories and other extreme content, and the interplay between technology and mental health. Larger goals of the course include: using scientific data to understand real-world phenomena; crafting evidence-based arguments in conversation and in written form; leading and participating in productive group discussions; and equipping ourselves with analytical tools to navigate and contribute to the digital landscape thoughtfully and ethically.

Requirements/Evaluation: Weekly readings, leading and participating in class discussion, writing three 5-7 page papers.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Senior psychology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Fall 2024

PSYC 411  (F)  How do we think?
In this seminar, we will seek to understand how the mind operates and how various factors shape our thinking. We will explore how emotion, values, and beliefs influence cognitive processes and consider the means by which rationality and heuristics influence decision-making. We will compare
algorithms used by the brain with those used in artificial intelligence systems. We will also examine how the ways we think shape our interactions with society. Through student-facilitated discussions, we will explore how psychological research informs our understanding of cognition. We will examine how accurately (or inaccurately) popular media reflect research findings. Students will identify gaps in our knowledge and propose novel research to fill those gaps. Finally, we will apply findings from the literature to help develop interventions to combat cognitive blind spots, distortions, and biases, and to foster happiness, well-being, and deeper connections.

**Requirements/Evaluation:** Students will serve as discussion facilitators several times during the semester. Students will be expected to actively participate in discussions. Assignments will include three 5-7 page papers of different types.

**Prerequisites:** None

**Enrollment Limit:** 14

**Enrollment Preferences:** Senior Psychology majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

Not offered current academic year

---

**PSYC 412 (F) Feelings & Emotions: Shaping the Brain and Society**

This course will explore what emotions are, the evolutionary origins of emotions, and the tools and techniques researchers use to study emotions both in humans and in animal models. We will examine how brain state(s) may underlie different emotions and challenge widely held notions about how an individual's emotion can influence behavior and social factors. Questions we will explore include: Is it better to be emotional or rational? What are 'gut feelings'? Are there gender differences in emotionality and, if so, what are their origins? Popular press literature and scientific studies will fuel student-led discussions as we seek to develop an evidence-based understanding of emotions and how they shape the world around us.

**Requirements/Evaluation:** Course requirements include weekly readings, leading at least two class discussions, and writing three papers: one literature review (5-7 pages), one claim- and empirically-driven paper (5-7 pages), and one op-ed (3 pages).

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Senior psychology majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3)

Not offered current academic year

---

**PSYC 418 (F) Suckers and Scammers**

Virtually all of us are familiar with at least one account of a truly impressive scam - an event, device, or scheme that attracts attention, trust, and money, and then turns out to be a fake, sometimes with devastating consequences for everyone. What are the psychological processes and mechanisms employed by the scammers, as well as those who fall for such schemes? In this course we will consider several books and films that depict well-publicized recent examples (for instance, Bad Blood, The Rachel Divide, and The Talented Mr. Madoff). We'll use research from scientific journals to understand the psychology of both the scammer and those who fell for their schemes. We'll consider, among other things, the developmental origins of deception, what motivates people to pull one over on others, the role of identity maintenance, how we decide who to trust, and what it takes to convince oneself of something implausible. We'll use psychological research from all of the subdisciplines of psychology to find out what these cases might have in common, and also look at studies that illuminate unique features of each situation. Most class meetings will be student-led discussions. You will write three or four 5-7-page papers. The larger goals include: learning how to use scientific data to answer a wide range of questions about everyday life; how to engage in fruitful evidence-based argument; and how to write to think, and to persuade.

**Requirements/Evaluation:** weekly readings, leading two class discussions, and writing three 5-7 page papers

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** senior Psychology majors

**Expected Class Size:** 10
PSYC 493  (F) Senior Thesis: Psychology
Independent study and research for two semesters and a winter study period under the guidance of one or more members of the department. This is part of a full-year thesis (493-494). After exploring the literature of a relatively specialized field of psychology, the student will design and execute an original empirical research project, the results of which will be reported in a thesis. Detailed guidelines for pursuing a thesis are available from the department and on our website.

Requirements/Evaluation: Determined by thesis advisor
Prerequisites: permission of the thesis advisor
Enrollment Limit: none
Enrollment Preferences: Senior Psychology major
Expected Class Size: NA
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

PSYC 494  (S) Senior Thesis: Psychology
Independent study and research for two semesters and a winter study period under the guidance of one or more members of the department. This is part of a full-year thesis (493-494). After exploring the literature of a relatively specialized field of psychology, the student will design and execute an original empirical research project, the results of which will be reported in a thesis. Detailed guidelines for pursuing a thesis are available from the department and on our website.

Requirements/Evaluation: Final written thesis and oral presentation.
Prerequisites: permission of the thesis advisor
Enrollment Limit: none
Enrollment Preferences: Senior Psychology majors
Expected Class Size: NA
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

Winter Study -----------------------------------------------

PSYC 21  (W) Psychology Internships
Would you like to explore applications of psychology in the "real world?" This course gives students an opportunity to work full-time during Winter Study in a mental health, business, education, law, or another setting in which psychological theories and methods are applied to solve problems. Students are responsible for locating their own potential internships whether in the local area, their hometowns, or elsewhere, and are welcome to contact the course instructor for suggestions on how to do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the Winter Study registration period. Please prepare a brief description of the proposed
placement, noting its relevance to psychology, and the name and contact information of the agency supervisor. Before Thanksgiving break, the student will provide a letter from the agency supervisor which describes the agency, and the student's role and responsibilities during Winter Study. Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.

Requirements/Evaluation: evaluation will be based on a 10-page minimum final paper summarizing the student's experiences and reflections, a journal kept throughout the experience, and the supervisor's evaluation

Prerequisites: approval by Jeremy Cone is required

Enrollment Limit: 20

Enrollment Preferences: Students who have taken a PSYC course

Expected Class Size: NA

Grading: pass/fail only

Attributes: STUX Winter Study Student Exploration

Not offered current academic year

PSYC 22 (W) Introduction to Research in Psychology

This course provides a research opportunity for students who want to understand how psychologists ask compelling questions and find answers about behavior. Several faculty members, whose subfields include behavioral neuroscience, cognitive psychology, social psychology, clinical psychology, developmental psychology, and the psychology of education, will have student projects available. Since projects involve faculty research, interested students must consult with members of the Psychology Department before electing this course. In addition, students should discuss with faculty what the weekly time requirements will be. Enrollment will be limited by available space in faculty research labs

Requirements/Evaluation: evaluation will be based on the quality of research participation, student's lab journal, and either an oral presentation or a written 10-page report of the research project

Prerequisites: Students who have taken a PSYC course.

Enrollment Limit: 12

Enrollment Preferences: selection will be based on evaluation of departmental application and number of faculty available as mentors

Expected Class Size: NA

Grading: pass/fail only

Attributes: STUX Winter Study Student Exploration

Not offered current academic year

PSYC 31 (W) Senior Thesis: Psychology

To be taken by students registered for Psychology 493-494.

Requirements/Evaluation: determined by student's thesis advisor

Prerequisites: PSYC 493 or NSCI 493

Enrollment Limit: 20

Enrollment Preferences: all will be enrolled

Expected Class Size: NA

Grading: pass/fail only

Attributes: STUX Winter Study Student Exploration

Not offered current academic year

PSYC 99 (W) Independent Study: Psychology

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
Public health seeks to understand, and also to protect and improve, health at the level of a community or population. Communities make decisions and allocate resources that, intentionally or not, fundamentally shape human life. For example, great reductions in sickness and early death have come from social interventions with relatively low financial cost, such as physically separating drinking water from sewage, or distributing aspirin, condoms, mosquito nets, vaccines or soap, or sharing new ideas about life’s possibilities. The way a society is organized affects the way that social and scientific knowledge is distributed within it; access to that knowledge shapes health at the individual level. At its heart, the study of public health focuses on questions about relationships between science and society, and between reality and possibility: what effective public health policy is and how we can measure its effectiveness; what the relationship is, and ought to be, between research and policy; how we reconcile important moral and economic claims, or balance other values that compete with maximizing health; what counts as disease, over time and among cultures; how we think about cause and responsibility; what constitutes a healthy environment; how our fundamental beliefs determine our approaches to health decisions; and how such decisions ought to be made.

Requirements
Application to the concentration must be completed in the Spring of sophomore year. Applications are due during pre-registration. Application materials can be obtained on the public health website public-health.williams.edu by early April or by e-mailing the chair of the program. Due to excess demand for the concentration, applicants are not guaranteed admittance to the program. Depending on availability, a few students may be admitted in the Spring of Junior year with a mid-April deadline.

All students wishing to pursue the Area of Concentration should take this course early in their careers, preferably sophomore year. Students may petition the advisory committee to substitute a course taken in a study-abroad program focused on global health, providing that the course is equivalent in scope. However, students who plan to take advantage of this option should have taken at least two other courses from among the electives by the end of their sophomore year, and should recognize that those who lack a foundation in the core issues of the field may find it more challenging to prepare their proposal for admission to the concentration.

Statistics
Statistical analysis is at the heart of the quantitative tools necessary to study the health of populations. One course in statistics from the list below is required of all concentrators.

Elective Courses
Concentrators must take at least three electives, with at least two different prefixes, from the list below. Elective courses are grouped by category, but these clusters are not meant to constrain students to a single “track” within the program. Instead, each student is free to determine, with the guidance of an advisory committee member(s), a set of electives that provides an intellectually coherent exploration of their particular areas of interest within the field of public health. In choosing electives, students should consider the balance of breadth versus depth that will allow them to gain theoretical and methodological sophistication in one or more areas. Students may not substitute an independent study for any of these electives. Winter Study courses may not be counted towards the electives.

Experiential Component
Because many public health challenges cannot be fully appreciated until one has hands-on experience with real communities and actual populations, each concentrator must have at least one relevant field-based educational experience with a research component. This requirement may be met through participation in an approved study abroad program (see below), one of the Winter study courses marked with an asterisk, a WS99 project, or a not-for-credit summer or academic-year internship. In every case, the advisory committee must approve the project in advance. Please note that experiential component should address both the “public” and “health” in public health. Projects that center on clinical or lab or that do not have a meaningful health component will generally not satisfy the PH experiential requirement.

PHLH 402 (S) Senior Seminar in Public Health
The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into three or four research teams to investigate a contemporary real-life issue in public health by designing a study; collecting and analyzing data; and disseminating findings by written report and formal oral presentation to the public health advisory committee faculty. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

Written Proposal

To be considered for admission to the Area of Concentration in Public Health, students must submit a written statement describing the portfolio of courses, study abroad, and experiential learning component(s) they intend to pursue. In this proposal, candidates for the concentration should describe their intellectual goals, and if relevant, how these relate to their professional goals. A fundamental purpose of the proposal requirement is to encourage the student to consider concretely how s/he will engage with socio-cultural, behavioral, policy, and/or biomedical aspects of population health. To this end, students should address whether a methodological or disciplinary emphasis ties their chosen courses together, and how the intended experiential component will relate to this set of questions. This proposal is due by the end of course registration period in the spring of the sophomore year, and should be prepared in consultation with a member of the advisory committee. Concentrators are required to revisit and update their proposal prior to registration in the spring of the junior year, and to provide documentation of their internship experience both prospectively and retrospectively. Please note electives will not be offered every year. Students should check the course catalog as they considering possible electives.

STUDY ABROAD AND INTERNSHIPS

Although not a requirement for the PH concentration, study abroad and/or overseas internships provide a crucial opportunity to engage with global health issues through field-based coursework and independent research projects. The Public Health program in coordination with the Study Abroad Advisor and the Office of Career Counseling will advise students on opportunities in these areas. In particular, students may want to consider one of the several Global Health options offered through SIT. One or more courses completed on an approved study abroad program can be counted toward the three elective courses, with permission of the Chair. You can find general study away guidelines for Public Health at public-health.williams.edu.

PHLH 201  (S)  Dimensions of Public Health  (DPE)

Public health is concerned with protecting and improving health at the level of a community or population. Although individual behavior is an essential element of public health, collective, rather than individual, outcomes are the focus of public health study. In this course we will survey the field of public health, introducing students to core concepts and methods that highlight the interrelationship of individual choice and social institutions with environmental and biological factors in producing health outcomes at the population level. We will develop these concepts and methods within the context of signal cases and public health crises.

Requirements/Evaluation: a sequence of three assignments (a report, an infographic and a presentation) that focuses on a particular public health problem, peer reviews and active contribution to class discussion

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: sophomores, potential Public Health concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: No divisional credit  (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because of its central focus on the ways that difference and power shape health outcomes in the U.S. and internationally. It uses an interdisciplinary approach to explore issues including the historical relations between communities of color, healthcare providers, and public health practitioners; contestation over the role of markets and government in public health; and differing explanations for the patterns of race, class, etc., in health outcomes.

Spring 2025

SEM Section: 01    W 1:10 pm - 3:50 pm     Marion Min-Barron

SEM Section: 02    W 7:00 pm - 9:40 pm     Marion Min-Barron

PHLH 220  (F)  International Nutrition  (DPE)

Global malnutrition continues to represent one of the most challenging issues of international development. Problems of both under- and overnutrition beginning as early as in utero can detrimentally influence the health, development and survival of resource-limited populations. This course introduces students to the most prevalent nutritional issues through a food policy perspective and exposes them to a wide variety of interventions, policies and current debates in the field of international nutrition. In addition to exploring the multi-level and multi-disciplinary programmatic approaches for the prevention and treatment of the related nutritional problems, students will gain exposure and experience in program design and proposal writing. Readings will involve both real-world programmatic documents/evaluations as well as peer-reviewed journal articles. Examples will be drawn from Africa, Asia and Latin America.

Requirements/Evaluation: five 1-page essays, one final term paper (10-15 pages), one oral presentation, and active class participation

Prerequisites: PHLH 201 or permission of instructor
Enrollment Limit: 19
EnrollmentPreferences: Public Health concentrators
ExpectedClass Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course exposes the issues of difference, power and inequity by exploring the unequal distribution of resources and power at the global, national and intra-national level within the international nutrition context. We will also critically engage with issues of power, cultural difference and related ethics in the context of international development and nutrition programming.

Attributes: PHLH Nutrition, Food Security + Environmental Health

Fall 2024
SEM Section: 01 M 7:00 pm - 9:40 pm Marion Min-Barron

PHLH 270 (S) Healthcare Workers (DPE)
Health care is the largest industry in the US, employing more than one of every 10 private-sector workers. Jobs in the industry, ranging from subcontracted hospital cleaners to university-affiliated specialist surgeons, reflect and reproduce the kind of inequality we see elsewhere in the economy. We will start with an historical perspective, using sources like Patricia D’Antonio’s American Nursing: a History of Knowledge, Authority, and the Meaning of Work, Gretchen Long’s Doctoring Freedom: The Politics of African American Medical Care in Slavery and Emancipation, and The Next Shift by Gabriel Winant, to understand the development of the modern health care industry in the US, its relationship to the process of deindustrialization in cities like Pittsburgh, PA and the shifting racial and gendered character of the paid labor force. From that framing we will investigate the present. What are working conditions like in each sector, what kind of organizing is there, and how do workers interact across sectors? We will spend some time on Marxist feminist theories of care work and how they relate to this industry. Students will be invited to think about themselves as possible future health care workers, and how they might want to interact with the history of the industry, and the low paid, racialized, gendered sector of care workers that health care depends upon. We will have several guest speakers with expertise on the local health care economy, and spend some time learning about comparative experiences in other countries, including colonial experiences with nursing.

Requirements/Evaluation: Assignments will include a short paper and a longer research project. Participation in discussion will form part of the grade.

Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: public health concentrators
ExpectedClass Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: No divisional credit (DPE)

Difference, Power, and Equity Notes: The class asks students to reflect critically on power differences within the health care industry and their shifting relation to race, class, gender and colonial history.

Not offered current academic year

PHLH 351 (F) Racism in Public Health (DPE)

Cross-listings: AAS 351
Primary Cross-listing

Across the nation, states, counties and communities have declared racism a public health crisis. This push to identify systemic racism as a high priority in public health action and policy is an important symbolic and political move. It names the faults of histories, systems and institutions but also brings to the spotlight the individual and community responsibility to dismantle racism in the US. In this tutorial, we will examine racism in public health policy, practice and research through an investigation of several mediums of evidence and information, ranging from peer reviewed literature to news editorials, podcasts and documentaries. We will explore specific pathways by which legacies of colonialism and racism function in various public health disciplines such as epidemiology, social & behavioral sciences, health policy and environmental health while also examining the dynamics of power
and history in research and community practice. We will take deep dives into issues on how health can be impacted by redlining, racist medical algorithms, racial trauma and stress and police violence, to name a few. Students will also have two opportunities to select their own case studies, as a way for you to research and learn about particular racial health issues that are of personal interest. This course is also about self-reflection and exploration of the ways in which our identities and lived experiences impact our understanding and perspective. We will gain skills in speaking across differences and articulation of how our own perceptions and lived experiences of race and racism impact our study of public health. This tutorial requires an openness to self-reflection and the practice of listening and articulation.

Requirements/Evaluation:  bi-weekly tutorial papers, weekly journaling, oral commentaries and tutorial discussion

Prerequisites:  PHLH 201 or instructor approval.

Enrollment Limit:  10

Enrollment Preferences:  1-Public Health concentrators. 2- Asian American Studies concentrators.

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AAS 351(D2) PHLH 351(D2)

Difference, Power, and Equity Notes: In this course students will examine and critically examine the inequities and race based social and health injustices, and the ways racism infiltrates public health action and policy, both historically and currently. They will also refine their self reflection skills in understanding how their own positions of privilege and power, or lack thereof, inform their understanding of public health.

PHLH 402 (S) Senior Seminar in Public Health

The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into small research teams to interact with local organizations and investigate a contemporary real-life issue in public
health. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

Requirements/Evaluation: active seminar participation, written reflections, contribution to the team research project, and a 12- to 15-page final paper

Prerequisites: completion of at least four courses counting towards the PHLH concentration

Enrollment Limit: 12

Enrollment Preferences: senior Public Health concentrators; students who are not senior Public Health concentrators should contact the instructor

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: No divisional credit

Winter Study

PHLH 99  (W)  Independent Study: Public Health

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
The Quantitative/Formal Reasoning (QFR) requirement is intended to help students become adept at reasoning mathematically and abstractly. The ability to apply a formal method to reach conclusions, use numbers comfortably, and employ the research tools necessary to analyze data lessens barriers to carrying out professional and economic roles. The hallmarks of a QFR course are the representation of facts in a language of mathematical symbols and the use of formal rules to obtain a determinate answer. Primary evaluation in these courses is based on multistep mathematical, statistical, or logical inference (as opposed to descriptive answers).

Prior to senior year, all students must satisfactorily complete ONE QFR course. Students requiring extra assistance (as assessed during First Days) are normally placed into Mathematics 100/101/102, which is to be taken before fulfilling the QFR requirement.

**AMST 150 (F) Data for Justice (DPE) (QFR)**

**Cross-listings:** STS 150 / SOC 150 / WGSS 150 / INTR 150

**Secondary Cross-listing**

This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

**Class Format:** This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.

**Requirements/Evaluation:** Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

**Prerequisites:** None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

**Enrollment Limit:** 18

**Enrollment Preferences:** Students without prior college-level courses in statistics and programming.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

**Difference, Power, and Equity Notes:** This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGBTQ+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

**Quantitative/Formal Reasoning Notes:** This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

Fall 2024

**LEC Section: 01** TR 9:55 am - 11:10 am Chad M. Topaz

**LEC Section: 02** TR 11:20 am - 12:35 pm Chad M. Topaz

**AMST 363 (S) Data for Justice Research Practicum (DPE) (QFR)**
Civil rights activist, educator, and investigative journalist Ida B. Wells said that "the way to right wrongs is to shine the light of truth upon them." In this inclusive, collaborative, research-based course, students will bring statistical, computational, and/or mathematical approaches to bear on issues of social justice. Guided closely by the instructor, students will work in groups to carry out original research in an area such as criminal justice, education equity, environmental justice, health care equity, economic justice, or inclusion in arts/media. Prior research experience is not required; one goal of this course is to build skills for advanced research.

**Class Format:** This course is an intensive research practicum. Formation of research groups and selection of research topics will be facilitated by the instructor. The primary modality of work is peer collaboration.

**Requirements/Evaluation:** To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based, ungraded assessment framework.

**Prerequisites:** INTR 150 (Data for Justice), or prior equivalent exposure to computing, statistics, and social justice topics as approved by the instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** Students who have a declared major in Division I or II, who meet the prerequisites of the course, and who fill out the instructor’s preregistration survey (contact the instructor for link).

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 363(D2) STS 363(D2) INTR 350(D2) AMST 363(D2)

**Difference, Power, and Equity Notes:** Students will research issues of social justice in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

**Quantitative/Formal Reasoning Notes:** Students will use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

---

**ASTR 111  (F) Introduction to Astrophysics  (QFR)**

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

**Class Format:** The class has weekly afternoon laboratory sessions, which will alternate between 'hands-on' activities and problem-solving/discussion sessions. Nighttime observing sessions will occur throughout the semester.

**Requirements/Evaluation:** weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio

**Prerequisites:** a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

**Enrollment Limit:** 28; 14/lab

**Enrollment Preferences:** potential Astronomy majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option
**Quantitative/Formal Reasoning Notes:** The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

**Fall 2024**

**ASTR 206 (S) Astrobiology (QFR)**

This course will focus on the development of complex life and its observational signatures, both on Earth and on other worlds. We will first investigate the conditions that have led to the development of complex life on Earth. We will view Earth over time from an outsider's perspective and challenge preconceptions about the basic requirements for life. We will also explore the 'hot spots' in the search for life beyond Earth in our Solar System. Observations in the next decade may reveal biosignatures in the atmospheres of exoplanets. We will learn about these future observations, while also interacting with current research-grade data for other planets and learning about the methods used to constrain the physical conditions on other worlds. Using quantitative models, we will test the stability of Earth-like planets to the variable and potentially hostile conditions of evolving solar systems.

**Requirements/Evaluation:** weekly problem sets, one paper, two mid-term exams, and a final exam

**Prerequisites:** Math 130 and at least one prior physical science course (either Astronomy, Physics, Geosciences, or Chemistry), or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Science majors, with preference given to students majoring in Astronomy, Astrophysics, or Geosciences

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** In this course students will make quantitative comparisons between environmental conditions on Earth, other planetary bodies, and models. The students will also examine observations regarding the detection and characterization of planetary bodies, including contemporary data.

**Spring 2025**

**ASTR 402 (S) Between the Stars: The Interstellar Medium (QFR)**

The matter between the stars—the interstellar medium—tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

**Class Format:** Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.

**Requirements/Evaluation:** weekly problem sets, 10-page final paper, and observing projects

**Prerequisites:** ASTR 111 and PHYS 201 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: juniors and seniors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

Spring 2025
TUT Section: T1  TBA  Anne Jaskot

ASTR 413  (F) Building Stars: A Physical Model of Stellar Structure    (QFR)
How does the Sun shine? How does the Sun evolve with time? What physical processes determine the power output of the Sun? In this course we will explore our modern understanding of how stars work, and why they have a range of sizes, temperatures, and luminosities. As we go, we will discuss the laws of physics at work in our Sun and other stars. Over the course of the semester, we will build a working computer model of the Sun using the basic laws of nuclear fusion, radiative transfer, thermal mechanics, and hydrostatic equilibrium.

Class Format: Lectures will include time for computer programming work
Requirements/Evaluation: weekly problem sets, weekly coding homework assignments, two mid-term exams, and a final project
Prerequisites: PHYS 142 or 151, any prior class that makes use of programming, or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Astronomy, Astrophysics, or Physics majors, with first preference to Astronomy or Astrophysics majors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will use differential equations and numerical coding techniques to test and explore the relationships between physical laws using the Sun and other stars as examples. They will make quantitative comparisons between their calculations and observed stellar properties.

Fall 2024
LEC Section: 01   TR 11:20 am - 12:35 pm   Jason E. Young

ASTR 498  (S) Independent Study: Astronomy or Astrophysics    (QFR)
Astronomy/Astrophysics independent study, directed by one of the Astronomy faculty: Pasachoff/Jaskot/Flaherty
Requirements/Evaluation: Regular work with the instructor; submitted presentations and papers as agreed upon
Prerequisites: suitable Astronomy/Astrophysics/Physics/Math-Stats-Geosciences/Chemistry courses
Enrollment Limit: 10
Enrollment Preferences: research topic
Expected Class Size: 5
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Substantial quantitative and formal reasoning are involved

Spring 2025
IND Section: 01    TBA    David R. Tucker-Smith
BIMO 321 (F) Biochemistry I: Structure and Function of Biological Molecules  (QFR)

Cross-listings: BIOL 321 / CHEM 321

Primary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101, CHEM 200 and CHEM 201; or either CHEM 155 or 256 and CHEM 251

Enrollment Limit: 12/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 36

Grading: no pass/fail option, no fifth course option

Unit Notes: Cannot be counted towards the Biology major in addition to BIOL 222

Distributions:  (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 321(D3) BIMO 321(D3) CHEM 321(D3)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

Attributes: BIGP Courses BIMO Required Courses

BIMO 322 (S) Biochemistry II: Metabolism  (QFR)

Cross-listings: CHEM 322 / BIOL 322

Primary Cross-listing

This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: Lecture three hours per week and laboratory three hours per week.

Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

Prerequisites: BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor
Enrollment Limit: 48

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIMO 322(D3) CHEM 322(D3) BIOL 322(D3)

Quantitative/Formal Reasoning Notes: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

BIOL 202  (F) Genetics (QFR)

Genetics, classically defined as the study of heredity, is today a multidisciplinary field whose principles provide critical insight and tools to most areas of biology and medicine. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. A primary focus of the course is on students developing familiarity with problem solving, the logic and quantitative reasoning required to understand how genetic mechanisms lead to biological patterns. The laboratory part of the course provides an experimental introduction to modern genetic analysis as well as introductions to interpreting genetic reasoning in the primary research literature. Laboratory experiments include investigating chromosome structure using microscopy, mapping a mutation to the genome by integrating multiple streams of evidence, and determining the structure of a DNA plasmid using molecular tools.

Class Format: Lecture: three hours per week, Lab: three hours per week.

Requirements/Evaluation: bi-weekly problem sets; weekly laboratory exercises and laboratory reports; three exams

Prerequisites: BIOL 101 and 102

Enrollment Limit: 120

Enrollment Preferences: students interested in the Biology major

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course develops quantitative skills through solving problems. Students learn to apply basic calculations and logic to predict the outcomes of biological systems, for example, describing the likelihood that an individual will be affected by an inherited disease. Application of quantitative and logical analysis contributes to a large component of the in-class work and the graded material for the class, in the form of problem sets, exams, and data analysis for lab reports.

BIOL 203 (F) Ecology (QFR)

Cross-listings: ENVI 203

Primary Cross-listing

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 203(D3) ENVI 203(D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to linear models, multidimensional data analysis and contingency tables.

Attributes: ENVI Natural World Electives EVST Environmental Science

Spring 2025

BIOL 305 (S) Evolution (QFR)

This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and adaptation). Topics include micro-evolutionary models, natural and sexual selection, speciation, the inference of evolutionary history, evolutionary medicine among others.

Requirements/Evaluation: independent research project, problem sets, participation in discussions and exams

Prerequisites: BIOL 102 and one 200 level BIOL course

Enrollment Limit: 24

Enrollment Preferences: Seniors and biology majors

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: We will use mathematical models to study population genetics.

Spring 2025
**BIOL 321 (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)**

**Cross-listings:** BIMO 321 / CHEM 321

**Secondary Cross-listing**

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

**Class Format:** lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation:** quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

**Prerequisites:** BIOL 101, CHEM 200 and CHEM 201; or either CHEM 155 or 256 and CHEM 251

**Enrollment Limit:** 12/lab

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size:** 36

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Cannot be counted towards the Biology major in addition to BIOL 222

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 321(D3) BIMO 321(D3) CHEM 321(D3)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

**BIOL 322 (S) Biochemistry II: Metabolism (QFR)**

**Cross-listings:** BIMO 322 / CHEM 322

**Secondary Cross-listing**

This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

**Class Format:** Lecture three hours per week and laboratory three hours per week.
Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

Prerequisites: BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor

Enrollment Limit: 48

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

BIOL 420 (S) Mathematical Biology (QFR)

Cross-listings: MATH 412

Secondary Cross-listing

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications may include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Requirements/Evaluation: problem sets, quizzes/exams, participation, final project and paper

Prerequisites: MATH 250 and MATH 309, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: preference for senior math/stats major and also based on an interest statement

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

CAOS 213 (S) Introduction to Environmental and Natural Resource Economics  (QFR)

Cross-listings: ECON 213 / ENVI 213

Secondary Cross-listing

We'll use economics to provide one perspective on reasons humans harm the environment and overuse natural resources, and what we can do about it. We'll study climate change, pollution in general, cost benefit analysis, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns people may have about doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 30

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CAOS 327  (F) Coastal Processes and Geomorphology  (QFR)

Cross-listings: ENVI 327 / GEOS 327

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, quizzes, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.
Enrollment Limit: 15
Enrollment Preferences: Geosciences majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Unit Notes: This course counts toward the GEOS Group B Electives - Sediments + Life.

CAOS 477 (F) Economics of Environmental Behavior (QFR)
Cross-listings: ENVI 376 / ECON 477
Secondary Cross-listing
A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to assess how policies can help or hurt the environment. Topics we may study include: common pool resources, voluntary conservation, social norms and nudges, discrimination and justice, rationality, firm responses to mandatory and voluntary regulation, voting and public opinion, and international environmental agreements. We'll also build familiarity with the main methodologies of modern economic research: theoretical modeling, empirical analysis of observational data, and experiments.
Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises and other interactive activities
Requirements/Evaluation: class participation, regular reading markup, empirical exercises, oral presentation(s), and an original research paper using an experiment, observational data, or theory
Prerequisites: ECON 251 and (ECON 255 or STAT 346)
Enrollment Limit: 19
Enrollment Preferences: senior Economics majors and junior Economics majors considering a thesis

CHEM 100 (F) Chemistry Matters (QFR)
Chemistry matters! From fueling the world's economy to preventing the next pandemic to forecasting future climate change, chemistry touches all aspects of daily life. This course provides an introduction to chemical principles and applications for students with little or no high school chemistry
background. Through the lens of contemporary issues and applications (e.g. energy, environment, materials, medicine, etc.), students will be introduced to concepts fundamental to studying matter at the molecular level. Particular emphasis will be placed on skills essential for students to understand chemistry in these contexts, including quantitative reasoning and the development of chemical literacy and intuition. Laboratory meetings will be used to reinforce lecture material through experimentation at the bench and active learning exercises.

Class Format: lecture, three times per week and laboratory, three hours per week

Requirements/Evaluation: problem set assignments, laboratory work and analysis, quizzes/exams and a final assessment

Prerequisites: Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement).

Enrollment Limit: 32; 16/lab

Enrollment Preferences: First-year students with little or no high school chemistry experience.

Expected Class Size: 32

Grading: yes pass/fail option, no fifth course option

Unit Notes: CHEM 100 may be taken concurrently with MATH 102—see under Mathematics; CHEM 100 or its equivalent is a prerequisite to CHEM 101.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular problem sets and in class activities in which quantitative/formal reasoning skills are practiced.

Fall 2024

LEC Section: 01    MWF 9:00 am - 9:50 am    Katie M. Hart

LAB Section: 03    R 1:00 pm - 4:00 pm

CHEM 101  (F)(S)  Concepts of Chemistry  (QFR)

This course broadens and deepens the foundation in chemistry of students who have had one or more years of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, the model of an atom, Lewis structures and VSEPR, and gas laws is expected. Principal topics for this course include modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory periods will largely focus on experiment design, data analysis, literature, scientific writing, and other skills critical to students' development as scientists. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamentals of chemistry as part of their general education. This course may be taken pass/fail; however, students who are considering graduate study in science or in the health professions should elect to take this course for a grade.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: problem sets and/or quizzes, laboratory work, and exams

Prerequisites: Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement) or CHEM 100.

Enrollment Limit: 45; 16/lab

Enrollment Preferences: first-year students

Expected Class Size: 45/lecture

Grading: yes pass/fail option, no fifth course option

Unit Notes: CHEM 101 or its equivalent is a prerequisite for both CHEM 200 and CHEM 201 and is required for the BIMO concentration.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Attributes: BIMO Required Courses
CHEM 200 (S) Advanced Chemical Concepts (QFR)

This course treats an array of topics in modern chemistry, emphasizing broad concepts that connect and weave through the various subdisciplines of the field—biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. It provides the necessary background in chemical science for students who are planning advanced study or a career in chemistry, biological science, geoscience, environmental science, or a health profession. Topics include coordination complexes, thermodynamics, electrochemistry, and kinetics. Laboratory sections will give students hands-on experience involving synthesis, characterization, and reactivity studies of coordination and organic complexes; spectroscopic analyses; thermodynamics; electrochemistry; and kinetics. Students will hone their skills in the presentation of results through written reports and worksheets.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: homework assignments, laboratory work, quizzes, midterm exam, and a final exam

Prerequisites: CHEM 101

Enrollment Limit: 35; 16/lab

Enrollment Preferences: first-year students, then sophomores

Expected Class Size: 35

Grading: no pass/fail option, no fifth course option

Unit Notes: CHEM 200 is required for the BIMO concentration

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

CHEM 201 (F) Organic Chemistry: Introductory Level (QFR)

This course provides the necessary background in organic chemistry for students who are planning advanced study or a career in chemistry, the biological sciences, or the health professions. It initiates the systematic study of the common classes of organic compounds with emphasis on theories
of structure and reactivity. Specific topics include basic organic structures and bonding, delocalization and conjugation, acidity & basicity, nucleophilic addition and substitution reactions, stereochemistry and molecular energetics. The theory and interpretation of infrared (IR) and nuclear magnetic resonance (NMR) spectroscopy, as well as the fundamentals of molecular modeling as applied to organic molecules are presented. The coordinated laboratory work includes organic synthesis, purification and separation techniques, as well as characterization by IR and NMR spectroscopy.

**Class Format:** lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation:** quantitative problem solving, laboratory performance, three midterm exams, and a final exam

**Prerequisites:** CHEM 101 or CHEM 151, 153, or 155

**Enrollment Limit:** 40; 12/lab

**Enrollment Preferences:** Seniors, juniors, sophomores, first-year students

**Expected Class Size:** 40

**Grading:** no pass/fail option, no fifth course option

CHEM 361 (S) Quantum Chemistry and Chemical Dynamics (QFR)
This course introduces quantum mechanics, which serves as the basis for understanding molecular structure and spectroscopy. We will begin by discussing the Schrodinger wave equation and then apply this to understanding the translational, vibrational, and rotational structure of molecules. This leads to a discussion of atomic/molecular electronic structure and spectroscopy. Computational methods will be taught to illustrate key quantum mechanical concepts, interpret experimental data, and extend hypotheses. Applications will be chosen from contemporary research fields, including photochemistry, laser spectroscopy, environmental/atmospheric chemistry, organometallic chemistry, and physical organic chemistry.

Requirements/Evaluation: class participation, problem sets, exams, and laboratory work
Prerequisites: CHEM 155 or CHEM 256; or CHEM 200; or permission of instructor; and strongly recommend MATH 150 or MATH 151
Enrollment Limit: 16; 8/lab
Enrollment Preferences: seniors, then juniors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course fulfills the QFC requirement and relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

CHEM 366 (F) Thermodynamics and Statistical Mechanics (QFR)
The thermodynamic laws provide us with our most powerful and general scientific principles for predicting the direction of spontaneous change in physical, chemical, and biological systems. This course develops the concepts of energy, entropy, free energy, temperature, heat, work, and chemical potential within the framework of classical and statistical thermodynamics. The principles developed are applied to a variety of problems: chemical reactions, phase changes, energy technology, industrial processes, and environmental science. Laboratory experiments provide quantitative and practical demonstrations of the theory of real and ideal systems studied in class.
Class Format: lecture, three times per week and laboratory, four hours per week
Requirements/Evaluation: class participation, oral presentations, problem sets, laboratory work, and an independent project
Prerequisites: CHEM 155 or CHEM 256; or CHEM 200; and basic knowledge of applied integral and differential calculus
Enrollment Limit: 16/lab
Enrollment Preferences: Chemistry majors: seniors, juniors, then sophomores
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course fulfills the QFC requirement and relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

COGS 224 (F) Introduction to Formal Linguistics (QFR)
Cross-listings: PHIL 221
Primary Cross-listing
The sentence "Every cookie is chocolate chip and three of them are oatmeal raisin" is a perfectly grammatical sentence of English, but it's self-contradictory. What does it take to realize this fact? One must grasp the meanings of the various parts of the sentence. In particular, one must grasp that "three of them" picks out a subset of the group picked out by "every cookie", and that there's no such thing as a cookie that is both chocolate chip and oatmeal raisin. There are two ways to understand "Many students took every class". According to one, there is a single group of students that had their hands extremely full this semester. According to the other, every class was well-populated, potentially by different groups. The reason for this is that there are two underlying structures that the original sentence can realize. This course serves as an introduction into formal methods in the scientific study of language. Our goal will be to characterize phenomena like those above with logical and mathematical precision. The focus will be on model-theoretic semantics, the sub-field of linguistics that studies meanings. Along the way we will discuss principles of syntax, the sub-field that studies sentence structures, and pragmatics, the sub-field that studies inferences of non-literal content. This is a formal course, but no prior logical or mathematical background will be expected. Starting from scratch, students will learn the building blocks of current-day linguistic research. This introduction will be of use to students interested in language from a variety of perspectives, including philosophy, cognitive science, and computer science.

Requirements/Evaluation: Weekly problem sets, plus a final project (paper/presentation/other type, to be discussed with instructor)

Prerequisites: No prerequisites

Enrollment Limit: 20

Enrollment Preferences: Preference given to seniors and philosophy/cognitive science majors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 221(D2) COGS 224(D2)

Quantitative/Formal Reasoning Notes: This course teaches the fundamentals of the formal analysis of language. Students will learn to provide translation schemes from English to a logical language (typed lambda calculus).

CSCI 104 (F) Data Science and Computing for All (QFR)

Many of the world's greatest discoveries and most consequential decisions are enabled or informed by the analysis of data from a myriad of sources. Indeed, the ability to wrangle, visualize, and draw conclusions from data is now a critical tool in the sciences, business, medicine, politics, other academic disciplines, and society as a whole. This course lays the foundations for quantifying relationships in data by exploring complementary computational, statistical, and visualization concepts. These concepts will be reinforced by lab experiences designed to teach programming and statistics skills while analyzing real-world data sets. This course will also examine the broader context and social issues surrounding data analysis, including privacy and ethics.

Requirements/Evaluation: Weekly lab assignments involving programming, a project, and examinations.

Prerequisites: None; previous programming experience or statistics is not required.

Enrollment Limit: 30;15/lab

Enrollment Preferences: Not open to those who have completed or are currently enrolled in a Computer Science course numbered 136 or higher. Preference given to those who have not previously taken a computer science or statistics course.

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Unit Notes: Additional details about the class are available here: https://www.cs.williams.edu/~cs104. Please see the Computer Science Department website for more information on selecting an introductory computer science class: https://csci.williams.edu/

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course includes regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.
### CSCI 134  (F)(S)  Introduction to Computer Science  (QFR)

This course introduces students to the science of computation by exploring the representation and manipulation of data and algorithms. We organize and transform information in order to solve problems using algorithms written in a modern object-oriented language. Topics include organization of data using objects and classes, and the description of processes using conditional control, iteration, methods and classes. We also begin the study of abstraction, self-reference, reuse, and performance analysis. While the choice of programming language and application area will vary in different offerings, the skills students develop will transfer equally well to more advanced study in many areas. In particular, this course is designed to provide the programming skills needed for further study in computer science and is expected to satisfy introductory programming requirements in other departments.

#### Requirements/Evaluation:
- weekly programming projects, weekly written homeworks, and two examinations.

#### Prerequisites:
- none, except for the standard prerequisites for a (QFR) course; previous programming experience is not required

#### Enrollment Limit:
- 30;15/lab

#### Enrollment Preferences:
- if the course is over-enrolled, enrollment will be determined by lottery.

#### Expected Class Size:
- 30/lec

#### Grading:
- yes pass/fail option,  yes fifth course option

#### Unit Notes:
- Please see the Computer Science Department website for more information on selecting an introductory computer science class: https://csci.williams.edu. Students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department.

#### Distributions:

CSCI 136  (F)(S)  Data Structures and Advanced Programming  (QFR)
This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists, stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

Requirements/Evaluation:  programming and written assignments, quizzes, examinations
Prerequisites:  CSCI 134 or equivalent; fulfilling the Discrete Mathematics Proficiency requirement is recommended, but not required
Enrollment Limit:  30;15/lab
Enrollment Preferences:  if the course is over-enrolled, enrollment will be determined by lottery.
Expected Class Size:  30/lec
Grading:  yes pass/fail option,  no fifth course option
Unit Notes:  Please see the Computer Science Department website for more information on selecting an introductory computer science class:
https://csci.williams.edu/

Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  This course include regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.

CSCI 237  (F)(S)  Computer Organization  (QFR)
This course studies the basic instruction set architecture and organization of a modern computer. It provides a programmer's view of how computer systems execute programs, store information, and communicate. Over the semester the student learns the fundamentals of translating higher level languages into assembly language, and the interpretation of machine languages by hardware. At the same time, a model of computer hardware organization is developed from the gate level upward.
CSCI 256  (F)(S)  Algorithm Design and Analysis  (QFR)
This course investigates methods for designing efficient and reliable algorithms. By carefully analyzing the structure of a problem within a mathematical framework, it is often possible to dramatically decrease the computational resources needed to find a solution. In addition, analysis provides a method for verifying the correctness of an algorithm and accurately estimating its running time and space requirements. We will study several algorithm design strategies that build on data structures and programming techniques introduced in Computer Science 136. These include greedy, divide-and-conquer, dynamic programming, and network flow algorithms. Additional topics of study include algorithms on graphs and strategies for handling potentially intractable problems.

Requirements/Evaluation:  Problem sets, midterm and final examinations
Prerequisites:  CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement
Enrollment Limit:  24
Enrollment Preferences:  Preference will be given to students who need the class in order to complete the major. Ties will be broken by seniority (seniors first, then juniors, etc.).
Expected Class Size:  24
Grading:  no pass/fail option, no fifth course option
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes: This course will have weekly problem sets in which students will formally prove statements about the behavior and performance of algorithms. In short, the course is about applying abstract and mathematical reasoning to the study of algorithms and computation.

Fall 2024
LEC Section: 01  MWF 12:00 pm - 12:50 pm     Aaron M. Williams

Spring 2025
LEC Section: 01  MR 1:10 pm - 2:25 pm     Samuel  McCauley
LEC Section: 02  MR 2:35 pm - 3:50 pm     Samuel  McCauley
This course will provide an overview of Computational Biology, the application of computational, mathematical, statistical, and physical problem-solving techniques to interpret the rapidly expanding amount of biological data. Topics covered will include database searching, DNA sequence alignment, clustering, RNA structure prediction, protein structural alignment, methods of analyzing gene expression, networks, and genome assembly using techniques such as string matching, dynamic programming, hidden Markov models, and statistics.

Requirements/Evaluation: weekly Python programming assignments, code reviews, problem sets, plus a few quizzes and a final project

Prerequisites: programming experience (e.g., CSCI 136) and mathematics (PHYS/MATH 210 or MATH 150) and physical science (PHYS 142/151, or CHEM 101/15X), or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: if over-enrolled, a questionnaire will be circulated

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
CSCI 315(D3) PHYS 315(D3)

Quantitative/Formal Reasoning Notes: problem sets and programming assignments

Attributes: BIGP Courses

Fall 2024
LEC Section: 01 MR 2:35 pm - 3:50 pm Daniel P. Aalberts

CSCI 334 (S) Principles of Programming Languages (QFR)
This course examines the concepts and structures governing the design and implementation of programming languages. It presents an introduction to the concepts behind compilers and run-time representations of programming languages; features of programming languages supporting abstraction and polymorphism; and the procedural, functional, object-oriented, and concurrent programming paradigms. Programs will be required in languages illustrating each of these paradigms.

Requirements/Evaluation: weekly problem sets and programming assignments, a midterm examination, and a final examination

Prerequisites: CSCI 136

Enrollment Limit: 30

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets and labs in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2025
LEC Section: 01 MR 1:10 pm - 2:25 pm Daniel W. Barowy
LEC Section: 02 MR 2:35 pm - 3:50 pm Daniel W. Barowy

CSCI 338 (S) Parallel Processing (QFR)
This course explores different parallel programming paradigms used for writing applications on today's parallel computer systems. The course will
introduce concurrency (i.e. multiple simultaneous computations) and the synchronization primitives that allow for the creation of correct concurrent applications. It will examine how a variety of systems organize parallel processing resources and enable users to write parallel programs for these systems. Covered programming paradigms will include multiprogramming with processes, message passing, threading in shared memory multiprocessors, vector processing, graphics processor programming, transactions, MapReduce, and other forms of programming for the cloud. Class discussion is based on assigned readings. Assignments provide students the opportunity to develop proficiency in writing software using different parallel programming paradigms.

Requirements/Evaluation: homework assignments, programming projects, and up to two exams

Prerequisites: CSCI 136 or equivalent programming experience, and CSCI 237, or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of substantial problem sets and programming assignments in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2025

LEC Section: 01  TR 9:55 am - 11:10 am  Kelly A. Shaw

CSCI 339 (F) Distributed Systems (QFR)

This course studies the key design principles of distributed systems, which are collections of independent networked computers that function as single coherent systems. Covered topics include communication protocols, processes and threads, naming, synchronization, consistency and replication, fault tolerance, and security. Students also examine some specific real-world distributed systems case studies, including Google and Amazon. Class discussion is based on readings from the textbook and research papers. The goals of this course are to understand how large-scale computational systems are built, and to provide students with the tools necessary to evaluate new technologies after the course ends.

Requirements/Evaluation: weekly homework assignments, midterm exam, 3 major programming projects, and a final project

Prerequisites: CSCI 237

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Fall 2024

LEC Section: 01  MR 1:10 pm - 2:25 pm  Jeannie R Albrecht

CSCI 345 (S) Robotics and Digital Fabrication (QFR)

This course is a hands-on exploration of topics in robotics and digital fabrication. We will experience firsthand how ideas and methods from computer science can be applied to make physical objects, including robots and other machines. The emphasis will be on creative, hands-on experimentation. Along the way, students will learn the basics of embedded systems programming (Arduino), breadboarding, soldering, printed circuit board (PCB) design, mechanical computer-aided design (CAD)--both conventional (OnShape) and programmatic (OpenSCAD)--as well digital fabrication (3D-printing, laser cutting). Students will learn both how to build their own prototypes and how to send out designs to have parts machined professionally. Students will work in teams throughout. The course will culminate in a team robotic design competition testing both functionality and creativity.

Requirements/Evaluation: Evaluation based on assignments, projects, and exams.
Prerequisites: CSCI 237
Enrollment Limit: 18; 9/lab
Enrollment Preferences: Current or expected Computer Science majors
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: A fee of $150-$200 will be added to the term bill to cover the purchase of consumable electronics, motors, 3D-printing filament, and stock used in the assignments and final project.
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: The course will include programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2025
LEC Section: 01  TR 9:55 am - 11:10 am  James M. Bern
LAB Section: 02  T 1:00 pm - 2:30 pm  James M. Bern
LAB Section: 03  T 2:30 pm - 4:00 pm  James M. Bern

CSCI 357  (S)  Algorithmic Game Theory  (QFR)
This course focuses on topics in game theory and mechanism design from a computational perspective. We will explore questions such as: how to design algorithms that incentivize truthful behavior, that is, where the participants have no incentive to cheat? Should we let drivers selfishly minimize their commute time or let a central algorithm direct traffic? Does Arrow's impossibility result mean that all voting protocols are doomed? The overarching goal of these questions is to understand and analyze selfish behavior and whether it can or should influence system design. Students will learn how to model and reason about incentives in computational systems both theoretically and empirically. Topics include types of equilibria, efficiency of equilibria, auction design and mechanism design with money, two-sided markets and mechanism design without money, incentives in computational applications such as P2P systems, and computational social choice.
Requirements/Evaluation: weekly problem sets and/or programming assignments, two midterm exams, and a final project.
Prerequisites: CSCI 256
Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: The course will consist problem sets and programming assignments in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2025
LEC Section: 01  TF 1:10 pm - 2:25 pm  Shikha Singh

CSCI 358  (F)  Applied Algorithms  (QFR)
This course is about bridging the gap between theoretical running time and writing fast code in practice. The course is divided into two basic topics. The first is algorithmic: we will discuss some of the most useful tools in a coder's toolkit. This includes topics like randomization (hashing, filters, approximate counters), linear and convex programming, similarity search, and cache-efficient algorithms. Our goal is to talk about why these efficient algorithms make seemingly difficult problems solvable in practice. The second topic is applications: we will discuss how to implement algorithms in an efficient way that takes advantage of modern hardware. Specific topics covered will include blocking, loop unrolling, pipelining, as well as strategies for performance analysis. Projects and assessments will include both basic theoretical aspects (understanding why the algorithms we discuss actually work), and practical aspects (implementing the algorithms we discuss to solve important problems, and optimizing the code so it runs as quickly as possible).
Requirements/Evaluation: Over the course of each week, there will be either a homework or an assignment. Homeworks and assignments have
similar structure, with both a coding and problem set component, but assignments will be weighted more heavily and must be completed individually. There will also be a take home final at the end of the year.

Prerequisites: CSCI 256 and CSCI 237

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Fall 2024

LEC Section: 01 TF 1:10 pm - 2:25 pm Samuel McCauley

CSCI 361 (F) Theory of Computation (QFR)

Cross-listings: MATH 361

Primary Cross-listing

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Requirements/Evaluation: weekly problem sets and one or more exams

Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 361(D3) CSCI 361(D3)

Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

CSCI 375 (F) Natural Language Processing (QFR)

Natural language processing (NLP) is a set of methods for making human language accessible to computers. NLP underlies many technologies we use on a daily basis including automatic machine translation, search engines, email spam detection, and automated personalized assistants. These methods draw from a combination of algorithms, linguistics and statistics. This course will provide a foundation in building NLP models to classify, generate, and learn from text data.

Requirements/Evaluation: Evaluation based on assignments, projects, and exams.

Prerequisites: CSCI 136, and either CSCI 256 or STAT 201/202.

Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors.

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Attributes: COGS Interdepartmental Electives

Fall 2024
LEC Section: 01 TR 9:55 am - 11:10 am Katie A. Keith

CSCI 381 (F) Deep Learning (QFR)
This course is an introduction to deep neural networks and how to train them. Beginning with the fundamentals of regression and optimization, the course then surveys a variety of neural network architectures, which may include multilayer feedforward neural networks, convolutional neural networks, recurrent neural networks, and transformer networks. Students will also learn how to use deep learning software such as PyTorch or Tensorflow.

Requirements/Evaluation: Evaluation based on assignments, projects, and exams.

Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement

Enrollment Limit: 24

Enrollment Preferences: Current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Attributes: COGS Interdepartmental Electives

Fall 2024
LEC Section: 01 MWF 9:00 am - 9:50 am Mark Hopkins

ECON 110 (F)(S) Principles of Microeconomics (QFR)
This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of popular or policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.

Requirements/Evaluation: problem sets, quizzes, short essays, two midterms, final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: This course is required of Economics and Political Economy majors and highly recommended for those non-majors interested in Environmental Studies and Women's, Gender and Sexuality Studies.

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

Unit Notes: The department recommends students follow this course with ECON 120 or with a lower-level elective that has ECON 110 as its prerequisite; students may alternatively proceed directly to ECON 251 after taking this introductory course.

Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

Attributes: POEC Required Courses

ECON 120 (F)(S) Principles of Macroeconomics (QFR)
This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings of exchange rates and international finance.

Requirements/Evaluation: Depending on instructor, may include: problem sets, short essays, quizzes, reading assignments, either one or two midterms, and a final exam.

Prerequisites: ECON 110

Enrollment Limit: 40

Enrollment Preferences: First-year students and sophomores.

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

ECON 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ENVI 213 / CAOS 213
We'll use economics to provide one perspective on reasons humans harm the environment and overuse natural resources, and what we can do about it. We'll study climate change, pollution in general, cost-benefit analysis, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns people may have about doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 30

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 213(D2) ENVI 213(D2) CAOS 213(D2)

Quantitative/Formal Reasoning Notes: We will use formal theory expressed in math and graphs, perform calculations, and consume statistical data.

Attributes: ENVI Environmental Policy EVST Social Science/Policy POEC Depth

Spring 2025
LEC Section: 01 MWF 8:30 am - 9:45 am Sarah A. Jacobson

ECON 229 (F) Law and Economics (QFR)

This course applies the tools of microeconomic analysis to private (i.e., civil) law. This analysis has both positive and normative aspects. The positive aspects deal with how individuals respond to the incentives created by the legal system. Examples include: how intellectual property law encourages the creation of knowledge while simultaneously restricting the dissemination of intellectual property; how tort law motivates doctors to avoid malpractice suits; and how contract law facilitates agreements. The normative aspects of the analysis ask whether legal rules enhance economic efficiency (or, more broadly, social welfare). Examples include: what legal rules are most appropriate for mitigating pollution, ensuring safe driving, and guaranteeing workplace safety? The course will also cover the economics of legal systems; for example, what are the incentives for plaintiffs to initiate lawsuits and what role do lawyers play in determining outcomes.

Class Format: discussion

Requirements/Evaluation: class participation, problem sets, paper based on actual court cases, a midterm exam, and a final exam

Prerequisites: ECON 110

Enrollment Limit: 35

Enrollment Preferences: ECON and POEC majors (and potential majors) will receive priority if the course is overenrolled

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: This course uses economic models to explore the logic of legal concepts. While some arguments will be qualitative, students will also use numerical examples to illustrate the principles of the course.

Attributes: JLST Interdepartmental Electives POEC Depth

Fall 2024
SEM Section: 01 W 7:00 pm - 9:40 pm William M. Gentry
The focus of the course will be on how firms, financial markets, and central banks interact in the economy. Key questions addressed in the course include: How do firms allocate their resources to enhance their value? How are firms evaluated by the financial markets? How are asset prices determined, and how are these prices related to interest rates? Are financial markets efficient, and what are the implications of their efficiency or lack thereof? How does the financial system help with the management of risks faced by society? We will also study the role of the central bank (the Federal Reserve in the US), monetary policy, and government regulation and their impacts on financial decision making. Key questions include: How do central banks set monetary policy and how do those policies affect the economy and the financial decision-making process? How does monetary policy change when interest rates are (virtually) zero?

Class Format: There will be a mix of lecture and discussion.

Requirements/Evaluation: 5-7 Problem Sets, Quantitative Exercises, Group Paper, and Final Exam

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 25

Enrollment Preferences: Sophomore and Junior Economics majors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: We will use mathematical models, graphs, and data analysis to understand financial decisions at the firm and economy-wide levels.

Attributes: POEC Depth

Spring 2025
LEC Section: 01  TR 11:20 am - 12:35 pm  Nate Vellekoop

ECON 251 (F)(S) Price and Allocation Theory (QFR)

A study of the determination of relative prices and their importance in shaping the allocation of resources and the distribution of income. Subjects include: behavior of households in a variety of settings, such as buying goods and services, saving, and labor supply; behavior of firms in various kinds of markets: results of competitive and noncompetitive markets in goods, labor, land, and capital; market failure; government policies as sources of and responses to market failure; welfare criteria; limitations of mainstream analysis.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and multiple exams, including a final exam. They may also include one or more quizzes, short essays, collaborative projects, or presentations.

Prerequisites: ECON 110 and MATH 130 or its equivalent

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics majors.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves developing and analyzing mathematical models of real-world phenomena, grounded in tools like calculus and game theory. Students are assumed to be comfortable with topics from introductory calculus, including differentiation and integration.

ECON 252 (F)(S) Macroeconomics (QFR)

A study of aggregate economic activity: output, employment, inflation, and interest rates. The class will develop a theoretical framework for analyzing economic growth and business cycles. The theory will be used to evaluate policies designed to promote growth and stability, and to understand economic developments in the U.S. and abroad. Instructors may use elementary calculus in assigned readings, exams and lectures.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and/or written assignments, midterm(s), and a final exam.

Prerequisites: ECON 110 and 120 and MATH 130 or its equivalent

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics majors.

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

ECON 255 (F)(S) Econometrics (QFR)

An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research, with a focus on understanding when a causal interpretation is warranted. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets, multiple exams, a group project, and possible additional assignments or quizzes.

Prerequisites: MATH 130, plus STAT 161, 201 or 202 (or equivalent, including a score of 5 on the AP Statistics Exam), plus one course in ECON; STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics and Political Economy majors.

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: Students may substitute the combination of STAT 201 and 346 for ECON 255

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course teaches research tools necessary to analyze data.

Attributes: POEC Required Courses

Fall 2024
LEC Section: 01 TR 11:20 am - 12:35 pm Owen Ozier
Evidence from across the developing world suggests that the "binding constraints" to economic growth can be remarkably heterogeneous—i.e., the growth potential of stagnating or underperforming economies may be unlocked in a large variety of ways. For instance, pre-reform China had been constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by bad governance, and so forth.

How can developing-country policymakers determine country-specific constraints like these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies rather than attempting to implement a "laundry list" of reforms that are naively based on "best practice" rules-of-thumb? This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to economic growth in a given country at a point in time, thereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the nation's prevailing economic, political, and social context. The course will first build on the basic theories and empirics of economic growth to elucidate the diagnostic framework and will then employ a wide range of country-specific case studies to demonstrate how the framework can be operationalized for policy making. Throughout the semester, students will be required to work in groups, each representing a given developing or emerging-market economy, in order to build a growth diagnostic for their group's assigned country by the end of the course.

**Requirements/Evaluation:** extensive class participation, several short (5-page) reports, a final group project comprising a country growth diagnostic, and a final group presentation on the diagnostic

**Prerequisites:** for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346

**Enrollment Limit:** 19

**Enrollment Preferences:** CDE fellows and senior Economics majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ECON 345(D2) ECON 545(D2)

**Quantitative/Formal Reasoning Notes:** The course material will be draw heavily on mathematical and statistical models of economic growth and macroeconomic development, and students will be required to routinely develop mathematical models and/or conduct econometric analysis in their assignments.
ECON 367  (S)  The Political Economy of Social Insurance  

The Great Society policies of the 1960s dramatically changed the ways people living in poverty interacted with the federal government, but the benefits associated with these policies seem to have stagnated. Since 1965, the annual poverty rate in the United States has hovered between 10% and 15%, though far more than 15% of Americans experience poverty at some point in their lives. In this course, we will study public policies that, explicitly or implicitly, have as a goal improving the well-being of the poor in the United States. These policies include social insurance programs such as Unemployment Insurance; safety net programs such as Temporary Assistance to Needy Families, Supplemental Nutrition Assistance Program, Medicaid, and housing assistance; education programs such as Head Start and public education; and parts of the tax code, including the Earned Income Tax Credit and Child Tax Credit. We will explore the design and function of these programs, with a particular focus on the context in which they were developed. What political incentives and constraints have strung up our social safety net? How do these factors affect the goals of policy, the trade-offs inherent to the policy’s design, and why poverty has not sustained a downward trend in the United States? Through careful consideration, students will learn how to communicate a path forward for public policy which accounts for theoretical economic expectations and the reality of political constraints in policy design.

Class Format: Lecture with substantial class discussion.

Requirements/Evaluation: Several short policy memos, participation in class discussion, and a final analytical essay.

Prerequisites: ECON 253 or 255

Enrollment Limit: 25

Enrollment Preferences: Students majoring in economics or political economy.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS) (QFR)

Writing Skills Notes: Students will write 4 policy memos over the course of the semester followed by a longer, final analytical essay. Synthesis of peer-reviewed literature, use of citation management systems, and clarity in technical writing will be emphasized. Students will receive timely, substantial, individualized feedback to develop their technical writing ability over the course of the semester. Opportunities to meet with professor outside of class at any stage of writing.

Quantitative/Formal Reasoning Notes: This course will use quantitative tools of economics. Focus on building data visualization & science communication skills after ECON 255.

Attributes: POEC Skills

Spring 2025

LEC Section: 01  TR 8:30 am - 9:45 am  Greg Phelan
and illustration. The course is particularly well suited for economics majors wishing to explore advanced empirical methods, or for statistics, mathematics or computer science majors wishing to learn more about the ways in which the subject of their majors interacts with the field of economics. The method of evaluation will include a term paper. ECON 252 and either STATS 346 or ECON 255 are formal prerequisites, although for students with exceptionally strong math/stats backgrounds these can be waived subject to instructor permission. Students who complete this course will also be permitted to enroll in Econ 471 (a follow up senior seminar course) during the spring semester if they are interested.

**Requirements/Evaluation:** term paper and regular homework assignments

**Prerequisites:** ECON 252 and either ECON 255 or STATS 346

**Enrollment Limit:** 19

**Enrollment Preferences:** students wishing to write an honors thesis, and students with strong MATH/STAT/CSCI backgrounds

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** Uses quantitative/formal reasoning intensively in the form of mathematical and statistical arguments, as well as computer programming.

---

ECON 384  (F)  Corporate Finance  (QFR)

This course analyzes the major financial decisions facing firms. While the course takes the perspective of a manager making decisions about both what investments to undertake and how to finance these projects, it will emphasize the underlying economic models that are relevant for these decisions. Topics include capital budgeting, links between real and financial investments, capital structure choices, dividend policy, and firm valuation.

**Class Format:** Lecture / discussion

**Requirements/Evaluation:** Problem sets, exams, short project

**Prerequisites:** ECON 251, 252, and some familiarity with statistics (e.g., ECON 255)

**Enrollment Limit:** 25

**Enrollment Preferences:** Economics majors; seniority

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** The course uses quantitative models to evaluate decisions.

---

ECON 385  (F)  Games and Information  (QFR)

This course is a mathematical introduction to strategic thinking and its applications. Ideas from game theory, including Nash equilibrium and its refinements, commitment and credibility, repeated games, and information asymmetries, incentive contracts, and signaling, will be introduced. Applications will be drawn from economics, history, and politics around the globe, and include topics such as: trust between strangers, corruption and fraud, racial bias, violence and deterrence. And we will explore how to write and recognize game-theory models to help make sense of strategic interactions in the world around us.

**Requirements/Evaluation:** Two exams, regular problem sets and assignments in which students create game-theoretic models.

**Prerequisites:** ECON 251 or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** juniors
ECON 389 (S) Tax Policy in Global Perspective (QFR)

Cross-listings:
Secondary Cross-listing

Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability for the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, many tax policy lessons are universal so we will also learn about tax policies in developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, several problem sets, two 10-page essays

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

Enrollment Limit: 19

Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome

Expected Class Size: 15-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 389(D2) ECON 514(D2)

Quantitative/Formal Reasoning Notes: The course builds on other QFR Reasoning econ classes.

Attributes: POEC Depth POEC Skills

Spring 2025

SEM Section: 01  MR 2:35 pm - 3:50 pm  Jon M. Bakija

ECON 454 (F) Macroeconomic Perspectives on Labor Markets (QFR)

This seminar will cover aggregate trends in the labor market from a macroeconomic perspective, along with the tools that economists use to study them. We will think about the workforce as a whole but we will also highlight research that studies heterogeneity within the economy, such as patterns by race, gender, education, or occupation. Students will learn basic search and matching models, as well as related empirical methods. We will read papers that employ a variety of survey and administrative data, and we will discuss what types of research questions are best answered by each data
source. We will use real data to apply the methods we learn. Potential topics include occupational mismatch, wage inequality, and monopsony.

Requirements/Evaluation: Class participation, short assignments, midterm exam, and a final project

Prerequisites: Econ 251, 252, and 255

Enrollment Limit: 19

Enrollment Preferences: Junior and senior economics majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course includes regular problem sets that require quantitative and formal reasoning skills.

Fall 2024

SEM Section: 01    MWF 8:30 am - 9:45 am     Caitlin E. Hegarty

ECON 471  (S)  Topics in Advanced Econometrics  (QFR)

The course uses both a practical and conceptual/theory based approach, with emphasis on methods of structural identification of dynamics in VARs and long run cointegration and nonlinear function estimation and analysis, both in conventional time series and especially panel time series which contain spatial dimensions. The course will also investigate methods of computer simulation related to these techniques. The course is well suited for students considering empirically oriented honors theses in fields that employ these techniques, such as macro, finance, growth, trade and development, as well as fields outside of economics that use time series data. It is also well suited for students majoring in economics, statistics, computer sciences or mathematics who wish to expand their econometrics training and understanding to a more advanced level.

Requirements/Evaluation: periodic homework assignments, term paper

Prerequisites: ECON 371

Enrollment Limit: 19

Enrollment Preferences: students with strong quantitative backgrounds, and to students intending to write an honors thesis

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course will make use of mathematics, statistics and computer analysis for the conceptualization and implementation of the econometric topics that are taught.

Spring 2025

SEM Section: 01    W 7:00 pm - 9:40 pm     Peter L. Pedroni

ECON 477  (F)  Economics of Environmental Behavior  (QFR)

Cross-listings: CAOS 477 / ENVI 376

Primary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to assess how policies can help or hurt the environment. Topics we may study include: common pool resources, voluntary conservation, social norms and nudges, discrimination and justice, rationality, firm responses to mandatory and voluntary regulation, voting and public opinion, and international environmental agreements. We'll also build familiarity with the main methodologies of modern economic research: theoretical modeling, empirical analysis of observational data, and experiments.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises and other interactive activities

Requirements/Evaluation: class participation, regular reading markup, empirical exercises, oral presentation(s), and an original research paper using an experiment, observational data, or theory
**ECON 514 (S) Tax Policy in Global Perspective** (QFR)

**Cross-listings:**

**Primary Cross-listing**

Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability for the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. ENVI 203  (F) Ecology  (QFR)

Cross-listings: BIOL 203

Secondary Cross-listing

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two midterm exams, and a final exam

Prerequisites: BIOL 102, or ENVI 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 203(D3) ENVI 203(D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to linear models, multidimensional data analysis and contingency tables.

ENVI 213  (S) Introduction to Environmental and Natural Resource Economics  (QFR)

Cross-listings: ECON 213 / CAOS 213

Secondary Cross-listing
We'll use economics to provide one perspective on reasons humans harm the environment and overuse natural resources, and what we can do about it. We'll study climate change, pollution in general, cost benefit analysis, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns people may have about doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

**Requirements/Evaluation:** problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

**Prerequisites:** ECON 110 or equivalent

**Enrollment Limit:** 30

**Enrollment Preferences:** first-year and sophomore students

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** this course will count toward both the Environmental Studies major and concentration

**Distributions:** (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 213(D2) ENVI 213(D2) CAOS 213(D2)

**ENVI 327 (F) Coastal Processes and Geomorphology (QFR)**

**Cross-listings:** GEOS 327 / CAOS 327

**Secondary Cross-listing**

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

**Class Format:** lecture two times a week with a lab one time per week

**Requirements/Evaluation:** lab reports, quizzes, and an independent research project

**Prerequisites:** Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

**Enrollment Limit:** 15

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 15
**ENVI 376 (F) Economics of Environmental Behavior** (QFR)

**LEC Section:** 01  MWF 8:30 am - 9:45 am  Alex A. Apotsos

**INTR 150 (F) Data for Justice**  (DPE) (QFR)

**Cross-listings:** STS 150 / AMST 150 / SOC 150 / WGSS 150

**Primary Cross-listing**

This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

**Class Format:** This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.

**Requirements/Evaluation:** Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

**Prerequisites:** None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

**Enrollment Limit:** 18

**Enrollment Preferences:** Students without prior college-level courses in statistics and programming.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

**Difference, Power, and Equity Notes:** This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGBTQ+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

**Quantitative/Formal Reasoning Notes:** This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

**INTR 350 (S) Data for Justice Research Practicum**  (DPE) (QFR)

---
Cross-listings:  WGSS 363 / STS 363 / AMST 363

Primary Cross-listing

Civil rights activist, educator, and investigative journalist Ida B. Wells said that “the way to right wrongs is to shine the light of truth upon them.” In this inclusive, collaborative, research-based course, students will bring statistical, computational, and/or mathematical approaches to bear on issues of social justice. Guided closely by the instructor, students will work in groups to carry out original research in an area such as criminal justice, education equity, environmental justice, health care equity, economic justice, or inclusion in arts/media. Prior research experience is not required; one goal of this course is to build skills for advanced research.

Class Format: This course is an intensive research practicum. Formation of research groups and selection of research topics will be facilitated by the instructor. The primary modality of work is peer collaboration.

Requirements/Evaluation: To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based, ungraded assessment framework.

Prerequisites: INTR 150 (Data for Justice), or prior equivalent exposure to computing, statistics, and social justice topics as approved by the instructor.

Enrollment Limit: 10

Enrollment Preferences: Students who have a declared major in Division I or II, who meet the prerequisites of the course, and who fill out the instructor's preregistration survey (contact the instructor for link).

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 363(D2) STS 363(D2) INTR 350(D2) AMST 363(D2)

Difference, Power, and Equity Notes: Students will research issues of social justice in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

Quantitative/Formal Reasoning Notes: Students will use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

Spring 2025

SEM Section: 02  TR 11:20 am - 12:35 pm  Chad M. Topaz

MATH 113  (S)  The Beauty of Numbers  (QFR)

This course will be an introduction to number theory and mathematical thinking and logic, with emphasis throughout on mathematics as a way of thinking and approaching the world. Have you ever wondered what keeps your credit card information safe every time you buy something online? Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptology. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat's Last Theorem, the Golden ratio, Fibonacci numbers, coding theory, and unique factorization. This course is meant to give you an appreciation for numbers and mathematics and to enhance your logical reasoning skills. Although most people will not use calculus or geometry in their jobs or everyday lives, mathematics enhances our abilities to think logically and reason effectively. This skill is useful in all aspects of life. Number theory, in particular, is a great area of mathematics that allows one to jump in right away without a lot of pre-requisite knowledge. We will look at examples, look for patterns, make conjectures, and we will spend a lot of time learning how to rigorously prove those conjectures.

Requirements/Evaluation: projects, homework assignments, and exams

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test) or permission of instructor. Anyone who has previously taken a 200-level math course or higher must obtain instructor permission to take the course.

Enrollment Limit: 25

Enrollment Preferences: If over-enrolled, course selection will be based on answers to a questionnaire.

Expected Class Size: 25
Spring 2025

LEC Section: 01    TR 11:20 am - 12:35 pm    Allison Pacelli

MATH 130  (F)(S)  Calculus I  (QFR)
Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

Requirements/Evaluation: Weekly homework and quizzes, 2 exams during the semester, and one final
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before
Enrollment Limit: 50
Enrollment Preferences: first-year students
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Unit Notes: students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes: This a calculus course.

Fall 2024

LEC Section: 01    MWF 8:00 am - 8:50 am    Lori A. Pedersen
LEC Section: 02    MWF 9:00 am - 9:50 am    Lori A. Pedersen

Spring 2025

LEC Section: 01    MWF 9:00 am - 9:50 am    Leo Goldmakher

MATH 140  (F)(S)  Calculus II  (QFR)
Calculus answers two basic questions: how fast is something changing (the derivative) and how much is there (the integral). This course is about integration, and the miracle that unites the derivative and the integral (the Fundamental Theorem of Calculus.) Understanding calculus requires in part the understanding of methods of integration. This course will also solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions will also play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

Requirements/Evaluation: homework, quizzes, and/or exams
Prerequisites: MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor
Enrollment Limit: 50
Enrollment Preferences: based on who needs calculus the soonest
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: students who have higher advanced placement must enroll in MATH 150 or above
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes: This is a math class
MATH 150  (F)(S)  Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations.

Requirements/Evaluation:  Problem sets and exams

Prerequisites:  MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination

Enrollment Limit:  50

Enrollment Preferences:  Preference will be given to prospective math and stats majors, or students who need this as a course to serve as a prerequisite for other courses.

Expected Class Size:  40

Grading:  yes pass/fail option,     yes fifth course option

Unit Notes:  Students with the equivalent of advanced placement of AB 4 or above should enroll in MATH 150, students with a BC 3 or higher should enroll in Math 151 when it is being offered, and Math 150 otherwise.

Distributions:  (D3)  (QFR)

Quantitative/Formal Reasoning Notes:  mathematics

FALL 2024

LEC Section: 01    MWF 9:00 am - 9:50 am     Bhagya  Athukorallage
LEC Section: 02    MWF 12:00 pm - 12:50 pm     Bhagya  Athukorallage

SPRING 2025

LEC Section: 01    MWF 10:00 am - 10:50 am     Christina  Athanasouli

MATH 151  (F)  Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of the theorems of vector calculus. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Requirements/Evaluation:  problem sets and exams

Prerequisites:  AP BC 3 or higher or integral calculus with infinite series

Enrollment Limit:  50

Enrollment Preferences:  First-years, sophomores, and juniors

Expected Class Size:  40

Grading:  yes pass/fail option,     yes fifth course option

Unit Notes:  MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151

Distributions:  (D3)  (QFR)

Quantitative/Formal Reasoning Notes:  This course builds quantitative skills
MATH 200  (F)(S) Discrete Mathematics  (QFR)
In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary combinatorics and probability, and graphs. Emphasis will be given on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.

Class Format: This will not be a typical lecture course; instead it will be a blend of lecture and discovery-based learning, with weekly small group meetings with TA's.

Requirements/Evaluation: Spring: Evaluation will be based on homework, exams, and participation in weekly small group meetings.

Prerequisites: Calculus at the level of an AP course or Williams College Math 130 or 140. Students who have taken a 300-level or 400-level math course should obtain permission of the instructor before enrolling.

Enrollment Limit: 40
Enrollment Preferences: Preference given to first and second year students intending to major in mathematics or computer science.

Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)

Quantitative/Formal Reasoning Notes: This course involves developing the formal mathematical language of logic and set theory. It also involves using quantitative tools to solve problems relating to combinatorics, probability, number theory, and other fields of discrete mathematics.

MATH 210  (S) Mathematical Methods for Scientists  (QFR)
Cross-listings: PHYS 210
Secondary Cross-listing
This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week

Requirements/Evaluation: several exams and weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit: 50

Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)  (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 210(D3) MATH 210(D3)

Quantitative/Formal Reasoning Notes: This course will have weekly problem sets using advanced calculus methods

Spring 2025
LEC Section: 01    TR 9:55 am - 11:10 am    Frederick W. Strauch

MATH 250  (F)(S) Linear Algebra  (QFR)
Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Requirements/Evaluation: homework and exams
Prerequisites: MATH 150/151 or MATH 200
Enrollment Limit: 60
Enrollment Preferences: Students who have officially declared a major that requires Math 250.
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)
Quantitative/Formal Reasoning Notes: In this course, students will engage in both quantitative and formal reasoning.
Attributes: COGS Related Courses

LEC Section: 02    MWF 10:00 am - 10:50 am    Ivo Terek

MATH 309  (F)(S) Differential Equations  (QFR)
Ordinary differential equations (ODEs) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODEs from an applied standpoint. Topics covered early in the course may include numerical solutions, separation of variables, integrating factors, and constant coefficient linear equations. Later, we will focus on nonlinear ODEs, for which it is usually impossible to find analytical solutions. Tools from dynamical systems will be introduced to allow us to obtain information about the behavior of the ODEs without explicitly knowing the solution.

Requirements/Evaluation: quizzes/exams, problem sets, participation
Prerequisites: MATH 150/151 and MATH 250
Enrollment Limit: 40
Enrollment Preferences: discretion of the instructor
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)
Quantitative/Formal Reasoning Notes: 300-level mathematics course

Fall 2024
MATH 313 (S) Introduction to Number Theory  (WS) (QFR)
The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of number and prime in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer. This course will include a significant focus on mathematical proof writing and problem solving skills. This includes writing clear and rigorous mathematical proofs, clearly explaining mathematical ideas verbally and in writing, determining how to approach certain types of problems, looking for patterns and making conjectures, and asking good questions about the implications of certain ideas and theorems.

Requirements/Evaluation: Problem sets, project, and exams
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: If course is over-enrolled, enrollment preference will be based on answers to a questionnaire. Some preference will be given to students who have not yet had Math 355.
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (WS) (QFR)
Writing Skills Notes: Students will complete weekly problem sets, with a strong emphasis on proof writing, as well as 2 5-10 page papers/projects. There will be feedback given on mathematical writing as well as accuracy, and discussion time during class on writing in math.
Quantitative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Spring 2025
LEC Section: 01    TR 9:55 am - 11:10 am     Allison  Pacelli

MATH 326 (F) Differential Geometry  (QFR)
Differential Geometry is the study of curvature. In turn, curvature is the heart of geometry. The goal of this course is to start the study of curvature, concentrating on the curvature of curves and of surfaces, leading to the deep Gauss-Bonnet Theorem, which links curvature with topology.
Class Format: lecture
Requirements/Evaluation: Evaluation will be based primarily on problem sets, midterms and a final exam
Prerequisites: MATH 250
Enrollment Limit: 30
Enrollment Preferences: Preference to mathematics majors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: It is a mathematics upper level course.

Fall 2024
LEC Section: 01    MWF 11:00 am - 11:50 am  Ivo  Terek

MATH 331 (F) The Little Questions  (QFR)
Using math competitions such as the Putnam Exam as a springboard, in this class we follow the dictum of the Ross Program and "think deeply of
simple things”. The two main goals of this course are to prepare students for competitive math competitions, and to get a sense of the mathematical landscape encompassing elementary number theory, combinatorics, graph theory, and group theory (among others). While elementary frequently is not synonymous with easy, we will see many beautiful proofs and “a-ha” moments in the course of our investigations. Students will be encouraged to explore these topics at levels compatible with their backgrounds.

**Requirements/Evaluation**: homework, classwork, and exams  
**Prerequisites**: MATH 250 or permission of instructor  
**Enrollment Limit**: 30  
**Enrollment Preferences**: members or alternates of the Putnam team, Mathematics, Physics or Computer Science majors  
**Expected Class Size**: 25  
**Grading**: yes pass/fail option, yes fifth course option  
**Unit Notes**: [http://web.williams.edu/Mathematics/sjmiller/public_html/331Fa24/](http://web.williams.edu/Mathematics/sjmiller/public_html/331Fa24/)  
**Distributions**: (D3) (QFR)  
**Quantitative/Formal Reasoning Notes**: This is an upper level math course where students learn advanced material and solve challenging problems.

LEC Section: 01  
MWF 10:00 am - 10:50 am  
Steven J. Miller

**MATH 334 (S) Graph Theory** (QFR)  
A graph is a collection of vertices, joined together by edges. In this course, we will study the sorts of structures that can be encoded in graphs, along with the properties of those graphs. We’ll learn about such classes of graphs as multi-partite, planar, and perfect graphs, and will see applications to such optimization problems as minimum colorings of graphs, maximum matchings in graphs, and network flows.

**Requirements/Evaluation**: problem sets, exams, and a short final project  
**Prerequisites**: MATH 200 or MATH 250  
**Enrollment Limit**: 30  
**Enrollment Preferences**: Math majors  
**Expected Class Size**: 25  
**Grading**: yes pass/fail option, yes fifth course option  
**Distributions**: (D3) (QFR)  
**Quantitative/Formal Reasoning Notes**: This course involves the writing of mathematical proofs.

MWF 9:00 am - 9:50 am  
Ralph E. Morrison

**MATH 338 (F) Intermediate Logic** (QFR)  
**Cross-listings**: PHIL 338  
**Secondary Cross-listing**

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.
Requirements/Evaluation: problem sets and exams
Prerequisites: some class in which student has studied formal reasoning
Enrollment Limit: 20
Enrollment Preferences: Philosophy majors; juniors and seniors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 338(D2) MATH 338(D3)
Quantitative/Formal Reasoning Notes: This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.

SEM Section: 01 TF 2:35 pm - 3:50 pm Keith E. McPartland

MATH 341 (F)(S) Probability (QFR)
Cross-listings: STAT 341
Primary Cross-listing
The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.
Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 150 and MATH 250 or permission of the instructor
Enrollment Limit: 50
Enrollment Preferences: Priority will be given to Mathematics majors and to Statistics Majors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:

MATH 345 (S) Introduction to Numerical Analysis (QFR)
Numerical analysis is the study of algorithms that use numerical approximation to solve problems which arise in scientific applications. This course provides an introduction to the theory, development, and analysis of algorithms for obtaining numerical solutions. We will also use mathematical software to facilitate numerical experimentation. Topics discussed in the course include: Error Analysis and Convergence Rates of Algorithms; Root Finding for Nonlinear Equations; Approximating Functions; Numerical Differentiation and Integration; Numerical Solutions of Ordinary Differential Equations; Iterative Methods for Solving Linear Systems.
Requirements/Evaluation: Evaluation will be based on homework, projects, and exams.
Prerequisites: Math 250 and Math 150/151
Enrollment Limit: 30
Enrollment Preferences: Mathematics and Statistics majors.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is an advanced mathematics class that will cover the fundamental ideas of Numerical Analysis. The students will study in depths various algorithms that provide numerical solutions to various questions in science.

Spring 2025
LEC Section: 01    MWF 11:00 am - 11:50 am    Christina Athanasouli

MATH 350  (F)(S)  Real Analysis  (QFR)
Why is the product of two negative numbers positive? Why do we depict the real numbers as a line? Why is this line continuous, and what do we mean when we say that? Perhaps most fundamentally, what is a real number? Real analysis addresses such questions, delving into the structure of real numbers and functions of them. Along the way we'll discuss sequences and limits, series, completeness, compactness, derivatives and integrals, and metric spaces. Results covered will include the Cantor-Schroeder-Bernstein theorem, the monotone convergence theorem, the Bolzano-Weierstrass theorem, the Cauchy criterion, Dirichlet's and Riemann's rearrangement theorem, the Heine-Borel theorem, the intermediate value theorem, and many others. This course is excellent preparation for graduate studies in mathematics, statistics, and economics.
Requirements/Evaluation: Problem sets and exams.
Prerequisites: MATH 250 or permission of instructor.
Enrollment Limit: 40
Enrollment Preferences: Juniors and Seniors.
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is an advanced mathematics course.

MATH 351  (S)  Applied Real Analysis  (QFR)
This course is designed to introduce students to the underpinnings of real analysis, primarily in the context of Fourier series. By the end of the semester people will be comfortable making epsilon and delta type arguments. These types of arguments are one of the main pillars of modern mathematics. In a similar way, Fourier series and their generalizations are one of the pillars of the modern digital world.
Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 150 and MATH 250 or permission of the instructor.
Enrollment Limit: 50
Enrollment Preferences: Seniors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
MATH 355 (F)(S) Abstract Algebra (QFR)
Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.
Requirements/Evaluation: Problem sets and exams
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: Students who have officially declared a major that requires Math 355.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: 300-level math course

MATH 361 (F) Theory of Computation (QFR)
Secondary Cross-listing
This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.
Requirements/Evaluation: weekly problem sets and one or more exams
Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor
Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
MATH 361(D3) CSCI 361(D3)
Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.
MATH 374 (F) Topology (QFR)

In Real Analysis you learned about metric spaces—any set of objects endowed with a way of measuring distance—and the topology of sets in such spaces (open, closed, bounded, etc). In this course we flip this on its head: we explore how to develop analysis (limits, continuity, etc) in spaces where the topology is known but the metric is not. This will lead us to a bizarre and fascinating version of geometry in which we cannot distinguish between shapes that can be continuously deformed into one another. Not only does this theory turn out to be beautiful in the abstract, it plays an important role in math, physics, and data analysis. This course is excellent preparation for graduate programs in mathematics.

Requirements/Evaluation: Problem sets, exams, an expository essay.
Prerequisites: MATH 350 or 351; not open to students who have taken MATH 323. If you didn't cover metric spaces in real analysis, that's OK!
Enrollment Limit: 30
Enrollment Preferences: Juniors and seniors
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: It's math.

LEC Section: 02 TR 9:55 am - 11:10 am Shikha Singh

MATH 382 (S) Fourier Analysis (QFR)

Fourier analysis is the study of waves and frequencies. More precisely, the goal of Fourier analysis is to decompose a complicated function into a simple combination of pure waves, thereby gleaning insight into the behavior of the function itself. It's difficult to overstate the impact of this branch of mathematics; it is foundational throughout theoretical mathematics (e.g., to study the distribution of prime numbers), applied mathematics (e.g., to solve differential equations), physics (e.g., to study properties of light and sound), computer science (e.g., to compute with large integers and matrices), audio engineering (e.g., to pitch-correcting algorithms), medical science (e.g., throughout radiology), etc. The goal of this course is to cover the basic theory (fourier series, the fourier transform, the fast fourier transform) and explore a number of applications, including Dirichlet's theorem on primes in arithmetic progressions, the isoperimetric inequality, the heat equation, and Heisenberg's uncertainty principle.

Class Format: Every week, each student will either give a lecture (based on provided readings) or explain solutions to selected problems.
Requirements/Evaluation: Evaluation will be based on lectures and presentation of problem solutions.
Prerequisites: MATH 350 or MATH 351 or permission of instructor.
Enrollment Limit: 10
Enrollment Preferences: By lottery.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: It's math!

Spring 2025
TUT Section: T1 TBA Leo Goldmakher
MATH 389 (S) Advanced Analysis (WS) (QFR)
This course further develops and explores topics and concepts from real analysis, with special emphasis on introducing students to subject matter and techniques that are useful for graduate study in mathematics or an allied field. Material will be drawn, based on student interest, from many areas, including analytic number theory, Fourier series and harmonic analysis, generating functions, differential equations and special functions, integral operators, equidistribution theory and probability, random matrix theory and probabilistic methods. This will be an intense, fast paced class which will give a flavor for graduate school. In addition to standard homework problems, students will also write reviews for MathSciNet, referee papers for journals, write programs in SAGE or Mathematica to investigate and conjecture, and read classic and current research papers.

Class Format: lecture

Requirements/Evaluation: evaluation will be based primarily on homework, classwork, and exams
Prerequisites: MATH 350 or 351 and one additional 300-level MATH course, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students interested in graduate school in mathematics or an allied discipline

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: http://web.williams.edu/Mathematics/sjmiller/public_html/389/

Distributions: (D3) (WS) (QFR)

Writing Skills Notes: Students will improve and expand their writing skills by taking course material as a starting point and writing chapters for a book under contract with the American Mathematical Society. This will involve numerous iterations of the content, with feedback both from the professor and from an editor.

Quantitative/Formal Reasoning Notes: This is a post-core 300 level math class.

Spring 2025
LEC Section: 01 TR 11:20 am - 12:35 pm Steven J. Miller

MATH 403 (F) Measure and Ergodic Theory (QFR)
An introduction to measure theory and ergodic theory. Measure theory is a generalization of the notion of length and area, and has been used in the study of stochastic (probabilistic) systems. The course covers the construction of Lebesgue and Borel measures, measurable functions, and Lebesque integration. Ergodic theory studies the probabilistic behavior of dynamical systems as they evolve through time, and is based on measure theory. The course will cover basic notions, such as ergodic transformations, weak mixing, mixing, Bernoulli transformations, and transformations admitting and not admitting an invariant measure. There will be an emphasis on specific examples such as group rotations, the binary odometer transformations, and rank-one constructions. The Ergodic Theorem will also be covered, and will be used to illustrate notions and theorems from measure theory.

Requirements/Evaluation: Homework and exams

Prerequisites: MATH 350 or MATH 351 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Mathematics majors

Expected Class Size: 15-20

Grading: yes pass/fail option, yes fifth course option

Unit Notes: senior major course

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It is an advanced mathematics course.

Fall 2024
LEC Section: 01 MR 2:35 pm - 3:50 pm Cesar E. Silva

MATH 408 (F) L-Functions and Sphere Packing (WS) (QFR)
Optimal packing problems arise in many important problems, and have been a source of excellent mathematics for centuries. The Kepler Problem
(what is the most efficient way to pack balls in three-space) is a good example. The original formulation has been used in such diverse areas as stacking cannonballs on battleships to grocers preparing fruit displays, and its generalizations allow the creation of powerful error detection and correction codes. While the solution of the Kepler Problem is now known, the higher dimensional version is very much open. There has been remarkable progress in the last few years, with number theory playing a key role in these results. We will develop sufficient background material to understand many of these problems and the current state of the field. Pre-requisites are real analysis.

**Requirements/Evaluation:** Class participation, homework, exams and participation in writing a textbook on the material. Each student will be responsible for working on a chapter of a book based on this material. In addition to obtaining critical writing feedback from myself and my co-author (who is a world expert in the subject), depending on timing we will also be able to share comments from an editor of a major publishing house or a referee. Chapters can range from short snapshots of a subject, on the order of 5 pages, to longer technical derivations of perhaps 10-30 pages.

**Prerequisites:** Math 350 or 351

**Enrollment Limit:** 40

**Enrollment Preferences:** Senior math majors, students planning on graduate study in a STEM field

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (WS) (QFR)

**Writing Skills Notes:** Students will improve and expand their writing skills by taking course material as a starting point and writing chapters for a book under contract with the American Mathematical Society. This will involve numerous iterations of the content, with feedback both from the professor and from an editor.

**Quantitative/Formal Reasoning Notes:** This is a 400 level math class

---

**MATH 411 (S) Commutative Algebra** (QFR)

Commutative Algebra is an essential area of mathematics that provides indispensable tools to many areas, including Number Theory and Algebraic Geometry. This course will introduce you to the fundamental concepts for the study of commutative rings, with a special focus on the notion of "prime ideals," and how they generalize the well-known notion of primality in the set of integers. Commutative algebra has applications ranging from algebraic geometry to coding theory. For example, one can use commutative algebra to create error correcting codes. It is perhaps most often used, however, to study curves and surfaces in different spaces. To understand these structures, one must study polynomial rings over fields. This course will be an introduction to commutative algebra. Possible topics include polynomial rings, localizations, primary decomposition, completions, and modules.

**Requirements/Evaluation:** homework and exams

**Prerequisites:** MATH 355 or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** Math majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** It is a 400-level math course

---

**MATH 412 (S) Mathematical Biology** (QFR)

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability.
Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications may include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

**Requirements/Evaluation:** problem sets, quizzes/exams, participation, final project and paper

**Prerequisites:** MATH 250 and MATH 309, or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** preference for senior math/stats major and also based on an interest statement

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 412(D3) BIOL 420(D3)

**Quantitative/Formal Reasoning Notes:** The course will introduce methods for developing and analyzing mathematical models.

---

Spring 2025

LEC Section: 01  TR 9:55 am - 11:10 am  Julie C. Blackwood

**MATH 426 (F) Differential Topology** (QFR)

Differential topology marries the rubber-like deformations of topology with the computational exactness of calculus. This subfield of mathematics asks and answers questions like "Can you take an integral on the surface of doughnut?" and includes far-reaching applications in relativity and robotics. This tutorial will provide an elementary and intuitive introduction to differential topology. We will begin with the definition of a manifold and end with a generalized understanding of Stokes Theorem.

**Requirements/Evaluation:** weekly homework and exams, and possibly student presentations

**Prerequisites:** MATH 350 (students who have not taken MATH 350 may enroll only with permission of the instructor)

**Enrollment Limit:** 30

**Enrollment Preferences:** mathematics seniors, mathematics majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** There will be weekly math problem sets.

---

Fall 2024

LEC Section: 01  MWF 9:00 am - 9:50 am  Ivo Terek

**MATH 453 (S) Partial Differential Equations** (QFR)

In this course, we further explore the world of differential equations. Mainly, we cover topics in partial differential equations. Partial Differential Equations (PDEs) are fundamental to the modeling of many natural phenomena, arising in many fields, including fluid mechanics, heat and mass transfer, electromagnetic theory, finance, elasticity, and more. The goals of this course are to discuss the following topics: classification of PDEs in terms of order, linearity and homogeneity; physical interpretation of canonical PDEs; solution techniques, including separation of variables, series solutions, integral transforms, and the method of characteristics.

**Requirements/Evaluation:** Evaluation will be based on homework, projects, and exams.

**Prerequisites:** MATH 150-151; MATH/PHYS 210 or MATH 309

**Enrollment Limit:** 20

**Enrollment Preferences:** Mathematics and Physics majors.

**Expected Class Size:** 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is an advanced mathematics class dedicated to the study of partial differential equations (PDEs). These equations are the most important mathematical tools for the study of complex physical phenomena such as waves and fluids (including both air and water), heat transfer, electromagnetism, and finance.

Spring 2025
LEC Section: 01  TR 11:20 am - 12:35 pm  Bhagya Athukorallage

PHIL 203  (S) Introductory Logic  (QFR)
Logic is the study of reasoning and argument. More particularly, it concerns itself with the differences between good and bad reasoning, between strong and weak arguments. This course is an introduction to the precise characterization of good logical reasoning. We will learn a to a formal language, Monadic First-Order Logic, designed to cleanly represent good inference patterns. Learning this language will primarily involve learning two skills: (i) translation between sentences of English and formulas of the logical language, and (ii) proving the validity of logical arguments using a system of natural deduction. No prior mathematical/logical/formal experience is assumed for this course.

Requirements/Evaluation: A midterm, a final, frequent problem sets.
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: Preference given to philosophy majors.
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: This course teaches two formal languages of logic: sentential logic and predicate logic.
Attributes: Linguistics  PHIL Contemp Metaphysics + Epistemology Courses

Spring 2025
LEC Section: 01  MR 1:10 pm - 2:25 pm  Christian De Leon

PHIL 221  (F) Introduction to Formal Linguistics  (QFR)
Cross-listings: COGS 224
Secondary Cross-listing
The sentence "Every cookie is chocolate chip and three of them are oatmeal raisin" is a perfectly grammatical sentence of English, but it's self-contradictory. What does it take to realize this fact? One must grasp the meanings of the various parts of the sentence. In particular, one must grasp that "three of them" picks out a subset of the group picked out by "every cookie", and that there's no such thing as a cookie that is both chocolate chip and oatmeal raisin. There two ways to understand "Many students took every class". According to one, there is a single group of students that had their hands extremely full this semester. According to the other, every class was well-populated, potentially by different groups. The reason for this is that there are two underlying structures that the original sentence can realize. This course serves as an introduction to formal methods in the scientific study of language. Our goal will be to characterize phenomena like those above with logical and mathematical precision. The focus will be on model-theoretic semantics, the sub-field of linguistics that studies meanings. Along the way we will discuss principles of syntax, the sub-field that studies sentence structures, and pragmatics, the sub-field that studies inferences of non-literal content. This is a formal course, but no prior logical or mathematical background will be expected. Starting from scratch, students will learn the building blocks of current-day linguistic research. This introduction will be of use to students interested in language from a variety of perspectives, including philosophy, cognitive science, and computer science.

Requirements/Evaluation: Weekly problem sets, plus a final project (paper/presentation/other type, to be discussed with instructor)
Prerequisites: No prerequisites
Enrollment Limit: 20
Enrollment Preferences: Preference given to seniors and philosophy/cognitive science majors.
Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 221(D2) COGS 224(D2)

Quantitative/Formal Reasoning Notes: This course teaches the fundamentals of the formal analysis of language. Students will learn to provide translation schemes from English to a logical language (typed lambda calculus).

Fall 2024
LEC Section: 01 MR 1:10 pm - 2:25 pm Christian De Leon

PHIL 338 (F) Intermediate Logic (QFR)

Cross-listings: MATH 338

Primary Cross-listing

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.

Requirements/Evaluation: problem sets and exams

Prerequisites: some class in which student has studied formal reasoning

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors; juniors and seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 338(D2) MATH 338(D3)

Quantitative/Formal Reasoning Notes: This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.

PHYS 108 (S) Energy Science and Technology (QFR)

Cross-listings: ENVI 108

Primary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range
of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating and lighting, and energy storage. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: Two meetings per week. Some weeks that means two lectures. Other weeks, that means one lecture plus one lab, with the class divided between two lab sections.

Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 10 per lab

Enrollment Preferences: non-physics majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 108(D3) PHYS 108(D3)

Quantitative/Formal Reasoning Notes: problems sets, exams, and projects will all have a quantitative aspects.

PHYS 131  (F) Introduction to Mechanics  (QFR)

We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

Requirements/Evaluation: exams, labs, and weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead

Enrollment Limit: 24 per lab

Enrollment Preferences: seniority

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Unit Notes: PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This class will have weekly problem sets requiring substantial quantitative reasoning

LAB Section: 03 T 1:00 pm - 4:00 pm Graham K. Giovanetti

PHYS 132  (S) Electromagnetism and the Physics of Matter  (QFR)
This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.

Class Format: lecture three hours per week, laboratory three hours approximately every other week, and conference section 1 hour approximately every other week

Requirements/Evaluation: weekly problem sets, labs, quizzes and exams

Prerequisites: PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)

Enrollment Limit: 22 per lab

Enrollment Preferences: sophomores

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Significant homework, exams, quizzes requiring mathematical and physical reasoning.

LAB Section: 03  T 1:00 pm - 4:00 pm  Catherine Kealhofer

PHYS 141  (F) Mechanics and Waves  (QFR)

This is the typical first course for a prospective physics major. It covers most of the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

Class Format: lecture, three hours per week; laboratory, three hours approximately every other week; conference section, 1.5 hours approximately every other week

Requirements/Evaluation: weekly problem sets, labs, two 1-hour exams, and a final exam, all of which have a substantial quantitative component

Prerequisites: High school physics (strongly recommended) and MATH 130 or equivalent placement, or permission of the instructor. High school physics at the AP, IB, or equivalent level is neither required nor expected.

Enrollment Limit: 24 per lab

Enrollment Preferences: first-year students and science majors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Unit Notes: PHYS 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course consists of lectures, problem-solving conferences, lab exercises, problem sets and exams, all of which have a substantial quantitative component.

LAB Section: 03  T 1:00 pm - 4:00 pm  Betul Pamuk
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity, which extends physics into the realm of high speeds and high energies, requires us rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our expectation of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course will survey ideas from each of these three arenas, and can serve either as a terminal course for those seeking to complete a year of physics or as the basis for future advanced study of these topics.

**Class Format:** lecture, three hours weekly; laboratory, 2-3 hours most weeks, alternating between 'hands-on' sessions and problem-solving/discussion sessions

**Requirements/Evaluation:** weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 141 and MATH 130, or equivalent; PHYS 131 may substitute for PHYS 141 with the permission of instructor; students may not take both PHYS 142 and PHYS 151

**Enrollment Limit:** 14/L

**Enrollment Preferences:** first-year students

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Heavily problem-solving focused, involving algebraic manipulations, single-variable calculus, generating and reading graphs, etc.

---

**PHYS 151  (F) Seminar in Modern Physics  (QFR)**

Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course covers the same core material as PHYS 142 but in a small seminar format for students with strong prior preparation in physics.

**Class Format:** lecture/discussions plus one 3-hour lab per week

**Requirements/Evaluation:** class participation, weekly lab assignments, weekly problem sets, exams

**Prerequisites:** placement by the department (see "advanced placement" section in the description about the department). Students may take either PHYS 142 or PHYS 151 but not both

**Enrollment Limit:** 18

**Enrollment Preferences:** first-years

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** this is a small seminar designed for first-year students who have placed out of PHYS 141

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** all assignments in the course have a substantial quantitative component

PHYS 201 (F) Electricity and Magnetism (QFR)
The classical theory of electricity and magnetism is very rich yet it can be written in a remarkably succinct form using Maxwell’s equations. This course is an introduction to electricity and magnetism and their mathematical description, connecting electric and magnetic phenomena via the special theory of relativity. Topics include electrostatics, magnetic fields, electromagnetic induction, DC and AC circuits, and the electromagnetic properties of matter. The laboratory component of the course is an introduction to electronics where students will develop skills in building and debugging electrical circuits.

Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: problem sets, labs/conference section assignments, two midterms, and a final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 142 OR 151; MATH 150 or 151; with a preference for MATH 151
Enrollment Limit: 10 per lab
Enrollment Preferences: prospective physics majors, then by seniority
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course involves significant problem-solving and mathematical analysis of phenomena using calculus, numerical methods, and other quantitative tools.

PHYS 202 (S) Vibrations, Waves and Optics (QFR)
Waves and oscillations characterize many different physical systems, including vibrating strings and springs, waves at the beach, or those that we hear as sound or see as light. Quantum mechanics describes particles with wave functions, and gravitational waves distort the very fabric of the universe. Despite these diverse settings, waves exhibit several common characteristics, so understanding of a few simple systems can provide insight into a wide array of phenomena. In this course we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. We conclude with a focus on electromagnetic waves and in particular on optical examples of wave phenomena such as interference, diffraction, and lasers. Throughout the course we will introduce and develop mathematical tools which will continue to see use in higher-level physics.

Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: problem sets, labs, midterm examinations, and a final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 201; co-requisite: PHYS/MATH 210 or MATH 309 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: sophomores
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Weekly problem sets and laboratories which develop and use quantitative skills.

LAB Section: 02  W 1:00 pm - 4:00 pm  Frederick W. Strauch
LAB Section: 03  R 1:00 pm - 4:00 pm  Frederick W. Strauch
PHYS 210 (S) Mathematical Methods for Scientists (QFR)

Cross-listings: MATH 210

Primary Cross-listing

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week

Requirements/Evaluation: several exams and weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit: 50

Enrollment Preferences: sophomores and juniors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 210(D3) MATH 210(D3)

Quantitative/Formal Reasoning Notes: This course will have weekly problem sets using advanced calculus methods

Spring 2025

LEC Section: 01 TR 9:55 am - 11:10 am Frederick W. Strauch

PHYS 234 (S) Introduction to Materials Science (QFR)

Cross-listings: GEOS 234

Primary Cross-listing

Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

Class Format: lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

Requirements/Evaluation: weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: based on students' scientific background and seniority

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course does not count toward the Geosciences major.

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 234(D3) GEOS 234(D3)

Quantitative/Formal Reasoning Notes: Weekly problem sets and exams all have a substantial quantitative component.
PHYS 301 (F) Quantum Physics (QFR)
This course serves as a one-semester introduction to the formalism, and phenomenology of quantum mechanics, beginning with a discussion of the Schrodinger wave equation, the concept of matter waves, and wave-packets. With this introduction as background, we will continue our discussion with a variety of one-dimensional problems such as the particle-in-a-box and the harmonic oscillator. We then extend this work to systems in two and three dimensions, including a detailed discussion of the structure of the hydrogen atom. Along the way we will develop connections between mathematical formalism and physical predictions of the theory. Finally, we conclude the course with a discussion of angular momentum and spins, with applications to atomic physics, entanglement, and quantum information.

Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: weekly problem sets, laboratory reports / write-ups, a midterm exam, and final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 309
Enrollment Limit: 8 per lab
Enrollment Preferences: physics majors
Expected Class Size: 24
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Phys 301 relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

PHYS 302 (S) Statistical Mechanics & Thermodynamics (QFR)
Macroscopic objects are made up of huge numbers of fundamental particles interacting in simple ways--obeying the Schrödinger equation, Newton's and Coulomb's Laws--and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we will develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety of physical questions, including the behavior of gases, polymers, heat engines, biological and astrophysical systems, magnets, and electrons in solids.

Class Format: lecture/discussion three hours per week and weekly laboratory work
Requirements/Evaluation: weekly problem sets and labs, plus exams, all of which have a substantial quantitative component
Prerequisites: required: PHYS 201, PHYS/MATH 210 or MATH 309; recommended: PHYS 202, PHYS 301
Enrollment Limit: 14 per lab
Enrollment Preferences: physics majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: weekly problem sets, exams, and labs, all of which have a substantial quantitative component
Phys 315 (F) Computational Biology (QFR)

Cross-listings: CSCI 315

Primary Cross-listing

This course will provide an overview of Computational Biology, the application of computational, mathematical, statistical, and physical problem-solving techniques to interpret the rapidly expanding amount of biological data. Topics covered will include database searching, DNA sequence alignment, clustering, RNA structure prediction, protein structural alignment, methods of analyzing gene expression, networks, and genome assembly using techniques such as string matching, dynamic programming, hidden Markov models, and statistics.

Requirements/Evaluation: weekly Python programming assignments, code reviews, problem sets, plus a few quizzes and a final project

Prerequisites: programming experience (e.g., CSCI 136) and mathematics (PHYS/MATH 210 or MATH 150) and physical science (PHYS 142/151, or CHEM 101/15X), or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: if over-enrolled, a questionnaire will be circulated

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 315(D3) PHYS 315(D3)

Quantitative/Formal Reasoning Notes: problem sets and programming assignments

Attributes: BI GP Courses

Fall 2024

lec section: 01 MR 2:35 pm - 3:50 pm Daniel P. Aalberts

Phys 321 (S) Introduction to Particle Physics (QFR)

The Standard Model of particle physics incorporates special relativity, quantum mechanics, and almost all that we know about elementary particles and their interactions. This course introduces some of the main ideas and phenomena associated with the Standard Model. After a review of relativistic kinematics, we will learn about symmetries in particle physics, relativistic wave equations, elements of quantum field theory, Feynman diagrams, and selected applications of quantum electrodynamics, the weak interactions, and quantum chromodynamics. We will conclude with a discussion of spontaneous symmetry breaking and the Higgs mechanism.

Requirements/Evaluation: weekly problem sets, a midterm exam, and a final exam

Prerequisites: PHYS 301

Enrollment Limit: 20

Enrollment Preferences: By seniority

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Exams and problem sets all have a significant quantitative component.
PHYS 402  (S) Applications of Quantum Mechanics  (QFR)
This course will explore a number of important topics in the application of quantum mechanics to physical systems, including perturbation theory, the variational principle and the semiclassical interaction of atoms and radiation. The course will finish up with three weeks on quantum optics including an experimental project on non-classical interference phenomena. Applications and examples will be taken mostly from atomic physics with some discussion of solid state systems.

Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 301
Enrollment Limit: 10 per sec
Enrollment Preferences: Physics and Astrophysics Majors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course has weekly problem sets, all of which have a substantial quantitative component.

Spring 2025
TUT Section: T1   F 1:10 pm - 2:25 pm   Betul Pamuk

PHYS 411  (F) Classical Mechanics  (QFR)
This course will explore advanced topics in classical mechanics. Central ideas include the calculus of variations, the Lagrangian and Hamiltonian formulations of mechanics, phase space, central-force motion, non-inertial reference frames (including implications for physics on a rotating Earth), rigid-body rotations, and non-linear dynamics & chaos, with additional topics from continuum and fluid mechanics as time permits. Numerical and perturbative techniques will be developed and used extensively. We will also examine the ways in which classical mechanics informs other fields of physics. In addition to weekly tutorial meetings the class will meet weekly as a whole to introduce and discuss new material.

Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, a final project, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 309
Enrollment Limit: 30
Enrollment Preferences: majors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: weekly problem sets requiring substantial quantitative reasoning using analytical and numerical methods.

Fall 2024
TUT Section: T1   F 1:10 pm - 2:25 pm   Katharine E. Jensen, Frederick W. Strauch

PHYS 451  (F) Condensed Matter Physics  (QFR)
Condensed matter physics is an important area of current research and serves as the basis for modern electronic technology. We plan to explore the physics of metals, insulators, semiconductors, superconductors, and photonic crystals, with particular attention to structure, thermal properties, energy bands, and electronic properties.

Requirements/Evaluation: weekly readings and problem sets, and exams

Prerequisites: PHYS 301 (may be taken simultaneously); or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Physics majors
Expected Class Size: 6
POEC 253 (F) Empirical Methods in Political Economy (WS) (QFR)
This course introduces students to common empirical tools used in policy analysis and implementation. Students will develop skills in statistical literacy to become critical consumers of public policy-relevant research. The emphasis in the course is split between an intuitive understanding of statistical foundations, and applications in data visualization and science communication. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; effective data visualization; statistical inference and hypothesis testing; and multiple regression analysis. A particular focus will be placed on understanding causality, the challenges of estimating causal relationships, and the design of evidence-based policy. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.

Requirements/Evaluation: Problem sets, group project, midterm exam, final exam
Prerequisites: MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255
Enrollment Limit: 20
Enrollment Preferences: Political Economy majors, Environmental Policy majors and sophomores
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Unit Notes: does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major
Distributions: (D2) (WS) (QFR)
Writing Skills Notes: Students will write 3 coding-intensive data briefs over the course of the semester. Creation of original exhibits from publicly accessible data, use of citation management systems, and clarity in technical writing will be emphasized.
Quantitative/Formal Reasoning Notes: The course teaches econometrics, i.e. statistics as economists use it, with applications in economics, political science, and other fields.
Attributes: POEC Required Courses

Fall 2024
LEC Section: 01  TR 8:30 am - 9:45 am  Shyam Raman

PSYC 201 (F)(S) Experimentation and Statistics (QFR)
An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret results, and write research reports. Students conduct a series of research studies in different areas of psychology that illustrate basic designs and methods of analysis. You must register for lab and lecture with the same instructor.

Requirements/Evaluation: research reports, exams, and problem sets
Prerequisites: PSYC 101; not open to first-year students except with permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Psychology majors
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
**Quantitative/Formal Reasoning Notes:** This course has problem sets focused on experimental design and quantitative data analysis. Students will help design and conduct experiments, analyze the data, and report their findings.

**Attributes:** COGS Related Courses  PHLH Statistics Courses

**SOC 150  (F) Data for Justice  (DPE)  (QFR)**

**Cross-listings:** STS 150 / AMST 150 / WGSS 150 / INTR 150

**Secondary Cross-listing**

This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

**Class Format:** This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.

**Requirements/Evaluation:** Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

**Prerequisites:** None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

**Enrollment Limit:** 18

**Enrollment Preferences:** Students without prior college-level courses in statistics and programming.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)  (DPE)  (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

**Difference, Power, and Equity Notes:** This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGTBIQ+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

**Quantitative/Formal Reasoning Notes:** This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.
STAT 101 (F)(S)  Elementary Statistics and Data Analysis  (QFR)
It is impossible to be an informed citizen in today’s world without an understanding of data. Whether it is opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines, etc, we need to be able to interpret and gain information from statistics. This course will introduce the common methods used to analyze and present data with an emphasis on interpretation and informed decision making.

Requirements/Evaluation:  weekly homework, quizzes, exams, and a project
Prerequisites:  MATH 102 (or demonstrated proficiency on a diagnostic test)
Enrollment Limit:  50
Enrollment Preferences:  juniors and seniors
Expected Class Size:  35
Grading:  yes pass/fail option,  yes fifth course option

Unit Notes:  Students with MATH150 but no statistics should enroll in STAT201. Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202.
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  It is a quantitative course.
Attributes:  COGS Related Courses  PHLH Statistics Courses

STAT 161 (F)(S)  Introductory Statistics for Social Science  (QFR)
This course will cover the basics of modern statistical analysis with a view toward applications in the social sciences. Topics include exploratory data analysis, linear regression, basic statistical inference, and elements of probability theory. The course focuses on the application of statistical tools to solve problems, to make decisions, and the use of statistical thinking to understand the world.

Requirements/Evaluation:  Weekly homework, quizzes, two midterms and a final exam (midterms include take-home components), and a data analysis project. Students will need to become familiar with the statistical software STATA.
Prerequisites:  MATH 130 (or equivalent); not open to students who have completed STAT 101 or equivalent
Enrollment Limit:  40
Enrollment Preferences:  Economics majors, sophomores
Expected Class Size:  40
Grading:  yes pass/fail option,  no fifth course option

Unit Notes:  Students with calculus background should consider STAT 201. Students without any calculus background should consider STAT 101. Students with AP Stat 4 or 5 should consider Stat 202. Please refer to the placement chart on the Math&Stat department website for more information.
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  Reasoning with data

Fall 2024
LEC Section: 01  MWF 9:00 am - 9:50 am  Duncan A. Clark
LEC Section: 02  MWF 11:00 am - 11:50 am  Duncan A. Clark
STAT 201  (F)(S)  Statistics and Data Analysis  (QFR)
Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science, is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can’t make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Requirements/Evaluation: weekly homework and projects, midterm exams, and a final exam.
Prerequisites: MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent
Enrollment Limit: 40
Enrollment Preferences: Prospective Statistics majors, students for whom the course is a major prerequisite, and seniors
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202. Students with no calc or stats background should enroll in STAT 101. Students with MATH 140 but no statistics should enroll in STAT 161.
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Students will learn to choose, carry out, interpret, and communicate analyses of data.
Attributes: COGS Related Courses  PHLH Statistics Courses

STAT 202  (F)(S)  Introduction to Statistical Modeling  (QFR)
Data come from a variety of sources: sometimes from planned experiments or designed surveys, sometimes by less organized means. In this course we’ll explore the kinds of models and predictions that we can make from both kinds of data, as well as design aspects of collecting data. We’ll focus on model building, especially multiple regression, and talk about its potential to answer questions about the world -- and about its limitations. We’ll emphasize applications over theory and analyze real data sets throughout the course.

Requirements/Evaluation: Homework problems; quizzes; exams; a final project (on a topic that interests you!). Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While your assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to class discussions, and working together with classmates on practice problems.
Prerequisites: MATH 140 and STAT 101/161/201/AP Statistics 4/5, or permission of instructor.
Enrollment Limit: 40
Enrollment Preferences: Prospective Statistics majors and more senior students
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Students with a 4 on the AP Stats exam should contact the department for proper placement. Students with STAT 201 are strongly encouraged to take STAT 346 or other 300-level statistics electives.
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to create models, make predictions, assess
uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

STAT 335  (S) Introduction to Biostatistics and Epidemiology  (QFR)
Epidemiology is the study of disease and disability in human populations, while biostatistics focuses on the development and application of statistical methods to address questions that arise in medicine, public health, or biology. This course will begin with epidemiological study designs and core concepts in epidemiology, followed by key statistical methods in public health research. Topics will include multiple regression, analysis of categorical data (two sample methods, sets of 2x2 tables, RxC tables, and logistic regression), survival analysis (Cox proportional hazards model), and if time permits, a brief introduction to regression with correlated data.

Requirements/Evaluation: Evaluation will be primarily based on weekly assignments (regular homework or mini-projects), two midterm exams, and a final exam.

Prerequisites: Stat 201 or Stat 202, or permission of instructor (prior experience should include a working understanding of multiple linear regression, the basics of statistical inference, and R).

Enrollment Limit: 20
Enrollment Preferences: Statistics majors and prospective majors who have not yet taken Stat 346; public health concentrators
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Students will learn how to choose, implement, and interpret statistical analyses relevant to public health studies.

LEC Section: 01   MWF 12:00 pm - 12:50 pm     Anna M. Plantinga

STAT 341  (F)(S) Probability  (QFR)

Cross-listings: MATH 341

Secondary Cross-listing
The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 150 and MATH 250 or permission of the instructor

Enrollment Limit: 50

Enrollment Preferences: Priority will be given to Mathematics majors and to Statistics Majors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option
---

**Distributions:** (D3)  (QFR)

**STAT 342 (S) Introduction to Stochastic Processes** (QFR)

Stochastic processes are mathematical models for random phenomena evolving in time or space. Examples include the number of people in a queue at time t or the accumulated claims paid by an insurance company in an interval of time t. This course introduces the basic concepts and techniques of stochastic processes used to construct models for a variety of problems of practical interest. The theory of Markov chains will guide our discussion as we cover topics such as martingales, random walks, Poisson process, birth and death processes, and Brownian motion.

**Requirements/Evaluation:** weekly homework/labs, classwork, and exams

**Prerequisites:** STAT 341

**Enrollment Limit:** 30

**Enrollment Preferences:** senior Statistics majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)  (QFR)

**Quantitative/Formal Reasoning Notes:** This is a statistics class with a focus on mathematical skills and translating real world phenomena into mathematical descriptions.

---

**Spring 2025**

LEC Section: 01  TF 2:35 pm - 3:50 pm  Elizabeth M. Upton

---

**STAT 344 (S) Statistical Design of Experiments** (QFR)

When you hear the word experiment you might be picturing white lab coats and pipettes, but businesses, especially e-commerce, are constantly experimenting as well. How do you get the most out of both scientific and business investigations? By doing the right experiment in the first place. We'll explore the techniques used to plan experiments that are both efficient and statistically sound. We'll learn how to analyze the data that come from these experiments and the conclusions we can draw from that analysis. We'll look at both classical tools like fractional factorial designs as well as optimal design, and see how these two frameworks differ in their philosophy and in what they can do. Throughout the course, we'll make extensive use of both R and JMP software to work with real-world data.

**Requirements/Evaluation:** Homework problems--both individual and in groups, midterm, final, and projects (on topics that interest you!).

**Prerequisites:** STAT 161 or 201 or 202, or equivalent, and Math 140 or equivalent, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Statistics majors, seniors, juniors, sophomores, first years

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)  (QFR)

**Quantitative/Formal Reasoning Notes:** This course uses mathematical tools and computing programs to design experiments, analyze their results, and assess their effectiveness. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

---

**Spring 2025**
STAT 346  (F)(S)  Regression Theory and Applications  (QFR)
This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the most widely used method for analyzing and predicting a response data and for understand the relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

Requirements/Evaluation:  Weekly homework, quizzes, theory and data analysis exams, and final course project.

Prerequisites:  MATH/STAT 341, MATH 250, and at least one of STAT 201 or 202. Or permission of the instructor.

Enrollment Limit:  30

Enrollment Preferences:  Statistics Majors

Expected Class Size:  20

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D3)  (QFR)

Quantitative/Formal Reasoning Notes:  This course prepares students in the use of quantitative methods for the modeling, prediction and understanding of scientific phenomena.

---

STAT 355  (F)  Multivariate Statistical Analysis  (QFR)
To better understand complex processes, we study how variables are related to one another and how they work in combination. In addition, we want to make inferences about more than one variable at a time. Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such datasets with more than multiple variables. Topics covered will include data visualization techniques for data sets with more variables, clustering algorithms, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, performing dimension reduction, and making inferences.

Requirements/Evaluation:  Homework, projects, quizzes, and exams.

Prerequisites:  MATH 250, and STAT 346 or permission of instructor

Enrollment Limit:  15

Enrollment Preferences:  Juniors/seniors

Expected Class Size:  10

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D3)  (QFR)

Quantitative/Formal Reasoning Notes:  It is an advanced statistics class with prerequisites that are QFR courses

---

STAT 360  (F)  Statistical Inference  (QFR)
How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer
intensive resampling techniques (e.g., the bootstrap) will also be considered.

Requirements/Evaluation: Homework, Quizzes, Exams

Prerequisites: MATH 250, STAT 201 or 202, STAT 341

Enrollment Limit: 15

Enrollment Preferences: Statistics majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: A rigorous mathematical course laying the foundation for reasoning with data

Fall 2024

LEC Section: 01  MWF 10:00 am - 10:50 am  Richard D. De Veaux

STAT 442 (S) Statistical Learning and Data Mining (QFR)

In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today’s data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Class Format: Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Requirements/Evaluation: class participation, weekly homework, exams and an end-of-term project

Prerequisites: MATH/STAT 341 and STAT 346, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Statistics majors, juniors and seniors. Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is an advanced statistics class involving theory and application of statistical methods to data.

Spring 2025

LEC Section: 01  MR 2:35 pm - 3:50 pm  Anna C. Neufeld

STAT 458 (F) Generalized Linear Models- Theory and Applications (QFR)

This course will explore generalized linear models (GLMs)--the extension of linear models, discussed in Stat346, to response variables that have specific non-normal distributions, such as counts and proportions. We will consider the general structure and theory of GLMs and see their use in a range of applications. As time permits, we will also examine extensions of these models for clustered data such as mixed effects models and generalized estimating equations.

Requirements/Evaluation: Weekly homework consisting of theoretical exercises and data analyses carried out in R. Short frequent quizzes and one midterm (with an in-class and take-home component). Final project and final exam.

Prerequisites: STAT 346, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Seniors and Statistics majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)
**Quantitative/Formal Reasoning Notes:** This is an intensive statistics course, involving theoretical and mathematical reasoning as well as the application of mathematical ideas to data using software.

**STS 150 (F) Data for Justice** (DPE) (QFR)

**Cross-listings:** AMST 150 / SOC 150 / WGSS 150 / INTR 150

**Secondary Cross-listing**

This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

**Class Format:** This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.

**Requirements/Evaluation:** Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

**Prerequisites:** None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

**Enrollment Limit:** 18

**Enrollment Preferences:** Students without prior college-level courses in statistics and programming.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

**Difference, Power, and Equity Notes:** This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGBTQ+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

**Quantitative/Formal Reasoning Notes:** This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

---

**STS 363 (S) Data for Justice Research Practicum** (DPE) (QFR)

**Cross-listings:** WGSS 363 / INTR 350 / AMST 363

**Secondary Cross-listing**

Civil rights activist, educator, and investigative journalist Ida B. Wells said that "the way to right wrongs is to shine the light of truth upon them." In this inclusive, collaborative, research-based course, students will bring statistical, computational, and/or mathematical approaches to bear on issues of social justice. Guided closely by the instructor, students will work in groups to carry out original research in an area such as criminal justice, education equity, environmental justice, health care equity, economic justice, or inclusion in arts/media. Prior research experience is not required; one goal of this
course is to build skills for advanced research.

Class Format: This course is an intensive research practicum. Formation of research groups and selection of research topics will be facilitated by the instructor. The primary modality of work is peer collaboration.

Requirements/Evaluation: To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based, ungraded assessment framework.

Prerequisites: INTR 150 (Data for Justice), or prior equivalent exposure to computing, statistics, and social justice topics as approved by the instructor.

Enrollment Limit: 10

Enrollment Preferences: Students who have a declared major in Division I or II, who meet the prerequisites of the course, and who fill out the instructor's preregistration survey (contact the instructor for link).

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 363(D2) STS 363(D2) INTR 350(D2) AMST 363(D2)

Difference, Power, and Equity Notes: Students will research issues of social justice in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

Quantitative/Formal Reasoning Notes: Students will use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

ASTR 111 (F) Introduction to Astrophysics (QFR)
The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies.

ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: The class has weekly afternoon laboratory sessions, which will alternate between 'hands-on' activities and problem-solving/discussion sessions. Nighttime observing sessions will occur throughout the semester.
Requirements/Evaluation: weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio
Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent
Enrollment Limit: 28; 14/lab
Enrollment Preferences: potential Astronomy majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

Fall 2024
LAB Section: 03 R 1:10 pm - 3:50 pm Kevin Flaherty, Anne Jaskot
LAB Section: 02 M 1:10 pm - 3:50 pm Kevin Flaherty, Anne Jaskot
LEC Section: 01 TR 11:20 am - 12:35 pm Anne Jaskot

ASTR 206 (S) Astrobiology (QFR)
This course will focus on the development of complex life and its observational signatures, both on Earth and on other worlds. We will first investigate the conditions that have led to the development of complex life on Earth. We will view Earth over time from an outsider's perspective and challenge preconceptions about the basic requirements for life. We will also explore the 'hot spots' in the search for life beyond Earth in our Solar System. Observations in the next decade may reveal biosignatures in the atmospheres of exoplanets. We will learn about these future observations, while also interacting with current research-grade data for other planets and learning about the methods used to constrain the physical conditions on other worlds. Using quantitative models, we will test the stability of Earth-like planets to the variable and potentially hostile conditions of evolving solar
systems.

Requirements/Evaluation: weekly problem sets, one paper, two mid-term exams, and a final exam

Prerequisites: Math 130 and at least one prior physical science course (either Astronomy, Physics, Geosciences, or Chemistry), or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Science majors, with preference given to students majoring in Astronomy, Astrophysics, or Geosciences

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course students will make quantitative comparisons between environmental conditions on Earth, other planetary bodies, and models. The students will also examine observations regarding the detection and characterization of planetary bodies, including contemporary data.

Spring 2025

LEC Section: 01  MR 2:35 pm - 3:50 pm  Jason E. Young

ASTR 402  (S)  Between the Stars: The Interstellar Medium  (QFR)

The matter between the stars—the interstellar medium—tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

Class Format: Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.

Requirements/Evaluation: weekly problem sets, 10-page final paper, and observing projects

Prerequisites: ASTR 111 and PHYS 201 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

Spring 2025

TUT Section: T1  TBA  Anne Jaskot

ASTR 413  (F)  Building Stars: A Physical Model of Stellar Structure  (QFR)

How does the Sun shine? How does the Sun evolve with time? What physical processes determine the power output of the Sun? In this course we will explore our modern understanding of how stars work, and why they have a range of sizes, temperatures, and luminosities. As we go, we will discuss the laws of physics at work in our Sun and other stars. Over the course of the semester, we will build a working computer model of the Sun using the
basic laws of nuclear fusion, radiative transfer, thermal mechanics, and hydrostatic equilibrium.

Class Format: Lectures will include time for computer programming work

Requirements/Evaluation: weekly problem sets, weekly coding homework assignments, two mid-term exams, and a final project

Prerequisites: PHYS 142 or 151, any prior class that makes use of programming, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Astronomy, Astrophysics, or Physics majors, with first preference to Astronomy or Astrophysics majors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will use differential equations and numerical coding techniques to test and explore the relationships between physical laws using the Sun and other stars as examples. They will make quantitative comparisons between their calculations and observed stellar properties.

Fall 2024

BIMO 321  (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: BIOL 321 / CHEM 321

Primary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101, CHEM 200 and CHEM 201; or either CHEM 155 or 256 and CHEM 251

Enrollment Limit: 12/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators
Expected Class Size: 36
Grading: no pass/fail option, no fifth course option
Unit Notes: Cannot be counted towards the Biology major in addition to BIOL 222
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 321(D3) BIMO 321(D3) CHEM 321(D3)
Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

BIMO 322 (S) Biochemistry II: Metabolism (QFR)
Cross-listings: CHEM 322 / BIOL 322
Primary Cross-listing
This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.
Class Format: Lecture three hours per week and laboratory three hours per week.
Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data
Prerequisites: BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor
Enrollment Limit: 48
Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators
Expected Class Size: 48
Grading: no pass/fail option, no fifth course option
Unit Notes: cannot be counted towards the Biology major in addition to BIOL 222
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
BIMO 322(D3) CHEM 322(D3) BIOL 322(D3)
Quantitative/Formal Reasoning Notes: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

BIOL 202 (F) Genetics (QFR)

Genetics, classically defined as the study of heredity, is today a multidisciplinary field whose principles provide critical insight and tools to most areas of biology and medicine. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. A primary focus of the course is on students developing familiarity with problem solving, the logic and quantitative reasoning required to understand how genetic mechanisms lead to biological patterns. The laboratory part of the course provides an experimental introduction to modern genetic analysis as well as introductions to interpreting genetic reasoning in the primary research literature. Laboratory experiments include investigating chromosome structure using microscopy, mapping a mutation to the genome by integrating multiple streams of evidence, and determining the structure of a DNA plasmid using molecular tools.

Class Format: Lecture: three hours per week, Lab: three hours per week.

Requirements/Evaluation: bi-weekly problem sets; weekly laboratory exercises and laboratory reports; three exams

Prerequisites: BIOL 101 and 102

Enrollment Limit: 120

Enrollment Preferences: students interested in the Biology major

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course develops quantitative skills through solving problems. Students learn to apply basic calculations and logic to predict the outcomes of biological systems, for example, describing the likelihood that an individual will be affected by an inherited disease. Application of quantitative and logical analysis contributes to a large component of the in-class work and the graded material for the class, in the form of problem sets, exams, and data analysis for lab reports.

Attributes: BIGP Courses  BIMO Required Courses

BIOL 203 (F) Ecology (QFR)

Cross-listings: ENVI 203

Primary Cross-listing

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 203(D3) ENVI 203(D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to linear models, multidimensional data analysis and contingency tables.

BIOL 305  (S) Evolution  (QFR)

This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and adaptation). Topics include micro-evolutionary models, natural and sexual selection, speciation, the inference of evolutionary history, evolutionary medicine among others.

Requirements/Evaluation: independent research project, problem sets, participation in discussions and exams

Prerequisites: BIOL 102 and one 200 level BIOL course

Enrollment Limit: 24

Enrollment Preferences: Seniors and biology majors

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3)  (QFR)

Quantitative/Formal Reasoning Notes: We will use mathematical models to study population genetics.

BIOL 321  (F) Biochemistry I: Structure and Function of Biological Molecules  (QFR)

Cross-listings: BIMO 321 / CHEM 321

Secondary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports
**BIOL 322 (S) Biochemistry II: Metabolism** (QFR)

### Cross-listings:
BIMO 322 / CHEM 322

**Secondary Cross-listing**
This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

**Class Format:** Lecture three hours per week and laboratory three hours per week.

**Requirements/Evaluation:** several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

**Prerequisites:** BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor

**Enrollment Limit:** 48

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size:** 48

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** cannot be counted towards the Biology major in addition to BIOL 222

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

**Attributes:** BIGP Courses BIMO Required Courses

BIOL 420  (S) Mathematical Biology  (QFR)

Cross-listings: MATH 412
Secondary Cross-listing
This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications may include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Requirements/Evaluation: problem sets, quizzes/exams, participation, final project and paper
Prerequisites: MATH 250 and MATH 309, or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: preference for senior math/stats major and also based on an interest statement
Expected Class Size: 30
Grading: yes pass/fail option, no fifth course option
Distributions: (D3)  (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
MATH 412(D3) BIOL 420(D3)
Quantitative/Formal Reasoning Notes: The course will introduce methods for developing and analyzing mathematical models.

CAOS 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ECON 213 / ENVI 213
Secondary Cross-listing
We'll use economics to provide one perspective on reasons humans harm the environment and overuse natural resources, and what we can do about it. We'll study climate change, pollution in general, cost benefit analysis, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns people may have about doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)
Prerequisites: ECON 110 or equivalent
Enrollment Limit: 30
Enrollment Preferences: first-year and sophomore students
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: this course will count toward both the Environmental Studies major and concentration
Distributions: (D2)  (QFR)
CAN 327 (F) Coastal Processes and Geomorphology (QFR)

Cross-listings: ENVI 327 / GEOS 327

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, quizzes, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

Enrollment Limit: 15

Enrollment Preferences: Geosciences majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts toward the GEOS Group B Electives - Sediments + Life.

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 327(D3) GEOS 327(D3) CAOS 327(D3)

Quantitative/Formal Reasoning Notes: This course will involve the use of MATLAB software to quantitatively analyze coastal process and geomorphological data.

Attributes: ENVI Natural World Electives GEOS Group B Electives - Sediments + Life
Secondary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to assess how policies can help or hurt the environment. Topics we may study include: common pool resources, voluntary conservation, social norms and nudges, discrimination and justice, rationality, firm responses to mandatory and voluntary regulation, voting and public opinion, and international environmental agreements. We'll also build familiarity with the main methodologies of modern economic research: theoretical modeling, empirical analysis of observational data, and experiments.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises and other interactive activities

Requirements/Evaluation: class participation, regular reading markup, empirical exercises, oral presentation(s), and an original research paper using an experiment, observational data, or theory

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors and junior Economics majors considering a thesis

Expected Class Size: 19

CHEM 100 (F) Chemistry Matters (QFR)

Chemistry matters! From fueling the world’s economy to preventing the next pandemic to forecasting future climate change, chemistry touches all aspects of daily life. This course provides an introduction to chemical principles and applications for students with little or no high school chemistry background. Through the lens of contemporary issues and applications (e.g. energy, environment, materials, medicine, etc.), students will be introduced to concepts fundamental to studying matter at the molecular level. Particular emphasis will be placed on skills essential for students to understand chemistry in these contexts, including quantitative reasoning and the development of chemical literacy and intuition. Laboratory meetings will be used to reinforce lecture material through experimentation at the bench and active learning exercises.

Class Format: lecture, three times per week and laboratory, three hours per week

Requirements/Evaluation: problem set assignments, laboratory work and analysis, quizzes/exams and a final assessment

Prerequisites: Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement).

Enrollment Limit: 32; 16/lab

Enrollment Preferences: First-year students with little or no high school chemistry experience.

Expected Class Size: 32

Grading: yes pass/fail option, no fifth course option

Unit Notes: CHEM 100 may be taken concurrently with MATH 102—see under Mathematics; CHEM 100 or its equivalent is a prerequisite to CHEM 101.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular problem sets and in class activities in which quantitative/formal reasoning skills are practiced.
CHEM 101  (F)(S) Concepts of Chemistry  (QFR)

This course broadens and deepens the foundation in chemistry of students who have had one or more years of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, the model of an atom, Lewis structures and VSEPR, and gas laws is expected. Principal topics for this course include modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory periods will largely focus on experiment design, data analysis, literature, scientific writing, and other skills critical to students' development as scientists. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamentals of chemistry as part of their general education. This course may be taken pass/fail; however, students who are considering graduate study in science or in the health professions should elect to take this course for a grade.

**Class Format:** lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation:** problem sets and/or quizzes, laboratory work, and exams

**Prerequisites:** Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement) or CHEM 100.

**Enrollment Limit:** 45; 16/lab

**Enrollment Preferences:** first-year students

**Expected Class Size:** 45/lecture

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** CHEM 101 or its equivalent is a prerequisite for both CHEM 200 and CHEM 201 and is required for the BIMO concentration.

**Distributions:** (D3)  (QFR)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

**Attributes:** BIMO Required Courses

---

CHEM 200  (S) Advanced Chemical Concepts  (QFR)

This course treats an array of topics in modern chemistry, emphasizing broad concepts that connect and weave through the various subdisciplines of the field--biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. It provides the necessary background in chemical science for students who are planning advanced study or a career in chemistry, biological science, geoscience, environmental science, or a health profession.
Topics include coordination complexes, thermodynamics, electrochemistry, and kinetics. Laboratory sections will give students hands-on experience involving synthesis, characterization, and reactivity studies of coordination and organic complexes; spectroscopic analyses; thermodynamics; electrochemistry; and kinetics. Students will hone their skills in the presentation of results through written reports and worksheets.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: homework assignments, laboratory work, quizzes, midterm exam, and a final exam

Prerequisites: CHEM 101

Enrollment Limit: 35; 16/lab

Enrollment Preferences: first-year students, then sophomores

Expected Class Size: 35

Grading: no pass/fail option, no fifth course option

Unit Notes: CHEM 200 is required for the BIMO concentration

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

CHEM 201 (F) Organic Chemistry: Introductory Level (QFR)

This course provides the necessary background in organic chemistry for students who are planning advanced study or a career in chemistry, the biological sciences, or the health professions. It initiates the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. Specific topics include basic organic structures and bonding, delocalization and conjugation, acidity & basicity, nucleophilic addition and substitution reactions, stereochemistry and molecular energetics. The theory and interpretation of infrared (IR) and nuclear magnetic resonance (NMR) spectroscopy, as well as the fundamentals of molecular modeling as applied to organic molecules are presented. The coordinated laboratory work includes organic synthesis, purification and separation techniques, as well as characterization by IR and NMR spectroscopy.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: quantitative problem solving, laboratory performance, three midterm exams, and a final exam

Prerequisites: CHEM 101 or CHEM 151, 153, or 155

Enrollment Limit: 40; 12/lab

Enrollment Preferences: Seniors, juniors, sophomores, first-year students

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

CHEM 361 (S) Quantum Chemistry and Chemical Dynamics (QFR)
This course introduces quantum mechanics, which serves as the basis for understanding molecular structure and spectroscopy. We will begin by discussing the Schrodinger wave equation and then apply this to understanding the translational, vibrational, and rotational structure of molecules. This leads to a discussion of atomic/molecular electronic structure and spectroscopy. Computational methods will be taught to illustrate key quantum mechanical concepts, interpret experimental data, and extend hypotheses. Applications will be chosen from contemporary research fields, including photochemistry, laser spectroscopy, environmental/atmospheric chemistry, organometallic chemistry, and physical organic chemistry.

Requirements/Evaluation: class participation, problem sets, exams, and laboratory work

Prerequisites: CHEM 155 or CHEM 256; or CHEM 200; or permission of instructor; and strongly recommend MATH 150 or MATH 151

Enrollment Limit: 16; 8/lab

Enrollment Preferences: seniors, then juniors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFC requirement and relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

Spring 2025

LAB Section: 02 T 1:00 pm - 5:00 pm Ben L. Augenbraun
CHEM 366 (F)  Thermodynamics and Statistical Mechanics  (QFR)
The thermodynamic laws provide us with our most powerful and general scientific principles for predicting the direction of spontaneous change in physical, chemical, and biological systems. This course develops the concepts of energy, entropy, free energy, temperature, heat, work, and chemical potential within the framework of classical and statistical thermodynamics. The principles developed are applied to a variety of problems: chemical reactions, phase changes, energy technology, industrial processes, and environmental science. Laboratory experiments provide quantitative and practical demonstrations of the theory of real and ideal systems studied in class.

Class Format: lecture, three times per week and laboratory, four hours per week
Requirements/Evaluation: class participation, oral presentations, problem sets, laboratory work, and an independent project
Prerequisites: CHEM 155 or CHEM 256; or CHEM 200; and basic knowledge of applied integral and differential calculus
Enrollment Limit: 16/lab
Enrollment Preferences: Chemistry majors: seniors, juniors, then sophomores
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)
Quantitative/Formal Reasoning Notes: This course fulfills the QFC requirement and relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

COGS 224 (F)  Introduction to Formal Linguistics  (QFR)
Cross-listings: PHIL 221
Primary Cross-listing
The sentence "Every cookie is chocolate chip and three of them are oatmeal raisin" is a perfectly grammatical sentence of English, but it's self-contradictory. What does it take to realize this fact? One must grasp the meanings of the various parts of the sentence. In particular, one must grasp that "three of them" picks out a subset of the group picked out by "every cookie", and that there's no such thing as a cookie that is both chocolate chip and oatmeal raisin. There two ways to understand "Many students took every class". According to one, there is a single group of students that had their hands extremely full this semester. According to the other, every class was well-populated, potentially by different groups. The reason for this is that there are two underlying structures that the original sentence can realize. This course serves as an introduction to formal methods in the scientific study of language. Our goal will be to characterize phenomena like those above with logical and mathematical precision. The focus will be on model-theoretic semantics, the sub-field of linguistics that studies meanings. Along the way we will discuss principles of syntax, the sub-field that studies sentence structures, and pragmatics, the sub-field that studies inferences of non-literal content. This is a formal course, but no prior logical or mathematical background will be expected. Starting from scratch, students will learn the building blocks of current-day linguistic research. This introduction will be of use to students interested in language from a variety of perspectives, including philosophy, cognitive science, and computer science.
Requirements/Evaluation: Weekly problem sets, plus a final project (paper/presentation/other type, to be discussed with instructor)
Prerequisites: No prerequisites
Enrollment Limit: 20
Enrollment Preferences: Preference given to seniors and philosophy/cognitive science majors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)  (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 221(D2) COGS 224(D2)

**Quantitative/Formal Reasoning Notes:** This course teaches the fundamentals of the formal analysis of language. Students will learn to provide translation schemes from English to a logical language (typed lambda calculus).

**Fall 2024**

**LEC Section: 01** MR 1:10 pm - 2:25 pm Christian De Leon

**CSCI 104  (F)  Data Science and Computing for All  (QFR)**

Many of the world's greatest discoveries and most consequential decisions are enabled or informed by the analysis of data from a myriad of sources. Indeed, the ability to wrangle, visualize, and draw conclusions from data is now a critical tool in the sciences, business, medicine, politics, other academic disciplines, and society as a whole. This course lays the foundations for quantifying relationships in data by exploring complementary computational, statistical, and visualization concepts. These concepts will be reinforced by lab experiences designed to teach programming and statistics skills while analyzing real-world data sets. This course will also examine the broader context and social issues surrounding data analysis, including privacy and ethics.

**Requirements/Evaluation:** Weekly lab assignments involving programming, a project, and examinations.

**Prerequisites:** None; previous programming experience or statistics is not required.

**Enrollment Limit:** 30;15/lab

**Enrollment Preferences:** Not open to those who have completed or are currently enrolled in a Computer Science course numbered 136 or higher. Preference given to those who have not previously taken a computer science or statistics course.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** Additional details about the class are available here: https://www.cs.williams.edu/~cs104. Please see the Computer Science Department website for more information on selecting an introductory computer science class: https://csci.williams.edu/

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course includes regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.

**LAB Section: 06** T 2:30 pm - 4:00 pm Stephen N. Freund

**CSCI 134  (F)(S)  Introduction to Computer Science  (QFR)**

This course introduces students to the science of computation by exploring the representation and manipulation of data and algorithms. We organize and transform information in order to solve problems using algorithms written in a modern object-oriented language. Topics include organization of data using objects and classes, and the description of processes using conditional control, iteration, methods and classes. We also begin the study of abstraction, self-reference, reuse, and performance analysis. While the choice of programming language and application area will vary in different offerings, the skills students develop will transfer equally well to more advanced study in many areas. In particular, this course is designed to provide the programming skills needed for further study in computer science and is expected to satisfy introductory programming requirements in other departments.

**Requirements/Evaluation:** weekly programming projects, weekly written homeworks, and two examinations.
Prerequisites: none, except for the standard prerequisites for a (QFR) course; previous programming experience is not required

Enrollment Limit: 30;15/lab

Enrollment Preferences: if the course is over-enrolled, enrollment will be determined by lottery.

Expected Class Size: 30/lec

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Please see the Computer Science Department website for more information on selecting an introductory computer science class: https://csci.williams.edu/. Students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course includes regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.

Attributes: COGS Interdepartmental Electives

CSCI 136  (F)(S)  Data Structures and Advanced Programming  (QFR)
This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists, stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

Requirements/Evaluation: programming and written assignments, quizzes, examinations

Prerequisites: CSCI 134 or equivalent; fulfilling the Discrete Mathematics Proficiency requirement is recommended, but not required

Enrollment Limit: 30;15/lab

Enrollment Preferences: if the course is over-enrolled, enrollment will be determined by lottery.
Expected Class Size: 30/lec

Grading: yes pass/fail option, no fifth course option

Unit Notes: Please see the Computer Science Department website for more information on selecting an introductory computer science class: https://csci.williams.edu/

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.

CSCI 237  (F)(S)  Computer Organization  (QFR)

This course studies the basic instruction set architecture and organization of a modern computer. It provides a programmer's view of how computer systems execute programs, store information, and communicate. Over the semester the student learns the fundamentals of translating higher level languages into assembly language, and the interpretation of machine languages by hardware. At the same time, a model of computer hardware organization is developed from the gate level upward.

Requirements/Evaluation: weekly programming assignments and/or problem sets, quizzes, midterm and final exams

Prerequisites: CSCI 136

Enrollment Limit: 24/12/lab

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

LAB Section: 03  W 1:00 pm - 2:30 pm  Kelly A. Shaw
CSCI 256 (F)(S) Algorithm Design and Analysis (QFR)

This course investigates methods for designing efficient and reliable algorithms. By carefully analyzing the structure of a problem within a mathematical framework, it is often possible to dramatically decrease the computational resources needed to find a solution. In addition, analysis provides a method for verifying the correctness of an algorithm and accurately estimating its running time and space requirements. We will study several algorithm design strategies that build on data structures and programming techniques introduced in Computer Science 136. These include greedy, divide-and-conquer, dynamic programming, and network flow algorithms. Additional topics of study include algorithms on graphs and strategies for handling potentially intractable problems.

Requirements/Evaluation: Problem sets, midterm and final examinations

Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement

Enrollment Limit: 24

Enrollment Preferences: Preference will be given to students who need the class in order to complete the major. Ties will be broken by seniority (seniors first, then juniors, etc.).

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course will have weekly problem sets in which students will formally prove statements about the behavior and performance of algorithms. In short, the course is about applying abstract and mathematical reasoning to the study of algorithms and computation.

Fall 2024

LEC Section: 01 MWF 12:00 pm - 12:50 pm Aaron M. Williams

Spring 2025

LEC Section: 02 MR 2:35 pm - 3:50 pm Samuel McCauley

LEC Section: 01 MR 1:10 pm - 2:25 pm Samuel McCauley

CSCI 315 (F) Computational Biology (QFR)

Cross-listings: PHYS 315

Secondary Cross-listing

This course will provide an overview of Computational Biology, the application of computational, mathematical, statistical, and physical problem-solving techniques to interpret the rapidly expanding amount of biological data. Topics covered will include database searching, DNA sequence alignment, clustering, RNA structure prediction, protein structural alignment, methods of analyzing gene expression, networks, and genome assembly using techniques such as string matching, dynamic programming, hidden Markov models, and statistics.

Requirements/Evaluation: weekly Python programming assignments, code reviews, problem sets, plus a few quizzes and a final project

Prerequisites: programming experience (e.g., CSCI 136) and mathematics (PHYS/MATH 210 or MATH 150) and physical science (PHYS 142/151, or CHEM 101/15X), or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: if over-enrolled, a questionnaire will be circulated

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
CSCI 315(D3) PHYS 315(D3)

Quantitative/Formal Reasoning Notes: problem sets and programming assignments

Attributes: BIGP Courses

Fall 2024

LEC Section: 01    MR 2:35 pm - 3:50 pm    Daniel P. Aalberts

CSCI 334  (S)  Principles of Programming Languages  (QFR)
This course examines the concepts and structures governing the design and implementation of programming languages. It presents an introduction to the concepts behind compilers and run-time representations of programming languages; features of programming languages supporting abstraction and polymorphism; and the procedural, functional, object-oriented, and concurrent programming paradigms. Programs will be required in languages illustrating each of these paradigms.

Requirements/Evaluation: weekly problem sets and programming assignments, a midterm examination, and a final examination
Prerequisites: CSCI 136
Enrollment Limit: 30
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 30
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets and labs in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2025

LEC Section: 01    MR 1:10 pm - 2:25 pm    Daniel W. Barowy
LEC Section: 02    MR 2:35 pm - 3:50 pm    Daniel W. Barowy

CSCI 338  (S)  Parallel Processing  (QFR)
This course explores different parallel programming paradigms used for writing applications on today's parallel computer systems. The course will introduce concurrency (i.e. multiple simultaneous computations) and the synchronization primitives that allow for the creation of correct concurrent applications. It will examine how a variety of systems organize parallel processing resources and enable users to write parallel programs for these systems. Covered programming paradigms will include multiprogramming with processes, message passing, threading in shared memory multiprocessors, vector processing, graphics processor programming, transactions, MapReduce, and other forms of programming for the cloud. Class discussion is based on assigned readings. Assignments provide students the opportunity to develop proficiency in writing software using different parallel programming paradigms.

Requirements/Evaluation: homework assignments, programming projects, and up to two exams
Prerequisites: CSCI 136 or equivalent programming experience, and CSCI 237, or permission of instructor
Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of substantial problem sets and programming assignments in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2025
CSCI 339  (F)  Distributed Systems  (QFR)
This course studies the key design principles of distributed systems, which are collections of independent networked computers that function as single coherent systems. Covered topics include communication protocols, processes and threads, naming, synchronization, consistency and replication, fault tolerance, and security. Students also examine some specific real-world distributed systems case studies, including Google and Amazon. Class discussion is based on readings from the textbook and research papers. The goals of this course are to understand how large-scale computational systems are built, and to provide students with the tools necessary to evaluate new technologies after the course ends.

Requirements/Evaluation:  weekly homework assignments, midterm exam, 3 major programming projects, and a final project
Prerequisites:  CSCI 237
Enrollment Limit:  24
Enrollment Preferences:  current or expected Computer Science majors
Expected Class Size:  24
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Fall 2024
LEC Section: 01    MR 1:10 pm - 2:25 pm     Jeannie R Albrecht

CSCI 345  (S)  Robotics and Digital Fabrication  (QFR)
This course is a hands-on exploration of topics in robotics and digital fabrication. We will experience firsthand how ideas and methods from computer science can be applied to make physical objects, including robots and other machines. The emphasis will be on creative, hands-on experimentation. Along the way, students will learn the basics of embedded systems programming (Arduino), breadboarding, soldering, printed circuit board (PCB) design, mechanical computer-aided design (CAD)--both conventional (OnShape) and programmatic (OpenSCAD)--as well digital fabrication (3D-printing, laser cutting). Students will learn both how to build their own prototypes and how to send out designs to have parts machined professionally. Students will work in teams throughout. The course will culminate in a team robotic design competition testing both functionality and creativity.

Requirements/Evaluation:  Evaluation based on assignments, projects, and exams.
Prerequisites:  CSCI 237
Enrollment Limit:  18; 9/lab
Enrollment Preferences:  Current or expected Computer Science majors
Expected Class Size:  18
Grading:  no pass/fail option,  no fifth course option
Materials/Lab Fee:  A fee of $150-$200 will be added to the term bill to cover the purchase of consumable electronics, motors, 3D-printing filament, and stock used in the assignments and final project.
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  The course will include programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2025
LAB Section: 03    T 2:30 pm - 4:00 pm     James M. Bern
LEC Section: 01    TR 9:55 am - 11:10 am     James M. Bern
LAB Section: 02    T 1:00 pm - 2:30 pm     James M. Bern
This course focuses on topics in game theory and mechanism design from a computational perspective. We will explore questions such as: how to design algorithms that incentivize truthful behavior, that is, where the participants have no incentive to cheat? Should we let drivers selfishly minimize their commute time or let a central algorithm direct traffic? Does Arrow's impossibility result mean that all voting protocols are doomed? The overarching goal of these questions is to understand and analyze selfish behavior and whether it can or should influence system design. Students will learn how to model and reason about incentives in computational systems both theoretically and empirically. Topics include types of equilibria, efficiency of equilibria, auction design and mechanism design with money, two-sided markets and mechanism design without money, incentives in computational applications such as P2P systems, and computational social choice.

Requirements/Evaluation: weekly problem sets and/or programming assignments, two midterm exams, and a final project.

Prerequisites: CSCI 256

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist problem sets and programming assignments in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2025

LEC Section: 01    TF 1:10 pm - 2:25 pm     Shikha Singh

CSCI 358 (F) Applied Algorithms (QFR)

This course is about bridging the gap between theoretical running time and writing fast code in practice. The course is divided into two basic topics. The first is algorithmic: we will discuss some of the most useful tools in a coder's toolkit. This includes topics like randomization (hashing, filters, approximate counters), linear and convex programming, similarity search, and cache-efficient algorithms. Our goal is to talk about why these efficient algorithms make seemingly difficult problems solvable in practice. The second topic is applications: we will discuss how to implement algorithms in an efficient way that takes advantage of modern hardware. Specific topics covered will include blocking, loop unrolling, pipelining, as well as strategies for performance analysis. Projects and assessments will include both basic theoretical aspects (understanding why the algorithms we discuss actually work), and practical aspects (implementing the algorithms we discuss to solve important problems, and optimizing the code so it runs as quickly as possible).

Requirements/Evaluation: Over the course of each week, there will be either a homework or an assignment. Homeworks and assignments have similar structure, with both a coding and problem set component, but assignments will be weighted more heavily and must be completed individually. There will also be a take home final at the end of the year.

Prerequisites: CSCI 256 and CSCI 237

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Fall 2024

LEC Section: 01    TF 1:10 pm - 2:25 pm     Samuel McCauley

CSCI 361 (F) Theory of Computation (QFR)

Cross-listings: MATH 361
This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Requirements/Evaluation: weekly problem sets and one or more exams
Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor
Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
MATH 361(D3) CSCI 361(D3)

Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Fall 2024
LEC Section: 02 TR 9:55 am - 11:10 am Shikha Singh
LEC Section: 01 TR 8:30 am - 9:45 am Shikha Singh

CSCI 375 (F) Natural Language Processing (QFR)
Natural language processing (NLP) is a set of methods for making human language accessible to computers. NLP underlies many technologies we use on a daily basis including automatic machine translation, search engines, email spam detection, and automated personalized assistants. These methods draw from a combination of algorithms, linguistics and statistics. This course will provide a foundation in building NLP models to classify, generate, and learn from text data.

Requirements/Evaluation: Evaluation based on assignments, projects, and exams.
Prerequisites: CSCI 136, and either CSCI 256 or STAT 201/202.
Enrollment Limit: 24
Enrollment Preferences: current or expected Computer Science majors.
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.
Attributes: COGS Interdepartmental Electives

Fall 2024
LEC Section: 01 TR 9:55 am - 11:10 am Katie A. Keith

CSCI 381 (F) Deep Learning (QFR)
This course is an introduction to deep neural networks and how to train them. Beginning with the fundamentals of regression and optimization, the course then surveys a variety of neural network architectures, which may include multilayer feedforward neural networks, convolutional neural networks, recurrent neural networks, and transformer networks. Students will also learn how to use deep learning software such as PyTorch or Tensorflow.
Requirements/Evaluation: Evaluation based on assignments, projects, and exams.
Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement
Enrollment Limit: 24
Enrollment Preferences: Current or expected Computer Science majors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.
Attributes: COGS Interdepartmental Electives

Fall 2024
LEC Section: 01   MWF 9:00 am - 9:50 am   Mark Hopkins

ECON 110 (F)(S) Principles of Microeconomics (QFR)
This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of popular or policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.
Requirements/Evaluation: problem sets, quizzes, short essays, two midterms, final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: This course is required of Economics and Political Economy majors and highly recommended for those non-majors interested in Environmental Studies and Women's, Gender and Sexuality Studies.
Expected Class Size: 40
Grading: yes pass/fail option, no fifth course option
Unit Notes: The department recommends students follow this course with ECON 120 or with a lower-level elective that has ECON 110 as its prerequisite; students may alternatively proceed directly to ECON 251 after taking this introductory course.
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.
Attributes: POEC Required Courses

Fall 2024

ECON 120  (F)(S)  Principles of Macroeconomics  (QFR)
This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings of exchange rates and international finance.

Requirements/Evaluation:  Depending on instructor, may include: problem sets, short essays, quizzes, reading assignments, either one or two midterms, and a final exam.
Prerequisites:  ECON 110
Enrollment Limit:  40
Enrollment Preferences:  First-year students and sophomores.
Expected Class Size:  40
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D2)  (QFR)
Quantitative/Formal Reasoning Notes:  Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.
Attributes:  POEC Required Courses

ECON 213  (S)  Introduction to Environmental and Natural Resource Economics  (QFR)
Cross-listings:  ENVI 213 / CAOS 213
Primary Cross-listing
We'll use economics to provide one perspective on reasons humans harm the environment and overuse natural resources, and what we can do about it. We'll study climate change, pollution in general, cost benefit analysis, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns people may have about doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation:  problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)
Prerequisites:  ECON 110 or equivalent
Enrollment Limit:  30
Enrollment Preferences:  first-year and sophomore students
Expected Class Size:  30
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  this course will count toward both the Environmental Studies major and concentration
Distributions:  (D2)  (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
Quantitative/Formal Reasoning Notes: We will use formal theory expressed in math and graphs, perform calculations, and consume statistical data.

Attributes: ENVI Environmental Policy  EVST Social Science/Policy  POEC Depth

Spring 2025
LEC Section: 01    MWF 8:30 am - 9:45 am     Sarah A. Jacobson

**ECON 229 (F) Law and Economics**  (QFR)

This course applies the tools of microeconomic analysis to private (i.e., civil) law. This analysis has both positive and normative aspects. The positive aspects deal with how individuals respond to the incentives created by the legal system. Examples include: how intellectual property law encourages the creation of knowledge while simultaneously restricting the dissemination of intellectual property; how tort law motivates doctors to avoid malpractice suits; and how contract law facilitates agreements. The normative aspects of the analysis ask whether legal rules enhance economic efficiency (or, more broadly, social welfare). Examples include: what legal rules are most appropriate for mitigating pollution, ensuring safe driving, and guaranteeing workplace safety? The course will also cover the economics of legal systems; for example, what are the incentives for plaintiffs to initiate lawsuits and what role do lawyers play in determining outcomes.

Class Format: discussion
Requirements/Evaluation: class participation, problem sets, paper based on actual court cases, a midterm exam, and a final exam
Prerequisites: ECON 110
Enrollment Limit: 35
Enrollment Preferences: ECON and POEC majors (and potential majors) will receive priority if the course is overenrolled
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: This course uses economic models to explore the logic of legal concepts. While some arguments will be qualitative, students will also use numerical examples to illustrate the principles of the course.

Attributes: JLST Interdepartmental Electives  POEC Depth

Fall 2024
SEM Section: 01    W 7:00 pm - 9:40 pm     William M. Gentry

**ECON 232 (S) Financial Markets, Institutions and Policies**  (QFR)

The focus of the course will be on how firms, financial markets, and central banks interact in the economy. Key questions addressed in the course include: How do firms allocate their resources to enhance their value? How are firms evaluated by the financial markets? How are asset prices determined, and how are these prices related to interest rates? Are financial markets efficient, and what are the implications of their efficiency or lack thereof? How does the financial system help with the management of risks faced by society? We will also study the role of the central bank (the Federal Reserve in the US), monetary policy, and government regulation and their impacts on financial decision making. Key questions include: How do central banks set monetary policy and how do those policies affect the economy and the financial decision-making process? How does monetary policy change when interest rates are (virtually) zero?

Class Format: There will be a mix of lecture and discussion.
Requirements/Evaluation: 5-7 Problem Sets, Quantitative Exercises, Group Paper, and Final Exam
Prerequisites: ECON 110 and ECON 120
Enrollment Limit: 25
Enrollment Preferences: Sophomore and Junior Economics majors
Expected Class Size: 25
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: We will use mathematical models, graphs, and data analysis to understand financial decisions at the firm and economy-wide levels.

Attributes: POEC Depth

Spring 2025
LEC Section: 01  TR 11:20 am - 12:35 pm  Nate Vellekoop

ECON 251  (F)(S)  Price and Allocation Theory  (QFR)
A study of the determination of relative prices and their importance in shaping the allocation of resources and the distribution of income. Subjects include: behavior of households in a variety of settings, such as buying goods and services, saving, and labor supply; behavior of firms in various kinds of markets; results of competitive and noncompetitive markets in goods, labor, land, and capital; market failure; government policies as sources of and responses to market failure; welfare criteria; limitations of mainstream analysis.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and multiple exams, including a final exam. They may also include one or more quizzes, short essays, collaborative projects, or presentations.

Prerequisites: ECON 110 and MATH 130 or its equivalent

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics majors.

Expected Class Size: 30

Grading:   yes pass/fail option,   yes fifth course option

Distributions: (D2)  (QFR)

Quantitative/Formal Reasoning Notes: Course involves developing and analyzing mathematical models of real-world phenomena, grounded in tools like calculus and game theory. Students are assumed to be comfortable with topics from introductory calculus, including differentiation and integration.

Fall 2024
LEC Section: 02  MR 2:35 pm - 3:50 pm  Greg Phelan
LEC Section: 01  MR 1:10 pm - 2:25 pm  Greg Phelan
LEC Section: 03  TF 1:10 pm - 2:25 pm  Ethan Holdahl

Spring 2025
LEC Section: 01  TR 9:55 am - 11:10 am  Greg Phelan
LEC Section: 02  MR 1:10 pm - 2:25 pm  Sara LaLumia
LEC Section: 03  MR 2:35 pm - 3:50 pm  Sara LaLumia

ECON 252  (F)(S)  Macroeconomics  (QFR)
A study of aggregate economic activity: output, employment, inflation, and interest rates. The class will develop a theoretical framework for analyzing economic growth and business cycles. The theory will be used to evaluate policies designed to promote growth and stability, and to understand economic developments in the U.S. and abroad. Instructors may use elementary calculus in assigned readings, exams and lectures.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and/or written assignments, midterm(s), and a final exam.

Prerequisites: ECON 110 and 120 and MATH 130 or its equivalent

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics majors.

Expected Class Size: 30

Grading:   yes pass/fail option,   no fifth course option

Distributions: (D2)  (QFR)

Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.
ECON 255 (F)(S) Econometrics (QFR)
An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research, with a focus on understanding when a causal interpretation is warranted. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets, multiple exams, a group project, and possible additional assignments or quizzes.

Prerequisites: MATH 130, plus STAT 161, 201 or 202 (or equivalent, including a score of 5 on the AP Statistics Exam), plus one course in ECON; STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics and Political Economy majors.

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: Students may substitute the combination of STAT 201 and 346 for ECON 255

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course teaches research tools necessary to analyze data.

Attributes: POEC Required Courses

ECON 345 (S) Growth Diagnostics (QFR)
Cross-listings:
Primary Cross-listing
Evidence from across the developing world suggests that the “binding constraints” to economic growth can be remarkably heterogeneous—i.e., the growth potential of stagnating or underperforming economies may be unlocked in a large variety of ways. For instance, pre-reform China had been constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by bad governance, and so forth. How can developing-country policymakers determine country-specific constraints like these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies rather than attempting to implement a “laundry list” of reforms that are naively based on “best practice” rules-of-thumb?
This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to economic growth in a given country at a point in time, thereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the nation's prevailing economic, political, and social context. The course will first build on the basic theories and empirics of economic growth to elucidate the diagnostic framework and will then employ a wide range of country-specific case studies to demonstrate how the framework can be operationalized for policy making. Throughout the semester, students will be required to work in groups, each representing a given developing or emerging-market economy, in order to build a growth diagnostic for their group's assigned country by the end of the course.

**Requirements/Evaluation:** extensive class participation, several short (5-page) reports, a final group project comprising a country growth diagnostic, and a final group presentation on the diagnostic

**Prerequisites:** for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346

**Enrollment Limit:** 19

**Enrollment Preferences:** CDE fellows and senior Economics majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 345(D2) ECON 545(D2)

**Quantitative/Formal Reasoning Notes:** The course material will be draw heavily on mathematical and statistical models of economic growth and macroeconomic development, and students will be required to routinely develop mathematical models and/or conduct econometric analysis in their assignments.

Spring 2025

SEM Section: 01   TR 9:55 am - 11:10 am   Quamrul H. Ashraf

ECON 364  (S)  Theory of Asset Pricing  (QFR)

What is the price of time? What is the price of risk? How do markets allocate resources across time and uncertain states of the world? This course theoretically studies how markets allocate scarce resource across time and when outcomes are risky. The "goods" in such markets are called "assets" and the prices of "assets" determine the cost of trading resources across time and across uncertain states of the world. We theoretically investigate how equilibrium determines the price of time, then asset price implications; then asset allocations and prices in the presence of risk; finally, implications for new assets.

**Requirements/Evaluation:** problem sets and exams

**Prerequisites:** ECON 251 or ECON 252; and ECON 255 or STAT 201

**Enrollment Limit:** 25

**Enrollment Preferences:** Economics majors

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** uses extensive mathematical modeling, including engaging with results from econometrics and statistics

Spring 2025

LEC Section: 01   TR 8:30 am - 9:45 am   Greg Phelan

ECON 367  (S)  The Political Economy of Social Insurance  (WS) (QFR)

The Great Society policies of the 1960s dramatically changed the ways people living in poverty interacted with the federal government, but the benefits associated with these policies seem to have stagnated. Since 1965, the annual poverty rate in the United States has hovered between 10% and 15%, though far more than 15% of Americans experience poverty at some point in their lives. In this course, we will study public policies that, explicitly or implicitly, have as a goal improving the well-being of the poor in the United States. These policies include social insurance programs such as Unemployment Insurance; safety net programs such as Temporary Assistance to Needy Families, Supplemental Nutrition Assistance Program,
Medicaid, and housing assistance; education programs such as Head Start and public education; and parts of the tax code, including the Earned Income Tax Credit and Child Tax Credit. We will explore the design and function of these programs, with a particular focus on the context in which they were developed. What political incentives and constraints have strung up our social safety net? How do these factors affect the goals of policy, the trade-offs inherent to the policy's design, and why poverty has not sustained a downward trend in the United States? Through careful consideration, students will learn how to communicate a path forward for public policy which accounts for theoretical economic expectations and the reality of political constraints in policy design.

Class Format: Lecture with substantial class discussion.

Requirements/Evaluation: Several short policy memos, participation in class discussion, and a final analytical essay.

Prerequisites: ECON 253 or 255

Enrollment Limit: 25

Enrollment Preferences: Students majoring in economics or political economy.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS) (QFR)

Writing Skills Notes: Students will write 4 policy memos over the course of the semester followed by a longer, final analytical essay. Synthesis of peer-reviewed literature, use of citation management systems, and clarity in technical writing will be emphasized. Students will receive timely, substantial, individualized feedback to develop their technical writing ability over the course of the semester. Opportunities to meet with professor outside of class at any stage of writing.

Quantitative/Formal Reasoning Notes: This course will use quantitative tools of economics. Focus on building data visualization & science communication skills after ECON 255.

Attributes: POEC Skills

Spring 2025

LEC Section: 01  TF 2:35 pm - 3:50 pm  Shyam Raman

ECON 371  (F) Time Series Econometrics and Empirical Methods for Macro  (QFR)

Econometric methods in many fields including macro and monetary economics, finance and international growth and development, as well as numerous fields beyond economics, have evolved a distinct set of techniques which are designed to meet the practical challenges posed by the typical empirical questions and available time series data of these fields. The course will begin with an introductory review of concepts of estimation and inference for large data samples in the context of the challenges of multivariate endogenous systems, and will then focus on associated methods for analysis of short run dynamics such as vector autoregressive techniques and methods for analysis of long run dynamics such as cointegration techniques. Students will be introduced to concepts and techniques analytically, but also by intuition, learning by doing, and by computer simulation and illustration. The course is particularly well suited for economics majors wishing to explore advanced empirical methods, or for statistics, mathematics or computer science majors wishing to learn more about the ways in which the subject of their majors interacts with the field of economics. The method of evaluation will include a term paper. ECON 252 and either STATS 346 or ECON 255 are formal prerequisites, although for students with exceptionally strong math/stats backgrounds these can be waived subject to instructor permission. Students who complete this course will also be permitted to enroll in Econ 471 (a follow up senior seminar course) during the spring semester if they are interested.

Requirements/Evaluation: term paper and regular homework assignments

Prerequisites: ECON 252 and either ECON 255 or STATS 346

Enrollment Limit: 19

Enrollment Preferences: students wishing to write an honors thesis, and students with strong MATH/STAT/CSCI backgrounds

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Uses quantitative/formal reasoning intensively in the form of mathematical and statistical arguments, as well as computer programming.
ECON 384 (F) Corporate Finance (QFR)
This course analyzes the major financial decisions facing firms. While the course takes the perspective of a manager making decisions about both what investments to undertake and how to finance these projects, it will emphasize the underlying economic models that are relevant for these decisions. Topics include capital budgeting, links between real and financial investments, capital structure choices, dividend policy, and firm valuation.

Class Format: Lecture / discussion
Requirements/Evaluation: Problem sets, exams, short project
Prerequisites: ECON 251, 252, and some familiarity with statistics (e.g., ECON 255)
Enrollment Limit: 25
Enrollment Preferences: Economics majors; seniority
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: The course uses quantitative models to evaluate decisions.

ECON 385 (F) Games and Information (QFR)
This course is a mathematical introduction to strategic thinking and its applications. Ideas from game theory, including Nash equilibrium and its refinements, commitment and credibility, repeated games, and information asymmetries, incentive contracts, and signaling, will be introduced. Applications will be drawn from economics, history, and politics around the globe, and include topics such as: trust between strangers, corruption and fraud, racial bias, violence and deterrence. And we will explore how to write and recognize game-theory models to help make sense of strategic interactions in the world around us.

Requirements/Evaluation: Two exams, regular problem sets and assignments in which students create game-theoretic models.
Prerequisites: ECON 251 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: juniors
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Unit Notes: students who have taken MATH 335 or CSCI 357 cannot receive credit for this class
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: Mathematical analysis of strategic interaction is emphasized throughout.

ECON 389 (S) Tax Policy in Global Perspective (QFR)
Cross-listings:
Secondary Cross-listing
Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability for the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should
countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, many tax policy lessons are universal so we will also learn about tax policies in developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, several problem sets, two 10-page essays

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

Enrollment Limit: 19

Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome

Expected Class Size: 15-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit: ECON 389(D2) ECON 514(D2)

Quantitative/Formal Reasoning Notes: The course builds on other QFR Reasoning econ classes.

Attributes: POEC Depth POEC Skills

Spring 2025

SEM Section: 01 MR 2:35 pm - 3:50 pm Jon M. Bakija

ECON 454 (F) Macroeconomic Perspectives on Labor Markets (QFR)

This seminar will cover aggregate trends in the labor market from a macroeconomic perspective, along with the tools that economists use to study them. We will think about the workforce as a whole but we will also highlight research that studies heterogeneity within the economy, such as patterns by race, gender, education, or occupation. Students will learn basic search and matching models, as well as related empirical methods. We will read papers that employ a variety of survey and administrative data, and we will discuss what types of research questions are best answered by each data source. We will use real data to apply the methods we learn. Potential topics include occupational mismatch, wage inequality, and monopsony.

Requirements/Evaluation: Class participation, short assignments, midterm exam, and a final project

Prerequisites: Econ 251, 252, and 255

Enrollment Limit: 19

Enrollment Preferences: Junior and senior economics majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course includes regular problem sets that require quantitative and formal reasoning skills.

Fall 2024

SEM Section: 01 MWF 8:30 am - 9:45 am Caitlin E. Hegarty

ECON 471 (S) Topics in Advanced Econometrics (QFR)

The course uses both a practical and conceptual/theory based approach, with emphasis on methods of structural identification of dynamics in VARs
and long run cointegration and nonlinear function estimation and analysis, both in conventional time series and especially panel time series which contain spatial dimensions. The course will also investigate methods of computer simulation related to these techniques. The course is well suited for students considering empirically oriented honors theses in fields that employ these techniques, such as macro, finance, growth, trade and development, as well as fields outside of economics that use time series data. It is also well suited for students majoring in economics, statistics, computer sciences or mathematics who wish to expand their econometrics training and understanding to a more advanced level.

Requirements/Evaluation: periodic homework assignments, term paper
Prerequisites: ECON 371
Enrollment Limit: 19
Enrollment Preferences: students with strong quantitative backgrounds, and to students intending to write an honors thesis
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: Course will make use of mathematics, statistics and computer analysis for the conceptualization and implementation of the econometric topics that are taught.

Spring 2025

ECON 477  (F)  Economics of Environmental Behavior  (QFR)
Cross-listings: CAOS 477 / ENVI 376
Primary Cross-listing
A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to assess how policies can help or hurt the environment. Topics we may study include: common pool resources, voluntary conservation, social norms and nudges, discrimination and justice, rationality, firm responses to mandatory and voluntary regulation, voting and public opinion, and international environmental agreements. We'll also build familiarity with the main methodologies of modern economic research: theoretical modeling, empirical analysis of observational data, and experiments.
Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises and other interactive activities
Requirements/Evaluation: class participation, regular reading markup, empirical exercises, oral presentation(s), and an original research paper using an experiment, observational data, or theory
Prerequisites: ECON 251 and (ECON 255 or STAT 346)
Enrollment Limit: 19
Enrollment Preferences: senior Economics majors and junior Economics majors considering a thesis
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
CAOS 477(D2) ENVI 376(D2) ECON 477(D2)

SEM Section: 01 TR 9:55 am - 11:10 am Quamrul H. Ashraf

ENVI 108 (S) Energy Science and Technology (QFR)

Cross-listings: PHYS 108

Secondary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating and lighting, and energy storage. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: Two meetings per week. Some weeks that means two lectures. Other weeks, that means one lecture plus one lab, with the class divided between two lab sections.

Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 10 per lab

Enrollment Preferences: non-physics majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 203 (F) Ecology (QFR)
Cross-listings: BIOL 203

Secondary Cross-listing

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 203(D3) ENVI 203(D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to linear models, multidimensional data analysis and contingency tables.

ENVI 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ECON 213 / CAOS 213

Secondary Cross-listing

We'll use economics to provide one perspective on reasons humans harm the environment and overuse natural resources, and what we can do about it. We'll study climate change, pollution in general, cost benefit analysis, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns people may have about doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 30

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week
Requirements/Evaluation: lab reports, quizzes, and an independent research project
Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.
Enrollment Limit: 15
Enrollment Preferences: Geosciences majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Unit Notes: This course counts toward the GEOS Group B Electives - Sediments + Life.
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 327(D3) GEOS 327(D3) CAOS 327(D3)
Quantitative/Formal Reasoning Notes: This course will involve the use of MATLAB software to quantitatively analyze coastal process and geomorphological data.
Attributes: ENVI Natural World Electives GEOS Group B Electives - Sediments + Life

Fall 2024
LEC Section: 01 MWF 8:30 am - 9:45 am Alex A. Apotsos
A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to assess how policies can help or hurt the environment. Topics we may study include: common pool resources, voluntary conservation, social norms and nudges, discrimination and justice, rationality, firm responses to mandatory and voluntary regulation, voting and public opinion, and international environmental agreements. We'll also build familiarity with the main methodologies of modern economic research: theoretical modeling, empirical analysis of observational data, and experiments.

**Class Format:** Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises and other interactive activities

**Requirements/Evaluation:** class participation, regular reading markup, empirical exercises, oral presentation(s), and an original research paper using an experiment, observational data, or theory

**Prerequisites:** ECON 251 and (ECON 255 or STAT 346)

**Enrollment Limit:** 19

**Enrollment Preferences:** senior Economics majors and junior Economics majors considering a thesis

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

CAOS 477(D2) ENVI 376(D2) ECON 477(D2)

**Quantitative/Formal Reasoning Notes:** The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.

**Attributes:** CAOS Senior Seminars  ENVI Humanities, Arts + Social Science Electives  POEC Depth  POEC Skills

---

**GEOS 234 (S) Introduction to Materials Science** (QFR)

**Cross-listings:** PHYS 234

**Secondary Cross-listing**

Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

**Class Format:** lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

**Requirements/Evaluation:** weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

**Prerequisites:** high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** based on students' scientific background and seniority

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course does not count toward the Geosciences major.

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

PHYS 234(D3) GEOS 234(D3)
### GEOS 327  (F) Coastal Processes and Geomorphology  (QFR)

**Primary Cross-listing**

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

**Class Format:** lecture two times a week with a lab one time per week

**Requirements/Evaluation:** lab reports, quizzes, and an independent research project

**Prerequisites:** Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

**Enrollment Limit:** 15

**Expected Class Size:** 15

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 327(D3) GEOS 327(D3) CAOS 327(D3)

**Quantitative/Formal Reasoning Notes:** This course will involve the use of MATLAB software to quantitatively analyze coastal process and geomorphological data.

**Attributes:** ENVI Natural World Electives  GEOS Group B Electives - Sediments + Life
This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

Class Format: This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.

Requirements/Evaluation: Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

Prerequisites: None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

Enrollment Limit: 18

Enrollment Preferences: Students without prior college-level courses in statistics and programming.

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

Difference, Power, and Equity Notes: This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGTBO+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

Quantitative/Formal Reasoning Notes: This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

LEC Section: 02 TR 11:20 am - 12:35 pm Chad M. Topaz

INTR 350 (S) Data for Justice Research Practicum (DPE) (QFR)

Cross-listings: WGSS 363 / STS 363 / AMST 363

Primary Cross-listing

Civil rights activist, educator, and investigative journalist Ida B. Wells said that "the way to right wrongs is to shine the light of truth upon them." In this inclusive, collaborative, research-based course, students will bring statistical, computational, and/or mathematical approaches to bear on issues of social justice. Guided closely by the instructor, students will work in groups to carry out original research in an area such as criminal justice, education equity, environmental justice, health care equity, economic justice, or inclusion in arts/media. Prior research experience is not required; one goal of this course is to build skills for advanced research.

Class Format: This course is an intensive research practicum. Formation of research groups and selection of research topics will be facilitated by the instructor. The primary modality of work is peer collaboration.

Requirements/Evaluation: To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based, ungraded assessment framework.

Prerequisites: INTR 150 (Data for Justice), or prior equivalent exposure to computing, statistics, and social justice topics as approved by the instructor.

Enrollment Limit: 10

Enrollment Preferences: Students who have a declared major in Division I or II, who meet the prerequisites of the course, and who fill out the instructor's preregistration survey (contact the instructor for link).
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 363(D2) STS 363(D2) INTR 350(D2) AMST 363(D2)

Difference, Power, and Equity Notes: Students will research issues of social justice in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

Quantitative/Formal Reasoning Notes: Students will use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

Spring 2025
SEM Section: 01 TR 9:55 am - 11:10 am Chad M. Topaz
SEM Section: 02 TR 11:20 am - 12:35 pm Chad M. Topaz

MATH 113 (S) The Beauty of Numbers (QFR)
This course will be an introduction to number theory and mathematical thinking and logic, with emphasis throughout on mathematics as a way of thinking and approaching the world. Have you ever wondered what keeps your credit card information safe every time you buy something online? Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptography. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat's Last Theorem, the Golden ratio, Fibonacci numbers, coding theory, and unique factorization. This course is meant to give you an appreciation for numbers and mathematics and to enhance your logical reasoning skills. Although most people will not use calculus or geometry in their jobs or everyday lives, mathematics enhances our abilities to think logically and reason effectively. This skill is useful in all aspects of life. Number theory, in particular, is a great area of mathematics that allows one to jump in right away without a lot of pre-requisite knowledge. We will look at examples, look for patterns, make conjectures, and we will spend a lot of time learning how to rigorously prove those conjectures.

Requirements/Evaluation: projects, homework assignments, and exams
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test) or permission of instructor. Anyone who has previously taken a 200-level math course or higher must obtain instructor permission to take the course.
Enrollment Limit: 25
Enrollment Preferences: If over-enrolled, course selection will be based on answers to a questionnaire.
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: proof writing and logic

Spring 2025
LEC Section: 01 TR 11:20 am - 12:35 pm Allison Pacelli

MATH 130 (F)(S) Calculus I (QFR)
Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

Requirements/Evaluation: Weekly homework and quizzes, 2 exams during the semester, and one final
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before
Enrollment Limit: 50

Enrollment Preferences: first-year students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This a calculus course.

Fall 2024
LEC Section: 01    MWF 8:00 am - 8:50 am    Lori A. Pedersen
LEC Section: 02    MWF 9:00 am - 9:50 am    Lori A. Pedersen

Spring 2025
LEC Section: 01    MWF 9:00 am - 9:50 am    Leo Goldmakher

MATH 140  (F)(S)  Calculus II  (QFR)

Calculation answers two basic questions: how fast is something changing (the derivative) and how much is there (the integral). This course is about integration, and the miracle that unites the derivative and the integral (the Fundamental Theorem of Calculus.) Understanding calculus requires in part the understanding of methods of integration. This course will also solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions will also play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

Requirements/Evaluation: homework, quizzes, and/or exams

Prerequisites: MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor

Enrollment Limit: 50

Enrollment Preferences: based on who needs calculus the soonest

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students who have higher advanced placement must enroll in MATH 150 or above

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is a math class

Fall 2024
LEC Section: 02    MWF 12:00 pm - 12:50 pm    Bhagya Athukorallage
LEC Section: 01    MWF 9:00 am - 9:50 am    Bhagya Athukorallage

Spring 2025
LEC Section: 01    MWF 10:00 am - 10:50 am    Christina Athanasouli

MATH 150  (F)(S)  Multivariable Calculus  (QFR)

Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations.

Requirements/Evaluation: Problem sets and exams

Prerequisites: MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination

Enrollment Limit: 50

Enrollment Preferences: Preference will be given to prospective math and stats majors, or students who need this as a course to serve as a
MATH 151  (F)  Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of the theorems of vector calculus. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Requirements/Evaluation:  problem sets and exams
Prerequisites:  AP BC 3 or higher or integral calculus with infinite series
Enrollment Limit:  50
Enrollment Preferences:  First-years, sophomores, and juniors
Expected Class Size:  40
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  This course builds quantitative skills

Fall 2024

LEC Section: 01  MWF 9:00 am - 9:50 am  Ralph E. Morrison
LEC Section: 03  MWF 12:00 pm - 12:50 pm  Ralph E. Morrison

Spring 2025
LEC Section: 01  MWF 10:00 am - 10:50 am  Palak Arora

MATH 200  (F)(S)  Discrete Mathematics  (QFR)
In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary combinatorics and probability, and graphs. Emphasis will be given on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.

Class Format:  This will not be a typical lecture course; instead it will be a blend of lecture and discovery-based learning, with weekly small group meetings with TA's.
Requirements/Evaluation:  Spring: Evaluation will be based on homework, exams, and participation in weekly small group meetings.
Prerequisites:  Calculus at the level of an AP course or Williams College Math 130 or 140. Students who have taken a 300-level or 400-level math
A course should obtain permission of the instructor before enrolling.

**Enrollment Limit:** 40

**Enrollment Preferences:** Preference given to first and second year students intending to major in mathematics or computer science.

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course involves developing the formal mathematical language of logic and set theory. It also involves using quantitative tools to solve problems relating to combinatorics, probability, number theory, and other fields of discrete mathematics.

**MATH 210 (S) Mathematical Methods for Scientists** (QFR)

**Cross-listings:** PHYS 210

**Secondary Cross-listing**

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

**Class Format:** three hours per week

**Requirements/Evaluation:** several exams and weekly problem sets, all of which have a substantial quantitative component

**Prerequisites:** MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

**Enrollment Limit:** 50

**Enrollment Preferences:** sophomores and juniors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course will have weekly problem sets using advanced calculus methods

---

**Spring 2025**

LEC Section: 01 TR 9:55 am - 11:10 am Frederick W. Strauch

---

**MATH 250 (F)(S) Linear Algebra** (QFR)

Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

**Requirements/Evaluation:** homework and exams
**Prerequisites:** MATH 150/151 or MATH 200

**Enrollment Limit:** 60

**Enrollment Preferences:** Students who have officially declared a major that requires Math 250.

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** In this course, students will engage in both quantitative and formal reasoning.

**Attributes:** COGS Related Courses

**MATH 309 (F)(S) Differential Equations** (QFR)

Ordinary differential equations (ODEs) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODEs from an applied standpoint. Topics covered early in the course may include numerical solutions, separation of variables, integrating factors, and constant coefficient linear equations. Later, we will focus on nonlinear ODEs, for which it is usually impossible to find analytical solutions. Tools from dynamical systems will be introduced to allow us to obtain information about the behavior of the ODEs without explicitly knowing the solution.

**Requirements/Evaluation:** quizzes/exams, problem sets, participation

**Prerequisites:** MATH 150/151 and MATH 250

**Enrollment Limit:** 40

**Enrollment Preferences:** discretion of the instructor

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**MATH 313 (S) Introduction to Number Theory** (WS) (QFR)

The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of number and prime in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer. This course will include a significant focus on mathematical proof writing and problem solving skills. This includes writing clear and rigorous mathematical proofs, clearly explaining mathematical ideas verbally and in writing, determining how to approach certain types of problems, looking for patterns and making conjectures, and asking good questions about the implications of certain ideas and theorems.

**Requirements/Evaluation:** Problem sets, project, and exams

**Prerequisites:** MATH 250 or permission of instructor

**Enrollment Limit:** 19
Enrollment Preferences: If course is over-enrolled, enrollment preference will be based on answers to a questionnaire. Some preference will be given to students who have not yet had Math 355.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS) (QFR)

Writing Skills Notes: Students will complete weekly problem sets, with a strong emphasis on proof writing, as well as 2 5-10 page papers/projects. There will be feedback given on mathematical writing as well as accuracy, and discussion time during class on writing in math.

Quantitative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Spring 2025

LEC Section: 01  TR 9:55 am - 11:10 am   Allison Pacelli

MATH 326  (F)  Differential Geometry  (QFR)

Differential Geometry is the study of curvature. In turn, curvature is the heart of geometry. The goal of this course is to start the study of curvature, concentrating on the curvature of curves and of surfaces, leading to the deep Gauss-Bonnet Theorem, which links curvature with topology.

Class Format: lecture

Requirements/Evaluation: Evaluation will be based primarily on problem sets, midterms and a final exam

Prerequisites: MATH 250

Enrollment Limit: 30

Enrollment Preferences: Preference to mathematics majors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It is a mathematics upper level course.

Fall 2024

LEC Section: 01  MWF 11:00 am - 11:50 am   Ivo Terek

MATH 331  (F)  The Little Questions  (QFR)

Using math competitions such as the Putnam Exam as a springboard, in this class we follow the dictum of the Ross Program and "think deeply of simple things". The two main goals of this course are to prepare students for competitive math competitions, and to get a sense of the mathematical landscape encompassing elementary number theory, combinatorics, graph theory, and group theory (among others). While elementary frequently is not synonymous with easy, we will see many beautiful proofs and "a-ha" moments in the course of our investigations. Students will be encouraged to explore these topics at levels compatible with their backgrounds.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: members or alternates of the Putnam team, Mathematics, Physics or Computer Science majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: http://web.williams.edu/Mathematics/sjmiller/public_html/331Fa24/

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is an upper level math course where students learn advanced material and solve challenging problems.
**MATH 334 (S) Graph Theory** (QFR)

A graph is a collection of vertices, joined together by edges. In this course, we will study the sorts of structures that can be encoded in graphs, along with the properties of those graphs. We'll learn about such classes of graphs as multi-partite, planar, and perfect graphs, and will see applications to such optimization problems as minimum colorings of graphs, maximum matchings in graphs, and network flows.

**Requirements/Evaluation:** problem sets, exams, and a short final project

**Prerequisites:** MATH 200 or MATH 250

**Enrollment Limit:** 30

**Enrollment Preferences:** Math majors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course involves the writing of mathematical proofs.

---

**Spring 2025**

LEC Section: 01    MWF 9:00 am - 9:50 am    Ralph E. Morrison

**MATH 338 (F) Intermediate Logic** (QFR)

**Cross-listings:** PHIL 338

**Secondary Cross-listing**

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic.

Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.

**Requirements/Evaluation:** problem sets and exams

**Prerequisites:** some class in which student has studied formal reasoning

**Enrollment Limit:** 20

**Enrollment Preferences:** Philosophy majors; juniors and seniors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 338(D2) MATH 338(D3)

**Quantitative/Formal Reasoning Notes:** This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.

**Attributes:** PHIL Contemp Metaphysics + Epistemology Courses
MATH 341 (F)(S) Probability (QFR)
Cross-listings: STAT 341

Primary Cross-listing
The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 150 and MATH 250 or permission of the instructor
Enrollment Limit: 50
Enrollment Preferences: Priority will be given to Mathematics majors and to Statistics Majors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:

MATH 345 (S) Introduction to Numerical Analysis (QFR)
Numerical analysis is the study of algorithms that use numerical approximation to solve problems which arise in scientific applications. This course provides an introduction to the theory, development, and analysis of algorithms for obtaining numerical solutions. We will also use mathematical software to facilitate numerical experimentation. Topics discussed in the course include: Error Analysis and Convergence Rates of Algorithms; Root Finding for Nonlinear Equations; Approximating Functions; Numerical Differentiation and Integration; Numerical Solutions of Ordinary Differential Equations; Iterative Methods for Solving Linear Systems.

Requirements/Evaluation: Evaluation will be based on homework, projects, and exams.
Prerequisites: Math 250 and Math 150/151
Enrollment Limit: 30
Enrollment Preferences: Mathematics and Statistics majors.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is an advanced mathematics class that will cover the fundamental ideas of Numerical Analysis. The students will study in depths various algorithms that provide numerical solutions to various questions in science.

Spring 2025
LEC Section: 01 MWF 11:00 am - 11:50 am Christina Athanasouli

MATH 350 (F)(S) Real Analysis (QFR)
Why is the product of two negative numbers positive? Why do we depict the real numbers as a line? Why is this line continuous, and what do we mean when we say that? Perhaps most fundamentally, what is a real number? Real analysis addresses such questions, delving into the structure of real numbers and functions of them. Along the way we'll discuss sequences and limits, series, completeness, compactness, derivatives and integrals, and metric spaces. Results covered will include the Cantor-Schroeder-Bernstein theorem, the monotone convergence theorem, the Bolzano-Weierstrass theorem, the Cauchy criterion, Dirichlet's and Riemann's rearrangement theorem, the Heine-Borel theorem, the intermediate value theorem, and many others. This course is excellent preparation for graduate studies in mathematics, statistics, and economics.

Requirements/Evaluation: Problem sets and exams.
Prerequisites: MATH 250 or permission of instructor.
Enrollment Limit: 40
Enrollment Preferences: Juniors and Seniors.
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is an advanced mathematics course.

LEC Section: 01  MR 2:35 pm - 3:50 pm  Palak Arora

MATH 355  (F)(S)  Abstract Algebra  (QFR)
Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.

Requirements/Evaluation: Problem sets and exams
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: Students who have officially declared a major that requires Math 355.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

**MATH 361 (F) Theory of Computation (QFR)**

Cross-listings: CSCI 361

Secondary Cross-listing

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Requirements/Evaluation: weekly problem sets and one or more exams

Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 361(D3) CSCI 361(D3)

Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

**MATH 374 (F) Topology (QFR)**

In Real Analysis you learned about metric spaces—any set of objects endowed with a way of measuring distance—and the topology of sets in such spaces (open, closed, bounded, etc). In this course we flip this on its head: we explore how to develop analysis (limits, continuity, etc) in spaces where the topology is known but the metric is not. This will lead us to a bizarre and fascinating version of geometry in which we cannot distinguish between shapes that can be continuously deformed into one another. Not only does this theory turn out to be beautiful in the abstract, it plays an important role in math, physics, and data analysis. This course is excellent preparation for graduate programs in mathematics.

Requirements/Evaluation: Problem sets, exams, an expository essay.

Prerequisites: MATH 350 or 351; not open to students who have taken MATH 323. If you didn't cover metric spaces in real analysis, that's OK!
Enrollment Limit: 30
Enrollment Preferences: Juniors and seniors
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: It's math.

Fall 2024
LEC Section: 01 TR 11:20 am - 12:35 pm Leo Goldmakher

MATH 382 (S) Fourier Analysis (QFR)
Fourier analysis is the study of waves and frequencies. More precisely, the goal of Fourier analysis is to decompose a complicated function into a simple combination of pure waves, thereby gleaning insight into the behavior of the function itself. It's difficult to overstate the impact of this branch of mathematics; it is foundational throughout theoretical mathematics (e.g., to study the distribution of prime numbers), applied mathematics (e.g., to solve differential equations), physics (e.g., to study properties of light and sound), computer science (e.g., to compute with large integers and matrices), audio engineering (e.g., to pitch-correcting algorithms), medical science (e.g., throughout radiology), etc. The goal of this course is to cover the basic theory (fourier series, the fourier transform, the fast fourier transform) and explore a number of applications, including Dirichlet's theorem on primes in arithmetic progressions, the isoperimetric inequality, the heat equation, and Heisenberg's uncertainty principle.
Class Format: Every week, each student will either give a lecture (based on provided readings) or explain solutions to selected problems.
Requirements/Evaluation: Evaluation will be based on lectures and presentation of problem solutions.
Prerequisites: MATH 350 or MATH 351 or permission of instructor.
Enrollment Limit: 10
Enrollment Preferences: By lottery.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: It's math!

Spring 2025
TUT Section: T1 TBA Leo Goldmakher

MATH 389 (S) Advanced Analysis (WS) (QFR)
This course further develops and explores topics and concepts from real analysis, with special emphasis on introducing students to subject matter and techniques that are useful for graduate study in mathematics or an allied field. Material will be drawn, based on student interest, from many areas, including analytic number theory, Fourier series and harmonic analysis, generating functions, differential equations and special functions, integral operators, equidistribution theory and probability, random matrix theory and probabilistic methods. This will be an intense, fast paced class which will give a flavor for graduate school. In addition to standard homework problems, students will also write reviews for MathSciNet, referee papers for journals, write programs in SAGE or Mathematica to investigate and conjecture, and read classic and current research papers.
Class Format: lecture
Requirements/Evaluation: evaluation will be based primarily on homework, classwork, and exams
Prerequisites: MATH 350 or 351 and one additional 300-level MATH course, or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: students interested in graduate school in mathematics or an allied discipline
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Unit Notes: http://web.williams.edu/Mathematics/sjmiller/public_html/389/
Distributions:  (D3)  (WS) (QFR)

**Writing Skills Notes:** Students will improve and expand their writing skills by taking course material as a starting point and writing chapters for a book under contract with the American Mathematical Society. This will involve numerous iterations of the content, with feedback both from the professor and from an editor.

**Quantitative/Formal Reasoning Notes:** This is a post-core 300 level math class.

**Spring 2025**

**LEC Section:** 01  TR 11:20 am - 12:35 pm  Steven J. Miller

**MATH 403 (F) Measure and Ergodic Theory  (QFR)**

An introduction to measure theory and ergodic theory. Measure theory is a generalization of the notion of length and area, and has been used in the study of stochastic (probabilistic) systems. The course covers the construction of Lebesque and Borel measures, measurable functions, and Lebesque integration. Ergodic theory studies the probabilistic behavior of dynamical systems as they evolve through time, and is based on measure theory. The course will cover basic notions, such as ergodic transformations, weak mixing, mixing, Bernoulli transformations, and transformations admitting and not admitting an invariant measure. There will be an emphasis on specific examples such as group rotations, the binary odometer transformations, and rank-one constructions. The Ergodic Theorem will also be covered, and will be used to illustrate notions and theorems from measure theory.

**Requirements/Evaluation:** Homework and exams

**Prerequisites:** MATH 350 or MATH 351 or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** Mathematics majors

**Expected Class Size:** 15-20

**Grading:**  yes pass/fail option,  yes fifth course option

**Unit Notes:** senior major course

**Distributions:**  (D3)  (QFR)

---

**Fall 2024**

**LEC Section:** 01  MR 2:35 pm - 3:50 pm  Cesar E. Silva

**MATH 408 (F) L-Functions and Sphere Packing  (WS) (QFR)**

Optimal packing problems arise in many important problems, and have been a source of excellent mathematics for centuries. The Kepler Problem (what is the most efficient way to pack balls in three-space) is a good example. The original formulation has been used in such diverse areas as stacking cannonballs on battleships to grocers preparing fruit displays, and its generalizations allow the creation of powerful error detection and correction codes. While the solution of the Kepler Problem is now known, the higher dimensional version is very much open. There has been remarkable progress in the last few years, with number theory playing a key role in these results. We will develop sufficient background material to understand many of these problems and the current state of the field. Pre-requisites are real analysis.

**Requirements/Evaluation:** Class participation, homework, exams and participation in writing a textbook on the material. Each student will be responsible for working on a chapter of a book based on this material. In addition to obtaining critical writing feedback from myself and my co-author (who is a world expert in the subject), depending on timing we will also be able to share comments from an editor of a major publishing house or a referee. Chapters can range from short snapshots of a subject, on the order of 5 pages, to longer technical derivations of perhaps 10-30 pages.

**Prerequisites:** Math 350 or 351

**Enrollment Limit:** 40

**Enrollment Preferences:** Senior math majors, students planning on graduate study in a STEM field

**Expected Class Size:** 20

**Grading:**  yes pass/fail option,  yes fifth course option

**Distributions:**  (D3)  (WS) (QFR)

**Writing Skills Notes:** Students will improve and expand their writing skills by taking course material as a starting point and writing chapters for a book under contract with the American Mathematical Society. This will involve numerous iterations of the content, with feedback both from the professor and from an editor.
Quantitative/Formal Reasoning Notes: This is a 400 level math class

Fall 2024
LEC Section: 01    MWF 11:00 am - 11:50 am    Steven J. Miller

MATH 411  (S)  Commutative Algebra  (QFR)
Commutative Algebra is an essential area of mathematics that provides indispensable tools to many areas, including Number Theory and Algebraic Geometry. This course will introduce you to the fundamental concepts for the study of commutative rings, with a special focus on the notion of “prime ideals,” and how they generalize the well-known notion of primality in the set of integers. Commutative algebra has applications ranging from algebraic geometry to coding theory. For example, one can use commutative algebra to create error correcting codes. It is perhaps most often used, however, to study curves and surfaces in different spaces. To understand these structures, one must study polynomial rings over fields. This course will be an introduction to commutative algebra. Possible topics include polynomial rings, localizations, primary decomposition, completions, and modules.

Requirements/Evaluation: homework and exams
Prerequisites: MATH 355 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: Math majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Spring 2025
LEC Section: 01    MWF 9:00 am - 9:50 am    Susan R. Loepp

MATH 412  (S)  Mathematical Biology  (QFR)
This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications may include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Requirements/Evaluation: problem sets, quizzes/exams, participation, final project and paper
Prerequisites: MATH 250 and MATH 309, or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: preference for senior math/stats major and also based on an interest statement
Expected Class Size: 30
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
MATH 412(D3) BIOL 420(D3)
Quantitative/Formal Reasoning Notes: The course will introduce methods for developing and analyzing mathematical models.
MATH 426 (F) Differential Topology (QFR)
Differential topology marries the rubber-like deformations of topology with the computational exactness of calculus. This sub field of mathematics asks and answers questions like "Can you take an integral on the surface of doughnut?" and includes far-reaching applications in relativity and robotics. This tutorial will provide an elementary and intuitive introduction to differential topology. We will begin with the definition of a manifold and end with a generalized understanding of Stokes Theorem.

Requirements/Evaluation: weekly homework and exams, and possibly student presentations
Prerequisites: MATH 350 (students who have not taken MATH 350 may enroll only with permission of the instructor)
Enrollment Limit: 30
Enrollment Preferences: mathematics seniors, mathematics majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: There will be weekly math problem sets.

Fall 2024
LEC Section: 01  MWF 9:00 am - 9:50 am  Ivo Terek

MATH 453 (S) Partial Differential Equations (QFR)
In this course, we further explore the world of differential equations. Mainly, we cover topics in partial differential equations. Partial Differential Equations (PDEs) are fundamental to the modeling of many natural phenomena, arising in many fields, including fluid mechanics, heat and mass transfer, electromagnetic theory, finance, elasticity, and more. The goals of this course are to discuss the following topics: classification of PDEs in terms of order, linearity and homogeneity; physical interpretation of canonical PDEs; solution techniques, including separation of variables, series solutions, integral transforms, and the method of characteristics.

Requirements/Evaluation: Evaluation will be based on homework, projects, and exams.
Prerequisites: MATH 150-151; MATH/PHYS 210 or MATH 309
Enrollment Limit: 20
Enrollment Preferences: Mathematics and Physics majors.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is an advanced mathematics class dedicated to the study of partial differential equations (PDEs). These equations are the most important mathematical tools for the study of complex physical phenomena such as waves and fluids (including both air and water), heat transfer, electromagnetism, and finance.

Spring 2025
LEC Section: 01  TR 11:20 am - 12:35 pm  Bhagya Athukorallage

PHIL 203 (S) Introductory Logic (QFR)
Logic is the study of reasoning and argument. More particularly, it concerns itself with the differences between good and bad reasoning, between strong and weak arguments. This course is an introduction to the precise characterization of good logical reasoning. We will learn a to a formal language, Monadic First-Order Logic, designed to cleanly represent good inference patterns. Learning this language will primarily involve learning two skills: (i) translation between sentences of English and formulas of the logical language, and (ii) proving the validity of logical arguments using a system of natural deduction. No prior mathematical/logical/formal experience is assumed for this course.
The sentence “Every cookie is chocolate chip and three of them are oatmeal raisin” is a perfectly grammatical sentence of English, but it's self-contradictory. What does it take to realize this fact? One must grasp the meanings of the various parts of the sentence. In particular, one must grasp that "three of them" picks out a subset of the group picked out by "every cookie", and that there's no such thing as a cookie that is both chocolate chip and oatmeal raisin. There two ways to understand “Many students took every class”. According to one, there is a single group of students that had their hands extremely full this semester. According to the other, every class was well-populated, potentially by different groups. The reason for this is that there are two underlying structures that the original sentence can realize. This course serves as an introduction to formal methods in the scientific study of language. Our goal will be to characterize phenomena like those above with logical and mathematical precision. The focus will be on model-theoretic semantics, the sub-field of linguistics that studies meanings. Along the way we will discuss principles of syntax, the sub-field that studies sentence structures, and pragmatics, the sub-field that studies inferences of non-literal content. This is a formal course, but no prior logical or mathematical background will be expected. Starting from scratch, students will learn the building blocks of current-day linguistic research. This introduction will be of use to students interested in language from a variety of perspectives, including philosophy, cognitive science, and computer science.

Requirements/Evaluation: Weekly problem sets, plus a final project (paper/presentation/other type, to be discussed with instructor)
Prerequisites: No prerequisites
Enrollment Limit: 20
Enrollment Preferences: Preference given to seniors and philosophy/cognitive science majors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: This course teaches the fundamentals of the formal analysis of language. Students will learn to provide translation schemes from English to a logical language (typed lambda calculus).

PHYS 108 (S) Energy Science and Technology (QFR)
Cross-listings: ENVI 108

Primary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating and lighting, and energy storage. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: Two meetings per week. Some weeks that means two lectures. Other weeks, that means one lecture plus one lab, with the class divided between two lab sections.
Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative
Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130
Enrollment Limit: 10 per lab
Enrollment Preferences: non-physics majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 131  (F) Introduction to Mechanics  (QFR)
We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

Requirements/Evaluation: exams, labs, and weekly problem sets, all of which have a substantial quantitative component
Prerequisites: MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead
Enrollment Limit: 24 per lab
Enrollment Preferences: seniority
Expected Class Size: 60
Grading: yes pass/fail option, yes fifth course option
Unit Notes: PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)
Distributions: (D3)  (QFR)
Quantitative/Formal Reasoning Notes: This class will have weekly problem sets requiring substantial quantitative reasoning

LAB Section: 03  T 1:00 pm - 4:00 pm  Graham K. Giovanetti

PHYS 132  (S) Electromagnetism and the Physics of Matter  (QFR)
This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.

Class Format: lecture three hours per week, laboratory three hours approximately every other week, and conference section 1 hour approximately every other week
Requirements/Evaluation: weekly problem sets, labs, quizzes and exams
Prerequisites: PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)
Enrollment Limit: 22 per lab
Enrollment Preferences: sophomores
Expected Class Size: 60
Grading: yes pass/fail option, yes fifth course option
PHYS 141 (F) Mechanics and Waves (QFR)
This is the typical first course for a prospective physics major. It covers most of the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

Class Format: lecture, three hours per week; laboratory, three hours approximately every other week; conference section, 1.5 hours approximately every other week

Requirements/Evaluation: weekly problem sets, labs, two 1-hour exams, and a final exam, all of which have a substantial quantitative component

Prerequisites: High school physics (strongly recommended) and MATH 130 or equivalent placement, or permission of the instructor. High school physics at the AP, IB, or equivalent level is neither required nor expected.

Enrollment Limit: 24 per lab

Enrollment Preferences: first-year students and science majors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Unit Notes: PHYS 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course consists of lectures, problem-solving conferences, lab exercises, problem sets and exams, all of which have a substantial quantitative component.
PHYS 151  (F)  Seminar in Modern Physics  (QFR)
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course covers the same core material as PHYS 142 but in a small seminar format for students with strong prior preparation in physics.

Class Format: lecture/discussions plus one 3-hour lab per week
Requirements/Evaluation: class participation, weekly lab assignments, weekly problem sets, exams
Prerequisites: placement by the department (see "advanced placement" section in the description about the department). Students may take either PHYS 142 or PHYS 151 but not both

Enrollment Limit:  18
Enrollment Preferences:  first-years

PHYS 201  (F)  Electricity and Magnetism  (QFR)
The classical theory of electricity and magnetism is very rich yet it can be written in a remarkably succinct form using Maxwell's equations. This course is an introduction to electricity and magnetism and their mathematical description, connecting electric and magnetic phenomena via the special theory of relativity. Topics include electrostatics, magnetic fields, electromagnetic induction, DC and AC circuits, and the electromagnetic properties of matter. The laboratory component of the course is an introduction to electronics where students will develop skills in building and debugging electrical circuits.

Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: problem sets, labs/conference section assignments, two midterms, and a final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 142 OR 151; MATH 150 or 151; with a preference for MATH 151
Enrollment Limit:  10 per lab
Enrollment Preferences: prospective physics majors, then by seniority
Expected Class Size:  20
**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course involves significant problem-solving and mathematical analysis of phenomena using calculus, numerical methods, and other quantitative tools.

LAB Section: 03  R 1:00 pm - 4:00 pm  David R. Tucker-Smith

LAB Section: 02  W 1:00 pm - 4:00 pm  David R. Tucker-Smith

LEC Section: 01  MWF 10:00 am - 10:50 am  David R. Tucker-Smith

**PHYS 202 (S) Vibrations, Waves and Optics (QFR)**

Waves and oscillations characterize many different physical systems, including vibrating strings and springs, waves at the beach, or those that we hear as sound or see as light. Quantum mechanics describes particles with wave functions, and gravitational waves distort the very fabric of the universe. Despite these diverse settings, waves exhibit several common characteristics, so understanding of a few simple systems can provide insight into a wide array of phenomena. In this course we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. We conclude with a focus on electromagnetic waves and in particular on optical examples of wave phenomena such as interference, diffraction, and lasers. Throughout the course we will introduce and develop mathematical tools which will continue to see use in higher-level physics.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** problem sets, labs, midterm examinations, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 201; co-requisite: PHYS/MATH 210 or MATH 309 or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** sophomores

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Weekly problem sets and laboratories which develop and use quantitative skills.

**PHYS 210 (S) Mathematical Methods for Scientists (QFR)**

**Cross-listings:** MATH 210

**Primary Cross-listing**

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

**Class Format:** three hours per week

**Requirements/Evaluation:** several exams and weekly problem sets, all of which have a substantial quantitative component

**Prerequisites:** MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

**Enrollment Limit:** 50

**Enrollment Preferences:** sophomores and juniors
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 210(D3) MATH 210(D3)

Quantitative/Formal Reasoning Notes: This course will have weekly problem sets using advanced calculus methods

Spring 2025
LEC Section: 01 TR 9:55 am - 11:10 am Frederick W. Strauch

PHYS 234 (S) Introduction to Materials Science (QFR)
Cross-listings: GEOS 234

Primary Cross-listing
Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

Class Format: lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)
Requirements/Evaluation: weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component
Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: based on students' scientific background and seniority
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Unit Notes: This course does not count toward the Geosciences major.
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 234(D3) GEOS 234(D3)

Quantitative/Formal Reasoning Notes: Weekly problem sets and exams all have a substantial quantitative component.
Attributes: MTSC Courses

Spring 2025
LEC Section: 01 MR 2:35 pm - 3:50 pm Katharine E. Jensen

PHYS 301 (F) Quantum Physics (QFR)
This course serves as a one-semester introduction to the formalism, and phenomenology of quantum mechanics, beginning with a discussion of the Schrodinger wave equation, the concept of matter waves, and wave-packets. With this introduction as background, we will continue our discussion with a variety of one-dimensional problems such as the particle-in-a-box and the harmonic oscillator. We then extend this work to systems in two and three dimensions, including a detailed discussion of the structure of the hydrogen atom. Along the way we will develop connections between mathematical formalism and physical predictions of the theory. Finally, we conclude the course with a discussion of angular momentum and spins, with applications to atomic physics, entanglement, and quantum information.

Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: weekly problem sets, laboratory reports / write-ups, a midterm exam, and final exam, all of which have a substantial
quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 309

Enrollment Limit: 8 per lab

Enrollment Preferences: physics majors

Expected Class Size: 24

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Phys 301 relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

Fall 2024

LEC Section: 01 MWF 9:00 am - 9:50 am Charlie Doret

PHYS 302 (S) Statistical Mechanics & Thermodynamics (QFR)

Macroscopic objects are made up of huge numbers of fundamental particles interacting in simple ways—obeying the Schrödinger equation, Newton’s and Coulomb’s Laws—and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we will develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety of physical questions, including the behavior of gases, polymers, heat engines, biological and astrophysical systems, magnets, and electrons in solids.

Class Format: lecture/discussion three hours per week and weekly laboratory work

Requirements/Evaluation: weekly problem sets and labs, plus exams, all of which have a substantial quantitative component

Prerequisites: required: PHYS 201, PHYS/MATH 210 or MATH 309; recommended: PHYS 202, PHYS 301

Enrollment Limit: 14 per lab

Enrollment Preferences: physics majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: weekly problem sets, exams, and labs, all of which have a substantial quantitative component

Spring 2025

LEC Section: 01 MWF 8:30 am - 9:45 am Daniel P. Aalberts
LAB Section: 02 W 1:10 pm - 3:50 pm Daniel P. Aalberts

PHYS 315 (F) Computational Biology (QFR)

Cross-listings: CSCI 315

Primary Cross-listing

This course will provide an overview of Computational Biology, the application of computational, mathematical, statistical, and physical problem-solving techniques to interpret the rapidly expanding amount of biological data. Topics covered will include database searching, DNA sequence alignment, clustering, RNA structure prediction, protein structural alignment, methods of analyzing gene expression, networks, and genome assembly using techniques such as string matching, dynamic programming, hidden Markov models, and statistics.

Requirements/Evaluation: weekly Python programming assignments, code reviews, problem sets, plus a few quizzes and a final project
Prerequisites: programming experience (e.g., CSCI 136) and mathematics (PHYS/MATH 210 or MATH 150) and physical science (PHYS 142/151, or CHEM 101/15X), or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: if over-enrolled, a questionnaire will be circulated

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 315(D3) PHYS 315(D3)

Quantitative/Formal Reasoning Notes: problem sets and programming assignments

Fall 2024

LEC Section: 01 MR 2:35 pm - 3:50 pm Daniel P. Aalberts

PHYS 321 (S) Introduction to Particle Physics (QFR)

The Standard Model of particle physics incorporates special relativity, quantum mechanics, and almost all that we know about elementary particles and their interactions. This course introduces some of the main ideas and phenomena associated with the Standard Model. After a review of relativistic kinematics, we will learn about symmetries in particle physics, relativistic wave equations, elements of quantum field theory, Feynman diagrams, and selected applications of quantum electrodynamics, the weak interactions, and quantum chromodynamics. We will conclude with a discussion of spontaneous symmetry breaking and the Higgs mechanism.

Requirements/Evaluation: weekly problem sets, a midterm exam, and a final exam

Prerequisites: PHYS 301

Enrollment Limit: 20

Enrollment Preferences: By seniority

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Exams and problem sets all have a significant quantitative component.

Spring 2025

LEC Section: 01 TR 11:20 am - 12:35 pm David R. Tucker-Smith

PHYS 402 (S) Applications of Quantum Mechanics (QFR)

This course will explore a number of important topics in the application of quantum mechanics to physical systems, including perturbation theory, the variational principle and the semiclassical interaction of atoms and radiation. The course will finish up with three weeks on quantum optics including an experimental project on non-classical interference phenomena. Applications and examples will be taken mostly from atomic physics with some discussion of solid state systems.

Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 301

Enrollment Limit: 10 per sec

Enrollment Preferences: Physics and Astrophysics Majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)
This course has weekly problem sets, all of which have a substantial quantitative component.

Spring 2025
TUT Section: T1  F 1:10 pm - 2:25 pm  Betul Pamuk

PHYS 411  (F) Classical Mechanics  (QFR)
This course will explore advanced topics in classical mechanics. Central ideas include the calculus of variations, the Lagrangian and Hamiltonian formulations of mechanics, phase space, central-force motion, non-inertial reference frames (including implications for physics on a rotating Earth), rigid-body rotations, and non-linear dynamics & chaos, with additional topics from continuum and fluid mechanics as time permits. Numerical and perturbative techniques will be developed and used extensively. We will also examine the ways in which classical mechanics informs other fields of physics. In addition to weekly tutorial meetings the class will meet weekly as a whole to introduce and discuss new material.

Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, a final project, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 309

Enrollment Limit:  30
Enrollment Preferences: majors
Expected Class Size:  24
Grading: no pass/fail option,  no fifth course option
Distributions: (D3)  (QFR)

Quantitative/Formal Reasoning Notes: weekly problem sets requiring substantial quantitative reasoning using analytical and numerical methods.

Fall 2024
TUT Section: T1  F 1:10 pm - 2:25 pm  Katharine E. Jensen,  Frederick W. Strauch

PHYS 451  (F) Condensed Matter Physics  (QFR)
Condensed matter physics is an important area of current research and serves as the basis for modern electronic technology. We plan to explore the physics of metals, insulators, semiconductors, superconductors, and photonic crystals, with particular attention to structure, thermal properties, energy bands, and electronic properties.

Requirements/Evaluation: weekly readings and problem sets, and exams
Prerequisites: PHYS 301 (may be taken simultaneously); or permission of instructor

Enrollment Limit:  10
Enrollment Preferences: Physics majors
Expected Class Size:  6
Grading: yes pass/fail option,  yes fifth course option
Distributions: (D3)  (QFR)

Quantitative/Formal Reasoning Notes: serious problem sets
Attributes: MTSC Courses

Fall 2024
SEM Section: 01  MR 1:10 pm - 2:25 pm  Daniel P. Aalberts

POEC 253  (F) Empirical Methods in Political Economy  (WS)  (QFR)
This course introduces students to common empirical tools used in policy analysis and implementation. Students will develop skills in statistical literacy to become critical consumers of public policy-relevant research. The emphasis in the course is split between an intuitive understanding of statistical foundations, and applications in data visualization and science communication. Through hands-on work with data and critical assessment of existing
empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; effective data visualization; statistical inference and hypothesis testing; and multiple regression analysis. A particular focus will be placed on understanding causality, the challenges of estimating causal relationships, and the design of evidence-based policy. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.

**Requirements/Evaluation:** Problem sets, group project, midterm exam, final exam  
**Prerequisites:** MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255  
**Enrollment Limit:** 20  
**Enrollment Preferences:** Political Economy majors, Environmental Policy majors and sophomores  
**Expected Class Size:** 15  
**Grading:** yes pass/fail option, yes fifth course option  
**Unit Notes:** does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major  
**Distributions:** (D2) (WS) (QFR)  
**Writing Skills Notes:** Students will write 3 coding-intensive data briefs over the course of the semester. Creation of original exhibits from publicly accessible data, use of citation management systems, and clarity in technical writing will be emphasized.  
**Quantitative/Formal Reasoning Notes:** The course teaches econometrics, i.e. statistics as economists use it, with applications in economics, political science, and other fields.  
**Attributes:** POEC Required Courses

Fall 2024  
LEC Section: 01  TR 8:30 am - 9:45 am  Shyam Raman

**PSYC 201 (F)(S) Experimentation and Statistics** (QFR)  
An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret results, and write research reports. Students conduct a series of research studies in different areas of psychology that illustrate basic designs and methods of analysis. You must register for lab and lecture with the same instructor.  
**Requirements/Evaluation:** research reports, exams, and problem sets  
**Prerequisites:** PSYC 101; not open to first-year students except with permission of instructor  
**Enrollment Limit:** 16  
**Enrollment Preferences:** Psychology majors  
**Expected Class Size:** 16  
**Grading:** no pass/fail option, yes fifth course option  
**Distributions:** (D3) (QFR)  
**Quantitative/Formal Reasoning Notes:** This course has problem sets focused on experimental design and quantitative data analysis. Students will help design and conduct experiments, analyze the data, and report their findings.  
**Attributes:** COGS Related Courses

**SOC 150 (F) Data for Justice (DPE) (QFR)**

**Cross-listings:** STS 150 / AMST 150 / WGSS 150 / INTR 150

**Secondary Cross-listing**

This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

**Class Format:** This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.

**Requirements/Evaluation:** Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

**Prerequisites:** None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

**Enrollment Limit:** 18

**Expected Class Size:** 18

**Grading:**
- no pass/fail option
- no fifth course option

**Distributions:** (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

**Difference, Power, and Equity Notes:** This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGTBQ+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

**Quantitative/Formal Reasoning Notes:** This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

---

**STAT 101 (F)(S) Elementary Statistics and Data Analysis (QFR)**

It is impossible to be an informed citizen in today’s world without an understanding of data. Whether it is opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines, etc, we need to be able to interpret and gain information from statistics. This course will introduce the common methods used to analyze and present data with an emphasis on interpretation and informed decision making.

**Requirements/Evaluation:** weekly homework, quizzes, exams, and a project

**Prerequisites:** MATH 102 (or demonstrated proficiency on a diagnostic test)

**Enrollment Limit:** 50
Enrollment Preferences: juniors and seniors
Expected Class Size: 35
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Students with MATH150 but no statistics should enroll in STAT201. Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202.
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: It is a quantitative course.
Attributes: COGS Related Courses PHLH Statistics Courses

STAT 161 (F)(S) Introductory Statistics for Social Science (QFR)
This course will cover the basics of modern statistical analysis with a view toward applications in the social sciences. Topics include exploratory data analysis, linear regression, basic statistical inference, and elements of probability theory. The course focuses on the application of statistical tools to solve problems, to make decisions, and the use of statistical thinking to understand the world.
Requirements/Evaluation: Weekly homework, quizzes, two midterms and a final exam (midterms include take-home components), and a data analysis project. Students will need to become familiar with the statistical software STATA.
Prerequisites: MATH 130 (or equivalent); not open to students who have completed STAT 101 or equivalent
Enrollment Limit: 40
Enrollment Preferences: Economics majors, sophomores
Expected Class Size: 40
Grading: yes pass/fail option, no fifth course option
Unit Notes: Students with calculus background should consider STAT 201. Students without any calculus background should consider STAT 101. Students with AP Stat 4 or 5 should consider Stat 202. Please refer to the placement chart on the Math&Stat department website for more information.
Distributions: (D3) (QFR)

LEC Section: 02 MWF 12:00 pm - 12:50 pm Duncan A. Clark

STAT 201 (F)(S) Statistics and Data Analysis (QFR)
Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science, is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, "Data, data, data! I can't make bricks without clay." In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.
Requirements/Evaluation: weekly homework and projects, midterm exams, and a final exam.
Prerequisites: MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent

Enrollment Limit: 40

Enrollment Preferences: Prospective Statistics majors, students for whom the course is a major prerequisite, and seniors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202. Students with no calc or stats background should enroll in STAT 101. Students with MATH 140 but no statistics should enroll in STAT 161.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Students will learn to choose, carry out, interpret, and communicate analyses of data.

Attributes: COGS Related Courses PHLH Statistics Courses

Spring 2025
LEC Section: 01 TF 1:10 pm - 2:25 pm Elizabeth M. Upton

STAT 202 (F)(S) Introduction to Statistical Modeling (QFR)

Data come from a variety of sources: sometimes from planned experiments or designed surveys, sometimes by less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data, as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential to answer questions about the world -- and about its limitations. We'll emphasize applications over theory and analyze real data sets throughout the course.

Requirements/Evaluation: Homework problems; quizzes; exams; a final project (on a topic that interests you!). Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While your assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to class discussions, and working together with classmates on practice problems.

Prerequisites: MATH 140 and STAT 101/161/201/AP Statistics 4/5, or permission of instructor.

Enrollment Limit: 40

Enrollment Preferences: Prospective Statistics majors and more senior students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with a 4 on the AP Stats exam should contact the department for proper placement. Students with STAT 201 are strongly encouraged to take STAT 346 or other 300-level statistics electives.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

STAT 335 (S) Introduction to Biostatistics and Epidemiology (QFR)

Epidemiology is the study of disease and disability in human populations, while biostatistics focuses on the development and application of statistical
methods to address questions that arise in medicine, public health, or biology. This course will begin with epidemiological study designs and core concepts in epidemiology, followed by key statistical methods in public health research. Topics will include multiple regression, analysis of categorical data (two sample methods, sets of 2x2 tables, RxC tables, and logistic regression), survival analysis (Cox proportional hazards model), and if time permits, a brief introduction to regression with correlated data.

**Requirements/Evaluation:** Evaluation will be primarily based on weekly assignments (regular homework or mini-projects), two midterm exams, and a final exam.

**Prerequisites:** Stat 201 or Stat 202, or permission of instructor (prior experience should include a working understanding of multiple linear regression, the basics of statistical inference, and R).

**Enrollment Limit:** 20

**Enrollment Preferences:** Statistics majors and prospective majors who have not yet taken Stat 346; public health concentrators

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Students will learn how to choose, implement, and interpret statistical analyses relevant to public health studies.

**Attributes:** PHLH Statistics Courses

Spring 2025

LEC Section: 01  MWF 12:00 pm - 12:50 pm  Anna M. Plantinga

**STAT 341 (F)(S) Probability** (QFR)

**Cross-listings:** MATH 341

**Secondary Cross-listing**

The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

**Requirements/Evaluation:** homework, classwork, and exams

**Prerequisites:** MATH 150 and MATH 250 or permission of the instructor

**Enrollment Limit:** 50

**Enrollment Preferences:** Priority will be given to Mathematics majors and to Statistics Majors.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STAT 341(D3) MATH 341(D3)

**Quantitative/Formal Reasoning Notes:** This is a 300-level Math/Stat course.

Fall 2024

LEC Section: 01  MWF 12:00 pm - 12:50 pm  Mihai Stoiciu

Spring 2025

LEC Section: 01  TR 9:55 am - 11:10 am  Steven J. Miller

**STAT 342 (S) Introduction to Stochastic Processes** (QFR)

Stochastic processes are mathematical models for random phenomena evolving in time or space. Examples include the number of people in a queue
at time $t$ or the accumulated claims paid by an insurance company in an interval of time $t$. This course introduces the basic concepts and techniques of stochastic processes used to construct models for a variety of problems of practical interest. The theory of Markov chains will guide our discussion as we cover topics such as martingales, random walks, Poisson process, birth and death processes, and Brownian motion.

**Requirements/Evaluation:** weekly homework/labs, classwork, and exams  
**Prerequisites:** STAT 341  
**Enrollment Limit:** 30  
**Enrollment Preferences:** senior Statistics majors  
**Expected Class Size:** 15  
**Grading:** yes pass/fail option, yes fifth course option  
**Distributions:** (D3) (QFR)  
**Quantitative/Formal Reasoning Notes:** This is a statistics class with a focus on mathematical skills and translating real world phenomena into mathematical descriptions.

Spring 2025  
LEC Section: 01  TF 2:35 pm - 3:50 pm  Elizabeth M. Upton  

**STAT 344 (S) Statistical Design of Experiments (QFR)**  
When you hear the word experiment you might be picturing white lab coats and pipettes, but businesses, especially e-commerce, are constantly experimenting as well. How do you get the most out of both scientific and business investigations? By doing the right experiment in the first place. We'll explore the techniques used to plan experiments that are both efficient and statistically sound. We'll learn how to analyze the data that come from these experiments and the conclusions we can draw from that analysis. We'll look at both classical tools like fractional factorial designs as well as optimal design, and see how these two frameworks differ in their philosophy and in what they can do. Throughout the course, we'll make extensive use of both R and JMP software to work with real-world data.  

**Requirements/Evaluation:** Homework problems--both individual and in groups, midterm, final, and projects (on topics that interest you!).  
**Prerequisites:** STAT 161 or 201 or 202, or equivalent, and Math 140 or equivalent, or permission of instructor  
**Enrollment Limit:** 20  
**Enrollment Preferences:** Statistics majors, seniors, juniors, sophomores, first years  
**Expected Class Size:** 15  
**Grading:** yes pass/fail option, yes fifth course option  
**Distributions:** (D3) (QFR)  
**Quantitative/Formal Reasoning Notes:** This course uses mathematical tools and computing programs to design experiments, analyze their results, and assess their effectiveness. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

Spring 2025  
LEC Section: 01  MWF 10:00 am - 10:50 am  Richard D. De Veaux  

**STAT 346 (F)(S) Regression Theory and Applications (QFR)**  
This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the most widely used method for analyzing and predicting a response data and for understand the relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.  

**Requirements/Evaluation:** Weekly homework, quizzes, theory and data analysis exams, and final course project.  
**Prerequisites:** MATH/STAT 341, MATH 250, and at least one of STAT 201 or 202. Or permission of the instructor.  
**Enrollment Limit:** 30  
**Enrollment Preferences:** Statistics Majors
Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course prepares students in the use of quantitative methods for the modeling, prediction and understanding of scientific phenomena.

Fall 2024
LEC Section: 01  TR 9:55 am - 11:10 am  Xizhen Cai

Spring 2025
LEC Section: 01  TR 9:55 am - 11:10 am  Xizhen Cai

STAT 355 (F) Multivariate Statistical Analysis (QFR)
To better understand complex processes, we study how variables are related to one another and how they work in combination. In addition, we want to make inferences about more than one variable at a time. Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such datasets with more than multiple variables. Topics covered will include data visualization techniques for data sets with more variables, clustering algorithms, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, performing dimension reduction, and making inferences.

Requirements/Evaluation: Homework, projects, quizzes, and exams.
Prerequisites: MATH 250, and STAT 346 or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Juniors/seniors
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: It is an advanced statistics class with prerequisites that are QFR courses

Fall 2024
LEC Section: 01  TF 1:10 pm - 2:25 pm  Xizhen Cai

STAT 360 (F) Statistical Inference (QFR)
How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

Requirements/Evaluation: Homework, Quizzes, Exams
Prerequisites: MATH 250, STAT 201 or 202, STAT 341
Enrollment Limit: 15
Enrollment Preferences: Statistics majors
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: A rigorous mathematical course laying the foundation for reasoning with data

Fall 2024
LEC Section: 01  MWF 10:00 am - 10:50 am  Richard D. De Veaux
In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today’s data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Class Format: Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Requirements/Evaluation: class participation, weekly homework, exams and an end-of-term project

Prerequisites: MATH/STAT 341 and STAT 346, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Statistics majors, juniors and seniors. Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is an advanced statistics class involving theory and application of statistical methods to data.

Spring 2025
LEC Section: 01  MR 2:35 pm - 3:50 pm  Anna C. Neufeld

This course will explore generalized linear models (GLMs)--the extension of linear models, discussed in Stat346, to response variables that have specific non-normal distributions, such as counts and proportions. We will consider the general structure and theory of GLMs and see their use in a range of applications. As time permits, we will also examine extensions of these models for clustered data such as mixed effects models and generalized estimating equations.

Requirements/Evaluation: Weekly homework consisting of theoretical exercises and data analyses carried out in R. Short frequent quizzes and one midterm (with an in-class and take-home component). Final project and final exam.

Prerequisites: STAT 346, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Seniors and Statistics majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is an intensive statistics course, involving theoretical and mathematical reasoning as well as the application of mathematical ideas to data using software.

Fall 2024
LEC Section: 01  TF 2:35 pm - 3:50 pm  Elizabeth M. Upton

This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for
social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

**Class Format:** This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.

**Requirements/Evaluation:** Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

**Prerequisites:** None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

**Enrollment Limit:** 18

**Enrollment Preferences:** Students without prior college-level courses in statistics and programming.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:**  (D2)  (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

**Difference, Power, and Equity Notes:** This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGBTQ+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

**Quantitative/Formal Reasoning Notes:** This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

- Saadia Yacoob, Assistant Professor of Religion; on leave Spring 2024

MAJOR
The major in Religion is designed to perform two related functions: to expose the student to the methods and issues involved in the study of religion as a phenomenon of psychological, sociological, and cultural/historical dimensions; and to confront students with the beliefs, practices, and values of specific religions through a study of particular religious traditions. It is a program that affords each student an opportunity to fashion their own sequence of study within a prescribed basic pattern constructed to ensure both coherence and variety. Beginning with the class of 2016, the major in Religion will consist of at least nine semester courses as follows:

**Required Sequence Courses**

- REL 200 Theories and Methods in the Study of Religion
- One 300-level seminar or tutorial
- REL 401 Senior seminar

**Elective Courses**

Six electives at the 100-, 200-, or 300-level (with a maximum of one 100-level class to count towards major).

In addition, each major will select a specialization route in the major in conversation with and with the approval of the department. The specialization will consist of at least four courses. There are two ways to meet this requirement. A major could fulfill the requirement by concentration in one of the College’s coordinate programs or by designating four specialization courses that can be supported by the resources of the Religion department faculty and the College. In other words, these four courses might be from among the six electives and one 300-level seminar or tutorial or might include additional coursework from other programs and departments (whether cross-listed or not).

The major will culminate in a year-long senior project. The first semester will remain a seminar (REL 401) on a topic in the study of religion set by the faculty member in consultation with incoming seniors. The spring semester will consist of participation in a research colloquium (not a course taken for credit). In this colloquium, each senior major will present their individual research projects, begun in the senior seminar, drawing on their specializations and advised by members of the faculty.

For those who wish to go beyond the formally-listed courses into a more intensive study of a particular religious tradition, methodological trend, or religious phenomenon (e.g., ritual, symbol-formation, mysticism, theology, etc.), there is the opportunity to undertake independent study or, with the
The value of the major in Religion derives from its fostering of a critical appreciation of the complex role religion plays in every society, even those that consider themselves non-religious. The major makes one sensitive to the role religion plays in shaping the terms of cultural discourse, of social attitudes and behavior, and of moral reflection. But it also discloses the ways in which religion and its social effects represent the experience of individual persons and communities. In doing these things, the major further provides one with interdisciplinary analytical tools and cross-cultural experience and opens up new avenues for dealing with both the history of a society and culture and the relationships between different societies and cultures. What one learns as a Religion major is therefore remarkably applicable to a wide range of other fields of study or professions.

Students declaring Religion as a major will identify an area of specialization and link it to their senior seminar final paper and be expected to present it in a spring colloquium during their senior year.

**THE DEGREE WITH HONORS IN RELIGION**

The degree with honors in Religion requires the above-mentioned nine courses and the preparation of a thesis of 75+ pages with a grade of B+ or better. A thesis may combine revised work done in other courses with new material prepared while enrolled either in Religion 493-W31 or Religion W31-494. Up to two-thirds of the work in the thesis may be such revised work, but at least one-third must represent new work. The thesis must constitute a coherent whole either by its organizing theme or by a focus on a particular religious tradition. Candidates will also be expected to present the results of their thesis orally in a public presentation. Students who wish to be candidates for honors in Religion will submit proposals and at least one paper that may be included in the thesis to the department in the spring of their junior year. Students must normally have at least a 3.5 GPA in Religion to be considered for the honors program.

The chair will serve as advisor to non-majors.

**STUDY ABROAD**

The Williams College Religion Department encourages potential majors to study abroad in order to enhance their education and gain international perspectives on religious studies. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. Many of our majors study in the Williams College Oxford Program, but our majors also regularly pursue a semester or year-long study in other programs.

**FAQ**

- **Can your department or program typically pre-approve courses for major/concentration credit?**
  - Yes, in many cases, though students should be sure to contact the department.

- **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**
  - Course title and description. Sometimes a course title is sufficient, but for many courses we also need to see a description of some sort because the title is unclear.

- **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**
  - No.

- **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**
  - No.

- **Are there specific major requirements that cannot be fulfilled while on study away?**
  - Yes. 3 courses: Religion 200, one 300-level Religion seminar or tutorial, and Religion 401 Senior Seminar.

- **Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**
  - Yes. Make sure that they have or will be able to take REL 200, because it is offered only once a year.

  **Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:**
  - None to date.
As Henry David Thoreau put it, "The mass of men lead lives of quiet desperation," attempting to fill the void of their existence with sex, money, ephemeral amusements, and the steady accumulation of unnecessary possessions - basically killing time until the day they die. For some people this might seem to be enough, but this course is for those of us who lie awake at night wondering things like: "Why are we here?" "What does it mean to live a good life?" "How can I be happy?" "What is our duty to others?" "What really matters?" and the biggest question of them all: "What is the Meaning of Life?" This course will trace the diverse responses to these important questions offered by philosophers and religious thinkers in different cultures and time periods. We will read their texts critically and discuss how they can be directly relevant to our lives. Students will also be introduced to abstract theorizing in Religious Studies about how different cultures and traditions have historically come to live meaningfully. Authors and texts to be read may include Aristotle, Hannah Arendt, Marcus Aurelius, the Bhagavad Gita, H. H. Dalai Lama, the Dhammapada, Viktor Frankl, Søren Kierkegaard, Martin Luther King Jr, Shantideva, Peter Singer, Leo Tolstoy, Ibn Tufayl, Max Weber, and Slavoj Zizek.

Requirements/Evaluation: attendance and participation, journal and short writing assignments, midterm and final exams

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: potential religion majors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

REL 105  (S)  Introduction to European Art Before 1700

Cross-listings: ARTH 101

Secondary Cross-listing

A team-taught introduction to the art and architecture of Europe from the ancient Mediterranean to Baroque Italy. This course celebrates the glory of works of art as physical objects, to be viewed and contemplated, to be sure, but also often to be worshiped, worn, touched (even licked), held, exhibited, bought and sold, passed through or around, and lived in. To help students begin to appreciate how these works of art might have been understood by those who originally made and used them, the course sets its objects of study within a number of revealing historical contexts, from the social and the political to the philosophical and the art historical. To give students time with original works of art, our discussion-centered conferences use the wealth of art resources in Williamstown: the Clark Art Institute, the buildings and sculpture of the Williams College Campus, and the Williams College Museum of Art.

Class Format: This course has 2 components: lectures and conferences. The lectures will be three times weekly, the conferences once per week. Both lectures and conferences will be held in person.

Requirements/Evaluation: Three shorter essays (one of which may be in the form of a final exam, either take-home or in-person), several quizzes, and engaged participation in conference sections

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: Preference will be based on a short questionnaire, which students will be asked to complete if the course is over-enrolled.

Expected Class Size: 60

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 107  (F)  Islamophobia: A Global Perspective  (DPE)

Cross-listings:  GBST 105

Secondary Cross-listing

This course's goal is to show how the racialization of Islam and Muslims has been constitutive to the latter's imagination. It looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. The course goes back to the founding moments of an imagined white-Christian Europe and how the racialization of Muslim bodies was central to this project and how anti-Muslim racism continues to be relevant in our world today. The course will give a global perspective on Islamophobia and how it is structuring and used by political actors in various territories. The course will show how Muslims were constructed as subjects in history, politics, and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. The course is based on the literature of multidisciplinary studies by leading scholars in the field, drawing from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation:  Class participation and two papers, in these proportions: 10% attendance; 20% participation; 35% first paper (7 pages); 35% second paper (7 pages). No final exam.

Prerequisites:  no

Enrollment Limit:  35

Enrollment Preferences:  freshmen and concentrations

Expected Class Size:  30

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 105(D2) REL 107(D2)

Difference, Power, and Equity Notes:  The course critically examines difference, power, and equity. Thematically, it looks at the racialization of Islam and the intersection of race, religion, class, and gender in the construction of the 'Muslim problem' from a historical as well as a global contemporary perspective. On one side, the course content explores forms of difference and power. On the other side, the course attempts to help students to engage in alternative forms of action to address these inequalities.

Not offered current academic year

REL 109    Apocalypse  (WS)

An end of days. A utopia to come. A great cosmic reversal of fortune. A revelation of truth that leads to radical transformation. Each of these themes and many more fall under the genre of imagination that we associate with the apocalypse. In order to understand the persistence and prevalence of apocalyptic imaginations, we will move back and forth through time. On the one hand, we will read the Book of Revelation in relationship to a selection of ancient Zoroastrian, Jewish, Greek, Christian, and Muslim texts identified with apocalyptic traditions. On the other hand, we will read these texts in relationship to and alongside select literature and movements of apocalypse in the U.S.A. We will pay particular attention to how apocalyptic imaginations reflect upon and interact with social structures of class, colonization, ethnicity, gender, race, and sexuality.
REL 110  (S)  Religion in Everyday Life  (WS)

When studying religions, people generally turn to studying scriptures, the life and teachings of the religion’s founder, and the fundamental doctrines of the religion. What this approach does not allow us to understand, however, is the way that such religious traditions actually manifest themselves in the world. This course introduces students to an alternative approach to studying religion, by exploring the way these religions are lived and experienced by individuals and communities in a variety of contexts. We will see how religion intersects with people's lived experiences of gender, race, class, sexuality, and broader socio-cultural and political contexts. We will explore this approach to religion through an engagement with ethnography (the qualitative research method in the social-sciences generally described as "participant-observation"). Students will not only learn about the theory and practice of this methodology, but will also conduct their own ethnographic research project over the course of the semester. This will involve: designing a feasible project and research question, selecting local research sites and subjects, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Class Format: Semester-long community-based field research. Regular in-class peer-review exercises.

Requirements/Evaluation: regular reading responses, semester-long research project with frequent small assignments building up to the final product (class presentation and approximately 10-page paper)

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will learn a specific mode of qualitative/ethnographic writing through a semester-long field-based project. This involves many scaffolded assignments of field-based research and writing, for which they receive very regular feedback from the instructor, as well as extensive peer-review exercises. There will be a number of readings on writing style and technique, as well as class discussion and workshop activities. The final essay will itself be developed in multiple steps.

Attributes: EXPE Experiential Education Courses

REL 111  (F)  Oracle, Prophecy, Possession: Commun(icate)ing with Divine Powers

Cross-listings: CLAS 111

Primary Cross-listing

This course explores a set of practices and contexts in which humans have sought to interact with divine powers. We shall ask how humans interact with divine powers through the techniques of spirit possession, prophecy, and consulting with oracles. Importantly, we shall also ask how these interactions reveal and produce what it is to be human, with attention to differences among humans and the relation between humans and nonhuman forces (divine powers but also natural forces and other animals). The bulk of the course will focus on ancient examples from cultural contexts near the Mediterranean Sea, but we shall also consider other geographical regions and some modern practices and contexts. Ideal for students interested in
ancient religions but also those interested in questions of power, agency, and how the ways that we imagine what it means to be human involve questions about nonhuman forces (whether imagined in religious, scientific, philosophical, or other terms).

**Class Format:** the class will include 1 or more field trips

**Requirements/Evaluation:** weekly GLOW posts; 2 3-page papers; 1 collaborative project; 1 final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** first-year students, then second-year students, then majors in religion or classics

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 112  (F)  Sex, Gender, Religion

**Cross-listings:** WGSS 112

**Primary Cross-listing**

The relationship between sex, gender, and religion is one that is hotly debated in our current political context. Many contemporary issues such as abortion, sexual identity, transgender rights are all informed by religious traditions. While religion is most often critiqued for its misogyny and homophobia, it also opens up unexpected possibilities for gender and sexual diversity. This course will consider both these paradoxes and contradictions in religious traditions and their engagement with gender and sexuality. The course will consider how religious traditions have shaped our current discourses on sexual and gender diversity, how religious tradition understand and interact with modern constructions of sexual and gender identity, and how religious queer communities imagine queer possibilities in conversation with their religious traditions. In exploring these topics, the course will cover global religious traditions both historically and in the contemporary.

**Requirements/Evaluation:** weekly responses, midterm essay, final project.

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first years

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 115  (F)  Latina Feminist Spiritualities  (DPE)  (WS)

**Cross-listings:** WGSS 115 / LATS 115

**Secondary Cross-listing**

Self-proclaimed feminist activists, who hail from a variety of ethnic Latina/o/x/e (Latine) backgrounds, have often appealed to "ancestral" and "spiritual traditions" as integral to their activism and commitments. Some Latine feminists turned to "spiritual" traditions including brujeria/witchcraft; curanderismo and Indigenous healing traditions; Santería/Lukumí and other AfroDiasporic traditions; astrology; home altars; various "mystical" traditions such as Kabbalah and Sufism, as well as Christian mystics like Teresa of Avila or Sor Juana Inés de la Cruz. Others have turned to the appropriation of "Eastern" traditions such as yoga, Tibetan Buddhism, and Zen Buddhism. This course engages students in an intensive introduction to some of the varieties of Latine feminist thought and contexts, including how activists, writers, and artists think about women, gender, sexuality, race,
class, colonialism, the earth, healing, and a better world. How do these feminists of different Latine backgrounds and contexts imagine a better world? How and why do they appeal to spiritual traditions as a source of wisdom, healing, and lived practice for a better world? In this course, we seek to understand both particular Latine feminist spiritual practices on their own terms, as well as why such writers and activists appeal to "the spiritual" in Latine contexts. We will also consider how they frame notions of "the spiritual" in relationship to notions of "the religious" and "the secular."

**Requirements/Evaluation:** Grading is based on 5-6 page papers written on alternating weeks and brief 1-2 page response papers shared on alternating weeks as well as participation and two paper revisions.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Latina/o Studies concentrators, religion majors, first-year students interested in Latina/o Studies and/or religion

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**Writing Skills Notes:** Grading is based on alternating weeks writing a lead paper and other weeks writing a brief response paper. This course will require students to write regularly and revise two of their lead papers for grades.

**Difference, Power, and Equity Notes:** This course examines how Latine feminists have responded to a variety of differential power inequities, especially in terms of gender, sexuality, race, ethnicity, language, and class. It also considers the ways they have imagined better and more equitable worlds, and with what consequences they have done so.

REL 118 (F) Emerson's American Religion and Ethics

Whether it is cause for veneration or blame, the writings of Ralph Waldo Emerson [1803-1882] have significantly shaped American values, ideals, and attitudes. Emerson has inspired rebels against tradition, revelers in nature, and explorers of the soul. But his writing has also been derided as ethereal, individualistic, and high-minded. This course is an immersion in the essays and poetry of Ralph Waldo Emerson. While we will nod occasionally toward Emerson's historical context, our task will not be to historicize him. We will respond directly to Emerson as humanistic scholars and as human beings who are addressed by his writing. We will investigate critically how he makes arguments, how he uses language, the concepts he develops, his sense of what has gravity and what is frivolous, the anxieties and desires that lie beneath the surface of his texts, what he admires, what he disdains. But we will also respond to his ideas as living invitations to clarify our own thinking. We will critique, but also champion or build with his ideas of genius, the over-soul, the self, fate, reason, sincerity, character, beauty, America, religion, experience, creativity, and more. Students will be asked to develop their own thinking about these ideas and show how their thinking can work with or against Emerson's. This course is an opportunity to cultivate a relationship of intellectual intimacy with a profound and expansive human consciousness, reflect critically on yourself and on Emerson in this relationship, and exercise key capacities necessary for the humanistic study of religion and ethics: analytical reasoning, critical introspection, interpretative judgment, and creative expression.

**Requirements/Evaluation:** Class participation, regular in-class writing assignments, midterm exam, final exam

**Prerequisites:** None

**Enrollment Limit:** 18

**Enrollment Preferences:** First-year students have top priority, then sophomores

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

REL 121 (S) Getting Spiritual With Rumi: From Sufism to Self-Help
Although he lived about 800 years ago, Rumi is often described as the "best-selling poet in the United States." His poetry and sayings are shared endlessly on the internet and social media, celebrating above all his inspiring words on love and beauty. Rumi's spiritual wisdom is seen as transcending the confines of organized religion, with its divisive dogmas and restrictive rules. What is much less well-known is that Rumi was a devout Muslim mystic, a practitioner of the Islamic spiritual tradition of Sufism. This course will take the poetry and teachings of Rumi as a lens to reflect on spirituality, both in a practical and introspective way, as well as a matter of historical and cultural analysis. We will read two types of translations of Rumi: those that adapt Rumi's work for a modern Western audience, and those that are more direct translations of Rumi's work in its original Islamic idiom. We will also do some broader readings to contextualize the medieval Sufi background that Rumi functioned within, as well as the contemporary scene of popular spirituality and self-help in the US. Through these comparative readings, we will consider the following: What does spirituality and self-cultivation mean to you personally? How does the experience and significance of spirituality change, from the context of traditional Sufism, to 21st century self-help and popular spirituality? What does this tell us about broader trends and conditions in our society? What do these intersecting traditions have to offer us in our world today?

Class Format: This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, Th. 4:45-8:30 pm

Requirements/Evaluation: Personal journaling; Short response papers; Creative final project

Prerequisites: None

Enrollment Limit: 9

Enrollment Preferences: Demonstrated interest in problems of mass incarceration, criminal justice, etc. As well as interest in spirituality.

Expected Class Size: 9

Grading: yes pass/fail option, yes fifth course option

REL 126 (F) Religion, Politics, and Society: A Global Perspective (DPE)

Cross-listings: GBST 101

Secondary Cross-listing

In spite of predictions that religion would wither away in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to making sense of the relation between religion, politics, and society, discussing especially the concept of the 'secular' in Western thought and decolonial critique thereof. The second part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi'a), and Judaism. The third part focuses on religion in the USA. Here, we will discuss the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their political mobilization, religious minorities in the United States, and many other aspects of religion in the US society. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the normative dimensions of questions raised by the interaction of these two forces.

Requirements/Evaluation: Class participation and three papers, in these proportions: 10% attendance; 20% participation; 20% first paper (7 pages); 30% second paper (8-10 pages); and 20% third paper (7 pages). No final exam.

Prerequisites: none

REL 149 (S) The Sacred in South Asia

Cross-listings: ASIA 242 / ANTH 249

Secondary Cross-listing

Is religious identity necessarily singular and unambiguous? The jinn - Islamic spirits born of fire - are sought out for their healing and other powers not only by Muslims in India, but by Hindus, Christians and Sikhs, as well. In parts of Bengal statues of the Hindu goddess Durga are traditionally sculpted by Muslim artisans. Buddhist pilgrimage sites in Sri Lanka contain tombs of Muslim Sufi saints and shrines of Hindu deities. South Asia - where a fifth of humanity lives - provides some of the most striking examples of pluralism and religiously composite culture in our contemporary world. Yet at the same time, strident religious majoritarianism has been a defining feature of the politics of India, Pakistan and Sri Lanka for decades, and haunts Nepal and Bangladesh as well. Are these two modes of religious being - pluralistic and composite on the one hand, singular and majoritarian on the other - reflective of two different conceptions of selfhood? What if we turn from questions of community and identity to questions of unseen power and the sacred? This course is an exploration of lived religion in South Asia. It is simultaneously a study of popular Hinduism, Buddhism and Islam and an introduction to the anthropology of religion. Centered on in-depth studies of popular sites of ‘syncretic’ ritual practice (shared across religious difference) as well as studies of mass mobilizations that seek to align the religious community with the nation, we approach from multiple angles what the sacred might mean in modernity.

Requirements/Evaluation: weekly (1 page) posts on readings, two short (5 page) papers, and one (12-14 page) final research paper.

Prerequisites: Interest in the topic!

Enrollment Limit: 20

Enrollment Preferences: Students in all fields of study are most welcome; if overenrolled, priority will be given to majors in Anthropology, Sociology, Religion and Asian Studies.

REL 166 (F) Being Muslim, Being American: American Muslim Literature in the 21st century (DPE)

Cross-listings: AMST 166 / COMP 166 / ENGL 268

Primary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims’ own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims’ own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

Requirements/Evaluation: regular reading responses, short midterm essays, and final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First-year students and sophomores
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

AMST 166(D2) COMP 166(D1) ENGL 268(D1) REL 166(D2)

Difference, Power, and Equity Notes: This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.

Not offered current academic year

REL 200 (S) What is Religion? Theories and Methods in the Study of Religion
To explore the meaning of religion, this course will introduce the debates around which the discipline of religious studies has been constituted. At stake are questions such as: How does one go about studying religion? Is "religion" a cultural universal? What is religion's relationship to the "European Enlightenment"? to race? to science? to society? to secularism? to colonialism? to politics? to violence? to sex? to freedom? Has religion changed fundamentally in modernity? And if so, what is its future?

Requirements/Evaluation: class participation, weekly short GLOW post writing assignments, a 5-page midterm paper, and a 10-page final paper
Prerequisites: none, although a previous course on religion is recommended
Enrollment Limit: 15
Enrollment Preferences: Religion majors and prospective majors
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option

REL 201 (F) The Hebrew Bible
Cross-listings: JWST 201 / COMP 201

Primary Cross-listing
The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

Requirements/Evaluation: Class participation, short written assignments, midterm and final exams.
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: If the course is overenrolled, preference will be given to Jewish Studies concentrators and Religion and Comparative Literature majors.
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
REL 203 (F) Judaism: Before The Law
Primary Cross-listing
This course introduces the academic study of Judaism through a humanistic exploration of "the Law" as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between "Oral Law" and "Written Law," medieval philosophical justifications for the Law, modern interpretations of the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twentieth-century Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts, Franz Kafka's The Trial with his parable "Before The Law," ethnographic accounts of contemporary Jewish observance, and much else. All readings will be in translation.

Requirements/Evaluation: class participation, three short papers, and a final longer paper

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Jewish Studies concentrators, Religion majors and students who are considering these options

REL 204 (S) What is Islamic Art?  (DPE) (WS)
Secondary Cross-listing
Through a deep engagement with primary sources--visual, performative and textual--this tutorial introduces students to global cultures that have participated in the production of Islamic art and culture through the centuries. Through a diverse set of readings, we will discuss how Islamic art is viewed today. How did, for instance, Colonialism and Orientalism from the 18th to the 20th centuries create an entrenched narrative for the study of the field, that continues to hold sway to this day? How have Muslim cultures defined their own artistic production? In particular, how can specific artworks, such as figural painting or palace architecture, be understood as "Islamic"? What are some key scholarly debates around the term "Islamic Art"? The tutorial is specifically designed keeping in mind the period of soul-searching the field is currently going through, even to the point of questioning the very term "Islamic art" and its epistemological parameters. By familiarizing students to an important discipline in art history, the aim of the tutorial is to provide alternate methodologies as well as epistemologies that run parallel to more mainstream or familiar avenues of study.

Requirements/Evaluation: focused bi-monthly writing assignments, 5-7 pages in length, and bi-monthly peer response papers, 2 pages in length.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors, Religion majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 206(D1) REL 204(D2)

Writing Skills Notes: This tutorial helps students develop writing skills in terms of grammar, structure, and organization. It is designed to teach students how to make clear, well-articulated arguments. Students will receive extensive feedback every other week on their writing assignments from the instructor and their peers. There will also be a comprehensive mid-semester review from the instructor.

Difference, Power, and Equity Notes: In addition to introducing students to an important field of art history, the tutorial analyzes how Islamic art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. The course will encourage students to challenge longstanding biases and assumptions when studying these artworks.

Not offered current academic year

REL 206  (S)  The Book of Job and Joban Literature

Cross-listings: COMP 206 / JWST 206

Primary Cross-listing
The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's The Trial, Archibald MacLeish's J.B., Robert Frost's "Masque of Reason," Carl Jung's Answer to Job, and William Blake's Illustrations to the Book of Job. All readings are in translation.

Requirements/Evaluation: Evaluation will be based on class participation, short written assignments, and midterm and final exams.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: If the course is overenrolled, preference will be given to students who have already taken a course in biblical literature.

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

REL 210  (F)  Distant Encounters: East Meets West in the Art of the European Middle Ages  (WS)

Cross-listings: ARTH 212 / ARAB 212

Secondary Cross-listing
In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in what they called the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey), the place of Christ's life, death, and believed resurrection. Large numbers of pilgrims even made the long journey to the Holy Land, and especially to Jerusalem, to visit a range of sacred sites related to Christ and his saints. When these sites became less accessible with the spread of Islam in the seventh century -- and even before this time -- Europeans sought to recreate many of them at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of
the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Through all of these centuries, moreover, the Christian, Greek-speaking empire of Byzantium, focused on its great capital of Constantinople (present-day Istanbul), interacted in myriad ways, both friendly and hostile, with the Latin-speaking polities of Western Europe, focused at least symbolically on their ancient capital of Rome. Together, by way of open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation: participation in discussion; five 4-5-page papers; five 1-2-page papers; and one 6-8-page final paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students, but open to all

REL 211 (F) Envisioning the Sacred: Representation and Religion in Christian and Muslim Cultures (WS)

Cross-listings: ASIA 212 / ARTH 215

Secondary Cross-listing

How did medieval Christians and pre-modern Muslims imagine the sacred and how did they give what they imagined pictorial form? How were these pictures used, both in public and in private life, and why? How did the art of these unique religious traditions forge connections between the visible and invisible worlds? Paying particular attention to the function and experience of works of art within Christian and Islamic cultures, this seminar examines the evolution of devotional visual expression, while also exploring the problems sacred images generated in these distinct yet often overlapping traditions. Through readings and class discussion, the course will investigate, among other topics: the varied attitudes toward the representability of God in Judaism, Islam, and Christianity; the impact of earlier image traditions on the religious art of medieval Christians and pre-modern Muslims; the cult of the devotional image, concerns over idolatry, and the destruction of images; ideas about spiritual versus physical vision and their influence on the making and viewing of pictures; the relationship of sacred images to relics and to various aspects of organized ritual; and the possible roles played by pictures of the sacred in silencing or giving voice to dissent.

Requirements/Evaluation: Participation in class discussion; oral presentation; five 3-4-page papers, and a final 6-page paper

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Sophomores then juniors, but open to all

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: This seminar will be team taught, by Murad Mumtaz and Peter Low

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 212(D1) ARTH 215(D1) REL 211(D2)

Writing Skills Notes: In this 200-level seminar, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 3-4-page papers they will submit, with suggestions for improvement.

REL 215  (F)  Religion in Latinx Literature, Art & Film  
**Cross-listings:** LATS 219

**Secondary Cross-listing**

**LATS 219--Religion in Latinx Literature, Art & Film** This course will examine how a selective range of US Latinx writers, artists, and filmmakers--particularly in fiction, memoir, visual arts and films by and about Latinidad--depict, describe, and discuss religious themes, broadly considered. Latinx-authored novels and memoirs, artwork by Latina/o/x visual artists, and films depicting Latinx life through the lens of Latinx filmmakers will be read, viewed, and studied to facilitate discussion about what it means to be Latina/o/x and religious. How do fictional, autobiographical and artistic depictions of Latinx people, communities, and their religiosity/spiritualities promote or deter understanding of Latinidad in the U.S.A.?

**Requirements/Evaluation:** In this course, students will read and write short essays about novels and/or memoirs (4-5 pages), critically analyze film and artwork in short papers (3-4 pages), and write a research paper (8-10 pages) that analyzes the nexus of Latinx religion and art, whether fiction, film, memoir, or the visual arts. Attendance, participation, Glow discussion forums, and written assignments will all constitute assessment tools for this course.

**Prerequisites:** No prerequisites.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students with at least one prior LATS or Religion course will be given preference if an enrollment overload. Also sophomores, juniors, and seniors will be given preference over first year students.

**Expected Class Size:** 15-20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

REL 219  (F)  Realizing Utopias  
**Cross-listings:** STS 219

**Primary Cross-listing**

**Our world can be better.** We are faced with unfolding global catastrophes, such as the pandemic, anthropogenic climate change, economic crises, racialized injustice, and political polarization, and many people seem to have lost their capacity to imagine better futures. Perhaps that is why we as a society have no problem picturing the end of the world--fictional dystopias and apocalypses are abundant while (e)utopias are scarce. This a problem because, as numerous political theorists have observed, it is hard to organize meaningful change around cynicism and nihilism. But our dystopian present makes it even more important to imagine and even realize utopias. This course will help us do so. Our core collective goal will be to explore pragmatic realizations of radical hope. Complementing urgent efforts to resist or mitigate intense injustice in the present, we will aspire to articulate bold visions for emancipatory communities of the future. Rather than primarily focusing on the limitations of existing institutions, this seminar will treat these as problems to be solved rather than as reasons to accept the status quo, and we will embrace affirmative projects of designing the frameworks for better worlds. But we also don't want to blind ourselves to the challenges of being visionary. In brief, we will engage in serious explorations of the underlying principles and rationales for various emancipatory political communities while also pragmatically assessing their potential difficulties. We will spend the first part of the course reading political theory (on issues such as resource allocation, collective decision making, and social justice) alongside various artistic and political manifestos. We will spend a week reading utopian novels (including as possibilities socialist, anarchist, techno-futurist, ecotopias, Afrotuturist, queer utopias, and many more). But the majority of the course will be project-based. Students will form small teams to engage in radical thought experiments and then construct and refine their ideas of better possible societies/political communities. These teams will produce 1) policy papers to address how their utopian societies would deal with real world issues, and 2) artifacts (such as art, manifestos, pamphlets, short stories, videos, or the like) that might appear in the futures they envision, exploring both their ideals and their limits. The semester will culminate in a public exhibition of these works. Thinkers to be considered may include: Marx & Engels, José Esteban Muñoz, Boaventura de Sousa
REL 222 (F) The Jewish Art of Interpretation

Cross-listings: JWST 222

Primary Cross-listing

Turn it and turn it, for everything is in it. This famous rabbinic dictum offers an enigmatic yet comprehensive account of the principles that have defined the Jewish practice of interpretation for over two millennia. The imperative to keep a text, word, image, or concept in constant motion, in order to generate as many meanings and cross-meanings as possible, challenges us to transform the act of interpretation itself into a virtuosic craft or art that can engage the human imagination as diversely and powerfully as the creation of the works being interpreted. At the same time, emphasis on the dynamism between text and interpreter should dispel the notion that only expansive works have expansive meanings. If interpretation itself is an art, then even the shortest text can contain "everything" within it when it participates in that art. This course will engage students in a radical experiment in the art of interpretation. Through a deep encounter with a selection of miniature texts, ranging from ancient rabbinic proverbs and medieval fables to the modern parables and fragments of Franz Kafka, as well as folklore and jokelore from every period in Jewish history up to the present, we will develop an interpretive practice that combines analytic, critical, and creative principles in both written and oral contexts. The goal throughout is to explore interactively how the making of meaning is an integral part of the human experience.

Requirements/Evaluation: class participation, regular short written and oral assignments, and a final project

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: If the class is overenrolled, preference will be given to Jewish Studies concentrators and Religion majors.

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

REL 224 (S) U.S. Latinx Religions

Cross-listings: AMST 224 / LATS 224

Secondary Cross-listing

In this course, we will engage aspects of Latina/o/x/e religious beliefs, experiences, practices, and expressions in the United States of America. Given the diversity of Latinx communities and religious lives in the U.S.A., we consider select contexts that help us understand the challenges of studying and defining the "religious" and its hybridity in Latinx contexts. We will survey certain selected religious traditions and practices in Latinidad -- such as popular devotions to La Virgen de Guadalupe, healing traditions and curanderismo, home altar traditions, Latinx Pentecostalism, crypto-Judaism, Latinx Muslims, and African-rooted spiritualities such as Santería. In addition, we will study Latinx approaches to traditional US religious expressions of Roman Catholicism and Protestantism. By focusing on particular moments of religious expression as elucidated in specific historiographies,
ethnographies, art, literature, film, we will seek to garner a greater understanding of how Latinx communities express and practice their religious traditions and spiritualities.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, discussion forum posts, a 3-4 short essay on the nature of Latinx spirituality; a 5-page essay on a religious tradition previously unfamiliar to the student, and an 8-10-page final research paper doing comparative religious study.

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** LATS concentrators and AMST and REL majors

**REL 232 (S) Islam in Africa  (DPE)**

**Cross-listings:** GBST 232 / AFR 232 / ARAB 232 / HIST 202

**Primary Cross-listing**

Islam in Africa is often relegated to the peripheries in the study of Islam, a religion most associated with Arabs and the Middle East. On the flip side, Islam is also portrayed as foreign to African belief systems and institutions. The relationship between Islam and Africa, however, begins with the very advent of Islam when early Arab Muslim communities took refuge in the Abyssinian empire in East Africa. This course explores the history of Islam and Muslim societies on the African continent by focusing on the localized practices of Islam while also connecting it to Islam as a global phenomenon. The course will begin with a historical focus on the spread of Islam in Africa from East Africa and North Africa in the seventh century all the way to the spread of Islam through Sufi brotherhoods in the eighteenth and nineteenth centuries. The course will also take an anthropological approach, exploring the diverse practices of Islam in African Muslim communities and the social and cultural impact of Islam on African societies. Among the topics the course will cover include African Muslim intellectual traditions, local healing practices, religious festivals, early modern African Muslim abolitionist movements, and the historical interactions between African and Asian Muslim communities in the Indian ocean world.

**Requirements/Evaluation:** Two essays during the semester and final project.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** REL, HIST, ARAB, AFR, GBST majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 232(D2) AFR 232(D2) ARAB 232(D2) REL 232(D2) HIST 202(D2)

**Difference, Power, and Equity Notes:** The course will urge students to consider how scholars construct centers and peripheries through a study of Islam in Africa that is often rendered to the peripheries in the study of Islam. The course will also explore the diversity of African Muslim communities, getting students to think about the diversity of human experiences and interpretations of shared sacred texts.

**REL 237 (F) Islam in the United States: Race, Religion, Politics  (DPE)**
Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of "Black Muslim" movements represented by Malcolm X, to the current "War on Terror" era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States. Throughout the course, we will be engaging with historical and anthropological material, autobiographies, documentaries, films, historical primary-source documents, music, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

Requirements/Evaluation: regular reading responses, 2 midterm essays, final exam
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Majors and concentrators in REL, AFR, and AMST

REL 241  (F)  History of Sexuality

Cross-listings:  HIST 292 / GBST 241 / WGSS 239

Primary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Requirements/Evaluation:  reading responses, two essays, and final research paper
Prerequisites:  none
Enrollment Limit:  15
Enrollment Preferences:  Religion, History, and Women's, Gender and Sexuality Studies majors

REL 242  (S)  Women, Gender, and Sexuality in Islam  (DPE)

Cross-listings:  WGSS 242 / ARAB 242

Primary Cross-listing

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism--the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Requirements/Evaluation:  weekly discussion post, midterm essay, and final paper (6-8 pages)
Prerequisites:  none
Enrollment Limit:  19
Enrollment Preferences:  Religion, Women's, Gender and Sexuality Studies and Arabic majors
**Difference, Power, and Equity Notes:** This course explores the relationship between gender, authority, and civilizational discourse. To that end, the course will explore: 1) how assumptions about gender shaped the legal and Quranic exegetical tradition and Muslim feminist critiques. 2) The construction of the oppressed Muslim woman in justifying military invasion and nationalistic rhetoric. This course will introduce students to critical tools in decolonial feminism and the relationship between gender and power.

**REL 243 (F) Islamic Law: Past and Present**

**Cross-listings:** HIST 302 / ARAB 243 / ASIA 243 / WGSS 243

**Primary Cross-listing**

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

**Requirements/Evaluation:** weekly responses, midterm essay, final essay

**REL 244 (S) Mind and Persons in Indian Thought**

**Cross-listings:** ASIA 244 / PHIL 245

**Primary Cross-listing**

In this course, we follow the Indian philosophical conversation concerning the self and the nature of consciousness, particularly as they are found in its various Yogic traditions. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central questions that have challenged philosophers in both traditions.

**Class Format:** discussion
REL 247 (S) Anti-Muslim Racism: A Global Perspective  
Cross-listings: GBST 243

Secondary Cross-listing
The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Global Studies concentrators and Religion majors
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option

Not offered current academic year

REL 249 (F) Antisemitism  
Cross-listings: JWST 249

Primary Cross-listing
In this course students will investigate intellectual traditions, political movements, and cultural objects that construct Jews, Jewishness, or Judaism as a negative principle. Where is Judaism portrayed as the darkness by contrast to the light? When are Jews depicted as a pernicious force that explains the presence of evil in the world? How is Jewishness used as a critical category to identify what is retrograde, deracinating, or base? We will interpret materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will also explore prominent theoretical approaches to the interpretation of these materials. Is there a continuous phenomenon that connects every assertion of Jewish malevolence for over two thousand years of human history? Or should claims about Jewish malevolence be presumed to have an entirely distinct meaning, origin, and purpose in each historical context? Which particular threats are Jews, Judaism, and Jewishness typically alleged to pose? How does the idea of a Jewish threat fit with ideas about race, gender, ethnicity, religion, class, sexuality, and nationality? This is a course about negative meaning-making. Our primary goal throughout the course is to study how shadows of thought, symbolism, and story are cast. It is a course about how language, images, structures, and institutions are used to constitute an antagonist: villainy, the demonic, the enemy, the conspiratorial cabal, the exploitative interloper, "the Jew." And it is a course about the tragic consequences for real people -- for Jews and for all humanity -- when negative principles and fantasies are not contained by realism, reasonableness, and compassion.

Requirements/Evaluation: Class participation, regular in-class writing assignments, midterm exam, final exam
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Jewish Studies concentrators, Religion majors, and students who have taken JWST 203
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 249(D2) JWST 249(D2)

Difference, Power, and Equity Notes: This course will introduce students to discursive, institutional, and social formations that have organized the stigmatization, domination, and persecution of Jews in various geographic locations for over two thousand years. An understanding of these structures is crucial to understanding contemporary dynamics of difference and power. Students will also consider how constructions of Jewish malevolence intersect with ideas about race, gender, class, religion, ethnicity, and nation.

REL 254  (S) The Theory and Practice of Meditation in the Modern World
This course invites students to examine theoretically and experientially meditation. Throughout the course, we examine meditations belonging to various Buddhist traditions through our own practice. We study some of the manuals where these meditations are taught and connect these practices to some of the more important ideas of the tradition. In studying and practicing meditation, we follow a gradual approach, starting from the most basic practices to more advanced ones. We also connect the practices and ideas we consider with modern scientific approaches, examining practices such as mindfulness therapy and the practice of positive emotions from a psychological perspective. In the process, we re-contextualize Buddhist ideas by connecting them with modern approaches, particularly those inspired by biology, psychology and ecology. Throughout the course, students will keep a daily practice of meditation and record their experiences in a journal so as to be able to come to an informed understanding combining a theoretical grasp of the issues raised by meditation and their own personal appreciation.

Class Format: mixture of lecture, discussion, and practice of meditation
Requirements/Evaluation: full attendance and participation, regular practice of meditation, two middle-length essays, and a meditation journal
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Religion majors, students who have taken REL 288
Expected Class Size: 18
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
REL 255 (F) Buddhism: Ideas and Practices

Cross-listings: ANTH 255 / ASIA 255

Primary Cross-listing

This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: discussion

Requirements/Evaluation: full attendance and active participation; two essays

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: religion majors or future religion majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

REL 258 (F) Buddhism, Social Change, & Reproductive Justice in the Anthropocene  (DPE) (WS)

Cross-listings: WGSS 225 / ANTH 258 / ASIA 258

Secondary Cross-listing

This course considers how three women profoundly shaped the Buddha's life and legacy in terms of social change & reproductive justice. Our central characters are Maya--the Buddha's mother, who died shortly after delivering him; Pajapati--the Buddha's stepmother & aunt who raised him; and Yasodhara--his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha's day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha's day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

Requirements/Evaluation: Attendance, writing weekly essays or written feedback. There are no grades first half of the semester but weekly feedback on writing.

Prerequisites: none, but a course in ANTH or REL is preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, REL, WGSS majors and ASIA concentrators

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Writing Skills Notes: We write every week—either 1500 word lead essays, or written feedback (and oral responses) to the lead essay and weekly text. We have a mid semester 'writing chat' with the instructor where we discuss strengths and weakness of individual student writing.

Difference, Power, and Equity Notes: We explore the three women who left a lasting legacy on the Buddha's teachings and practices in terms of gender egalitarianism, social justice, and reproductive justice. Our historical genealogy explores how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice.

Not offered current academic year

REL 262  (S)  Time and Blackness
Cross-listings: AMST 208 / AFR 208

Secondary Cross-listing

The concept of time has been one of the most examined, yet least explicitly theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory—which involves thinking about time—time itself has rarely been the subject of sustained inquiry. This may be due to its abstractness as an idea, and the level of analysis its conceptualization demands, or because time in the Black experience cannot be understood outside of the meaning of race, which itself is not completely tangible. In this tutorial, "Time and Blackness," we will explore how Black writers across a number of genres—spiritual autobiography, fiction, memoir, literary criticism, and cultural theory—understand time, and create paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in Black writings? How does race shape the ways Black writers conceive the experience of time? And, finally, to what can we attribute the recent surge in explicit, theoretical examinations of "time and blackness"?

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Prerequisites: none

REL 263  (F)  Giving God a Backbeat: Rap Music, Religion & Spirituality
Cross-listings: AFR 221

Secondary Cross-listing

On the surface, religion and rap music may seem as if they have little in common. Yet, like other Black musical traditions such as spirituals and the blues, rap is rooted in African American religious traditions. In this course, we will explore the ways in which rap music intersects with the sacred and secular worlds. Through an examination of black religious traditions, lyrics, music videos, and digital media, we will unearth what Anthony Pinn calls the "spiritual and religious sensibilities" of rap music. Grounded in culture-centered criticism, we will investigate the rhetoric of rap and religion through the theoretical ideas of Black Liberation Theology and hip-hop feminism.

Requirements/Evaluation: students will be evaluated on their class participation, Twitter threads, response papers, quizzes, and a final class group project

Prerequisites: none

Enrollment Limit: 18
Enrollment Preferences: First year, sophomore, and juniors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

REL 268 (S) Where are all the Jews? (DPE) (WS)

Cross-listings: COMP 363 / JWST 268 / ARAB 363

Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews' departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: students interested in critical and comparative literary, religious or historical studies.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 363(D1) REL 268(D2) JWST 268(D2) ARAB 363(D1)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students’ writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

REL 269 (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience (DPE) (WS)

Cross-listings: ASIA 269 / STS 269 / ANTH 269
Primary Cross-listing

This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians, and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness for clinicians, therapists, and educators—all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation practices all semester, while learning to better appreciate our own minds, emotions, and relationships.

Requirements/Evaluation: weekly tutorial papers and discussion
Prerequisites: A prior class or some experience with meditation is recommended
Enrollment Limit: 10
Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 269(D2) STS 269(D2) REL 269(D2) ANTH 269(D2)

Writing Skills Notes: This class will involve weekly tutorial essays or oral responses, intensive written feedback on every essay, and a mid-semester 'writing chat' with the instructor.

Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can address the growing epidemic of anxiety, depression, and other mental health issues we find in the US today. We study mindfulness from an intersectional perspective and relate its benefits to intersecting inequities and intergenerational trauma in the US today.

REL 270 (S) Reading Jesus, Writing Gospels: Christian Origins in Context (WS)

Cross-listings: CLAS 270 / COMP 263

Primary Cross-listing

What were the religious and cultural landscapes in which Christianity emerged? How did inhabitants of the ancient Mediterranean world speak about the concept and significance of religion? How have scholars of early Christianity answered these questions? What are the implications of their reconstructions of early Christian history? The course is divided into four parts. The first part establishes the course's interpretive approach. The second part of this course explores aspects of the formation of Christianity from its origins as a Jewish movement until its legalization. The third part of the course focuses on the earliest literature produced to memorialize Jesus. The final part of the course emphasizes modern interpretations of Jesus and the movement of which he was a part; here we shall be examining how scholars make use of ancient materials to frame their arguments and the modern contexts and legacies of making meaning out of biblical and other ancient materials.

Class Format: lecture/discussion

Requirements/Evaluation: three 3-page papers (with revisions), one 5- to 7-page paper (that builds on one of the earlier 3 page papers), and a final paper (7-10 pages, that draws on some of the earlier writing in addition to new writing)

Prerequisites: none; open to all

Enrollment Limit: 19

Enrollment Preferences: sophomores, especially potential majors in Religion, Classics, and Comparative Literature

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)
REL 270 (D2) CLAS 270 (D1) COMP 263 (D1)

Writing Skills Notes: Students will write a series of short essays, with required revisions, to develop their skills in close reading of ancient texts and interpretive analysis of modern scholarship about Christian origins. In each successive section of the course, writing from the prior unit will inform the subsequent papers.

Not offered current academic year

REL 274 (F) Ritual, Power and Transgression

Cross-listings: ANTH 299

Secondary Cross-listing

The focus of this course is on the role of ritual in harnessing political power. In the first part of the semester, we examine some of the ways in which different cultures manufacture social order and political power through categories of inclusion and exclusion, clean and dirty, proper and improper, and licit and illicit. We will be particularly attuned to the ways in which these categories are performed through and maintained by rituals and how bodies are deployed in ritual spaces as instruments of persuasion and control. We will also look in depth at a variety of ritual forms, including scapegoating and sacrifice, and how they serve as engines of political control and protest, and we will examine the uses of dead bodies and memorials as vehicles for gaining and maintaining political power and the destruction and desecration of bodies and memorials as a form of political protest and dissent. Throughout the semester, we will be relating theoretical texts and historical cases to current political struggles in this country and abroad.

Requirements/Evaluation: class participation, biweekly responses to instructor prompts, two short (500 words) response papers, and one 12-page (2400 words) research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: ANSO and REL majors, open to first-years

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 276 (S) Gnosis, Gnostics, Gnosticism (DPE)

Cross-listings: COMP 258

Primary Cross-listing

Reality is not what it seems. Salvation by knowledge, arch-heresy, an eternal source of mystical insights and experiences, secret esoteric teachings available only to a few. All these and more have been claims made about gnosis, Gnostics, and Gnosticism. This course will introduce you to the key ancient texts and ideas associated with Gnostics in modern forms of esotericism and spiritualities. We shall explore how claims about gnosis offer modes of critiquing and seeking to transform unjust social and political systems.

Class Format: lecture/discussion

Requirements/Evaluation: weekly GLOW posts, 1 textual analysis paper, 1 historiographical analysis paper, and a final paper that entails a revision and expansion of earlier writing for the course.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: students with prior coursework in biblical or other ancient literature or history

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: This course situates “gnosis” as a practical epistemological orientation used both to disrupt and challenge power arrangements deemed unjust and to empower those who are marginalized within dominant power structures. At the same time, the course interrogates “gnostic” epistemological claims as capable of being used to reinstall hierarchical power structures. Attention to power and equity and how difference is produced is at the center of the course.

REL 278  (S) Tantra

Cross-listings: ASIA 278

Primary Cross-listing

Tantra—a term shrouded in mystique and controversy—often finds itself fetishized in the Euro-American imagination, conjuring images of transgressive sex, illicit substances, antinomian violence, and the spiritualization of the erotic, the terrifying, and the sublime. This course aims to demystify Tantra and—by locating it in various political, economic, religious, aesthetic, and philosophical contexts—explore its rich, complex history and practices beyond the sensationalist stereotypes. First and foremost, we also devote significant attention to understanding Tantra’s intricate connection to what is referred to as “Esoteric” Buddhism. Our exploration will also ask, what did Tantra look like in practice? How have tantric traditions related to Hindu, Buddhist, and Occult movements? What philosophical assumptions does Tantra rest on? What ethical issues does it evoke? How has Tantra been connected to transgressive notions of gender and desire? How has Tantra been related to the body? What were its connection to ideals of sovereignty? What has been the relationship between Tantra and magic? By tracing the evolution and adaptation of Tantra and Esoteric Buddhism across different cultures and time periods, this course takes a global historical approach, focusing on three key geographies: South Asia, where Tantra has deep roots and complex entanglements; medieval Japan, where Esoteric Buddhism developed unique forms and practices; and modern international Occult movements, where Tantra has been reimagined and integrated into new spiritual contexts. By critically engaging with primary and secondary sources, and by diving deeply into the philosophical and ethical dimensions of Tantra, this course will challenge students to engage critically with the foundational beliefs and moral dilemmas intrinsic to tantric practices in different cultural and historical contexts. We will scrutinize the philosophical underpinnings that sustain various tantric philosophical systems, including approaches to dualism, the nature of reality and embodiment, the function of language, and the pursuit of enlightenment. Ethical considerations are paramount, as we explore how tantric traditions have navigated the boundaries of societal norms through transgressive practices, raising questions about consent, power dynamics, and the redefinition of purity and impurity. The course will also examine radical tantric notions of gender and desire, challenges to conventional morality, and their potential to subvert established hierarchies and notions of sovereignty. Lastly, we will continuously strive to subvert simplistic ideas of authenticity.

Requirements/Evaluation: Readings, weekly critical responses, 10-12 page research paper.

REL 279  (S) Islam on the Indian Ocean

Cross-listings: ASIA 279 / CAOS 279 / ARAB 279

Primary Cross-listing

While colonial and Eurocentric geographies speak in terms of continental separation, historically the continents of Africa and Asia have been connected to one another through a dual link: Islam and the Indian Ocean. Indian Ocean trade and travel have historically connected East Africa, the
Arabian Peninsula, South Asia, and South East Asia, shaping the lives of people and communities who lived not only along the coasts but also inland. This course focuses on these transregional connections, looking at the Indian ocean as a connective space that binds people and regions together rather than separating them. The course will also examine the role of Islam as a religious, economic, social and political force that brought together Muslim communities throughout the regions along the Indian ocean. In exploring these connections, the course will cover a broad historical period, from the 7th century with the rise of Islam to European colonialism and the emergence of a global economy in the nineteenth century.

REL 281 (F) Religion and Science

Cross-listings: STS 281

Primary Cross-listing

In the last few years the deniers of religion such as Dennett and Dawkins have forcefully argued that recent scientific developments show the degree to which religion is irrelevant to a modern understanding of what it means to be human. Atran and Boyer have made a similar case, arguing that recent progresses in our understanding of human cognition demonstrate that religion is a purely natural phenomenon that has little if any value for human development. Theologians such as Haught and Polkinghorne have rejected these views, arguing that a proper understanding of scientific developments such as evolution and quantum mechanics suggests religiously relevant views of the universe and our place therein. This course considers these competing perspectives while offering critical reflections on the views and categories involved in these controversies. We also examine the works of reflective naturalists such as Bellah and Herrstein, who argue that far from showing the irrelevance of religious ideas and practices, the new mind and life sciences suggest a much more nuanced view according to which religion is both grounded in the natural world and central to the development of human culture. Hence, it cannot be easily discounted as irrelevant to a scientifically informed understanding of what it means to be human.

REL 284 (F) From the Battlefield to the Hermit's Cell: Art and Experience in Norman Europe (WS)

Cross-listings: WGSS 284 / ARTH 218

Secondary Cross-listing

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans--a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries--each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects--an embroidery, a building, and a book--give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.

Requirements/Evaluation: Participation in discussion; five 4-5-page tutorial papers; five 1-2-page response papers.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: First years and sophomores, but open to all.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Writing Skills Notes: In this tutorial, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 5-7-page papers they will submit,
Haunting offers a powerful way to speak about forces that affect us profoundly while remaining invisible or elusive. "What is it that holds sway over us like an unconditional prescription? The distance between us and that which commands our moves—or their opposite, our immobility—approaches us: it is a distance that closes in on you at times, it announces a proximity closer than any intimacy or familiarity you have ever known" (Avital Ronell, Dictations: On Haunted Writing [1986] xvi-xvii). The figure of the ghost has been developed by those seeking to grapple with the ongoing effects of modern slavery, colonialism, state-sponsored terrorism, the holocaust, and personal trauma and loss. Building upon the insights about memory, history, and identity that haunting has been used to address, this course will challenge you to explore the study of religion by way of its "seething absences." We shall ask how the study of religion has endeavored to address loss, trauma, and its persistent effects, what "holds sway" over various approaches to the study of religion, as well as how "religion" constitutes its own ghostly presence, haunting other domains.

Class Format: tutorial; meeting in pairs, each student will either write and present a paper or respond to their partner's paper

Requirements/Evaluation: two 1-page papers (written and presented), five 5-page papers, and five oral critiques (based on written notes) of their partner's paper; students will revise two papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Religion majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Not offered current academic year

This course seeks to understand migration in the current historical, social and political moment, especially on the US-Mexico border. We will explore migration and borders through the lenses of history, politics, and religion, with particular focus on the Christian Bible and its influence, both positively and negatively, in the understanding of recent migration experiences on the USA-Mexico border. For example, we analyze instances of and reflections on migration in the Bible, in light of various interpretations and applications emerging today in debates over migration, including by politicians and "Christian nationalists." The perspectives of Latinx communities in the USA with regard to border politics and policies will be front and center in this course. The Bible, monographs and essays on Bible, borders, migration, and religion, especially from Latinx authors and thinkers, will constitute the readings for the course, along with recent data, policies, and reports on the border and "border security." Who is coming to the US-Mexico border and why, and what does religion and biblical interpretation have to do with how the US government and US people think and act on the border?

Requirements/Evaluation: Participation in class discussions; two to three short essays (3-5 pages each) analyzing selected readings; a longer final research paper (8-10 pages) on an aspect of Bible and Migration of interest to the student defined in consultation with the professor.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Religion majors and Latinx Studies concentrators, and those interested in these areas of study

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

REL 286(D2) LATS 285(D2)
REL 288 (F) Embodiment and Consciousness: A Cross-Cultural Exploration

Cross-listings: PHIL 288

Primary Cross-listing

This course examines some of the central questions raised by the study of the consciousness: the place of intentionality, the role of emotions, the relation with the body, the nature of subjectivity, the scope of reflexivity, the nature of perceptual presence, etc. In confronting these difficult questions, we do not proceed purely theoretically but consider the contributions of various observation-based traditions, from Buddhist psychology and meditative practices to phenomenology to neurosciences. We begin by examining some of the central concepts of Buddhist psychology, its treatment of the mind as a selfless stream of consciousness, its examination of the variety of mental factors and its accounts of the relation between cognition and affects. We also introduce the practice of meditation as a way to observe the mind and raise questions concerning the place of its study in the mind-sciences. We pursue this reflection by examining the views of James, Husserl, Sartre and Merleau-Ponty, particularly as they concern the methods for the study of the mind and the relation between consciousness, reflexivity and the body. In this way, we develop a rich array of analytical tools and observational practices to further our understanding of the mind. But we also question the value of these tools based on first person approaches by relating them to the third person studies of the mind. In this way, we come to appreciate the importance of considering the biology on which mental processes are based and the light that this approach throws on the nature of consciousness. We conclude by considering the relation between first and third person studies of the mind, focusing on the concept of the embodied mind as a fruitful bridge between these different traditions.

Requirements/Evaluation: regular practice of meditation, a class presentation, a short essay (6-pages); a long final research paper (15 pages)

Prerequisites: any introduction to philosophy and at least two upper level courses in PHIL, at least one of which meets the Contemporary Metaphysics or Epistemology distribution requirement for the major, no exceptions;

Cross-listings: ENVI 291 / SOC 291

Secondary Cross-listing

This course examines the relationship between religious and environmental thought in American cultural history. Exploring a broad range of practices, stories, and beliefs, we will examine the spiritual roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have religious writers, thinkers, and artists shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biological theory, Buddhist eco-spirituality, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.

Prerequisites: None
Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 291(D2) REL 291(D2) SOC 291(D2)

Writing Skills Notes: Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

REL 292 (S) Religion and Politics in Puerto Rico, Cuba and the Diaspora

Cross-listings: LATS 253

Secondary Cross-listing

This course analyzes the role of religion in Caribbean history and politics, with a focus on Puerto Rico and Cuba. These Caribbean Islands have lived out contested colonized histories and experiences, as well as diasporic realities in several key US communities, such as New York City and Miami. Since 1898, the US government and military have played a significant role in both Islands, forcibly shaping their economies and politics. Religion, particularly the Protestant missionary enterprise after the US invasions in 1898, has also shaped histories and politics on the islands and throughout their diasporas. We will analyze the role and impact of Protestant religion in these historically indigenous, African descendent, and Roman Catholic religious spaces, as well as how these religious engagements and theologies impacted migration and the creation of diasporic communities in the US. Both the role of religion in the imperialist endeavor and in the solidarity movements that responded will occupy our time in this course, with special attention to key figures in both sides of such efforts. With some enhanced understanding of the intertwining of religion and politics in Puerto Rico, Cuba and their diasporic communities, participants in this class will also consider implications for other Caribbean nations, such as the Dominican Republic, as well as, selectively, Latin American countries that have experienced US interventions and the creation of diasporic communities.

Class Format: This course will follow a lecture-discussion format, in which students are expected to come to class prepared to address the assigned readings, to have completed short assignments in preparation for discussions, to make presentations to the class, and/or to lead discussions.

Requirements/Evaluation: Evaluation in this course will be based on class participation, online discussion forum posts based on readings, two short 5-6 page essays on an aspect of Puerto Rican or Cuban political/religious reality discussed in class, and a final 8-10 page research essay on a theme in the course agreed upon by student and professor.

LEC Section: 01 W 1:10 pm - 3:50 pm Efrain Agosto
REL 294 (S) Paul and Early Christianity: Race, Ethnicity, Empire, and the New Testament

In the Christian New Testament, 13 letters are attributed to "Paul" (out of a total of 27 documents that comprise the New Testament). These letters have been a rich source for a host of political and theological debates over the last two millennia, but in this course, we will examine them as expressions of earliest Christianity's encounter with race, ethnicity, gender, and the ethics of a new religious movement, established in the midst of the oppressive Roman imperial order. Seven of these letters were almost certainly written by someone known to us as Paul of Tarsus. How Paul, a devout Jew, addressed controversial issues in his newfound communities, often in equally controversial ways, will guide our discussions of the role of religion and politics in his world as well as our own. Reading the letters of Paul and related documents in the New Testament, and interpretations of Paul over the centuries, including in modern scholarship, especially by African American, Asian American, and Latinx biblical scholars, theologians, artists, and thinkers will focus our study of religion and politics, ancient and modern.

Requirements/Evaluation: Students will prepare oral and written summaries of the letters (at least one per student) from their own perspectives in conversation with scholarly interpretation, as well as write short papers (two for the semester, 3-4 pages each) on relevant themes for today inherent in these ancient documents. There will also be a final, research paper (8-10 pages) examining race, ethnicity, gender, and/or politics -- then and now -- using several of the letters as sources for the written exploration.

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: juniors and seniors, either Religion majors, concentrators, or at least one course in Religion

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

REL 295 (S) Foundations of Confucian Thought (DPE) (WS)

Cross-listings: CHIN 215 / ASIA 215

Secondary Cross-listing

How should people treat each other? What constitutes human nature and does it tend towards good or evil? How should we organize society, by focusing on laws and regulations, or on ritual and moral guidance? What is the nature of moral rulership? What is the proper relationship between the individual and larger units of society, from the family to the state? These are some of the key questions that the school of thought that has come to be known as "Confucianism" addresses. As the dominant moral and political philosophy for thousands of years in much of East Asia, Confucianism has shaped our world, past and present, in innumerable ways. In this class we will focus on the foundational texts of the Confucian tradition: the Analects (purported to record the words of Confucius himself), Mengzi (often romanized as "Mencius"), and Xunzi. Beyond those questions noted above, we will further examine how these texts construct their arguments; how they were first composed, compiled, and circulated; how they employ such key concepts as "humaneness" (ren), "moral power" (de), and "ritual propriety" (li); and how they functioned as part of the larger philosophical, linguistic, political, and historical context that we now think of as "early China."

Requirements/Evaluation: Evaluation is based on writing assignments (3-4 pages, 5-6 pages, and 10-12 pages) and participation in class discussions.

Prerequisites: None.

Enrollment Limit: 19

Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; current or prospective Asian Studies concentrators; and Religion majors.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 215(D1) REL 295(D2) ASIA 215(D1)

Writing Skills Notes: Writing will include short writing assignments (1 paragraph, 3-4 pages, and 5-6 pages) that will involve drafts, feedback and revision, and one longer final paper of 10-12 pages that will involve close consultation with the instructor during the writing process.

Difference, Power, and Equity Notes: Throughout the course we will examine how these texts deal with issues of differentials of power, both political and social, in a range of contexts. In particular, we will discuss how these texts conceptualize political and social power and how they see hierarchy
and difference functioning in both beneficial and deleterious ways in society.

Not offered current academic year

REL 299 (S) Shakespeare's Torah

Cross-listings: JWST 299

Primary Cross-listing

For readers and speakers of the English language over the past five centuries, no literary body of work has been more central than the writings of William Shakespeare. His plays and poems have shaped the linguistic, philosophical, and artistic representation of human experience in ways that permeate every aspect of our lives. Shakespeare's capacious work and its central preoccupation with the essential questions of humanity have also inspired an extensive tradition of commentary, interpretation, and performance. In this regard, his work occupies a position similar to the one held by the collection of writings known in the Jewish tradition as Torah. This term refers both to the set of books contained in the Hebrew Bible and to the rabbinic tradition that emerged from reading those books, which in turn has provided the core principles for over two millennia of Jewish interpretive practice. This course invites students to read Shakespeare as Torah by applying the essential features of that practice to his extraordinary work. Through a deep and sustained encounter with four plays in four different genres (Hamlet, Henry IV, Twelfth Night, and The Tempest), we will combine analytic, critical, and creative principles to make meaning in and out of these texts. The goal throughout is to explore how the Jewish art of interpretation can illuminate our experience of Shakespeare's humanity.

Requirements/Evaluation: class participation, regular short written and oral assignments, and a final project

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: If the class is overenrolled, preference will be given to Jewish Studies concentrators, Religion majors, and students who have taken REL/JWST 222.

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

REL 301 (S) Social Construction (DPE)

Cross-listings: COMP 315 / WGSS 302 / STS 301 / SOC 301

Primary Cross-listing

"Social construction" can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore look at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

Requirements/Evaluation: regular attendance and participation, short weekly reflection papers, a 8-10 page research paper, and final project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Preference will be given to majors and concentrators from STS, ANSO, COMP, REL, PHIL, WGSS, AAS, LATS, JWST,
and AFR. If the class is overenrolled students will be asked to submit an email about themselves and why they want to take the course.

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:**  (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 315(D1) WGSS 302(D2) STS 301(D2) SOC 301(D2) REL 301(D2)

**Difference, Power, and Equity Notes:** Central to REL 301 will be an analysis of the social construction of race, gender, and sexuality. It will show how power and difference are tied up in their construction and maintenance of these categories. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

**REL 306 (F) Feminist Approaches to Religion** (WS)

**Cross-listings:** WGSS 307

**Primary Cross-listing**

What does feminist theory have to offer the study and practice of religion? How have participants in various religious traditions helped to produce and enact different kinds of feminist approaches to critique and transform religions? Feminisms and religions have a long though often troubled history of interconnection. In this course, we shall explore a range of feminist analyses that have either emerged out of particular religious contexts or have been applied to the study of religious traditions and practices. The course prioritizes attention to the intersections and interactions of gender, race, ethnicity, sexuality, and nationality (among other factors) with religion.

**Requirements/Evaluation:** weekly GLOW posts before class, one "position paper" for class discussion (3 pages), a research question with rationale for interest and potential action plan (1 page), exploratory research statement (2 pages), essay on interpretive approach to research project (3 pages), participation in writing workshop on 7-page early drafts of final papers, one 15-page final paper.

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion and Women's, Gender and Sexuality Studies majors have priority, and then students who have taken either REL 200 or WGSS 101.

**Expected Class Size:** 15

**REL 308 (S) What is Power?**

**Cross-listings:** STS 308 / SOC 308

**Primary Cross-listing**

What is power? Despite the importance of notions of power across the social sciences, there is a broad lack of consensus. Is power essentially domination or resistance? Is it freedom, empowerment, privilege, or oppression? Are there forms of unequal social power which are morally neutral or even good? Is power the kind of thing held by individuals, races, genders, classes, discourses, causal mechanisms, institutions, or social structures? What is the connection between social and physical power? Does power obey laws? How does power relate to technology? Or knowledge? Or
agency? Or ideology? This course begins with the observation that power is often described as a causal relation—an individual's power is supposed to equal their capacity to produce a change in someone else's behavior. This suggests that the better we can understand the nature of cause and effect, the better we can understand power. Fortunately, in recent decades philosophers have made significant progress in theorizing causation. Hence, this seminar will put two very different bodies of theory in conversation: critical theory about power and philosophy of science about cause and effect.

We will touch on classic philosophical accounts of power and causation, but focus our attention on more recent developments in philosophy of science, political theory, and other fields. The insights we gain in this course from analyzing the nature of power should empower us to more effectively transform society. It will help students in the social sciences to understand the nature of causation in the social world, and it will help students interested in political action to better understand the nature of power. Thinkers to be considered may include: Aristotle, Amy Allen, Hannah Arendt, Bourdieu, Judith Butler, Nancy Cartwright, Foucault, Gramsci, Byung-Chul Han, Han Feizi, Giddens, Steven Lukes, Machiavelli, J.L. Mackie, Marx, Nietzsche, and Max Weber. (Note that in 2023 this course will also fulfill the senior seminar requirement for STS)

Requirements/Evaluation: critical annotations for every class, midterm review essay (4-6 pages), final essay (10-12 pages)

Prerequisites: None.

REL 312 (S) The Mughal Empire: Power, Art, and Religion in India

Cross-listings: ASIA 312 / GBST 312 / HIST 312

Secondary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith—much larger than any European empire in the early modern world—the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor’s memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

Requirements/Evaluation: participation, several short essays, one final paper

REL 318 (S)  Myths and the Making of Latine California  (WS)
Cross-listings:  LATS 318 / AMST 318

Secondary Cross-listing
California is home not only to the largest ethnic Mexican population in the USA but also to the largest Central American population, while also being home to long-standing Latine communities hailing from Chile to Cuba. Since the era of Spanish colonization, especially starting in 1769, California has been woven into fantastic imaginations among many peoples in the Americas. Whether imagined as Paradise or Hell, as environmental disaster or agricultural wonderland, as a land of all nations or a land of multiracial enmity, many myths have been inscribed onto and pursued within the space we call California. In a state whose name comes from an early modern Spanish novel, how did certain narratives of California come to be, who has imagined California in certain ways, and why? What impact have these myths had on different Latine populations in the history of California, and how have different Latines shaped, contested, and remade these myths as well as the California landscape that they share with other peoples? In this course, we consider "myth" as a category of socially powerful narratives and not just a simple term that refers to an "untrue story." We examine myths by focusing on a few specific moments of interaction between the Latine peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest are select creation stories (found in Jewish, Christian, and Indigenous traditions), imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as part of Greater México, California as "sprawling, multicultural dystopia," and California as "west of the west," including its imagination as a technological and spiritual "frontier."

Requirements/Evaluation:  this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Latina/o Studies concentrators, Religion majors, American Studies majors, Environmental Studies majors and concentrators, Comparative Literature majors
Expected Class Size: 15

REL 319 (S)  Milton's Paradise Lost
Cross-listings:  ENGL 315

Secondary Cross-listing
If you know anything about John Milton, you probably think of him as some blind guy who wrote a really long poem about the Bible. It's hard to shake the feeling that Milton is the fustiest of English poets--dull, pious, brilliant and all, and not someone you would read if you didn't have to. But then what are we to make of the following? The first piece that Milton wrote that was read widely throughout Europe was a boisterous defense of the English Revolution. Milton was most famous in his lifetime as the poet who went to bat for the Puritan insurgents--the poet who came right out and said that the king looked better without his head. Of all the major English poets, Milton is the revolutionary. So a course on Milton is by necessity a course on literature and revolution. We will read Paradise Lost, widely regarded as the greatest non-dramatic poem in English, and a few other books to help us prepare for that big one. Some questions: How did the mid-seventeenth century, probably the most tumultuous decades in the history of modern Britain, transform the culture of the English-speaking world? What is the relationship between literature and the state or between literature and radical politics? Is there a poetics of revolution? How can a poet who seems to be writing for Sunday school--about God and Adam and Eve and the serpent--really have been writing about rebellion all along?
REL 320 (F) "You Do You!" The Ethics and Politics of Personal Authenticity

From the breathtaking expansion of the "self-help" industry to corporate advertisement, from the fashion and entertainment industries to cultural politics around sexuality and race, the rhetoric and ideal of personal authenticity pervades our daily existence. From every corner we are told: "To thine own self be true!" This powerful moral ideal has arguably become an inescapable and hegemonic frame of U.S. cultural life in the 21st century (and more broadly middle-class life around the globe). The imperative of authentic self-realization -- to discover and become your "true self," in opposition to mere conformity to social conventions and independent of external expectations -- is seen as essential if we are to live a healthy and fulfilling life, and to fully realize what it means to be human in the deepest sense. This course will interrogate this ideal and imperative of personal authenticity from several angles. We will begin by examining some contemporary manifestations of this ethos. We will then explore the historical roots and evolution of the emphasis on authentic selfhood in the modern West, as well as comparable notions of sincerity, selfhood, interiority, and introspection in other (non-liberal, non-Christian) cultural contexts and religious traditions. We will also consider the ideal of authenticity in light of contemporary social theory, as well as engage a variety of ethical-political critiques of authenticity. Through this, we will investigate a number of important questions: Is there such a thing as the "true self" that is autonomous and free of social influences and norms, and how does one discover this true self? What are the limits and social consequences of this aspiration towards authentic selfhood? What are the effects of the widespread commodification of authenticity, and how should we understand the relation between personal authenticity and the conditions of late-stage capitalism? Is the rhetoric of personal authenticity simply an expression of narcissistic individualism, or is there a higher moral value and ideal that it speaks to? Can community cohesion and shared collective purpose be sustained alongside the imperative of authenticity? How does the ideal of authentic selfhood interact with collective or socially-conferred identities (like race, heritage, or religion)? Is personal authenticity ultimately just a white secular value, or is it an available and achievable ideal for those who do not fit this hegemonic mold?

Requirements/Evaluation:  one 6- to 8-page paper, one 10- to 12-page paper, informal weekly writing assignments, and active seminar participation

REL 325 (F) Faith and Profit in the Medieval Mediterranean

Cross-listings: HIST 325

Secondary Cross-listing

In many historical societies, there have been tensions between the demands of economic and religious life. What can I sell, what should I do with money, and how shall I interact with strangers? What is the relationship between religious ideals and the habits of everyday life? These questions can become especially acute when representatives of two or more competing belief systems interact with each other. The medieval Mediterranean
provides numerous rich examples of societies and individuals facing these questions. In this class, we will look at how medieval Jews, Christians, and Muslims resolved these and other dilemmas in the market societies surrounding the Mediterranean basin, as they created their own forms of religious law and economic philosophy. In the process, we will gain a more profound understanding of the roots of modern debates about capitalism, property, and economic justice.

Requirements/Evaluation: Attendance and participation, two short papers, one final 12-15-page research paper

REL 330 (S) Modern Jewish Political Theory

Cross-listings: PSCI 375 / JWST 492

Primary Cross-listing

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst bourgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctly Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of “Jews” and “Judaism” in these arguments. And we will ask persistently: what constitutes a “Jewish justification” for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

REL 332 (F) Islam and Feminism

Cross-listings: ARAB 332 / WGSS 334

Primary Cross-listing
This course examines the relationship between feminism and Islam, exploring Islamic feminism, decolonial feminism, and the critiques of imperialist feminism, homonationalism, and femonationalism. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses to such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will explore the breadth of Islamic feminist literature, covering: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology. The final part of the course will focus on Muslim feminist and decolonial feminist critiques of feminism and its link to imperialism and the weaponization of gender and sexuality in global discourse.

Requirements/Evaluation: weekly responses, midterm essay, final research paper
Prerequisites: none

REL 334 (S) Imagining Joseph
Cross-listings: ANTH 334 / COMP 334 / JWST 334
Secondary Cross-listing
Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

Requirements/Evaluation: occasional response papers; substantial final project and paper; class participation

Spring 2025
SEM Section: 01 W 1:10 pm - 3:50 pm Peter Just
In the twentieth century, Jewish history and humanitarian history became deeply intertwined. As the victims of persecution and expulsion, mass violence and genocide, Jews repeatedly figured as the recipients of aid and humanitarian intervention. At the same time, Jewish political figures, legal thinkers, intellectuals and scholars, social activists, and aid workers played central roles in the establishment of humanitarian organizations and in debates about the moral, political, and legal frameworks that have shaped approaches to humanitarianism across the decades since World War I. This research seminar is designed to open up big questions about the history of humanitarianism and to carve out space for students to conduct research on a particular place, time, and aspect of that larger history in conversation with other students working on related topics. In the first half of the semester, in discussions of common readings, we will examine various works of scholarship that connect to the history of humanitarianism from the nineteenth century to the present. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of humanitarianism using the digitized archives of the American Jewish Joint Distribution Committee, culminating in a twenty-plus-page paper. In the final weeks of the semester, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students' work. In this seminar, we are not merely studying history; you are actually doing history. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. The goal is for each student to produce a polished research paper based on engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

Requirements/Evaluation: class participation, several short papers, oral presentations, and a 20-page research paper

REL 340  Science, Religion, and the (post)colonial: Critical approaches to the global history of knowledge  (DPE)

Histories of science and religion have been deeply intertwined with colonial and postcolonial history. Colonial claims to legitimacy were often rooted in perceptions of scientific and technological superiority, and colonial expansion often marched in lockstep with missionary activity and forced conversions. In the process, race and human difference emerged as concepts at the intersection of scientific and religious discourses and was forged within the colonial framework. This colonial history of science and religion impacted how scientific and religious thought, practices and institutions developed through the period of decolonization and into today. Similarly, the attendant history of race and human difference continues to influence postcolonial and contemporary discourses around race, ethnicity, identity and migration. In this course, we will trace key moments in the history of science and religion and their relation to coloniality. We will start in the sixteenth century with the rise of modern European empires, move into the height of modern colonialism, indigenous genocides and chattel slavery, and trace decolonization from the middle of the nineteenth into today. Throughout, we will investigate how science and religion emerged as concepts, practices and institutions, and how these narratives impacted, and were impacted by colonial expansion and history. We will pay particular attention to questions of race, gender, sexuality and human difference as key concepts and practices that emerged at the intersections of science, religion and (post)colonialism.
Requirements/Evaluation: 2 response papers (3-5 pages each) + final project (could be a 10-15 page research paper or creative project of any kind)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Concentrators, followed by seniors and juniors

Expected Class Size: 15

Grading:

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course addresses questions of race, gender, sexuality and human difference as seen through the history of science, technology and medicine. Students will creatively engage with critical race theory, postcolonial theory and queer theory. They will also investigate human suffering as a category that provides a deeper understanding of difference, diversity and equality.

REL 347 (F) Monstrosity

Cross-listings: STS 411

Primary Cross-listing

The history of science is full of monsters. From the grotesque homunculi of alchemical lore, through the stitched-together corpses of the gothic imagination, to the fearsome mutants of the atomic age, each era has birthed its own nightmares as it has strived to unlock the secrets of nature. At the heart of this course lies the premise that monsters--be they born of alchemy, literature, or the lab--serve as critical mirrors to a society's norms, embodying the deviations and transgressions against the constructed "normal" within various cultural and historical contexts. Monsters often challenge and redefine boundaries, reflecting inherent ideas of the natural, anxieties about gender and race, and troubling binary oppositions such as human versus animal, animate versus inanimate, and the living versus the dead. This course will show how the concept of monstrosity has shaped scientific inquiry, medical practices, and technological advancements. We will trace a roughly chronological and thematic journey navigating through different epochs and aspects of monstrosity: from early notions of the connection between demons and disease, through the marvels of the "Scientific Revolution," to the spectacle of anatomical wonders and "freak shows." We will explore the eerie corridors of Gothic and early horror literature, where science births its own type of monsters, and scrutinize how the dawn of evolutionary theory produced new notions of monsters, mutants, and other anomalous bodies. The course will further examine the dark intersections of eugenics, race, and monstrosity, before venturing into the realm of genetic anomalies and anxieties reflecting changing notions of biological inheritance. We will explore the concepts of abjection and the monstrous feminine, revealing how monstrosity intersects with the constructions of gender, sexuality, and desire. We will spend a week on the psychological appeal of horror and speculations about why we love to be terrorized. Finally, we look ahead to the future, contemplating how ongoing scientific and medical innovations continue to redefine the boundaries of what is considered monstrous. (This course will function as a senior seminar for Science & Technology Studies concentrators, but it is also open to students with other concentrations/interests.)

Requirements/Evaluation: Weekly critical reflections, an independent research project culminating in a 10-15 page research paper (Alternatively, students may opt to create a work of fiction paired with a shorter research paper instead of the final research paper, pending the instructor's approval).

Prerequisites: none.

Enrollment Limit: 15

Enrollment Preferences: Preference will be given to STS concentrators.

REL 353 (S) Disinterest in the Bhagavad Gita
Cross-listings: ENGL 353 / COMP 313 / ASIA 351

Secondary Cross-listing

In this course, students will read the Bhagavad Gita alongside selected responses to it. These responses range from philosophical and theological commentaries written in Sanskrit by Shankaracharya, Abhinavagupta, and Ramanuja, to later "Bhakti" poetic responses in other Indian languages, to 18th and 19th century European aesthetic and political commentary (Herder, Schlegel, Hegel), to the work of 20th century commentators like M.K. Gandhi, B.G. Tilak, B.R. Ambedkar and D.D. Kosambi. We will examine the Gita's theory of action and the place of disinterest in this theory. We will inquire into the social, metaphysical, and political conditions of possibility of such disinterestedness, and think about disinterestedness itself as a condition for political action and aesthetic experience. Finally, we will reflect on how such a comparative history of interpretation might help us model a dialectical history of thought.

Requirements/Evaluation: Weekly meetings, weekly reading; weekly essay or response. Attendance in 2-3 lectures over the semester.

Prerequisites: No prerequisites

Enrollment Limit: 10

Enrollment Preferences: Majors in English and Comparative Literature; Religion, Classics, or Philosophy majors; Sophomores looking to major in any of these.

Expected Class Size: 8-10

Grading: no pass/fail option, no fifth course option

REL 358 (F) Religion and Law (DPE)

Cross-listings: GBST 358

Primary Cross-listing

This course explores the concept of "law" through an investigation of the complex relationship between law, ethics, and religion. In doing so, we will look at legal theoretical texts as well as legal anthropological studies to pose critical questions about the nature of law, the functioning logic of law, the relationship between law and lived experience, and the legal construction of categories and facts. In the course, we will consider two intersections of religion and law: the particularities of religious legal traditions and the relationship between religion and secular law. Topics will include the secular legal construction of religion, the relationship between law and ethics, the nature of legal hermeneutics, and the racial, gender, and sexual politics of legal interpretation.

Requirements/Evaluation: reading response, two essays, final research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: Law is seen as both a repressive and liberatory force. In taking a critical approach to the nature of law and legal interpretation, this course prepares students to think about the language of "rule of law," "order," and "justice" as a complex relationship between law and power.

Not offered current academic year
REL 360  (F)  The Gothic Cathedral: An Art History

Cross-listings: ARTH 360

Secondary Cross-listing

Through their enormous scale, through the gravity-defying complexity of their construction, and through the sumptuousness of their materials and decoration, Gothic cathedrals -- the medieval equivalent of the blockbuster movie, and then some -- have amazed visitors for centuries. The widespread social media reaction of shock and dismay to the fire at Notre Dame Cathedral in Paris four years ago, moreover, indicates that this power of the cathedral to dazzle and to capture hearts remains very much alive. But how have art historians, specifically, made sense of these extraordinary, and extraordinarily complex, monuments? And how have the questions they have asked about the cathedral changed over time? Through a close examination of a number of influential books, in particular -- each one of them a kind of miniature cathedral in its own right -- this 300-level seminar will investigate the shifting interpretation of the Gothic Cathedral over the past 150 years. In so doing, the seminar aims to shed light not only on the fascinating multiplicity of realities that make up the Gothic cathedral but also on the changing shape of the discipline of art history itself, from its beginnings to the early 2020s.

Requirements/Evaluation: participation in class discussion; 1 or 2 oral presentations; four 3-4-page papers, and a 6-8-page paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: art majors and sophomores, but open to all

REL 420 (F) Islam and the Image (DPE) (WS)

Cross-listings: ARTH 521

Secondary Cross-listing

This seminar responds to a recent incident at a US liberal arts university where a professor was sacked for showing images of Prophet Muhammad as part of her section on Islamic art. Why is image-making so hotly contested in Islam? What is the history of figural depictions in this tradition? The seminar explores artworks made for Muslim patrons from the medieval period to the modern era, considering how paintings produced for Muslim audiences can be situated within the frameworks of "Islamic art," a loaded historiographical term that has been questioned in recent times. The seminar also addresses some of the major problems that continue to haunt art scholarship in the field. For most of its history, the academic study of Islamic art has seldom considered contemporaneous literary voices that shed light on the motivations behind artworks. Furthermore, the historiography, deeply entrenched in its colonial and orientalist roots, has largely isolated images from their supporting texts--a curious oversight in light of the fact that painting in Muslim lands has historically been primarily an art of the book. These biases have affected the way museums have collected, displayed and interpreted paintings. For example, Western museums continue to place figural depictions made for books and albums in "South Asian" collections while textual manuscripts and calligraphic specimens made for the same Muslim audiences--even at times bound in the same albums--are categorized as "Islamic art." What does this isolation of text from image imply about prevailing views of Islamic art? To better understand the cultural, historical and religious context surrounding artworks students will read primary literature ranging from autobiography to devotional poetry, often written by the very patrons and subjects of the paintings to be discussed.

Requirements/Evaluation: class participation, short weekly writing assignments, final essay project

Prerequisites: Undergraduates wishing to enroll must have taken at least one art history course or one religious studies course. Undergraduates must email indicating their interest in the course prior to enrolling.

Enrollment Limit: 19

Enrollment Preferences: MA students, then advanced undergraduates

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

A 4-5 page project outline due right after Thanksgiving break. After receiving feedback and comments from the instructor, the final paper will be due in the last week of classes.

Difference, Power, and Equity Notes: Highlights a global art history that is underrepresented. The class focuses on pluralistic engagements with non-Western cultures and epistemologies.

Attributes: ARTH pre-1800

Not offered current academic year

REL 425 (S) Fragments and Healing: Disability Studies and Late Antique Art

Cross-listings: ARTH 425 / ARTH 584

Secondary Cross-listing

This seminar will investigate some of the ways that contemporary Disability Studies can help us see and think about the complexities of differently...
abled bodies in Late Antiquity (broadly, from ca. 200 until ca. 750), the formative period for Christian art (and consequently for much of Western art). Disability Studies is an extremely active and rich body of literature and art that has not often been brought into conversation with historical periods of art, and so this seminar seeks to open up discussion of the insights possible from that conversation, not only how Late Antique art can be re-interpreted, but also how that period of art can reveal under-explored areas in the field of Disability Studies. The seminar will undertake a mutual interrogation of accepted notions in both fields and, in this way, to explore some new understandings of Disability Studies’ capacities for allowing us to think with our art, culture, and bodies. The means at our disposal for this seminar are art of Late Antiquity and of the contemporary world, and that idea of mutual interrogation also operates in our study and display of that art. The seminar will look at art of healing and recuperation, art produced by and directed at diversely-abled bodies, and at fragments and restoration, and think about art as documents, reflections, and determinants of those bodies, now and in the past. It will, for this reason, work around the collection of WCMA, with exhibition and collection research, and the historical archives of the Library holdings, so that the widest possible study of bodies and difference is opened for our thinking and dialogue.

Requirements/Evaluation: participation in discussion; three 1-2-page reading reports; one 3-5-page exhibition response; one 15-20-page final essay

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: senior art-history majors and graduate students; other students will need instructor consent

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: In this seminar, students will develop skills of crafting clear and persuasive arguments through an iterative writing process. Further, to help them achieve these goals, they will receive timely comments on their written work.

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
MAJOR—French Language and Literature

The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French-speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses. One of these courses must be the 400-level senior seminar during the student’s final year at the College.

Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—French Studies

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

- at least five RLFR courses in French language, literature, film, or culture;
- the RLFR senior seminar during the student’s final year at the College;
- Electives: The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the cultures, histories, societies, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:
  - AFR 360 Political Thought Frantz Fanon
  - ARTH 254 Manet to Matisse
  - HIST 390 Haitian and French Revolutions
  - RLFR 101-450 All courses in French and Francophone language, literature, film, and culture

THE DEGREE WITH HONORS IN FRENCH

Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and...
if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent reading, researching (in relevant archives or with field work), and compiling a more detailed bibliography.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher.

For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103 or higher, six additional courses must be taken, including at least three French courses at the 200-level or higher. For these students starting at French 103 or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science, philosophy).

PLACEMENT

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

STUDY ABROAD

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate. The final assignment of course credit will be authorized in consultation with the student's French advisor, once the student has returned to Williams. Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level senior seminar must be taken during the senior year at Williams. Early planning is essential: Students interested in studying abroad are strongly urged to attend the yearly Francophone Study Away Information Session (held each October) during their first year or sophomore year. Students will receive credit for only those study abroad programs recommended and approved by the Dean of Study Away and the Romance Languages Department. Williams has long-term affiliations with the following programs: Hamilton College (Paris), Sweet Briar College (Paris), CUPA (Paris), Middlebury College (Paris), Wellesley College (Aix-en-Provence), Boston University (Grenoble), and both SIT and CIEE (in Morocco, Senegal, and Madagascar). For more on all approved study-abroad programs, see the webpages for the French program (french.williams.edu) and Study Away (study-away.williams.edu/programs). Finally, the Department does not administer proficiency exams (for study abroad, fellowships, or job applications) to students who have not completed a French course at Williams; and most study abroad programs will not accept students who have not taken any college courses in French (at Williams) prior to their application. Students should thus plan well ahead (as early as their first year and sophomore year) to take appropriate courses at Williams, before applying for and taking part in study abroad programs in the Francophone world.

RLFR 101 (F) Introduction to French Language and Francophone Cultures (DPE)
This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. Conducted in French.

Requirements/Evaluation: Active class participation, workbook exercises and compositions, chapter tests, midterm, and final exam.

Prerequisites: None. For students who've never formally studied French. Students who've previously studied French (in any formal course, at any level) MUST take the French Placement Test in the summer or during First Days. For more info: https://french.williams.edu

Enrollment Limit: 18

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission.

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Unit Notes: RLFR 101-102 is a year-long course. Credit is granted only if both semesters (RLFR 101 and 102) are taken. RLFR 101-102 students must also take the French Winter Study Course. This commitment to a year-long immersion in French is designed to help students become fully conversant in French by the end of the academic year.

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Through its focus on French and Francophone cultures around the world, this course enables students to gain both linguistic and cultural proficiency, and to engage with the great diversity of colonial and post-colonial cultures, histories, and identities in France and Belgium, Québec and Martinique, Sénégal and Morocco.

---

**RLFR 102 (S) Introduction to French Language and Francophone Cultures**

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, video-observations, and film-viewing, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. Conducted in French.

Class Format: This class meets 5 times a week from M-F. Students are required to attend class from Monday to Friday.

Requirements/Evaluation: participation, daily homework including weekly short writing assignments, oral and written mid-semester and final exams

Prerequisites: RLFR 101, or by Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Preference will go to first- and second-year students and those with compelling justification for admission. Statement of interest solicited if overenrolled.

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

---

**RLFR 103 (F) Intermediate Studies in French Language and Francophone Cultures**

As a continuation of French 101-102, this dynamic first-semester intermediate course is designed to help you improve your French, while at the same
time learning more about French and Francophone cultures, politics, literature, and film. Through the active study and daily practice of listening, speaking, reading, and writing in French, you will: continue developing your communication skills and learn to express your opinions and ideas; improve your command of spoken and written French through a revision of important grammatical structures; strengthen your reading and writing skills in order to prepare you for further study of literary texts; and develop an increased vocabulary and cultural appreciation of French-speaking cultures around the world.

**Class Format:** This class is scheduled to meet 5 times a week. Students will meet with the instructor 3 times a week, with the French TA once a week, and will do guided group work once a week.

**Requirements/Evaluation:** Class participation, Homework, Regular tests, Short Writing Assignments and Final Exam.

**Prerequisites:** RLFR 101-102, or by Placement Test, or Permission of Instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

SEM Section: 02  M-F 10:00 am - 10:50 am  Preea Leelah

**RLFR 104** (S) **Intermediate French II: Advanced Intermediate Studies in French**

As a continuation of French 103, this course will help students gain greater fluency in French, through an exploration of French and Francophone literature, film, media, politics, and culture. With a focus on listening, speaking, reading, and writing, students will review advanced grammar expand their vocabulary, gain greater confidence, and both discuss and debate central questions in the social, political, and cultural landscape of French-speaking communities in Europe, Africa, and the Caribbean.

**Requirements/Evaluation:** Participation, Homework, Writing Assignments, Quizzes, Final Project.

**Prerequisites:** RLFR 103, or by Placement Test, or Permission of Instructor.

**Enrollment Limit:** 18

**Enrollment Preferences:** Enrollment preference for students who completed RLFR 103 in Fall 2024, or those who have placed into RLFR 104 on the French Placement Test.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**RLFR 105** (F) **Advanced French: Advanced Studies in French Language and Francophone Culture** (DPE) (WS)

In this French course, we will read and examine literary texts from the twelfth to the 19th centuries, and films from the twentieth and twenty-first centuries. In order to analyze them, we will briefly situate them in their social and historical contexts. These works will help us better understand contemporary France and explore France's colonial past. We will also learn how to write two short research paper in French in the form of an explication de texte. While the themes, authors, time periods will vary, our approach will remain the same. Three themes, love, fear, and France's colonial past, will serve as the course's organizing principles. A small section of the course will be devoted to grammar revisions in order to continue to improve our reading and language skills. Throughout the semester we will develop our writing skills in French. Conducted in French

**Requirements/Evaluation:** class participation, online grammar exercises, 2 four-page papers, 1 class introduction, 2 low-stakes one-page response papers
**Prerequisites:** RLFR 104, placement exam, or by permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** All are welcome, but if overenrolled, preference will be given to first- and second-year students and French major and certificate students. If necessary, a statement of interest will be solicited.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** In this course students will practice writing two short structured papers in French where there will present their interpretation of literary or visual text. Students will write two response papers.

**Difference, Power, and Equity Notes:** In this course student will examine visual and literary texts that reframe difference, power and equity in relation to race, class, gender, ethnicity, sexuality, and religion.

**Fall 2024**

LEC Section: 02 MR 2:35 pm - 3:50 pm Sophie F. Saint-Just

**RLFR 106 (S) Advanced French: Danger and Desire in French Film and Fiction** (DPE)

**Cross-listings:** COMP 107

**Primary Cross-listing**
This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France and the Francophone World. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French and Francophone fiction, film, and cultures. This is an ideal course to prepare for study abroad or for more advanced coursework in French and Francophone literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France, Québec, and Algeria from 1820 to 2025, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.

**Requirements/Evaluation:** Active class participation, grammar exercises, midterm exam, and two papers.

**Prerequisites:** Exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor.

**Enrollment Limit:** 16

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to French Majors and French Certificate students.

**Expected Class Size:** 16

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 107(D1) RLFR 106(D1)

**Difference, Power, and Equity Notes:** This course centers on a critical examination of difference, power, and equity in French film and fiction. The content examines the effects of class, ethnicity, gender, and sexuality on social inequalities among rich and poor, soldiers and civilians, nations and colonies, men and women. The course employs critical tools to teach students how to articulate and interrogate social injustice, through reading, viewing, discussion, writing, and revision.

**Spring 2025**
SEM Section: 01 TR 9:55 am - 11:10 am Brian Martin

**RLFR 107 (S) Advanced French: Formation and Transformation** (DPE)
This advanced course is designed to help you refine your French speaking, comprehension, and writing skills in preparation for studying abroad or for more advanced French coursework. We will explore the themes of formation (the French term that means at once education and training) and personal transformation, through fictional and autobiographical texts and films. How do individuals find their place in societies and both define and redefine their own identities? Is it possible to reflect critically on one's own formation, or is it easier to do so through works of fiction? We will also reflect on our own educational experiences as we read works by authors such as Marguerite Duras, Maryse Condé, Annie Ernaux, and Pierre Bourdieu, and watch both recent and classic films from 1950s France to 2020s Québec.

Requirements/Evaluation: One close-reading presentation and essay, one discussion-leading presentation, two analytical essays, final project
Prerequisites: Successful performance in RLFR 105 or 106, or by placement test, or permission of the instructor.
Enrollment Limit: 20
Enrollment Preferences: Students from all majors welcome, but if over-enrolled, preference will be given to French majors and certificate students.
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course explores questions of difference, power, and equity through a critical analysis of educational systems in France and the Francophone World. Although education is assumed to create equity (in both France and in North America), the content of this course will help students nuance this view and articulate how different social identities are often excluded from the power and opportunity that education seems to promise.

Not offered current academic year

RLFR 206 (S) The Outsider in French & Francophone Film Adaptations of Literary Texts (DPE)
Cross-listings: COMP 209
Primary Cross-listing
In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.
Requirements/Evaluation: Three response papers, one short essay on film adaption, one video essay with a student partner
Prerequisites: Students should have taken RLFR 105 or above, or placement test, or by permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Comparative Literature majors, Africana Studies concentrators, French majors and certificates
Expected Class Size: 12
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 206(D1) COMP 209(D1)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity race, class, gender) between cultural producers in literary texts and their film adaptations.
Attributes: FMST Core Courses

Spring 2025
SEM Section: 01 TR 11:20 am - 12:35 pm Sophie F. Saint-Just

RLFR 213 (F) Francophone North America in the 21st Century: Revendications, réparations et retrouvailles
This course investigates post-2000 productions from Acadie, Haiti, Louisiana, and Quebec to examine the socio-literary changes and the current phenomenon of "L'Archipel linguistique." Looking at the concept of "Retrouvailles," or the gathering of Francophone regions through literary expression
in a largely Anglophone continent, we will examine how literature depicts current affairs, as well as what it can do to produce change. In addition to novels and films, we will rely on radio shows, news pieces, and tv shows to get a broader picture of the present stakes. All course discussions will be in French. Topics will include socio-political and cultural issues, (neo)colonialism, activism, linguistic insecurity, and race relations as they are addressed in visual art, music, and literature. Some of the texts covered in this course are *Kukum* (2019) by Michel Jean, *L’Enigme du retour* (2009) by Dany Laferrière, *Ô Malheureuse* (2019) by Ashlee Michot, *Suite des sens* (2023) by Jean Arceneaux, *Alma* (2006) by Georgette LeBlanc. Conducted in French.

**Requirements/Evaluation:** Evaluation is based on active in-class engagement, two short written compositions, two short presentations, and a final project.

**Prerequisites:** French 105 or 106, or results of the Williams College French Placement Test, or permission of instructor.

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to French majors or French certificate students and Comp Lit majors.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

Not offered current academic year

**RLFR 216 (S) Women Behaving Badly: Deviant Women in Early Modern French Literature** (DPE)

**Cross-listings:** WGSS 216

**Primary Cross-listing**

Female deviance often implies resisting a dominant and oppressive patriarchal status quo embedded within cultural and historical backgrounds. This course explores female characters in early modern French literature who refuse to conform to established gender roles. Defying social constructs of femininity, through either judicious negotiations or more aggressive and violent behavior, is an important trope in the writings of both male and female authors of the seventeenth and eighteenth centuries. What constitutes deviant behavior, however, depends on social definitions of gender roles, which evolve over time. In this course, we will first examine women's place within the historical and socio-cultural context of the Ancien Régime, which will lead to an examination of female behavior censured during the seventeenth and eighteenth centuries. We will then reflect on how we, as modern readers, perceive such deviancy at it relates to the past. Finally, we will discuss the relevance of studying deviant women in light of current events, such as the #MeToo movement, which has led to a new level of consciousness and empathy for the plight of marginalized groups. Potential readings to include Corneille's *Médée*, Madame de la Fayette's *Princesse de Clèves*, Laclos's *Liaisons dangereuses*, and Isabelle de Charrière's *Lettre à Mistriss Henley*.

**Requirements/Evaluation:** active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper

**Prerequisites:** strong performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 216(D2) RLFR 216(D1)

**Difference, Power, and Equity Notes:** This course focuses on a critical examination of difference, power, and equity in early modern France. Through the study of deviant women, the course thus challenges students to examine the effects of class, race, ethnicity, gender, and sexuality in narratives on women, misogyny, and criminality.

Spring 2025

SEM Section: 01  TR 9:55 am - 11:10 am  Preea Leelah

**RLFR 217 (F) Fierté, Sororité, Vitalité: Trans and Non-Binary Narratives of Francophone Expression**
Ten years have passed since Time magazine announced to the world with its June 2014 cover story that the "Transgender Tipping Point" was upon us. The cover spoke to a nation confronting transgender equality as "America's Next Civil Rights Frontier." While this "tipping point" is perhaps salient in the United States, trans(gender), non-binary, and genderqueer identities have world histories with their own vocabularies, knowledge systems, and critiques of normativities. As an important branch of feminist, gender, and sexuality studies, transgender studies continue to revolutionize intersectional inquiry and activist initiatives. In this course, students will explore the genealogical roots of Francophone trans literatures, art, and media as they overlap with fields like critical race studies, Indigenous studies, medicine and technology, carceralty, care, sex work, and entertainment. This course provides an introduction trans studies and trans of color critique and focuses particularly on the contemporary period to gives students insight into the ongoing debates that structure the field and its near future. The course will also have a strong focus on genre and medium as students engage with visual art collections (Kehinde Wiley's Tahiti and Namsa Leuba's Illusions), documentary film (Véronique Kanor's Les femmes viennent aussi de Mars), serial web comics (Sophie Labelle's Assignée garçon), podcasts (Lauren Bastide's La Poudre with Paul Preciado), poetry and performance art (Kama La Mackerele's Zom-Fam), short stories (Chantal Spitz's "Joséphine" and Magali Nirina Marson's "Je me déserte..."), and novels (Ananda Devi's Le rire des déesses, Emmanuelle Bayamack-Tam's Arcadie, and Abdellah Taïa's Un pays pour mourir), Conducted in French.

Requirements/Evaluation: Evaluation will be based on active participation and preparation, one presentation, one short essay, one multimedia midterm project, and a final paper.

Prerequisites: French 105 or 106, or results of the College Placement Exam, or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option.

Distributions: (D1)

RLFR 225 (F) Remembering the Great War: The First World War in Literature and Film (DPE)

Cross-listings: COMP 224

Secondary Cross-listing

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawing of national borders across Europe and the Middle East. Even the end of the war with the Treaty of Versailles lay the groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. In our study of the Great War, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carion, Chaplin, Jeunet, Ozon, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. Readings and Discussions in English.

Requirements/Evaluation: Active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (5-7 pages).

Prerequisites: None.

Enrollment Limit: 16

Enrollment Preferences: All are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity during WWI. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. The course also employs critical tools to teach students how to articulate and interrogate the social injustices of the Great War, from reading & discussion, to analytical essays & archival investigation.

Not offered current academic year

RLFR 229  Black Outside the U.S.
This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one's racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like "Black," "noir" and "race" have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

Class Format: seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students
Requirements/Evaluation: evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report
Prerequisites: none
Enrollment Limit: 8
Enrollment Preferences: students who have taken other AFR courses, Francophone speakers and students
Expected Class Size: 8
Grading:
Distributions: (D2)
Attributes: AFR Core Electives  GBST Borders, Exiles + Diaspora Studies
Not offered current academic year

RLFR 232  (S)  Liberté, Egalité, Fraternité ? Race, Gender, and Political Power in Eighteenth-Century France  (DPE)
Cross-listings: COMP 219
Primary Cross-listing
The French Revolution of 1789 was, to a large extent, inspired by Enlightenment thinkers such as Voltaire, Rousseau, and Diderot who promoted ideas on individual liberty, scientific progress, religious freedom, and secularism. The Revolution brought with it promises of a society freed from the abuses of an absolute monarchy. Yet as feminist thinker Olympe de Gouges would note, when France redefined its notion of citizenship after 1789, it did not include women and people of color. This course examines Enlightenment ideas that led to the French Revolution, while analyzing how those ideas failed to bring true equality. Voltaire, Buffon, and Montesquieu all advocated for the abolition of slavery, but they also held racist and sexist views, justified by pseudoscientific discourse. By further juxtaposing these thinkers with feminist and abolitionist authors such as Olympe de Gouges and Claire de Duras, we will examine how eighteenth-century female authors advocated for the rights of women. Finally, we will analyze artworks such as Marie-Guillelmine Benoist's Portrait d'une nègresse (1800) and discuss how France is using such works today to reckon with its history of discrimination.
Requirements/Evaluation: active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper
Prerequisites: excellent performance in RLFR 105; successful performance in RLFR 106; other RLFR 200-level courses; or by French placement exam; or by permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors and certificate students; Comparative Literature majors; and those with compelling justification for admission
Expected Class Size: 20
Difference, Power, and Equity Notes: In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity in eighteenth-century France. Through the study of enlightenment and feminist thinkers and leaders, the course asks students to analyze the social, political, and discursive effects of class, race, ethnicity, gender, and sexuality in narratives on revolution, and to re-examine both past and present definitions of "liberty, equality, fraternity."

Not offered current academic year

RLFR 234 (S) Francophone Oceania: The Other Side of the Postcard

Manava i Te Ao Ma'ohi! Tongan-Fijian author Epeli Hau'ofa writes: "Centuries before Europeans entered the Pacific, in the days when boundaries were not imaginary lines in the ocean but points of entry that were constantly negotiated and even contested, the sea was open to anyone who could navigate a way through." Of critical importance to Oceanian communities and scholarship today is the project of remembering and re-membering the stories, knowledges, travel routes, and more-than-human ecologies that have crisscrossed the vast aqueous landscapes of this "other" side of the globe. This course is a comprehensive survey of the literature, modern history, and aesthetics that inform the field of contemporary Francophone Oceanian Studies. Major concepts in Indigenous Oceanian philosophy and genealogies of thought (from Ma'ohi, Kanak, and Ni-Vanuatu communities in particular), European imperialism and racial politics, gender and sexuality, maritime knowledges, the French nuclear agenda and climate fiction will be studied. Students will use multimedia formats and storytelling techniques to cross-examine narrative development, philosophy, and Oceanian history from a comparative perspective. Texts may include: Dédé Gorodé's Sous les cendres des conques (1985), Chantal T. Spitz's L'île des rêves écrasés (2002), Ari'irau's Matamimi ou la vie nous attend (2006), Nicholas Kurtovic's Dans le ciel splendide (2015), Titaua Peu's Pina (2016), and Titaua Porcher's Hina, Maui et compagnie (2018) among others. Conducted in French.

Requirements/Evaluation: Evaluation will be based on active participation and preparation, two short presentations, a guided journal, and a final project.

Prerequisites: RLFR 105 or 106; or results of the College Placement exam; or permission of Instructor.

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate holders

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

RLFR 260 (F) Francophone Graphic Novels (DPE)

Cross-listings: COMP 260

Primary Cross-listing

In this class we will read contemporary graphic novels and bandes dessinées from Côte d'Ivoire, Morocco, Guadeloupe, Lebanon, France, and Québec to analyze how they approach subjects such as colonial history, migration and discrimination, gender and sexuality, and representations of disability and the racialized body. We will pay particular attention to the visual form and the critical theory of the graphic novel to further understand why this hybrid genre has become so popular and widespread, and how it is shaping conversations about difference and power in the Francophone world. Conducted in French.

Requirements/Evaluation: weekly 1-page response papers, midterm 4-5-page paper, presentation and final 7-8-page research paper

Prerequisites: RLFR 105, 106, by placement or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students, Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1)
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
COMP 260(D1) RLFR 260(D1)

Difference, Power, and Equity Notes: The readings in this course focus on French colonial and Francophone postcolonial history, contemporary migration, and structures of discrimination built on race, religion, gender, and ableism in the French-speaking world. We will explore how graphic novels in their hybrid visual/verbal forms propose different ways of shaping the dynamics and the discourse of difference and power.

Fall 2024
SEM Section: 01    TR 9:55 am - 11:10 am     Katarzyna M. Pieprzak

RLFR 262 (S)  Lâche pas la patate: Francophone Culture in Louisiana
The expression "Lâche pas la patate,” or "don't drop the potato” is a way of saying "don't ever stop speaking French in Louisiana." This begs the question: why preserve a language? In Louisiana, Francophone activists have been fighting to preserve their unique dialect of French--or what Professor Barry Jean Ancelet calls "the problem language"--for decades. By promoting the education and use of French in the state, what else are they preserving? From historical, thematic, and literary perspectives, this course is designed to provide an answer to such questions through the examination of Francophone Louisiana from its foundation as a French colony to today. In this course, we rely on contemporary publications and media in French to get a broader picture of the current stakes in Francophone Louisiana. Topics will include sociolinguistics, race relations, creolization, activism, and Americanization. Primary sources include rituals, cartoons, films, memes, music, literature, and cuisine. Texts and media (such as films and podcasts) included are Les Aventures de Boudini et ses amis, Tout bec doux, Ô Malheureuse, Film Quest, L'Habitation Saint-Ybars, Bayou zen, Finding Cajun, Mille misères La Veillée, Charrer-Veiller, Feux Follets, Istrouma : Manifeste Houma. Conducted in French.

Requirements/Evaluation: Evaluation is based on active in-class engagement, a mid-term exam, two short presentations, and a final research project.
Prerequisites: French 105 or 106; or results of the College Placement Test, or permission of instructor.
Enrollment Limit: 20
Enrollment Preferences: French majors/certificate students, comp lit majors.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Not offered current academic year

RLFR 307  (F) Building Francophone Cities: Literature, Art and History  (DPE)
Cross-listings: COMP 308
Primary Cross-listing
Through literature, visual art, and urban history, this class will engage with the remarkable histories, presents and imagined futures of five Francophone cities: Casablanca (Morocco), Algiers (Algeria), Kinshasa (Democratic Republic of the Congo), Fort-de-France (Martinique) and Port-au-Prince (Haiti). We will learn about their colonial foundations and postcolonial transformations while paying attention to how these urban spaces and their people and histories are represented and imagined by poetry, novels, and visual art. (Conducted in French)

Requirements/Evaluation: Active participation, weekly 1-page response papers, midterm 5-page paper, final project (oral presentation and 8-page paper).
Prerequisites: RLFR 105 or above, or by permission of instructor
Enrollment Limit: 18
Enrollment Preferences: French majors or certificate students, Comp. Lit. majors
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 307(D1) COMP 308(D1)
Difference, Power, and Equity Notes: This course examines the French colonial history and postcolonial futures of five major Francophone cities and pays particular attention to questions of representation of class, race and gender in the historical, literary and visual record.

Not offered current academic year

RLFR 316 (F) Paris on Fire: Incendiary Voices from the City of Light (DPE)
Cross-listings: WGSS 315 / COMP 314
Primary Cross-listing

During the 1830s, Honoré de Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer." Similarly, writers from Victor Hugo to Émile Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been feted as the "City of Light" for its Enlightenment legacy, Eiffel Tower modernity, and luminous energy, captured in countless paintings, photographs, and film. However, Paris is also the site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repeatedly sparked with incendiary passion and political protest. As fires raged during the 2005 riots, many heard the echo of Hitler's 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty-first century? Following the 2015 terrorist attacks, many wondered yet again what the future would hold for the City of Light. To answer these questions, we will examine the social, political, and literary landscape of Paris during the nineteenth, twentieth, and twenty-first centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. Conducted in French.

Requirements/Evaluation: Active class participation, midterm exam, and two papers.
Prerequisites: Strong performance in RLFR 106, or another RLFR 200-level or 300-level course, or permission of the instructor.
Enrollment Limit: 16
Enrollment Preferences: French Majors and French Certificate students, Comparative Literature Majors.
Expected Class Size: 16
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 316(D1) WGSS 315(D2) COMP 314(D1)

Difference, Power, and Equity Notes: This course examines the operations of difference, power, and equity in French film and fiction, history and politics, art and culture, from 1830 to 2025. In readings, lectures, and discussions, we will look at how class, ethnicity, gender, and sexuality structure the lives and struggles of the working class and urban poor, women and men, migrants and immigrants. Students will learn critical tools to better understand and interrogate social inequity and injustice.

Fall 2024
SEM Section: 01 MW 11:00 am - 12:15 pm Brian Martin

RLFR 318 (F) Twentieth-Century French Novel: From Adversity to Modernity (DPE)
Cross-listings: COMP 318
Primary Cross-listing

In his futurist novel Paris in the Twentieth Century (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high-speed trains, televisions and skyscrapers, computers and the internet. But in Verne's vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor of bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopic vision, we will examine a broad range of twentieth-century novels and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France's engagement with race and
ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth-century France. Readings to include novels by Colette, Genet, Camus, Duras, Ernaux, Guibert, Begag. Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jelloun, Djébar. Films to include works by Fassbinder, Annaud, Lioret, Ducastel, Martineau, Téchiné, Charef. Conducted in French.

Requirements/Evaluation: Active class participation, two shorter papers, a midterm, and a longer final paper.

Prerequisites: A 200-level course (at Williams or abroad), or by placement test, or permission of the instructor.

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students, Comparative Literature majors, and those with compelling justification for admission. Seniors returning from Study Abroad (in France or other Francophone countries) are particularly welcome.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 318(D1) RLFR 318(D1)

Difference, Power, and Equity Notes: As the course description explains, this course focuses on a critical examination of difference, power, and equity in twentieth-century France. The course also employs critical tools to teach students how to examine the roles of race and ethnicity, gender and sexuality, colonialism and immigration, in the French novel's critical representation of war and disease, poverty and greed, urban isolation and cultural alienation during the twentieth-century.

Not offered current academic year

RLFR 320 (F) Transcending Boundaries: The Creation and Evolution of Creole Cultures (DPE)

Cross-listings: COMP 310 / GBST 306 / AFR 306

Primary Cross-listing

Born out of a history of resistance, Creole cultures transcend racial boundaries. This course provides a comprehensive framework for understanding the creation of Creole nations in various parts of the world. Beginning with an examination of the dark history of slavery and French colonialism, we will reflect upon the cultural transformation that took place when people speaking mutually unintelligible languages were brought together. We will then delve into the study of how deterritorialized peoples created their languages and cultures, distinct from the ones imposed by colonizing forces. As we journey from the past to the present, we will also explore how international events such as a worldwide pandemic, social justice, racism, and police brutality are currently affecting these islands. Potential readings will include prominent authors from different Creole-speaking islands, including Frantz Fanon and Aimé Césaire from Martinique, Maryse Condé from Guadeloupe, Ananda Devi from Mauritius and Jacques Roumain from Haiti. Conducted in French with introductions to different creoles.

Requirements/Evaluation: Active class participation, three papers (of 3-4 pages each), presentation, final research paper (7-8 pages)

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; Comparative Literature majors; Africana Studies students; Global Studies students; and those with compelling justification for admission

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 320(D1) COMP 310(D1) GBST 306(D2) AFR 306(D2)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because it examines the history of slavery as related to French colonialism in different parts of the world. It also considers International issues of social justice, racism and police brutality.

Not offered current academic year

RLFR 330 (S) Unveiling Herstory: Heroines of the Francophone Enlightenment (DPE)

On May 10, 2022, Paris unveiled the first statue of a black woman, Solitude, an emblematic figure of courage and resilience in the eighteenth-century
fight against slavery in Guadeloupe. Against the backdrop of the contemporary French movement wherein statues of Enlightenment thinkers like Diderot, Rousseau, and Voltaire have been vandalized and sparked intense debates on memory and politics, Solitude’s recognition adds a profound dimension. Once revered as iconoclastic and progressive these male figures have in recent years been scrutinized for perpetuating ideals associated with white male hegemony, challenging conventional notions of freedom and equality. This tutorial invites students to reevaluate the Enlightenment movement, navigating beyond traditional narratives centered around male figures like Voltaire and Rousseau. It explores the transformative era post-French Revolution, shining a spotlight on the exceptional contributions made by women who defied societal norms within the eighteenth-century francophone world. Adopting a global perspective, the course not only examines events in France but also delves into its former colonies, particularly Haiti and Guadeloupe. By scrutinizing literary and ethnographic texts, as well as visual imagery, the course unravels the stories of remarkable women like Charlotte Corday, a key influencer during the Reign of Terror, and Sanité Belair, an active participant in the Haitian Revolution. The overarching goal is to underscore the significant roles and contributions of these women, often marginalized in historical narratives. Moreover, the course addresses the impact of archival gaps, shedding light on how the destruction of judicial archives by the French in their former colonies has shaped the remembrance of figures like Solitude and Belair.

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course examines the history of slavery and French colonialism. It also explores issues of female empowerment, racism, social justice and equity.

RLFR 360 (F) Repairing a Broken World: Intro to North African Contemporary Art (DPE)

Cross-listings: ARTH 460 / ARTH 560 / ARAB 360 / COMP 361

Primary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Conducted in French.

Requirements/Evaluation: For undergrads: Active participation, 8 1-page response papers, 5-page mid-term paper, 10-12 page final paper and presentation. For grad students: Active participation, 8 response papers, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 2 spots will be offered to Grad Art students.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 378 (S) *Proust's "In Search of Lost Time"

**Cross-listings:** ENGL 378 / COMP 378

**Secondary Cross-listing**

In this seminar we will study Marcel Proust's novel-sequence *In Search of Lost Time*, widely regarded as one of the most transformative works of 20th-century fiction. The first-person narrative chronicling the life of a fictional figure bearing a close relationship to Proust himself spans several decades from the late 19th to the early 20th century, centering on French high society as it enters the modern world, shaped by historical events such as the Dreyfus Affair and the First World War. Proust's exploration of the consciousness of the protagonist, an aspiring writer, has led readers to see him as a philosopher of aesthetics, of the psyche, of time and memory, and of the nature of desire. His narrative ranges from meditations on such subjects to social satire to absorbing and sometimes soap opera-like plots exploring upward and downward social mobility and a wide array of sexual entanglements, straight and queer. Through his fluent prose, Proust renders the vicissitudes of desire, loss, and joy, of betrayal and emotional intransigence, and tests the power of memory and the imagination to recapture the past. Because of the length of *In Search of Lost Time*, the emphasis of the course will be more on reading (about 7 to 7½ hours per week) and less on writing (four or five 1½-page journal entries and a final paper of 8-10 pages) than the average 300-level course; and approximately one-third of the sequence will be bracketed as optional reading.

**Requirements/Evaluation:** Regular class participation, several 2-page journal entries, and a final paper of 8-10 pages

**Prerequisites:** a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 22

**Enrollment Preferences:** English, French, and Comparative Literature majors

**Expected Class Size:** 16-18

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

Not offered current academic year

RLFR 412 (S) *Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers* (DPE)

**Cross-listings:** WGSS 408 / COMP 412

**Primary Cross-listing**

In 1834, Honoré de Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the miserable housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social climber Julien Sorel, the ambitious undergraduate Eugène de Rastignac, and the domestically abused Gervaise Macquart became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. As recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.

**Requirements/Evaluation:** Active class participation, midterm exam, and two papers.

**Prerequisites:** A 200-level or 300-level RLFR course at Williams, or Advanced coursework during Study Abroad in France or the Francophone World,
This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 408(D2) RLFR 412(D1) COMP 412(D1)

Difference, Power, and Equity Notes: This course analyzes difference, power, and equity through its examination of gender diversity, institutional misogyny, urban criminality, human sexuality, social injustice, and revolutionary struggle in nineteenth-century France. In class discussions and critical essays on 1830s-1880s France, students will examine and articulate the inequities and injustices between women and men, the privileged and oppressed, the wealthy and working class, and both the rural and urban poor.

Spring 2025
SEM Section: 01    TR 11:20 am - 12:35 pm     Brian  Martin

RLFR 414  (S) Senior Seminar: Coming of Age: French and Francophone Childhood and Adolescent Film  (DPE)

Cross-listings: COMP 414

Primary Cross-listing

Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination, class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We will watch seminal films by Euzhan Palcy, the Dardennes brothers, Céline Sciamma, Férid Boughédir, François Truffaut, Faiza Ambah, and Raoul Peck.

Requirements/Evaluation: three three-page response papers; thesis statement, methodology, and works cited list on one page; 2 low-stakes presentations and one script of a video essay or academic journal "special issue" essay

Prerequisites: 200-level RLFR courses

Enrollment Limit: 19

Enrollment Preferences: French and Comparative Literature majors and certificate students

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 414(D1) COMP 414(D1)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because the films we focus on racial inequality, class, gender, sexual identity, post slavery society in the Caribbean, lack of social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking.

Not offered current academic year

RLFR 415  (S) Breaking the Silence: Women Voices, Empowerment and Equality in the Francophone World  (DPE)

Cross-listings: WGSS 415 / COMP 415

Primary Cross-listing

How have Francophone women challenged the historical and current effects of colonialism and gendered racism in France and the Francophone world? How have Francophone women writers challenged the status quo of patriarchy and advocated for change? Beginning with political activist Olympe de Gouges, who published Le droit de la femme et de la citoyenne (1791) challenging gender inequality in France, we will then examine Claire
de Duras' portrayal of the intersection between race and gender, Simone de Beauvoir's challenge to traditional femininity and gender roles, and Ananda Devi's intimate portrayal of violence against women in post-colonial societies. Throughout the course, we will use a feminist and intersectional lens to analyze how Francophone women writers have broken the silence then and now.

**Requirements/Evaluation:** Three 3-4-page response papers, a final 10-page research paper, presentation and active participation.

**Prerequisites:** Any 200-level RLFR course, or by permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** Senior French majors and students completing the certificate in French, but open to advanced students of French; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 415(D2) COMP 415(D1) RLFR 415(D1)

**Difference, Power, and Equity Notes:** In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity. This course uses a feminist and intersectional lens to analyze how French and Francophone women writers have challenged the historical and current effects of colonialism and gendered racism.

Winter Study ---------------------------------------------------------------

RLFR 30  (W) Honors Essay: French
To be taken by candidates for honors other than by thesis route.
Class Format: honors essay
Grading: pass/fail only
Not offered current academic year

RLFR 31  (W) Senior Thesis: French
To be taken by students registered for French 493-494.
Class Format: thesis
Grading: pass/fail only
Not offered current academic year

RLFR 88  (W) French Sustaining Program
Students registered for RLFR 101-102 are required to attend and pass the French Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program; check your class schedule to confirm enrollment.
Grading: pass/fail option only
Not offered current academic year

RLFR 99  (W) Independent Study: French
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
The study of Italian in the target language encourages students to gain a deep appreciation of the language, culture and literature through active participation and meaningful experience with the culture on its own terms. Italian courses at Williams are therefore conducted exclusively in Italian in order to enhance and reinforce the emotive and cognitive involvement of the students as they are introduced to the Italian world-view in a lively and natural manner. Students desirous of more contact with Italian are encouraged to attend the weekly Italian Table in the designated college dining hall. More information can be found at cflc.williams.edu/italian.

**RLIT 101  (F)  Elementary Italian**

This course is designed for beginners. Its goal is to allow students to develop basic oral/listening and reading/writing proficiency in Italian. During the semester, students will be trained in grammar, pronunciation, listening-oral skills, reading, and writing in Italian by studying various communication settings and real-life situations. The class is conducted entirely in Italian.

**Class Format:** five hours a week with the professor

**Requirements/Evaluation:** participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

**Prerequisites:** none; not open to those who have had one year or more of high school Italian

**Enrollment Limit:** 20

**Enrollment Preferences:** instructor will prioritize on the basis of study abroad plans and year at Williams

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** students registered for RLIT 101-102 are required to attend and pass the sustaining program during Winter Study; credit granted only if both semesters (RLIT 101 and 102) are taken

**Distributions:** (D1)

---

**RLIT 102  (S)  Elementary Italian**

This course is designed for beginners who already have some basic knowledge of Italian. Its goal is for students to review and expand their oral/listening and reading/writing proficiency in Italian. During the semester, students will continue to learn Italian grammar, vocabulary, and pronunciation while improving listening-oral skills, reading, and writing in Italian. The class is conducted entirely in Italian.

**Requirements/Evaluation:** participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

**Prerequisites:** RLIT 101 and the Winter Study sustaining program; not open to those who have had one year or more of high school Italian

**Enrollment Limit:** 20

**Enrollment Preferences:** instructor will prioritize on the basis of study abroad plans and year at Williams

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken

**Distributions:** (D1)
**RLIT 103 (F) History of Italy in Movies**

The course aims primarily to enhance the student's speaking, reading, and writing abilities while introducing the history of Italy and its rich cinematic culture. Students will review and expand the previous semesters' grammar structures to achieve a higher level of fluency and sophistication in language production. The class is intended as a continuation of Italian 101 and 102, but welcomes study-abroad returnees and students who have an intermediate level of Italian. **The class is conducted entirely in Italian.**

**Requirements/Evaluation:** oral presentations, midterm exams, tests, compositions, participation, final project

**Prerequisites:** RLIT 101/102 or by permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Students from 101/102 classes, as well as study-abroad returnees

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Fall 2024

**SEM Section: 01    M-F 9:00 am - 9:50 am     Mario Sassi**

**RLIT 105 (F) Pathway to Proficiency**

The course aims primarily to enhance the student's speaking, reading, and writing ability while introducing the formal study of Italian culture and society by analyzing short literary texts, articles, films, shows, and podcasts. In addition, students will review and expand the previous semesters' grammar structures to achieve a higher level of fluency and sophistication in language production. Italian 105 is intended for study-abroad returnees and other advanced speakers; students who have been particularly successful in Italian 101-102 are also encouraged to enroll. **The class is conducted entirely in Italian.**

**Requirements/Evaluation:** oral presentations, midterm and final exams, tests, compositions, participation

**Prerequisites:** RLIT 101/102 or by permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Students from 101/102 classes, as well as study-abroad returnees.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Not offered current academic year**

**Winter Study ---------------------------------**

**RLIT 88 (W) Italian Sustaining Program**

Students registered for RLIT 101-102 are required to attend and pass the Italian Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program, check your class schedule to confirm enrollment.

**Grading:** pass/fail option only

**Not offered current academic year**

**RLIT 99 (W) Independent Study: Italian**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is
approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

*Not offered current academic year*
THE MAJOR IN SPANISH

Students who major in Spanish can expect to acquire linguistic fluency along with in-depth knowledge of the cultures of Spain and Latin America. Through the study of the major writers and historical events of the Spanish-speaking world, our program offers training in literary analysis and linguistic expression, as well as a deep appreciation of Hispanic civilizations.

The major consists of nine courses above the 102 level. In exceptional circumstances, the Department may decide to accept RLSP 101-102 for the Spanish major. One of the nine courses must be the 400-level senior seminar taken during the student's final year at the College; another must be a course that substantially focuses on literature or cultural texts produced before 1800. Students entering at the 200-level may, with the permission of the Department, choose as part of their major program one course not conducted in Spanish but offered by faculty in Romance Languages or another Department or Program, such as Latino/a Studies, Comparative Literature, History, etc., provided that the subject matter relate to and broaden their study of Spanish. Students entering at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program. Working with a member of the Spanish faculty, the student will formulate a curricular plan that will ensure balance and coherence in courses taken prior to declaring a major in Spanish. This is especially imperative for students who are planning to spend a part or all of their junior year in Latin America or Spain.

THE DEGREE WITH HONORS IN SPANISH

Students majoring in Spanish may apply to be admitted to the Honors Program in Spanish upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal. Two routes are available to those who wish to apply for the degree with honors.

The first of these involves the writing of a senior thesis.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader).

This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and reading.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in Spanish and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in Spanish. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

The second route is a group of three clearly related courses (offered by the Department of Romance Languages or by other departments, such as History, Art, Philosophy, English, etc.), only one of which may be counted in the nine courses comprising the major. One of the courses will be an Independent Study (plus senior year WSP 30) in the spring of the senior year, at the end of which the student will write an essay that synthesizes the
content of the three related courses. Students may apply for this route by November 2 of the senior year.

In the case of both routes to the degree with honors, the department’s recommendation for graduation with honors will be based on the originality and thoroughness of the finished project.

THE CERTIFICATE IN SPANISH

The Certificate in Spanish Language and Culture consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher. Those so interested should express their intent to the chair of the department by March 1 or earlier.

For students with no prior Spanish background, the course sequence will consist of Spanish 101-102, Spanish 103 and 104, and three courses in Spanish above the 104 level, with at least one of these courses at the 200-level or higher taken at Williams. If the student starts out the sequence at Spanish 103, in addition to the three courses in Spanish beyond the 104 level (including a 200-level course or higher), two electives may be taken in other departments. One elective should be in Spanish or Latin-American cultural history (art, literature, drama, music) and the other in Spanish or Latin-American intellectual, political, or social history. Spanish 200, 201, or 208 can be counted for the elective requirement.

Electives may be considered from a variety of departments and programs. However, students should consult with the chair of Romance Languages before making any enrollment decisions.

PLACEMENT

Students come to study Spanish at Williams with a wide range of backgrounds and prior experiences. Some will have studied Spanish for many years in high school and earlier. Others will have grown up speaking Spanish with family and friends but had little opportunity to study the language at school. Others have lived in Spanish-speaking countries or otherwise studied in immersive contexts. And for others, Spanish is a brand-new language that they are eager to begin learning.

Whatever your previous experience with Spanish, ¡Bienvenida! ¡Bienvenido! We are glad to have you with us. In order to figure out the most appropriate point of entry, we ask that all students who wish to begin their study of Spanish in the new academic year take the department's placement exam when it is offered during First Days. The only students who don't need to take the placement exam are those who qualify as “true beginners,” those with no previous experience of Spanish and for whom 101-102 is obviously the right choice. Everyone else should take the placement test. After you do, the Registrar's Office will notify you of the level and/or course the Spanish faculty have recommended for you. You should free to reach out to the department chair, your recommended instructor, or any other faculty member if you have questions or concerns about your placement.

STUDY ABROAD

Spanish majors, as well as non-majors interested in further exposure to the language and the culture, are strongly encouraged to study in Spain or Latin America for either a semester or a full year. We recommend that you start planning for study abroad as early as possible, and that you speak to our faculty early on to go over the many possible destinations and programs available to you. In recent years, Williams students have studied in such varied and far-flung locations as Buenos Aires, Havana, Lima, Barcelona, and Madrid. Those who are interested in Madrid may wish to consider the Hamilton College program, with which we maintain consortial ties. Credit for up to four courses can be granted at the discretion of the Department for study overseas. Those four courses count towards the certificate or the major in Spanish. Students interested in study abroad should consult with a member of the department at their earliest convenience.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, provisional approval can be granted (students should be sure to contact the department for details).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments. If it is a program we are familiar with, the course title and description are enough. If it is a new program/new type of course we need all the available materials (syllabus, assignments, etc.).

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Four maximum.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. They have to be courses that focus on language, culture, history, or politics of the target language/culture.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Our Senior Seminars are required for the major.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study
away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

This hardly ever happens but could happen if a student doesn't seek out pre-approval from a faculty member.

RLSP 101  (F)  Elementary Spanish
This course focuses on grammar, elementary composition, practice in conversation, and reading of short, easy prose. It is taught by the intensive oral method.

Requirements/Evaluation:  Engaged daily participation, regular homework exercises, quizzes, a midterm, and a final exam. All students must take the Winter Study Sustaining program to continue to RLSP 102.

Prerequisites:  This course is for students who have no previous background in Spanish.

Enrollment Limit:  18

Enrollment Preferences:  This course is introductory. Students who have a background in Spanish should seek an alternate course. Preference will be given to those with potential interest in pursuing the certificate, major, and/or studying away in a Spanish speaking country.

Expected Class Size:  15

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)

Fall 2024

SEM Section: 01    M-F 10:00 am - 10:50 am     Soledad Fox

RLSP 102  (S)  Elementary Spanish
This course is a continuation of RLSP 101 and must be completed after also taking the Winter Study Sustaining Program to be eligible for credit. It focuses on grammar, elementary composition, practice in conversation, and reading of easy texts. It is taught by the intensive oral method.

Class Format:  The class meets five hours a week; students will complete workbook and lab exercises weekly.

Requirements/Evaluation:  Daily preparation and participation, regular assignments, frequent tests, a midterm and a final. At least two cultural activities per semester must be attended.

Prerequisites:  RLSP 101; this course is for students who have studied less than two years of Spanish in secondary school. Students must complete RLSP 101 as well as the Winter Study sustaining program to be eligible to enroll.

Enrollment Limit:  20

Enrollment Preferences:  Students enrolled in RLSP 101.

Expected Class Size:  20

Grading:  no pass/fail option,  no fifth course option

Unit Notes:  Students in RLSP 101-102 are required to attend and pass the sustaining program during the winter study period.

Distributions:  (D1)

Spring 2025

SEM Section: 01    M-F 10:00 am - 10:50 am     Leyla Rouhi

RLSP 103  (F)  Intensive Intermediate Spanish
RLSP 103  (F)  Intensive Intermediate Spanish. This course is a continuation of Spanish 101-102. It is designed to help students improve their proficiency in each of the major skill-groups (listening, speaking, reading and writing) while providing an introduction to the cultures of the Spanish-speaking world. Classroom activities and homework are designed to increase vocabulary and improve your ability to handle daily life in a
Spanish-speaking country, to express your views on complex subjects such as art and politics, and to increase your knowledge of the cultural traditions of Latin America and Spain. Film screenings and readings in Hispanic literature, culture and politics will provide material for in-class discussion and some writing assignments. This course provides the linguistic and cultural training that is necessary to engage the diverse Spanish-speaking communities of Latin America, Spain and the US; it will help to prepare students for further literary and cultural studies as well as provide skills that are increasingly essential in fields such as medicine, law, and education. Conducted in Spanish.

Class Format: Class meets four hours a week: three times with the professor (either in the morning or at noon) and one time in the afternoon with the TA.

Requirements/Evaluation: Regular attendance and active in-class participation, workbook exercises and weekly compositions, quizzes, midterm and final exams.

Prerequisites: RLSP 101-102 or by Spanish placement exam

Enrollment Limit: 20

Enrollment Preferences: If the course is over-subscribed, priority will be given to first-year students and others with a demonstrable commitment to study of Spanish.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

RLSP 104 (S) Intensive Intermediate Spanish, Upper Level

This course is a continuation of Spanish 103. During the spring semester we resume our work to expand your proficiency in each of the major skill-groups (listening, speaking, reading and writing) while increasing familiarity with the vibrant cultures of the Spanish-speaking world. Students in both sections of RLSP 104 can once again expect to sample a variety of written and audiovisual media--poems and short fiction, essays, journalism, blogs and film--to deepen their understanding of Hispanic cultures. However, Section 2 will have a more distinct focus on cinema: we will watch a series of classic and contemporary films and develop the specialized vocabulary and skills needed to analyze them in class discussions and student writing. Regardless of which section you are in, students in Spanish 104 can expect to write regularly and to meet with their professor, teaching associate and classmates in varying combinations for four hours each week. This course is designed to prepare students for further literary and cultural studies in Spanish--including the challenges of study abroad--and to hone communication skills that are increasingly essential in professional fields such as medicine, law, and education. Conducted in Spanish. Más and its accompanying Cuaderno de Práctica will serve as our primary texts. Conducted in Spanish. For students who have not taken Spanish 103 at Williams, the departmental placement exam is required for enrollment in this course.

Class Format: Seminar. Students will spend 4 hours per week in class in engagement with their Professor, Teaching Associate (TA), and classmates. In addition to the regular MWF classes with their Professor, students will meet for one additional hour per week with the TA. As will be explained in the course syllabus and at the first class meeting, this additional hour with the TA will take place at a time (to be decided during the first weeks of class) that is mutually beneficial for the TA and students.

Requirements/Evaluation: Weekly 1- to 2-page compositions, daily homework and class participation, oral reports, midterm exams and a final exam.

Prerequisites: RLSP 103 or by Spanish placement exam or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: If the course is over-subscribed, priority will be given to first-year students and others with a demonstrable commitment to study of Spanish.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)
RLSP 105 (F) Advanced Grammar, Composition, Conversation

In this course students will refine their knowledge of Spanish grammar and vocabulary towards further fluency in speaking and writing. The focus of the class is grammar through active engagement with grammar exercises as well as relevant cultural materials. The section that meets at 9 a.m. will have a focus on Latin American poetry, and the section that meets at noon will focus on the politics and culture of contemporary Spain. Students will produce regular grammar and composition exercises as well as oral reports. They will also meet with the Teaching Associate, in smaller groups, weekly.

Class Format: students must participate in TA sessions once a week.

Requirements/Evaluation: regular grammar and composition assignments, a mid-term, occasional quizzes, oral reports; active participation and regular attendance required.

Prerequisites: RLSP 104, or results of the Williams College Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: first-year students, potential majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2024

RLSP 106 (S) Advanced Grammar and Composition through Literature (WS)

This course is designed for advanced students who wish to further polish and refine their grammatical, lexical, and writing skills in Spanish. The course may be taken immediately after 104, by placement exam results, or even after students have begun to sample the Department's literature and culture offerings at the 200- and 300-level. Classic works of short fiction by celebrated Latin American authors such as Gabriel García Márquez and Julio Cortázar will be discussed; selected Latin American films will be viewed as well. For written and oral assignments: weekly essays, in-class presentations, and language-laboratory activities. Conducted in Spanish.

Requirements/Evaluation: A weekly essay based on the stories read in class. Written lab exercises. Participation in the grammatical and literary discussions. Oral presentations, quizzes, a mid-term exam, and a final exam

Prerequisites: RLSP 104, any course 201+, placement exam or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: In the event of over-enrollment, preference will be given to sophomores.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Weekly essays, corrected for both language and content. Constant feedback from instructor. Students will be required to revise and rewrite their graded essays.

RLSP 201 (F) The Spanish Labyrinth

How can you learn to separate the stereotypical images of Spain from its current reality? How can we talk about one “Spain” when the country is a complex composite of ancient and diverse cultural remnants mixed with recent influxes of immigrants, and separatist movements? How has the vulnerable peninsula survived centuries of violent upheavals and divisiveness; dramatic economic rises and collapses? How have recent events and political tensions affected Spain’s health system, demographics, and economy? This course aims to offer students a strong foundation in Spanish issues, whether they have already spent time abroad, or hope to do so in the future. In this course we will approach Spain by studying examples of its literary and artistic production, from periods of brilliant cultural exchange, and times of censorship, repression, and crisis. Some topics of focus will be the Inquisition, the Civil War, contemporary Spain’s obsession with its own recent past, and its uncertain future. Secondary texts will also be provided for historical and socio-political background and reference. Conducted in Spanish. We will also use films and music.

Requirements/Evaluation: Conducted entirely in Spanish. Evaluation will be based on active daily participation and attendance, oral presentations, 2 short papers and a final research project.

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Spanish majors, certificate candidates, and anyone who has studied away in Spain or plans to.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

RLSP 202 (S) Introduction to the Analysis of Literature in Spanish (WS)

This course is intended for students who are considering a major in Spanish, including those who have recently completed RLSP 105, 107, 200, 201 or 209. Using a textbook, *Aproximaciones al estudio de la literatura hispánica*, we will study the fundamentals of genre analysis while reading selected works of prose, poetry, and drama from Latin America and Spain. In addition to studying the principles and techniques of literary analysis, this course will continue to develop your speaking, writing, and reading comprehension skills with a particular emphasis on composition. Conducted in Spanish.

Class Format: Students are expected to be active participants at all scheduled class meetings, which will be used for discussion and collaborative analysis of literary texts as well as workshopping student writing.

Requirements/Evaluation: Graded assignments will include three essays of five pages each as well as consistent preparation and class participation.

Prerequisites: RLSP 105, 107, 200, 209, or placement exam results indicating readiness for a 200-level course

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students who are considering the major in Spanish

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Each student will write and revise three essays of roughly give pages each. Feedback will be provided regarding grammar, style, and argument. On Fridays we will workshop student papers.

Spring 2025

---

RLSP 203 (F) From Modernismo to El Boom de la Novela

A survey of some of the leading imaginative writers of Ibero America. Readings will begin with the modernista poets and go on to include fiction of Mexico by Rulfo, a wide sampling of verse by Pablo Neruda, and narratives of the “Boom” period by authors such as Borges, Cortázar, Lispector, and García Márquez. Conducted in Spanish.

Requirements/Evaluation: Response journals, three 6- to 8-page papers, a mid-term and final exam, and class participation.
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Seniors, juniors, and then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

---

**RLSP 205 (S) Magical Realists, Fantasists, Experimentalists: The Latin-American Novel in Translation** (DPE)

**Cross-listings:** COMP 205

**Primary Cross-listing**

A course specifically designed to enable students who have no knowledge of Spanish to read and discover those Latin-American authors who, in the twentieth century and after, have attracted world-wide attention. Among the texts to be discussed: Borges, Labyrinths; Cortázar, Blow-up and Hopscotch; Lispector, the Hour of the Star; lesser works by Fuentes and Puig; and by Nobel Prize-winner Gabriel García Márquez, One Hundred Years of Solitude. Conducted in English

**Requirements/Evaluation:** class participation, two brief papers, a midterm, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 22

**Enrollment Preferences:** Latina/o Studies concentrators, Comp Lit majors

**Expected Class Size:** 22

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** does not carry credit for the Spanish major or the certificate

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 205(D1) RLSP 205(D1)

**Difference, Power, and Equity Notes:** This course offers students an opportunity to read some major works of fiction that have challenged the canon of European and American literature. Through the readings, class members will understand that great literature comes not only from London or Paris, from the U.S. or Russia. Several of these novels, moreover, directly challenge European and Western cultural hegemony and make an implicit claim for the legitimacy of Latin American cultural concerns.

**Attributes:** GBST Latin American Studies

---

**RLSP 206 (S) Latin-American Civilizations**

An introduction to the multiple elements constituting Latin-American culture. Class assignments include readings from selected Latin-American essayists and screenings of classic films. Particular focus on the conflict between local and foreign cultural traditions. Areas to be considered: Spanish Catholicism, the influence of European liberalism and U.S. expansion, the Indian and African contribution, and the cultural impact of social revolution in Mexico and Cuba. Conducted in Spanish.

**Requirements/Evaluation:** two essays on assigned topics, response journals, one oral presentation, active discussion of the ideas and the facts presented in class, a midterm, and a final

**Prerequisites:** RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

**Enrollment Limit:** 12
Enrollment Preferences: Juniors, sophomores, first-years.
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

RLSP 209 (F) Spanish for Heritage Speakers
Cross-listings: LATS 209
Primary Cross-listing
This course is intended for students of Latino/a heritage. It will address the unique needs of students whose knowledge of Spanish comes primarily from informal and family situations rather than a conventional classroom experience. The goal of the course is to build on and expand students' existing knowledge of Spanish while developing skills for using the language in more formal/academic contexts. Conducted in Spanish.

Requirements/Evaluation: homework, class participation, and a series of communicative projects
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Potential Spanish majors/certificate students and LATS concentrators
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 210 (S) Graphic Novels, Spain, and Economic Crisis
The massive economic crisis that began in 2007 affected all areas of life in Spain, among other things, led to the rise of several social movements and critiques of neoliberalism. In this class we will study graphic novels -- a booming medium in contemporary Spain -- along with other mediums such as literature and film to see how they reflect this key moment in Spanish society. We will consider the ways in which these novels represent new social movements as well as effects of the crisis that continue to this day. In the process, we will not only gain a better understanding of contemporary Spain, but also unpack the characteristics of visual storytelling. Readings may include Miguel Brieva's Lo que me está pasando, Manel Fontdevila's ¡No os indignéis tanto!, and Isaac Rosa's & Cristina Bueno's Aquí vivió: Historia de un desahucio.

Requirements/Evaluation: Conducted entirely in Spanish. Evaluation will be based on active participation and attendance, one group presentation, four take-home essay quizzes, and one final project (12-15 pages).
Prerequisites: Spanish 105 or 106, or results of the College Placement Exam, or permission of instructor.
Enrollment Limit: 20
Enrollment Preferences: Spanish majors and certificate students.
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)
Not offered current academic year

RLSP 217 (S) Love and marriage in Medieval and Early Modern Spain
We are often told that love is a natural human feeling and marriage its happiest consequence. But these two conditions are constructed and depend on society’s dominant values. In this class we focus on pre-modern Spain to study the principles and fears that create definitions of love and marriage, also with a view to how some of these have survived to this day in our own communities. Our theoretical frames will come from the medieval and early modern periods, but also from contemporary definitions and critiques. Primary sources will include lyrical traditions, the writings of King Alfonso X, the works of Santa Teresa de Ávila, San Juan de la Cruz, Lope de Vega, Tirso de Molina, Pedro Calderón de la Barca, Miguel de Cervantes, among others.

Requirements/Evaluation: Active and meaningful participation, short assignments, one final project.
Prerequisites: RLSP 105 or 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 22
Enrollment Preferences: Spanish and Comparative Literature majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

Not offered current academic year

RLSP 219 (F) Latin American Diasporic Cultures: The Venezuelan Case

The history of Latin America cannot be fully understood without the study of the mass migrations that have taken place to and from the region throughout the 20th and 21st centuries. These displacements differ in nature, do not share a single origin, route, or destination. They primarily stem from complex political conflicts (racial, gender, sexual, economic, climatic) and have left a definitive mark on the hemispheric cultural imagination. This course aims to study the narratives surrounding migration and migrants in Latin America. What are the geographies of displacement? Is the Chihuahuan Desert or the Darien Gap a wall? Is the Caribbean Sea a border? What happens to the narrative when it emerges under the sign of exile? How does the figure of the migrant destabilize notions of law, nation, and personhood? How is the migrant body constituted, and how do literature, cinema, visual arts, or performance portray it? We will conduct a panoramic analysis of cultural materials and critical interventions produced throughout the continent regarding the figure of the migrant, arriving at the current Venezuelan diaspora—comprising more than seven million people—and its aesthetic, ethical, and political resonances. Primary materials include texts by Reinaldo Arenas, Virgilio Piñera, Manuel Ramos Otero, Valeria Luiselli, Sonia Nazario, Juan Pablo Villalobos, Balam Rodrigo, Adalber Salas Hernández, and Gina Saraceni, as well as works by visual artists José Rafael Perozo and Gerardo Rosales, films by Mariana Rondón and Diego Quemada-Diez, among others. Conducted in Spanish, the course will also have a public orientation, with some activities open to the wider university community.

Requirements/Evaluation: Evaluation is based on active participation, several short compositions, a conference paper, and a final project.
Prerequisites: RLSP 105 or higher; or results of the College Placement Test; or permission of instructor.
Enrollment Limit: 20
Enrollment Preferences: Spanish majors and certificate candidates; comp lit majors with a focus on Spanish.
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

Fall 2024

RLSP 220 (S) Women on the Verge

Cross-listings: WGSS 222

Primary Cross-listing

From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films, newspapers and other media, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, the transition to democracy, and the present day.
RLSP 220  (D1)  WGSS 222(D2)

**Spring 2025**

SEM Section: 01  MWF 12:00 pm - 12:50 pm  Leyla Rouhi

**RLSP 259  Violent States, Violent Subjects: Nation-Building and War in 19th Century Latin America**  (DPE) (WS)

Although the massive, mechanized wars of the 20th century often overshadow earlier conflicts, the 19th century was also a period of widespread bloodshed in Latin America. First, of course, came the carnage of the Independence Wars, which was followed by decades of civil war (Mexico, Argentina, Peru, Uruguay, Colombia, Venezuela) and two bitter international wars—the Paraguayan War (1864-1870) and the Pacific War (1879-1883)—each of which would have a lasting impact on the countries involved. The restoration of peace brought economic development and new opportunities for dominant groups, but also the return of some of the most violent practices of the colonial period: indigenous peoples were conquered, their lands settled by whites or used for grazing cattle, and blacks (often despite the official abolition of slavery) met with new forms of exclusion, exploitation, and physical violence. In this tutorial we will explore the literary links between some of the violent conflicts listed above and the foundation of national identities in Latin America, reading texts that probe the social and ethical implications of State-sponsored violence. Issues to be explored include militarism and the development of nationalism; genocide and the national community; torture, truth and testimony; and the notion of 'civilization.' We will read one or two key precursors and a variety of 19th century texts that may include works by Juan Francisco Manzano, Esteban Echeverría, Ricardo Palma, Rosa Guerra, Dorotea Duprat de Lassere and Juan Crisóstomo Centurión, and Lucio V. Mansilla. In addition, we will read a few contemporary texts, written in the aftermath of the late-20th century dictatorships in the Southern Cone, that actively reflect on the long history of State-sponsored violence in Latin America (Ricardo Piglia, Diamela Eltit, Augusto Roa Bastos). Students will work in trios throughout the semester, each group meeting with the instructor once a week. Each week one of the students will present a 5-page paper on the assigned reading and one will be designated the official respondent, whose job is to lead a discussion of the paper. The third member of the group will turn in a revision of the previous week's paper. Prerequisites: one 200-level RLSP course or permission of instructor. Heritage learners, international students and second-language learners are all heartily welcome. Conducted in Spanish.

**Class Format:** Conducted in Spanish.

**Requirements/Evaluation:** Each student will write and revise a minimum of three five-page papers during the course of the semester. Students will be evaluated on the basis of their preparation for each tutorial meeting as evidenced by the quality and frequency of their engagement with the material, including their classmates’ written work. Essays will be graded after they have been revised and submitted to the professor.

**Prerequisites:** Any 200-level Spanish course.

**Enrollment Limit:** 12

**Enrollment Preferences:** Priority given to Spanish majors.

**Expected Class Size:** 12

**Grading:**

**Distributions:** (D1)  (DPE) (WS)

**Writing Skills Notes:** Students will practice writing throughout the semester, and will receive abundant feedback on their written work from their tutorial partners and the instructor. We are altering the tutorial format from the standard duos to trios of students, so that students will have ample opportunity to revise their written work.

**Difference, Power, and Equity Notes:** This course focuses on issues of diversity, power and privilege within the internal and regional constitution of Latin American countries. We will read with an awareness of some of the ways that differences of race, class, nationality and gender may be mobilized in times of conflict, and consider how the collective narratives that are constructed and imposed in the aftermath tend deal with those conflicts.

**Attributes:** GBST Latin American Studies

Not offered current academic year

**RLSP 301  (S)  Cervantes’ “Don Quijote”**
We will devote the semester to the study of one novel: Miguel de Cervantes’ *Don Quijote*, published in the early part of the 17th century. We will try to understand the reasons for the novel’s immense and ongoing influence. We will study Cervantes’ handling of issues that continue to have relevance to our lives today: relationships, the role of fiction in life, the shapes of mental illness, how we show people who we think we are, how our governments, families and friends decide who we are, the fun and annoyance of going on a road trip with someone, the meaning of justice, and the meaning of storytelling, to name a few. In the process, we will set things in context to understand what was going on in Cervantes’ world. Finally, we will find that even an entire semester was not enough to engage fully with this extraordinary work. *Conducted in English using a contemporary translation.*

**Class Format:** lecture/discussion

**Requirements/Evaluation:** active class participation; two to three short projects and one final research project

**Prerequisites:** any 200-level RLSP or Comp Lit or English course at Williams

**Enrollment Limit:** 20

**Enrollment Preferences:** Spanish majors and Comp Lit majors and Engl majors.

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

**RLSP 304 (S) Environmental Literature and Film in Latin America** (DPE) (WS)

**Cross-listings:** ENVI 311 / COMP 311

**Primary Cross-listing**

What use are aesthetics when the world is (literally) on fire? We will take up this question and others in a critical engagement with Latin American cultural production of the twentieth and twentieth centuries, especially works of literature and film that directly or indirectly engage with environmental crisis. Students can expect to explore a variety of media, forms and genres, including works that range from (more or less) mainstream to cutting edge. Our examinations of literature and film will be supported by theoretical writings produced in the Americas and other places. Writers and directors whose work may be considered include, but are not limited to: Lucrecia Martel, Ciro Guerra, Rafael Barrett, Samanta Schweblin, Ernesto Cardenal, Juan Ruflo, María Luisa Bombal, Eduardo Gudynas, Silvia Rivera Cusicanqui, Eduardo Viveiros de Castro, Isabelle Stengers.

**Requirements/Evaluation:** This course will be conducted seminar-style. Students will be expected to prepare thoroughly and be active, engaged participants in class discussions. In addition to day to day preparation and participation, other graded assignments will include discussion-leading, one short (5-7 page) essay and a longer (15-20 page) paper combining research and original analysis.

**Prerequisites:** One college literature of film course at the 200-level or above.

**Enrollment Limit:** 19

**Enrollment Preferences:** Envi majors and concentrators, Comp Lit majors, Spanish majors and those working towards the Spanish certificate.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 311(D1) RLSP 304(D1) COMP 311(D1)

**Writing Skills Notes:** All students in the course will write (and rewrite) no less than 20 pages. Major writing assignments will be scaffolded, with explicit discussion of the writing process (pre-writing, drafting, revision) and consultation.

**Difference, Power, and Equity Notes:** The works of literature and film that we will be examining challenge North American conceptions of climate change (and environmental crisis more broadly) by making visible (often uncomfortably so) the colonial and neocolonial history of extractivism.

**Attributes:** ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

**RLSP 311 (F) The Politics of Love in Latin American Literature** (DPE) (WS)

Cynical, sincere, confused and confusing, love and politics have a lot of complicated history together in Latin America. This course considers works of literature and other cultural texts in which love and politics are explicitly intertwined: the authors, artists and activists we consider profess love for their
followers and would-be converts, represent love as a (revolutionary) political force, contest the legitimacy of patriarchal heteronormativity, and sometimes all three. We will consider writings by 20th and 21st century political leaders whose speeches and other writings convey the melodrama of radionovelas (Eva Perón) as well as the sacrificial love of the guerrillero (José Martí, Che Guevara) and the anarchist (Rafael Barrett). We may also consider the love professed by historical figures including Catholic missionaries (Antonio Ruiz de Rivera) and 19th century abolitionists (Mármol, Sarmiento). We may examine tensions around the domestication of love in writings in translation by Brazil’s Clarice Lispector and the torment of eros in Elena Garro’s political novel Memories of the Future. We will likely read poems of grief and love for those murdered in the secret detention centers of the Southern Cone dictatorships (Raúl Zurita, Juan Gelman). We will delve into the politics of queer love, solidarity and mourning with authors such as Mario Puig, Reinaldo Arenas, and Cristina Peri Rossi, and in Sebastián Leilo’s 2017 film, A Fantastic Woman. We will conclude by considering the politics of love as articulated by Black Lives Matter, particularly as the movement has taken shape in Latin American countries, and its impact in Colombia and elsewhere. Conducted in Spanish.

**Requirements/Evaluation:** Regular preparation for class is required, as is thoughtful participation in class discussions. Students will be evaluated for both. Students will also be evaluated for discussion-leading and making presentations on their original research in progress. There will be two graded essays, one of 5-7 pages and the other 15-20.

**Prerequisites:** One RLSP course at the 200 level.

**Enrollment Limit:** 19

**Enrollment Preferences:** Students majoring or completing a certificate in Spanish.

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Students will be writing and rewriting roughly twenty pages. Longer assignments will be broken down into stages (proposal, bibliography, research, analysis, draft, revision) with feedback from the instructor at every stage.

**Difference, Power, and Equity Notes:** Using literary texts, we will delve into the ways a wide variety of political actors -- from the mainstream to the radical fringe -- talk about love in Latin American contexts. Some of them will seem comparatively cynical, but in other cases we will be looking at how people contest the hegemony of patriarchal, capitalistic and heteronormative definitions of what "counts" as true love.

**Not offered current academic year**

**RLSP 319 (F) Dictatorship and the Latin-American Novel (DPE)**

Military dictatorship is among the most crucial factors in Latin-American society and history, and some of the continent’s leading novelists have taken it upon themselves to depict the experience in their work. In this course we will examine both the fact of dictatorship itself and the diverse representation thereof in Spanish-American fiction. Novels by García Márquez, Vargas Llosa, Poniatowska, and Tomas Eloy Martinez will be closely studied. Students will also read Absalom! Absalom! by Faulkner, whose influence on Latin-American authors’ techniques of representation has been decisive and profound.

**Class Format:** In-person.

**Requirements/Evaluation:** three 8-page papers, response journals, an oral report, a final 3-page paper, and class participation

**Prerequisites:** RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Spanish majors, Latina/o Studies concentrators

**Expected Class Size:** 5-10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course focuses on the ultimate sort of power-namely, military dictatorship. And it focuses on the historical fact of such a phenomenon within the U.S. political sphere of influence—Latin America. To study dictatorship and its depiction in literature is a means of understanding the nature of that power imbalance and of taking a first step toward some sense of equity.

**Attributes:** GBST Latin American Studies

**Not offered current academic year**

**RLSP 342 (S) Reading Sor Juana: “única poetisa americana, musa décima,” (DPE) (WS)**
This course focuses on the writings of one of the most revered women writers in Hispanic Letters, Sor Juana Inés de la Cruz, who was regarded by her contemporaries as the Tenth Muse. Our exploration and study of Sor Juana's writings will focus on the different genres in which she wrote—prose, poetry, and drama—and it will include a survey and analysis of the historical context in which she wrote, the formal aspects of her writings, and critical essays about her work written by leading scholars in the field of Latin American literature. Near the end of the semester, the course will conclude by expanding its focus to examine the ways in which Sor Juana's work has influenced contemporary Latin American and U.S. Latina authors. Conducted in Spanish.

Requirements/Evaluation: Each student will write three 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide two 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version. Excellent preparation and class participation is required.

Prerequisites: One RLSP course at the 200-level or above or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Spanish majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Each student will write three 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide two 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version.

Difference, Power, and Equity Notes: This course will highlight the intellectual production of one of the most revered women writers in Hispanic Letters. It will explore the challenges women writers faced as well as the social critiques Sor Juana makes in her writings about the exclusion of women and other racial minorities in Spanish colonial society. As such, students will gain critical skills to analyze and understand the diversity of Spanish-American society through Sor Juana's texts.

Not offered current academic year

RLSP 344  (S)  Contemporary Latin American Queer Aesthetics (DPE)

Conducted in Spanish, this advanced seminar examines a panoramic corpus of contemporary cinema, literature, and music in Latin America to trace possible shared political and cultural characteristics of a queer aesthetic. We will explore the works of renowned figures such as Reinaldo Arenas, Chavela Vargas, Pedro Lemebel, and Mariana Rondón, among others, to delve into the intricate layers of queer expression within the region. Is it possible to discern a common transnational queer identity among Latin American countries? What would it look like, sound like? Would it have a shared political mission? What would be its symbols? Primarily focusing on Venezuela, Cuba, Puerto Rico, Dominican Republic, Mexico, Chile, and Argentina, we will analyze a wide range of cultural artifacts—including the work of writers, filmmakers, and musicians—to discuss contemporary debates on identity and representation surrounding sexuality, but also in its intersection with race, gender, and social class. Through an interdisciplinary and intersectional lens, this course will offer a feminist analysis of Latin American counterculture, interrogating the process whereby queer aesthetics enter and sabotage the mainstream. By the end of the seminar, students will have a strong knowledge of contemporary queer artistic practices in Latin America and will be able to identify the most prominent theoretical contributions on sexual and gender dissidence from the region.

Requirements/Evaluation: Evaluation is based on active participation, class presentations, a weekly forum debate, and either a final paper or project.

Prerequisites: Any 200-level course in Spanish taken at Williams or permission of the instructor.

Enrollment Limit: 20

Enrollment Preferences: Spanish majors, Spanish certificate candidates.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: The course explores the politics and aesthetics of Latin American cultural material from the framework of resistance and queer activism, giving students the opportunity to understand the construction of alternative Latin American identities that go against the mainstream.
RLSP 405 (S) Alternative American Literatures: From the Indigenous Chronicle to the Latin American & Chic. Novel (DPE) (WS)

Do the Americas have a common literature? If so, is it possible to trace their roots and continuity from the colonial era to the present? Literary critic Matin Lienhard suggests that it is indeed possible to trace the origin of a literature common to Latin America from the colonial era and into present by focusing on what he calls "alternative literatures"—literatures that relativize the importance of Europeanized and Creole literatures and valorize the richness of oral traditions in the Americas. Such literatures, he asserts, are closely tied to marginalized sectors of society. In this course, we will take Lienhard's concept of "alternative literatures" as a point of departure to pursue our own examinations of how these "alternative literatures" are constituted. While the primary aim of this course is to focus on the writings of Latin American authors, we will end by exploring the relationship between "alternative" Latin American literatures and Chicana/o/x literatures. Readings will include narrative texts such as Cartas de relación, chronicles of conquest, religious texts, indigenous annals, poetry, and drama, as well as contemporary Latin American and Chicana/o/x novels.

Requirements/Evaluation: Four essays, class presentations, active participation, and regular attendance required

Prerequisites: any 300-level RLSP course or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Senior Spanish Majors.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Each student will write four 4-6 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version.

Difference, Power, and Equity Notes: This course will highlight intellectual production of indigenous peoples of the Americas under Spanish colonial rule as well as the writings of more contemporary minority authors of Latin America. It will explore the new identities and textualities that emerge as a result of the encounter and subsequent conquest of the Americas. As such, students will gain critical skills to analyze a diversity of Spanish-American colonial texts from the 16th century as well as more contemporary narrative texts.

Spring 2025

SEM Section: 01    TF 1:10 pm - 2:25 pm     Carlos Macías Prieto

RLSP 407 (F) Gender, Race and Nature: Ecocritical Examinations of Latin American Culture (DPE)

This senior seminar brings an ecocritical focus to the study of Latin American cultural production. We are particularly interested in works of literature and other kinds of cultural texts that critique, subvert, or transcend conventionally Eurocentric and patriarchal conceptualizations of the human and its relation to non-human being. Rhetorical tropes linked to extractivist economic practices and their alternatives will be identified and analyzed over the course of the semester as we sample a wide range of literary and non-literary texts (poetry, narrative prose, essay, film, painting, woodcuts, music, digital media) produced throughout the 20th and 21st centuries. We will also read and discuss writings by leading ecocritics and decolonial theorists including Silvia Rivera Cusicanqui, Eduardo Gudynas, Mary Louise Pratt, Walter Mignolo, and more.

Requirements/Evaluation: Thorough preparation and active class participation, discussion-leading, one 5-7 page paper and one 15-20 page paper as well as a paper proposal, abstract, bibliography, and draft.

Prerequisites: Study abroad, one or more RLSP courses at the 200+ level, or permission of instructor.

Enrollment Limit: 19

Enrollment Preferences: Senior Spanish majors, then other interested students.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course brings decolonial theory and ecocriticism together in an approach to Latin American cultural production.

Winter Study ---------------------------------------------------------------

RLSP 30 (W) Honors Essay: Spanish
To be taken by candidates for honors other than by thesis route.
Class Format: honors essay
Grading: pass/fail only
Not offered current academic year

RLSP 31 (W) Senior Thesis: Spanish
To be taken by students registered for Spanish 493-494.
RLSP 88  (W)  Spanish Sustaining Program

Students registered for RLSP 101-102 are required to attend and pass the Spanish Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program--check your class schedule to confirm enrollment.

Grading:  pass/fail option only

Not offered current academic year

RLSP 99  (W)  Independent Study: Spanish

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading:  pass/fail only

RUSSIAN (Div I)
Chair: Professor Janneke van de Stadt

Professors: J. van de Stadt and J. Cassiday; Assistant Professor: O. Kim; Visiting Assistant Professor: P. Orte; Bolin Dissertation Fellow: Kamal Abdul Kariem; Teaching Associate: Aisulu Beken

On leave: O. Kim

LANGUAGE STUDY
The department provides language instruction to enable students to acquire all five linguistic skills: understanding, speaking, reading, writing, and culture. Russian 101-W88-102 covers the basics of Russian grammar. Russian 103 through 202 offer additional instruction in grammar and vocabulary acquisition, and provide extensive practice in reading and conversation.

STUDY ABROAD
The department strongly encourages students who want fluency in Russian to spend a semester or year studying in Russia or one of the former Soviet republics. Students generally apply to one of several approved foreign study programs. Russian 104 or the equivalent and junior standing are normally prerequisite for study abroad.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
No, generally not until after a student returns and can provide course material for review (e.g. completed work such as exams, portfolios, lab reports and the like).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
In Addition to course title and description, we always have a conversation with our students about the actual work they completed since sometimes syllabi are vague, or not followed with complete thoroughness.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes, four courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No, the only candidate for this would be the Senior Seminar, and it has never been an issue.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

LITERATURE AND CULTURE IN TRANSLATION
The department regularly offers courses on Russian literature, culture, and politics in English for those students who have little or no knowledge of Russian, but who wish to become acquainted with Russian literary, cultural, and social history.

THE CERTIFICATE IN RUSSIAN
To enhance a student’s educational and professional profiles, the Certificate in Russian offers a useful tool for using the language in a wide variety of disciplines. The sequence of language and culture courses is designed to supplement a student’s major at Williams by enabling the student to expand their knowledge in a related field.

Students who enter Williams with previous training in Russian may substitute more advanced courses for all the 100-level courses; they can also be exempted from up to two of the required courses. Thus, in order to earn a certificate a student must take no fewer than five courses (including three
courses in Russian) after enrolling at Williams. The student must achieve proficiency at the level of a B in RUSS 251 or the equivalent.

**Required Courses**

101  
102  
103  
104  

one additional course conducted in Russian

**Elective Courses**

- at least one course on Russian cultural history  
- at least one course on Russian intellectual, political, or social history, or post-Soviet economics

**THE MAJOR**

The Russian major offers students an interdisciplinary approach to the intellectual and cultural history of Russia and the former Soviet republics. Students complete the major by combining courses in Russian language and literature with courses in history, political science, music, economics, and art. The major requires a minimum of ten courses of which at least six must be conducted in Russian, at least two must be at the 300-level, and one at the 400-level. In addition, students may take up to four related courses offered by other departments and taught in English.

**Examples of appropriate courses in other departments are:**

- HIST 241 Imperial Russia  
- SOC 248 Post-Soviet Paradoxes  
- HIST 337 After Stalin: Soviet History  
- PSCI 286 Russian Politics and Foreign Policy under Vladimir Putin

Students selecting the major must typically complete Russian 104 or 152 (or the equivalent) by the end of the junior year. Majors will normally be expected to take the 400-level seminar offered in their senior year, even if they have previously taken another version of it. Russian majors may receive major credit for summer language study (in consultation with the department) and for as many as four courses taken during study abroad.

**THE DEGREE WITH HONORS IN RUSSIAN**

At the beginning of the second semester of the senior year, students may nominate themselves to candidacy for the degree with honors. By the end of the junior year at the latest, however, they will have established in consultation with the department their qualifications for embarking on the project, the pattern of study to be followed, and the standards of performance.

Students earn a degree with honors by submitting a senior thesis (493-W31-494) of honors quality.

**RUSS 101 (F) Elementary Russian I**

An introduction to contemporary standard Russian, this course provides opportunities to acquire basic proficiency in all five language skills—listening comprehension, speaking, reading, writing, and culture—through immersion, intensive use of authentic materials, and a strong emphasis on the spoken word in all class activities. Greater emphasis is placed on writing in the second semester. For students who already know some Russian, consultation with the department is required before registering for any Russian language course in the sequence 101 through 252.

**Class Format:** this class is hyphenated with RUSS 102 and meets five times a week

**Requirements/Evaluation:** active class participation, completion of all assignments, regular summative exercises, written and oral final exercises

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** first- and second-year students; students expressing an interest in the Russian major or certificate; students who need to learn Russian for research purposes

**Expected Class Size:** 10
**RUSS 102 (S) Elementary Russian II**

An introduction to contemporary standard Russian, this course provides opportunities to acquire basic proficiency in all five language skills—listening comprehension, speaking, reading, writing, and culture—through immersion, intensive use of authentic materials, and a strong emphasis on the spoken word in all class activities. Greater emphasis is placed on writing in this semester. For students who already know some Russian, consultation with the department is required before registering for any Russian language course in the sequence 101 through 202.

**Requirements/Evaluation:** active class participation, completion of homework assignments, oral assessments, and summative exercises.

**Prerequisites:** RUSS 101 or permission of the instructor

**RUSS 104 (S) Intermediate Russian**

This course continues to develop all five skills—listening comprehension, speaking, reading, writing, and culture—for students who have completed at least three semesters of college-level Russian. Coursework includes the ongoing study of Russian grammar, especially of increasing complexity, as well as an examination of a variety of authentic materials from Russian and Russophone cultures, current events, and daily life. Significant attention
will be devoted to vocabulary expansion. Students who complete the yearlong sequence of RUSS 103 and RUSS 104 should be well prepared to undertake study abroad in Russia and are encouraged to do so.

**Class Format:** the class meets four hours a week: three with the professor and the fourth with the Russian Teaching Associate (time to be arranged)

**Requirements/Evaluation:** Daily class participation and preparation, completion of all assignments and exercises, in and out of class. This course meets three times per week with the instructor and once per week with the course TA.

**Prerequisites:** RUSS 103 or the equivalent; consult with instructor if unsure

**Enrollment Limit:** 15

**Enrollment Preferences:** Russian Majors and language certificate seekers, then students of Russian language, literature, history or culture.

**Expected Class Size:** 5-10

**Grading:** yes pass/fail option, yes fifth course option

RUSS 203 (F) Nineteenth-Century Russian Literature in Translation

Cross-listings: COMP 203

Primary Cross-listing

Description: Nineteenth Century Russian literature is well known for its exploration of extreme states of consciousness. Because of this, it also contains some of the most compelling diagnoses of the illnesses and malaise of the modern condition: alienation, loss of meaning, suffering in face of the abuse of power, and the destructiveness of hyperrationality. Covering Russian literature's first modern treatments of madness up to the Silver Age, we will take this theme as a path to explore 19th century Russian literature as a whole. We will read works by Pushkin, Gogol, Dostoevsky, Tolstoy, and others in order to better understand the Russian response to modernity and cast our glance along with them into the depths of the human soul.

Requirements/Evaluation: Daily reading and participation 20%; 1 paper illustrating the practice of close reading 1-2 pp. 10%; paper 2: paper comparing two readings 3-4 pp. 15%; paper 3, comparing two readings or a creative assignment “re-writing” a Russian classic 4-5 pp. 20%; Final paper + presentation (essay on a critical work or story that we did not read or an independent creative assignment): 5-6 pp. 25%; Course Test or final essay: 10%.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: RUSS or COMP

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 204 (S) To See the Past: Russian and Soviet Cinema on History

Cross-listings: COMP 204 / GBST 204

Primary Cross-listing

This course surveys Soviet and Russian cultural history of the 20th- and 21st-centuries through the history of the cinematic medium. We will watch and analyze key films of this period--films by Eisenstein, Vertov, Tarkovsky, Muratova, Balabanov, Zviagintsev, and Fedorchenko among others--from a double perspective. On the one hand, we will study the cultural and historical contexts of the Soviet Union and Russia; on the other hand, we will learn the formal and stylistic aspects of the cinematic medium as it developed historically (from silent, to sound, to color, to digital etc.). From this double perspective, we will try to answer a larger question that underlies this course: What kind of historical thinking can we learn through cinema as a medium? In other words, we will take cinema neither simply as a direct reflection of state ideology nor as pure aesthetic form or entertainment for the masses. Rather, we will approach the films of this period as audio-visual texts that are rich in historical content and require our informed and attentive interpretation.

Requirements/Evaluation: For each class you'll watch 1or 2 film(s) and read typically 1 article under 20 pages. You will submit short viewing response before each class. Additionally, there will be short viewing or creative assignments to familiarize students with formal aspects of film. Evaluation will be based on participation, one presentation, short sequence analysis, and final paper or video essay

Prerequisites: none, open to all students

Enrollment Limit: 15

Enrollment Preferences: declared or prospective Russian or Comparative Literature majors, Russian Certificate seekers, Global Studies concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

RUSS 209  (F) Siberia: Region Making and Imperial Imagination in Russia

Cross-listings: ANTH 209

Secondary Cross-listing

Siberia is often framed as an essential part of Russia and a repository of all that is Russian. However, imaginations of Siberia also paint contradictory images of the region: as a heaven or a hell, a wasteland or a breadbasket, a place of freedom or a place of imprisonment, a Russian colony or as the Russian heartland. This course takes as its root that Siberia is not any one thing and not any one place. Rather, Siberia is an idea and set of representations that change over time. In this course, we will analyze and unpack this idea. The course asks: what is Siberia; how did Siberia become so integral to Russia and ideas of Russianness; who defines Siberia; what are the images of Siberia and for whom do they matter; and what do these imaginations of Siberia facilitate and obscure? To answer these questions, we will engage in an interdisciplinary study of Siberia incorporating ethnography, history, film, and literature. The primary goal of the course is to expose students to the various ways Siberia has been imagined, who it has been imagined and represented by, and how these imaginations and representations have lives of their own. In doing so, the course will help students view Russia through its peripheries rather than through Moscow and Saint Petersburg and will enable students to grapple with how "regions" are created.

Requirements/Evaluation: Regular GLOW posts and participation in classroom discussion, a midterm paper, and a hybrid reflective and analytic paper comparing imaginations of Siberia with place from their own life that has been highly imagined.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Majors in Anthropology and Sociology and majors and certificate-seekers in Russian.

RUSS 217  (S) Indigeneity Today: Comparative Indigenous Identities in the US and Russia (DPE) (WS)

Cross-listings: ANTH 217

Secondary Cross-listing

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapple with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigeneities.

Requirements/Evaluation: 10 posts to the course Glow discussion page, 3 times leading class discussion on the assigned readings, 1 short
presentation, 1 extended portfolio project with regular shorter and longer writing submissions, and 1 final paper and final presentation (as the final part of the portfolio).

**Prerequisites:** None

**Enrollment Limit:** 16

**Enrollment Preferences:** Majors and certificate-seekers in Russian, then majors in Anthropology and Sociology, and then Global Studies concentrators

**Expected Class Size:** 12-15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 217(D1) ANTH 217(D2)

**Writing Skills Notes:** This course has the following assignments: Weekly post to the Glow discussion page, 1 extended project with regular writing submissions, 1 final paper and final presentation. For the extended project, we will have instructor feedback for all project assignments. In instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed. There will also be peer feedback/review.

**Difference, Power, and Equity Notes:** In the course, students will learn about Indigenousy as a context-specific social formation. It understands Indigenousy as a category of difference with past and present importance. We will read about, discuss, and write about Indigenousy as a social category, along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.

Spring 2025

SEM Section: 01    TF 2:35 pm - 3:50 pm     Kamal A. Kariem

RUSS 219  (F) Cults of Personality  (WS)

**Cross-listings:** COMP 215

**Primary Cross-listing**

First uttered by Soviet leader Nikita Khrushchev in 1956, the phrase "cult of personality" was formulated to discredit the hero-worship that accompanied Joseph Stalin's iron-fisted rule of the Soviet Union. Since then, the phrase has gained currency as a condemnation of a variety of seemingly all-powerful leaders in oppressive political regimes, including China's Mao Zedong, Iran's Ayatollah Khomeini, and the ruling Kim family in North Korea. In this course, we will examine the phenomenon of the cult of personality from a variety of perspectives, beginning with the cult surrounding Stalin and ending with that of Vladimir Putin. Our course material will encompass scholarship from multiple disciplines, including history, sociology, political science, cultural and media studies, as well as artistic expression typically labeled propaganda in literature, the visual arts, and film. Although our course will begin in the Soviet Union and end in contemporary Russia, we will explore how the cult of personality has been adapted and updated for different cultural and political purposes in fascist Germany and Spain, China, Iran, North Korea, and Cuba. All readings will be in English, and all films will have English subtitles.

**Requirements/Evaluation:** completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 215(D1) RUSS 219(D1)

**Writing Skills Notes:** Students will be writing papers (5-6 pages) every other week and receiving detailed feedback on their writing with the expectation that they will identify areas in need of improvement and work on these throughout the semester. The course will also require that students write one paper together with their tutorial partner and that they rewrite two different papers, one at midterm and the other at the end of the term.
RUSS 305 (F) Dostoevsky and the Meaning of Life

Cross-listings: COMP 305

Primary Cross-listing

This course surveys the works of the great Russian writer Fyodor Dostoevsky, whose oeuvre represents a life-long quest to uncover the meaning of life. Readings include Dostoevsky's major novels, Crime and Punishment, Demons, and The Brothers Karamazov, as well as several shorter works, including Notes from Underground. We will also examine Dostoevsky's journalism, so that we understand how he answers life's most troubling questions in the social and political context of his day, as well as what role artistic representation plays in these answers. All readings will be in English.

Requirements/Evaluation: willingness and ability to complete lengthy reading assignments, active class participation, two short papers, and final project

Prerequisites: none, open to all students

Enrollment Limit: 40

Enrollment Preferences: Russian and Comp Lit majors, as well as those seeking the Russian Certificate

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 306 (S) Tolstoy and the Meaning of Life

Cross-listings: COMP 306

Primary Cross-listing

This course examines the works of the great Russian writer Lev Tolstoy, whose stories and novels represent a life-long quest to uncover the meaning of life. Readings include Tolstoy's two major novels, War and Peace and Anna Karenina, as well as several shorter works, such as The Death of Ivan Ilych and Hadji Murad. We will also examine Tolstoy's aesthetic and didactic writing so that we understand precisely how Tolstoy answers life's most troubling questions, as well as what role artistic representation plays in these answers. All readings will be in English.

Requirements/Evaluation: timely completion of all reading assignments, active participation in class discussions, 2 short papers, and a final project

Prerequisites: none

Enrollment Limit: 50

Enrollment Preferences: RUSS and COMP majors, then students studying Russian

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Attributes: GBST Russian + Eurasian Studies

Not offered current academic year

RUSS 331 (F) The Brothers Karamazov (WS)

Cross-listings: COMP 331 / ENGL 371

Not offered current academic year
Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of *The Brothers Karamazov*.

**Requirements/Evaluation:** completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

**Prerequisites:** at least one 200-level literature class

**Enrollment Limit:** 10

**Enrollment Preferences:** students majoring or considering a major in Russian, Comparative Literature, or English

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 331(D1) COMP 331(D1) ENGL 371(D1)

**Writing Skills Notes:** Students will write six 6-page papers in the course of the semester and received detailed feedback on their writing and argumentation for each paper, which they will be expected to incorporate into subsequent papers.

**Attributes:** JLST Interdepartmental Electives

Not offered current academic year

**RUSS 345 (S) Bagging the Monsters: Tolstoy's Other Prose**

*War and Peace* and *Anna Karenina*, which Henry James famously described as "baggy monsters," are works that are immediately identified with Leo Tolstoy, a giant of nineteenth-century Russian literature. But Tolstoy wrote so much more! From short works of adult fiction, to stories for children, pedagogical essays, political tracts, aesthetic treatises, and philosophical musings. He produced variously and prodigiously throughout his life and that’s not even counting his fascinating diaries and personal correspondence. Our course readings will probe this exceptional variety with the goal of understanding the scope of Tolstoy’s thinking in greater depth. All readings and discussion will be in Russian.

**Requirements/Evaluation:** Active, regular, and substantive class participation; leading discussion; weekly short writing assignments of 1-2 pages; and 1 longer writing piece of 4-5 pages.

**Prerequisites:** Three years of college Russian or the equivalent. Students who have not taken Russian language at Williams must consult the instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** Russian majors and certificate seekers, then comparative literature majors.

**Expected Class Size:** 5

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

---

**RUSS 346 (S) The Nineteenth-Century Povest’**

Among the genres that made nineteenth-century Russian literature famous, perhaps the most elusive is the *povest’*. Neither short story nor novella, the term *povest’* describes a type of short fiction, which any author aspiring to literary greatness in nineteenth-century Russia felt obliged to take on. This course surveys representative *povesti* by Russian writers from Karamzin to Chekhov, offering a survey of nineteenth-century Russian literature through the lens of its short fiction. Along the way, we will read *povesti* by Pushkin, Lermontov, Gogol, Turgenev, Dostoevsky, and Tolstoy. All works will be read in the Russian original.

**Requirements/Evaluation:** completion of all reading assignments; two oral presentations in class; two short papers; a final project presented in class

**Prerequisites:** RUSS 202 or the equivalent, or permission of the instructor.
Enrollment Limit: 10

Enrollment Preferences: Russian majors and those pursuing the Russian certificate.

Expected Class Size: 5

Grading: yes pass/fail option, yes fifth course option

RUSS 348 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WS)

Cross-listings: GBST 348 / SOC 348

Secondary Cross-listing

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their post-socialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as Russia's invasion of Ukraine, or the lingering tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Ukraine and Russia, but will also read comparative studies, as well as works on East Germany and Georgia. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the post-socialist condition.

Requirements/Evaluation: 5-page paper every other week, written comments on the partner's paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 348(D2) RUSS 348(D1) SOC 348(D2)

Writing Skills Notes: This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

Difference, Power, and Equity Notes: Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

Attributes: GBST Russian + Eurasian Studies

Fall 2024

TUT Section: T1    M 7:00 pm - 9:40 pm     Olga Shevchenko

RUSS 401 (F) Let's Remember the USSR! (DPE)

This course is devoted to memories of the USSR. We will focus on memoirs that portray various epochs of Soviet history from different points of view, watch films dealing with the Soviet legacy, and respond to essays that consider the problems of history and myth. In so doing, we will discuss the significance of nostalgia, official vs. unofficial culture, the politics of memory, and the institution of monuments. Much of our course will focus on daily life in the USSR as remembered by the people who lived through it. However, we will also explore the meaning and status of such memories today in former Soviet countries through responses to daily readings, essays, and presentations. Of course, along the way, we will work on improving our spoken and written Russian.
Requirements/Evaluation: Daily work (reading, preparing questions for discussion) 25%; weekly 1-2 page short written assignments (responses to open-ended questions about the daily readings) 25%; 2 short 10 minute presentations (on two illustrious works or figures) 25%; 1 final project, longer researched presentation 10-15 minutes 25%.

Prerequisites: Three years of Russian or instructor's consent.

Enrollment Limit: 15

Enrollment Preferences: RUSS or COMP

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course will address several issues that directly relate to the DPE description: the lives of dissidents in the USSR; the legacy of imperialism in the countries of the former Soviet Union; and the role that the official version of history plays in Russia today.

SCIENCE AND TECHNOLOGY STUDIES (Div II)
Chair: Professor Jason Josephson Storm

Advisory Committee

- Matt E. Carter, Associate Professor of Biology; Faculty Director, Rice Center for Teaching; affiliated with: Biology, Neuroscience
- José A. Constantine, Director of CES and the Environmental Studies Program, Associate Professor of Geosciences, Faculty Fellow of the Davis Center and the Office of Institutional Diversity, Equity and Inclusion; affiliated with: Geosciences, Davis Center, Institutional Diversity, Equity, and Inclusion, Center for Environmental Studies
- Laura D. Ephraim, Associate Professor of Political Science; on leave Fall 2023
- Ezra D. Feldman, Lecturer; affiliated with: English, Science & Technology Studies, Graduate Program in the History of Art
- Laura J. Martin, Associate Professor of Environmental Studies and Faculty Affiliate in History; affiliated with: Center for Environmental Studies, History
- Bojana Mladenovic, Professor of Philosophy and Director of the Williams-Exeter Programme at Oxford University; affiliated with: Philosophy, Williams-Exeter Programme at Oxford
- Jason Josephson Storm, Professor of Religion, Chair of Science & Technology Studies; affiliated with: Religion, Science & Technology Studies; on leave 2023-2024

Science and Technology Studies (STS) is an interdisciplinary program concerned with science and technology and their relationship to society. The community of scholars in the Williams STS program apply methods from diverse disciplines. They seek to illuminate the historical, social, cultural, ethical, and political dimensions of science and technology. By bridging humanities, social sciences, science, and technology, our program seeks to build relationships across campus.

The STS program at Williams takes a broad umbrella approach to the discipline. Topics include: sociology of knowledge production; philosophy of science; history of science and technology; the economics of research and development; science and public policy; technology and the environment; scientometrics; interactions between humans and technology; science fiction and other artistic depictions of science and technology; boundaries between pseudo-science, religion, and science; and the broader ethical issues evoked by science and technology.

Science and Technology Studies concentrators must complete a total of six courses. Five of these must have the STS prefix. Students must take: Introduction to STS; Senior Seminar; and three electives, of which at most two can originate in the same department. In addition, Science and Technology Studies concentrators must complete one course with a laboratory or field work component in natural, social, or computer science; this course may also satisfy one of the divisional distribution requirements.

Students may petition the Chair for recognition of a course as an STS course even if it is not cross-listed in STS. The petitions will be approved or denied on a case-by-case basis.

The program is administered by a chair and an advisory committee of faculty who teach in the program. Students who wish to enroll normally register with the chair by the fall of their junior year.

STUDY ABROAD

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?
Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Be sure to check record of enrollment in classes with laboratory of fieldwork components to satisfy program.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

**STS 101 (S) Science, Technology, and Human Values**

**Cross-listings:** SOC 201

**Primary Cross-listing**

This course offers an introduction to science and technology studies. Attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. With widespread use of new social media, controversial developments in such bio-technical practices as gene-editing and the cloning of mammals, rapid advances in various forms of technological surveillance, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. As with other features of modernity, however, technology has also had significant, albeit largely unanticipated, social consequences. This course will focus on the less often examined latent functions of science and technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

**Requirements/Evaluation:** A midterm, final, and two short papers.

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**STS 142 (S) AlterNatives: Indigenous Futurism and Science Fiction**

**Cross-listings:** AMST 142

**Secondary Cross-listing**

Indigenous people occupy a paradoxical position in time. As survivors of genocide, they are already post-apocalyptic, occupying what could be called "their ancestors' dystopia." But Indigenous people are also imagined to exist frozen in history, merely one step in the ceaseless march of civilization that brought us to the present. This tutorial explores how contemporary Native science and speculative fiction imagines and enacts futurity from this dynamic temporal position. Looking across numerous national and transnational Indigenous contexts, we will survey a diverse range of media, including short stories, novels, visual art, video games, films, and online platforms like Second Life. Pairing these with works in Science and Technology Studies (STS) and Native American and Indigenous Studies (NAIS), we will explore concepts like the Native "slipstream," eco-erotics, post-post-apocalyptic stress, Native pessimism, biomedical speculative horror, and what it would be like to fly a canoe through outer space.
Requirements/Evaluation: participation, weekly 2- to 4-page written responses to class readings, short fiction prompts, and/or your partner's writing
Prerequisites: permission of instructor
Enrollment Limit: 10
Enrollment Preferences: first and second year students, American Studies majors, Science and Technology Studies concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 142(D2) STS 142(D2)

Difference, Power, and Equity Notes: Students in this course will explore the relationship between political violence, resistance, and speculation. We will develop close reading practices, analytical methods, and careful discussion dynamics to enable students to make sense and use of concepts like futurity, race, settler colonialism, gender, and technological determinism.

Not offered current academic year

ST5 150 (F) Data for Justice (DPE) (QFR)
Cross-listings: AMST 150 / SOC 150 / WGSS 150 / INTR 150
Secondary Cross-listing
This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.
Class Format: This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.
Requirements/Evaluation: Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.
Prerequisites: None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.
Enrollment Limit: 18
Enrollment Preferences: Students without prior college-level courses in statistics and programming.
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

Difference, Power, and Equity Notes: This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGTBO+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.
Quantitative/Formal Reasoning Notes: This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

Fall 2024
STS 153 (S) Androids, Cyborgs, Selves (WS)

Cross-listings: ENGL 153

Secondary Cross-listing

In this expository writing course, we will analyze and argue about how humanoid and partly human bodies appear in legend, fiction, and film. When are these bodies inviting? When are they threatening? How are they gendered, how are they raced, and why? Which technologies fit easily into human forms, and which are resistant? What do the persons who inhabit these near-human bodies desire? Students in this course will develop arguments in reply to these and related questions, developing 3 or 4 essays through multiple stages of planning, drafting, and revising. Because this is an expository writing seminar, we will spend half or more of our class time discussing and practicing writing skills.

Requirements/Evaluation: several response papers (500 words); three or four essays (1200-1500 words, in multiple drafts); class participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: See details for ENGL 100-level courses on English Department Website.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 153(D2) ENGL 153(D1)

Writing Skills Notes: This expository writing course is dedicated to facilitating real improvement in students' written argumentative work. Students will write and revise response papers and 5-page essays (in multiple drafts) over the course of the semester, receiving substantial instructor feedback. Students will practice: drafting, revising, and responding to critique; writing appropriately for given occasions and audiences; grounding their writing in close, analytical reading; and acknowledging sources.

Spring 2025

SEM Section: 01 TR 8:30 am - 9:45 am Ezra D. Feldman

STS 208 (S) Designer Genes (DPE)

Cross-listings: ENGL 208 / WGSS 208 / AMST 206

Secondary Cross-listing

In this course, we explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book The Mutant Project. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary In the Family, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel Dawn explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film Gattaca shows us a fully realized dystopian society where genetically modified humans are the norm—a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects.

Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

Requirements/Evaluation: Personal essay, short analysis papers, final research group project

Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: None; if class is overenrolled, professor will ask for statements of interest.
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 208(D1) STS 208(D2) WGSS 208(D2) AMST 206(D2)

Difference, Power, and Equity Notes: This course asks students to think deeply about questions of social justice in the context of the revolution in modern genetics. Race, class, gender, and sexuality all play a role in who has access to new life-saving technologies, and how these technologies are used. This course employs critical tools (feminist and queer theory, ethics’ case studies, close reading) to help students question and articulate the social injustices at play in scientific research and bioengineering.

STS 212 (F) Ethics and Reproductive Technologies (WS)

Cross-listings: WGSS 212 / PHIL 212

Secondary Cross-listing

In her groundbreaking book, The Tentative Pregnancy, Barbara Katz Rothman writes that “[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace--or to let us think we can replace--chance with choice.” Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as contraception, abortion, in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, uterine transplants, and "artificial wombs." Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

Class Format: discussion

Requirements/Evaluation: active participation in class discussions, three or four short reflection papers, and two longer papers (5-7 and 7-10 pages)

Prerequisites: none, but introductory-level course in PHIL and/or WGSS recommended

Enrollment Limit: 19

Enrollment Preferences: WGSS and PHIL majors (declared or prospective), PHLH and STS concentrators (declared or prospective)

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: meets Contemporary Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 212(D2) PHIL 212(D2) STS 212(D2)

Writing Skills Notes: Students will write periodic short papers (2-3 pages each), a midterm paper (5-7 pages) and a final paper (7-10 pages). Short papers focus on concepts, arguments, and writing skills needed in the midterm and final papers, in which students are expected to describe and evaluate arguments from assigned readings, and to present clear and effective arguments in support of their own ethical positions. Students receive feedback on all papers and have the opportunity to revise midterm and final papers.

Fall 2024
STS 219 (F) Realizing Utopias

Cross-listings: REL 219

Secondary Cross-listing

Our world can be better. We are faced with unfolding global catastrophes, such as the pandemic, anthropogenic climate change, economic crises, racialized injustice, and political polarization, and many people seem to have lost their capacity to imagine better futures. Perhaps that is why we as a society have no problem picturing the end of the world–fictional dystopias and apocalypses are abundant while (e)utopias are scarce. This a problem because, as numerous political theorists have observed, it is hard to organize meaningful change around cynicism and nihilism. But our dystopian present makes it even more important to imagine and even realize utopias. This course will help us do so. Our core collective goal will be to explore pragmatic realizations of radical hope. Complementing urgent efforts to resist or mitigate intense injustice in the present, we will aspire to articulate bold visions for emancipatory communities of the future. Rather than primarily focusing on the limitations of existing institutions, this seminar will treat these as problems to be solved rather than as reasons to accept the status quo, and we will embrace affirmative projects of designing the frameworks for better worlds. But we also don’t want to blind ourselves to the challenges of being visionary. In brief, we will engage in serious explorations of the underlying principles and rationales for various emancipatory political communities while also pragmatically assessing their potential difficulties. We will spend the first part of the course reading political theory (on issues such as resource allocation, collective decision making, and social justice) alongside various artistic and political manifestos. We will spend one week reading utopian novels (including as possibilities socialist, anarchist, techno-futurist, ecotopias, Afrofuturist, queer utopias, and many more). But the majority of the course will be project-based. Students will form small teams to engage in radical thought experiments and then construct and refine their ideas of better possible societies/political communities. These teams will produce 1) policy papers to address how their utopian societies would deal with real world issues, and 2) artifacts (such as art, manifestos, pamphlets, short stories, videos, or the like) that might appear in the futures they envision, exploring both their ideals and their limits. The semester will culminate in a public exhibition of these works. Thinkers to be considered may include: Marx & Engels, José Esteban Muñoz, Boaventura de Sousa Santos, Lucy Sargisson, David Schweickart, Colin Ward, Erik Olin Wright, and others.

Requirements/Evaluation: attendance and participation, short writing assignments, group policy papers, and artifacts (e.g., art, manifestos, pamphlets, short stories, or videos) for end of semester exhibit.

Prerequisites: none.

Enrollment Limit: 20

Enrollment Preferences: If overenrolled students will be asked for a statement of interest and utopian project idea.

STS 224 (F) Going Nuclear: American Culture in the Atomic Age

Cross-listings: HIST 273 / SOC 224

Secondary Cross-listing

This course will examine the historical development and use of the nuclear bomb. Among other features of the early atomic age, the course will look at the Manhattan Project, the delivery of the bombs for combat, the destructive effects of the bomb’s initial use in Hiroshima and Nagasaki, and the ongoing testing of nuclear weapons in the Marshall Islands after WWII. The class will investigate the role of the nuclear arms race in the Cold War, the consequences of nuclear production on specific communities, and the implications of the atomic age on our critical understanding of technological innovation more generally. We will also consider the saliency of competing narratives interpreting America’s decision (and continuing policies) to build, use, and stockpile nuclear weapons. Employing both sociological and historical perspectives, we will explore the interactions between science, politics, and culture in the nuclear age.

Requirements/Evaluation: a midterm, a final exam, and a 10- to 12-page research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Preference given to sociology and history majors.

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

STS 226 (F) The Art of Natural History (WS)

Cross-listings: ARTH 229

Secondary Cross-listing

The scientific revolutions of the eighteenth and nineteenth centuries fundamentally changed the way the natural world was seen and celebrated, classified and organized, displayed and manipulated. New discoveries in the natural sciences and competing theories of evolution intertwined with shifting conceptions of natural history, of nature, and of humankind's proper place within it. This course will investigate the links between art and natural science. It will seek to understand the crucial role of the visual arts and visual culture in the study and staging of natural history from the eighteenth century to the present. We will pursue the questions that preoccupied the artists themselves. How should an artist react to new ecological insights? What is the proper artistic response to newly discovered flora and fauna? What is the role of aesthetics in the communication of knowledge? How are those aesthetics connected to ethics? How might a drawing of a plant convey information that is different from that of a photograph or a glass model of a plant? How might a theatrical diorama frame a scientific idea in a way that is different from a bronze statue? Students will seek to understand the myriad connections between seeing, depicting, and knowing, to question long-held assumptions about the division between "objective" science and "subjective" art, and to recognize that art has the ability not only to interpret, disseminate, and display scientific knowledge, but to create it as well.
Requirements/Evaluation: Five 5 page essays, five 1-2 page responses to partner's essays, critical conversation.

Prerequisites: None.

Enrollment Limit: 8

Enrollment Preferences: Sophomores with an interest in art history, art studio, ecology, environmental studies, and science and technology studies, juniors with these same interests, then art history majors, and science and technology majors, in that order.

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $150 Lab and materials fees for all classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 226(D2) ARTH 229(D1)

Writing Skills Notes: This course will require students to write a short paper or a critical response to their partner's paper each week. Students will receive critical feedback on both form and content from their professor and from their peers.

Attributes: ARTH post-1800

Not offered current academic year

STS 228 (F) Feminist Bioethics (WS)

Cross-listings: PHIL 228 / WGSS 228

Secondary Cross-listing

In this course we will explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures interactions with and within the health care system. To do this we will explore topics that might traditionally be considered "women's issues" in healthcare, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

Class Format: discussion

Requirements/Evaluation: active participation in class discussions; periodic short papers (2-3 pages); midterm and final paper (5-7 and 7-10 pages, respectively); and one oral presentation

Prerequisites: none, although previous coursework in WGSS is desirable

Enrollment Limit: 19

Enrollment Preferences: prospective and declared majors or concentrators in PHIL, WGSS, STS, and PHLH, especially those who need the course to satisfy major or concentration requirements

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: meets Contemporary Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 229  (S)  The Panopticon: Surveillance, Power, and Inequality  (DPE)

Cross-listings: SOC 228

Secondary Cross-listing

Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today’s “surveillance societies” just by doing everyday activities. This course uses the metaphor of the “Panopticon” as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing when they are being observed. In *Discipline and Punish*, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the “disciplinary” power that lies at the heart of inequality in modern society. Since Bentham and Foucault’s time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today’s surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Can privacy, convenience, and safety ever be truly balanced? Topics include: the historical origins and expansion of surveillance in modern societies, policing and state surveillance, and social media surveillance.

Requirements/Evaluation: participation, reading responses, midterm essay, final paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 229(D2) SOC 228(D2)

Difference, Power, and Equity Notes: This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance by police in Baltimore City and the question of if and when surveillance is appropriate there, given the city’s ongoing crisis of citizen and police violence. Students will discuss police surveillance in a context shaped by racial segregation and class inequality.

Spring 2025

SEM Section: 01    MR 2:35 pm - 3:50 pm     Ben Snyder

STS 231  (S)  Africa and the Anthropocene  (DPE)

Cross-listings: ENVI 231 / AFR 231

Secondary Cross-listing

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Requirements/Evaluation: Assignments include: 2 short written commentaries (2-3 pages each), mid-term current event analysis (5-7 pages), final analytical essay (10-12 pages) and class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 231(D2) ENVI 231(D2) AFR 231(D2)

Difference, Power, and Equity Notes: Africa and the Anthropocene considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

STS 236  (F)  Aesthetics of Automation: From the Mechanical Turk to A.I.

In this course we will study the changing aesthetics of automation in European and North American cultural contexts from the 18th century to the present. We will also explore the wider cultural and material effects of automation (as imagined and as implemented) upon public and private spheres, craftsmen and courts, wage-laborers, artists, and inventors. The objects we examine will be as various as the dulcimer-playing android presented as a gift to Marie Antoinette, IBM's Deep Blue, and singer-actor Janelle Monae's android alter-ego, Cindi Mayweather. Our primary sources will consist of visual representations in print and film as well as literary and commercial writing; our secondary sources will consist of essays in aesthetic theory, cultural studies, science and technology studies, and the history of technology.

Requirements/Evaluation: mid-term and final essays, an annotated bibliography, discussion participation, and brief in-class writing exercises.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: STS concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

STS 239  (S)  The Ethics of Artificial Intelligence

Cross-listings: PHIL 239

Secondary Cross-listing

Human beings will someday live alongside artificially intelligent beings who equal or exceed us. The rise of AI will be a tectonic shift for culture, technology, and our fundamental sense of ourselves. When AI is fully realized, it is likely to be amongst the most important things to happen to our species. Some challenges we face are broad and about the future. How can we ensure that AI's will act morally? Is a world with AI's overall better or worse for us? How do we create legal and policy frameworks that cover a new kind of thinking being? If they are conscious, will AI's have dignity and rights? Other questions are pressing and immediate: Artificial intelligence techniques are used today to help decide whether someone gets a bank loan, is eligible to be released on bail, or in need of particular medical treatment. And right now there are autonomous vehicles deciding how to behave in traffic, and autonomous weapons capable of delivering lethal force. Is it moral for us to pass along these sorts of decisions to AI's? What if they are biased, unbeknownst to us? What if they are more fair? How should we understand intellectual and creative work in an era of generative models that take on some aspects of thought? In this course we will engage ethical questions surrounding the seeming inevitability of AI.

Class Format: mixture of lectures and discussion

Requirements/Evaluation: four short (3- to 4-page) writing assignments and a final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: CSCI or PHIL majors or STS or COGS concentrators

Expected Class Size: 25
This course will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1623); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (*Principia Mathematica*: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); George Ellery Hale (Mt. Wilson Observatory 100" telescope, 1917; Palomar Observatory 200" telescope, 1948), Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams' Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

**Class Format:** Meeting on campus in the Chapin Library classroom (Sawyer 452)

**Requirements/Evaluation:** class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** if overenrolled, preference by written paragraph of explanation of why student wants to take the course

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

---

**STS 254 (S) Food, Forests, & Fungi: Environmental Health in the Anthropocene** (DPE) (WS)

**Cross-listings:** ANTH 254 / ENVI 254

**Secondary Cross-listing**

This tutorial will examine the impacts of the climate crisis on human, environmental, and planetary health via the lens of food systems & plant medicines in the Anthropocene. We use anthropological, environmental, evolutionary, & ecological approaches to explore the ecosystems connecting
humans, plants, animals, and fungi that have been massively disrupted by systems of industrial agriculture, industrial forestry, corporate food systems, and corporate biomedicine. We will dwell on the growing signs of our climate catastrophe including the sharp rise of global temperatures, floods, hurricanes, alongside declining freshwater reserves, melting cryosphere, and falling crop yields, that are helping produce a growing wave of hunger and climate refugees in every world region. Along the way, we will hear from and read about youthful climate activists from Extinction Rebellion, Ende Gelände, Fridays for the Future, 350.org, and the Sunrise Movement who are designing and implementing innovative, local, and sustainable solutions to inaction, apathy, and inertia even as situations of internal migration or displacement, food scarcity, food sovereignty, water shortages, and other climate-related disruptions are increasing in both developing and developed parts of our globe. We learn how activist narratives intersect with wider movements to promote more local and circular economies of regenerative agriculture and forestry, ethically produced and sourced organic food, wild & cultivated botanicals, and complementary medicines that are healing both humans and the planet.

Requirements/Evaluation: Weekly attendance, reading 200-300 pages/week, weekly lead essays or oral responses to texts, showing up in mind & body each week.

Prerequisites: none, but a class in ENVI or ANTH preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, ENVI, STS majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 254(D2) ANTH 254(D2) ENVI 254(D2)

Writing Skills Notes: Students will write essays: either a lead essay of 1400 words, or written & oral feedback on the lead essay plus an oral response to text. Students receive intensive weekly feedback on their essays and a mid semester writing chat with instructor to negotiate and understand strengths and weaknesses of their writing.

Difference, Power, and Equity Notes: We will examine the ways that food systems reproduce social and structural inequalities within public health, environmental health, climate health. We also examined the interconnected nature of the health of our planet, food systems, forests, and fungal networks and how climate activism and action can fight unequal access to food, forests, nature, and health.

Writing Skills Notes: This is a writing intensive tutorial. Students will complete weekly written assignments and receive in-depth feedback to improve their writing. Over the course of the semester, students will write 10 papers ranging from 2-7 pages.

Attributes: ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

STS 262 (F) Paper Trails (DPE)

Cross-listings: SOC 262 / GBST 262

Secondary Cross-listing

Long before the invention of the passport, states or state-like entities sought to document and manage populations and discipline bodies. This course invites students to critically reflect on documentation practices and systemic violence, particularly against racial, ethnic, sexual, and political minorities. Students will explore identity-making through documentary practices such as the three-generation life history, a biographical form that Soviet-allied countries used to reward loyalty and punish disloyalty. Labels, such as a criminal record or pre-existing health conditions, also trail or precede individuals their whole lives. Students will grapple with what happens when the paper trail goes cold--when identification documents are invalidated, birth certificates withheld, household registries purged, and archives destroyed. Students will explore the rise of surveillance and biometric data alongside the actors, technologies, and industries that try to circumvent them in places such as the Xinjiang Uyghur Autonomous Region and along the US-Mexico border. In this project-based course, students will exhume paper trails and imagine alternative ways to create, alter, and subvert them.

Requirements/Evaluation: thoughtful and consistent class participation, facilitation of guest speakers, Special Collections visit, project memos, and final project and presentations

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Anthropology and sociology majors, Global Studies concentrators; Science and Technology Studies concentrators. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 262(D2) STS 262(D2) GBST 262(D2)

Difference, Power, and Equity Notes: In this course, students will interrogate some of the key documents that structure our lives and serve as tools for waging systemic violence against ethnic, racial, sexual, and political minorities. Students will synthesize and apply these lessons about bureaucratic documentation toward the benefit of a community partner.

Fall 2024

SEM Section: 01 MWF 8:30 am - 9:45 am Phi H. Su

STS 269 (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience (DPE) (WS)

Cross-listings: ASIA 269 / REL 269 / ANTH 269

Secondary Cross-listing

This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians, and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness for clinicians, therapists, and educators—all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation
practices all semester, while learning to better appreciate our own minds, emotions, and relationships.

**Requirements/Evaluation:** weekly tutorial papers and discussion

**Prerequisites:** A prior class or some experience with meditation is recommended

**Enrollment Limit:** 10

**Enrollment Preferences:** ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 269(D2) STS 269(D2) REL 269(D2) ANTH 269(D2)

**Writing Skills Notes:** This class will involve weekly tutorial essays or oral responses, intensive written feedback on every essay, and a mid-semester 'writing chat' with the instructor.

**Difference, Power, and Equity Notes:** This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can address the growing epidemic of anxiety, depression, and other mental health issues we find in the US today. We study mindfulness from an intersectional perspective and relate its benefits to intersecting inequities and intergenerational trauma in the US today.

**Attributes:** GBST South + Southeast Asia Studies  PHLH Social Determinants of Health

Not offered current academic year

**STS 275 (S) Environmental Science, Policy, and Justice (DPE)**

**Cross-listings:** ENVI 275

**Secondary Cross-listing**

Environmental science is much more than collecting data. Scientific experts are often called upon--and often position themselves--to guide environmental governance, which means that science has (some) power over public life. What is, and what should be, the relationship between science, on the one hand, and the creation and implementation of environmental policy, on the other? In this seminar we will study how science shapes governance and how science itself is governed. We will explore how legislatures, agencies, and courts respond to scientific information and uncertainty. And we will learn about how communities facing environmental racism and injustice collect data and use it in their advocacy. Along the way, we will challenge the idea of a unified "scientific method," and we will think about how Western scientific knowledge relates to other ways of knowing, including non-Western sciences, embodied knowledge, and traditional knowledge. Topics include: international climate negotiation, chemical exposure, the regulation of biotechnology, agricultural policy, pandemic responses, and plastics and electronics waste.

**Requirements/Evaluation:** several short essays, final essay

**Prerequisites:** none

**Enrollment Limit:** 18

**Enrollment Preferences:** juniors, seniors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 275(D2) ENVI 275(D2)

**Difference, Power, and Equity Notes:** This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. Using case studies we will analyze how communities facing environmental racism interact with scientists and sciences.

**Attributes:** ENVI Environmental Policy  EVST Social Science/Policy

Not offered current academic year

**STS 281 (F) Religion and Science**

**Cross-listings:** REL 281
Secondary Cross-listing

In the last few years the deniers of religion such as Dennett and Dawkins have forcefully argued that recent scientific developments show the degree to which religion is irrelevant to a modern understanding of what it means to be human. Atran and Boyer have made a similar case, arguing that recent progresses in our understanding of human cognition demonstrate that religion is a purely natural phenomenon that has little if any value for human development. Theologians such as Haught and Polkinghorne have rejected these views, arguing that a proper understanding of scientific developments such as evolution and quantum mechanics suggests religiously relevant views of the universe and our place therein. This course considers these competing perspectives while offering critical reflections on the views and categories involved in these controversies. We also examine the works of reflective naturalists such as Bellah and Herrstein, who argue that far from showing the irrelevance of religious ideas and practices, the new mind and life sciences suggest a much more nuanced view according to which religion is both grounded in the natural world and central to the development of human culture. Hence, it cannot be easily discounted as irrelevant to a scientifically informed understanding of what it means to be human.

Requirements/Evaluation: tutorial format. one paper every two weeks
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: preference for religion majors or future religion majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

STS 281(D2) REL 281(D2)

Fall 2024
TUT Section: T1 TBA Georges B. Dreyfus

STS 290 (S) Technologies of Friendship

Cross-listings: ENGL 290

Primary Cross-listing

Contemporary friendships—whether among roommates, near neighbors, or friends living thousands of miles apart—are highly mediated. We communicate and signal our attachment through Zoom windows, apps, and social media platforms, and we create ambiguous relationships with people whom we “follow” or “friend” without having met in person. Sometimes we text as much as we talk even with intimate friends, and carrying on in-person friendships was complicated in myriad ways by the Covid-19 pandemic. But friendships have always been mediated, and in this tutorial we will examine how writers across centuries have described the tools and technologies of friendship: some perhaps quaint or sentimental (for example the written letter) and others creepy or invasive (for example Apple’s “Find My” app or social media’s “suggestions”). We will ask common and important questions, such as “Can one have too many friends?”; “Are long-distance friendships sustainable?”; and “What health risks do we take for friendship, and what other risks do technologies of friendship carry?” Readings will include works of fiction and journalism, and scholarship from psychology, the history of technology, and science and technology studies. The technologies we will consider include emojis, coffeehouses, memes, letters, telephones, video games, social media, and novels themselves.

Requirements/Evaluation: Students will write essays and critique their partner’s essays in alternate weeks. Essays will receive detailed instructor feedback, including writing instruction.
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: STS concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 290(D1) STS 290(D2)
STS 301 (S) Social Construction (DPE)

Cross-listings: COMP 315 / WGSS 302 / SOC 301 / REL 301

Secondary Cross-listing

"Social construction" can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore look at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

Requirements/Evaluation: regular attendance and participation, short weekly reflection papers, a 8-10 page research paper, and final project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Preference will be given to majors and concentrators from STS, ANSO, COMP, REL, PHIL, WGGSS, AAS, LATS, JWST, and AFR. If the class is overenrolled students will be asked to submit an email about themselves and why they want to take the course.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 315(D1) WGSS 302(D2) STS 301(D2) SOC 301(D2) REL 301(D2)

Difference, Power, and Equity Notes: Central to REL 301 will be an analysis of the social construction of race, gender, and sexuality. It will show how power and difference are tied up in their construction and maintenance of these categories. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

SEM Section: 01 W 1:10 pm - 3:50 pm Jason Josephson Storm

STS 305 (F) Environmental Political Thought (WS)

Cross-listings: PSCI 305

Secondary Cross-listing

In the face of planetary crisis, it is as difficult as it is crucial to find the time and calm "to think what we are doing" (Hannah Arendt's famous line). This course aims to hold space for that thinking; to collaboratively find the presence of mind to take the measure of the doings that caused, and that may redress, the awful reality of earth’s degradation. To do so, we will read, discuss, and write about some of the most significant book-length works of environmental political thought published in the last five years. These books conceptualize and intervene into the politics of phenomena such as climate change, species depletion, toxic pollution and (a special interest of the instructor) waste by applying--and sometimes reinventing--approaches from political theory, political economy, science & technology studies, philosophy, and critical theory. They consider the enmeshment of environmental problems with race, colonialism, economic inequality, and speciesism, among other modalities of power, and weigh the promise of political action and organization to reconstitute relationships among earth's human and more-than-human elements. By interpreting, evaluating, applying and extending the arguments of these books in discussion and writing, students will be challenged to scrutinize their preconceptions and develop, support
and articulate original arguments about politics and the environment.

**Requirements/Evaluation:** Four mini-essays of 2-3 pages each; one final paper of 7-10 pages that incorporates substantially revised material from at least one mini-essay; class participation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Political theory concentrators, Political Science majors

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

PSCI 305(D2) STS 305(D2)

**Writing Skills Notes:** Students will discuss and fine-tune their writing processes in class and office hours. Students will be given written feedback on mini-essays, with particular attention to developing a sense of voice and purpose in written argumentation. This feedback will support their revision of at least one mini-essay as part of writing the final paper.

**Attributes:** PSCI Political Theory Courses

---

**STS 308 (S) What is Power?**

**Cross-listings:** REL 308 / SOC 308

**Secondary Cross-listing**

*What is power?* Despite the importance of notions of power across the social sciences, there is a broad lack of consensus. Is power essentially domination or resistance? Is it freedom, empowerment, privilege, or oppression? Are there forms of unequal social power which are morally neutral or even good? Is power the kind of thing held by individuals, races, genders, classes, discourses, causal mechanisms, institutions, or social structures? What is the connection between social and physical power? Does power obey laws? How does power relate to technology? Or knowledge? Or agency? Or ideology? This course begins with the observation that power is often described as a causal relation—an individual's power is supposed to equal their capacity to produce a change in someone else's behavior. This suggests that the better we can understand the nature of cause and effect, the better we can understand power. Fortunately, in recent decades philosophers have made significant progress in theorizing causation. Hence, this seminar will put two very different bodies of theory in conversation: critical theory about power and philosophy of science about cause and effect.

We will touch on classic philosophical accounts of power and causation, but focus our attention on more recent developments in philosophy of science, political theory, and other fields. The insights we gain in this course from analyzing the nature of power should empower us to more effectively transform society. It will help students in the social sciences to understand the nature of causation in the social world, and it will help students interested in political action to better understand the nature of power. Thinkers to be considered may include: Aristotle, Amy Allen, Hannah Arendt, Bourdieu, Judith Butler, Nancy Cartwright, Foucault, Gramsci, Byung-Chul Han, Han Feizi, Giddens, Steven Lukes, Machiavelli, J.L. Mackie, Marx, Nietzsche, and Max Weber. *(Note that in 2023 this course will also fulfill the senior seminar requirement for STS)*

**Requirements/Evaluation:** critical annotations for every class, midterm review essay (4-6 pages), final essay (10-12 pages)

**Prerequisites:** None.

**Enrollment Limit:** 15

**Enrollment Preferences:** STS concentrators, then Religion, Sociology, and Political Science majors.

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

*Not offered current academic year*
STS 312  (F)  Philosophical Implications of Modern Physics  (QFR)

Cross-listings:  PHYS 312 / PHIL 312

Secondary Cross-listing

Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Requirements/Evaluation:  attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper

Prerequisites:  MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS

Enrollment Limit:  20

Enrollment Preferences:  Philosophy majors and Physics majors

Expected Class Size:  20

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 312(D3)  PHIL 312(D2)  STS 312(D2)

Attributes:  PHIL Contemp Metaphysics + Epistemology Courses

Not offered current academic year

STS 319  (S)  Neuroethics  (WS)

Cross-listings:  PSYC 319 / NSCI 319

Secondary Cross-listing

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of “abnormal” personality; the use of “cosmetic pharmacology” to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation:  six 5-page position papers and five 2-page response papers as well as participation in discussions

Prerequisites:  PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

Enrollment Limit:  10

Enrollment Preferences:  Psychology majors and Neuroscience concentrators

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 319(D3)  STS 319(D2)  NSCI 319(D3)

Writing Skills Notes:  In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Spring 2025

TUT Section: T1   TBA   Noah J. Sandstrom
STS 323  (F)  Writing Gender in Sci-Fi and Speculative Fictions  (DPE)
Cross-listings:  WGSS 329 / ENGL 329

Primary Cross-listing
This creative writing course will pair selected readings in feminist STS and queer theory with science fiction, speculative fiction, and horror stories that together put questions to gender. How and when is sci-fi a home for radical re-imaginings of gender? When and why does "genre fiction" house (and facilitate) radical gender politics—or their opposite? Readings may include works by Octavia Butler, Ursula Le Guin, Brian Everson, and Samuel Delany. Students will both analyze these fictions and take them as inspirations for their own stories and worlds.

Class Format: This course balance seminar-style discussion with workshops examining students' creative writing.

Requirements/Evaluation: Students will be evaluated on three substantial pieces of writing, in multiple drafts. Students will be able to choose their balance of creative and analytical (expository) prose (2-1 or 1-2). Attendance, along with seminar and workshop discussion, will count toward the final grade. There will be no exam.

Prerequisites: none

Enrollment Limit:  25

Enrollment Preferences: STS concentrators; WGSS majors; students who have not taken other creative writing courses at Williams.

Expected Class Size:  25

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 329(D2) ENGL 329(D1) STS 323(D2)

Difference, Power, and Equity Notes: In this course students will confront and reflect on the operations of difference, power, and equity through readings, class discussions, and assignments. Readings include scholarship on the construction of gender and sexuality, as well as works of fiction that denaturalize the categories of sex and gender. Course assignments will include expository and creative writing, and students will work in both modes to imagine how this world could be otherwise and how other worlds could be.

Fall 2024
SEM Section: 01  W 1:10 pm - 3:50 pm  Ezra D. Feldman

STS 331  (S)  Automation in an Unequal Society  (DPE)
Cross-listings:  SOC 331

Secondary Cross-listing
Could you be competing for a job—even after getting a college degree—with a robot or an AI-powered chatbot? As technologies advance, every few years debates emerge: will this new kind of automation increase unemployment, or will it generate new kinds of jobs? Will these new jobs be more interesting and high paying, or will they be boring and poorly paid? To think these questions through, in this course we will study some key attempts to understand the socio-economic and political determinants as well as the repercussions of automation. We will delve into the micro-level dynamics operating between machines and workers involved in concrete production processes. We will also explore the macro-level trends in national and global inequality that social scientists associate with automation. In our investigation of both macro- and micro-levels, we will focus on how the risks and benefits of automation get distributed unevenly along already existing axes of class, race, gender, etc.

Requirements/Evaluation: Class participation; 1 mid-term paper proposal; 1 final paper

Prerequisites: none, open to all students

Enrollment Limit:  20

Enrollment Preferences: Preference given to ANTH/SOC majors and STS concentrators

Expected Class Size:  20

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 331(D2) STS 331(D2)
Difference, Power, and Equity Notes: The course is centrally concerned with the iniquitous distribution of risks and benefits of automation. Students will gain familiarity with how social scientists study the impacts of automation on class, racial, and gendered dynamics. We will consider how automation may disempower certain workers, and deepen already existing social segmentations.

Not offered current academic year

STS 340  Science, Religion, and the (post)colony: Critical approaches to the global history of knowledge  (DPE)
Histories of science and religion have been deeply intertwined with colonial and postcolonial history. Colonial claims to legitimacy were often rooted in perceptions of scientific and technological superiority, and colonial expansion often marched in lockstep with missionary activity and forced conversions. In the process, race and human difference emerged as concepts at the intersection of scientific and religious discourses and was forged within the colonial framework. This colonial history of science and religion impacted how scientific and religious thought, practices and institutions developed through the period of decolonization and into today. Similarly, the attendant history of race and human difference continues to influence postcolonial and contemporary discourses around race, ethnicity, identity and migration. In this course, we will trace key moments in the history of science and religion and their relation to coloniality. We will start in the sixteenth century with the rise of modern European empires, move into the height of modern colonialism, indigenous genocides and chattel slavery, and trace decolonization from the middle of the nineteenth into today. Throughout, we will investigate how science and religion emerged as concepts, practices and institutions, and how these narratives impacted, and were impacted by colonial expansion and history. We will pay particular attention to questions of race, gender, sexuality and human difference as key concepts and practices that emerged at the intersections of science, religion and (post)colonialism

Requirements/Evaluation:  2 response papers (3-5 pages each) + final project (could be a 10-15p paper or creative project of any kind)
Prerequisites: none
Enrollment Limit:  19
Enrollment Preferences:  Concentrators, followed by seniors and juniors
Expected Class Size:  15
Grading:  
Distributions:  (D2)  (DPE)

Difference, Power, and Equity Notes: The course addresses questions of race, gender, sexuality and human difference as seen through the history of science, technology and medicine. Students will creatively engage with critical race theory, postcolonial theory and queer theory. They will also investigate human suffering as a category that provides a deeper understanding of difference, diversity and equality.

Not offered current academic year

STS 363  (S)  Data for Justice Research Practicum  (DPE)  (QFR)
Cross-listings:  WGSS 363 / INTR 350 / AMST 363
Secondary Cross-listing
Civil rights activist, educator, and investigative journalist Ida B. Wells said that "the way to right wrongs is to shine the light of truth upon them." In this inclusive, collaborative, research-based course, students will bring statistical, computational, and/or mathematical approaches to bear on issues of social justice. Guided closely by the instructor, students will work in groups to carry out original research in an area such as criminal justice, education equity, environmental justice, health care equity, economic justice, or inclusion in arts/media. Prior research experience is not required; one goal of this course is to build skills for advanced research.

Class Format:  This course is an intensive research practicum. Formation of research groups and selection of research topics will be facilitated by the instructor. The primary modality of work is peer collaboration.

Requirements/Evaluation:  To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based, ungraded assessment framework.
Prerequisites:  INTR 150 (Data for Justice), or prior equivalent exposure to computing, statistics, and social justice topics as approved by the instructor.
Enrollment Limit:  10
Enrollment Preferences:  Students who have a declared major in Division I or II, who meet the prerequisites of the course, and who fill out the instructor's preregistration survey (contact the instructor for link).
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 363(D2) STS 363(D2) INTR 350(D2) AMST 363(D2)

Difference, Power, and Equity Notes: Students will research issues of social justice in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

Quantitative/Formal Reasoning Notes: Students will use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

Spring 2025

SEM Section: 02  TR 11:20 am - 12:35 pm  Chad M. Topaz

STS 370  (S)  Campus and Community Health in Disruptive Times  (DPE) (WS)

Cross-listings: ANTH 371 / WGSS 371

Secondary Cross-listing

We study and seek “campuses where students feel enabled to develop their life projects, building a sense of self-efficacy and respecting others, in community spaces that work to diminish rather than augment power asymmetries.” -- *Sexual Citizens* (Hirsch and Khan, 2020). Students will design and pursue innovative ethnographic projects that explore campus or community health. We will learn ethnographic techniques such as observant participation, interviewing, focus groups, qualitative surveys, as well as design thinking and data visualization skills. We use and critique the methods of medical anthropology and medical sociology in order to hone our skills in participatory research. Every week, we collaborate with and share our research with our participants and peers both inside and outside class through a variety of innovative exercises. We attend to the parallel roles of narrative and listening in both medicine and ethnography, as we contrast the discourse of providers & patients along with researchers & participants.

We aim to understand the strengths and limits of ethnographic inquiry while privileging marginalized voices and attending to power and identity within our participatory research framework. We recognize that our campus health projects are always already shaped by power and privilege, as we examine the ways that daily life, individual practices, and collective institutions shape health on and off campus. Our ethnographic case studies explore how systemic inequalities of wealth, race, gender, sex, ethnicity, and citizenship shape landscapes of pediatric care, mental health, maternity care, and campus sexual assault in the US and elsewhere. We consider how lived practices shape health access & outcomes as well as well-being in our communities and on our campus.

Requirements/Evaluation: Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a final presentation that includes data visualizations and analysis of research findings.

Prerequisites: A course in Anthropology, Sociology, STS or in DIV II is strongly recommended

Enrollment Limit: 19

Enrollment Preferences: Majors in Anthropology, Sociology, WGSS; Concentrators in PH, STS, ASIA, ENVI

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 371(D2) WGSS 371(D2) STS 370(D2)

Writing Skills Notes: This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

Difference, Power, and Equity Notes: This class uses experiential learning to examine the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It explores the ways that intersectionality and implicit bias shapes health and well-being in patient/provider encounters as well as ethnographic research. It engages with and critiques efforts to ‘improve’ community and individual health outcomes in the US and elsewhere across the globe.

Not offered current academic year
STS 373  (S)  Technologies of Race  (DPE) (WS)
Cross-listings:  AMST 372 / AFR 374

Secondary Cross-listing

This course is an introduction to theories, methods, sources, and approaches for interdisciplinary research and creativity in and through the interdisciplinary field of American Studies. We will focus on the intersection of race, gender, sexuality, and disability with modern media technologies, from early photography in the mid-19th century to contemporary trends in machine learning and artificial intelligence. Through a process of shared inquiry, course participants will investigate the ways that historical legacies of oppression and futuristic speculation combine to shape human lives in the present under racial capitalism. Whether analyses of the automation of militarized border control in Texas, or of the ways that obsolete, racist concepts are embedded in machine vision and surveillance systems, the readings in the course will chart out the key moments in the co-evolution of race and technology in the Americas. Students will gain a working competence in all four tracks of the American Studies major (Space and Place; Comparative Studies in Race, Ethnicity, and Diaspora; Arts in Context; and Critical and Cultural Theory). Finally, we will also explore alternative paths toward a future where technology might help to effect the abolition of oppressive structures and systems, rather than continue to perpetuate them.

Requirements/Evaluation:  Four papers, in-class writing/reflective work, and a final exam.

Prerequisites:  none

Enrollment Limit:  16

Enrollment Preferences:  AMST majors or prospective majors.

Expected Class Size:  16

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 372(D2)  STS 373(D2)  AFR 374(D2)

Writing Skills Notes:  Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one’s thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes:  This course requires students to contextualize technologies historically and in relation to one another, with attention to their entanglements with racial discourses and racism. Students gain critical skills that equip them to imagine possible futures where technologies serve increasingly as abolitionist tools.

STS 376  (F)(S)  Human-Computer Interaction

Cross-listings:  CSCI 376

Secondary Cross-listing

Human-Computer Interaction (HCI) principles are practiced in the design and evaluation of most software, greatly impacting the lives of anyone who uses interactive technology and other products. There are many ways to design and build applications for people, so what methods can increase the likelihood that our design is the most useful, intuitive, and enjoyable? This course provides an introduction to the field of human-computer interaction, through a user-centered approach to designing and evaluating interactive systems. HCI draws on methods from computer science, the social and cognitive sciences, and interaction design. In this course we will use these methods to: ideate and propose design problems, study existing systems and challenges, explore design opportunities and tradeoffs, evaluate and improve designs, and communicate design problems and solutions to varying audiences.

Requirements/Evaluation:  course projects, in-class group work/participation, and exams

Prerequisites:  CSCI 136

Enrollment Limit:  24
Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

STS 378 (S) Human Artificial Intelligence Interaction

Cross-listings: CSCI 378

Secondary Cross-listing

Artificial intelligence (AI) is already transforming society and every industry today. In order to ensure that AI serves the collective needs of humanity, we as computer scientists must guide AI so that it has a positive impact on the human experience. This course is an introduction to harnessing the power of AI so that it benefits people and communities. We will cover a number of general topics such as: agency and initiative, AI and ethics, bias and transparency, confidence and errors, human augmentation and amplification, trust and explainability, and mixed-initiative systems. We explore these topics via readings and projects across the AI spectrum, including: dialog and speech-controlled systems, computer vision, data science, recommender systems, text summarization, and UI personalization, among others.

Class Format: Lecture content is delivered via video, and in-class time will be spent doing hands-on activities or in group discussion.

Requirements/Evaluation: homework, programming assignments, group work, participation, and quizzes

Prerequisites: CSCI 136, and at least one of CSCI 237, 256, or 334

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: yes pass/fail option, no fifth course option

Attributes: COGS Interdepartmental Electives

Not offered current academic year

STS 379 (F) Animals and Society

Cross-listings: ENVI 380

Secondary Cross-listing

How do humans and animals shape each other’s lives? People encounter animals in farms, laboratories, zoos, wildernesses, and backyards, on purpose and by chance. They treat animals as family members, entertainment, food, vectors of disease, and objects of scientific wonder. Drawing on the works of biologists, philosophers, and feminist science and technology studies scholars, this seminar will examine our relationships with animals and help clarify our responsibilities to them. We will ask: What are the social and environmental consequences of consuming animals? Should humans swim with dolphins, feed manatees, use gene-editing to create species that can survive climate change? Should moral standing depend upon the ability to communicate or the ability to experience emotions like grief and joy? What can animal models tell us about human health and society, and when is animal otherness too large a gap to bridge? What might human violence toward animals tell us about sexism, racism, or capitalism, and what will human-animal relationships look like in the future?
The history of science is full of monsters. From the grotesque homunculi of alchemical lore, through the stitched-together corpses of the gothic imagination, to the fearsome mutants of the atomic age, each era has birthed its own nightmares as it has strived to unlock the secrets of nature. At the heart of this course lies the premise that monsters—be they born of alchemy, literature, or the lab—serve as critical mirrors to a society's norms, embodying the deviations and transgressions against the constructed "normal" within various cultural and historical contexts. Monsters often challenge and redefine boundaries, reflecting inherent ideas of the natural, anxieties about gender and race, and troubling binary oppositions such as human versus animal, animate versus inanimate, and the living versus the dead. This course will show how the concept of monstrosity has shaped scientific inquiry, medical practices, and technological advancements. We will trace a roughly chronological and thematic journey navigating through different epochs and aspects of monstrosity: from early notions of the connection between demons and disease, through the marvels of the "Scientific Revolution," to the spectacle of anatomical wonders and "freak shows." We will explore the eerie corridors of Gothic and early horror literature, where science births its own type of monsters, and scrutinize how the dawn of evolutionary theory produced new notions of monsters, mutants, and other anomalous bodies. The course will further examine the dark intersections of eugenics, race, and monstrosity, before venturing into the realm of genetic anomalies and anxieties reflecting changing notions of biological inheritance. We will explore the concepts of abjection and the monstrous feminine, revealing how monstrosity intersects with the constructions of gender, sexuality, and desire. We will spend a week on the psychological appeal of horror and speculations about why we love to be terrorized. Finally, we look ahead to the future, contemplating how ongoing scientific and medical innovations continue to redefine the boundaries of what is considered monstrous. (This course will function as a senior seminar for Science & Technology Studies concentrators, but it is also open to students with other concentrations/interests.)
Requirements/Evaluation: Weekly critical reflections, an independent research project culminating in a 10-15 page research paper (Alternatively, students may opt to create a work of fiction paired with a shorter research paper instead of the final research paper, pending the instructor's approval).

Prerequisites: none.

Enrollment Limit: 15

Enrollment Preferences: Preference will be given to STS concentrators.

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: STS Senior Seminars

---

This course requires students to contextualize historical events during the Cold War in relation to racialization, inequitable distributions of resources, and the stratification of national space in relation to risk and radioactivity. Students gain critical skills that equip them to see the ways in which the Cold War continues to shape processes of racialization, oppression, and imperial extraction, and spatial arrangements.

Primary Cross-listing

Are Feminism and Science compatible commitments? What do these nouns mean when paired with one another, when capitalized (or not), when pluralized (or not), and when deployed by a range of authors in different disciplines? Scholars of feminist science and technology studies (FSTS) have addressed these questions in their studies of scientific objectivity, technological vulnerability, environmentalism, and the makings (or doings) of race as well as gender. We will explore these questions and topics with a view to identifying the range of ethical, political, and epistemological practices within feminist and critical technoscience. We will read theoretical texts in FSTS, such as Donna Haraway’s “Situated Knowledges” and Safiya Umoja Noble's “A future for intersectional black feminist technology studies.” We will also read case studies, such as Pat Treusch’s “The Art of Failure in Robotics” and Emily Martin's “The Egg and the Sperm: How Science Has Constructed a Romance Based on Stereotypical Male-Female Roles.” While our preliminary readings will be set in advance, students will help shape the syllabus as we advance toward a better understanding of feminist technoscience’s potentials and limitations at a time when technical change often outpaces careful consideration of its consequences.

Requirements/Evaluation: discussion participation; five response papers (~2 pages); mid-semester essay (8 pages); annotated bibliography; final research project (12-15 page essay + in-class presentation)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Science and Technology Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 413(D2) WGSS 413(D2)

Difference, Power, and Equity Notes: Central to "Feminist Technoscience" is a recognition of and engagement with the historical under-privileging of women, women's work, and women's bodies in capital-S "Science" and in a wide range of other technoscientific practices. We will examine and elucidate several branches of feminist theory. We will also examine feminist accounts of contemporary technoscientific work as well as critical STS with a focus on race.

Winter Study

STS 99 (W) Independent Study: Science and Technology Studies

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
The Self-Instructional Languages Program (SILP) enables students to study important foreign languages relevant to their academic interests but not taught in regular courses at Williams. The program can field a limited number of courses per year; a Self-Instructional Languages course will be scheduled only if and when at least two students are accepted for study and a tutor/examiner have been contracted. In the past, we have offered one-year long American Sign Language Elementary Hebrew, Hindi, Korean, Persian, Portuguese, and Swahili courses. Students work independently with standard language textbooks and audio materials for roughly ten hours per week and attend twice-weekly group review sessions with tutors who are native speakers. Language faculty from other institutions provide the course syllabus, conduct the exams, and determine the final grades. An organizational meeting for enrolled students is held the first week of each semester.

Interested students must complete an application and have it approved before registering for a course. More information can be found on the Self-Instructional Languages site.

Note that like other elementary language courses, the Self-Instructional Languages courses are hyphenated, meaning no credit is given for the first semester if the second semester is not completed. Students must normally begin a course in the fall semester. It cannot be taken Pass/Fail.

A consecutive year of intermediate language study will be considered only upon petition of those students completing a full year of elementary study with the Self-Instructional Languages Program and as long as a minimum of two students are enrolled to continue their language study.

All courses adhere to the guidelines of the National Association of Self-Instructional Language Programs (NASILP).

SILP 101 (F) Elementary Hebrew

Interested students must complete an application through the Self-Instructional Languages Program and have it approved before registering for this course. Introduction to the alphabet and language structure with emphasis on communicative skills. Students will receive a foundation in the language, be able to hold simple conversations, use a range of vocabulary related to daily activities and transactions, and gain familiarity with basic, frequently used grammatical structures and the writing system of the language. Students must be highly motivated in self-instructional learning, and will work with an outside tutor/examiner. This is a hyphenated course and requires a full-year of study in order to receive credit. More information can be found on the Self-Instructional Languages site.

Class Format: Twice-weekly review sessions

Requirements/Evaluation: Written and oral midterm and final exams.

Prerequisites: Sophomore or higher standing with a GPA of 3.0 or higher; application to the Self-Instructional Languages Program in April.

Enrollment Limit: 6

Enrollment Preferences: Interested students must complete an application through the Self-Instructional Languages Program and have it approved before registering for this course; this is a hyphenated course and requires a full-year of study to receive credit.

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences.

Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. Archaeology extends this analysis to social formations of the historical and prehistorical past. Sociology studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.
MAJORS

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

Requirements

For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

Core Courses

Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

**Anthropology**
- ANTH 101 How to Be Human

**Sociology**
- SOC 101 Invitation to Sociology

**Joint Courses**
- ANSO 205 Ways of Knowing
- ANSO 305 Social Theory
- ANSO 402 Senior Seminar

Elective Courses

Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

STATISTICS AND DATA ANALYSIS

In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student’s departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don’t have access to all the salient information until AFTER they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. We credit two, and in special cases three courses.
Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

SOC 101  (F)(S)  Invitation to Sociology  (DPE)

This course provides students with an introduction to sociological analysis and an overview of sociology as a discipline. We will focus on the relationship of individuals to the social world and become acquainted with systematic institutional analysis. Students will explore the intersection of biography, history, culture, and social structure as seen in the work of classical and contemporary social thinkers, including Marx, Durkheim, Weber, Simmel, Du Bois, and Goffman. Special consideration will be given to the social and cultural problems of capitalism, rationality and irrationality in modern institutions and organizations, the psychological dilemmas facing the individual in modern society, and the problem of social order and conflict. Students will emerge from the semester equipped with an analytical lens that will enable them to see the social world -- ranging from everyday interactions to broad political struggle -- in a new light.

Requirements/Evaluation:  Thoughtful and consistent participation, several research memos and presentations, book review, final research paper

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: strictly limited to first-year students and sophomores (with exceptions for declared ANTH or SOC majors)

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

Difference, Power, and Equity Notes: This course interrogates the social construction of identities, and how these differences manifest unequally in institutions.

Fall 2024
LEC Section: 01  MW 11:00 am - 12:15 pm  Christina E. Simko
LEC Section: 02  TF 1:10 pm - 2:25 pm  Ben Snyder

Spring 2025
LEC Section: 01  TR 11:20 am - 12:35 pm  Olga Shevchenko
This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

**Class Format:** This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.

**Requirements/Evaluation:** Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

**Prerequisites:** None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

**Enrollment Limit:** 18

**Enrollment Preferences:** Students without prior college-level courses in statistics and programming.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

**Difference, Power, and Equity Notes:** This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGTBO+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

**Quantitative/Formal Reasoning Notes:** This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

---

**SOC 201 (S) Science, Technology, and Human Values**

This course offers an introduction to science and technology studies. Attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. With widespread use of new social media, controversial developments in such bio-technical practices as gene-editing and the cloning of mammals, rapid advances in various forms of technological surveillance, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. As with other features of modernity, however, technology has also had significant, albeit largely unanticipated, social consequences. This course will focus on the less often examined latent functions of science and technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.
This course is cross-listed and the prefixes carry the following divisional credit:

SOC 216 (F) The City

Modern humans have moved to the city, a site with concentrated powers of various kinds, this move has effected irreversible change in human life. We will examine these forces through readings in urban theories as well as ethnographic studies. We will address themes such as the organization of urban life, the political economy of cities, housing and homelessness, and urban planning. The city is also the chief site of cultural production and meaning, and our scope of interest will range from studying subcultures, to reading graffiti, to analyzing monuments. Bearing in mind the inexorable social change of past decades, we will reconsider some classical thought on urban life in the context of postmodern discourse, conceptualize the post-industrial and global city, and conclude with an examination of the problems faced by cities in developing countries. This course is designed to provide students with a comprehensive introduction to urban studies. Students will become familiarized with both classical and modern urban theories, and in reading ethnographies they will have an opportunity to understand some fundamental methodological approaches to the study of the city.

Requirements/Evaluation: response papers, mid term exam and final research paper
Prerequisites: none
Enrollment Limit: 20

SOC 218 (S) Law and Modern Society
This class is designed to introduce students to the field of law and society. The course begins with an overview of the various theoretical perspectives on the subject, including Durkheimian, Marxist, Foucauldian, and Weberian analyses of law and society; as well as the work of those following in the different theoretical schools established by these scholars. Informed by the theoretical overview, the next part of the course considers empirical research in selected areas of law, including tort law, criminal trial procedures, “community justice,” jury trials, and the adjudication of drug offenses. Recognizing that understandings of our own legal practices are enlightened through comparisons to other legal systems, the second half of the course is primarily historical/comparative in focus. In this section, through an exploration of several case studies, American legal processes and habits are compared with related legal practices in such places as Japan, England, Scotland, Ireland, Australia, Germany, Norway, and Canada.
Class Format: discussion
Requirements/Evaluation: a short paper and midterm and final exams
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: Priority given to sociology majors.
Expected Class Size: 30
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
Attributes: JLST Interdepartmental Electives

Spring 2025
LEC Section: 01 MR 1:10 pm - 2:25 pm James L. Nolan

SOC 219 (F) Images and Society
"This is obvious!" is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images—and even vision itself—are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, "high" art and popular culture.
Requirements/Evaluation: active class participation, several short papers, and a final project
Prerequisites: none; open to all
Enrollment Limit: 15
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
SOC 221  (F)  Money and Intimacy

Does money matter in affectionate relationships? Can dollars buy love and care? What impact does market economics have on intimate relationships? This course will examine these questions and their relevance over the course of history, considering what forces have contributed to the shift in thinking about them, and, most importantly, how sociological research and knowledge helps us understand their current status. We will look into a wide range of aspects of private life that require actors to mix personal affairs with financial transactions, including romantic encounters, marriages (and divorces), families of various kinds and compositions, child adoptions, and outsourced care for dependents to name just a few. Intimacy carries different value and content in these contexts, as so does handling exchanges within them, and negotiating the balance of intimate and economic exchanges also necessitates applying diverse strategies vis-à-vis the external social world. The course will simultaneously look into the changing character of the economy as it has responded to shifting social values. We will specifically focus on how previously private concerns have penetrated the public sphere and shaped the evolution of what has been dubbed ‘emotional capitalism’. People skills, teamwork, emotional labor, commodification of intimacy, care, sex, and body parts, are only few examples of the central concepts at stake. Naturally, a reflection on the growth of new technologies and social media will enrich many of the discussed themes.

Requirements/Evaluation: Each student will be expected to write a final research paper. Other requirements will include response papers to assigned readings and films, as well as contributions to both classroom and Glow discussions. There will be no final exam.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

SOC 224  (F)  Going Nuclear: American Culture in the Atomic Age

Cross-listings: HIST 273 / STS 224

Primary Cross-listing

This course will examine the historical development and use of the nuclear bomb. Among other features of the early atomic age, the course will look at the Manhattan Project, the delivery of the bombs for combat, the destructive effects of the bomb’s initial use in Hiroshima and Nagasaki, and the ongoing testing of nuclear weapons in the Marshall Islands after WWII. The class will investigate the role of the nuclear arms race in the Cold War, the consequences of nuclear production on specific communities, and the implications of the atomic age on our critical understanding of technological innovation more generally. We will also consider the saliency of competing narratives interpreting America’s decision (and continuing policies) to build, use, and stockpile nuclear weapons. Employing both sociological and historical perspectives, we will explore the interactions between science, politics, and culture in the nuclear age.

Requirements/Evaluation: a midterm, a final exam, and a 10- to 12-page research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Preference given to sociology and history majors.

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 226  (F) The Working Globe: North and South Workers in Globalized Production  (DPE)

Primary Cross-listing
The course introduces students to the concept of globalization of production by focusing on how workers from distant cities and villages across the Global North and South are joined together in the same transnational labor processes. We will reflect on case studies that trace the real-world production of everyday goods and services like automobiles, garments, retail, and electronics. We will map global supply chains and investigate how they exploit and reproduce global inequalities. Focusing specifically on the labor process and on the condition of workers, students will acquire a grounded perspective on the global economy, as well as on the dynamics underlying precarity, deindustrialization, and uneven development. The key guiding concern for the course will be to understand the relationship between workers of the North and South: Does global production place these workers in a relation of fundamental conflict, or can a community of interest emerge between them?

Class Format: Assignments will require group work and presentations
Requirements/Evaluation: Class participation; 1-2 group presentations; 1 final paper
Prerequisites: None, open to all students
Enrollment Limit: 20
Enrollment Preferences: Preference given to ANTH/SOC majors and GBST concentrators
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 226(D2) SOC 226(D2)

Difference, Power, and Equity Notes: Primarily the course investigates how historical inequalities between countries are reproduced by centering production relations and the site of work. Students will delve deeply into the inequality between workers of the global North and South, and they will also encounter situations where these differences intersect with racial and gendered dynamics.

Not offered current academic year

SOC 228  (S) The Panopticon: Surveillance, Power, and Inequality  (DPE)

Primary Cross-listing
Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today's "surveillance societies" just by doing everyday activities. This course uses the metaphor of the "Panopticon" as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing when they are being observed. In Discipline and Punish, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the "disciplinary" power that lies at the heart of inequality in modern society. Since Bentham and Foucault's time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today's surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Can privacy, convenience, and safety ever be truly balanced? Topics include: the historical origins and expansion of surveillance in modern societies, policing and state surveillance, and social media surveillance.

Requirements/Evaluation: participation, reading responses, midterm essay, final paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 229(D2) SOC 228(D2)

Difference, Power, and Equity Notes: This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance by police in Baltimore City and the question of if and when surveillance is appropriate there, given the city’s ongoing crisis of citizen and police violence. Students will discuss police surveillance in a context shaped by racial segregation and class inequality.

Spring 2025

SEM Section: 01    MR 2:35 pm - 3:50 pm    Ben Snyder

SOC 230 (S) Memory and Forgetting (DPE)

Cross-listings: AMST 233

Primary Cross-listing

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even “individual” memories take shape through social frameworks, and we also remember “collectively” through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart—forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of “cosmopolitan” or “transcultural” forms of memory? Topics will include autobiographical memory and self-identity; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

Requirements/Evaluation: thoughtful and consistent class participation; an autobiographical essay (4-5 pages); four response papers (2 pages each); and a research paper (8-10 pages) with class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 230(D2) AMST 233(D2)

Difference, Power, and Equity Notes: This course pays particular attention to how power and inequality shape narratives about the past. We will examine and compare several efforts to transform national memories, such as the Equal Justice Initiative memorial in the United States and the Truth and Reconciliation Commission in South Africa. In doing so, we will also consider the role of memory and memorialization in broader processes of social change.

Not offered current academic year

SOC 241 (S) Meritocracy

Cross-listings: PSCI 241

Secondary Cross-listing

Although fewer than 1% of Americans have a degree from the country’s top 30 colleges and universities, 39% of Fortune 500 CEOs, 41% of federal judges, 44% of the writing and editorial staff at the New York Times, 64% of Davos attendees, and 100% of Supreme Court justices do. Is this a
positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy—rule by the intelligent—in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

Requirements/Evaluation: one short paper, one long paper, take-home final exam, discussion questions, class participation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Political Science and Sociology majors, first-years and sophomores intending a Political Science or Sociology major

Not offered current academic year

SOC 244 (F) What They Saw in America
Cross-listings: HIst 366 / AMST 244
Primary Cross-listing
This course traces the travels and writings of important observers of the United States, including Alexis de Tocqueville, Max Weber, G.K. Chesterton, Sayyid Qutb, and Wang Huning. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider's view of America—one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors’ respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race.
Requirements/Evaluation: A midterm examination, two short essays, and a final paper.
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Priority given to Sociology, History, Anthropology, and American Studies majors.

Fall 2024
SEM Section: 01 MR 1:10 pm - 2:25 pm James L. Nolan

SOC 246 (F) Goals Points Seconds
Sport is sometimes dubbed a civic religion in America. Figuratively, it has its values to uphold and rituals to follow, its professional sport gods to worship. Engaging in sports -- whether actively as athletes or passively as fans -- supplies a sense of personal identity, provides a basis for community, and even injects meaning into their lives. In the broader society, the world of sport anchors social hierarchies and mirrors other social dynamics. Through the analysis of the world of sports and athletics, broader social trends and trajectories can be traced. While some of these trends are a century old, some of them have evolved relatively recently, as sport has moved beyond its traditional role as ritual and recreation and become a
centerpiece of capitalism and consumer culture. Particular attention will be paid to changing values and practices associated with amateur and professional sports, the transformation of collegiate sports, social mobility through athletics, the role of media and marketing, the rise of sports betting, esports, and the culture of sports celebrity and fandom.

Requirements/Evaluation: 12-page research paper; 2 response papers; group project; active participation in discussions
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: seniors; juniors; if relevant no more than 2 students per athletic team (lottery would be applied)
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Fall 2024
SEM Section: 01    MR 1:10 pm - 2:25 pm    Marketa Rulikova

SOC 252  (F) Im/mobilities  (DPE) (WS)
Cross-listings: AMST 252 / AAS 252
Primary Cross-listing

We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic revealed, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move—or to stay still.

Requirements/Evaluation: Thoughtful and consistent class participation, several short reflection papers, two drafts of an opinion essay, class presentation
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Given to first-year students and sophomores, particularly those who have demonstrated an interest in AAS/SOC. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 252(D2) AAS 252(D2) SOC 252(D2)

Writing Skills Notes: Emphasis on the processes of writing and revising, several short papers on which students will receive close feedback, and drafts of a final written assessment
Difference, Power, and Equity Notes: This course explores a politics of im/mobilities: how we move through space through different bodies at the intersection of race, class, gender, ability, and citizenship. Students will use their own bodies as research sites for deepening their understanding of how we navigate the freedom to move or stay still.

Fall 2024
SEM Section: 01    MR 2:35 pm - 3:50 pm    Phi H. Su

SOC 255  (F) Race, Environment, and the Body

SOC 255  (F) Race, Environment, and the Body
Cross-listings: AFR 255 / AMST 257 / ENVI 256

Secondary Cross-listing

This course examines the relationship between structural racism and racial/ethnic health disparities. Through class discussions of readings and media images, we will explore three topics: 1) how racism intersects with classism, sexism, and xenophobia to govern the implementation of local, state and federal health care policies; 2) how the uneven enforcement of health care policies ultimately produces differences in mortality, morbidity, and quality of life among various populations; and 3) anti-racist public health scholarship that offers strategies for creating racial health equity.

Class Format: Discussion

Requirements/Evaluation: Class participation, 2-3 short papers (5-7 pages), and a final presentation

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Preference given to AFR majors, ENVI concentrators and majors, and ANSO majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

SOC 262 (F) Paper Trails (DPE)

Cross-listings: STS 262 / GBST 262

Primary Cross-listing

Long before the invention of the passport, states or state-like entities sought to document and manage populations and discipline bodies. This course invites students to critically reflect on documentation practices and systemic violence, particularly against racial, ethnic, sexual, and political minorities. Students will explore identity-making through documentary practices such as the three-generation life history, a biographical form that Soviet-allied countries used to reward loyalty and punish disloyalty. Labels, such as a criminal record or pre-existing health conditions, also trail or precede individuals their whole lives. Students will grapple with what happens when the paper trail goes cold--when identification documents are invalidated, birth certificates withheld, household registries purged, and archives destroyed. Students will explore the rise of surveillance and biometric data alongside the actors, technologies, and industries that try to circumvent them in places such as the Xinjiang Uyghur Autonomous Region and along the US-Mexico border. In this project-based course, students will exhume paper trails and imagine alternative ways to create, alter, and subvert them.

Requirements/Evaluation: thoughtful and consistent class participation, facilitation of guest speakers, Special Collections visit, project memos, and final project and presentations

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Anthropology and sociology majors, Global Studies concentrators; Science and Technology Studies concentrators. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 262(D2) STS 262(D2) GBST 262(D2)

Difference, Power, and Equity Notes: In this course, students will interrogate some of the key documents that structure our lives and serve as tools for waging systemic violence against ethnic, racial, sexual, and political minorities. Students will synthesize and apply these lessons about
This course examines the relationship between religious and environmental thought in American cultural history. Exploring a broad range of practices, stories, and beliefs, we will examine the spiritual roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have religious writers, thinkers, and artists shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biological theory, Buddhist eco-spirituality, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 291(D2) REL 291(D2) SOC 291(D2)

Writing Skills Notes: Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

Attributes: ENVI Humanities, Arts + Social Science Electives
ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

**Requirements/Evaluation:** regular attendance and participation, short weekly reflection papers, a 8-10 page research paper, and final project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Preference will be given to majors and concentrators from STS, ANSO, COMP, REL, PHIL, WGSS, AAS, LAT5, JWST, and AFR. If the class is overenrolled students will be asked to submit an email about themselves and why they want to take the course.

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 315(D1) WGSS 302(D2) STS 301(D2) SOC 301(D2) REL 301(D2)

**Difference, Power, and Equity Notes:** Central to REL 301 will be an analysis of the social construction of race, gender, and sexuality. It will show how power and difference are tied up in their construction and maintenance of these categories. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

**SOC 303 (S) Cultures of Climate Change**

**Cross-listings:** ENVI 303

**Secondary Cross-listing**

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about what climate change means? How does something as complex as climate change become a "problem" in the first place? And what can its many proposed "solutions" tell us about the role of culture in environmental policy, politics, and decision-making. This course will explore a broad array of factors, from religion to race, class to colonialism. Emphasizing ethnographic and historical accounts of climate change as lived experience, it will apply a range of theories from the social sciences and humanities to case studies from around the world.

**Requirements/Evaluation:** a 15- to 18-page research paper and several shorter writing assignments

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

---

**SOC 308 (S) What is Power?**

**Cross-listings:** REL 308 / STS 308

**Secondary Cross-listing**
What is power? Despite the importance of notions of power across the social sciences, there is a broad lack of consensus. Is power essentially domination or resistance? Is it freedom, empowerment, privilege, or oppression? Are there forms of unequal social power which are morally neutral or even good? Is power the kind of thing held by individuals, races, genders, classes, discourses, causal mechanisms, institutions, or social structures? What is the connection between social and physical power? Does power obey laws? How does power relate to technology? Or knowledge? Or agency? Or ideology? This course begins with the observation that power is often described as a causal relation—an individual's power is supposed to equal their capacity to produce a change in someone else's behavior. This suggests that the better we can understand the nature of cause and effect, the better we can understand power. Fortunately, in recent decades philosophers have made significant progress in theorizing causation. Hence, this seminar will put two very different bodies of theory in conversation: critical theory about power and philosophy of science about cause and effect.

Requirements/Evaluation: critical annotations for every class, midterm review essay (4-6 pages), final essay (10-12 pages)

Prerequisites: None.

Enrollment Limit: 15

Enrollment Preferences: STS concentrators, then Religion, Sociology, and Political Science majors.

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

SOC 313  (S)  The 626 (DPE)

Cross-listings: AAS 312

Primary Cross-listing

Ryka Aoki's Light from Uncommon Stars is "a defiantly joyful adventure in California's San Gabriel Valley, with cursed violins, Faustian bargains, and queer alien courtship over fresh-made doughnuts." What sociological insight could a sci-fi novel about intense extracurricular pressure, food, and foreignness have to offer about the San Gabriel Valley, area code 626? In this course, we take the fantastical characters and plots of Aoki's novel as an invitation to delve into the histories of Asian American settlement to Gabrielino/Tongva lands on the eastern fringes of present-day Los Angeles County. The multilingual boba shops, restaurants, and store fronts throughout the valley mask a history of violent backlash and English-only initiatives. Media reports of academic and musical prodigies skew a broader socioeconomic picture that includes crimmigration, deportation, and xenophobia. And the figure of an intergalactic refugee mother exposes the toll that crossing borders takes on individuals, families, and communities. In this project-based course, we survey the formation of a particular place and its surroundings. In doing so, students grapple with general questions such as: How does migration shape intergenerational dynamics? When and with what tools do people confront racism and intersecting forms of discrimination? How do ethnic enclaves form and fracture? And how do communities mobilize for political rights?

Requirements/Evaluation: thoughtful and consistent participation; mock film festival screening and vote; regular writing assignments; teach-ins

Prerequisites: N/A

Enrollment Limit: 15

Enrollment Preferences: ANSO majors and AAS concentrators. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: This course explores the making of the San Gabriel Valley as the "Asian American Holy Land." It delves into actors’ diverse responses to the model minority stereotype, class, and belonging. Students will evaluate (pan)ethnicity as something to be explained, rather than explanatory, and consider the gaps between diversity and inclusion versus equity in the so-called majority-minority context of the 626.

Attributes: AAS Core Electives

SEM Section: 01    TF 2:35 pm - 3:50 pm     Phi H. Su

SOC 320  (S)  Thinking the Family Album

What is a family? How does it function as a metaphor, and is this metaphor a political one? How does the family remember, and how does it tell its own story? What do everyday forms of family memory, like scrapbooks and family photo albums, do to shape the family? Are they a thing of the past? What comes to replace them? Who talks through them, and who is there to listen? And how can we reclaim the many untold stories and unheard voices by engaging with the idea of a family album? This course will convene as a seminar in which the participants will engage with the notion of the family as a social institution, and with the genre of family photography as one of the key practices through which this institution is experienced and upheld. We will pay particular attention to the idea of a family album, as an object and as a metaphor, as expressed in the controversial exhibition The Family of Man (1955) and its critical reception, or in the ongoing participatory project Family Pictures USA by Thomas Allen Harris. The seminar's goal is to unsettle the uniform notion of the family, and to experiment with ways of making the genre of family photography better reflect the difficult and varied histories that the notion of the family may conceal.

Requirements/Evaluation: Thoughtful and consistent class participation, three position papers and a final project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors

SOC 329  (F)  Capitalism and the Future of Work

What does it mean to work? How does capitalism shape the way we work? What might work look like in the future? In this three-part course, students engage with global capitalism's past, present, and future, asking analytic and normative questions about work and the trajectory of capitalism. The first part of the course examines the historical origins of capitalism and leading theories about what capitalism is and how it stratifies the world into racialized social classes. A central theme in part one will be how capitalist labor relations shape meaning and subjectivity, particularly the experience of dignity. In part two, we examine recent and emerging trends in capitalist labor, such as the death of the career, the rise of the "gig" economy, platform capitalism, and even the seemingly inevitable end of work itself as entire occupations become automated by machine learning. A key question will be how these transformations exacerbate and/or alleviate longstanding inequalities from capitalism’s 19th century past. The course concludes by asking students to imagine a better vision for work in the next century. Should we continue to work at all? What kinds of productive activity should we value, and how would we go about taming, eroding, or even smashing capitalism to allow them to flourish?

Requirements/Evaluation: participation, reading responses, midterm paper, final paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)
SOC 331 (S) Automation in an Unequal Society (DPE)

Cross-listings: STS 331

Primary Cross-listing

Could you be competing for a job—even after getting a college degree—with a robot or an AI-powered chatbot? As technologies advance, every few years debates emerge: will this new kind of automation increase unemployment, or will it generate new kinds of jobs? Will these new jobs be more interesting and high paying, or will they be boring and poorly paid? To think these questions through, in this course we will study some key attempts to understand the socio-economic and political determinants as well as the repercussions of automation. We will delve into the micro-level dynamics operating between machines and workers involved in concrete production processes. We will also explore the macro-level trends in national and global inequality that social scientists associate with automation. In our investigation of both macro- and micro-levels, we will focus on how the risks and benefits of automation get distributed unevenly along already existing axes of class, race, gender, etc.

Requirements/Evaluation: Class participation; 1 mid-term paper proposal; 1 final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: Preference given to ANTH/SOC majors and STS concentrators

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 331(D2) STS 331(D2)

Difference, Power, and Equity Notes: The course is centrally concerned with the iniquitous distribution of risks and benefits of automation. Students will gain familiarity with how social scientists study the impacts of automation on class, racial, and gendered dynamics. We will consider how automation may disempower certain workers, and deepen already existing social segmentations.

Not offered current academic year

SOC 335 (F) Nowheres (DPE)

Cross-listings: GBST 335

Primary Cross-listing

We live in a world of nation-states. The world map, according to journalist Joshua Keating, is "itself as an institution, an exclusive club of countries" that rarely accepts new members. Throughout the course, we question how countries conquered the world and became the taken-for-granted political unit. We do so, paradoxically, by looking at contemporary nations that do not appear on the world map. These include nations without statehood, such as Somalia; those that span countries, including indigenous nations across the US and Canada; and nations that have lost their countries, such as Palestine and South Vietnam. By interrogating "nowheres," we tease out what it means to be a country, and pinpoint when and why the definitions do not apply uniformly. Students will reflect on why the world map has been so remarkably static since the end of the Cold War. We will further probe the social, political, and human costs of the exceptions to this general rule. Students will raise questions and attempt answers to what our interconnected world means for "nowheres" looming on the horizon--nation-states that, as a result of climate change, will soon vanish.

Requirements/Evaluation: Thoughtful and consistent class participation, visits to Sawyer Library and WCMA, three short response papers, and a final assessment on a "nowhere" of students' choosing

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
**SOC 335(D2) GBST 335(D2)**

**Difference, Power, and Equity Notes:** This course asks students to grapple with the asymmetries of modern statehood—why some places meet the criteria for statehood but are denied it, while others fall short of formal definitions but are still considered states. Students will assess the stakes of statehood for places that cannot achieve it or do not aspire to. They will creatively marshal these lessons to become the class expert on a "nowhere" that provides us with a lens for interrogating the world map as it currently exists.

*Not offered current academic year*

**SOC 340 (F) Performing Masculinity in Global Popular Culture (DPE)**

**Cross-listings:** AMST 358 / WGSS 347 / THEA 341 / LATS 341

**Secondary Cross-listing**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

**Requirements/Evaluation:** masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

**Prerequisites:** none; WGSS 202 would be helpful

**Enrollment Limit:** 15

**Enrollment Preferences:** a short statement of interest will be solicited; a subsection of applicants may be interviewed

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 358(D2) WGSS 347(D2) SOC 340(D2) THEA 341(D1) LATS 341(D2)

**Difference, Power, and Equity Notes:** This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

**Attributes:** EXPE Experiential Education Courses FMST Related Courses LATS Comparative Race + Ethnic Studies Electives

*Not offered current academic year*

**SOC 348 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WS)**

**Cross-listings:** GBST 348 / RUSS 348

**Primary Cross-listing**

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their post-socialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as Russia's invasion of Ukraine, or the lingering tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Ukraine and Russia, but will also read comparative studies, as well as works on East Germany and Georgia. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the post-socialist condition.

**Requirements/Evaluation:** 5-page paper every other week, written comments on the partner's paper in alternate weeks

**Prerequisites:** none
Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 348(D2) RUSS 348(D1) SOC 348(D2)

Writing Skills Notes: This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

Difference, Power, and Equity Notes: Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

Attributes: GBST Russian + Eurasian Studies

Fall 2024

TUT Section: T1  M 7:00 pm - 9:40 pm  Olga Shevchenko

SOC 349 (S) Race, Gender, and Labor (DPE)

This course draws on approaches from sociology, labor studies, and Black studies to examine the historical and contemporary intersections of race, gender, and labor. In particular, we will explore the racial, classed, and gendered dimensions of the labor movement, historic economic shifts that impacted and reorganized U.S. labor regimes, Black labor in slavery's afterlife as it relates to prisons, and global analyses of racialized gendered labor regimes for migrant and immigrant labor within the Global South and the U.S. We will begin the course by grounding ourselves in the Black feminist framework of intersectionality, which will guide our analyses of the intersections of race, class, and gender in labor formations. We will then focus on the monumental shift in labor relations that enslaved Black people's toppling of the plantation system in the US South brought forth, as well as the technologies of re-enslavement instituted as a reaction to Black people's emancipation. After that, we will move through different themes and time periods, considering how race, gender, and class intersect in regimes of labor exploitation and the successes and setbacks of labor movements.

Requirements/Evaluation: Major course requirements include engagement in course discussions, reading reflections, a midterm paper, group presentations, and final research paper.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology, Women, Gender, and Sexuality Studies (WGSS) and/or Africana Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course foregrounds intersectional subjectivities and perspectives. It provides interdisciplinary toolkits to strengthen students' ability to identify and address how unequal power dynamics sustain difference and inequity--e.g., in racial and gender pay gaps and inequalities in the globalized care economy--and to practice collective strategies for transformative social change, engaging with critical epistemologies developed by workers fighting for racial, gender, and economic justice.

Spring 2025

SOC 362 (S) Stories We Tell

Cross-listings: COMP 362

Primary Cross-listing

From The Moth to StoryCorps to Williams College's own Storytime, stories are ubiquitous in contemporary society. Indeed, sociologists have argued that social life is itself "storied"—that we locate ourselves within familiar narrative structures, using them to "construct" identities and "tell" our lives.
Stories, in this view, are not only the stuff of literature, but also the very fabric of social life: the foundation for individual and collective identities. This course grapples with the role of stories and storytelling in modern social life. What role do stories play in constituting personal identity? What cultural templates structure the stories we tell? Why are memoirs so popular, and how can we explain the more recent resurgence of interest in oral forms of storytelling? What role does storytelling play in politics and social movements? Specific topics will include confessional culture, podcasts, memoir, politics, and social change. Along the way, we will pay explicit attention to medium, and consider how sociologists might learn from journalists, documentarians, and memoirists to convey stories from their own research.

Requirements/Evaluation: occasional discussion questions, one 2-page reflective essay, one 6-8 page paper, and a final project (either a 10-page paper or an equivalent podcast or video essay)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

SEM Section: 01 TR 9:55 am - 11:10 am  Christina E. Simko

SOC 380 (S) Who Cares? (DPE)

What does it mean to care--about a person, a situation, or a cause? We often assume that care arises spontaneously and organically. Yet both feelings of care and acts of care always take shape in social contexts. In this course, we will uncover and critically interrogate the norms surrounding caring, caregiving, and care-receiving in our own communities. What social factors influence our willingness to offer care, and to accept it from others? Why is caregiving so heavily gendered and racialized? Is care inevitably corrupted by capitalism? Specific topics will include domestic work and reproductive labor; parenthood; therapy and mental health care; the discourse of self-care; and social movements that center around enacting care. The course will culminate in a significant experiential learning component: as a class, we will work collaboratively to design and implement a project that pushes or challenges the "care norms" in the northern Berkshires.

Requirements/Evaluation: thoughtful and consistent participation, including in-class discussions and shared resources created outside of class time; four journal entries (2-3 pages each); collaboratively designed experiential learning project; annotated bibliography; op-ed style essay (4-5 pages)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course centers the relationship between structural inequality and the cultural norms surrounding caregiving and care-receiving. Throughout the semester, we will reflect on how care norms both reflect and perpetuate larger systems of inequality, especially race and gender. Through a student-designed experiential learning project, we will strive to create social change in the local community.

SOC 390 (S) Sex Marriage Family

Cross-listings: PSCI 380

Secondary Cross-listing

Something has happened to America over the past fifteen years. Large minorities of young adults, especially young men, are now celibate.
Cohabitation has skyrocketed but marriage is disappearing, and the country's birth rate is at an all-time low. Not surprisingly, loneliness has become epidemic. A similar story can be told for most other developed countries. The implications for political polarization, economic growth, social insurance programs, public health, military defence, even national survival are grim. What is the cause of this loss of faith in the future? Can public policy reverse these trends? This course is an investigation into relations between the sexes in the developed world, the fate of children and the family, and government attempts to shape them. The course investigates family models in historical and comparative context; the family and the welfare state; the economics of sex, gender, marriage, and class inequality; the dramatic value and behavioral changes of Gen Z around sex, cohabitation, and parenthood; and state policies to encourage partnership/marriage and childbearing.

Requirements/Evaluation: Two short papers, research paper proposal, every-class discussion questions, class participation.

Prerequisites: none

Enrollment Limit: 18

Not offered current academic year
MAJOR IN STATISTICS

The major in Statistics is designed to meet three goals: to introduce some of the central ideas of information and data science, to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning, and to develop interdisciplinary skills by applying statistics to an application area of interest.

REQUIREMENTS (10 courses plus colloquium)

The major in Statistics consists of ten courses plus a colloquium requirement. The major includes courses in mathematics, computer science and statistics. Students interested in continuing their study of statistics in graduate school should strongly consider taking Math 350/351 in addition to the other requirements.

Mathematics (2 courses)
MATH 150 or 151 Multivariable Calculus or equivalent high school course

MATH 250 Linear Algebra

Except in unusual circumstances, students planning to major in statistics should complete the calculus sequence (MATH 130, 140, 150/151) before the spring of the sophomore year, at the latest. MATH 150 is a prerequisite for STAT 201 and MATH 250 is a prerequisite for STAT 346.

Computer Science (1 course)

CSCI 134 Intro to Computer Science or CSCI 135 Diving into the Deluge of Data or CSCI 136 Data Structures and Advanced Programming or some other course in the Computer Science Department with prior approval of the Math/Stat department.

Core Courses (4 courses)

STAT 201 Statistics and Data Analysis, STAT 202 Introduction to Statistical Modeling or STAT 302 Applied Statistical Modeling

STAT 346 Regression and Forecasting

STAT 341 Probability

STAT 360 Inferential Statistics

Continuation (2 courses)

Any two courses among the 300 or 400 level courses in the department with a STAT prefix.

Capstone Course (1 course)

The capstone course is a 400-level STAT course taken in the senior year. Although the specific methodological emphasis of the course may vary from year to year, an in-depth project with both a written report and an oral presentation is typically part of the capstone course.

Pass/Fail policies during the Academic Year 2020-2021

Information about the Department of Mathematics and Statistics Pass/Fail policies during the Academic Year 2020-2021 can be found here.

Colloquium Requirement

Participation in the Department Colloquium, in which each senior major presents a talk on a mathematical or statistical topic of their choice. Each major must also attend at least 20 colloquia (15 during the Academic Year 2020-2021), and up to 5 attendances may be counted in their junior year. Up to 5 colloquia in mathematics or computer science may also be counted. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

PLACEMENT

Students with an AP Stat score of 5 or 4 are placed in the advanced introductory course Stat 202.

NOTES

Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions may be substituted for the application and continuation requirements, but at least eight courses must be taken from the Department of Mathematics and Statistics at Williams.

These can, with prior permission, include courses taken away. Students with transfer credit should contact the department about special arrangements.

Double Counting: No course may count towards two different majors.

Early Senior Capstone Course: In exceptional circumstances, with the prior permission of the department, a student may be allowed to satisfy the Senior Capstone Course requirement in the junior year, provided that the student has completed at least three 300-level statistics courses before enrolling in the capstone course.

Planning Courses: Core courses are normally offered every year. Other 300 and 400 level statistics courses are offered on an irregular basis. Students should check with the department before planning far into the future.

Course Admission: Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken...
while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. They have to be approved MATH/STAT courses.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Colloquium requirement, Senior Seminar requirement.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The highly cumulative structure of the major.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

THE DEGREE WITH HONORS IN STATISTICS

The degree with honors in Statistics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be:

- Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. During the Academic Year 2020-2021 the winter study requirement for the honors program in Statistics is waved. One of STAT 493 or STAT 494 can count as a continuation course, but not both. Neither counts as the 400-level senior capstone course.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis or pursued actuarial honors. In all cases, the award of honors and highest honors is the decision of the Department.

STAT 101 (F)(S) Elementary Statistics and Data Analysis (QFR)

It is impossible to be an informed citizen in today’s world without an understanding of data. Whether it is opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines, etc, we need to be able to interpret and gain information from statistics. This course will introduce the common methods used to analyze and present data with an emphasis on interpretation and informed decision making.

Requirements/Evaluation: weekly homework, quizzes, exams, and a project

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)

Enrollment Limit: 50

Enrollment Preferences: juniors and seniors

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with MATH150 but no statistics should enroll in STAT201. Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It is a quantitative course.

Attributes: COGS Related Courses PHLH Statistics Courses

Fall 2024
STAT 161 (F)(S) Introductory Statistics for Social Science (QFR)
This course will cover the basics of modern statistical analysis with a view toward applications in the social sciences. Topics include exploratory data analysis, linear regression, basic statistical inference, and elements of probability theory. The course focuses on the application of statistical tools to solve problems, to make decisions, and the use of statistical thinking to understand the world.

Requirements/Evaluation: Weekly homework, quizzes, two midterms and a final exam (midterms include take-home components), and a data analysis project. Students will need to become familiar with the statistical software STATA.

Prerequisites: MATH 130 (or equivalent); not open to students who have completed STAT 101 or equivalent

Enrollment Limit: 40
Enrollment Preferences: Economics majors, sophomores
Expected Class Size: 40
Grading: yes pass/fail option, no fifth course option

Unit Notes: Students with calculus background should consider STAT 201. Students without any calculus background should consider STAT 101. Students with AP Stat 4 or 5 should consider Stat 202. Please refer to the placement chart on the Math&Stat department website for more information.

Distributions: (D3) (QFR)

Enrollment Preferences: decided by the department
Expected Class Size: 1
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)
Not offered current academic year

STAT 201  (F)(S) Statistics and Data Analysis  (QFR)
Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science, is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can’t make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Requirements/Evaluation: weekly homework and projects, midterm exams, and a final exam.
Prerequisites: MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent
Enrollment Limit: 40
Enrollment Preferences: Prospective Statistics majors, students for whom the course is a major prerequisite, and seniors
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202. Students with no calc or stats background should enroll in STAT 101. Students with MATH 140 but no statistics should enroll in STAT 161.
Distributions: (D3)  (QFR)
Quantitative/Formal Reasoning Notes: Students will learn to choose, carry out, interpret, and communicate analyses of data.

STAT 202  (F)(S) Introduction to Statistical Modeling  (QFR)
Data come from a variety of sources: sometimes from planned experiments or designed surveys, sometimes by less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data, as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential to answer questions about the world -- and about its limitations. We'll emphasize applications over theory and analyze real data sets throughout the course.

Requirements/Evaluation: Homework problems; quizzes; exams; a final project (on a topic that interests you!). Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While your assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to class discussions, and working together with classmates on practice problems.
Prerequisites: MATH 140 and STAT 101/161/201/AP Statistics 4/5, or permission of instructor.
Enrollment Limit: 40
Enrollment Preferences: Prospective Statistics majors and more senior students
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Students with a 4 on the AP Stats exam should contact the department for proper placement. Students with STAT 201 are strongly encouraged to take STAT 346 or other 300-level statistics electives.
Distributions: (D3)  (QFR)
Quantitative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

STAT 335  (S)  Introduction to Biostatistics and Epidemiology  (QFR)
Epidemiology is the study of disease and disability in human populations, while biostatistics focuses on the development and application of statistical methods to address questions that arise in medicine, public health, or biology. This course will begin with epidemiological study designs and core concepts in epidemiology, followed by key statistical methods in public health research. Topics will include multiple regression, analysis of categorical data (two sample methods, sets of 2x2 tables, RxC tables, and logistic regression), survival analysis (Cox proportional hazards model), and if time permits, a brief introduction to regression with correlated data.
Requirements/Evaluation: Evaluation will be primarily based on weekly assignments (regular homework or mini-projects), two midterm exams, and a final exam.
Prerequisites: Stat 201 or Stat 202, or permission of instructor (prior experience should include a working understanding of multiple linear regression, the basics of statistical inference, and R).
Enrollment Limit: 20
Enrollment Preferences: Statistics majors and prospective majors who have not yet taken Stat 346; public health concentrators
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Students will learn how to choose, implement, and interpret statistical analyses relevant to public health studies.

STAT 341  (F)(S) Probability  (QFR)
Cross-listings: MATH 341
Secondary Cross-listing
The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.
Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 150 and MATH 250 or permission of the instructor
Enrollment Limit: 50
Enrollment Preferences: Priority will be given to Mathematics majors and to Statistics Majors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
STAT 341(D3) MATH 341(D3)
Quantitative/Formal Reasoning Notes: This is a 300-level Math/Stat course.

Fall 2024
LEC Section: 01  MWF 12:00 pm - 12:50 pm  Mihai Stoiciu

Spring 2025
LEC Section: 01  TR 9:55 am - 11:10 am  Steven J. Miller

STAT 342  (S) Introduction to Stochastic Processes  (QFR)
Stochastic processes are mathematical models for random phenomena evolving in time or space. Examples include the number of people in a queue at time t or the accumulated claims paid by an insurance company in an interval of time t. This course introduces the basic concepts and techniques of stochastic processes used to construct models for a variety of problems of practical interest. The theory of Markov chains will guide our discussion as we cover topics such as martingales, random walks, Poisson process, birth and death processes, and Brownian motion.
Requirements/Evaluation: weekly homework/labs, classwork, and exams
Prerequisites: STAT 341
Enrollment Limit: 30
Enrollment Preferences: senior Statistics majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions:  (D3)  (QFR)

Quantitative/Formal Reasoning Notes: This is a statistics class with a focus on mathematical skills and translating real world phenomena into mathematical descriptions.

Spring 2025
LEC Section: 01    TF 2:35 pm - 3:50 pm     Elizabeth M. Upton

STAT 344  (S)  Statistical Design of Experiments  (QFR)
When you hear the word experiment you might be picturing white lab coats and pipettes, but businesses, especially e-commerce, are constantly experimenting as well. How do you get the most out of both scientific and business investigations? By doing the right experiment in the first place. We'll explore the techniques used to plan experiments that are both efficient and statistically sound. We'll learn how to analyze the data that come from these experiments and the conclusions we can draw from that analysis. We'll look at both classical tools like fractional factorial designs as well as optimal design, and see how these two frameworks differ in their philosophy and in what they can do. Throughout the course, we'll make extensive use of both R and JMP software to work with real-world data.

Requirements/Evaluation:  Homework problems--both individual and in groups, midterm, final, and projects (on topics that interest you!).
Prerequisites:  STAT 161 or 201 or 202, or equivalent, and Math 140 or equivalent, or permission of instructor
Enrollment Limit:  20
Enrollment Preferences:  Statistics majors, seniors, juniors, sophomores, first years
Expected Class Size:  15
Grading:  yes pass/fail option,   yes fifth course option
Distributions:  (D3)  (QFR)

Quantitative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to design experiments, analyze their results, and assess their effectiveness. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

Spring 2025
LEC Section: 01    MWF 10:00 am - 10:50 am     Richard D. DeVeaux

STAT 346  (F)(S)  Regression Theory and Applications  (QFR)
This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the most widely used method for analyzing and predicting a response data and for understand the relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

Requirements/Evaluation:  Weekly homework, quizzes, theory and data analysis exams, and final course project.
Prerequisites:  MATH/STAT 341, MATH 250, and at least one of STAT 201 or 202. Or permission of the instructor.
Enrollment Limit:  30
Enrollment Preferences:  Statistics Majors
Expected Class Size:  20
Grading:  yes pass/fail option,   no fifth course option
Distributions:  (D3)  (QFR)

Quantitative/Formal Reasoning Notes: This course prepares students in the use of quantitative methods for the modeling, prediction and understanding of scientific phenomena.

Fall 2024
LEC Section: 01    TR 9:55 am - 11:10 am     Xizhen Cai

Spring 2025
STAT 355 (F) Multivariate Statistical Analysis (QFR)
To better understand complex processes, we study how variables are related to one another and how they work in combination. In addition, we want to make inferences about more than one variable at a time. Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such datasets with more than multiple variables. Topics covered will include data visualization techniques for data sets with more variables, clustering algorithms, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, performing dimension reduction, and making inferences.
Requirements/Evaluation: Homework, projects, quizzes, and exams.
Prerequisites: MATH 250, and STAT 346 or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Juniors/seniors
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: It is an advanced statistics class with prerequisites that are QFR courses

Fall 2024
LEC Section: 01 TF 1:10 pm - 2:25 pm Xizhen Cai

STAT 356 (F) Time Series Analysis (QFR)
Time series -- data collected over time -- crop up in applications from economics to engineering to transit. But because the observations are generally not independent, we need special methods to investigate them. This course will include exploratory methods and modeling for time series, including descriptive methods and checking for significance, and a foray into the frequency domain. We will emphasize applications to a variety of real data, explored using R.
Requirements/Evaluation: Evaluation is primarily based on quizzes and projects (on topics that interest you!). You'll be given the opportunity to assess your own work and resubmit/reattempt assignments as you gain mastery of a topic. Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While most assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to live and online discussions, and working together with classmates on practice problems.
Prerequisites: STAT 346 (may be taken concurrently) or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Statistics majors, seniors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.
Not offered current academic year

STAT 360 (F) Statistical Inference (QFR)
How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.
Requirements/Evaluation: Homework, Quizzes, Exams
Prerequisites: MATH 250, STAT 201 or 202, STAT 341
Enrollment Limit: 15
Enrollment Preferences: Statistics majors
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: A rigourous mathematical course laying the foundation for reasoning with data

Fall 2024
LEC Section: 01 MWF 10:00 am - 10:50 am Richard D. De Veaux

STAT 365 (S) Bayesian Statistics (QFR)
The Bayesian approach to statistical inference represents a reversal of traditional (or frequentist) inference, in which data are viewed as being fixed and model parameters as unknown quantities. Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. We begin with an introduction to Bayes’ Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700’s, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing.

Requirements/Evaluation: weekly homework and exams
Prerequisites: MATH/STAT 341 and STAT 346, or permission of instructor

Not offered current academic year

STAT 372 (S) Longitudinal Data Analysis (QFR)
This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. As time permits, we will also investigate joint modeling of longitudinal and time-to-event data. We will consider many applications in the social and biological sciences.

Requirements/Evaluation: Weekly homework, midterm exams, a final exam, and a data analysis project
Prerequisites: STAT 346 (and an appropriate introductory statistics course, typically STAT 201 or 202)

Not offered current academic year
STAT 397 (F) Independent Study: Statistics
Directed independent study in Statistics.
Prerequisites: permission of department
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)
Not offered current academic year

STAT 398 (S) Independent Study: Statistics
Directed independent study in Statistics.
Prerequisites: permission of department
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)
Not offered current academic year

STAT 440 (S) Categorical Data Analysis (QFR)
This course focuses on methods for analyzing categorical response data. Traditional tools of statistical data analysis for continuous response data are not designed to handle such data and pose inappropriate assumptions. We will develop methods specifically designed to address the discrete nature of the observations and consider many applications in the social and biological sciences as well as in medicine, engineering and economics. The first part of the course will discuss statistical inference for parameters of categorical distributions and arising in contingency tables. The longer second part will focus on statistical modeling via generalized linear models for binary, multinomial, ordinal and count response variables, using maximum likelihood.
Requirements/Evaluation: Class participation and performance on exams, homework, and a project.
Prerequisites: STAT 346 and STAT 360
Enrollment Limit: 15
Enrollment Preferences: seniors and statistics majors
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Arguing with data.
Attributes: PHLH Statistics Courses
Not offered current academic year

STAT 442 (S) Statistical Learning and Data Mining (QFR)
In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today's data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.
Class Format: Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.
Requirements/Evaluation: class participation, weekly homework, exams and an end-of-term project
Prerequisites: MATH/STAT 341 and STAT 346, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: Statistics majors, juniors and seniors. Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is an advanced statistics class involving theory and application of statistical methods to data.

Spring 2025
LEC Section: 01 MR 2:35 pm - 3:50 pm Anna C. Neufeld

STAT 458 (F) Generalized Linear Models- Theory and Applications (QFR)
This course will explore generalized linear models (GLMs)--the extension of linear models, discussed in Stat346, to response variables that have specific non-normal distributions, such as counts and proportions. We will consider the general structure and theory of GLMs and see their use in a range of applications. As time permits, we will also examine extensions of these models for clustered data such as mixed effects models and generalized estimating equations.

Requirements/Evaluation: Weekly homework consisting of theoretical exercises and data analyses carried out in R. Short frequent quizzes and one midterm (with an in-class and take-home component). Final project and final exam.

Prerequisites: STAT 346, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Seniors and Statistics majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is an intensive statistics course, involving theoretical and mathematical reasoning as well as the application of mathematical ideas to data using software.

Fall 2024
LEC Section: 01 TF 2:35 pm - 3:50 pm Elizabeth M. Upton

STAT 465 (S) Bayesian Statistics (QFR)
Prior knowledge being constantly updated by empirical observations -- the essence of Bayesian thinking provides a natural, intuitive, and more importantly, mathematically sounded, probabilistically principled way to characterize the process of learning. With some of its key ideas formulated based on Bayes’ Theorem dating back to 18th century, Bayesian inference is one of oldest schools of statistics (more than a century earlier than the Frequentist!). Yet it was not until the recent developments in sampling algorithms and computational powers that Bayesian inference gained its revival. Bayesian, and Bayesian-based methods, with their flexibilities in modeling (generative) process of data, interpretability with posterior probability statements, and coherent principles to incorporate empirical evidence a priori, have played key roles in modern data analysis, especially for those “big data” with enhanced complexity and connectivity. This course is designed to provide students a comprehensive understanding to what is Bayesian and the how’s and why’s. Students will be introduced to classic Bayesian models, basic computational algorithms/methods for Bayesian inference, as well as their applications in various fields, and comparisons with classic Frequentist methods. As Bayesian inference finds its roots and merits particularly in application, this course puts great emphasis on enhancing students’ skills in statistical computation (mostly with R) and data analysis.

Requirements/Evaluation: Homework, exams, and project

Prerequisites: MATH/STAT 341, STAT 346, and STAT 360, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: seniors, Statistics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course utilizes mathematics and computer-based tools for the Bayesian approach for analyzing data and making statistical inferences.

Not offered current academic year

Winter Study ---------------------------------------------------------------

STAT 30  (W) Senior Project: Statistics
To be taken by candidates for honors in Statistics other than by thesis route.
Class Format: senior project
Grading:    pass/fail only
Not offered current academic year

STAT 31  (W) Senior Honors Thesis
Statistics senior honors thesis.
Class Format: thesis
Grading:    pass/fail only
Not offered current academic year

STAT 99  (W) Indep Study: Statistics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading:    pass/fail only
Not offered current academic year
THE MAJOR IN SPANISH

Students who major in Spanish can expect to acquire linguistic fluency along with in-depth knowledge of the cultures of Spain and Latin America. Through the study of the major writers and historical events of the Spanish-speaking world, our program offers training in literary analysis and linguistic expression, as well as a deep appreciation of Hispanic civilizations.

The major consists of nine courses above the 102 level. In exceptional circumstances, the Department may decide to accept RLSP 101-102 for the Spanish major. One of the nine courses must be the 400-level senior seminar taken during the student's final year at the College; another must be a course that substantially focuses on literature or cultural texts produced before 1800. Students entering at the 200-level may, with the permission of the Department, choose as part of their major program one course not conducted in Spanish but offered by faculty in Romance Languages or another Department or Program, such as Latino/a Studies, Comparative Literature, History, etc., provided that the subject matter relate to and broaden their study of Spanish. Students entering at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program. Working with a member of the Spanish faculty, the student will formulate a curricular plan that will ensure balance and coherence in courses taken prior to declaring a major in Spanish. This is especially imperative for students who are planning to spend a part or all of their junior year in Latin America or Spain.

THE DEGREE WITH HONORS IN SPANISH

Students majoring in Spanish may apply to be admitted to the Honors Program in Spanish upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal. Two routes are available to those who wish to apply for the degree with honors.

The first of these involves the writing of a senior thesis.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader).

This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and reading.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in Spanish and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in Spanish. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

The second route is a group of three clearly related courses (offered by the Department of Romance Languages or by other departments, such as History, Art, Philosophy, English, etc.), only one of which may be counted in the nine courses comprising the major. One of the courses will be an Independent Study (plus senior year WSP 30) in the spring of the senior year, at the end of which the student will write an essay that synthesizes the
content of the three related courses. Students may apply for this route by November 2 of the senior year.

In the case of both routes to the degree with honors, the department’s recommendation for graduation with honors will be based on the originality and thoroughness of the finished project.

THE CERTIFICATE IN SPANISH

The Certificate in Spanish Language and Culture consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher. Those so interested should express their intent to the chair of the department by March 1 or earlier.

For students with no prior Spanish background, the course sequence will consist of Spanish 101-102, Spanish 103 and 104, and three courses in Spanish above the 104 level, with at least one of these courses at the 200-level or higher taken at Williams. If the student starts out the sequence at Spanish 103, in addition to the three courses in Spanish beyond the 104 level (including a 200-level course or higher), two electives may be taken in other departments. One elective should be in Spanish or Latin-American cultural history (art, literature, drama, music) and the other in Spanish or Latin-American intellectual, political, or social history. Spanish 200, 201, or 208 can be counted for the elective requirement.

Electives may be considered from a variety of departments and programs. However, students should consult with the chair of Romance Languages before making any enrollment decisions.

PLACEMENT

Students come to study Spanish at Williams with a wide range of backgrounds and prior experiences. Some will have studied Spanish for many years in high school and earlier. Others will have grown up speaking Spanish with family and friends but had little opportunity to study the language at school. Others have lived in Spanish-speaking countries or otherwise studied in immersive contexts. And for others, Spanish is a brand-new language that they are eager to begin learning.

Whatever your previous experience with Spanish, ¡Bienvenida! ¡Bienvenido! We are glad to have you with us. In order to figure out the most appropriate point of entry, we ask that all students who wish to begin their study of Spanish in the new academic year take the department's placement exam when it is offered during First Days. The only students who don't need to take the placement exam are those who qualify as “true beginners,” those with no previous experience of Spanish and for whom 101-102 is obviously the right choice. Everyone else should take the placement test. After you do, the Registrar's Office will notify you of the level and/or course the Spanish faculty have recommended for you. You should free to reach out to the department chair, your recommended instructor, or any other faculty member if you have questions or concerns about your placement.

STUDY ABROAD

Spanish majors, as well as non-majors interested in further exposure to the language and the culture, are strongly encouraged to study in Spain or Latin America for either a semester or a full year. We recommend that you start planning for study abroad as early as possible, and that you speak to our faculty early on to go over the many possible destinations and programs available to you. In recent years, Williams students have studied in such varied and far-flung locations as Buenos Aires, Havana, Lima, Barcelona, and Madrid. Those who are interested in Madrid may wish to consider the Hamilton College program, with which we maintain consortial ties. Credit for up to four courses can be granted at the discretion of the Department for study overseas. Those four courses count towards the certificate or the major in Spanish. Students interested in study abroad should consult with a member of the department at their earliest convenience.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, provisional approval can be granted (students should be sure to contact the department for details).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments. If it is a program we are familiar with, the course title and description are enough. If it is a new program/new type of course we need all the available materials (syllabus, assignments, etc.).

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Four maximum.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. They have to be courses that focus on language, culture, history, or politics of the target language/culture.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Our Senior Seminars are required for the major.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study
away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

This hardly ever happens but could happen if a student doesn't seek out pre-approval from a faculty member.

---

**RLSP 101 (F) Elementary Spanish**

This course focuses on grammar, elementary composition, practice in conversation, and reading of short, easy prose. It is taught by the intensive oral method.

**Requirements/Evaluation:** Engaged daily participation, regular homework exercises, quizzes, a midterm, and a final exam. All students must take the Winter Study Sustaining program to continue to RLSP 102.

**Prerequisites:** This course is for students who have no previous background in Spanish.

**Enrollment Limit:** 18

**Enrollment Preferences:** This course is introductory. Students who have a background in Spanish should seek an alternate course. Preference will be given to those with potential interest in pursuing the certificate, major, and/or studying away in a Spanish speaking country.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

---

**RLSP 102 (S) Elementary Spanish**

This course is a continuation of RLSP 101 and must be completed after also taking the Winter Study Sustaining Program to be eligible for credit. It focuses on grammar, elementary composition, practice in conversation, and reading of easy texts. It is taught by the intensive oral method.

**Class Format:** The class meets five hours a week; students will complete workbook and lab exercises weekly.

**Requirements/Evaluation:** Daily preparation and participation, regular assignments, frequent tests, a midterm and a final. At least two cultural activities per semester must be attended.

**Prerequisites:** RLSP 101; this course is for students who have studied less than two years of Spanish in secondary school. Students must complete RLSP 101 as well as the Winter Study sustaining program to be eligible to enroll.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students enrolled in RLSP 101.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Students in RLSP 101-102 are required to attend and pass the sustaining program during the winter study period.

**Distributions:** (D1)

---

**RLSP 103 (F) Intensive Intermediate Spanish**

RLSP 103 (F) Intensive Intermediate Spanish. This course is a continuation of Spanish 101-102. It is designed to help students improve their proficiency in each of the major skill-groups (listening, speaking, reading and writing) while providing an introduction to the cultures of the Spanish-speaking world. Classroom activities and homework are designed to increase vocabulary and improve your ability to handle daily life in a
Spanish-speaking country, to express your views on complex subjects such as art and politics, and to increase your knowledge of the cultural traditions of Latin America and Spain. Film screenings and readings in Hispanic literature, culture and politics will provide material for in-class discussion and some writing assignments. This course provides the linguistic and cultural training that is necessary to engage the diverse Spanish-speaking communities of Latin America, Spain and the US; it will help to prepare students for further literary and cultural studies as well as provide skills that are increasingly essential in fields such as medicine, law, and education. Conducted in Spanish.

Class Format: Class meets four hours a week: three times with the professor (either in the morning or at noon) and one time in the afternoon with the TA.

Requirements/Evaluation: Regular attendance and active in-class participation, workbook exercises and weekly compositions, quizzes, midterm and final exams.

Prerequisites: RLSP 101-102 or by Spanish placement exam

Enrollment Limit: 20

Enrollment Preferences: If the course is over-subscribed, priority will be given to first-year students and others with a demonstrable commitment to study of Spanish.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

RLSP 104  (S)  Intensive Intermediate Spanish, Upper Level

This course is a continuation of Spanish 103. During the spring semester we resume our work to expand your proficiency in each of the major skill-groups (listening, speaking, reading and writing) while increasing familiarity with the vibrant cultures of the Spanish-speaking world. Students in both sections of RLSP 104 can once again expect to sample a variety of written and audiovisual media--poems and short fiction, essays, journalism, blogs and film--to deepen their understanding of Hispanic cultures. However, Section 2 will have a more distinct focus on cinema: we will watch a series of classic and contemporary films and develop the specialized vocabulary and skills needed to analyze them in class discussions and student writing. Regardless of which section you are in, students in Spanish 104 can expect to write regularly and to meet with their professor, teaching associate and classmates in varying combinations for four hours each week. This course is designed to prepare students for further literary and cultural studies in Spanish--including the challenges of study abroad--and to hone communication skills that are increasingly essential in professional fields such as medicine, law, and education. Conducted in Spanish. Más and its accompanying Cuaderno de Práctica will serve as our primary texts. Conducted in Spanish. For students who have not taken Spanish 103 at Williams, the departmental placement exam is required for enrollment in this course.

Class Format: Seminar. Students will spend 4 hours per week in class in engagement with their Professor, Teaching Associate (TA), and classmates. In addition to the regular MWF classes with their Professor, students will meet for one additional hour per week with the TA. As will be explained in the course syllabus and at the first class meeting, this additional hour with the TA will take place at a time (to be decided during the first weeks of class) that is mutually beneficial for the TA and students.

Requirements/Evaluation: Weekly 1- to 2-page compositions, daily homework and class participation, oral reports, midterm exams and a final exam.

Prerequisites: RLSP 103 or by Spanish placement exam or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: If the course is over-subscribed, priority will be given to first-year students and others with a demonstrable commitment to study of Spanish.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)
RLSP 105 (F) Advanced Grammar, Composition, Conversation

In this course students will refine their knowledge of Spanish grammar and vocabulary towards further fluency in speaking and writing. The focus of the class is grammar through active engagement with grammar exercises as well as relevant cultural materials. The section that meets at 9 a.m. will have a focus on Latin American poetry, and the section that meets at noon will focus on the politics and culture of contemporary Spain. Students will produce regular grammar and composition exercises as well as oral reports. They will also meet with the Teaching Associate, in smaller groups, weekly.

Class Format: students must participate in TA sessions once a week.

Requirements/Evaluation: regular grammar and composition assignments, a mid-term, occasional quizzes, oral reports; active participation and regular attendance required.

Prerequisites: RLSP 104, or results of the Williams College Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: first-year students, potential majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2024

SEM Section: 01 MWF 12:00 pm - 12:50 pm Leyla Rouhi
SEM Section: 02 MWF 9:00 am - 9:50 am Alejandro Castro

RLSP 106 (S) Advanced Grammar and Composition through Literature (WS)

This course is designed for advanced students who wish to further polish and refine their grammatical, lexical, and writing skills in Spanish. The course may be taken immediately after 104, by placement exam results, or even after students have begun to sample the Department's literature and culture offerings at the 200- and 300-level. Classic works of short fiction by celebrated Latin American authors such as Gabriel García Márquez and Julio Cortázar will be discussed; selected Latin American films will be viewed as well. For written and oral assignments: weekly essays, in-class presentations, and language-laboratory activities. Conducted in Spanish.

Requirements/Evaluation: A weekly essay based on the stories read in class. Written lab exercises. Participation in the grammatical and literary discussions. Oral presentations, quizzes, a mid-term exam, and a final exam

Prerequisites: RLSP 104, any course 201+, placement exam or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: In the event of over-enrollment, preference will be given to sophomores.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Weekly essays, corrected for both language and content. Constant feedback from instructor. Students will be required to revise and rewrite their graded essays.

CON Section: 02 W 2:10 pm - 3:00 pm Gene H. Bell-Villada
RLSP 201 (F) The Spanish Labyrinth
How can you learn to separate the stereotypical images of Spain from its current reality? How can we talk about one “Spain” when the country is a complex composite of ancient and diverse cultural remnants mixed with recent influxes of immigrants, and separatist movements? How has the vulnerable peninsula survived centuries of violent upheavals and divisiveness; dramatic economic rises and collapses? How have recent events and political tensions affected Spain's health system, demographics, and economy? This course aims to offer students a strong foundation in Spanish issues, whether they have already spent time abroad, or hope to do so in the future. In this course we will approach Spain by studying examples of its literary and artistic production, from periods of brilliant cultural exchange, and times of censorship, repression, and crisis. Some topics of focus will be the Inquisition, the Civil War, contemporary Spain's obsession with its own recent past, and its uncertain future. Secondary texts will also be provided for historical and socio-political background and reference. Conducted in Spanish. We will also use films and music.

Requirements/Evaluation: Conducted entirely in Spanish. Evaluation will be based on active daily participation and attendance, oral presentations, 2 short papers and a final research project.
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: Spanish majors, certificate candidates, and anyone who has studied away in Spain or plans to.
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

Fall 2024
SEM Section: 01 TR 11:20 am - 12:35 pm Soledad Fox

RLSP 202 (S) Introduction to the Analysis of Literature in Spanish (WS)
This course is intended for students who are considering a major in Spanish, including those who have recently completed RLSP 105, 107, 200, 201 or 209. Using a textbook, Aproximaciones al estudio de la literatura hispánica, we will study the fundamentals of genre analysis while reading selected works of prose, poetry, and drama from Latin America and Spain. In addition to studying the principles and techniques of literary analysis, this course will continue to develop your speaking, writing, and reading comprehension skills with a particular emphasis on composition. Conducted in Spanish.

Class Format: Students are expected to be active participants at all scheduled class meetings, which will be used for discussion and collaborative analysis of literary texts as well as workshopping student writing.

Requirements/Evaluation: Graded assignments will include three essays of five pages each as well as consistent preparation and class participation.
Prerequisites: RLSP 105, 107, 200, 209, or placement exam results indicating readiness for a 200-level course
Enrollment Limit: 20
Enrollment Preferences: first- and second-year students who are considering the major in Spanish
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: Each student will write and revise three essays of roughly give pages each. Feedback will be provided regarding grammar, style, and argument. On Fridays we will workshop student papers.

Spring 2025
SEM Section: 01 MWF 11:00 am - 11:50 am Jennifer L. French

RLSP 203 (F) From Modernismo to El Boom de la Novela
A survey of some of the leading imaginative writers of Ibero America. Readings will begin with the modernista poets and go on to include fiction of Mexico by Rulfo, a wide sampling of verse by Pablo Neruda, and narratives of the "Boom" period by authors such as Borges, Cortázar, Lispector, and García Márquez. Conducted in Spanish.

Requirements/Evaluation: Response journals, three 6- to 8-page papers, a mid-term and final exam, and class participation.
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Seniors, juniors, and then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

RLSP 205 (S) Magical Realists, Fantasists, Experimentalists: The Latin-American Novel in Translation (DPE)

Cross-listings: COMP 205

Primary Cross-listing

A course specifically designed to enable students who have no knowledge of Spanish to read and discover those Latin-American authors who, in the twentieth century and after, have attracted world-wide attention. Among the texts to be discussed: Borges, Labyrinths; Cortázar, Blow-up and Hopscotch; Lispector, the Hour of the Star; lesser works by Fuentes and Puig; and by Nobel Prize-winner Gabriel García Márquez, One Hundred Years of Solitude. Conducted in English

Requirements/Evaluation: class participation, two brief papers, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 22

Enrollment Preferences: Latina/o Studies concentrators, Comp Lit majors

Expected Class Size: 22

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not carry credit for the Spanish major or the certificate

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 205(D1) RLSP 205(D1)

Difference, Power, and Equity Notes: This course offers students an opportunity to read some major works of fiction that have challenged the canon of European and American literature. Through the readings, class members will understand that great literature comes not only from London or Paris, from the U.S. or Russia. Several of these novels, moreover, directly challenge European and Western cultural hegemony and make an implicit claim for the legitimacy of Latin American cultural concerns.

Attributes: GBST Latin American Studies

Spring 2025

LEC Section: 01 MR 2:35 pm - 3:50 pm Gene H. Bell-Villada

RLSP 206 (S) Latin-American Civilizations

An introduction to the multiple elements constituting Latin-American culture. Class assignments include readings from selected Latin-American essayists and screenings of classic films. Particular focus on the conflict between local and foreign cultural traditions. Areas to be considered: Spanish Catholicism, the influence of European liberalism and U.S. expansion, the Indian and African contribution, and the cultural impact of social revolution in Mexico and Cuba. Conducted in Spanish.

Requirements/Evaluation: two essays on assigned topics, response journals, one oral presentation, active discussion of the ideas and the facts presented in class, a midterm, and a final

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 12
Enrollment Preferences: Juniors, sophomores, first-years.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

RLSP 209 (F) Spanish for Heritage Speakers

Cross-listings: LATS 209

Primary Cross-listing

This course is intended for students of Latino/a heritage. It will address the unique needs of students whose knowledge of Spanish comes primarily from informal and family situations rather than a conventional classroom experience. The goal of the course is to build on and expand students’ existing knowledge of Spanish while developing skills for using the language in more formal/academic contexts. Conducted in Spanish.

Requirements/Evaluation: homework, class participation, and a series of communicative projects

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Potential Spanish majors/certificate students and LATS concentrators

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 210 (S) Graphic Novels, Spain, and Economic Crisis

The massive economic crisis that began in 2007 affected all areas of life in Spain, among other things, led to the rise of several social movements and critiques of neoliberalism. In this class we will study graphic novels -- a booming medium in contemporary Spain -- along with other mediums such as literature and film to see how they reflect this key moment in Spanish society. We will consider the ways in which these novels represent new social movements as well as effects of the crisis that continue to this day. In the process, we will not only gain a better understanding of contemporary Spain, but also unpack the characteristics of visual storytelling. Readings may include Miguel Brieva's Lo que me está pasando, Manel Fontdevila's ¡No os indignéis tanto!, and Isaac Rosa's & Cristina Bueno's Aquí vivió: Historia de un desahucio.

Requirements/Evaluation: Conducted entirely in Spanish. Evaluation will be based on active participation and attendance, one group presentation, four take-home essay quizzes, and one final project (12-15 pages).

Prerequisites: Spanish 105 or 106, or results of the College Placement Exam, or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: Spanish majors and certificate students.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

RLSP 217 (S) Love and marriage in Medieval and Early Modern Spain
We are often told that love is a natural human feeling and marriage its happiest consequence. But these two conditions are constructed and depend on society's dominant values. In this class we focus on pre-modern Spain to study the principles and fears that create definitions of love and marriage, also with a view to how some of these have survived to this day in our own communities. Our theoretical frames will come from the medieval and early modern periods, but also from contemporary definitions and critiques. Primary sources will include lyrical traditions, the writings of King Alfonso X, the works of Santa Teresa de Ávila, San Juan de la Cruz, Lope de Vega, Tirso de Molina, Pedro Calderón de la Barca, Miguel de Cervantes, among others.

Requirements/Evaluation: Active and meaningful participation, short assignments, one final project.
Prerequisites: RLSP 105 or 200, or results of Williams College Placement Exam, or permission of instructor
Enrollment Limit: 22
Enrollment Preferences: Spanish and Comparative Literature majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Not offered current academic year

RLSP 219 (F) Latin American Diasporic Cultures: The Venezuelan Case
The history of Latin America cannot be fully understood without the study of the mass migrations that have taken place to and from the region throughout the 20th and 21st centuries. These displacements differ in nature, do not share a single origin, route, or destination. They primarily stem from complex political conflicts (racial, gender, sexual, economic, climatic) and have left a definitive mark on the hemispheric cultural imagination. This course aims to study the narratives surrounding migration and migrants in Latin America. What are the geographies of displacement? Is the Chihuahuan Desert or the Darien Gap a wall? Is the Caribbean Sea a border? What happens to the narrative when it emerges under the sign of exile? How does the figure of the migrant destabilize notions of law, nation, and personhood? How is the migrant body constituted, and how do literature, cinema, visual arts, or performance portray it? We will conduct a panoramic analysis of cultural materials and critical interventions produced throughout the continent regarding the figure of the migrant, arriving at the current Venezuelan diaspora—comprising more than seven million people—and its aesthetic, ethical, and political resonances. Primary materials include texts by Reinaldo Arenas, Virgilio Piñera, Manuel Ramos Otero, Valeria Luiselli, Sonia Nazario, Juan Pablo Villalobos, Balam Rodrigo, Adalber Salas Hernández, and Gina Saraceni, as well as works by visual artists José Rafael Perozo and Gerardo Rosales, films by Mariana Rondón and Diego Quemada-Diez, among others. Conducted in Spanish, the course will also have a public orientation, with some activities open to the wider university community.

Requirements/Evaluation: Evaluation is based on active participation, several short compositions, a conference paper, and a final project.
Prerequisites: RLSP 105 or higher; or results of the College Placement Test; or permission of instructor.
Enrollment Limit: 20
Enrollment Preferences: Spanish majors and certificate candidates; comp lit majors with a focus on Spanish.
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

RLSP 220 (S) Women on the Verge
Cross-listings: WGSS 222

Primary Cross-listing
From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films, newspapers and other media, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, the transition to democracy, and the present day.
**Requirements/Evaluation:** This course is conducted entirely in Spanish.

**Prerequisites:** RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Spanish and Comparative Literature majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLSP 220(D1) WGSS 222(D2)

Not offered current academic year

**RLSP 231 (F) Indigenous Writers of Colonial Mexico and Peru (DPE) (WS)**

This course examines the writings of 16th and 17th Century Indigenous authors of New Spain and colonial Peru. We will study the works of well-known Indigenous writers such as Hernando de Alvarado Tezozomoc, Fernando de Alva Ixtlilxochitl, El "Inca" Garcilaso de la Vega, and Guaman Poma de Ayala, as well as writings by lesser-known and anonymous Indigenous authors. Our focus on the historical contexts and formal aspects of their works will be supplemented and enhanced by a study of the critical methods of textual analysis that are particularly relevant to Indigenous texts, as facilitated by a set of selected critical readings. The course, in short, will aim to interrogate the idea of a "Spanish lettered city" (a colonial city dominated by Spanish men of letters) and will explore the possibilities of an "alter-native" lettered city, one in which Indigenous writing flourishes during times of crisis. Conducted in Spanish.

**Requirements/Evaluation:** Each student will write four 4- to 5-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner’s papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise the first three papers and submit a final version. Excellent preparation and active, engaged participation in class discussions is required.

**Prerequisites:** RLSP 105, 107, 200, or 202, placement exam results, or permission of instructor.

**Enrollment Limit:** 19

**Enrollment Preferences:** Spanish majors and certificate students, current and potential; LATS concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Each student will write four 4- to 5-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner’s papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version.

**Difference, Power, and Equity Notes:** This course will introduce students to the rich and varied cultural production of colonial Mexico and Peru. It will highlight the often marginalized and neglected intellectual histories of Indigenous peoples and other minoritized sectors of colonial society. As such, students will acquire critical tools to examine and understand the rich and varied cultural production of Mexico and Peru during the Spanish colonial era.

**RLSP 232 (S) Islam in medieval and Early Modern Spain**

The presence of Islam--in all its diverse manifestations--is not new to Europe, least of all to Spain. In this course we will focus for the most part on the medieval and early modern periods to study the ways in which which Muslims and Islam have inhabited and been portrayed in the Iberian Peninsula. We will cover a wide range of perspectives as well as cultural material. While the bulk of the course is focused on the period prior to 1700 CE, towards the end of the course we will relate our findings to contemporary Spain through social and legal debates, among them topics related to immigration. Conducted in Spanish

**Requirements/Evaluation:** Several short reaction papers, active and regular class participation, presentations, and one final project.
Prerequisites: RLSP 105 or above, or results of the Williams College Placement Exam, or permission of instructor

Enrollment Limit: 22

Enrollment Preferences: Spanish majors and certificate candidates, Comp Lit majors with a focus in Spanish

RLSP 259  Violent States, Violent Subjects: Nation-Building and War in 19th Century Latin America  (DPE) (WS)

Although the massive, mechanized wars of the 20th century often overshadow earlier conflicts, the 19th century was also a period of widespread bloodshed in Latin America. First, of course, came the carnage of the Independence Wars, which was followed by decades of civil war (Mexico, Argentina, Peru, Uruguay, Colombia, Venezuela) and two bitter international wars--the Paraguayan War (1864-1870) and the Pacific War (1879-1883)--each of which would have a lasting impact on the countries involved. The restoration of peace brought economic development and new opportunities for dominant groups, but also the return of some of the most violent practices of the colonial period: indigenous peoples were conquered, their lands settled by whites or used for grazing cattle, and blacks (often despite the official abolition of slavery) met with new forms of exclusion, exploitation, and physical violence. In this tutorial we will explore the literary links between some of the violent conflicts listed above and the foundation of national identities in Latin America, reading texts that probe the social and ethical implications of State-sponsored violence. Issues to be explored include militarism and the development of nationalism; genocide and the national community; torture, truth and testimony; and the notion of 'civilization.' We will read one or two key precursors and a variety of 19th century texts that may include works by Juan Francisco Manzano, Esteban Echeverría, Ricardo Palma, Rosa Guerra, Dorotea Duprat de Lassere and Juan Crisóstomo Centurión, and Lucio V. Mansilla. In addition, we will read a few contemporary texts, written in the aftermath of the late-20th century dictatorships in the Southern Cone, that actively reflect on the long history of State-sponsored violence in Latin America (Ricardo Piglia, Diamela Eltit, Augusto Roa Bastos). Students will work in trios throughout the semester, each group meeting with the instructor once a week. Each week one of the students will present a 5-page paper on the assigned reading and one will be designated the official respondent, whose job is to lead a discussion of the paper. The third member of the group will turn in a revision of the previous week's paper. Prerequisites: one 200-level RLSP course or permission of instructor. Heritage learners, international students and second-language learners are all heartily welcome. Conducted in Spanish.

Class Format: Conducted in Spanish.

Requirements/Evaluation: Each student will write and revise a minimum of three five-page papers during the course of the semester. Students will be evaluated on the basis of their preparation for each tutorial meeting as evidenced by the quality and frequency of their engagement with the material, including their classmates' written work. Essays will be graded after they have been revised and submitted to the professor.

Prerequisites: Any 200-level Spanish course.

Enrollment Limit: 12

Enrollment Preferences: Priority given to Spanish majors.

Expected Class Size: 12

Grading:

Distributions: (D1)  (DPE) (WS)

Writing Skills Notes: Students will practice writing throughout the semester, and will receive abundant feedback on their written work from their tutorial partners and the instructor. We are altering the tutorial format from the standard duos to trios of students, so that students will have ample opportunity to revise their written work.

Difference, Power, and Equity Notes: This course focuses on issues of diversity, power and privilege within the internal and regional constitution of Latin American countries. We will read with an awareness of some of the ways that differences of race, class, nationality and gender may be mobilized in times of conflict, and consider how the collective narratives that are constructed and imposed in the aftermath tend deal with those conflicts.

Attributes: GBST Latin American Studies

Not offered current academic year

RLSP 301  (S)  Cervantes' "Don Quijote"
We will devote the semester to the study of one novel: Miguel de Cervantes' *Don Quijote*, published in the early part of the 17th century. We will try to understand the reasons for the novel's immense and ongoing influence. We will study Cervantes' handling of issues that continue to have relevance to our lives today: relationships, the role of fiction in life, the shapes of mental illness, how we show people who we think we are, how our governments, families and friends decide who we are, the fun and annoyance of going on a road trip with someone, the meaning of justice, and the meaning of storytelling, to name a few. In the process, we will set things in context to understand what was going on in Cervantes' world. Finally, we will find that even an entire semester was not enough to engage fully with this extraordinary work. Conducted in English using a contemporary translation.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** active class participation; two to three short projects and one final research project

**Prerequisites:** any 200-level RLSP or Comp lit or English course at Williams

**Enrollment Limit:** 20

**Enrollment Preferences:** Spanish majors and Comp Lit majors and Engl majors.

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

**RLSP 304 (S) Environmental Literature and Film in Latin America** (DPE) (WS)

**Cross-listings:** ENVI 311 / COMP 311

**Primary Cross-listing**

What use are aesthetics when the world is (literally) on fire? We will take up this question and others in a critical engagement with Latin American cultural production of the twentieth and twentieth centuries, especially works of literature and film that directly or indirectly engage with environmental crisis. Students can expect to explore a variety of media, forms and genres, including works that range from (more or less) mainstream to cutting edge. Our examinations of literature and film will be supported by theoretical writings produced in the Americas and other places. Writers and directors whose work may be considered include, but are not limited to: Lucrecia Martel, Ciro Guerra, Rafael Barrett, Samanta Schweblin, Ernesto Cardenal, Juan Rufio, María Luisa Bombal, Eduardo Gudynas, Silvia Rivera Cusicanqui, Eduardo Viveiros de Castro, Isabelle Stengers.

**Requirements/Evaluation:** This course will be conducted seminar-style. Students will be expected to prepare thoroughly and be active, engaged participants in class discussions. In addition to day to day preparation and participation, other graded assignments will include discussion-leading, one short (5-7 page) essay and a longer (15-20 page) paper combining research and original analysis.

**Prerequisites:** One college literature of film course at the 200-level or above.

**Enrollment Limit:** 19

**Enrollment Preferences:** Envi majors and concentrators, Comp Lit majors, Spanish majors and those working towards the Spanish certificate.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 311(D1) RLSP 304(D1) COMP 311(D1)

**Writing Skills Notes:** All students in the course will write (and rewrite) no less than 20 pages. Major writing assignments will be scaffolded, with explicit discussion of the writing process (pre-writing, drafting, revision) and consultation.

**Difference, Power, and Equity Notes:** The works of literature and film that we will be examining challenge North American conceptions of climate change (and environmental crisis more broadly) by making visible (often uncomfortably so) the colonial and neocolonial history of extractivism.

**Attributes:** ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

**RLSP 311 (F) The Politics of Love in Latin American Literature** (DPE) (WS)

Cynical, sincere, confused and confusing, love and politics have a lot of complicated history together in Latin America. This course considers works of literature and other cultural texts in which love and politics are explicitly intertwined: the authors, artists and activists we consider profess love for their
followers and would-be converts, represent love as a (revolutionary) political force, contest the legitimacy of patriarchal heteronormativity, and sometimes all three. We will consider writings by 20th and 21st century political leaders whose speeches and other writings convey the melodrama of radionovelas (Eva Perón) as well as the sacrificial love of the guerrillero (José Martí, Che Guevara) and the anarchist (Rafael Barrett). We may also consider the love professed by historical figures including Catholic missionaries (Antonio Ruiz de Rivera) and 19th century abolitionists (Juan Francisco Manzano, Gertrudis Gómez de Avellaneda) and/or nation-builders (Mármol, Sarmiento). We may examine tensions around the domestication of love in writings in translation by Brazil’s Clarice Lispector and the torment of eros in Elena Garro’s political novel Memories of the Future. We will likely read poems of grief and love for those murdered in the secret detention centers of the Southern Cone dictatorships (Raúl Zurita, Juan Gelman). We will delve into the politics of queer love, solidarity and mourning with authors such as Mario Puig, Reinaldo Arenas, and Cristina Peri Rossi, and in Sebastián Leilo’s 2017 film, A Fantastic Woman. We will conclude by considering the politics of love as articulated by Black Lives Matter, particularly as the movement has taken shape in Latin American countries, and its impact in Colombia and elsewhere. Conducted in Spanish.

Requirements/Evaluation: Regular preparation for class is required, as is thoughtful participation in class discussions. Students will be evaluated for both. Students will also be evaluated for discussion-leading and making presentations on their original research in progress. There will be two graded essays, one of 5-7 pages and the other 15-20.

Prerequisites: One RLSP course at the 200 level.

Enrollment Limit: 19

Enrollment Preferences: Students majoring or completing a certificate in Spanish.

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be writing and rewriting roughly twenty pages. Longer assignments will be broken down into stages (proposal, bibliography, research, analysis, draft, revision) with feedback from the instructor at every stage.

Difference, Power, and Equity Notes: Using literary texts, we will delve into the ways a wide variety of political actors -- from the mainstream to the radical fringe -- talk about love in Latin American contexts. Some of them will seem comparatively cynical, but in other cases we will be looking at how people contest the hegemony of patriarchal, capitalistic and heteronormative definitions of what "counts" as true love.

Not offered current academic year
This course focuses on the writings of one of the most revered women writers in Hispanic Letters, Sor Juana Inés de la Cruz, who was regarded by her contemporaries as the Tenth Muse. Our exploration and study of Sor Juana's writings will focus on the different genres in which she wrote—prose, poetry, and drama—and it will include a survey and analysis of the historical context in which she wrote, the formal aspects of her writings, and critical essays about her work written by leading scholars in the field of Latin American literature. Near the end of the semester, the course will conclude by expanding its focus to examine the ways in which Sor Juana's work has influenced contemporary Latin American and U.S. Latina authors. Conducted in Spanish.

Requirements/Evaluation: Each student will write three 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide two 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version. Excellent preparation and class participation is required.

Prerequisites: One RLSP course at the 200-level or above or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Spanish majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

RLSP 344 (S) Contemporary Latin American Queer Aesthetics (DPE)

Conducted in Spanish, this advanced seminar examines a panoramic corpus of contemporary cinema, literature, and music in Latin America to trace possible shared political and cultural characteristics of a queer aesthetic. We will explore the works of renowned figures such as Reinaldo Arenas, Chavela Vargas, Pedro Lemebel, and Mariana Rondón, among others, to delve into the intricate layers of queer expression within the region. Is it possible to discern a common transnational queer identity among Latin American countries? What would it look like, sound like? Would it have a shared political mission? What would be its symbols? Primarily focusing on Venezuela, Cuba, Puerto Rico, Dominican Republic, Mexico, Chile, and Argentina, we will analyze a wide range of cultural artifacts—including the work of writers, filmmakers, and musicians—to discuss contemporary debates on identity and representation surrounding sexuality, but also in its intersection with race, gender, and social class. Through an interdisciplinary and intersectional lens, this course will offer a feminist analysis of Latin American counterculture, interrogating the process whereby queer aesthetics enter and sabotage the mainstream. By the end of the seminar, students will have a strong knowledge of contemporary queer artistic practices in Latin America and will be able to identify the most prominent theoretical contributions on sexual and gender dissidence from the region.

Requirements/Evaluation: Evaluation is based on active participation, class presentations, a weekly forum debate, and either a final paper or project.

Prerequisites: Any 200-level course in Spanish taken at Williams or permission of the instructor.

Enrollment Limit: 20

Enrollment Preferences: Spanish majors, Spanish certificate candidates.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: The course explores the politics and aesthetics of Latin American cultural material from the framework of resistance and queer activism, giving students the opportunity to understand the construction of alternative Latin American identities that go against the mainstream.
RLSP 405 (S) Alternative American Literatures: From the Indigenous Chronicle to the Latin American & Chic. Novel  (DPE) (WS)

Do the Americas have a common literature? If so, is it possible to trace their roots and continuity from the colonial era to the present? Literary critic Martin Lienhard suggests that it is indeed possible to trace the origin of a literature common to Latin America from the colonial era and into present by focusing on what he calls "alternative literatures"—literatures that relativize the importance of Europeanized and Creole literatures and valorize the richness of oral traditions in the Americas. Such literatures, he asserts, are closely tied to marginalized sectors of society. In this course, we will take Lienhard's concept of "alternative literatures" as a point of departure to pursue our own examinations of how these "alternative literatures" are constituted. While the primary aim of this course is to focus on the writings of Latin American authors, we will end by exploring the relationship between "alternative" Latin American literatures and Chicana/o/x literatures. Readings will include narrative texts such as Cartas de relación, chronicles of conquest, religious texts, indigenous annals, poetry, and drama, as well as contemporary Latin American and Chicana/o/x novels.

Requirements/Evaluation: Four essays, class presentations, active participation, and regular attendance required

Prerequisites: any 300-level RLSP course or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Senior Spanish Majors.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Each student will write four 4-6 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version.

Difference, Power, and Equity Notes: This course will highlight intellectual production of indigenous peoples of the Americas under Spanish colonial rule as well as the writings of more contemporary minority authors of Latin America. It will explore the new identities and textualities that emerge as a result of the encounter and subsequent conquest of the Americas. As such, students will gain critical skills to analyze a diversity of Spanish-American colonial texts from the 16th century as well as more contemporary narrative texts.

Spring 2025

SEM Section: 01    TF 1:10 pm - 2:25 pm     Carlos Macías Prieto

RLSP 407 (F) Gender, Race and Nature: Ecocritical Examinations of Latin American Culture  (DPE)

This senior seminar brings an ecocritical focus to the study of Latin American cultural production. We are particularly interested in works of literature and other kinds of cultural texts that critique, subvert, or transcend conventionally Eurocentric and patriarchal conceptualizations of the human and its relation to non-human being. Rhetorical tropes linked to extractivist economic practices and their alternatives will be identified and analyzed over the course of the semester as we sample a wide range of literary and non-literary texts (poetry, narrative prose, essay, film, painting, woodcuts, music, digital media) produced throughout the 20th and 21st centuries. We will also read and discuss writings by leading ecocritics and decolonial theorists including Silvia Rivera Cusicanqui, Eduardo Gudynas, Mary Louise Pratt, Walter Mignolo, and more.

Requirements/Evaluation: Thorough preparation and active class participation, discussion-leading, one 5-7 page paper and one 15-20 page paper as well as a paper proposal, abstract, bibliography, and draft.

Prerequisites: Study abroad, one or more RLSP courses at the 200+ level, or permission of instructor.

Enrollment Limit: 19

Enrollment Preferences: Senior Spanish majors, then other interested students.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course brings decolonial theory and ecocriticism together in an approach to Latin American cultural production.

Theatre (Div I)

Chair: Amy Holzapfel

- Robert E. Baker-White, Chair and Professor of Theatre
- Amy S. Holzapfel, Professor of Theatre
- Sydney Maresca, Visiting Assistant Professor of Theatre
- Jessica R. Pearson-Bleyer, Visiting Assistant Professor of Theatre
- James L. Pethica, Senior Lecturer in English and Theatre; affiliated with: English, Theatre
- Shanti Pillai, Assistant Professor of Theatre; on leave 2023-2024
- Omar A. Sangare, Professor of Theatre; on leave 2023-2024
- Kim Stauffer, Visiting Lecturer in Theatre
- Erica Terpening-Romeo, Visiting Assistant Professor of Theatre

The Department of Theatre is committed to the merging of embodied practice and scholarship in the fields of theatre and performance studies. The curriculum is dedicated to the study, practice, appreciation, and interpretation of theatre, performance, and other time-based arts. The major in Theatre emphasizes the collaborative nature of the theatre and performance making by drawing upon courses offered by faculty of the Language, Literature, Music, and Art Departments. Although students will be equipped to proceed to graduate and professional schools in theatre, the major is primarily directed toward those interested in studying theatre and performance as artistic phenomenon and as interpretive tools. Because a deep understanding of theatre requires training and experience with the synthesis on stage, the major includes curricular study of production and performance, as well as continued participation in departmental stage production.

The production arm of the Department of Theatre operates under the supervision of the departmental faculty. Major departmental productions as well as laboratory and experimental productions of all kinds are mounted on the new stages of the ’62 Center for Theatre and Dance. Participation in acting or technical work is open to all members of the Williams College community. Students majoring in Theatre will be asked to consult regularly with departmental advisors in devising the sequence of courses and production participation that will constitute their major.

Major

The Major in Theatre consists of nine courses, including the following:

- Theatre 101 The Art of Playing: An Introduction to Theatre and Performance
- Theatre 201 Worldbuilding: Staging and Design For The Theater
- Theatre 301 Embodied Archives: Global Theatre & Performance Histories
- Theatre 406 Practicing Theory: Senior Seminar

Five additional elective courses must be taken from the department’s other offerings (including courses cross-listed with Theatre). Two of the five electives must be taken at the 200-level or higher by the end of the student’s junior year, and an additional two of the five must be taken at the 300-level or higher by the time of graduation. Substitutions of other Williams’ courses, or of Study Abroad courses, may be made only with the consent of the department Chair. Students should consult with the department Chair regularly in planning a balance of practice and scholarship in their elective choices and in mapping a route through the major.

Production Requirement for the Theatre Major:

All majors in Theatre are required to participate in a minimum of four department productions. Participation in at least one of these four must be in stage management. Assignment to productions in stage management must be made in consultation with the department Chair. Students participating in a production will be enrolled in THEA 290-299: Theatre Department Production as a partial-credit, fifth course, admitted by permission of the department Chair and evaluated on a Pass/Fail basis only. Students remaining in the course beyond the sixth week of the start of a term will be graded by the instructor. Enrollment is by audition or appointment within the Theatre department. Students who do not wish to enroll for credit will be given the opportunity by the department to be removed from the course. Rehearsals for productions are scheduled TBA, based on the availability of the ensemble, and do not conflict with other academic commitments, such as evening courses or evening exams. The department normally produces three productions per academic year. Students may enroll in multiple productions in the same semester and may repeat a production course by permission of the department Chair. For each departmental production they participate in, a student will receive a partial credit of .5 on their College...
THE DEGREE WITH HONORS IN THEATRE

GUIDELINES FOR HONORS

IN THE DEPARTMENT OF THEATRE WILLIAMS COLLEGE

Students interested in pursuing Honors in Theatre should first refer to the guidelines for undertaking Honors in any discipline at Williams College. These guidelines state: “Williams awards the degree with Honors to those students who have demonstrated imagination, initiative, and intellectual independence within the major.”

Next, students should refer to the description of the Degree with Honors in Theatre as described in the Williams course catalog. This states:

THE DEGREE WITH HONORS IN THEATRE

Candidates for Honors should apply for admission through the submission of a project proposal to the Department Chair by the first Friday of the second term of their junior year. Students considering admission to the Honors program in Theatre must have achieved at least a 3.5 grade point average in all Theatre courses, with a minimum of five courses completed by the fall term of their junior year (this GPA must be maintained throughout the senior year in order to achieve Honors), and have already demonstrated both ability and experience through coursework, production, and/or performance. In addition, applicants must have a plan in place to complete their Stage Management requirement by the end of the first term of their senior year. For projects including a production element, all performances must occur within the second term of the yearlong Honors project. Admission into the program will be determined on the basis of the student’s acceptance of the terms and conditions stated by the faculty. Students may request a specific faculty advisor. However, students are not guaranteed to be assigned their requested advisor. Requests may be denied depending on faculty availability. All candidates will be informed of their admittance to the Honors program by the end of the second term of their junior year.

Once a student is admitted, the department Chair will assign an Honors Advisor, who will work with the student to specify a timeline and program for the completion of the Honors project.

Students will be evaluated on an ongoing basis. If a student’s work in the first or second term does not meet the standards of Honors, their project will be converted into a standard Independent Study. The Honors Advisor will determine both the first and second semester grades for the candidate. All Honors candidates will present their completed projects to the department for evaluation by the faculty of Theatre. Determination of High Honors, Honors, or No Honors will be made by the department. Honors of any kind are contingent upon satisfactory completion of the Honors project. High Honors is awarded only to those whose performance in the program has been regarded as exceptional.

PROJECT PROPOSAL

The project proposal is a written essay of approximately 750-1000 words that describes the nature, goals, and methodology of the proposed course of study and project to be undertaken in the pursuit of Honors. The proposal must be structured by the following sections with headings, designating each section:

- Project Description: a complete and detailed description of the proposed project, including its major aims and objectives. Successful proposals will not only convey the critical and intellectual significance of the project but also its artistic and creative potentials by making reference to select theory, practice, or scholarship in the fields of performance and theatre studies, as well
as other disciplines if relevant.

Methodology: a description of the methods and strategies to be undertaken in pursuit of the project’s objectives.

Contribution to Field: a brief rationale for the project’s expected contributions to the practice and field of theatre arts and/or scholarship.

Contribution to Educational Experience: a brief description of how the proposed project contributes to the candidate’s own educational goals and development.

Timeline of Completion: an estimated timeline of the project, including stages of development and expected deadlines.

Required Supplemental Materials (not included in proposal word count):

Bibliography: a preliminary bibliography of resources, which may include texts, videos, archives, or other reference materials to be consulted during the planned course of study, formatted in MLA or Chicago.

Resume: a recent resume.

Please note: for projects involving a performance and/or production components, candidates should be mindful of the scope and scale of their proposed project, taking into account the resources and labor required for the realization of their project. All accepted Honors projects will be provided with a modest and equitable budget, the limits of which they must agree to work within. Budgeting will begin only after acceptance into the Honors program. See: Guidelines for Production in Honors Projects.

All documents, including the project proposal and any supplemental material, must be submitted digitally to the Chair.

TIMETABLE OF PROPOSAL AND COMPLETION OF HONORS

The following offers the default timetable for admission into Honors and completion of all Honors projects, based on a regular academic calendar (fall/spring). Note: students wishing to apply for Honors in an off-cycle fashion (spring and fall of the same calendar year) must be in touch with the Chair early in the second term of their junior year to express interest in applying for Honors.

For all Honors candidates: failure to meet established deadlines may result in dismissal from Honors.

JUNIOR YEAR:

Fall term: candidates meet with the Chair to express interest in pursuing Honors.

By second Friday of Spring term: project proposal due to Chair.

Candidates will be informed by mid April of the decision by the faculty of Theatre regarding admission to Honors. Admission into the program will be determined on the basis of the student’s acceptance of the terms and conditions stated by the faculty. Department assigns Honors Advisor(s) to admitted candidates.

SENIOR YEAR, FALL:

Course registration for Fall: all Honors candidates must enroll in THEA 493

During term: research and preparation for production or written thesis

Course pre-registration for Winter Study and Spring term: candidates should expect to register for W32 and THEA 494.

December 1: progress report due to Honors Advisor. The report is a written statement of 2-3 pages in which the candidate accounts for the progress they have made so far as well as their plans for moving forward in the remainder of the academic year
End of Fall term: Honors Advisor, in consultation with faculty in Theatre, determines whether a candidate may proceed with Honors for a second term or turn the project into an Independent Study. Should a candidate not be given permission to continue in Honors for the second term, they must change their enrollments as appropriate for Winter Study and the Spring term.

SENIOR YEAR, WINTER STUDY:
Candidates must continue to advance their Honors projects, using the time to prepare for their second term.

SENIOR YEAR, SPRING:
March 15: progress report due to Honors Advisor. The report is a written statement of 2-3 pages, in which the candidate accounts for the progress they have made so far as well as their plans for moving forward in the remainder of the year.

If applicable, the production and performance component of the Honors project will occur during this term.

May 1: all written theses and digital production portfolios due to Honors Advisor. All written theses must conform to the formatting guidelines set by Williams College and include proper citation as well as a bibliography. All production components and performance elements must be fully completed by this time. In the case of an Honors project in production, the student must submit to their Honors Advisor a digital production portfolio, which may contain: director’s or actor’s notes or journal, research materials, photographs or video of the production, or design renderings and sketches, etc. The candidate will work with their Honors Advisor to determine the exact contents of the digital portfolio. All production portfolios must also contain a proper bibliography of sources and materials consulted during the project.

During the final two weeks of classes: oral presentations of theses will be scheduled by the Chair, in consultation with candidates and faculty members.

By end of exam period: candidates will be informed of the departmental decision of Honors, High Honors, or No Honors. Note: All written Honors theses must be digitally submitted to the Library Archives by the final day of exam period.

Additional Information

Proposals for Joint or Collaborative Projects:
Students may submit proposals for projects that are collaborative in nature, and may even propose joint projects in which no more than two Senior Theatre Majors plan to execute an Honors project together. However, in such cases the department will evaluate admission to the Honors program on an individual basis, and, should the project be approved, will also determine the awarding of No Honors, Honors, or High Honors on an individual basis. If one student from a joint project is admitted to the Honors program and the other is not, then the department will work with the approved student to see whether a revision to the original proposal will allow the project to proceed.

Technical, Financial, and Staff Support:
Students proposing to engage in production or performance as part of their Honors projects should recognize that departmental constraints (financial, technical, and personnel) dictate to a significant degree what levels of support are possible in any given year. See: Guidelines for Production in Honors Projects. The Department will make every effort to support the interests and
goals of students as we see fit and within our range of possibility. However, students should tailor their proposals toward projects that can be produced with modest and limited means, both in material resources and staffing support. All honors projects will be given a fair and equitable budget. Flexibility within proposals is required. Due to their unique nature, not all projects will necessarily receive the exact same kind of technical or material support: at the same time, the department will do its best to assure that Honors projects are supported as equally as possible so as to maximize the educational benefits for each Honors candidate. We aim to create equity of access within the varied requirements of Honors.

STUDY ABROAD

The Theatre Department attempts to work individually with majors and prospective majors who desire to study abroad. In general, with careful planning it is usually quite easy for students to complete the major in Theatre if they study abroad for one semester of their junior year. For those wishing to study abroad for more than one semester of junior year, a more complicated situation may arise, but one that can often be successfully managed through close consultation with the department chair. Students are encouraged to consult with the chair early in their Williams careers if they anticipate a combination of Theatre major and study abroad.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

THE NATIONAL THEATRE INSTITUTE

The Department of Theatre is affiliated with the National Theatre Institute, which offers additional theatre study through its resident semester program. The Institute is fully accredited by Connecticut College and is a member of the Twelve-College Exchange. Limited numbers of Williams students can therefore be selected to take a full semester of intensive theatre study at the NTI, located at the Eugene O’Neill Memorial Theatre Centre in Waterford, Connecticut. During the semester, students from participating colleges live and work as members of a theatre company gaining experience with professional theatre artists in a workshop environment. Early application is essential.

THEA 101  (F)  The Art of Playing: An Introduction to Theatre and Performance

Cross-listings:  COMP 151 / GBST 116

Primary Cross-listing
This is an introduction to the global art and practice of making theatre. Students will learn about the history, aesthetics, and approaches to the performer's labor associated with select performance forms from around the world. Emphasis will be on the analysis of embodied practices and the relationship between the stage and everyday life. Through readings, audiovisual materials, performance exercises, and discussions we will engage with theatre as a constantly evolving art form, sharpening our analytical skills through theoretical approaches from performance studies. Central to our exploration will be excavating the Eurocentric assumptions that conventionally shape the practice and study of theater in the United States. We will seek ways to decolonize our perspectives and ask critical questions about performance's potential to enact strategies of anti-racism and anti-imperialism. This course, open to all students, is a gateway to the major in Theatre, and is a prerequisite for THEA 201, THEA 204, THEA 301, and THEA 401.

Requirements/Evaluation: two 5-page critical essays, journal reflections, studio exercises, and active participation in all activities

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: prospective Theatre majors or Theatre majors or Comparative Literature majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 101(D1) COMP 151(D1) GBST 116(D2)

Fall 2024

SEM Section: 01  MW 11:00 am - 12:15 pm  Shanti Pillai
SEM Section: 02  M 7:00 pm - 9:40 pm  Shanti Pillai

THEA 103 (F) Acting: Fundamentals

In this course students will examine the power of public presence through theory and practice while expanding their talents, sensitivity, and imagination, and will increase their self-awareness, confidence, creativity, and other skills that are useful in social situations, public speaking, theatre performances, and virtual interactions.

Requirements/Evaluation: committed participation in class, preparation and performance of assigned material, and some modest written assignments

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Preference given to students beyond their first semester at the college.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2024

STU Section: 02  M 7:00 pm - 9:40 pm  Omar A. Sangare

THEA 104 (F) Greek Literature: Performance, Conflict, Desire

Cross-listings: COMP 101 / CLAS 101 / DANC 101

Secondary Cross-listing

In the Iliad, Paris’ desire for the famously beautiful Helen leads to the Trojan War, the devastating conflict between the Trojans and the Greeks retold and reimagined time and again in ancient Greek literature. The stories of Troy and its aftermath were performed not only as epic poems (as in the Iliad and the Odyssey), but also re-enacted by singing and dancing choruses, dramatized on the tragic stage, and recounted in oratory. Beginning with the Homeric epics, this course explores the recurring and ever-shifting debates, longings, hostilities, and aspirations that drive Greek literature and shape
its reception, with a particular focus on questions of performance context and audience. Our attention to sound, movement, and staging will be enriched by consideration of select examples from the rich reception history of Greek myth in modern theater and dance. The nexus of performance, conflict, and desire will also give us a distinct perspective on many important topics within the study of Greek culture, including the embodiment of personal and collective identities, the workings of Athenian democracy, and the development of literary genres. This course will include readings from, e.g., Homer, Sappho, Herodotus, Aeschylus, Sophocles, Euripides, Aristophanes, Thucydides, and Plato, as well as viewings of relevant performance works. All readings are in translation.

Requirements/Evaluation: midterm and final exam; brief (one or two pages) written assignments; participation in class.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Classics majors, first years, sophomores

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

LEC Section: 01 TR 9:55 am - 11:10 am Sarah E. Olsen

THEA 109 (S) The Art of Yoga: Practice, Philosophy, Politics, Possibilities (DPE)

Cross-listings: ASIA 109

Primary Cross-listing

This course offers an immersive, interdisciplinary approach to hatha yoga, the branch of yoga that emphasizes bodily techniques for channeling energy, and achieving balance and quietude. It has been practiced and theorized variously in South Asia since ancient times. More recently, beginning in the late 19th century, it has been popularized throughout the globe, and has served as a source of inspiration for artists in various disciplines, including the theatre. Our work will follow four interrelated paths that will provide a broad context for our own experience and offer us tools for developing creativity: 1) We will dedicate ourselves to the careful study of the physical practice of yoga asanas, giving emphasis to biomechanical principles of alignment. Our study will include some basics of yoga anatomy; 2) We will study some allied philosophical principles, as they emerge from the Sanskrit text, Patanjali’s Yoga Sutras, and some current commentaries on that text, by means of expanding the significance of our practice to all areas of our lives; 3) We will attend to the cultural politics of yoga by discussing new scholarship on its ancient origins as well as critical inquiry about how issues of appropriation, Orientalism, and racism shape its current manifestations; 4) We will examine how artists have incorporated elements of yoga into their practice. To explore how yoga might support our own artistic and innovative thinking, we will pair our practice with creative exercises. In this way, the course aims to explore the relationship of theory and practice. It will be of interest to students in the arts and anyone interested in fostering artistry and the imagination. Students must be prepared to engage in a physical practice of asana, as well as commit to reading, writing, and discussion. No previous experience with yoga is required.

Requirements/Evaluation: Students will write 3-page weekly papers, either in response to readings or embodied exercises, or the tutorial partner's essay. Written feedback will be given by instructor. Students will be expected to demonstrate that they are regularly practicing outside of class both by the quality of questions they bring to our sessions together, as well as their continuous refinement of the poses. Students will not be evaluated in relation to a standard, but according to their own dedicated and steady progress with respect to the experience of yoga practice. The evaluation process includes attendance.

Prerequisites: Prospective students will be asked to submit an online form with questions about their interest in the class.

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to first-year students.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $50 for yoga mat, belt, and balls.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 109 (D1) ASIA 109 (D1)

**Difference, Power, and Equity Notes:** Throughout the course we will reflect on the ways in which the knowledge created through yogic practice and philosophy disrupts and provincializes European epistemological systems. Moreover, we will engage in critical inquiry into the ways in which the global popularity of yoga is shaped by colonial legacies of Orientalist representation, as well as contemporary modes of cultural appropriation and consumerism.

Spring 2025

TUT Section: T1 TBA Shanti Pillai

**THEA 141 (F) Opera**

**Cross-listings:** MUS 141

**Secondary Cross-listing**

An introduction to the history of opera, from the genre's birth c. 1600 to the present. At various points in its 400-year development, opera has been considered the highest synthesis of the arts, a vehicle for the social elite, or a form of popular entertainment. Opera's position in European cultural history will be a primary focus of our inquiry. We will also study the intriguing relationship between text and music, aspects of performance and production, and the artistic and social conventions of the operatic world. The multidimensional nature of opera invites a variety of analytical and critical perspectives, including those of music analysis, literary studies, feminist interpretations, and political and sociological approaches. Works to be considered include operas by Monteverdi, Lully, Charpentier, Handel, Gluck, Mozart, Rossini, Donizetti, Verdi, Wagner, Bizet, Puccini, Strauss, Berg, Britten, Glass, and Adams.

**Class Format:** discussion

**Requirements/Evaluation:** a midterm, a brief paper, an 8-page paper, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Students with experience in music and/or theater studies.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 141 (D1) MUS 141 (D1)

Not offered current academic year

**THEA 150 (S) The Broadway Musical (DPE)**

**Cross-listings:** MUS 150

**Secondary Cross-listing**

Named for a specific road but enjoying a global impact, the Broadway musical has intersected with multiple styles and societal concerns over the past century. In this course, we explore the American musical theater's roots and relationship to opera, operetta, vaudeville, minstrelsy, and Tin Pan Alley. Traveling through the genre's history, we will encounter a wide range of musical styles, including ragtime, jazz, rock, and hip hop, and will explore several genre transformations, such as movies made into musicals and musicals into movies. We will develop a range of analytical skills as we investigate connections between choreography, lyrics, music, staging, and production. Throughout the semester, we will consider the genre's representations and reflections of ethnicity, race, sexuality, and class. The syllabus includes representative works by Gilbert and Sullivan, Cohan, Gershwin, Kern, Weill, Rodgers and Hammerstein, Lerner and Loewe, Bernstein, Sonheim, Lloyd Webber, Tesori, and Miranda, with particular focus on such works as Showboat, Oklahoma!, Guys and Dolls, West Side Story, Hair, Rent, and Hamilton.

**Class Format:** discussion

**Requirements/Evaluation:** a midterm, a brief paper, an 8-page paper, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30
**Enrollment Preferences:** Seniors and Juniors and music majors.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

THEA 150(D1) MUS 150(D1)

**Difference, Power, and Equity Notes:** We will develop skills aimed at analyzing and interpreting how perceptions of race, gender, and class shaped, and were shaped by, Broadway. We will consider the extent to which, for example, blackface minstrelsy and ethnic-based humor persisted and how specific musicals aimed to engage with critical social and political issues throughout the genre's history. Musicals have played a major role in the contested and ongoing endeavor to define "America."

Not offered current academic year

**THEA 183 (F) Stage Direction for Opera and Musical Theatre**

**Cross-listings:** MUS 183

**Secondary Cross-listing**

The course provides an overview of the fundamentals of stage direction for opera and musical theatre. Students will develop an understanding of the basic principles of design and the process necessary for developing an approach to directing a production. They will explore the work of stage directors whose output has been particularly influential and learn about a variety of approaches to process and rehearsal technique. Repertoire studied will include a range of opera and musical theatre from the beginning of the form to its current trends and a broad variety of directorial approaches from traditional to concept productions. Students will complete the process of developing a concept/approach for a production with a title of their choosing.

**Class Format:** Hybrid lecture/studio format

**Requirements/Evaluation:** Students will complete the process of developing a concept/approach for a production with a title of their choosing.

**Prerequisites:** none

**Enrollment Limit:** 24

**Enrollment Preferences:** Music and Theatre majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**THEA 201 (S) Worldbuilding: Design for the Theater**

**Cross-listings:** ARTS 201

**Primary Cross-listing**

This course examines designers' creative processes as they investigate a theatrical text and then dream-into-being the fictional worlds of a hypothetical production. Class will consist of several practical projects in multiple areas of design. We will practice a two-pronged technique in response to a text: developing a personal, intuitive creative response while simultaneously supporting all logistical requirements, resulting in an inventive yet dramaturgically sound design. Emphasis will be on folding this individual work process into a larger group collaboration by refining methods of communication, presentation, and group critique.

**Requirements/Evaluation:** Coursework is group class discussion and critiques, paired with several hands-on projects throughout the term.

**Prerequisites:** THEA 101 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre majors
THEA 203  (F)  Living Masks: Theory and Practice

The Mask is one of the oldest performance tools in the history of humanity - they conceal, reveal, and transform. For millennia they have been used in spiritual contexts like ritual storytelling, dance, and funerals. In our own times, theoretical and protective masks are part of everyday conversations and day to day life. This course will survey, discuss, and experiment with masks thematically and tangibly across histories, cultures, and traditions. There will be practical assignments in creating masks with various mediums such as recyclable materials, cloth, and paper mâché.

Requirements/Evaluation: multiple mask-fabricating assignments, some physical theatrical exercises, short papers, short presentations, a final paper and presentation, committed participation and attendance, students will also be expected to partake in discussions

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Theatre majors; Art Studio majors

Expected Class Size: 8

Grading: yes pass/fail option, no fifth course option

Materials/Lab Fee: $75 lab fee

Distributions: (D1)

Not offered current academic year

THEA 206  (S)  Directing for the Stage

An introduction to the resources available to the Stage Director for translating interpretive concepts into stageworthy physical realization. Kinetic and visual directorial controls, as well as textual implications and elements of dramatic structure, and strategies of working with actors and other collaborators will be studied in detail. Most assignments will involve hands-on directing projects presented in class for collective critique.

Requirements/Evaluation: committed participation in the preparation and performance of production exercises; there will be some written assignments

Prerequisites: Theatre 101 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Theatre majors and prospective Theatre majors

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2025

THEA 209  (S)  Realism: Scene Study

A studio in the acting, craft, and performance of realism. How do we perform in the present moment? How do we act with purpose and intention? What...
makes something look and feel like it is happening for the first time? When might acting require us to do less rather than more? In this studio, we will explore tools and methods used by actors to tell truthful stories and convey the close imitation of reality on stage. Beginning with basic techniques and exercises, we will move into more advanced scene studies based on short scenes from works by contemporary U.S. playwrights. Playwrights may include Branden Jacobs-Jenkins, Bess Wohl, Amy Herzog, Annie Baker, Dominique Morisseau, Eboni Booth, Quiara Alegría Hudes, Jackie Sibblies Drury, Lauren Yee, Mona Mansour, Martyna Majok, Taylor Mac, and others. As a final project, students will perform two- or three-person scenes, potentially in front of an invited audience.

Requirements/Evaluation: active participation in class exercises and discussion; off-book performance of a variety of scenes throughout the semester; final project with research and performance.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Theatre majors, preference given to those who have taken Thea 101.

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2025

THEA 210 (F) The Art of Making Art: Production Management Across the Arts
An introductory look at management across the performing arts from the point of view of the Production Manager and Artistic Producer. How do these team members facilitate the conceptual ideas of creative teams while balancing the practical realities of the business of the arts? This course will examine how collaborators in a variety of fields breakdown barriers, embrace change and recover from failures. Through exercises, textual analysis and research projects participants will develop a theoretical creative project and will explore the management process in the following areas: communication, collaboration, scheduling, budgeting, human resources, negotiation and creativity.

Requirements/Evaluation: Case Study; Field Notebook; (4) Research Projects/Presentations; Collaborative Creative Project; Active classroom participation

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Preference given to Theatre majors, juniors and seniors

Expected Class Size: 5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

THEA 216 (F) Asian/American Identities in Motion (DPE)
Cross-listings: AAS 216 / AMST 213 / DANC 216 / GBST 214 / ASIA 216

Secondary Cross-listing
The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian American (including South Asian) communities are cultivated, expressed, and contested. Students will engage with how social and historical contexts influence the processes through which dance practices are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies to engage with issues such as nation formation, racial and ethnic identity politics, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include screenings, movement workshops, and discussion with guest artists and scholars. No previous dance experience is required.

Requirements/Evaluation: reading responses, in-class writing assignments, participation in discussions and presentations, two 5-6 page essays, and a final cumulative essay assignment.

Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: first years and sophomores
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AAS 216(D2) AMST 213(D2) DANC 216(D1) GBST 214(D2) ASIA 216(D1) THEA 216(D1)

Difference, Power, and Equity Notes: This course introduces students to the role of performance in nation formation in Asia and the history of Asian Americans in the US through analysis of dance practices. Student will explore how race was central to the formation of Asian and the American nations, and how social and legal discriminatory practices against minorities influence identity and popular cultural practices. The assigned material provide examples of how artists address these inequalities and differences in social power.

Attributes: AAS Core Electives  AAS Gateway Courses

Fall 2024

THEA 217  (F)  Acting Through Impulse
Acting Through Impulse: An actor's job is inherently contradictory: we must remain present and alive onstage but craft a coherent, repeatable performance. We must access depth and intensity of feeling but do so sustainably, while remaining grounded in our bodies. This course will explore the link between aliveness and preparation, between impulse and regulation. Forging those links requires cooperation between the imagination, the body, and the text. Together, we will approach impulse from several angles: first, through movement and image, then through the operations of the nervous system, and finally through scenework. There will be journal and written assignments, but the bulk of the classwork will be practice-based, incorporating physical exercises, warm-up training, monologue work and scene performance.

Prerequisites: None
Enrollment Limit: 14
Enrollment Preferences: Theatre majors; students having taken THEA 101
Expected Class Size: 14
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

Fall 2024

STU Section: 01    T 1:10 pm - 3:50 pm     Erica Terpening-Romeo
THEA 220  (S)  Greek Tragedy  (DPE)

Cross-listings: CLAS 202 / COMP 220
Secondary Cross-listing

Ancient Greek tragedy was a cultural phenomenon deeply embedded in its 5th-century Athenian context, yet it is also a dramatic form that resonates powerfully with 21st-century artists and audiences. This course examines tragedy on both levels. We will read such plays as Aeschylus' *Agamemnon*, Sophocles' *Electra*, and Euripides' *Medea* in English translation, considering their literary and dramatic features as well as their relationship to civic, social, and ritual contexts. We will discuss such topics as the construction of gender and identity on the dramatic stage, the engagement between tragedy and other literary genres, and the distinctive styles of the three major Athenian playwrights. We will also survey a set of recent productions and adaptations of these plays, with a particular focus on how modern playwrights and producers use Greek tragedy to explore justice, power, race, gender, status, and sexuality. We will consider how a dramatic form largely produced by and for Athenian citizen men became a creative resource for a remarkably diverse range of 21st-century artists, and explore how modern productions offer fresh perspectives on ancient material. All readings will be in English.

Requirements/Evaluation: class participation, several essays, brief oral presentations
Difference, Power, and Equity Notes: This course considers the questions of justice and power central to the performance of tragedy in the ancient Greek world, as well as the manifold ways in which 21st-century artists have used Greek drama to explore the modern construction of race, gender, class, and sexuality. Students will also examine how theater can operate both as a form of institutional power and as a space for exposing, critiquing, and reimagining dominant cultural narratives.

Not offered current academic year
THEA 226 (S) Gender and the Dancing Body (DPE)

Cross-listings: DANC 226 / AMST 226 / WGSS 226

Secondary Cross-listing

This course posits that the dancing body is a particularly rich site for examining the history of gender in America and beyond. The aim of the course is to explore ideas related to gender as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative ideologies. We will examine a wide range of dance genres, from stage performances to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course and may also include film screenings, movement workshops, discussions with guest artists and scholars. No previous dance experience required.

Requirements/Evaluation: participation in discussions and presentations, reading responses, in-class writing assignments, two 5-6 page essays, and a final cumulative essay.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first years and sophomores

Expected Class Size: 10-15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
DANC 226(D1) AMST 226(D2) WGSS 226(D2) THEA 226(D1)

Difference, Power, and Equity Notes: In the course, students will explore the concept of gender as a social construction and how the body’s historical associations to markers of gender and sexuality lead to differences in socio-political power. The assigned texts and viewings provide examples of how bodies and their movements make meaning in a network of power relationships, and how artists use dance to address social inequalities such as sexism, racism, and transmisogyny, to imagine a more just world.

Spring 2025

THEA 229 (S) Modern Drama

Cross-listings: COMP 202 / ENGL 202

Primary Cross-listing

An introduction to major plays and key movements in European and American theatre since the late nineteenth century. Our focus will be on close reading, with attention also to questions of performance and production. Plays to be discussed will likely include: Ibsen, Hedda Gabler; Wilde, The Importance of Being Earnest; Chekhov, The Cherry Orchard; Pirandello, Six Characters in Search of an Author; Brecht, Mother Courage; Miller, Death of a Salesman; Beckett, Waiting for Godot; Hansberry, A Raisin in the Sun; Pinter, Betrayal; Churchill, Cloud Nine; Stoppard, Arcadia.

Requirements/Evaluation: Two 6-page papers; regular Glow posts; and active participation in class discussions.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Theatre, English, and Comparative Literature majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is strongly recommended for any students majoring in Theatre.

Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

SEM Section: 01   MR 2:35 pm - 3:50 pm   James L. Pethica

THEA 230  Performance Practices of India  (DPE)

This course explores ancient and contemporary performance practices in India. Our objects of study will include the text and performance of Sanskrit plays, contemporary and experimental theater productions, as well as forms of dance and ritual. We will discuss dramaturgical structure, staging, acting conventions, gender representation, performer training, the experience and role of the audience, as well as mythological and political themes. Thinking historically and ethnographically, we will seek to understand the aesthetics and social purposes of these practices, in addition to the relationship that performance has with everyday life, contested concepts of the nation, and caste. Throughout the semester we will interrogate the ways in which Western categories such as "classical," "folk," "religious," "traditional," and even the distinction between "dance/theater/music/visual arts" are not indigenous or accurate concepts for organizing thinking about performance in this part of the world.

Requirements/Evaluation: Evaluation will be based on participation in discussion, reading responses, an oral presentation, and one 10-page paper.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference for seniors and juniors

Expected Class Size: 12

Grading:

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: We will examine British colonial edicts that prohibited performance practices as a form of social control as well as in the name of Christian morality. From here we will explore how upper-caste Independence era artists and leaders sought to reinvent the arts as vessels of "Indian" identity, at the cost of further marginalizing hereditary performance communities. We will also interrogate how the Indian state has promoted narrow visions of "femininity" and how artists contest religious nationalism.

Attributes: GBST South + Southeast Asia Studies

Not offered current academic year

THEA 231  (F)  Race and Performance  (DPE)

How does race function in performance, and, dare we say, "live and in living color"? How does one deconstruct discrimination at its roots? From a perspective of global solidarity, we will read plays every week and examine how race functions in theater and performance. This class offers students a discussion that does not center whiteness, but takes power, history, culture, philosophy, and hierarchy as core points of debate. In the first three weeks, we will establish the common terms of the discussion about stereotypes, representation, and historical claims, but then we will quickly move toward an advanced conversation about effective discourse and activism through art, performance, and cultural production. In this class, we assume that colonialism, slavery, white supremacy, and oppressive contemporary state apparatuses are real, undeniable, and manifest. Since our starting point is clear, our central question is not about recognizing or delineating the issues, but rather, it is a debate about how to identify the target of our criticism in order to counter oppression effectively and dismantle long-standing structures. Not all BIPOC communities are represented in this course, as claiming comprehensive inclusion in a single semester would be tokenistic and disingenuous. Instead, we will aspire to understand and negotiate some of the complexities related to race in several communities locally in the U.S. and beyond.

Requirements/Evaluation: Requirement/Evaluation: Participation; performance review; in-class presentation; and final paper.

Prerequisites: None.

Enrollment Limit: 14

Enrollment Preferences: Declared or prospective Theatre majors; students who have taken Theatre 101.

Expected Class Size: 14

Grading:  yes pass/fail option,   yes fifth course option

Distributions: (D1) (DPE)
Difference, Power, and Equity Notes: Entire focus of the course is on how representations of race in cultural production affect ideas surrounding oppression, discriminatory social structures, etc.

Fall 2024

SEM Section: 01    TR 11:20 am - 12:35 pm

THEA 238 (F) Musical Theatre

Students in this course will investigate the history and practice of one of the few truly American art forms: the musical theatre. From its beginnings, influenced by operetta, minstrelsy, and popular music to the current Broadway landscape which grapples with post-Pandemic performance, the American musical has provided fascinating insights into the values, ideas, and mores of the society which created it. Special attention will be paid to the Black creators, women writers, and artists of color whose work has shaped the genre but who have remained under-acknowledged by past generations of both academic and popular historians. Students will encounter well-loved Broadway smash hits as well as forgotten off-Broadway gems while being encouraged to develop a deeper, more nuanced love for the genre.

Requirements/Evaluation: Journal entries, 10 minute research presentation, 10 page final paper

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Theatre majors; Music majors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

THEA 239 (F) Introduction to Dramaturgy: The Art & Practice of Storytelling (WS)

The dramaturg is a storyteller and major collaborator in theatre. Working as part of an artistic ensemble, the dramaturg helps to tell a story, shape a theatrical production, and facilitate the rewarding process of creating a world on stage. This seminar/studio course will introduce students to the fundamentals of dramaturgy, including: new play development, production research, literary management, educational outreach, criticism/journalism, community engagement, and translation/adaptation. Assignments over the term will be hands-on, practical, creative, and project-based and include independent writing, research, and oral presentation. We will write, and we will revise. We will also read plays and discuss urgent topics in the theatre industry. During some terms, students may be invited to participate as dramaturgs on Theatre Department productions. As a culminating project, students will complete a creative written adaptation and accompanying dramaturgical casebook for a source of their choosing. Students may be asked to attend live performances and exhibitions when relevant.

Class Format: This is a studio course with a strong emphasis on writing and research, both critical and creative.

Requirements/Evaluation: Assignments will be project-based and will range from making image galleries to writing program notes and an educational study guide. In-class writing and participation in class discussion is required. A major project over the term will include the formation and assembly of a dramaturgy casebook, including: research and historical summary; timeline; artist's bio; educational guide; image gallery; program note; community outreach strategy; lobby design; critical/theoretical perspective; and creative adaptation.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: if overenrolled, preference will be given to declared Theatre majors followed by prospective Theatre majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course fulfills the Writing Intensive distribution by requiring students to write for both public audiences and more internal-facing communities. Students will write several short critical pieces intended for lobby displays, programs, educational settings, and more journalistic venues. In addition, they will write and develop a short creative adaptation. All writing will receive feedback from both the instructor and class peers prior to its required revision.
THEA 250  (F)  Feminist Theatres: A Global Perspective  (DPE)  (WS)

Cross-listings:  COMP 247 / WGSS 250 / ENGL 253

Primary Cross-listing

What makes a work of theatre "feminist"? How do plays and performances across global networks engage with different models of feminism: liberal, radical, materialist, and intersectional? Why has feminism mattered to theatre-makers of the past? Should it still matter now? If so, what forms might future feminist theatres take? In this tutorial course, students will work in pairs to examine the social and political relation of feminism to the art and practice of theatre. Taking a global and comparative perspective on the subject, we will focus on the intersectionalities of gender, race, class, ethnicity, nationality, and sexual identity in the production of feminist-driven theatrical practices. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherrie Moraga, Lisa Kron, Arethusa Speaks, Maya Krishna Rao, Tracie Chima Utok-Ezeajugh, Alexis Scheer, Tori Sampson, Clare Barron, and others. Close analysis of source material will be informed by critical and autobiographical writings by: Audre Lorde, Judith Butler, bell hooks, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students taking turns presenting or responding to their peer every other week; for their presentations, students will write a 5-page paper or, in up to two cases if they choose, offer their argumentation through more performance-driven methods (such as an oral argument, spoken-word monologue, or activist prompt).

Requirements/Evaluation:  students will meet with instructor in pairs for an hour each week; every other week they will be responsible for sharing either a 5-page paper or, if they choose, in up to two cases, a more performance-driven presentation, such as: an oral argument, spoken-word monologue, or activist prompt (five presentations/papers in all). They will comment on / respond to their partner's papers/presentations in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and written and oral communication.

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  THEA majors; WGSS majors; ENGL majors; COMP majors. Students from all majors are welcome and invited to contact Prof. Holzapfel about their interest in the class: ash2@williams.edu

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 250(D1)  COMP 247(D1)  WGSS 250(D2)  ENGL 253(D1)

Writing Skills Notes:  This course fulfills the writing skills requirement by engaging students in the active and creative process of critical writing, based on the notion that "writing is thinking, not thinking written down." Emphasis will be given to crafting and developing an argument, clarifying prose, selecting evidence, gaining authority, and incorporating theoretical ideas into an essay. We will also focus on the performance and presentation of written arguments.

Difference, Power, and Equity Notes:  This tutorial examines intersections between gender, race, sexuality, class, nationality, and ethnicity in relation to theatre's ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

Not offered current academic year

THEA 252  (S)  Stop Making Sense: Absurd(ist) Theatre in Historical Context  (WS)

Cross-listings:  COMP 256 / ENGL 256

Primary Cross-listing

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original
artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

Requirements/Evaluation: Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Theatre, English, and Comparative Literature majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 256(D1) THEA 252(D1) ENGL 256(D1)

Writing Skills Notes: Weekly tutorial papers and response papers, plus regular feedback on writing/argumentation skills. The course will provide consistent and ongoing feedback on students’ writing, and will require multiple assignments, each prompting comments which address writing problems and strategies, as appropriate.

Not offered current academic year

THEA 254 (S) PHYSICAL VOICE & ACTING

This course is an advanced acting class where students explore the integration of performance and vocal expression. Through the process of integrating voice work and physical acting methods, students develop the breath to support their play, availability, intention, and objectives. The goal is to inspire students to listen and respond with the whole body, to allow action to have voice at any moment, and for the voice to be fully supported by the body. It is an embodied practical class where we will explore the power of voice and its range: the quiet intimate voice, the sung and deep voice, and the dance of articulation via heightened contemporary texts. Overall the goal is to integrate intention and action via breath and voice. Time outside of class to develop a practice is required. Physical engagement, reading, writing, and spoken reflection are core components of the class. Students will also be lead in the process of examining and developing a decolonizing practice to do with our relationship to time and product.

Class Format: On Fridays students will work independently in small groups.

Requirements/Evaluation: Weekly one-page reflection papers, bi-weekly readings, in-class presentations of one short physical theatre solo, one monologue, and one scene. Evaluation will be based on attendance, level of engagement in all studio exercises, participation in class discussion about artistic process, and demonstration of growing vocal and physical articulation.

Prerequisites: No prerequisites.

Enrollment Limit: 14

Enrollment Preferences: Enrollment preferences will be theatre majors and prospective theatre majors.

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2025

STU Section: 01 W 7:00 pm - 9:40 pm Omar A. Sangare

THEA 266 (F) INTRODUCTION TO PLAYWRITING (WS)

Are you tired of the classics? Were you frustrated by casting choices in the past? Have you struggled to find a play to direct? Sometimes, you must step away from the canon and create your own work. Do you have something to say about race, gender, ethnicity, nationalism, yourself, and the Other? Do you have a story to tell? Did you ever want to write your own play but didn't know how to start? This is your chance. In this course, you will participate in a series of workshops that will lead to the writing of your first play. You will be guided through the principles of playwriting, beginning with understanding the basics: plot, character, dialog, setting, and theatricality. The mechanics of playwriting will be enhanced by a theoretical
understanding of the concepts of genre, style, and aesthetics. Every week, your homework will be to write new dialogs, leading to the first draft of your first play. In class, students are expected to read each other's work aloud and, on occasion, to stage it. By the end of the semester, having brought at least one play into the world, you will not become an experienced playwright, but you will be well on your way to understanding the foundations of the craft. This course culminates with a festival of public staged readings of original student work.

**Requirements/Evaluation:** Participation; in-class workshops; and students are expected to write several graded drafts of two ten-minute plays and a single one-act play.

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** In instance of over-enrollment, preference will be given to Seniors, Juniors, & Sophomores in the Theatre Major.

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Course is based on original composition and supervised revision of multiple texts.

**Fall 2024**

**STU Section: 01 R 1:10 pm - 3:50 pm**

**THEA 270  Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)**

In most academic work the point of analysis is to make sense, to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? How and when have strategies of nonsense, circular reasoning, linguistic obfuscation, and intentional theatrical absence been employed to disguise, or deflect attention from, specific didactic (even political) agendas? What role specifically does theatre, theatricality, or performativity play in the presentation of art that refuses understanding? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek, Richard Foreman). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

**Requirements/Evaluation:** Standard tutorial requirements; weekly paper or response paper from each member of the tutorial pair. Evaluation based on improvement in written expression and engaged contribution to weekly discussions.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre, English, and Comparative Literature majors and prospective majors.

**Expected Class Size:** 10

**Grading:**

**Distributions:** (D1) (WS)

**Writing Skills Notes:** This tutorial will demand writing from each student each week (either a primary paper or a shorter response paper), and each student will receive regular, extensive feedback including a focus on strategies for successful persuasive argumentation.

**Not offered current academic year**

**THEA 271 (S) Acting Out: Performativity, Production, and Politics in East Asian Theatres (DPE)**

**Cross-listings:** CHIN 275 / COMP 271 / ASIA 275 / AAS 275

**Secondary Cross-listing**

"Asian Theaters," for those in the West, can conjure up a variety of exotic impressions: spectacle and cacophony, mysterious masks and acrobatic
bodies, exquisite styles and strangely confusing conventions. Although Asian theaters have been studied systematically in the West for at least a century, the West has never truly left its "othering" look at them. Yet, what is "different" for the West is bedrock for Asian cultures. Theatre, one of the most important and dynamic forms of cultural production and communication, has actively involved all strata of Asian societies for a millennium. How to explain theatre's continued presence and relevance for Asian nations? What do the traditions of Kun, Kabuki, and P'ansori reveal about the cultures and communities in which they were created? This course seeks to understand from the Asian perspective, rather than "exoticize" and "other," musical and dance theatres from China, Japan, and Korea. Examining the evolving presentations of signature dramas dating from the sixteenth to the eighteenth centuries, we will act out Asian theatres in the following ways: (1) by reading the original plays in translation in tandem with their contemporary and intercultural reproductions, we will explore how Asian theatres fare in the era of globalization within and beyond national borders; (2) by revealing the "technologies" of writing, reading, acting, and staging these plays in different cultural milieus, we will consider what kinds of language and rhetoric, forms of music and movement, as well as visual components are deployed to convey evolving messages; (3) by considering key performances held outside of the prosenium stage, we will gain exposure to alternative theatrical spaces in Asian and diasporic communities that reform performing conventions, reconfigure staging environments, and renegotiate cultural values. In this manner, we will together gain an appreciation for the aesthetic devices, thematic concerns, and production politics of East Asian theatres and their global reproductions. Class materials include drama, production videos, and invited zoom sessions with Asian theatre practitioners and directors who live in the U.S. and other diasporic communities. All materials are in English. No language prerequisite. Funded by the Global Initiatives Venture Fund, this course includes an all-expense-paid travel component, a cultural and academic exchange project titled "Redefining Amateurism: Experiential Learning with Student Theatre in Contemporary China," which will bring up to eight Williams students to Nanjing, China during the Spring Break (3/23-4/3/2025). Students will participate in workshops with playwrights and theater-makers in contemporary China and engage in black-box theater productions with students from Nanjing University and Shanghai Theatre Academy. This travel component is OPTIONAL for students taking this course. However, students enrolled in this course will receive priority consideration to be included in the free travel project. Selection criteria include active participation, excellent performance in the course, etc.

**Class Format:** Funded by the Global Initiatives Venture Fund, this course includes an all-expense-paid travel component, which will bring up to eight Williams students to Nanjing, China during the Spring Break (3/23-4/3/2025). This travel component is OPTIONAL for students taking this course. However, students enrolled in this class will receive priority consideration to be included in the free travel project. Selection criteria include active participation, excellent performance in the course, etc.

**Requirements/Evaluation:** Evaluation will be based on 1) ACTIVE in-class discussion; 2) three small projects (papers and audio/video essays); 3) a take-home midterm; and 4) Poster presentation based on students' final projects.

**Prerequisites:** None; open to all. No knowledge of Asian languages required, though students with advanced Asian language proficiency are encouraged to work with primary sources if they wish.

**Enrollment Limit:** 20

**Enrollment Preferences:** Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Theatre majors; Comp Lit majors; Concentrators in Asian Studies or Asian American Studies.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

CHIN 275(D1) THEA 271(D1) COMP 271(D1) ASIA 275(D1) AAS 275(D2)

**Difference, Power, and Equity Notes:** This course examines the power dynamics of spectacle and cacophony and how theatre provided a cultural space that engaged all strata of East Asian societies, thereby masking class and ethnic divisions within these nation-states, while also presenting a distinct image of "China," "Japan," and "Korea" to be consumed in the West. Students will learn ways in which "traditional" theatre productions affirm or subvert Western biases against Asians.

**Attributes:** AAS Non-Core Electives  GBST East Asian Studies

THEA 274 Performing Utopia

How is performance utopian by design? How do we perform utopias in our daily lives? This course examines the performative dimensions of utopia and the utopian aspirations of performance. According to Jill Dolan, performance can be a utopian prompt, a space and time to imagine new forms of
sociality and ways of being in the world. Using a case-study model, we will consider how different modes of performance--theatre, dance, film, art, and, more recently, social media--have helped produce and sustain utopian socialities in and across shifting temporalities in the U.S. imaginary, including: the Shakers, Harmony, Oneida, Drop City, Soul City, The Farm, as well as recent “intentional communities” that envision “opting out” as a new way of inhabiting earth in the Anthropocene. Alongside such real-world examples, we will consider how performance itself has been theorized as a productively utopian (and also dystopian) realm by critics like Jill Dolan, Miranda Joseph, and Jose E. Muñoz, and artists and companies like Bread and Puppet, The Living Theatre, Rachel Rosenthal, Miguel Gutierrez, Guillermo Gómez-Peña, Faye Driscoll, Theaster Gates, Nick Cave, and Taylor Mac. As a way of gaining knowledge through embodied practice, students will work collaboratively each week to envision, create, and perform everyday “mini-utopias” that rise and fall ephemerally. Students will be required to attend a weekend field trip to The Shaker Museum in Hancock, MA, and may as well, when relevant, be asked to attend various live performances or exhibitions at local arts institutions throughout the term.

Class Format: This course will contain a studio component

Requirements/Evaluation: In-class writing and participation; collaborative, weekly creations of “mini-utopias”; a 6-8 page midterm paper based on independent, archival research; leading of a 10-minute in-class discussion; and a final, 15-minute collaborative performance, or other creative presentation, developed from case-study research and inclusive of an invited audience.

THEA 283 (F) The Actor-Creator: Introduction to Physical Theatre Tools

Cross-listings: ARTS 383

Primary Cross-listing

This course is an introductory course to the Jacques Lecoq Pedagogy which was born in France and uses observation as a first creative tool. The body is at the heart of this pedagogy and we will have rigorous physical training in order to become more expressive, more precise, and more creative. Improvisation will be the key tool to learn and discover how to write theater on our feet. In the course, we will first observe life: spaces and people. What are the specifics of the different spaces that exist around us and how do they change the body that is in them? Then, we will look at the actor’s body. How do you enhance its presence? What brings life to this body? How can we allow ourselves to start using the body as a creative tool that will be able to transform and write? We will next observe the body within the elements. What kind of character will come out of fire? Or of air? What happens when air meets fire? By letting the elements transform us we will find specificity in the character’s physicality and relationships. Then we will look at painting, poetry, and music; How can we translate a poem on stage? How do words move? And colors? Is yellow’s rhythm the same as brown? We will end the course by working with full masks created by the students/artists and also brought by the teacher. Mask work is an incredible tool to help actors articulate their thoughts, and feelings, and craft their acting. What stories will come out of that? Who’s destiny will we learn about? This will be an occasion to bring forth stories you are interested in, that touch you and move you. This course is open to anyone who is interested in creating live performances. Whether you are a writer, a painter, a director, a musician, or an actor you are welcome to bring your fierce and curious artist spirit to create theater that will be telling the stories that matter to you today.

Requirements/Evaluation: Attendance and active participation in each class session. Assigned project and scene work (solo and in small groups). Creation of physical performance objects (masks, etc.) Solo and group presentation of assigned work in class.

Prerequisites: None

Enrollment Limit: 16

Enrollment Preferences: Theatre majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 383(D1) THEA 283(D1)

THEA 287  Design for Film & Television
The production designer is responsible for creating, controlling, and managing 'the look' of films and narrative television from page to screen. This hands-on course explores the processes of production design, art direction, and lighting direction processes as related to design for film and television. From initial Production Design sketches and 'Feel-Boards' to accommodating desired cinematographic angles when designing a studio set, design for film requires a designer to shape an entire visual world while keeping in mind the story as a whole. The goal of this course is to provide an initial understanding of the Production Design process in practice through studio work and instruction.

Class Format: This class will be a combination of instruction and in class studio work.

Requirements/Evaluation: committed participation in class discussion and feedback; and the thoughtful, timely completion and presentation of multiple design projects of varying scales, focusing on scenic and lighting design, considered both individually and when working in tandem

Prerequisites: THEA 201, THEA 285, ARTS 100, or permission from instructor with equivalent experience

Enrollment Limit: 12

Enrollment Preferences: In instance of over-enrollment, preference will be given to Seniors, Juniors, & Sophomores in the Theatre Majors & Art Majors

Expected Class Size: 8

Grading:

Materials/Lab Fee: up to $125 for materials and copying charged to term bill

Distributions: (D1)

THEA 288  (F) Storyboarding: Building Visual Narratives
In this class, we will explore the process of sequencing images to create meaning over time. We will examine and research visual texts with episodic and sequential structures (such as picture books, comics, albums, film/animation, theatre, and opera) and interpret them into storyboards of various 2D and/or 3D visual media. We will focus on developing and communicating complete dramaturgically-based visual ideas with an eye towards conceptual artistic propositions. This class is geared towards all students interested in directing/writing/designing/creating for time-based visual mediums such as film and theatre. No previous artistic expertise is required, but the majority of the work here will be hands-on art projects, presentations, discussions and group critiques in a studio art class format.

Requirements/Evaluation: Coursework is comprised of text comprehension, group discussion/critique, and biweekly studio-style art projects.

Prerequisites: THEA 101 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: theatre majors, art majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: materials and copying up to $125 to be added to the students' term bill

Distributions: (D1)

THEA 301  (S) Embodied Archives: Global Theatre Histories, From Antiquity to 1900  (DPE)
A survey of global theatre and performance, spanning from antiquity to 1900. Students will engage with the archives and repertoires of the theatrical past, approaching subjects both critically and creatively. Topics to be considered may include: Indian Sanskrit drama; ancient Greco/Roman theatre; pre-Columbian Mesoamerican dance/drama; Japanese Noh and Kabuki performance; Medieval and Renaissance English theatre; West African masquerade; French Neoclassicism; Spanish "golden age" theatre; and American melodrama. In addition, we will consider receptions of such traditions in the present, examining how contemporary theatre makers have engaged with (adapted, appropriated, recycled, or re-appropriated) historical sources. As a major project in the class, students will develop and share their own artistic approaches to selected archival works. While attending to theatre's formal aspects, we will at the same time focus on the relationship of performance to politics and society, as well as to the enduring legacies of empire, state power, colonialism, and private capital in which theatre is historically embedded. If and when possible, we will encounter archival sources housed in College Archives and WCMA. This course is required for Theatre majors and is a prerequisite for THEA 401.
Requirements/Evaluation: active participation in class discussion; a 5-7 page midterm paper; an oral presentation on a selected historical resource; a final creative adaptation/script, or live performance

Prerequisites: Theatre majors must have already taken THEA 101 by the time they enroll in this course

Enrollment Limit: 14

Enrollment Preferences: Theatre majors; Comparative Literature majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course works to dismantle the ongoing bias in theatre studies that positions textual and literary forms of theatre in the globalized north as the primary sites of knowledge transfer, status, and value in the field. Instead, theatre and performance are approached as global and diverse forms of repertoire and embodied knowledge that must be analyzed in relation to the structures of social inequity and power in which they historically arise.

Not offered current academic year

THEA 304 (F) The Gay Menagerie: Gay Male Subcultures (DPE)

Cross-listings: ANTH 305 / AMST 305 / WGSS 305

Secondary Cross-listing

Bears. Cubs. Otters. Pups. Twinks. Radical Fairies. Leathermen. Mollies. Drag queens. Dandies. Sisters of Perpetual Indulgence. Gay men, including gay trans men, have organized themselves into various subcultures within their community for centuries. This seminar is devoted to exploring these subcultures in (a mostly US-context) in greater detail using ethnographic texts, anthropological studies, historical accounts (including oral histories), and media. Topics include cruising and flagging, the anthropological significance of gay bars, histories of bath house culture, rural vs urban queer experiences, the ball scene, drag, diva worship, the reclamation of "fabulousness and faggotry," the leadership roles of trans women and effeminate gay men in activist movements, gay gentrification, the growth of gay consumerism/gay tourism/homonationalism, hierarchies of masculinity in the gay community (i.e., masc for masc culture), HIV/AIDS and the politics of PrEP, chemsex, the role of racialized dating "preferences," genealogies of BDSM and leather culture, sexual health and discourses of "risk," the politics of barebacking and other sexual practices, queering consent, and the effects of hookup apps on gay culture. In addition to lectures, and discussions, there will also be some low-key performance-studies based exercises in queer praxis (e.g., drag workshops, mock debates, animal improvisation, role playing, etc.)

Class Format: There will be some minor performance elements such as workshops during class.

Requirements/Evaluation: Quizzes, journaling assignment, short diva report, 10 page research paper on a gay subcultural group

Prerequisites: None; WGSS 202 (Foundations in Sexuality Studies) will be helpful but is not required

Enrollment Limit: 12

Enrollment Preferences: WGSS majors; in the event of over-enrollment there statements of interest will be solicited

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ANTH 305(D2) AMST 305(D2) WGSS 305(D2) THEA 304(D1)

Difference, Power, and Equity Notes: This course examines the how marginalized communities respond to their oppression through creative forms. It takes as central to its curriculum the role of sexual diversity and the relationship of the gay community to power through the central idiom of "difference."

Attributes: WGSS Racial Sexual + Cultural Diversity Courses

THEA 305 (F) Designing Character: Introduction to Costume Design for Performance

Cross-listings: ARTS 200

Primary Cross-listing

This course introduces students to the processes and techniques of costume design for performance. With a focus on building character through...
research and design, students will practice developing costume design concepts and using them to illuminate a script, tell a story, and explore characters. Coursework is project-based and will include reading plays, researching period, rendering characters in costumes, expressing design ideas, and sharing and receiving feedback. Class projects will include *The Bald Soprano* by Eugene Ionesco and *Intimate Apparel* by Lynn Nottage. Drawing experience not required, but you must be brave enough to try.

**Requirements/Evaluation:** Project-based costume design work includes period research, drawing, painting, short writing assignments, and presentation. Class participation includes sharing work in process, receiving feedback, and offering generous feedback to classmates.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre and Art Studio majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** does not satisfy any requirements for the Art major

**Materials/Lab Fee:** $100 lab fee charged to term bill

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 200(D1) THEA 305(D1)

**THEA 312 (S) Dressed for Diplomacy: Global Fashion in Early Modern Europe**

In this course we will examine the context and cultural messaging contained in portraits of people from around the globe visiting (or brought without consent to) western Europe in the sixteenth, seventeenth, and eighteenth centuries, including visitors from the Arctic, North and South America, Asia, Africa, and Oceania. Though these images are often read as "authentic" depictions of regional dress, the clothes worn by the people in these images represent a complex spectrum of hybridities of foreign and European garments as recorded by European hands. In what ways are the people in these images performing diplomacy? Who decided what the people wore in these pictures and how does it reflect the goals of the portrait? Is it possible to "read" the clothing in these portraits as "speaking" for the person pictured? For the painter? For a political objective? What kinds of agency and self-representation were the portrait subjects able to express through the medium of dress? What role do clothes play in diplomacy and how were the global visitors expressing their diplomatic intentions through dress? What did it mean for a foreign visitor to wear their home clothing while abroad or to take on the dress of their host country? How are international and inter-personal relations expressed and effected by clothing, gesture, comportment, and self-fashioning? Coursework will include participation class discussions, investigations of visual primary sources, one presentation on readings, and a final 8 page research paper on the subject.

**Requirements/Evaluation:** Participation class discussions, investigations of visual primary sources, one presentation on readings, and a final 8 page research paper on the subject.

**Prerequisites:** No prerequisites.

**Enrollment Limit:** 12

**Enrollment Preferences:** Theatre majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

---

**THEA 315 (F) Inhabited Theatrical Environments: Scenic Design for Performance**

**Cross-listings:** ARTS 313

---

**Primary Cross-listing**
How do you develop a point of view and translate it to the stage? What is an effectively inhabited space for performance? We will explore the different ways a scenic environment provides the visual foundation for live theatrical events in theaters as well as site-specific shows. In addition to working intuitively, this course combines critical readings of texts to contextualize works for the current moment. Research will be at the center of our work -- deepening skills to source, curate, and present personal points of view as designers and creators. This work will serve to expand our imaginations to the aesthetic possibilities of performance. Students will also develop a basic knowledge of model building and drafting. Class time is a combination of discussions of theatrical texts, student project presentations, and studio work.

Requirements/Evaluation: Creative projects preparation and presentation. Active participation in class and critique sessions. Occasional writing assignments to accompany design work.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Theatre majors

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: Up to $125 in studio costs.

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 317 (F) Black Migrations: African American Performance at Home and Abroad

Cross-listings: AFR 317 / DANC 317 / AMST 317 / COMP 319 / ENGL 317

Secondary Cross-listing

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration
of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** Africana Studies majors and concentrators; Dance and Theatre majors; American Studies, Comparative Literature, and English majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

**THEA 321 (S) Arts Organizing in Africa and the Diaspora (DPE)**

**Cross-listings:** DANC 323 / MUS 323

**Secondary Cross-listing**

At the heart of this class is the question, how do artists and organizations use the performing arts to effect social change in their communities? Drawing from a number of case studies from throughout Africa and the African Diaspora, we will first endeavor to understand and contextualize issues related to education, social uplift, the environment, and the economy as they relate to specific communities. We will then examine how a series of organizations (from grassroots campaigns to multinational initiatives) utilize the performing arts in response to those issues. Among the issues we will discuss at length are: -How do performers and organizations navigate the interplay between showcasing the performance talents of individuals and groups and foregrounding an issue or cause? More broadly, what dilemmas emerge as social and aesthetic imperatives intermingle? -What are the dynamics between people acting on a local level within their communities and their various international partnerships and audiences? -How can government or NGO sponsorship help and/or hinder systemic change? By the end of the semester, students will be equipped with conceptual frameworks and critical vocabularies that can help them ascertain the functions of performance within larger organizations and in service to complex societal issues. Throughout the course, we will watch and listen to a variety of performances from traditional genres to hip-hop, however this class is less about learning to perform or analyze any particular genre than it is about thinking through how performance is used as a vehicle for social change. Case studies will include youth outreach and uplift in Tanzania through the United African Alliance, campaigns to promote girls’ education in Benin and Zimbabwe, community-wide decolonizing initiatives through the Yole!Africa Center in the Democratic Republic of Congo, and the cultural reclamation of a mining town in Suriname through the arts organization, Stichting Kibii.

**Requirements/Evaluation:** Four case study profiles, midterm essay (5-7pages), and a final project. Regular participation in class discussion.

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** If the course exceeds the maximum enrollment, selection will be made based on students explanations for why they want to take the class.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

DANC 323(D1) THEA 321(D1) MUS 323(D1)

**Difference, Power, and Equity Notes:** This course interrogates on a fundamental level issues of power and equity. Using the performing arts as a critical lens, we discuss a series of social and environmental challenges that communities of African descent face. These are in direct dialogue with
The course seeks to promote art making that transgresses the boundaries between the visual and performing arts to see a life that animates both bodies and objects. Cultivating various approaches to the experience of embodiment and kinesthetic responses to objects, props, and clothing, students will perform sculptures and sculpt performances indoors and outdoors. Exploring relationships between time and space will support creating works that suggest and invite movement, encourage interaction, and investigate the physical potency inherent in objects, people, and performance. Emphasis will be made on collaborative process and developing dialogue between actors, dancers, and visual artists.

Requirements/Evaluation: Evaluation will be based on participation in studio exercises, bi-weekly collaborative group projects, a final solo work to be performed at the end of the semester, and five 2-page reflection essays.

Prerequisites: Students must have completed at least one course either in Theatre or in Studio Art.

Enrollment Limit: 12

Enrollment Preferences: Preference will be given to Theatre and Studio Art majors.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $200-$350 for supplies such as fabrics, papers, paints, markers, props, etc. as needed.

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 332(D1) THEA 333(D1)

Difference, Power, and Equity Notes: This course is centrally concerned with identity politics within a colonial context. Irish writers prior to...
independence from Britain sought to assert "Irishness" as culturally distinctive. After 1923, they continued to wrestle with the legacies of colonial subjection and the inferiorizing identifications that had been ingrained during colonial rule. The texts we will read centre on questions of cultural self-definition and explore (and resist) the process of othering.

THEA 340  (F)  Shakespeare on Page, Stage and Screen: Text to Performance  (WS)
Cross-listings:  ENGL 345 / COMP 343

Primary Cross-listing

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns--with matters of gender, sexuality, race, class, or materiality, for instance--against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the texts in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing. At the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will read six plays, of different genres and written at different periods of Shakespeare's career. These will likely be Romeo and Juliet, Henry V, Twelfth Night, Hamlet, The Tempest, and A Midsummer Night's Dream. Close reading of the texts will be the priority, but we will also attend to the demands and opportunities of performance, and assess a range of recent film and stage productions.

Requirements/Evaluation: Three papers ranging from 4 to 7 pages; regular Glow posts; class participation.

Prerequisites: A THEA course; a 100-level ENGL course; a score of 5 on the AP Literature exam or a 6 or 7 on the IB exam; or permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors or prospective majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions:  (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 341  (F)  Performing Masculinity in Global Popular Culture  (DPE)
Cross-listings:  AMST 358 / WGSS 347 / SOC 340 / LATS 341

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

Prerequisites: none; WGSS 202 would be helpful
Enrollment Limit: 15
Enrollment Preferences: a short statement of interest will be solicited; a subsection of applicants may be interviewed
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

THEA 345 (S) Contemporary American Theatre: Poetry, Politics, Place
Cross-listings: ENGL 349
Primary Cross-listing
As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on in U.S. theatre today? Who are the dramatists and theatre makers of the present moment? This survey course will introduce students to twenty-first century American drama and performance, focusing on the poetic, political, and environmental aspects of the art form. Topics to be considered may include: theatre as social practice, the rise of activism, participatory, site-specific, and immersive theatre, social justice theatre, supernaturalism, changing labor practices in the industry, and the turn to digital performance. Artists and companies to be considered may include: Suzan Lori-Parks, Branden Jacobs-Jenkins, Quiara Alegría Hudes, Anne Washburn, Taylor Mac, Hansol Jung, Clare Barron, Jeremy O. Harris, Lucas Hnath, Lauren Yee, Larissa FastHorse, Jihae Park, The Civilians, Elevator Repair Service, Jackie Sibblies Drury, Eboni Booth, Sanaz Toossi, Alexis Scheer, and Jacklyn Backhaus. Assignments will include both critical and creative responses to the material addressed in the class. Whenever possible, we will attend live performances on campus and in the regional community.

Requirements/Evaluation: written and dramaturgical-based assignments; a 10-minute oral presentation in pairs on a selected artist or group; a 5-7 page mid-term critical paper, and a final 7-9 page paper, 20-page theatrical script, or 5-10 minute live performance

Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: Theatre majors, or students interested in the arts
Expected Class Size: 16
Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

THEA 390 (F) Feminist and Queer Horror Films (DPE)
Cross-listings: WGSS 398 / ENGL 333 / AMST 390 / COMP 390
Secondary Cross-listing
This course focuses on pairing theoretical readings with a variety of horror films with feminist or queer themes. Many tropes are associated with this genre - "the final girl" in slasher movies, "the transvestite murderer," femme lesbian vampires, supernatural BDSM figures, vampires as allegories for HIV/AIDS, werewolves as metaphors for FTM gender transitions or puberty, lonely mothers in creaky houses as unreliable narrators, Satanic spawn, and creepy long-haired girls. Some films reinforce gender stereotypes while others snap on more explicitly feminist and queer lenses. This course functions as a survey of many different genres, introducing students to classic 1970s films and working up to the present day and we will learn how these tropes developed and then were subverted by more modern day films such as those by A24 Studies and the new renaissance of Black horror, etc. Most films will focus on the US, with some notable exceptions in Japan, Spain, and elsewhere globally. There will be graphic content. You must be
18 or over to take this class.

**Requirements/Evaluation:** Class participation, short reflection papers, 2-3 extemporaneous oral class responses, several creative assignments.

**Prerequisites:** None. Prior WGSS courses will be helpful.

**Enrollment Limit:** 15

**Enrollment Preferences:** Stage 1 is a statement of interest form; Stage 2 will be a very brief interview. There is NO preference by major or class year.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** Some of the creative assignments will have an “artsy-craftsy” component, but should not cost more than 25 dollars total per student per semester, though amounts will vary depending on how the student chooses to execute the assignment.

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**
WGSS 398(D2) ENGL 333(D1) AMST 390(D2) COMP 390(D1) THEA 390(D1)

**Difference, Power, and Equity Notes:** This course necessarily examines power when it comes to gender and sexuality - who has it? what do they do with it? how does this power turn deadly? how can agency be regained? Horror is almost never about equitable situations but rather the imbalance that comes from difference (along whatever axis) causing a lack of equity.

**THEA 401 (S) Senior Seminar: Practicing Theory**

This class constitutes a culminating course of study for the Theater major. It aims to delve deep into consideration of the relationship between theory and practice, between text and performance, between performer and audience, and between aesthetics and politics. We will explore a selection of influential ideas and methodologies that have shaped both making theater and thinking about theater in various historical periods and cultural contexts. Seminar members will read and consider both theoretical and artistic texts. Through discussion and experimentation, we will endeavor to understand how theater engages with cultural, social, and philosophical issues that link the stage with the realities and fantasies of everyday life. Throughout the semester, focus will be maintained on the contributions of the members themselves, in both scholarly contributions to seminar sessions, and in artistic contributions through the presentation of assigned creative projects.

**Requirements/Evaluation:** Participation in discussion, reading responses, analytical writing, and creative projects.
THEA 455  (F)(S)  Advanced Practicum
This independently designed practicum offers an opportunity for students to gain practical, hands-on experience in theatre at an advanced level by receiving course credit for serving as an assistant to a faculty member on a Theatre Department production. Students interested in assisting a faculty member or guest artist on a production in any non-acting capacity--directing, design (costume, lighting, multimedia, scenic, sound), dramaturgy, or technical management--may enroll in the Advanced Practicum, pending the approval of a designated faculty advisor as well as the Department Chair. Working closely with the faculty advisor, the student will both serve as an assistant on the production and design a curriculum of readings and assignments intended to complement the experience of the assistantship. If funding allows, practitioners in the professional theatre will be invited as guest evaluators. Though the nature of each assistantship will vary according to the demands of each production, the experience of the assistantship will ideally simulate that which a student might undertake within the professional theatre.

Requirements/Evaluation: research, attendance at rehearsals, studio work, & final portfolio; research, attending weekly production meetings, rehearsals, studio work, and final portfolio, as well as other tasks determined by the faculty advisor

The Tutorial Program offers students a distinctive opportunity to take a heightened form of responsibility for their own intellectual development. No student is required to take a tutorial course, but any student with the appropriate qualifications and interests is invited to do so.

Tutorials place much greater weight than regular courses—or even small seminars—on student participation. They aim to teach students how to develop and present arguments; listen carefully, and then refine their positions in the context of a challenging discussion; and respond quickly and cogently to critiques of their work. Tutorials place particular emphasis on developing analytical skills, writing abilities, and the talents of engaging in rigorous conversation and oral debate.

Since the program’s inception in 1988, students have ranked tutorials among the most demanding—and rewarding—courses they have taken at Williams. While not designed to be more difficult than other courses, tutorials are nonetheless challenging, with frequent writing assignments and the expectation that students will be well prepared to participate actively and effectively in weekly discussions. At the same time, students have consistently placed tutorials among the most enriching and consequential courses they have taken. They have appreciated the close attention to their writing and argumentation skills; the opportunity to be held accountable, in a detailed way, for the extended implications of their ideas; the chance to develop their oral abilities as they engage in debate; and the close intellectual bonds tutorials build between teachers and students, and students with each other. Many students have formed important advising and mentoring relationships with their tutorial teachers.

The ways in which particular tutorials are conducted vary across the disciplines, but here is a description of how most tutorials at Williams are organized:

Tutorials are usually limited to 10 students. At the start of term, the instructor divides the students into pairs. Each pair meets weekly with the instructor for roughly one hour. Many tutorial courses begin and end the term with a group seminar, and in a few departments, instructors hold weekly group meetings of all tutorial members to provide background information designed to facilitate the students’ independent work. But at the heart of every tutorial is the weekly meeting between the instructor and two students. At these weekly meetings, one student delivers a prepared essay or presentation (e.g., an analysis of a text or work of art, a discussion of a problem set, a report on laboratory exercises, etc.) pertaining to the assignment for that week, while the other student—and then the instructor—offer a critique. In the following week, students switch roles. Typically, students write five or six essays (usually in the range of 4-7 pages) during the term, and offer five or six critiques of their partners’ work.

**Registration**

Students pre-register for tutorials as they would any other course. Because of limited enrollments and the special logistical arrangements involved in organizing tutorials, students may not drop a tutorial after 4:00 pm on the day before the first scheduled organizational meeting of the semester. It is important that students determine, before the start of the term, their interest in and commitment to the course, and consult with the instructor if necessary.

Tutorials may not be taken on a pass/fail basis.

**AAS 351 (F) Racism in Public Health (DPE)**

**Cross-listings:** PHLH 351

**Secondary Cross-listing**

Across the nation, states, counties and communities have declared racism a public health crisis. This push to identify systemic racism as a high priority in public health action and policy is an important symbolic and political move. It names the faults of histories, systems and institutions but also brings to the spotlight the individual and community responsibility to dismantle racism in the US. In this tutorial, we will examine racism in public health policy, practice and research through an investigation of several mediums of evidence and information, ranging from peer reviewed literature to news editorials, podcasts and documentaries. We will explore specific pathways by which legacies of colonialism and racism function in various public health disciplines such as epidemiology, social & behavioral sciences, health policy and environmental health while also examining the dynamics of power and history in research and community practice. We will take deep dives into issues on how health can be impacted by redlining, racist medical algorithms, racial trauma and stress and police violence, to name a few. Students will also have two opportunities to select their own case studies, as a way for you to research and learn about particular racial health issues that are of personal interest. This course is also about self-reflection and exploration of the ways in which our identities and lived experiences impact our understanding and perspective. We will gain skills in speaking across differences and articulation of how our own perceptions and lived experiences of race and racism impact our study of public health. This tutorial requires an openness to self-reflection and the practice of listening and articulation.
Requirements/Evaluation: bi-weekly tutorial papers, weekly journaling, oral commentaries and tutorial discussion
Prerequisites: PHLH 201 or instructor approval.
Enrollment Limit: 10
Enrollment Preferences: 1-Public Health concentrators. 2- Asian American Studies concentrators.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AAS 351(D2) PHLH 351(D2)

Difference, Power, and Equity Notes: In this course students will examine and critically examine the inequities and race based social and health injustices, and the ways racism infiltrates public health action and policy, both historically and currently. They will also refine their self reflection skills in understanding how their own positions of privilege and power, or lack thereof, inform their understanding of public health.

AFR 128 (S) James Baldwin's Song

Cross-listings: MUS 179 / COMP 129

Primary Cross-listing
"It is only in his music [. . .] that the Negro in America has been able to tell his story. It is a story which otherwise has yet to be told and which no American is prepared to hear," wrote James Baldwin in Notes of a Native Son in 1955. In this course, we strive to listen more closely to racialized experience through James Baldwin's musical literature. Through analysis and creation of music, we hope to better understand cultural difference and collective humanity. In this course, we closely analyze James Baldwin's use of song names, creation of musician characters, and replication of musical elements in his writing. Baldwin's musical word play crosses historical and genre boundaries. So we will explore texts from his early to late career, such as the gospel music of his youth in the semi-autobiographical novel Go Tell It on the Mountain, the metaphor of the blues in the play written during the civil-rights movement Blues for Mr. Charlie, the jazz musician protagonist in "Sonny's Blues" written after World War II in Paris, and his only musical recording in A Lover's Question set down near the end of his life. In addition to closely analyzing James Baldwin's attention to music throughout his literature, students will learn basic music writing and production skills. The tutorial will draw on a range of musical resources, including playlists, music workshops, guest lectures and performances. All of these resources will guide students to a more attuned hearing not only of music but also of the African American experience it reflects. By the end of the course, students will have written several short 1-2 page close analysis essays and song lyrics. For their final project, students will produce an original song based on key insights from the course. No musical experience is required, though an openness to learn and practice songwriting is expected.

Requirements/Evaluation: Several short 1-2 page close analysis essays of Baldwin's work, oral peer feedback presentations, song lyrics, and an original song composition for the final project
Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: This course is specifically for first-year students and they will receive preference in this class; a statement of interest will be solicited from pre-registrants.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

MUS 179(D1) AFR 128(D2) COMP 129(D1)

Attributes: AFR Core Electives

Spring 2025
In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her white parents stated publicly that Dolezal is a white woman passing as black. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to become white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries—class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

Requirements/Evaluation: Weekly formal response papers and written critiques.
Prerequisites: None.
Enrollment Limit: 10
Enrollment Preferences: First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 159(D2) AFR 159(D2)

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

Difference, Power, and Equity Notes: Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of ideant intelligibility.

Attributes: HIST Group F Electives - U.S. + Canada
anti-Black racism firmly rooted in white supremacy, and so insidious that it impacts all aspects of Black life. Examining colorism through literary texts and music, provides a depth of understanding that both compliments and expands these empirical studies. Literature and music provide the narratives and rhythm that paint a vivid picture of the many ways that colorism impacts the lives of Black people. Through the methods of literary and rhetorical criticism we will examine the works of five Black women authors and music artists that take up issues around colorism and passing. We will explore, Toni Morrison's, The Origins of Others (2017), Brit Bennett's, The Vanishing Half (2020), Tressie McMillian Cottom's, Thick (2019), Marita Golden's, Don't Play in the Sun (2004), Yaba Blay's, One Drop: Shifting the Lens on Race (2021), Nina Simone's, "Four Women" (1966) and "Young, Gifted and Black" (1958), Sara Martin's, "Mean Tight Mama" (1927), India.Arie's, "Brown Skin" (2001), Azealia Banks' "Liquorice" (2012), and Beyoncé's "Creole" (2012), "Formation" (2016) and "Brown Skin Girl" (2020). By examining colorism in both literature and music, it will give first year students a foundational and nuanced understanding of skin tone bias and equip them with the tools to critically engage literary and music texts.

Requirements/Evaluation: Three, short papers (4-5 pages) discussing aspects of the readings and songs; three response papers to tutorial partner's papers (2 pages long); two, video essays; two, Twitter threads explaining aspects of one of the books and one of the songs; and a curated playlist of songs that would serve as accompaniment to one of the texts from the class.

Prerequisites: N/A
Enrollment Limit: 10
Enrollment Preferences: This class is specifically designed for first year students. Sophomores can register only with advanced permission.

AMST 490 (S) The Suburbs (WS)

Cross-listings: ENVI 491 / HIST 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: Students will meet with the professor either in assigned pairs or "trios" at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

Requirements/Evaluation: This class follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: History majors and students with course work related to the topic.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 491(D2) AMST 490(D2) HIST 491(D2)

Writing Skills Notes: Students will reflect on what their writing goals are for the semester, and they will receive feedback on their writing from the professor and from their tutorial partner. The final writing assignment will afford students the chance also to reflect back on their previous papers and the semester's course content.

ANTH 216 (F) Cities and Urbanism of the Ancient World (WS)

Cross-listings: GBST 216

Primary Cross-listing

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Eurasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

Requirements/Evaluation: 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first years, sophomores, or majors in Anthropology or Sociology

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 243 (S) Reimagining Rivers (DPE) (WS)

Cross-listings: ENVI 243

Secondary Cross-listing

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more
justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Requirements/Evaluation: Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 243(D2) ANTH 243(D2)

Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

Difference, Power, and Equity Notes: This course focuses on the role of rivers in struggles over cultural difference, social power, and environmental equity. Throughout the course, students read and write extensively about environmental justice, and they engage with diverse theoretical approaches to studying the intersection of water, power, and social identity. Our focus from beginning to end is on the profound impact of river management on the lives of marginalized indigenous, agrarian, and urban communities.

ARTH 218 (F) From the Battlefield to the Hermit's Cell: Art and Experience in Norman Europe (WS)

Cross-listings: WGSS 284 / REL 284

Primary Cross-listing

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans—a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries—each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects—an embroidery, a building, and a book—give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.

Requirements/Evaluation: Participation in discussion; five 4-5-page tutorial papers; five 1-2-page response papers.

Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: First years and sophomores, but open to all.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 284(D2) REL 284(D2) ARTH 218(D1)

Writing Skills Notes: In this tutorial, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 5-7-page papers they will submit, with suggestions for improvement.

ARTS 204  (F)  Introduction to Performance Art: Bodies, Borders and Resistance
In this introductory tutorial class, we will explore time, space and politics through the presence of the artist's body as well as the relation between the artist and the audience. We will study the history of Performance Art, beginning with its origins in the early 20th century and leading us to contemporary Performance Art work presented in art contexts and in everyday life. We will read and discuss texts, watch films and videos, attend live events and analyze the role of photography as documentary witness, all via themes of liveness and ephemerality. Using this information as inspiration, we will create our own performances, which will include designing, writing and performing, as well as watching and documenting the performances through photography and video, accumulating in intimate conversations, feedback and critique. Specifically, we will think about and create Performance Art through our own body's lived experiences--exploring the borders of the body through race, gender and ability as well as relationships to place and land--to create, rebel and resist.

Requirements/Evaluation: We will discuss weekly readings and create live performances which will be evaluated throughout the semester. You will be required to create a unique performance art piece for your midterm and final that will also be documented photographically and via video/sound.

Prerequisites: One studio art class or permission of the instructor

Enrollment Limit: 12
Enrollment Preferences: Art Majors
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $100-$300 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

ARTS 254  (S)  Architecture as Politics: Space, Design, Technology  (DPE)
Cross-listings: ENVI 264

Primary Cross-listing
This course delves into the intersection of architecture as a form of political expression, technology, and their collective impact on societal change. Emphasizing architecture as a discipline deeply intertwined with politics and shaped by technological advancement, this course will examine how a spectrum of art tools—from traditional to digital and computational—helps shape buildings and public spaces, shifts power structures, and hinders or promotes social justice. The curriculum blends theoretical exploration with practical application. Students will engage in critical analysis, technology-driven design workshops, and peer evaluations, culminating in a final project that melds techno-political theory with cutting-edge architectural practices. This course is ideal for students keen on leveraging technological architectural techniques to craft spaces with profound
Requirements/Evaluation: This is an intensive studio tutorial requiring working outside of scheduled class hours. In this course, students can work with the following media assuming that they can master them for a 200-level course: architecture models (physical and digital), photo reportages, 2D collages (e.g., Photoshop), digital humanities (cartographies, counter mapping, oral histories, digital archives), and curatorial platforms. Students will participate in tutorials plus a final project of significant scope. Evaluation will be based primarily on the quality of the final project but also on participation.

Prerequisites: Drawing I or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: Studio Art majors, Art History and Studio Art majors, ENVI majors and concentrators.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 254(D1) ENVI 264(D1)

Difference, Power, and Equity Notes: This tutorial will employ theories and approaches from design activism and critical environmental studies to analyze the relationship between space and difference, including, but not limited to, race, class, ethnicity, gender, sexuality, religion, and species. Students will apply these theories and approaches to creating place-based projects.

Spring 2025

TUT Section: T1    TR 11:20 am - 12:35 pm     Giuseppina Forte

ARTS 322  (S)  The Empowered Object

The development of "found object" in the language of art has played a significant role in constructing meaning in the consciousness of the twenty-first century. This tutorial will have students explore that tradition further through their own creative endeavors. They will be asked to add to the lineage of art that uses "found objects" in a creative and meaningful way. They will have the freedom to choose which medium will convey their ideas most effectively. They include, but are not limited to: sculpture, painting, drawing, photography, printmaking and video. For example, within the investigation of the "found object", projects might focus on: still life painting or incorporating real objects via collage, assemblage, etc. The "found object" in art will be examined through: art practice, readings and presentations. As a tutorial, the course is designed to meet individual needs and to stress student participation and responsibility for learning. Students will meet weekly with a peer and the professor to review work.

Requirements/Evaluation: Evaluation is based on the conceptual and technical quality of the work, as well as the level of participation in the tutorial meetings.

Prerequisites: Any 200-level art course in the area that you are planning to work that is housed in the studio wing of the art department.

Enrollment Limit: 10

Enrollment Preferences: Art majors have priority.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: 300-500 lab fee charged to term bill

ARTS 328  (F)  The Art of Almost Nothing

In this studio tutorial class, students will create studio art projects by using materials that are mainly not bought but found, repurposed, and/or overlooked and ubiquitous. In this time of extreme material production and consumption, with a great deal being thrown out and unrecoverable, how
can we make intentional, creative meaning from what is around us? This class is concerned with impacts on the environment but also with how consumer culture has wielded profound influence in the current production of studio art. How can we engage with our major concerns--aesthetic, topical, critical--and use what is around us mindfully and creatively with desired impact? Some of the artists we will look at: William Pope L., Ana Mendieta, David Hammons, Tania Bruguera, and the Yes Men. This class is a hands-on studio class with weekly assignments.

Class Format: studio class, 3 hours per week

Requirements/Evaluation: projects, assignments, class participation, attendance

Prerequisites: Three studio art classes of any kind at Williams or previous studio experience with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Any student who has taken at least three or more previous studio art classes at Williams

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Under $100. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

ASIA 109  (S)  The Art of Yoga: Practice, Philosophy, Politics, Possibilities  (DPE)

Cross-listings: THEA 109

Secondary Cross-listing

This course offers an immersive, interdisciplinary approach to hatha yoga, the branch of yoga that emphasizes bodily techniques for channeling energy, and achieving balance and quietude. It has been practiced and theorized variously in South Asia since ancient times. More recently, beginning in the late 19th century, it has been popularized throughout the globe, and has served as a source of inspiration for artists in various disciplines, including the theatre. Our work will follow four interrelated paths that will provide a broad context for our own experience and offer us tools for developing creativity: 1) We will dedicate ourselves to the careful study of the physical practice of yoga asanas, giving emphasis to biomechanical principles of alignment. Our study will include some basics of yoga anatomy; 2) We will study some allied philosophical principles, as they emerge from the Sanskrit text, Patanjali's Yoga Sutras, and some current commentaries on that text, by means of expanding the significance of our practice to all areas of our lives; 3) We will attend to the cultural politics of yoga by discussing new scholarship on its ancient origins as well as critical inquiry about how issues of appropriation, Orientalism, and racism shape its current manifestations; 4) We will examine how artists have incorporated elements of yoga into their practice. To explore how yoga might support our own artistic and innovative thinking, we will pair our practice with creative exercises. In this way, the course aims to explore the relationship of theory and practice. It will be of interest to students in the arts and anyone interested in fostering artistry and the imagination. Students must be prepared to engage in a physical practice of asana, as well as commit to reading, writing, and discussion. No previous experience with yoga is required.

Requirements/Evaluation: Students will write 3-page weekly papers, either in response to readings or embodied exercises, or the tutorial partner's essay. Written feedback will be given by instructor. Students will be expected to demonstrate that they are regularly practicing outside of class both by the quality of questions they bring to our sessions together, as well as their continuous refinement of the poses. Students will not be evaluated in relation to a standard, but according to their own dedicated and steady progress with respect to the experience of yoga practice. The evaluation process includes attendance.

Prerequisites: Prospective students will be asked to submit an online form with questions about their interest in the class.

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to first-year students.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $50 for yoga mat, belt, and balls.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 109(D1) ASIA 109(D1)

**Difference, Power, and Equity Notes:** Throughout the course we will reflect on the ways in which the knowledge created through yogic practice and philosophy disrupts and provincializes European epistemological systems. Moreover, we will engage in critical inquiry into the ways in which the global popularity of yoga is shaped by colonial legacies of Orientalist representation, as well as contemporary modes of cultural appropriation and consumerism.

Spring 2025

TUT Section: T1    TBA    Shanti Pillai

ASIA 111 (S) The Asia-Pacific War (WS)

**Cross-listings:** HIST 112

**Secondary Cross-listing**

The "Asia-Pacific War," as it is known in Japan, raged from the full-scale Japanese invasion of China in 1937 until Japan's total defeat in 1945. This war, though certainly tied to the Allied war against Germany and Italy, was viewed by many participants at the time as truly a war apart due to the immense distances involved, the gleeful, racism-fueled brutality on both sides of the conflict, and the resultant abuses of POWs, use of atomic weapons, and other atrocities. Students will explore the intersection of colonialism, racism and opportunism that fed the conflagration, and the remarkable rapprochement between American and Japanese former enemies immediately after the war. It will examine in depth the roles of China and the USSR in this conflict, which are often mentioned but functionally ignored in the West. It will cover the various warzones and home fronts, focusing as much as possible on conveying the experiences of participants through primary sources. It will likewise seek to bridge the analysis of the military and socio-political sides of this conflict, which are often treated as distinct, by drawing on key academic works in the field.

**Requirements/Evaluation:** Weekly meetings with professor and one peer partner; 5-page papers (6 total); 2-page critiques of partner’s papers (6 total)

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and Asian Studies concentration students, then everyone else.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 112(D2) ASIA 111(D2)

**Writing Skills Notes:** Students will alternate weekly between writing 5-page tutorial papers and 2-page critiques of their peers’ writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners.

ASIA 351 (S) Disinterest in the Bhagavad Gita

**Cross-listings:** ENGL 353 / COMP 313 / REL 353

**Secondary Cross-listing**

In this course, students will read the *Bhagavad Gita* alongside selected responses to it. These responses range from philosophical and theological commentaries written in Sanskrit by Shankaracharya, Abhinavagupta, and Ramanuja, to later “Bhakti” poetic responses in other Indian languages, to 18th and 19th century European aesthetic and political commentary (Herder, Schlegel, Hegel), to the work of 20th century commentators like M.K. Gandhi, B.G. Tilak, B.R. Ambedkar and D.D. Kosambi. We will examine the *Gita's* theory of action and the place of disinterest in this theory. We will inquire into the social, metaphysical, and political conditions of possibility of such disinterestedness, and think about disinterestedness itself as a condition for political action and aesthetic experience. Finally, we will reflect on how such a comparative history of interpretation might help us model a
Requirements/Evaluation: Weekly meetings, weekly reading; weekly essay or response. Attendance in 2-3 lectures over the semester.

Prerequisites: No prerequisites

Enrollment Limit: 10

Enrollment Preferences: Majors in English and Comparative Literature; Religion, Classics, or Philosophy majors; Sophomores looking to major in any of these.

Expected Class Size: 8-10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 481 (F) History of Taiwan (WS)

Cross-listings: HIST 481

Secondary Cross-listing

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Requirements/Evaluation: weekly papers and critiques

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History and Asian Studies majors/concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 481(D2) ASIA 481(D2)

Writing Skills Notes: In this tutorial course, students will write bi-weekly 5- to 7-page papers with feedback from both the instructor and tutorial partner. Students will revise one of their tutorial papers as a final assignment. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ASTR 402 (S) Between the Stars: The Interstellar Medium (QFR)

The matter between the stars--the interstellar medium--tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their
final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

Class Format: Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.

Requirements/Evaluation: weekly problem sets, 10-page final paper, and observing projects

Prerequisites: ASTR 111 and PHYS 201 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

Spring 2025

TUT Section: T1 TBA Anne Jaskot

BIOL 209 (F) Animal Communication (WS)

Cross-listings: NSCI 209

Primary Cross-listing

Animal communication systems come in as many varieties as the species that use them. What they have in common are a sender that encodes information into a physical signal and a receiver that senses the signal, extracts the information, and adjusts its subsequent behavior accordingly. This tutorial will consider all aspects of communication, using different animal systems to explore different aspects of the biology of signaling. Topics will include the use of syntax to carry meaning in chickadee calls, synchronous signaling by fireflies, gestural communication by primates, long-distance chemical attractants that allow male moths to find the object of their desire, and cultural evolution within learned signaling systems.

Requirements/Evaluation: evaluation will be based on five 5-page papers, five short response papers, and the student's effectiveness in tutorial discussions.

Prerequisites: BIOL 101 and 102; open to sophomores, juniors, and seniors

Enrollment Limit: 10

Enrollment Preferences: Biology majors and Neuroscience concentrators who need a Biology elective to complete the concentration; then sophomores.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

NSCI 209(D3) BIOL 209(D3)

Writing Skills Notes: This course is a tutorial, and each student will write five position papers and five response papers. Extensive feedback will be provided; students will be required to rewrite one position paper, and may rewrite any of them.

Attributes: COGS Related Courses NSCI Group A Electives
BIOL 440 (S) Cell Signaling and Tissue Engineering: A Potential Fountain of Youth? (WS)

It is a long quest of mankind to have a healthy and long life but it is inevitable that our bodies lose function due to injury, disease or as we grow old. At the heart of tissue engineering is the idea that we can restore tissue function by replacing with or rebuild the right structure. To artificially generate tissues, organs or even organisms, one fundamental question must be addressed: How do our different organs, composed of cells with the identical genetic information, develop into such functionally different organs? Through the lens of tissue engineering, we will explore the mechanism by which cells sense the surrounding physical and chemical cues, and respond by changing their gene expression and consequent behaviors. We will devote most of our discussion to the scientific rationale and challenges of tissue engineering. Topics to be covered include 3D organoids in regenerative medicine, disease modeling, biobanking and drug discovery, computational modeling of stem cell dynamics, tissue growth and pattern formation, mechanotransduction, biomaterial fabrication, immunomodulation and cultured meat. Bioengineering of bone and cartilage, cardiovascular and nervous systems, etc. will be presented as case studies to illustrate details of certain aspects of tissue engineering in the broader context of the overall strategic approach used to solve a clinical problem. We will also consider the role of social factors like legislative regulation, health care philosophy, ethics and economics in the process of moving concept into the clinic and market.

Requirements/Evaluation: six 4-5 page papers; six 1-2 page response papers; tutorial presentations; contribution to the intellectual enterprise
Prerequisites: BIOL202 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Junior and seniors, with preference to senior Biology majors who have not had a 400-level course
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (WS)

Writing Skills Notes: Each student will write six 4-5 page papers that address questions given by the professor and six 1-2 page critiques of their tutorial partner's papers, either adding to or refuting the main points made. Both papers and critiques will receive feedback from professor regarding structure, style and argument. As a final assignment, each student will write a paper that requires synthesizing/revising their ideas from the previous five papers and also a peer review of their partner's final paper.

COMP 129 (S) James Baldwin's Song

Cross-listings: MUS 179 / AFR 128

Secondary Cross-listing

"It is only in his music [. . .] that the Negro in America has been able to tell his story. It is a story which otherwise has yet to be told and which no American is prepared to hear," wrote James Baldwin in Notes of a Native Son in 1955. In this course, we strive to listen more closely to racialized experience through James Baldwin's musical literature. Through analysis and creation of music, we hope to better understand cultural difference and collective humanity. In this course, we closely analyze James Baldwin's use of song names, creation of musician characters, and replication of musical elements in his writing. Baldwin's musical word play crosses historical and genre boundaries. So we will explore texts from his early to late career, such as the gospel music of his youth in the semi-autobiographical novel Go Tell It on the Mountain, the metaphor of the blues in the play written during the civil-rights movement Blues for Mr. Charlie, the jazz musician protagonist in "Sonny's Blues" written after World War II in Paris, and his only musical recording in A Lover's Question set down near the end of his life. In addition to closely analyzing James Baldwin's attention to music throughout his literature, students will learn basic music writing and production skills. The tutorial will draw on a range of musical resources, including playlists, music workshops, guest lectures and performances. All of these resources will guide students to a more attuned hearing not only of music but also of the African American experience it reflects. By the end of the course, students will have written several short 1-2 page close analysis essays and song lyrics. For their final project, students will produce an original song based on key insights from the course. No musical experience is required, though an openness to learn and practice songwriting is expected.

Requirements/Evaluation: Several short 1-2 page close analysis essays of Baldwin's work, oral peer feedback presentations, song lyrics, and an
In an outdoor swimming pool is where Eros meets Thanatos: in both F. Scott Fitzgerald's novel *The Great Gatsby* (1925) and Billy Wilder’s movie *Sunset Boulevard* (U.S.A., 1950), the protagonists are shot dead in their pool, and in his adaptation of *Romeo and Juliet* (U.S.A., 1996) Baz Luhrmann transposes the balcony scene to an outdoor pool where romance unfolds. What is it about outdoor swimming pools that they irremediably capture our imagination? This interdisciplinary tutorial explores the function and significance of outdoor swimming pools in French, German, and U.S. culture through literature, painting, photography, and film. Whether we regard them as a symbol of status and wealth, the remnants of Hollywood's Golden Age era, the embodiment of order and discipline, or a major environmental impact factor, they nevertheless fascinate us. Because outdoor swimming pools, whether private or public, are a microcosm of society and a metaphor for human civilization, they have also been at the center of discussions about racial segregation and religious discrimination in Europe as well as in the U.S.A.. Although pools are mostly governed by tacit rules, such as respect for personal space and the desexualization of encounters, visitors have often disregarded and broken these regulations. That explains why outdoor swimming pools have often served as the perfect backdrop for literature and cinema's steamiest and most violent scenes. We will start the course with a brief social history of pools and read a few sociological studies of swimming pools by experts (Jeff Wiltse, Kate Moles, Susie Scott) to lay the theoretical ground for our analysis. In the course of the tutorial, we will explore through novels, photographs, paintings, and films the various functions assigned to outdoor swimming pools depending on the time period. We will also delve into the genre of summer pool side literature (the satirical *Summer House with Swimming Pool* (2011) by Hermann Koch, the thriller *The Swimming Pool* (2018) by Clare Mackintosh, and Julie Otsuka's latest novel, *The Swimmers* (2022)) and try to explain its great popularity. While the outdoor pool functions as a mirror of excess and decadence in the 1920's as evidenced by the lavish pool parties thrown by *The Great Gatsby* by F. Scott Fitzgerald (1925), it becomes the epitome of white middleclass suburban life in the 60's as John Cheever's short story *The Swimmer* narrates. During the 1970's, the pool advances as a symbol of sexual liberation as the erotic thriller *The Swimming Pool* (France, 1969) by Jacques Deray, the sexually charged pool paintings *Peter Getting Out of Nick's Pool* (1966) or *Portrait of an Artist (Pool with Two Figures)* (1972) by David Hockney, or the male nudes by Tom Bianchi in his *Fire Island Pines: Polaroids 1975-1983* attest. In the 1980's the outdoor pool becomes once more the mirror of opulence and eroticism, which Helmut Newton's photographs of Hollywood celebrities (Liz Taylor swimming in her jewels) and for Playboy magazine capture as well as Paul Thomas Anderson's film *Boogie Nights* (U.S.A.,1997) about the booming porn industry during the Reagan-era. Starting in the late 90's, the outdoor swimming pool takes on greater political significance, largely due to the emergence and increasing visibility of female and gay filmmakers. In François Ozon's thriller *Swimming Pool* (France, 1996), the pool is the setting of female solidarity and feminist revenge. In her character study movie *Everyone else* (Germany, 2009), Maren Ade carefully examines how gender roles and stereotypes play out and get reinforced during a pool party. At last, in her recent comedy *Freibad*, (Germany, 2022) Doris Dorrie chooses a women-only public outdoor pool as the backdrop to raise questions of racial segregation and religious discrimination.

**Requirements/Evaluation:** six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Freshmen, sophomores, and juniors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option
COMP 231 (F) Postmodernism (WS)

Cross-listings: ENGL 266

In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by critics like Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and Azuma Hiroki; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.

Class Format: After an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week.

Requirements/Evaluation: participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)

Prerequisites: a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Comparative Literature majors, students with a demonstrated interest

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 266(D1) COMP 231(D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as written peer feedback on the longer papers. (See requirements for details about the number and type of assignments.)

COMP 236 (S) Narrating Color: Black Women Sing and Write About Complexion

Cross-listings: WGSS 206 / AFR 202

Secondary Cross-listing

Colorism, skin color discrimination where light skin is privileged over dark skin, is not a new phenomenon, but globally entrenched in our society and one of the many vestiges of white supremacy. For Black Americans of all backgrounds, colorism is a familiar and a living legacy concretized by the institution of slavery in the Americas. Although some believe that we are "post-color," similarly to those that naively believe we are "post-race," one can
look to the recent example of misogynoir (misogyny directed at Black women) and skin color politics that Meghan Markle, the Duchess of Sussex, has faced at the hands of the British Monarchy, that her light-skinned color, biraciality, and class privileges couldn’t protect her from. Alternatively, we can look at the numerous examples of colorism and anti-Black racism that tennis icon Serena Williams is subjected to because of her dark-brown skin complexion and body shape. One cannot fully understand the issue of colorism without understanding that it is an outgrowth or an extension of anti-Black racism firmly rooted in white supremacy, and so insidious that it impacts all aspects of Black life. Examining colorism through literary texts and music, provides a depth of understanding that both compliments and expands these empirical studies. Literature and music provide the narratives and rhythm that paint a vivid picture of the many ways that colorism impacts the lives of Black people. Through the methods of literary and rhetorical criticism we will examine the works of five Black women authors and music artists that take up issues around colorism and passing. We will explore, Toni Morrison’s, *The Origins of Others* (2017), Brit Bennett’s, *The Vanishing Half* (2020), Tressie McMillian Cottom’s, *Thick* (2019), Marita Golden’s, *Don’t Play in the Sun* (2004), Yaba Blay’s, *One Drop: Shifting the Lens on Race* (2021), Nina Simone’s, “Four Women” (1966) and “Young, Gifted and Black” (1958), Sara Martin’s, “Mean Tight Mama” (1927), India.Arie’s, “Brown Skin” (2001), Azealia Banks “Liquorice” (2012), and Beyoncé’s “Creole” (2012), “Formation” (2016) and “Brown Skin Girl” (2020). By examining colorism in both literature and music, it will give first year students a foundational and nuanced understanding of skin tone bias and equip them with the tools to critically engage literary and music texts.

**Requirements/Evaluation:** Three, short papers (4-5 pages) discussing aspects of the readings and songs; three response papers to tutorial partner's papers (2 pages long); two, video essays; two, Twitter threads explaining aspects of one of the books and one of the songs; and a curated playlist of songs that would serve as accompaniment to one of the texts from the class.

**Prerequisites:** N/A

**Enrollment Limit:** 10

**Enrollment Preferences:** This class is specifically designed for first year students. Sophomores can register only with advanced permission.

**COMP 268 (S) The Contemporary African American and Latin American Novella (WS)**

**Cross-listings:** ENGL 243

**Secondary Cross-listing**

This tutorial examines how the novella has been deployed in the African American and Latin American contexts in our present century. Throughout the term, we will grow a vocabulary to understand how, from the perspective of craft, an elongated brevity can often lend itself, perhaps counterintuitively, to such an immersive reading experience. We will also contemplate why so many of the texts appear focused on countering established historical narratives. What unique possibilities does the form of the novella offer in this regard? In these explorations, we will encounter novelas from, among others, César Aira, Yuri Herrera, Jocelyn Nicole Johnson, Gayl Jones, John Keene, Bruna Dantas Lobato, Toni Morrison, and Alejandro Zambra. These readings will be paired with brief critical texts that will frame the essays to be written each week.

**Requirements/Evaluation:** five tutorial essays (4-5 pages); five responses to partners tutorial essays; thoughtful participation in tutorial meetings

**Prerequisites:** A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** Sophomores, but juniors and seniors are also welcome.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

DANC 210 (F) LET'S MAKE A DANCE: Dance Making and Re-Making

This tutorial is designed for both first-time dance makers as well as more experienced dance students who seek the opportunity to practice dance making in a structured, intimate setting. Any genre or style of dance may be explored. Projects are designed primarily to empower the creator to clarify the intent and vision for their work. Central to this is the practice of giving and receiving feedback, using Liz Lerman’s Critical Response Process (CRP). Tutorial partners will be active artistic advisors for each others’ projects. Projects may include solo and group work, site-specific dance making, and creating in collaboration. Students are expected to rigorously build upon and revise their work(s) in three possible roles: artist, responder, and facilitator. Studying the work and philosophies of dance makers in a variety of genres, such as Akram Khan, Pina Bausch, Camille A. Brown, and William Forsythe will give further context to our work. Weekly presentation of assignments, active participation in CRP sessions, reading assignments, identifying to the group one's intended goal(s) for the week, written reflection on sessions, and final showing will be required. The full class will meet periodically for group feedback.

Class Format: plus one periodic full class meeting

Requirements/Evaluation: weekly presentation of assignments, participation in CRP sessions, identifying to the group one's intended goal, written reflection on sessions, and final showing
How can we capture the "liveness" of dance and performance through writing? How can the spoken and written word promote a deeper understanding of felt emotions expressed through embodied practice? In this tutorial, we will explore different modes of writing about performance such as ethnography, non-fiction, and performative writing. While there will be skill-based goals and a set outline for the tutorial, core texts that will anchor the conversations and paired writing assignments will be selected according to the interests of enrolled students. Texts will be complemented with visual materials and/or virtual conversation with artist-scholars to encourage a multilayered experience with writing about performance. The course is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

Class Format: enrollment in the course will require each student to have in-person or zoom meeting with the instructor before the first class meeting, and attendance in the first organizational meeting or class session.

Requirements/Evaluation: This tutorial is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: Juniors and seniors, and those with specific interest in performance, creative, and analytical writing. Prior dance or performance experience not required.

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 335(D1) DANC 302(D1)

Writing Skills Notes: Each student will write three 5- to 6- page papers on which the professor and peers will provide critical feedback on content, style, and form. After each cycle of feedback, students will have the option to submit a revision, and discuss the revision process and the revised paper. As the final assignment, students will select one of the three papers to develop into a longer essay, which will be 10-15 pages.

Difference, Power, and Equity Notes: The monographs that will anchor the tutorial engage with politics of identity as it manifests in both staged and in everyday performances. The introductory points of exploration and the objects of analysis in the course are bodies in motion. So our inquiry throughout the semester will necessarily include how bodies "make meaning" in a network of power relationships within the context of historical associations to markers of race, class, gender, sexuality, and socially constructed differences.

Spring 2025
TUT Section: T1 TBA Munjulika R. Tarah
ECON 219  (S)  Global Economic History  (WS)
What generated the rise of agricultural civilizations and early empires in the ancient world? Why did Western Europe--and not China, India, or the Middle East--first experience the Industrial Revolution? Why did Latin America stagnate over the 20th century, while Japan and eventually China and India boomed? What explains the historical success of the US economy? Why did the Soviet Union rise and fall? And why was African economic growth slow for so long before taking off in recent decades? These and other questions will guide our exploration of global economic development over the past several millennia. Our focus will be broadly comparative across space and time, with an emphasis on how institutions, resource endowments, culture, technology, and market forces help explain economic differences and change around the world. Throughout the course, we will draw on micro and macroeconomic concepts and simple empirical tools to understand and interpret the historical roots of the modern global economy.

Class Format: tutorial; weekly one hour meetings in groups of two
Requirements/Evaluation: evaluation will be based on five 5- to 6-page papers, critiques of fellow students' papers, a longer revision of a paper, and engagement in discussion
Prerequisites: ECON 110 and ECON 120 or equivalent courses subject to instructor approval
Enrollment Limit: 10
Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or History
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (WS)
Writing Skills Notes: This tutorial course requires students to write five 5-7-page papers, to write 1-2 page responses to their tutorial partner's papers, and to revise and extend one of their papers into a larger final paper of approximately 10-12 pages. Along the way, I offer detailed comments on all of their writing, with an eye towards producing a very polished final paper.

ECON 375  (S)  Inclusive Growth and Crisis Response: The Role of Social Protection Systems
Cross-listings:  
Secondary Cross-listing

Over the past three decades, developing countries have increasingly expanded social protection systems to tackle poverty and vulnerability while promoting inclusive social development and equitable economic growth. These systems provide pro-poor policy instruments that can balance trade and labor market reforms, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social protection systems help vulnerable people to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. In times of crisis, these systems are more important than ever. From March to June 2020, the World Bank identified 195 countries that have adapted and expanded their social protection systems to respond to the COVID-19 pandemic. This tutorial offers the opportunity to explore how shock-responsive social protection systems can better enable developing countries to respond to global and local shocks in a manner that minimizes the medium- to long-term costs of the resulting crises. The tutorial examines how developing countries build social protection systems to tackle poverty, vulnerability and social exclusion that result from global and local shocks. Topics include how the design and implementation of effective interventions both respond to crises and strengthen long-term developmental outcomes. The tutorial focuses on country responses to the COVID-19 pandemic as both a relevant case study and an example of the kinds of global crises to which national social protection systems must be able to respond in the future.

Requirements/Evaluation: Students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students
Prerequisites: ECON 251 or ECON 252
Enrollment Limit: 10
Enrollment Preferences: CDE Fellows; Junior and senior Economics majors at instructor's discretion.
Expected Class Size: 10
**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2025
TUT Section: T1 TBA Michael Samson
TUT Section: T1 TBA Michael Samson

ENGL 243 (S) The Contemporary African American and Latin American Novella (WS)
Cross-listings: COMP 268

**Primary Cross-listing**

This tutorial examines how the novella has been deployed in the African American and Latin American contexts in our present century. Throughout the term, we will grow a vocabulary to understand how, from the perspective of craft, an elongated brevity can often lend itself, perhaps counterintuitively, to such an immersive reading experience. We will also contemplate why so many of the texts appear focused on countering established historical narratives. What unique possibilities does the form of the novella offer in this regard? In these explorations, we will encounter novellas from, among others, César Aira, Yuri Herrera, Jocelyn Nicole Johnson, Gayl Jones, John Keene, Bruna Dantas Lobato, Toni Morrison, and Alejandro Zambra. These readings will be paired with brief critical texts that will frame the essays to be written each week.

**Requirements/Evaluation:** five tutorial essays (4-5 pages); five responses to partners tutorial essays; thoughtful participation in tutorial meetings

**Prerequisites:** A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** Sophomores, but juniors and seniors are also welcome.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 268(D1) ENGL 243(D1)

**Writing Skills Notes:** Beyond the quantity of assigned writing, significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

Spring 2025
TUT Section: T1 TBA Ricardo A Wilson

ENGL 266 (F) Postmodernism (WS)
Cross-listings: COMP 231

**Secondary Cross-listing**

In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by critics like Jean Baudrillard, Fredric
Jameson, Jean-François Lyotard, and Azuma Hiroki; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.

**Class Format:** After an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week.

**Requirements/Evaluation:** participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)

**Prerequisites:** a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Comparative Literature majors, students with a demonstrated interest

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 266(D1) COMP 231(D1)

**Writing Skills Notes:** Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as written peer feedback on the longer papers. (See requirements for details about the number and type of assignments.)

---

**ENGL 335 (S) Moving Words, Wording Dance (DPE) (WS)**

**Cross-listings:** DANC 302

**Secondary Cross-listing**

How can we capture the "liveness" of dance and performance through writing? How can the spoken and written word promote a deeper understanding of felt emotions expressed through embodied practice? In this tutorial, we will explore different modes of writing about performance such as ethnography, non-/fiction, and performative writing. While there will be skill-based goals and a set outline for the tutorial, core texts that will anchor the conversations and paired writing assignments will be selected according to the interests of enrolled students. Texts will be complemented with visual materials and/or virtual conversation with artist-scholars to encourage a multilayered experience with writing about performance. The course is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

**Class Format:** enrollment in the course will require each student to have in-person or zoom meeting with the instructor before the first class meeting, and attendance in the first organizational meeting or class session.

**Requirements/Evaluation:** This tutorial is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

**Prerequisites:** none

**Enrollment Limit:** 8

**Enrollment Preferences:** Juniors and seniors, and those with specific interest in performance, creative, and analytical writing. Prior dance or performance experience not required.

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

---

Fall 2024

TUT Section: T1 TBA Christopher A. Bolton
This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 335(D1) DANC 302(D1)

**Writing Skills Notes:** Each student will write three 5- to 6-page papers on which the professor and peers will provide critical feedback on content, style, and form. After each cycle of feedback, students will have the option to submit a revision, and discuss the revision process and the revised paper. As the final assignment, students will select one of the three papers to develop into a longer essay, which will be 10-15 pages.

**Difference, Power, and Equity Notes:** The monographs that will anchor the tutorial engage with politics of identity as it manifests in both staged and in everyday performances. The introductory points of exploration and the objects of analysis in the course are bodies in motion. So our inquiry throughout the semester will necessarily include how bodies "make meaning" in a network of power relationships within the context of historical associations to markers of race, class, gender, sexuality, and socially constructed differences.

Spring 2025
TUT Section: T1   TBA   Munjulika R. Tarah

**ENGL 353 (S) Disinterest in the Bhagavad Gita**

**Cross-listings:** COMP 313 / REL 353 / ASIA 351

**Primary Cross-listing**
In this course, students will read the *Bhagavad Gita* alongside selected responses to it. These responses range from philosophical and theological commentaries written in Sanskrit by Shankaracharya, Abhinavagupta, and Ramanuja, to later "Bhakti" poetic responses in other Indian languages, to 18th and 19th century European aesthetic and political commentary (Herder, Schlegel, Hegel), to the work of 20th century commentators like M.K. Gandhi, B.G. Tilak, B.R. Ambedkar and D.D. Kosambi. We will examine the *Gita*’s theory of action and the place of disinterest in this theory. We will inquire into the social, metaphysical, and political conditions of possibility of such disinterestedness, and think about disinterestedness itself as a condition for political action and aesthetic experience. Finally, we will reflect on how such a comparative history of interpretation might help us model a dialectical history of thought.

**Requirements/Evaluation:** Weekly meetings, weekly reading; weekly essay or response. Attendance in 2-3 lectures over the semester.

**Prerequisites:** No prerequisites

**Enrollment Limit:** 10

**Enrollment Preferences:** Majors in English and Comparative Literature; Religion, Classics, or Philosophy majors; Sophomores looking to major in any of these.

**Expected Class Size:** 8-10

**Grading:** no pass/fail option, no fifth course option

Spring 2025
TUT Section: T1   TBA   Paresh Chandra

**ENVI 243 (S) Reimagining Rivers**  (DPE)  (WS)

**Cross-listings:** ANTH 243

**Primary Cross-listing**
In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and
humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

**Requirements/Evaluation:** Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 243(D2) ANTH 243(D2)

**Writing Skills Notes:** Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

**Difference, Power, and Equity Notes:** This course focuses on the role of rivers in struggles over cultural difference, social power, and environmental equity. Throughout the course, students read and write extensively about environmental justice, and they engage with diverse theoretical approaches to studying the intersection of water, power, and social identity. Our focus from beginning to end is on the profound impact of river management on the lives of marginalized indigenous, agrarian, and urban communities.

ENVI 244 (S) Environmental Ethics (WS)

**Cross-listings:** PHIL 244

**Primary Cross-listing**

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature, among others. Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

**Requirements/Evaluation:** five essays (5-7 pages each) and five prepared oral responses to partners’ essays; evaluation will be based on essays, oral responses, and quality of discussion

**Prerequisites:** ENVI 101 or one course in PHIL

**Enrollment Limit:** 10

**Enrollment Preferences:** declared and prospective Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 244(D2) PHIL 244(D2)

**Writing Skills Notes:** Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support
of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

TUT Section: T1    TBA    Julie A. Pedroni

ENVI 264  (S)  Architecture as Politics: Space, Design, Technology  (DPE)

Cross-listings: ARTS 254

Secondary Cross-listing

This course delves into the intersection of architecture as a form of political expression, technology, and their collective impact on societal change. Emphasizing architecture as a discipline deeply intertwined with politics and shaped by technological advancement, this course will examine how a spectrum of art tools—from traditional to digital and computational—helps shape buildings and public spaces, shifts power structures, and hinders or promotes social justice. The curriculum blends theoretical exploration with practical application. Students will engage in critical analysis, technology-driven design workshops, and peer evaluations, culminating in a final project that melds techno-political theory with cutting-edge architectural practices. This course is ideal for students keen on leveraging technological architectural techniques to craft spaces with profound political and social impact.

Requirements/Evaluation: This is an intensive studio tutorial requiring working outside of scheduled class hours. In this course, students can work with the following media assuming that they can master them for a 200-level course: architecture models (physical and digital), photo reportages, 2D collages (e.g., Photoshop), digital humanities (cartographies, counter mapping, oral histories, digital archives), and curatorial platforms. Students will participate in tutorials plus a final project of significant scope. Evaluation will be based primarily on the quality of the final project but also on participation.

Prerequisites: Drawing I or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: Studio Art majors, Art History and Studio Art majors, ENVI majors and concentrators.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 254(D1)  ENVI 264(D1)

Difference, Power, and Equity Notes: This tutorial will employ theories and approaches from design activism and critical environmental studies to analyze the relationship between space and difference, including, but not limited to, race, class, ethnicity, gender, sexuality, religion, and species. Students will apply these theories and approaches to creating place-based projects.

ENVI 291  (F)  Religion and Ecology in America  (WS)

Cross-listings: REL 291 / SOC 291

Primary Cross-listing

This course examines the relationship between religious and environmental thought in American cultural history. Exploring a broad range of practices, stories, and beliefs, we will examine the spiritual roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have religious writers, thinkers, and artists shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? In pursuit of these questions, we will consider a diverse array of topics and cases, including
struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biological theory, Buddhist eco-spirituality, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner’s paper.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 291(D2) REL 291(D2) SOC 291(D2)

Writing Skills Notes: Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

Attributes: ENVI Humanities, Arts + Social Science Electives

Fall 2024

TUT Section: T1 TBA Nicolas C. Howe

ENVI 491 (S) The Suburbs (WS)

Cross-listings: AMST 490 / HIST 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: Students will meet with the professor either in assigned pairs or “trios” at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

Requirements/Evaluation: This class follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with course work related to the topic.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 491(D2) AMST 490(D2) HIST 491(D2)

Writing Skills Notes: Students will reflect on what their writing goals are for the semester, and they will receive feedback on their writing from the
professor and from their tutorial partner. The final writing assignment will afford students the chance also to reflect back on their previous papers and the semester's course content.

**GBST 216 (F) Cities and Urbanism of the Ancient World (WS)**

**Cross-listings:** ANTH 216

**Secondary Cross-listing**

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

**Requirements/Evaluation:** 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first years, sophomores, or majors in Anthropology or Sociology

**Expected Class Size:** 10

**Grading:** no pass/fail option,  no fifth course option

**Distributions:** (D2)  (WS)

**GBST 348 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WS)**

**Cross-listings:** RUSS 348 / SOC 348

**Secondary Cross-listing**

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their post-socialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as Russia's invasion of Ukraine, or the lingering tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Ukraine and Russia, but will also read comparative studies, as well as works on East Germany and Georgia. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the post-socialist condition.
Requirements/Evaluation: 5-page paper every other week, written comments on the partner's paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 348(D2) RUSS 348(D1) SOC 348(D2)

Writing Skills Notes: This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

Difference, Power, and Equity Notes: Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

TUT Section: T1 M 7:00 pm - 9:40 pm Olga Shevchenko

GEOS 211 (F) Rates and Dates: Calibrating the Rock Record (WS)

Late in the eighteenth century, the Scottish naturalist, James Hutton, argued that Earth had "no vestige of a beginning, no prospect of an end" challenging the widely held biblical view that Earth was a mere 6,000 years old. Yet it was not until the discovery of radioactive decay that geologists were able to accurately date rocks and assign absolute ages to the geologic time scale, which had been developed using fossils and relative dating of rocks. Before radiometric dating, there were numerous attempts to estimate the age of Earth using the rates of natural phenomena, but these early approaches were plagued by faulty assumptions about geologic processes. We still endeavor to estimate the rate of a wide variety of geologic processes, and many are critical to society, such as climate change, sea-level rise, plate motions, and mass extinctions. In this tutorial, we explore the methods of radiometric dating that allow us to determine the age of igneous rocks that cooled from a magma, estimate when deeply buried metamorphic rocks cooled below certain temperatures, and determine the age of organic materials from their radiocarbon signatures. We then examine methods used to estimate the rates of geologic processes with particular emphasis on diffusion -- the movement of matter or energy in response to a gradient in concentration, temperature, or potential energy -- and the explicit and implicit assumptions that are critical to rate calculations. Topics include the basic isotope systematics of geochronology (U-Pb, K-Ar, and 14C ages) and thermochronology (U-Th/He or 40Ar/39Ar), as well as the rates of processes such as plate motion, sea-level rise or fall, glacial advance or retreat, magma storage and ascent, and/or mineral growth rates. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Requirements/Evaluation: Four 5-page papers and four oral critiques of partner's papers, plus 2 problem sets

Prerequisites: Any 100-level Geosciences course

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors or students with a strong interest in Geosciences.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Students will write four 5-page papers and will receive peer and instructor feedback on how to improve their writing skills and formulate sound arguments. In addition, there will be two quantitative problem sets.

HIST 112  (S)  The Asia-Pacific War  (WS)
Cross-listings:  ASIA 111

Primary Cross-listing

The “Asia-Pacific War,” as it is known in Japan, raged from the full-scale Japanese invasion of China in 1937 until Japan's total defeat in 1945. This war, though certainly tied to the Allied war against Germany and Italy, was viewed by many participants at the time as truly a war apart due to the immense distances involved, the gleeful, racism-fueled brutality on both sides of the conflict, and the resultant abuses of POWs, use of atomic weapons, and other atrocities. Students will explore the intersection of colonialism, racism and opportunism that fed the conflagration, and the remarkable rapprochement between American and Japanese former enemies immediately after the war. It will examine in depth the roles of China and the USSR in this conflict, which are often mentioned but functionally ignored in the West. It will cover the various warzones and home fronts, focusing as much as possible on conveying the experiences of participants through primary sources. It will likewise seek to bridge the analysis of the military and socio-political sides of this conflict, which are often treated as distinct, by drawing on key academic works in the field.

Requirements/Evaluation:  Weekly meetings with professor and one peer partner; 5-page papers (6 total); 2-page critiques of partner’s papers (6 total)

Prerequisites:  None

Enrollment Limit:  10

Enrollment Preferences:  History majors and Asian Studies concentration students, then everyone else.

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 112(D2) ASIA 111(D2)

Writing Skills Notes: Students will alternate weekly between writing 5-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners.

TUT Section:  T1  TBA  Viktor Shmagin

HIST 134  (F)  The Great War  (WS)

In November 2018, world leaders gathered in France to commemorate the centennial of the end of the First World War. Yet the armistice that brought hostilities on the Western front to a close on the eleventh hour of the eleventh day of the eleventh month of 1918, did not have the same significance for Eastern Europe and the Middle East, where revolutions and civil wars continued to be fought well into 1923. Ultimately, the Great War toppled four empires (German, Habsburg, Russian, and Ottoman) and forcibly displaced and killed millions of civilians (including Armenians and Jews), creating new countries and colonies throughout Europe, the Middle East, and Africa. This tutorial will explore the global history of the First World War, a history that is indispensable for understanding the world of today. We will consider a broad range of topics and sources in our examination of the political, social, cultural, economic, and military histories of the Great War and its aftermath. For three-quarters of the semester, the tutorial follows a traditional format in which weekly tutorial meetings center on the writing of a paper and the partner's critique. The last segment of the course is structured around a research paper assignment, introducing students to archival research and longer-format writing.

Requirements/Evaluation:  bi-weekly 5- to 7-page papers; bi-weekly written critiques; one revised paper; final 8- to 10-page research paper.

Prerequisites:  permission of instructor

Enrollment Limit:  10

Enrollment Preferences:  first- and second-year students

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (WS)
HIST 155  (S)  School Wars  (WS)
Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of "school wars" in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day "school wars"? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

Requirements/Evaluation:  four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)
Prerequisites:  first-years or sophomores
Enrollment Limit:  10
Enrollment Preferences:  first-year students, and then sophomores who have not previously taken a 100-level seminar
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)  (WS)

Writing Skills Notes: Students will write bi-weekly 5-page papers about the readings, and bi-weekly 2-page responses to their tutorial partner's paper. For the final paper, each student will revise and expand one of the papers they wrote in the semester. Students will receive regular written and oral feedback on their work from the professor and their tutorial partner. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

TUT Section: T1  TBA  Sara Dubow

HIST 159  (F)  Crossing the Color Line: A History of Passing  (DPE)  (WS)
Cross-listings:  AFR 159
Primary Cross-listing
In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her white parents stated publicly that Dolezal is a white woman passing as black. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to become white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries--class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical
accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

Requirements/Evaluation: Weekly formal response papers and written critiques.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 159(D2) AFR 159(D2)

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement.

Difference, Power, and Equity Notes: Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.

HIST 481 (F) History of Taiwan (WS)

Cross-listings: ASIA 481

Primary Cross-listing

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Requirements/Evaluation: weekly papers and critiques

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History and Asian Studies majors/concentrators

HIST 486 (S) Race and A Global War: Africa During World War II (DPE) (WS)

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners. The final writing assignment will afford students the chance to reflect on their previous papers and the semester's course content.

Difference, Power, and Equity Notes: This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

---

**HIST 488 (F) Sites of Memory and American Wars (WS)**

This tutorial will examine the ways that U.S. military ventures have been memorialized through a variety of physical sites, including landscapes, monuments and statues, museums, and other depictions. Given the enormous national conversation and reconsideration of many of these sites over the last decade, we will ask such questions as: How and why has the memorialization of U.S. wars changed since the country's founding? Who determines what is preserved and what stories are told? What is the relationship between individual experiences, collective memories, and national narratives? What do "sites of memory" tell us about society's views of wars and soldiers and about the United States? Throughout, we will pay attention to how these sites reflect historical understandings of the time and have also served as focal points of social and political protests.

**Class Format:** Students will meet with the professor either in assigned pairs or "trios" at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

**Requirements/Evaluation:** This course follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and students with course work related to the topic.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** At the start of the semester, students will outline what their writing goals are for the semester, and they will receive feedback on their writing from the professor and from their tutorial partner. The final writing assignment will afford students the chance to reflect on their previous papers and the semester's course content.

**HIST 491 (S) The Suburbs (WS)**

**Cross-listings:** ENVI 491 / AMST 490
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: Students will meet with the professor either in assigned pairs or "trios" at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

Requirements/Evaluation: This class follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

HIST 495 (F) The Medieval World System: Globalization before 1500 (WS)

In recent years, scholars have turned increasing attention to global history in the pre-modern period. This tutorial takes as its focus the global Middle Ages: roughly speaking, the period between 500 and 1500 CE. This was a period that saw mass-produced consumer goods cross from China to India, East Africa, and the Middle East, inspiring admiration and imitation in multiple different markets. It saw games, music, and forms of literature become popular across continents, and saw religious communities forge networks spanning thousands of kilometers. To study the global Middle Ages is to place exchange and networks, both commercial and cultural, at the heart of our analysis. We will read and analyze many accounts by medieval travelers, merchants, and pilgrims who crossed Afro-Eurasia, alongside works by modern historians and archaeologists who have pieced together the patterns of movement and exchange that tied together the diverse societies of pre-modern Afro-Eurasia.

Requirements/Evaluation: Students will meet in pairs with the instructor once a week. Every other week each student will present a paper of approximately 5-7 pages on a topic determined by the instructor, due by 5pm the day before the tutorial meeting. The student not writing the paper will critique the paper written by their tutorial partner. Each student will write six papers and serve as a critic on the six papers of their tutorial partner.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Junior and Senior History majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

JLST 272 (S) Free Will and Responsibility (WS)

Cross-listings: PHIL 272

Secondary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? We're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The key question, then, is whether, and how, agency is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Requirements/Evaluation: Six tutorial papers (5-6 pages in length) and five critiques (2-3 pages in length)

Prerequisites: one PHIL course (or permission of instructor; please email with any questions)

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

LEAD 290 (F) How Change Happens in American Politics (WS)

Cross-listings: PSCI 290

Secondary Cross-listing

An unprecedented assault on the U.S. Capitol, the rise of white nationalism, a pandemic, economic volatility, racial reckoning, the overturning of Roe v. Wade, and rapidly evolving environmental crises -- American politics in the last four years has been tumultuous. What might we expect to come next? From the Founding to the present, the American political order has undergone cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably stable and enduring. How can this be? Where do we find continuities and where upheavals? Who or what has been responsible for the continuities, and who or what for the changes? What sorts of transformations have been possible, and why -- what marriage of individual action and contextual factors have created political change in the past and in the present? Finally, what are the costs of change (and of continuity) -- and who pays them? In this tutorial, we assess American political change, or lack of, to gain a sense of the role that political leaders have played in driving change. We examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including war, economic developments, demographic change, and constitutional and institutional practices. We consider general models of change, as well as specific case studies, including civil rights and social justice for racial and ethnic groups, gender equality and family relations, and reactionary
or traditionalist politics. Finally, we will look at arguments that America has been "exceptional" -- or, unlike other countries -- as well as critiques of these arguments to help us gain an understanding of future prospects for political transformation.

**Requirements/Evaluation:** participation in weekly meetings as well as 4 lead essays (5-6 pages) and 4 critiques (2 pages)

**Prerequisites:** one prior course in political science

**Enrollment Limit:** 10

**Enrollment Preferences:** Declared and prospective Political Science majors and Leadership Studies concentrators

MATH 382 (S) Fourier Analysis (QFR)

Fourier analysis is the study of waves and frequencies. More precisely, the goal of Fourier analysis is to decompose a complicated function into a simple combination of pure waves, thereby gleaning insight into the behavior of the function itself. It's difficult to overstate the impact of this branch of mathematics; it is foundational throughout theoretical mathematics (e.g., to study the distribution of prime numbers), applied mathematics (e.g., to solve differential equations), physics (e.g., to study properties of light and sound), computer science (e.g., to compute with large integers and matrices), audio engineering (e.g., to pitch-correcting algorithms), medical science (e.g., throughout radiology), etc. The goal of this course is to cover the basic theory (fourier series, the fourier transform, the fast fourier transform) and explore a number of applications, including Dirichlet's theorem on primes in arithmetic progressions, the isoperimetric inequality, the heat equation, and Heisenberg's uncertainty principle.

**Class Format:** Every week, each student will either give a lecture (based on provided readings) or explain solutions to selected problems.

**Requirements/Evaluation:** Evaluation will be based on lectures and presentation of problem solutions.

**Prerequisites:** MATH 350 or MATH 351 or permission of instructor.

**Enrollment Limit:** 10
MUS 179 (S) James Baldwin's Song

Secondary Cross-listing

"It is only in his music [. . .] that the Negro in America has been able to tell his story. It is a story which otherwise has yet to be told and which no American is prepared to hear," wrote James Baldwin in Notes of a Native Son in 1955. In this course, we strive to listen more closely to racialized experience through James Baldwin's musical literature. Through analysis and creation of music, we hope to better understand cultural difference and collective humanity. In this course, we closely analyze James Baldwin's use of song names, creation of musician characters, and replication of musical elements in his writing. Baldwin's musical word play crosses historical and genre boundaries. So we will explore texts from his early to late career, such as the gospel music of his youth in the semi-autobiographical novel Go Tell It on the Mountain, the metaphor of the blues in the play written during the civil-rights movement Blues for Mr. Charlie, the jazz musician protagonist in "Sonny's Blues" written after World War II in Paris, and his only musical recording in A Lover's Question set down near the end of his life. In addition to closely analyzing James Baldwin’s attention to music throughout his literature, students will learn basic music writing and production skills. The tutorial will draw on a range of musical resources, including playlists, music workshops, guest lectures and performances. All of these resources will guide students to a more attuned hearing not only of music but also of the African American experience it reflects. By the end of the course, students will have written several short 1-2 page close analysis essays and song lyrics. For their final project, students will produce an original song based on key insights from the course. No musical experience is required, though an openness to learn and practice songwriting is expected.

Requirements/Evaluation: Several short 1-2 page close analysis essays of Baldwin's work, oral peer feedback presentations, song lyrics, and an original song composition for the final project

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: This course is specifically for first-year students and they will receive preference in this class; a statement of interest will be solicited from pre-registrants.

PHIL 127 (F)(S) Meaning and Value (WS)

What gives an individual life meaning? Pleasure? Success in fulfilling desires? Flourishing in ways distinctive to a rational agent or a human being (including, for example, developing rational capacities and self-mastery, succeeding in worthwhile projects, cultivating relationships, living morally, developing spiritually)? Can we be mistaken about how well our lives are going, or about what has value? What are the main sources of uncertainty here? Does the fact that our lives will end threaten their meaning? How can science contribute to our understanding of these issues? We'll examine these and related questions through historical and contemporary readings. This course aims to teach skills required for good philosophical thinking, including those involved in reading texts closely, reconstructing and evaluating arguments, articulating ideas clearly in discussion, and crafting well-structured and carefully-reasoned papers.

Class Format: Students will meet in trios for this tutorial. We will meet on a fixed weekly schedule agreed to by the instructor and participants.

Requirements/Evaluation: Four lead tutorial papers (5-6 pages in length), seven critiques (2 pages in length), and one rewrite.

Prerequisites: First-years and sophomores only.

Enrollment Limit: 12

Enrollment Preferences: First-years and sophomores, and students who need to fulfill their 100-level requirement for the philosophy major. This tutorial is an appropriate first course in PHIL.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: This tutorial meets the 100-level PHIL major requirement.

Distributions: (D2) (WS)

Writing Skills Notes: Each student will write a lead tutorial paper (5-6 pages in length) or a peer critique (2 pages) in alternating weeks. The instructor will provide timely comments on writing skills, with suggestions for improvement.

PHIL 213 (S) Biomedical Ethics (WS)

Much like the construction of medical knowledge itself, it is from specific cases that general principles of biomedical ethics arise and are systematized into a theoretical framework, and it is to cases they must return, if they are to be both useful and comprehensible to those making decisions within the biomedical context. In this tutorial we will exploit this characteristic of biomedical ethics by using a case-based approach to examining core concepts of the field. The first portion of the course will be devoted to developing and understanding four moral principles which have come to be accepted as canonical: respect for autonomy, beneficence, nonmaleficence, and justice. The remainder of the course will consider key concepts at the core of medical ethics and central issues for the field, such as privacy and confidentiality, the distinction between killing and "letting die," and therapy vs. research. To this end, each week we will (1) read philosophical material focused on one principle or concept, and (2) consider in detail one bioethics case in which the principle or concept has special application or relevance. In some weeks, students will be asked to choose from a small set which case they would like to address; in others the case will be assigned.

Requirements/Evaluation: bi-weekly papers, oral commentaries, and tutorial discussions

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: PHIL majors, PHLH concentrators, those who have a curricular need for the course, those who have been dropped from the course in previous semesters due to over enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and resubmit. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical
positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Spring 2025
TUT Section: T1    TBA     Julie A. Pedroni

PHIL 224  (S) Nietzsche, Marx and Freud  (WS)
Nietzsche, Marx and Freud have had a profound influence on literature, philosophy, and critical theories of the 20th and 21st centuries. In this tutorial we will treat them as diagnosticians of modernity who engaged in unveiling illusions and opening up possible alternative human futures. Each questioned the emancipatory effects of dominant understandings of reason and freedom as well as idealist and humanist accounts of moral progress in history; each aimed to liberate human beings from unnecessary suffering. We will focus on questions concerning their distinctive diagnostic and critical methods, the problems they identified, and their respective understandings of religion and and modern science.

Class Format: We may also meet in a seminar format once or twice during the semester.

Requirements/Evaluation: Bi-weekly papers, 2-3 page commentaries, and tutorial discussions.

Prerequisites: One of the following: 100-level Philosophy course or permission of instructor. Exposure to history of modern European philosophy and/or intellectual history will be very helpful.

Enrollment Limit: 10
Enrollment Preferences: Philosophy majors or prospective majors and students with background and interest in modern philosophy and critical theories more generally.

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (WS)

Writing Skills Notes: Students write five or six 5-6 page tutorial papers. Each will receive regular feedback to improve their ability to present clear, well-supported and engaging written arguments and interpretations.

Attributes: PHIL History Courses

Spring 2025
TUT Section: T1    TBA     Jana  Sawicki

PHIL 243  (S) The Philosophy of Higher Education: College Controversies  (WS)
What are the purposes of higher education? What are the purposes of liberal arts colleges in America? What should be the goals of Williams College? We will begin examining these questions by studying the history of some controversies in American higher education, and then turn to contemporary controversies such as campus free speech, cancel culture, divestment, decolonization, and admissions criteria.

Class Format: This course is a tutorial. Students will meet in pairs with the instructor one hour per week.

Requirements/Evaluation: A 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners' papers in alternate weeks

Prerequisites: none

Enrollment Limit: 10
Enrollment Preferences: I will be seeking a balance of interests and backgrounds; preference given to students who have taken at least one philosophy course

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (WS)

Writing Skills Notes: A 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners' papers in alternate weeks, and will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
PHIL 244  (S)  Environmental Ethics  (WS)

Cross-listings: ENVI 244

Secondary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature, among others. Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: five essays (5-7 pages each) and five prepared oral responses to partners’ essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 244(D2) PHIL 244(D2)

Writing Skills Notes: Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Attributes: ENVI Humanities, Arts + Social Science Electives  EVST Culture/Humanities  PHIL Contemporary Value Theory Courses

PHIL 272  (S)  Free Will and Responsibility  (WS)

Cross-listings: JLST 272

Primary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? We're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The key question, then, is whether, and how, agency is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Requirements/Evaluation: Six tutorial papers (5-6 pages in length) and five critiques (2-3 pages in length)

Prerequisites: one PHIL course (or permission of instructor; please email with any questions)

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 272(D2) JLST 272(D2)

Writing Skills Notes: Students will write a tutorial paper (5-6 pages in length) every other week, and a peer critique (2-3 pages in length) in alternating weeks, evenly spaced throughout the semester. The instructor will provide timely comments on writing skills, with suggestions for improvement.

PHIL 274 (F) Messing with People: The Ethics of Human Experimentation (WS)
The Tuskegee Syphilis Study and Stanley Milgram's Obedience experiments are infamous. Yet, other lesser known experiments are equally important landmarks in research ethics that continue to shape the design, conduct, and regulation of research involving human participants. In this tutorial we'll closely examine a series of contemporary and historical cases of human experimentation (roughly, one case per week) with an eye toward elucidating the moral norms that ought to govern such research. A number of conceptual themes will emerge throughout the course of the term, including notions of exploitation and coercion, privacy and confidentiality, and the balance between public interests and individual rights. The cases will be drawn from different domains of research, including clinical medicine, public health, social and behavioral sciences, and education. Specific issues are likely to include the ethics of placebo research; deception in research; studies of illicit/illegal behavior; genetic research; research involving social media; experimentation with children, pregnant people and fetuses; research involving persons with mental illness, justice and research with marginalized populations, among other topics.

Requirements/Evaluation: evaluations will be based on written work, on biweekly papers, oral commentaries, and tutorial discussions
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Philosophy majors (declared and prospective); Public Health concentrators (declared and prospective)
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and resubmit. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

PHLH 351 (F) Racism in Public Health (DPE)
Cross-listings: AAS 351

Primary Cross-listing
Across the nation, states, counties and communities have declared racism a public health crisis. This push to identify systemic racism as a high priority in public health action and policy is an important symbolic and political move. It names the faults of histories, systems and institutions but also brings to the spotlight the individual and community responsibility to dismantle racism in the US. In this tutorial, we will examine racism in public health policy, practice and research through an investigation of several mediums of evidence and information, ranging from peer reviewed literature to news editorials, podcasts and documentaries. We will explore specific pathways by which legacies of colonialism and racism function in various public health disciplines such as epidemiology, social & behavioral sciences, health policy and environmental health while also examining the dynamics of power
and history in research and community practice. We will take deep dives into issues on how health can be impacted by redlining, racist medical algorithms, racial trauma and stress and police violence, to name a few. Students will also have two opportunities to select their own case studies, as a way for you to research and learn about particular racial health issues that are of personal interest. This course is also about self-reflection and exploration of the ways in which our identities and lived experiences impact our understanding and perspective. We will gain skills in speaking across differences and articulation of how our own perceptions and lived experiences of race and racism impact our study of public health. This tutorial requires an openness to self-reflection and the practice of listening and articulation.

Requirements/Evaluation: bi-weekly tutorial papers, weekly journaling, oral commentaries and tutorial discussion

Prerequisites: PHLH 201 or instructor approval.

Enrollment Limit: 10

Enrollment Preferences: 1-Public Health concentrators. 2- Asian American Studies concentrators.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AAS 351(D2) PHLH 351(D2)

Difference, Power, and Equity Notes: In this course students will examine and critically examine the inequities and race based social and health injustices, and the ways racism infiltrates public health action and policy, both historically and currently. They will also refine their self reflection skills in understanding how their own positions of privilege and power, or lack thereof, inform their understanding of public health.

PHYS 402  (S) Applications of Quantum Mechanics  (QFR)

This course will explore a number of important topics in the application of quantum mechanics to physical systems, including perturbation theory, the variational principle and the semiclassical interaction of atoms and radiation. The course will finish up with three weeks on quantum optics including an experimental project on non-classical interference phenomena. Applications and examples will be taken mostly from atomic physics with some discussion of solid state systems.

Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 301

Enrollment Limit: 10 per sec

Enrollment Preferences: Physics and Astrophysics Majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course has weekly problem sets, all of which have a substantial quantitative component.

Spring 2025

TUT Section: T1 F 1:10 pm - 2:25 pm Betul Pamuk

PHYS 411  (F) Classical Mechanics  (QFR)

This course will explore advanced topics in classical mechanics. Central ideas include the calculus of variations, the Lagrangian and Hamiltonian formulations of mechanics, phase space, central-force motion, non-inertial reference frames (including implications for physics on a rotating Earth), rigid-body rotations, and non-linear dynamics & chaos, with additional topics from continuum and fluid mechanics as time permits. Numerical and perturbative techniques will be developed and used extensively. We will also examine the ways in which classical mechanics informs other fields of physics. In addition to weekly tutorial meetings the class will meet weekly as a whole to introduce and discuss new material.
Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, a final project, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 309

Enrollment Limit: 30

Enrollment Preferences: majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: weekly problem sets requiring substantial quantitative reasoning using analytical and numerical methods.

Fall 2024
TUT Section: T1   F 1:10 pm - 2:25 pm   Katharine E. Jensen, Frederick W. Strauch

PSCI 160  (F) Refugees in International Politics  (DPE) (WS)

Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be--how a crisis can be chronic, and for whom this chronic crisis is a solution. We investigate who refugees are, in international law and popular understanding; read refugee stories; examine international and national laws distinguishing refugees from other categories of migrants; evaluate international organizations' roles in managing population displacement; look at the way that images convey stereotypes and direct a type of aid; consider refugee camps in theory and example; and reflect on what exclusion, integration, and assimilation mean to newcomers and host populations. In whose interest is the prevailing system? Who might change it, and how?

Requirements/Evaluation: Ten essays: five lead, five response. The first two weeks’ essay grades will be unrecorded.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, to be selected randomly from list of those enrolled.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: In addition to writing every week, students will have a chance work on specific skills cumulatively.

Difference, Power, and Equity Notes: This course examines the way in which home states categorize people and oppress some, producing refugees; the way that host states categorize people and oppress some, using immigration to shore up the prevailing ethnic hierarchy; and why we worry about some of these categories of oppression more than others.

PSCI 259  (S) George Orwell: Capitalism, Socialism and Totalitarianism

It is hard to overstate the enduring influence of George Orwell on political discourse in the 20th century and beyond. Before his death in 1950 at the young age of forty six, Orwell produced a stunningly large and diverse body of work in the fields of journalism, literature, and political commentary. Much of this work was inspired by his own experiences as a police officer in Burma, several years working and traveling with destitute workers in England and France, as well as his experiences fighting against fascism during the Spanish Civil War in the late 1930s. While a fairly obscure and struggling author for much of his life, Orwell achieved worldwide fame after the Second World War with the publication of Animal Farm (1945) and 1984 (1949). This tutorial has two main objectives. First, it will introduce students to Orwell's most important books and essays in the context of a turbulent political era marked by the Great Depression, the rise of totalitarianism, world war, and the emerging Cold War. Second, the tutorial will examine the past and ongoing uses and abuses of Orwell's legacy by scholars and analysts on both the political left and the right. As Louis Menand argues, "almost everything in the popular understanding of Orwell is a distortion of what he really thought and the kind of writer he was." The course
will conclude by examining what Orwell's thought contributes to a consideration of current issues ranging from the emergence of cancel culture to the possibilities of democratic socialism in the 21st century.

**Requirements/Evaluation:** 4 lead essays of 5-6 pages and 4 response essays of 2 pages.

**Prerequisites:** At least one introductory political science course.

**Enrollment Limit:** 10

**Enrollment Preferences:** Declared and prospective political science majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** This course could also be listed in other subfields.

**Distributions:** (D2)

**PSCI 290 (F) How Change Happens in American Politics (WS)**

**Cross-listings:** LEAD 290

**Primary Cross-listing**

An unprecedented assault on the U.S. Capitol, the rise of white nationalism, a pandemic, economic volatility, racial reckoning, the overturning of Roe v. Wade, and rapidly evolving environmental crises -- American politics in the last four years has been tumultuous. What might we expect to come next? From the Founding to the present, the American political order has undergone cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably stable and enduring. How can this be? Where do we find continuities and where upheavals? Who or what has been responsible for the continuities, and who or what for the changes? What sorts of transformations have been possible, and why -- what marriage of individual action and contextual factors have created political change in the past and in the present? Finally, what are the costs of change (and of continuity) -- and who pays them? In this tutorial, we assess American political change, or lack of, to gain a sense of the role that political leaders have played in driving change. We examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including war, economic developments, demographic change, and constitutional and institutional practices. We consider general models of change, as well as specific case studies, including civil rights and social justice for racial and ethnic groups, gender equality and family relations, and reactionary or traditionalist politics. Finally, we will look at arguments that America has been "exceptional" -- or, unlike other countries -- as well as critiques of these arguments to help us gain an understanding of future prospects for political transformation.

**Requirements/Evaluation:** participation in weekly meetings as well as 4 lead essays (5-6 pages) and 4 critiques (2 pages)

**Prerequisites:** one prior course in political science

**Enrollment Limit:** 10

**Enrollment Preferences:** Declared and prospective Political Science majors and Leadership Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LEAD 290(D2) PSCI 290(D2)

**Writing Skills Notes:** Extensive written feedback will be provided on tutorial essays and critiques. Additionally, the tutorial sessions will include attention to the quality of the written argument in the paper that is the focus of each session. At the end of the semester, students will be required to revise one of the tutorial papers incorporating the feedback, oral and written, provided by their tutorial partner and the instructor.

PSCI 326 (S) The Cyber Revolution  (WS)
This is a course about how the advent of digital technologies, and especially those related to cybersecurity, have reshaped international politics, as well as how they might affect the world order in the future. At its most basic level, it addresses a question that is of fundamental importance to both scholars and policymakers alike: Have cyberweapons and digital technologies revolutionized the way that international politics works, in a manner similar to the impact that nuclear weapons have had on the international system since 1945? Specifically, the course will focus on what is known as the "theory of the cyber revolution"; threats to critical infrastructure; the most significant cyberattacks that have occurred to date, namely, the US-Israeli Stuxnet attack on Iran's nuclear facilities in 2006-2010 and Russia's NotPetya attack on Ukraine in 2017; zero-day markets; information warfare and its effects on, respectively, authoritarian and democratic political systems; and the role that critical information technologies--such as advanced semiconductors, quantum computing, and artificial intelligence systems--might play in the evolution of international security competition in future decades.

Requirements/Evaluation:  Biweekly analytical essays, biweekly critiques, final paper, class participation
Prerequisites:  PSCI 120
Enrollment Limit:  10
Enrollment Preferences:  Preference given to PSCI majors, especially those concentrating in the international relations subfield
Expected Class Size:  10
Grading:  no pass/fail option, no fifth course option
Distributions:  (D2)  (WS)
Writing Skills Notes:  Students will be writing biweekly analytical essays, biweekly critiques of their partner's work, and a final paper. Moreover, they will be providing peer review of one another's work throughout the semester.

PSYC 319 (S) Neuroethics  (WS)
Cross-listings:  STS 319 / NSCI 319
Primary Cross-listing
Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation:  six 5-page position papers and five 2-page response papers as well as participation in discussions
Prerequisites:  PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor
Enrollment Limit:  10
Enrollment Preferences:  Psychology majors and Neuroscience concentrators
Expected Class Size:  10
Grading:  no pass/fail option, no fifth course option
Distributions:  (D3)  (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
PSYC 319(D3) STS 319(D2) NSCI 319(D3)
Writing Skills Notes:  In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
Attributes:  NSCI Group B Electives   PSYC Area 1 - Behavioral Neuroscience
REL 281 (F) Religion and Science

Cross-listings: STS 281

Primary Cross-listing

In the last few years the deniers of religion such as Dennett and Dawkins have forcefully argued that recent scientific developments show the degree to which religion is irrelevant to a modern understanding of what it means to be human. Atran and Boyer have made a similar case, arguing that recent progresses in our understanding of human cognition demonstrate that religion is a purely natural phenomenon that has little if any value for human development. Theologians such as Haught and Polkinghorne have rejected these views, arguing that a proper understanding of scientific developments such as evolution and quantum mechanics suggests religiously relevant views of the universe and our place therein. This course considers these competing perspectives while offering critical reflections on the views and categories involved in these controversies. We also examine the works of reflective naturalists such as Bellah and Herrstein, who argue that far from showing the irrelevance of religious ideas and practices, the new mind and life sciences suggest a much more nuanced view according to which religion is both grounded in the natural world and central to the development of human culture. Hence, it cannot be easily discounted as irrelevant to a scientifically informed understanding of what it means to be human.

Requirements/Evaluation: tutorial format, one paper every two weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference for religion majors or future religion majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 281(D2) REL 281(D2)

REL 284 (F) From the Battlefield to the Hermit's Cell: Art and Experience in Norman Europe (WS)

Cross-listings: WGSS 284 / ARTH 218

Secondary Cross-listing

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans—a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries—each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects—an embroidery, a building, and a book—give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.
Requirements/Evaluation: Participation in discussion; five 4-5-page tutorial papers; five 1-2-page response papers.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: First years and sophomores, but open to all.

REL 291 (F) Religion and Ecology in America (WS)

Cross-listings: ENVI 291 / SOC 291

Secondary Cross-listing
This course examines the relationship between religious and environmental thought in American cultural history. Exploring a broad range of practices, stories, and beliefs, we will examine the spiritual roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have religious writers, thinkers, and artists shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorism, Catholic climate activism, Jewish eco-mysticism, atheist biological theory, Buddhist eco-spirituality, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 291(D2) REL 291(D2) SOC 291(D2)

Writing Skills Notes: Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

TUT Section: T1 TBA Nicolas C. Howe

REL 353 (S) Disinterest in the Bhagavad Gita
Cross-listings: ENGL 353 / COMP 313 / ASIA 351

Secondary Cross-listing

In this course, students will read the Bhagavad Gita alongside selected responses to it. These responses range from philosophical and theological commentaries written in Sanskrit by Shankaracharya, Abhinavagupta, and Ramanuja, to later "Bhakti" poetic responses in other Indian languages, to 18th and 19th century European aesthetic and political commentary (Herder, Schlegel, Hegel), to the work of 20th century commentators like M.K. Gandhi, B.G. Tilak, B.R. Ambedkar and D.D. Kosambi. We will examine the Gita's theory of action and the place of disinterest in this theory. We will inquire into the social, metaphysical, and political conditions of possibility of such disinterestedness, and think about disinterestedness itself as a condition for political action and aesthetic experience. Finally, we will reflect on how such a comparative history of interpretation might help us model a dialectical history of thought.

Requirements/Evaluation: Weekly meetings, weekly reading; weekly essay or response. Attendance in 2-3 lectures over the semester.

Prerequisites: No prerequisites

Enrollment Limit: 10

Enrollment Preferences: Majors in English and Comparative Literature; Religion, Classics, or Philosophy majors; Sophomores looking to major in any of these.

Expected Class Size: 8-10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

RLFR 330 (S) Unveiling Herstory: Heroines of the Francophone Enlightenment (DPE)

On May 10, 2022, Paris unveiled the first statue of a black woman, Solitude, an emblematic figure of courage and resilience in the eighteenth-century fight against slavery in Guadeloupe. Against the backdrop of the contemporary French movement wherein statues of Enlightenment thinkers like Diderot, Rousseau, and Voltaire have been vandalized and sparked intense debates on memory and politics, Solitude's recognition adds a profound dimension. Once revered as iconoclastic and progressive these male figures have in recent years been scrutinized for perpetuating ideals associated with white male hegemony, challenging conventional notions of freedom and equality. This tutorial invites students to reevaluate the Enlightenment movement, navigating beyond traditional narratives centered around male figures like Voltaire and Rousseau. It explores the transformative era post-French Revolution, shining a spotlight on the exceptional contributions made by women who defied societal norms within the eighteenth-century francophone world. Adopting a global perspective, the course not only examines events in France but also delves into its former colonies, particularly Haiti and Guadeloupe. By scrutinizing literary and ethnographic texts, as well as visual imagery, the course unravels the stories of remarkable women like Charlotte Corday, a key influencer during the Reign of Terror, and Sanité Belair, an active participant in the Haitian Revolution. The overarching goal is to underscore the significant roles and contributions of these women, often marginalized in historical narratives. Moreover, the course addresses the impact of archival gaps, shedding light on how the destruction of judicial archives by the French in their former colonies has shaped the remembrance of figures like Solitude and Belair.

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course examines the history of slavery and French colonialism. It also explores issues of female empowerment, racism, social justice and equity.
RUSS 348 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WS)

Cross-listings: GBST 348 / SOC 348

Secondary Cross-listing

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their post-socialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as Russia’s invasion of Ukraine, or the lingering tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Ukraine and Russia, but will also read comparative studies, as well as works on East Germany and Georgia. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the post-socialist condition.

Requirements/Evaluation: 5-page paper every other week, written comments on the partner’s paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 348(D2) RUSS 348(D1) SOC 348(D2)

Writing Skills Notes: This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

Difference, Power, and Equity Notes: Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

SOC 291 (F) Religion and Ecology in America (WS)

Cross-listings: ENVI 291 / REL 291

Secondary Cross-listing

This course examines the relationship between religious and environmental thought in American cultural history. Exploring a broad range of practices, stories, and beliefs, we will examine the spiritual roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have religious writers, thinkers, and artists shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biological theory, Buddhist eco-spirituality, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their

STS 281 (F) Religion and Science

Cross-listings: REL 281

Secondary Cross-listing

In the last few years the deniers of religion such as Dennett and Dawkins have forcefully argued that recent scientific developments show the degree to which religion is irrelevant to a modern understanding of what it means to be human. Atran and Boyer have made a similar case, arguing that recent progresses in our understanding of human cognition demonstrate that religion is a purely natural phenomenon that has little if any value for human development. Theologians such as Haught and Polkinghorne have rejected these views, arguing that a proper understanding of scientific developments such as evolution and quantum mechanics suggests religiously relevant views of the universe and our place therein. This course considers these competing perspectives while offering critical reflections on the views and categories involved in these controversies. We also examine the works of reflective naturalists such as Bellah and Herrstein, who argue that far from showing the irrelevance of religious ideas and practices, the new mind and life sciences suggest a much more nuanced view according to which religion is both grounded in the natural world and central to the development of human culture. Hence, it cannot be easily discounted as irrelevant to a scientifically informed understanding of what it means to be human.

STS 319 (S) Neuroethics (WS)

Cross-listings: PSYC 319 / NSCI 319

Secondary Cross-listing

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation: six 5-page position papers and five 2-page response papers as well as participation in discussions

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Psychology majors and Neuroscience concentrators

**THEA 109 (S) The Art of Yoga: Practice, Philosophy, Politics, Possibilities  (DPE)**

**Cross-listings:** ASIA 109

**Primary Cross-listing**

This course offers an immersive, interdisciplinary approach to hatha yoga, the branch of yoga that emphasizes bodily techniques for channeling energy, and achieving balance and quietude. It has been practiced and theorized variously in South Asia since ancient times. More recently, beginning in the late 19th century, it has been popularized throughout the globe, and has served as a source of inspiration for artists in various disciplines, including the theatre. Our work will follow four interrelated paths that will provide a broad context for our own experience and offer us tools for developing creativity: 1) We will dedicate ourselves to the careful study of the physical practice of yoga asanas, giving emphasis to biomechanical principles of alignment. Our study will include some basics of yoga anatomy; 2) We will study some allied philosophical principles, as they emerge from the Sanskrit text, Patanjali's *Yoga Sutras*, and some current commentaries on that text, by means of expanding the significance of our practice to all areas of our lives; 3) We will attend to the cultural politics of yoga by discussing new scholarship on its ancient origins as well as critical inquiry about how issues of appropriation, Orientalism, and racism shape its current manifestations; 4) We will examine how artists have incorporated elements of yoga into their practice. To explore how yoga might support our own artistic and innovative thinking, we will pair our practice with creative exercises. In this way, the course aims to explore the relationship of theory and practice. It will be of interest to students in the arts and anyone interested in fostering artistry and the imagination. Students must be prepared to engage in a physical practice of asana, as well as commit to reading, writing, and discussion. No previous experience with yoga is required.

**Requirements/Evaluation:** Students will write 3-page weekly papers, either in response to readings or embodied exercises, or the tutorial partner's essay. Written feedback will be given by instructor. Students will be expected to demonstrate that they are regularly practicing outside of class both by the quality of questions they bring to our sessions together, as well as their continuous refinement of the poses. Students will not be evaluated in relation to a standard, but according to their own dedicated and steady progress with respect to the experience of yoga practice. The evaluation process includes attendance.

**Prerequisites:** Prospective students will be asked to submit an online form with questions about their interest in the class.

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference will be given to first-year students.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $50 for yoga mat, belt, and balls.

**Distributions:** (D1)  (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

THEA 109(D1)  ASIA 109(D1)

**Difference, Power, and Equity Notes:** Throughout the course we will reflect on the ways in which the knowledge created through yogic practice and philosophy disrupts and provincializes European epistemological systems. Moreover, we will engage in critical inquiry into the ways in which the global popularity of yoga is shaped by colonial legacies of Orientalist representation, as well as contemporary modes of cultural appropriation and consumerism.

**WGSS 206 (S) Narrating Color: Black Women Sing and Write About Complexion**
Cross-listings:  AFR 202 / COMP 236

Secondary Cross-listing

Colorism, skin color discrimination where light skin is privileged over dark skin, is not a new phenomenon, but globally entrenched in our society and one of the many vestiges of white supremacy. For Black Americans of all backgrounds, colorism is a familiar and a living legacy concretized by the institution of slavery in the Americas. Although some believe that we are "post-color," similarly to those that naively believe we are "post-race," one can look to the recent example of misogynoir (misogyny directed at Black women) and skin color politics that Meghan Markle, the Duchess of Sussex, has faced at the hands of the British Monarchy, that her light-skinned color, biraciality, and class privileges couldn't protect her from. Alternatively, we can look at the numerous examples of colorism and anti-Black racism that tennis icon Serena Williams is subjected to because of her dark-brown skin complexion and body shape. One cannot fully understand the issue of colorism without understanding that it is an outgrowth or an extension of anti-Black racism firmly rooted in white supremacy, and so insidious that it impacts all aspects of Black life. Examining colorism through literary texts and music, provides a depth of understanding that both compliments and expands these empirical studies. Literature and music provide the narratives and rhythm that paint a vivid picture of the many ways that colorism impacts the lives of Black people. Through the methods of literary and rhetorical criticism we will examine the works of five Black women authors and music artists that take up issues around colorism and passing. We will explore, Toni Morrison's, The Origins of Others (2017), Brit Bennett's, The Vanishing Half (2020), Tressie McMillian Cottom's, Thick (2019), Marita Golden's, Don't Play in the Sun (2004), Yaba Blay's, One Drop: Shifting the Lens on Race (2021), Nina Simone's, "Four Women" (1966) and "Young, Gifted and Black" (1958), Sara Martin's, "Mean Tight Mama" (1927), India.Arie's, "Brown Skin" (2001), Azealia Banks' "Liquorice" (2012), and Beyoncé's "Creole" (2012), "Formation" (2016) and "Brown Skin Girl" (2020). By examining colorism in both literature and music, it will give first year students a foundational and nuanced understanding of skin tone bias and equip them with the tools to critically engage literary and music texts.

Requirements/Evaluation:  Three, short papers (4-5 pages) discussing aspects of the readings and songs; three response papers to tutorial partner's papers (2 pages long); two, video essays; two, Twitter threads explaining aspects of one of the books and one of the songs; and a curated playlist of songs that would serve as accompaniment to one of the texts from the class.

WGSS 284 (F) From the Battlefield to the Hermit's Cell: Art and Experience in Norman Europe  (WS)

Cross-listings:  REL 284 / ARTH 218

Secondary Cross-listing

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans--a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries--each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that
through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects—an embroidery, a building, and a book—give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.

**Requirements/Evaluation:** Participation in discussion; five 4-5-page tutorial papers; five 1-2-page response papers.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** First years and sophomores, but open to all.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 284(D2) REL 284(D2) ARTH 218(D1)

**Writing Skills Notes:** In this tutorial, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 5-7-page papers they will submit, with suggestions for improvement.

Fall 2024

TUT Section: T1 TBA Peter D. Low
THE PROGRAMME

Williams College offers a year-long program of studies at Oxford University in cooperation with Exeter College (founded in 1314), one of the constituent colleges of the University. Williams students will be enrolled as Visiting Students at Exeter and as such will be undergraduate members of the University, eligible for access to virtually all of its facilities, libraries, and resources. As Visiting Students in Oxford, students admitted to the Programme will be fully integrated into the intellectual and social life of one of the world’s great universities.

Although students on the Programme will be members of Exeter College, entitled to make full use of Exeter facilities (including the College Library), dine regularly in Hall, and join all College clubs and organizations on the same terms as other undergraduates at Exeter, students will reside in Ephraim Williams House, a compound of four buildings owned by Williams College, roughly 1.4 miles north of the city center. Up to five students from Exeter College will normally reside in Ephraim Williams House each year, responsible for helping to integrate Williams students into the life of the College and the University. A resident director (and member of the Williams faculty) administers Ephraim Williams House, oversees the academic program, and serves as both the primary academic and personal advisor to Williams students in Oxford.

Students enroll for the full academic year, which consists of three eight-week terms of instruction: Michaelmas Term, Hilary Term, and Trinity Term. Students are expected to be in residence to write their first tutorial papers in the week before the eight weeks of instruction begin (0th Week) and to remain in residence during the week after the term ends (9th Week) in order to sit final examinations. Between the three terms there are two intervening five week vacations, during which students may be expected to continue reading as preparation for their upcoming tutorials. Students are required to arrive in Oxford for Programme orientation.

Students on the Williams-Exeter Programme are required to be in residence in Oxford for three full terms. (They may be away during the vacation breaks between the terms.) Any student who departs early from Oxford without Faculty Director’s written permission (given only in truly exceptional, unpredictable situations), will not receive term credit, even if the student submits all required work prior to departure.

For more general information on the Williams-Exeter Programme, go to exeter.williams.edu.

THE TUTORIAL SYSTEM

Undergraduate instruction at Oxford University is largely carried out through individual or small-group tutorials, in which a student meets weekly with their tutor to present and discuss an essay they have written, based on an extensive amount of reading undertaken from an assigned reading list received at the beginning of each term. In addition to the weekly tutorial, students are strongly encouraged to attend a course of lectures offered by the University that corresponds to the material being addressed in the tutorial. The lectures, however, may be offered in a term different from the one in which the student is taking the tutorial. For that reason, students are encouraged to obtain early in their first term, from the relevant faculty (department), the complete list of lectures planned for the academic year.

Each student will plan a course of study for the three terms of the academic year in consultation with the director of the Programme. In their capacity as the Tutor for Visiting Students at Exeter College, the director, working closely with Exeter’s subject tutors, will arrange the teaching for the students, monitor student progress, be in regular contact with the student’s tutors, supervise the examinations that students sit at the end of each academic term, and report on each student’s academic progress to the Senior Tutor at Exeter College.

There are no “add/drop” periods at Oxford; once a student has made a commitment to a particular tutorial course, and the director has then secured a tutor to teach that course, students cannot back out or change the terms of the tutorial. All tutorials at Oxford are graded.

Students are required to enroll in two tutorial courses during Michaelmas term and two tutorials during Hilary Term (each consisting of eight individual tutorial meetings and generally requiring the preparation of eight essays). During Trinity term, students may choose to enroll in either one or two tutorial courses. Although some students take the minimum of five tutorial courses, most have enrolled in two tutorials per term for a total of six tutorials over their time at Oxford.

GRADUES AND CREDIT

Grades for each tutorial course reflect the work done in all eight tutorial sessions, including their related essays, considered together, as well as the grade for the final examination. Tutorial essays and discussions are typically not assigned a specific grade. Final examinations last three hours and are always sat in the ninth week of term, following the eight weeks of instruction. For some tutorial courses, tutors may elect to offer the student the option of a final paper or project in lieu of an examination or may decide that the final project or examination is not necessary. This decision is made by each tutor, and is not a subject of negotiation.
Upon satisfactory completion of the requirements for the Williams-Exeter Programme at Oxford University, students receive academic credit for a regular Williams academic year, with each eight-session tutorial (plus final examination, if required) counting as the equivalent of 1.6 regular semester courses taken at Williams. Grades eventually become a part of their Williams transcript and will be included in the computation of Grade Point Average. There is no Pass/Fail option for Oxford tutorials.

Tutorial courses in Oxford may be used toward fulfilling the divisional distribution requirement; a student may earn a maximum of three distribution requirements, with no more than one from each division, for the year. All tutorial courses at Oxford meet the Williams College “Writing Intensive” designation, except for those in the studio arts, mathematics, and the natural sciences.

Tutorial courses in Oxford may also be used to meet major requirements. Students are encouraged to check with their department chair(s) to confirm official department policy.

THE COURSE OF STUDY

In addition to the opportunity to pursue British and Commonwealth Studies, Williams students in Oxford will be able to pursue tutorials in fields in which Oxford is particularly noted (Economics, English Literature, Mathematics, Modern History, Philosophy, Politics, Classics, Theology, the Natural Sciences, etc.). Exeter College also has fellows that are committed to teaching Williams students in three fields: English Language and Literature (with a focus on English literature, 1550-1830 and interests in the rise of the novel and women’s writing); History (with interests spanning the areas of Atlantic World, Global, Imperial, early American, Latin American and Caribbean History); and Medical Law and Ethics (with interests in ethics and regulation of emerging technologies such as gene drive and use of artificial intelligence in medical care).

Tutorial courses are not offered every term, and are often accompanied by lectures scheduled in a different term. It is therefore imperative that students consult the relevant Faculty (departmental) webpages to make sure when the lectures and/or tutorials they wish to take are actually offered. Sometimes, where appropriate, prerequisites are also listed.

It must be noted that study in the sciences is not normally accompanied by laboratory work; science majors seeking major credit for tutorials in the sciences should discuss this situation with their major advisors. Students interested in learning more about the possible courses of study available at Oxford should contact the Director of International Education and Study Away.

A full summary of the list of courses offered by subject can be found at: ox.ac.uk/admissions/undergraduate/courses/course-listing. Detailed descriptions of all the courses listed can be found on the websites of respective departments or faculties the links of which can be found at: ox.ac.uk/about/departments-a_z.

NON-CREDIT FOREIGN LANGUAGE STUDY

In addition to their regular tutorial courses, students may begin or continue the study of a wide range of foreign languages on a non-credit basis through a variety of arrangements available through the University as well as a number of other educational and cultural institutions in the city of Oxford. Students may put funds from their Programme Cultural Subsidy towards such study.

APPLICATION

Admission to the Programme is competitive. Students must apply to the The Office of Global Education and Study Away by the prescribed deadline (January 15th) and, prior to applying, should consult with the department or program chair of their intended major(s). Any questions students might have about curricular offerings at Oxford can also be raised with the director of the Programme in Oxford.

In addition to completing the formal application form, students can expect to be interviewed at Williams and will subsequently need to complete an application for Visiting Student status at Oxford University. All admissions to the Programme are subject to approval by Exeter College. Students can expect to be notified of acceptance before Spring Break. It is normally expected that they will have completed the College’s distribution requirement by the end of their sophomore year. In making its decisions, the Admissions Committee of the Williams-Exeter Programme at Oxford University takes student GPA into account, with a general expectation of a minimum GPA of 3.5. More importantly, we expect all applicants to have demonstrated capacity for rigorous independent work and extensive essay writing, and look favorably on those students whose intellectual maturity, curiosity and enthusiasm would best prepare them for a demanding course of study in Oxford. All applicants must identify two Williams faculty members who are willing to provide references. Because of the emphasis at Oxford on weekly written work for each tutorial course, at least one of those faculty members should be able to offer an assessment of the applicant’s writing ability.
WILLIAMS-MYSTIC: The Coastal and Ocean Studies Program invites students to experience a life-changing semester— not only on land and sea, but wherever their curiosity takes them. Whether it’s studying biodiversity off the coast of California, the impacts of climate disaster, or the depths of our humanity in ocean literature. Williams-Mystic students embark on the exploration of a lifetime. Biology students bond with filmmakers, mathematicians with anthropologists, English majors with chemists. We take to the open sea for a week, hit the road on the Pacific and Gulf Coasts, and explore the wonders of Mystic Seaport Museum and coastal New England.

Each semester, 20 college students travel to Mystic, CT, for a one-semester interdisciplinary investigation of our coasts and oceans. They live and study on the grounds of the Mystic Seaport, the world’s largest maritime museum while conducting original, hands-on research and traveling across the country to examine life in coastal communities. Students build strong relationships with each other and the places they inhabit, both in Mystic and throughout our field seminars. In addition to four academic courses, students take a maritime skills course—such as blacksmithing, woodcarving, or sailing and navigation—taught by the museum’s expert craftspeople. Students live on the museum grounds, co-op style, in one of five historic homes equipped with modern amenities. There they live, cook and create lifelong memories together.

Williams-Mystic’s curriculum contributes to an educational experience that is both interdisciplinary and immersive. Each semester, the faculty collaborate so that all coursework becomes part of the big picture, showing the ways our coasts and oceans are connected across multiple disciplines. Students attend regular weekly classes, panels featuring scholars and industry professionals, and hands-on day trips to locations around New England. Students produce independent research in all four courses, which provides the opportunity to draw on interests or discover new passions that might turn into a career. We dig into the archives for history, delve into tidepools for science, and speak with leaders and stakeholders for policy class. In addition to their time in Mystic, students travel to different coasts across America, spending three to four weeks taking their studies off the page and meeting with community leaders.

Open to sophomores, juniors, and seniors, a semester at Williams-Mystic includes credit for one semester plus one winter study requirement, writing skills course credit, DPE requirement, and physical education credit. Four Williams courses are offered: Americans and the Maritime Environment, Ocean Literacy, Marine Policy, and either Marine Ecology or Oceanographic Processes. Williams-Mystic seeks candidates who are willing to try new things and work in a compelling academic environment. No sailing experience necessary. Participation in Williams-Mystic can also be used in partial fulfillment of the Coastal and Ocean Studies Concentration at Williams. Admission is competitive, and interested students should email wmadmissions@williams.edu, call 860-572-5359, or visit the Williams-Mystic site.

BIOL 231 (F)(S) Marine Ecology

Cross-listings: CAOS 311

Secondary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.
Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course is only offered through Williams-Mystic Coastal and Ocean Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

CAOS 210 (F)(S) Oceanographic Processes

Cross-listings: GEOS 210

Primary Cross-listing

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control global climate. We will emphasize societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: Flipped classroom will focus on active learning using data-based exercises. Mini-symposia will involve student research and discussion.

Requirements/Evaluation: graded lab exercises, mini-symposium participation, and a research project

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: none

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is taught at our Mystic Seaport campus. Students must be enrolled in the Williams-Mystic Coastal and Ocean Studies Program.

CAOS 231  (F)(S)  Literature of the Sea  (DPE)
Cross-listings:  ENGL 231

Primary Cross-listing

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery—an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

Prerequisites: N/A

Enrollment Limit: 25

Enrollment Preferences: Williams-Mystic Students only

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
CAOS 231(D1) ENGL 231(D1)

Difference, Power, and Equity Notes: This course focuses on the range of cultural perspectives about the sea, as well as the ways those perspectives can unsettle and challenge dominant narratives about the sea and its role in colonial expansion. Furthermore, this course centers voices that are typically overlooked in the genre of "Sea Literature," paying particular attention to Indigenous and African-American narratives about the ocean.

---

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut
Expected Class Size: 22  
Grading: no pass/fail option, no fifth course option  
Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut  
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:  
PSCI 319(D2) ENVI 351(D2) CAOS 351(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

CAOS 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352

Primary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352(D2) CAOS 352(D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.
ENGL 231  (F)(S)  Literature of the Sea  (DPE)

The Program in Teaching offers a coordinated cluster of courses, advising and field work that give students the opportunity to study the ideas, questions, and practices involved in good teaching at all levels. The Program seeks to promote and facilitate an exchange of ideas about teachers, learners, and schools, within and beyond the Williams campus. The Program offers a range of opportunities including courses on education, intensive supervised student teaching, workshops, advising, lecture series, and ongoing peer groups for those who teach.

Students may participate in a variety of ways, ranging from taking one course to a sustained in-depth study of teaching and learning geared to those who want to become teachers or educational psychologists. We seek to connect students with one another, to bring in expert teachers to provide mentoring, and to create links across the curriculum so that students can see the vital connections between what they study (French, Algebra or Biology, for example) and the process of teaching those topics to elementary and high school students. The Program is open to any student interested in education and offers opportunities for all levels of interest, including those who want to find out about certification and graduate study.

No specific major is required to participate—although some lend themselves easily to certification, such as Mathematics, English, Biology, American History, or French, almost all of our majors can provide the basis of teacher certification. Alternately, students can major in Psychology, take a concentration of courses in a different field, and then pursue that content area more intensively in graduate work. More information can be found at program-in-teaching.williams.edu.
Community Learning in Action

CLIA, short for Community Learning in Action, are courses involving some form of community-engaged learning.

CLIA 24 (W) Class of 1959 TeachNYC Urban Education Program
SPEC 24 Class of 1959 TeachNYC Urban Education Program Students in this course learn about the front-line challenges of urban public education by working in one of New York City's public schools. Participants engage in a full day's program of observing, teaching, tutoring, and mentoring in their choice of more than 20 different school situations from elementary through high school. Each participating school will have a resident supervisor to meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in the discussions, keep a journal, and write a 5-page paper reflecting upon their experience. The course will conduct orientation meetings with students before January, matching each student's interest with appropriate teaching subject areas and a host school. Dormitory-style housing is provided along with some assistance with transportation and a $400 stipend for food. Further help is available for financial aid students. Interested students must 1) attend the course info session in early October or contact the Instructor (tf1@williams.edu) and 2) submit a statement of interest sharing a) why they are interested in the program and b) describing relevant experience (e.g., tutoring, teaching, coaching, camp counselor work, etc.). The statement must be emailed to Program Director Tracy Finnegan (tf1) by October 13th.

Requirements/Evaluation: Short paper and final project or presentation.
Prerequisites: Send Statement of Interest to the Instructor by October 13th
Enrollment Limit: 10
Enrollment Preferences: seniority
Expected Class Size: NA
Grading: pass/fail only
Materials/Lab Fee: $400
Attributes: EXPE Experiential Education Courses
Not offered current academic year

Winter Study ---------------------------------------------------------------

CLIA 11 (W) Teaching 3rd Graders about Zebrafish - BioEYES
BioEYES brings tropical fish to 3rd-grade classrooms in Williamstown, Lanesborough, and North Adams Elementary schools, in a science teaching workshop. Elementary school students will breed fish at the school, then study their development and pigmentation for one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, work with classroom teachers to introduce concepts in genetics and development, help the 3rd-grade students in the classroom, and assess elementary student learning. No zebrafish experience or science expertise is necessary. All training is provided. During the first week, Williams students will learn to set up fish matings and review BioEYES lesson plans on embryonic development and the genetics of fish pigmentation. In small groups, students will practice teach hands-on experiments using living animals. In the subsequent three weeks, students will present lessons at the schools and review assessment data. Time commitment: Week 1 - approx. 6 hours total for program training and lesson preparation with additional outside-of-class time needed to create teaching posters, dates, and times TBD Weeks 2 & 3 - approx. 3 hours per day, times TBD, dependent on elementary school schedules during the regular school day between 8:30 am and 3:00 pm. Week 4 - TBD; 3 hours per day if running a school program; minimal hours if not running an elementary school program.

Requirements/Evaluation: Presentation(s)
Prerequisites: None
Enrollment Limit: 14
Enrollment Preferences: Preference given to first years.
Expected Class Size: NA
Grading: pass/fail only
Unit Notes: Jennifer Swoap, a former 3rd-grade teacher, oversees Williams Elementary Outreach, where over 150 Williams students teach, tutor,
and mentor in five local elementary schools. Renee Schiek currently serves as the liaison between Lanesborough Elementary School and the Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. She has a BS in Mechanical Engineering.

**Attributes:** EXPE Experiential Education Courses

Not offered current academic year

**CLIA 21 (W) Introduction to Engaged Scholarship**

Would you like to develop or refine a community project idea and get help finding the resources to make it happen? If so, this course is for you! You will learn from Community Outreach Fellows who’ve run successful projects and get strategic and logistical help for your ideas from Center for Learning in Action staff. Along the way, you will learn more about the Berkshires and pick up some useful skills through workshops on active listening, web editing, video, and Canva. In this course, students learn the basic principles of community-engaged scholarship while developing a short-term partnership project with a community organization. Engaged scholarship is understood as mutually beneficial learning partnerships between higher education institutions and community entities addressing pressing social and civic issues. Through a few brief readings, class discussions, and meetings with CLiA staff, student leaders, and community partners, students learn the history and context of engaged scholarship, explore the associated ethical, political, and cultural issues, and improve their understanding of the Berkshires and town/gown relations. This seminar-style course is led by Center for Learning in Action Director Paula Consolini, with co-instruction by CLiA Community Outreach Fellows Emily Flores and Monica Wheeler, who will share their work and insights. Project options include creating a healthcare consumer protection video or flyer, designing financial literacy resources, promoting the restoration of passenger rail service, designing racial justice cultural outreach resources, and more. Students can also develop their own specialty projects.

**Requirements/Evaluation:** Project presentation and written reflection

**Prerequisites:** If overenrolled, the instructor will choose participants based on statements of interest.

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference will be given to first-year students

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Dr. Consolini earned her Ph.D. in Political Science from the University of California, Berkeley. Her research experience includes studying the educational effects of jury service and consulting for the World Bank, the Pacific Gas and Electric Company, and the Schenectady Municipal Housing Authority.

Women's, Gender and Sexuality Studies can be defined as the study of how gender is constructed, how it is inflected by differences of race, ethnicity, sexuality, class, and so on, how gender affects the experiences and situations of men and women, and how assumptions about gender influence the construction of knowledge and experience. Scholarship in Women's, Gender and Sexuality Studies has brought neglected material into established fields and raised important methodological questions that cross disciplinary boundaries and challenge established intellectual frameworks. The program in Women's, Gender and Sexuality Studies thus includes courses from a wide variety of disciplines that focus in a coherent way on gender issues and/or sexuality issues, as well as core courses that acquaint students with the interdisciplinarity of the field.

THE MAJOR
The Women's, Gender and Sexuality Studies major encourages students' exposure to the interdisciplinary character of feminist and sexuality-focused scholarship. In addition, majors are required to gain some knowledge of methods within a field or discipline (3 courses in one of the categories listed below), to appreciate the importance of diversity (racial, sexual, class, ethnic, national, etc.) in scholarship on gender and sexuality, to gain exposure to feminist and/or queer theory, and to pursue work at an advanced level (3 courses at the 300-level).

In order to ensure that students reflect about the paths that they choose through the major, each major will be assigned to an advisor in the spring of the sophomore year. With the advisor, the student will establish a revisable course of study for the following two years. Students interested in declaring a major should contact the Chair of the Program.

Required Courses
The major consists of at least 9 courses. The following are required:

- WGSS 101 Introduction to Women's, Gender and Sexuality Studies
- WGSS 202 Foundations in Sexuality Studies
- WGSS 400-level Junior/Senior Seminar in Women's, Gender and Sexuality Studies. The seminar explores topics in Women's, Gender and Sexuality Studies, and varies from year to year. Majors may take more than one seminar, space permitting.

In addition to these three required courses, students are required to take six electives. In consultation with their major advisor and with approval from the chair, these six elective courses should include:

- Courses from at least 3 different disciplinary traditions.
- At least 3 courses at the 300-level.
- At least 1 course that emphasizes feminist/queer theories and/or methodologies.
- At least 1 course that emphasizes a diversity of racial, sexual, religious, and/or cultural identities and practices.

In the final semester of their senior year, all majors will be required to write a reflective intellectual autobiography of their WGSS major, in which they explain how their courses meet the goals of the major, and analyze the relationship among the courses they have taken, the papers they have written, and the research projects undertaken.

THE DEGREE WITH HONORS
Honors in Women's, Gender and Sexuality Studies may be granted to majors after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded honors by the Women's, Gender and Sexuality Studies Committee. The honors project may be fall semester (plus winter study) or a year-long project. It may consist of a conventional research thesis of 40-70 pages or of other modes of presentation (e.g., art, music, poetry, theater, fiction). Proposals for non-thesis projects should include evidence of experience and competence in the chosen mode.

A student may become a candidate for honors in Women's, Gender and Sexuality Studies after the following criteria are met:

- In April of the junior year, submission and Women's, Gender and Sexuality Studies Committee approval of a 4- to 6-page project proposal, in which the ideas, aim, general methodology, and preliminary bibliography for the project are outlined and a faculty advisor is named; prior to submission of this proposal, students must consult with a reference librarian.

- At the end of the junior year, cumulative grade point average of 3.5 from courses taken in the major;

- In the first week of classes of the senior year, submission and approval by the faculty advisor and second reader of a 5- to 10-page “Plan of Action” (an overview of what has already been completed and a schedule of what needs to be accomplished to finish the project). Where appropriate,
students pursuing honors will continue to consult with the second reader over the course of the semester(s).

All honors work, including the public presentation, will be evaluated by the Women’s, Gender and Sexuality Studies Committee. It will decide on the awarding of honors; the advisor will award the grade(s).

STUDY ABROAD

The Williams College Women’s, Gender and Sexuality Studies Program encourages potential majors to study abroad in order to enhance their education and gain international perspectives on gender and women’s issues and feminism. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. There are several semester-long programs with a specific focus on women and/or gender administered by other U.S. Colleges that would especially enrich the educational experience of our majors:

- Antioch College: Comparative Women’s Studies in Europe fall semester
- Augsburg College, Center for Global Education: Crossing Borders: Gender and Social Change in Mesoamerica fall semester; and Social and Environmental Justice in Latin America spring semester
- School for International Training: The Balkans: Women and Democratization, fall or spring semester
- Jamaica: Gender and Development, fall or spring semester
- Mali: Gender and Development, fall or spring semester
- The Netherlands: Identity, Gender and Sexuality, fall or spring semester

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus, including readings/assignments, and exams or other written work. Depends on the level for which the student is seeking major credit (200- vs 300-).

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. 101 and 402 cannot be fulfilled abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

WGSS 101  (F)(S)  Introduction to Women’s, Gender & Sexuality Studies  (DPE) (WS)

This course is designed to initiate you into the pleasures, pains and perplexities of critical thinking about gender and the situations of women across
the globe. We will survey a wide variety of writers and issues—historical and contemporary, theoretical and practical. Above all, the course is intended as an exploration of the tremendous diversity of thought contained under the general rubrics of feminist and gender studies and a vehicle for developing skills in writing and research as well as analytical tools for further work in the field. The goal is not to bring about a specific point of view, but rather to learn to analyze issues critically using the methods and frameworks that feminist theory and queer theory have developed as academic disciplines.

Class Format: Mix of lectures and seminars

Requirements/Evaluation: Participation during class and in online forums, weekly reading responses, two short essays with revisions, and a final research paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS majors and potential WGSS majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: required course for the Women's, Gender and Sexuality Studies major

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: This course requires significant attention to the craft of writing. Essential to this craft is the process of editing and rewriting materials with feedback from peers and professors. Students are expected to focus on improving analytical skills, critical thinking, and argumentation through attention to the writing process. They are also expected to give meaningful critical feedback on the writing of their peers.

Difference, Power, and Equity Notes: This course meets the DPE requirement because it asks students to reflect critically on issues of gender and sexuality around the world in a comparative contextual framework. Students will be asked in seminar space to discuss the operation of difference and power within as well as across different gender, class, racial, and sexual identities while learning in lecture meetings about feminist and queer studies’ history, activism, and theory.

WGSS 105 (F) American Girlhoods (DPE) (WS)

Cross-listings: ENGL 105

Secondary Cross-listing
The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 105(D2) ENGL 105(D1)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

Fall 2024
SEM Section: 01    TF 2:35 pm - 3:50 pm    Kathryn R. Kent

WGSS 111  (F)  Television, Social Media, and Black Women 'Unscripted'
Cross-listings: AFR 110
Secondary Cross-listing
Nene Leaks, Issa Rae, Zendaya, Oprah Winfrey, Lavern Cox and Joy Reid have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed–these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.
Requirements/Evaluation: class participation, podcast, vlogs, 10-page paper, and a formal class presentation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: First year Students
Expected Class Size: 13
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: AFR Core Electives AFR Culture, Performance, and Popular Technologies FMST Core Courses
Not offered current academic year

WGSS 112  (F)  Sex, Gender, Religion
Cross-listings: REL 112
Secondary Crosslisting
The relationship between sex, gender, and religion is one that is hotly debated in our current political context. Many contemporary issues such as abortion, sexual identity, transgender rights are all informed by religious traditions. While religion is most often critiqued for its misogyny and homophobia, it also opens up unexpected possibilities for gender and sexual diversity. This course will consider both these paradoxes and contradictions in religious traditions and their engagement with gender and sexuality. The course will consider how religious traditions have shaped our current discourses on sexual and gender diversity, how religious tradition understand and interact with modern constructions of sexual and gender identity, and how religious queer communities imagine queer possibilities in conversation with their religious traditions. In exploring these topics, the course will cover global religious traditions both historically and in the contemporary.
Requirements/Evaluation: weekly responses, midterm essay, final project.
Prerequisites: none
WGSS 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: AMST 113 / ENGL 113

Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: two-three short analysis papers, creative (1-2 pages), curated final project (archival exhibit and digital project), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 113(D2) ENGL 113(D1) WGSS 113(D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: two to three four-to-five-page graded papers, one creative assignment, and a final digital research project (8-10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

Fall 2024

SEM Section: 01 TF 2:35 pm - 3:50 pm Bethany Hicok
Self-proclaimed feminist activists, who hail from a variety of ethnic Latina/o/x/e (Latine) backgrounds, have often appealed to "ancestral" and "spiritual traditions" as integral to their activism and commitments. Some Latine feminists turned to "spiritual" traditions including brujería/witchcraft; curanderismo and Indigenous healing traditions; Santería/Lukumí and other AfroDiasporic traditions; astrology; home altars; various "mystical" traditions such as Kabbalah and Sufism, as well as Christian mystics like Teresa of Avila or Sor Juana Inés de la Cruz. Others have turned to the appropriation of "Eastern" traditions such as yoga, Tibetan Buddhism, and Zen Buddhism. This course engages students in an intensive introduction to some of the varieties of Latine feminist thought and contexts, including how activists, writers, and artists think about women, gender, sexuality, race, class, colonialism, the earth, healing, and a better world. How do these feminists of different Latine backgrounds and contexts imagine a better world? How and why do they appeal to spiritual traditions as a source of wisdom, healing, and lived practice for a better world? In this course, we seek to understand both particular Latine feminist spiritual practices on their own terms, as well as why such writers and activists appeal to "the spiritual" in Latine contexts. We will also consider how they frame notions of "the spiritual" in relationship to notions of "the religious" and "the secular."

**Requirements/Evaluation:** Grading is based on 5-6 page papers written on alternating weeks and brief 1-2 page response papers shared on alternating weeks as well as participation and two paper revisions.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Latina/o Studies concentrators, religion majors, first-year students interested in Latina/o Studies and/or religion

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 115(D2) LATS 115(D2) REL 115(D2)

**Writing Skills Notes:** Grading is based on alternating weeks writing a lead paper and other weeks writing a brief response paper. This course will require students to write regularly and revise two of their lead papers for grades.

**Difference, Power, and Equity Notes:** This course examines how Latine feminists have responded to a variety of differential power inequities, especially in terms of gender, sexuality, race, ethnicity, language, and class. It also considers the ways they have imagined better and more equitable worlds, and with what consequences they have done so.

**Attributes:** LATS Core Electives

Not offered current academic Electives

---

**WGSS 127 (F) Spring Grass: A Peek into Inequality in China (DPE) (WS)**

**Cross-listings:** CHIN 427 / ASIA 127

**Secondary Cross-listing**

*Spring Grass (Chuncao)* is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (*gaige kaifang*) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues. Through close readings of the novel, the eponymous TV drama series, documentaries, and films depicting rural life and women's roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls' right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong's proclamation "women can hold up half of the..."
sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (nannü bu pingdeng) and the urban/rural-gap (chengxiang chabie) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: For all students, active participation in tutorial meetings and an online writing portfolio as the final project. For CHIN students, four 4- or 5-page tutorial papers and revisions in Chinese, four 2-page critiques. For ASIA/WGSS students, five 5-page tutorial papers in English, five 2-page critiques, one revised paper.

Prerequisites: For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.

Enrollment Limit: 10

Enrollment Preferences: Enrollment priorities will be given to Chinese language learners who register under CHIN, and to freshmen and sophomores who register under ASST or WGSS.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 127(D2) CHIN 427(D1) ASIA 127(D1)

Writing Skills Notes: Writing is taught using the writing-as-process pedagogical approach. The writing process consists of invention, composition, and revision. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. The instructor gives detailed feedback to students' drafts and students are required to turn in revisions. At the end of the semester, students will compile an online writing portfolio to showcase their best works.

Difference, Power, and Equity Notes: The issue of "inequality," including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such inequality.

Not offered current academic year

WGSS 150  (F)  Data for Justice  (DPE)  (QFR)

Cross-listings: STS 150 / AMST 150 / SOC 150 / INTR 150

Secondary Cross-listing

This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

Class Format: This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.

Requirements/Evaluation: Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

Prerequisites: None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

Enrollment Limit: 18

Enrollment Preferences: Students without prior college-level courses in statistics and programming.

Expected Class Size: 18
**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

**Difference, Power, and Equity Notes:** This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGTBQ+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

**Quantitative/Formal Reasoning Notes:** This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

**Fall 2024**

LEC Section: 01    TR 9:55 am - 11:10 am    Chad M. Topaz

**WGSS 152  (F) The Fourteenth Amendment and the Meanings of Equality**  (DPE) (WS)

**Cross-listings:** HIST 152

**Secondary Cross-listing**

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

**Requirements/Evaluation:** a series of short (3-page) response papers; and a final 10-12 page research paper

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** given first to sophomores who have been dropped from this class previously, then to first-years, then to sophomores who have not been dropped previously

**Expected Class Size:** 15-19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 152(D2) HIST 152(D2)

**Writing Skills Notes:** Students will write three short (3-page) response papers to the readings in the first part of the semester, and will also write a substantial (10- to 12-page) research paper. In preparation for the research paper, students will write proposals, develop bibliographies, write outlines and drafts, and do peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

**WGSS 177  (S) Gender and Sexuality in Music**  (DPE)
This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered ideals, dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways that ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class, further informing these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of culture and society in informing those interpretations.

Requirements/Evaluation: attendance/participation, intermittent GLOW posts and short assignments (2 pgs or less), midterm project, and either a 12-page final paper or a project with supplementary paper (length to be determined in consultation with the instructor).

Prerequisites: open to all students; familiarity with musical terminology is helpful but not required

Enrollment Limit: 20

Enrollment Preferences: WGSS and MUSC majors/prospective majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 177(D1) WGSS 177(D2)

Difference, Power, and Equity Notes: This course critically examines the ways in which music constructs and reflects gendered and sexual identities in intersectional space. We discuss how normative viewpoints come to be accepted and interpreted as ‘natural,’ and how musicians and audiences have maneuvered within and against those socio-political expectations. Music and readings span a wide range of sources—elite, popular, counter-cultural; from Euro-American sources to genres hailing from Brazil, Korea, and India.

Attributes: MUS World Music/Ethnomusicology

Not offered current academic year

WGSS 202 (F)(S) Foundations in Sexuality Studies (DPE)

This course will offer an introduction to the burgeoning interdisciplinary field of sexuality studies in part through examining historical, legal, literary, filmic, cultural studies, sociological, and popular texts, as well as work done under the umbrella of queer theory. It explores the role of race, class, religion, science, region, and nation in the construction of modern gender and sexual identities and in the lived experiences of dissident genders and sexualities. We will examine a range of issues, including histories and strategies of resistance; transgender and intersex theory and activism; critiques of the white racial hegemony of lesbian and gay studies; the consequences of gay marriage; the politics of AIDS and its theoretical implications; globalization and sexuality; the rise of queer visibility and its relation to commodity culture; and recent conceptualizations of homonormativity. The goal of the course is not to achieve any kind of political or intellectual consensus, but to have rigorous debate over some of the key issues in queer studies.

Class Format: discussion

Requirements/Evaluation: Class participation, Marco Polo Discussion posts (short, app 3 min), short quizzes, reflection paper(s)

Prerequisites: None. WGSS 101 may be helpful as background knowledge, but is not required.

Enrollment Limit: 19

Enrollment Preferences: Women's Gender & Sexuality Studies majors, short statement of interest in case of over-enrollment

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course examines sexual diversity in various forms and asks students to interrogate questions of privilege and positionality, including the intersectional contemplation of sexuality's relationship to race, ethnicity, ability, class, religion, and other axes of identity. It investigates not only sexual difference, but the history of sexual identity and progressive narratives of "gay rights" that have developed over time.
WGSS 206 (S) Narrating Color: Black Women Sing and Write About Complexion

Cross-listings: AFR 202 / COMP 236

Secondary Cross-listing

Colorism, skin color discrimination where light skin is privileged over dark skin, is not a new phenomenon, but globally entrenched in our society and one of the many vestiges of white supremacy. For Black Americans of all backgrounds, colorism is a familiar and a living legacy concretized by the institution of slavery in the Americas. Although some believe that we are "post-color," similarly to those that naively believe we are "post-race," one can look to the recent example of misogynoir (misogyny directed at Black women) and skin color politics that Meghan Markle, the Duchess of Sussex, has faced at the hands of the British Monarchy, that her light-skinned color, biraciality, and class privileges couldn't protect her from. Alternatively, we can look at the numerous examples of colorism and anti-Black racism that tennis icon Serena Williams is subjected to because of her dark-brown skin complexion and body shape. One cannot fully understand the issue of colorism without understanding that it is an outgrowth or an extension of anti-Black racism firmly rooted in white supremacy, and so insidious that it impacts all aspects of Black life. Examining colorism through literary texts and music, provides a depth of understanding that both compliments and expands these empirical studies. Literature and music provide the narratives and rhythm that paint a vivid picture of the many ways that colorism impacts the lives of Black people. Through the methods of literary and rhetorical criticism we will examine the works of five Black women authors and music artists that take up issues around colorism and passing. We will explore, Toni Morrison's, *The Origins of Others* (2017), Brit Bennett's, *The Vanishing Half* (2020), Tressie McMillian Cottom's, *Thick* (2019), Marita Golden's, *Don't Play in the Sun* (2004), Yaba Blay's, *One Drop: Shifting the Lens on Race* (2021), Nina Simone's, "Four Women" (1966) and "Young, Gifted and Black" (1958), Sara Martin's, "Mean Tight Mama" (1927), India.Arie's, "Brown Skin" (2001), Azealia Banks' "Liquorice" (2012), and Beyoncé's "Creole" (2012), "Formation" (2016) and "Brown Skin Girl" (2020). By examining colorism in both literature and music, it will give first year students a foundational and nuanced understanding of skin tone bias and equip them with the tools to critically engage literary and music texts.

Requirements/Evaluation: Three, short papers (4-5 pages) discussing aspects of the readings and songs; three response papers to tutorial partner's papers (2 pages long); two, video essays; two, Twitter threads explaining aspects of one of the books and one of the songs; and a curated playlist of songs that would serve as accompaniment to one of the texts from the class.

Prerequisites: N/A

Enrollment Limit: 10

Enrollment Preferences: This class is specifically designed for first year students. Sophomores can register only with advanced permission.

Expected Class Size: 8-10

Grading: no pass/fail option, no fifth course option

among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison’s writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, *The Bluest Eye* (1970), *Sula* (1973), *Song of Solomon* (1977), *Love* (2003) and *God Help the Child* (2015), and some of her non-fiction writings. In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

**Requirements/Evaluation:** six 2-page papers, two 5- to 7-page papers, 10 minute vlog, annotated bibliography

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** this course is specifically for first-year students and they will receive preference in this class

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Cross-listings:** ENGL 208 / STS 208 / AMST 206

**Secondary Cross-listing**

In this course, we explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book *The Mutant Project*. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick’s documentary *In the Family*, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler’s Afro-futurist novel *Dawn* explores black female sexuality, reproduction, and the survival of the species in her character’s encounter with a genetically enhanced alien species. The film *Gattaca* shows us a fully realized dystopian society where genetically modified humans are the norm—a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects. Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

**Requirements/Evaluation:** Personal essay, short analysis papers, final research group project

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** None; if class is overenrolled, professor will ask for statements of interest.

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

WGSS 209 (F) Poverty in America

Cross-listings: PSCI 209

Secondary Cross-listing

Although some protest that the U.S. is heading toward European-style socialism, social welfare programs in the U.S. differ in important ways from those in other wealthy and democratic nations. This course focuses on the adoption and development of policies to address poverty and inequality in the U.S. The issues we will explore include: What is poverty, and how do Americans perceive its dangers to individuals as well as the political community? What economic, historical, and sociological theories have been advanced to explain poverty? Why has the U.S. adopted some approaches to reduce poverty but not others? What enduring political conflicts have shaped the U.S. welfare state?

Requirements/Evaluation: class participation, two or three short papers, and a final paper

WGSS 211 (F) Gender in the Global Economy (DPE)

Cross-listings: ECON 105

Primary Cross-listing

This course will present a feminist economic analysis of the global economy, and some of the urgent issues facing women in the Global South. The course will start by developing theoretical resources: these will include feminist critiques of economic theory, work on care labor and the shifting boundaries between markets, governments, households and the environment, and discussions of intersectionality and difference. Then we will discuss a series of interlinked issues which may include the contradictory effects of structural adjustment and its successors; the informal sector and global value chains; the economics of sex work and global sex trafficking; climate change; and migration. We will finish by looking at community-based activism, non-governmental organizations, and the possibilities for North/South alliances.

Class Format: lecture/discussion

Requirements/Evaluation: reaction papers, research paper; participation in class discussion will count for part of the grade

Prerequisites: none

Enrollment Limit: 20
Enrollment Preferences: Women's, Gender and Sexuality Studies majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: This course cannot count toward the ECON major.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 212 (F) Ethics and Reproductive Technologies (WS)

Cross-listings: PHIL 212 / STS 212

Secondary Cross-listing

In her groundbreaking book, The Tentative Pregnancy, Barbara Katz Rothman writes that “[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace--or to let us think we can replace--chance with choice.” Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as “motherhood” and “parenthood,” family and genetic relatedness, exploitation and commodification, and reproductive rights and society’s interests in reproductive activities. Topics will range from consideration of “mundane” technologies such as contraception, abortion, in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, uterine transplants, and “artificial wombs.” Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

Class Format: discussion

Requirements/Evaluation: active participation in class discussions, three or four short reflection papers, and two longer papers (5-7 and 7-10 pages)

Prerequisites: none, but introductory-level course in PHIL and/or WGSS recommended

Enrollment Limit: 19

Enrollment Preferences: WGSS and PHIL majors (declared or prospective), PHLH and STS concentrators (declared or prospective)

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

WGSS 216 (S) Women Behaving Badly: Deviant Women in Early Modern French Literature  (DPE)

Cross-listings: RLFR 216

Secondary Cross-listing

Female deviance often implies resisting a dominant and oppressive patriarchal status quo embedded within cultural and historical backgrounds. This course explores female characters in early modern French literature who refuse to conform to established gender roles. Defying social constructs of femininity, through either judicious negotiations or more aggressive and violent behavior, is an important trope in the writings of both male and female authors of the seventeenth and eighteenth centuries. What constitutes deviant behavior, however, depends on social definitions of gender roles, which evolve over time. In this course, we will first examine women’s place within the historical and socio-cultural context of the Ancien Régime, which will lead to an examination of female behavior censured during the seventeenth and eighteenth centuries. We will then reflect on how we, as modern readers, perceive such deviancy at it relates to the past. Finally, we will discuss the relevance of studying deviant women in light of current events, such as the #MeToo movement, which has led to a new level of consciousness and empathy for the plight of marginalized groups. Potential readings to include Corneille’s Médée, Madame de la Fayette’s Princesse de Clèves, Laclos’s Liaisons dangereuses, and Isabelle de Charrière’s Lettre à Mistriss Henley.

Requirements/Evaluation: active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper

Prerequisites: strong performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students; Comparative Literature majors; Women’s, Gender and Sexuality Studies majors; and those with compelling justification for admission

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 216(D2) RLFR 216(D1)

Difference, Power, and Equity Notes: This course focuses on a critical examination of difference, power, and equity in early modern France. Through the study of deviant women, the course thus challenges students to examine the effects of class, race, ethnicity, gender, and sexuality in narratives on women, misogyny, and criminality.

WGSS 222 (S) Women on the Verge

Cross-listings: RLS P 220

Secondary Cross-listing

From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films, newspapers and other media, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, the transition to democracy, and the present day.

Requirements/Evaluation: This course is conducted entirely in Spanish.

Prerequisites: RLS P 105, or RLS P 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Spanish and Comparative Literature majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 225  (F)  Buddhism, Social Change, & Reproductive Justice in the Anthropocene  (DPE)  (WS)

Cross-listings: REL 258 / ANTH 258 / ASIA 258

Secondary Cross-listing

This course considers how three women profoundly shaped the Buddha's life and legacy in terms of social change & reproductive justice. Our central characters are Maya—the Buddha's mother, who died shortly after delivering him; Pajapati—the Buddha's stepmother & aunt who raised him; and Yasodhara—his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha's day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha's day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

Requirements/Evaluation: Attendance, writing weekly essays or written feedback. There are no grades first half of the semester but weekly feedback on writing.

Prerequisites: none, but a course in ANTH or REL is preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, REL, WGSS majors and ASIA concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 258(D2) WGSS 225(D2) ANTH 258(D2) ASIA 258(D2)

Writing Skills Notes: We write every week—either 1500 word lead essays, or written feedback (and oral responses) to the lead essay and weekly text. We have a mid semester 'writing chat' with the instructor where we discuss strengths and weakness of individual student writing.

Difference, Power, and Equity Notes: We explore the three women who left a lasting legacy on the Buddha's teachings and practices in terms of gender egalitarianism, social justice, and reproductive justice. Our historical genealogy explores how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice.

Not offered current academic year

WGSS 226  (S)  Gender and the Dancing Body  (DPE)

Cross-listings: DANC 226 / AMST 226 / THEA 226

Secondary Cross-listing

This course posits that the dancing body is a particularly rich site for examining the history of gender in America and beyond. The aim of the course is to explore ideas related to gender as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative ideologies. We will examine a wide range of dance genres, from stage performances to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course and may also include film screenings, movement workshops, discussions with guest artists and scholars. No previous dance experience required.

Requirements/Evaluation: participation in discussions and presentations, reading responses, in-class writing assignments, two 5-6 page essays, and a final cumulative essay.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first years and sophomores

Expected Class Size: 10-15

Grading: no pass/fail option, no fifth course option

Not offered current academic year
Distributions: (D2)  (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
DANC 226(D1)  AMST 226(D2)  WGSS 226(D2)  THEA 226(D1)

Difference, Power, and Equity Notes: In the course, students will explore the concept of gender as a social construction and how the body's historical associations to markers of gender and sexuality lead to differences in socio-political power. The assigned texts and viewings provide examples of how bodies and their movements make meaning in a network of power relationships, and how artists use dance to address social inequalities such as sexism, racism, and transmisogyny, to imagine a more just world.

Spring 2025
SEM Section: 01    WF 11:00 am - 12:15 pm     Munjulika R. Tarah

WGSS 227  (S)  Boys Love  (DPE)
Cross-listings:  COMP 228

Secondary Cross-listing

Originating in Japanese manga of the 1970s, the genre of yaoi, boy love, or BL has expanded into other media and around the globe during the last half century. Created mostly by women for women, BL transposes classic tropes of popular romance into a male homosocial environment, depicting the inevitable love of young, attractive, and typically androgynous men. The growing popularity of BL begs several questions: Why do women create and consume romances that tend to exclude female characters? Why do they enjoy a fictional universe that deliberately downplays homophobia yet ostensibly preserves heteronormativity by showing powerful, protective tops who repeatedly fall for vulnerable, passive bottoms? And how has BL changed global perceptions of and expectations for masculinity? This course explores these and other questions by examining key examples of BL from Japanese manga to Thai television, as well as shipping culture, BL's robust fandom, and adjacent genres such as slash fiction and girl love.

Requirements/Evaluation: completing all assignments, active participation in class discussions, two short papers, creating your own BL, and a final project
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: COMP and WGSS majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)  (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 227(D2)  COMP 228(D1)

Difference, Power, and Equity Notes: This class examines difference, power, and equity by examining representations of gender and sexuality, as well as their global flow over the past fifty years. Works of yaoi, boys love, or BL represent a significant genre of popular culture, as well as soft power, that originated in East Asia yet has spread around the globe. The course will address the gendered aspects of BL production, consumption, and fandom, as well the genre's mobilization of homosociality and homosexuality.

Spring 2025
SEM Section: 01    TF 2:35 pm - 3:50 pm     Julie A. Cassiday

WGSS 228  (F)  Feminist Bioethics  (WS)
Cross-listings:  PHIL 228 / STS 228

Secondary Cross-listing

In this course we will explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures interactions with and within the health care system. To do this we will explore topics that might traditionally be considered "women's issues" in healthcare, such as medicine and body
image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as “gendered,” such as resource allocation and end of life issues.

Class Format: discussion

Requirements/Evaluation: active participation in class discussions; periodic short papers (2-3 pages); midterm and final paper (5-7 and 7-10 pages, respectively); and one oral presentation

Prerequisites: none, although previous coursework in WGSS is desirable

Enrollment Limit: 19

Enrollment Preferences: prospective and declared majors or concentrators in PHIL, WGSS, STS, and PHLH, especially those who need the course to satisfy major or concentration requirements

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: meets Contemporary Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 236 (S) Feminist Legal Theory  (DPE)

Cross-listings: PSCI 236

Secondary Cross-listing

What can a critical analysis of gender and sexuality bring to the study of law, constitutions, legal interpretation, and the task of judging? Well-known contributions by feminist theorists include the conceptualization and critique of anti-discrimination frameworks, the legal analysis of intersecting systems of social subordination (particularly gender, race, class, sexuality, disability), and the theorization of "new" categories of rights (e.g. sexuate rights). Accompanying these interventions in the legal field is a deep and sustained inquiry into the subject of law: Who can appear before the law as the proper bearer of civil and human rights? What kinds of violations and deprivations can be recognized as harms in need of redress? Who gets to make these judgments, and according to what rules? While our examples will be drawn mainly from family law, the regulation of sex/reproduction, and workplace discrimination, the main task of this course will be to deepen our understanding of how the subject of law is constituted. Illustrative cases to aid our inquiry will be drawn primarily from family law, the regulation of sex/reproduction, and workplace discrimination, the main task of this course will be to deepen our understanding of how the subject of law is constituted. Illustrative cases to aid our inquiry will be drawn primarily from the USA and Canada, with additional examples from India, South Africa, and possibly European law.

Theorists we read will represent many kinds of feminist work that intersect with the legal field, including academic studies in political theory, philosophy, and cultural theory, along with contributions from community organizers engaged in anti-violence work and social justice advocacy.

Requirements/Evaluation: One oral presentation; three 6-8 page papers; regular class participation.

Prerequisites: None.

Enrollment Limit: 25

Enrollment Preferences: Preference will be given to PSCI and WGSS majors and JLST concentrators.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 239  (F)  History of Sexuality

Cross-listings:  HIST 292 / GBST 241 / REL 241

Secondary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Requirements/Evaluation:  reading responses, two essays, and final research paper

Prerequisites:  none

Enrollment Limit:  15

Enrollment Preferences:  Religion, History, and Women's, Gender and Sexuality Studies majors

Expected Class Size:  15

Grading:    no pass/fail option,    yes fifth course option

Distributions:  (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 292(D2) GBST 241(D2) REL 241(D2) WGSS 239(D2)

Attributes:  HIST Group G Electives - Global History

Not offered current academic year

WGSS 241  (S)  Sex and Gender in Ancient Greece and Rome

Cross-listings:  COMP 241 / CLAS 241

Secondary Cross-listing

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

Requirements/Evaluation:  five to six weekly tutorial papers, five to six responses, a midterm self-evaluation and conference with instructor, a mid-length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  majors or intended majors in Classics, WGSS, and Comparative Literature

Expected Class Size:  10

Grading:    no pass/fail option,    no fifth course option
WGSS 242 (S) Women, Gender, and Sexuality in Islam  (DPE)

Cross-listings: REL 242 / ARAB 242

Secondary Cross-listing

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Requirements/Evaluation: weekly discussion post, midterm essay, and final paper (6-8 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion, Women's, Gender and Sexuality Studies and Arabic majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 242(D2) WGSS 242(D2) ARAB 242(D2)

Difference, Power, and Equity Notes: This course explores the relationship between gender, authority, and civilizational discourse. To that end, the course will explore: 1) how assumptions about gender shaped the legal and Quranic exegetical tradition and Muslim feminist critiques. 2) The construction of the oppressed Muslim woman in justifying military invasion and nationalistic rhetoric. This course will introduce students to critical tools in decolonial feminism and the relationship between gender and power.

Not offered current academic year

WGSS 243 (F) Islamic Law: Past and Present

Cross-listings: HiST 302 / ARAB 243 / ASIA 243 / REL 243

Secondary Cross-listing

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Requirements/Evaluation: weekly responses, midterm essay, final essay

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: majors
WGSS 244 (F) Actually Existing Alternative Economies (DPE)

Capitalism has a way of constricting our imaginations so that we come to believe the only possible form of economic institution is one based on profit seeking, competition and individualism. However movements in countries including Brazil, France, Canada and Spain--and now parts of the U.S.--are demonstrating otherwise. Theorists, practitioners and social activists are adopting labels including 'Solidarity Economy' and 'New Economy' to group together economic activities based on ideals of human provisioning, social justice and environmental sustainability. They point out that many of these activities are already taking place and are often crucial to our lives, but are rendered invisible by economic theory. In the words of Brazilian popular educator and economist Marcos Arruda, 'a solidarity economy does not arise from thinkers or ideas; it is the outcome of the concrete historical struggle of the human being to live and to develop him/herself as an individual and a collective.' Feminist geographers Julie Graham and Katherine Gibson developed practices of 'mapping' local economies with communities in Australia and Western Massachusetts in ways that bring to light the invisible resources and practices of provisioning and solidarity, and challenge what they describe, drawing on the work of feminist theorist Sharon Marcus, as a 'script' of local helplessness to resist the 'rape' of their economies by the forces of global capitalism. Do these proposed discursive practices actually present realistic possibilities for producing sustained economic change? In this tutorial we will learn and debate about some of the activities being named and built under the label of solidarity economy, such as the networks of worker-owned cooperatives in Mondragon, Spain, the growth of local currencies and time exchanges, fair trade organizations and different ways of organizing care work. We will look at some of the history and debates around worker-owned cooperatives, ranging from Victorian England through African-American experiences throughout the 20th century and examples in post-Independence Africa, to the recent establishment of Cooperation Jackson in Jackson, Mississippi. The ILO has argued that co-ops are a particularly appropriate form to African development. Is this plausible, and what role might they play in AIDS-affected communities? Why has the recent U.S. growth of the solidarity economy been so concentrated in communities of color, and how is it gendered? We will visit some examples in New York or Boston.

Requirements/Evaluation: six papers of 5-7 pages, six written responses to partner's papers, participation in tutorial discussion

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: open to sophomores and above

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because of its central focus on the diversity of economic institutions within and across countries and the power imbalances that call them into being and challenge some of their survival. The course considers ways the hegemonic discourse of economics tends to render that diversity invisible, and tools, both analytical and activist, for bringing it out into view. It teaches tools to evaluate economic institutions in terms of equity and solidarity.

Not offered current academic year

WGSS 250 (F) Feminist Theatres: A Global Perspective (DPE) (WS)

Cross-listings: THEA 250 / COMP 247 / ENGL 253

Secondary Cross-listing

What makes a work of theatre "feminist"? How do plays and performances across global networks engage with different models of feminism: liberal, radical, materialist, and intersectional? Why has feminism mattered to theatre-makers of the past? Should it still matter now? If so, what forms might
future feminist theatres take? In this tutorial course, students will work in pairs to examine the social and political relation of feminism to the art and practice of theatre. Taking a global and comparative perspective on the subject, we will focus on the intersectionalities of gender, race, class, ethnicity, nationality, and sexual identity in the production of feminist-driven theatrical practices. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, Adrienne Kennedy, Caryl Churchill, Nozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherrie Moraga, Lisa Kron, Arethusa Speaks, Maya Krishna Rao, Tracie Chima Utoh-Uzeajugh, Alexis Scheer, Tori Sampson, Clare Barron, and others. Close analysis of source material will be informed by critical and autobiographical writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students taking turns presenting or responding to their peer every other week; for their presentations, students will write a 5-page paper or, in up to two cases if they choose, offer their argumentation through more performance-driven methods (such as an oral argument, spoken-word monologue, or activist prompt).

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; every other week they will be responsible for sharing either a 5-page paper or, if they choose, in up to two cases, a more performance-driven presentation, such as: an oral argument, spoken-word monologue, or activist prompt (five presentations/papers in all). They will comment on / respond to their partner’s papers/presentations in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and written and oral communication.

Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: THEA majors; WGSS majors; ENGL majors; COMP majors. Students from all majors are welcome and invited to contact Prof. Holzapfel about their interest in the class: ash2@williams.edu
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 250(D1) COMP 247(D1) WGSS 250(D2) ENGL 253(D1)

Writing Skills Notes: This course fulfills the writing skills requirement by engaging students in the active and creative process of critical writing, based on the notion that "writing is thinking, not thinking written down." Emphasis will be given to crafting and developing an argument, clarifying prose, selecting evidence, gaining authority, and incorporating theoretical ideas into an essay. We will also focus on the performance and presentation of written arguments.

Difference, Power, and Equity Notes: This tutorial examines intersections between gender, race, sexuality, class, nationality, and ethnicity in relation to theatre's ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

Not offered current academic year

WGSS 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: AFR 283 / AMST 283 / ENGL 286

Primary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators
**WGSS 284**  (F)  From the Battlefield to the Hermit's Cell: Art and Experience in Norman Europe  (WS)

**Cross-listings:**  REL 284 / ARTH 218

**Secondary Cross-listing**

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans—a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries—each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects—an embroidery, a building, and a book—give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.

**Requirements/Evaluation:** Participation in discussion; five 4-5-page tutorial papers; five 1-2-page response papers.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** First years and sophomores, but open to all.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:**  (D2)  (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 284(D2) REL 284(D2) ARTH 218(D1)

**Writing Skills Notes:** In this tutorial, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 5-7-page papers they will submit, with suggestions for improvement.

**Attributes:** ARTH pre-1800

---

**WGSS 301**  (S)  Sexual Economies  (DPE)

**Cross-listings:**  ANTH 301 / AMST 334

**Primary Cross-listing**
This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We have a variety of guest speakers to share their diverse lived experiences related to this topic.

Requirements/Evaluation: short-quizzes, reflection papers, participation, short Marco Polo video posts (app 3 min each)

Prerequisites: none, though WGSS 101 and/or 202 may be helpful, but not required

Enrollment Limit: 15

Enrollment Preferences: based on statement of interest, brief interviews if necessary

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 301(D2) AMST 334(D2) WGSS 301(D2)

Difference, Power, and Equity Notes: We pay particular attention to the intersecting questions of race, sexuality, gender, and class as we explore the political economy of commercial sex. The course teaches students to examine the underlying political and economic structures that create systems of privilege and power, thereby complicating questions and assumptions about sexual consent, coercion, agency, and empowerment with particular attention to race and gender in comparative transnational contexts.

Attributes: WGSS Racial Sexual + Cultural Diversity Courses

Spring 2025

SEM Section: 01 MW 7:00 pm - 8:15 pm Gregory C. Mitchell

WGSS 302 (S) Social Construction (DPE)

Cross-listings: COMP 315 / STS 301 / SOC 301 / REL 301

Secondary Cross-listing

"Social construction" can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore look at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

Requirements/Evaluation: regular attendance and participation, short weekly reflection papers, a 8-10 page research paper, and final project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Preference will be given to majors and concentrators from STS, ANSO, COMP, REL, PHIL, WGSS, AAS, LATS, JWST, and AFR. If the class is overenrolled students will be asked to submit an email about themselves and why they want to take the course.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 315(D1) WGSS 302(D2) STS 301(D2) SOC 301(D2) REL 301(D2)

Difference, Power, and Equity Notes: Central to REL 301 will be an analysis of the social construction of race, gender, and sexuality. It will show how power and difference are tied up in their construction and maintenance of these categories. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

WGSS 305 (F) The Gay Menagerie: Gay Male Subcultures (DPE)

Cross-listings: ANTH 305 / AMST 305 / THEA 304

Primary Cross-listing

Bears. Cubs. Otters. Pups. Twinks. Radical Fairies. Leathermen. Mollies. Drag queens. Dandies. Sisters of Perpetual Indulgence. Gay men, including gay trans men, have organized themselves into various subcultures within their community for centuries. This seminar is devoted to exploring these subcultures in (a mostly US-context) in greater detail using ethnographic texts, anthropological studies, historical accounts (including oral histories), and media. Topics include cruising and flagging, the anthropological significance of gay bars, histories of bath house culture, rural vs urban queer experiences, the ball scene, drag, diva worship, the reclamation of “fabulousness and faggotry,” the leadership roles of trans women and effeminate gay men in activist movements, gay gentrification, the growth of gay consumerism/ gay tourism/homonationalism, hierarchies of masculinity in the gay community (i.e., masc for masc culture), HIV/AIDS and the politics of PrEP, chemsex, the role of racialized dating “preferences,” genealogies of BDSM and leather culture, sexual health and discourses of “risk,” the politics of barebacking and other sexual practices, queering consent, and the effects of hookup apps on gay culture. In addition to lectures, and discussions, there will also be some low-key performance-studies based exercises in queer praxis (e.g., drag workshops, mock debates, animal improvisation, role playing, etc.)

Class Format: There will be some minor performance elements such as workshops during class.

Requirements/Evaluation: Quizzes, journaling assignment, short diva report, 10 page research paper on a gay subcultural group

Prerequisites: None; WGSS 202 (Foundations in Sexuality Studies) will be helpful but is not required

Enrollment Limit: 12

Enrollment Preferences: WGSS majors; in the event of over-enrollment there statements of interest will be solicited

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 305(D2) AMST 305(D2) WGSS 305(D2) THEA 304(D1)

Difference, Power, and Equity Notes: This course examines the how marginalized communities respond to their oppression through creative forms. It takes as central to its curriculum the role of sexual diversity and the relationship of the gay community to power through the central idiom of "difference."

Attributes: WGSS Racial Sexual + Cultural Diversity Courses

Not offered current academic year

WGSS 307 (F) Feminist Approaches to Religion (WS)

Cross-listings: REL 306

Secondary Cross-listing

What does feminist theory have to offer the study and practice of religion? How have participants in various religious traditions helped to produce and enact different kinds of feminist approaches to critique and transform religions? Feminisms and religions have a long though often troubled history of
interconnection. In this course, we shall explore a range of feminist analyses that have either emerged out of particular religious contexts or have been applied to the study of religious traditions and practices. The course prioritizes attention to the intersections and interactions of gender, race, ethnicity, sexuality, and nationality (among other factors) with religion.

Requirements/Evaluation: weekly GLOW posts before class, one “position paper” for class discussion (3 pages), a research question with rationale for interest and potential action plan (1 page), exploratory research statement (2 pages), essay on interpretive approach to research project (3 pages), participation in writing workshop on 7-page early drafts of final papers, one 15-page final paper.

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: Religion and Women's, Gender and Sexuality Studies majors have priority, and then students who have taken either REL 200 or WGSS 101.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 307(D2) REL 306(D2)

Writing Skills Notes: This course features a series of scaffolded writings assignments that will culminate in a final research project.

Attributes: WGSS Theory Courses

Not offered current academic year

WGSS 308 (S) Parenting for a Feminist-Queer-Trans World (DPE)

Perhaps you want to understand your own experience being parented; perhaps you are a parent, or hope to become one, and you want to reflect on your intentions; perhaps you want to understand what various scholars, activists, and activist-scholars have said about how parenting matters. This class will provide you with the time, information, and other resources necessary to explore the following question: what difference does it make when we put "feminist," "queer" and/or "trans" in front of parenting? More specifically, how do these modifiers change the forms and practice of parenting, ideally and in fact? What are the associated philosophies and structures that justify and enable these forms and practices? In this course, we will conceptualize parenting in a capacious way, as a kind of ongoing relationship that can obtain not only between an adult and a child they are "raising," but also between adults who are not conventionally considered "related." The purpose of this class is threefold: 1) to enable you to develop your own parenting philosophy, 2) to use "parenting" as a window to explore differences in feminist, queer, and trans thought, and 3) to use "parenting" as a springboard for imagining better institutional arrangements and articulating societal ideals. To realize these goals, we will mine our experiences, talk to lots of parents, and engage both scholarly and popular resources on parenting.

Requirements/Evaluation: One 6 page book review; Three contributions to resource compendium; One episode for the group podcast; One 10 page final essay

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: WGSS majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: We will be looking at the difference that understanding parenting differently, and/or practicing it with feminist, trans, and queer goals in mind does/might make in relation to the ends of equity and inclusion. We will also be attentive, however, to differences in ideas about what feminist, trans and queer parenting entails -- and how relations of power internal to groups make certain ideas about what feminist, queer, and/or trans parenting entails more accessible than others.

Spring 2025

SEM Section: 01 TR 11:20 am - 12:35 pm Greta F. Snyder
WGSS 311  (F)  Trans Film and Media  (DPE)

Cross-listings: AMST 364

Primary Cross-listing

This course provides an introduction to contemporary trans culture and politics via the lens of film and other (mostly visual) media. We'll focus mainly on media production in the U.S. since the early 1990s, as this moment is usually understood as inaugurating contemporary "transgender" politics; additionally, the 90s saw a proliferation of diversity in popular representation generally. This class has two main priorities: first, to use visual media as a lens for surveying major developments in trans studies, politics, and representation over the last few decades; second, to develop a critical repertoire for thinking about our current conjuncture of "trans visibility" in particular. By tracking a longer history of both popular and alternative trans media production, this course will question the vanguardism and celebratory progress narratives associated with "trans tipping point" visibility conditions. Drawing from perspectives in WGSS, American studies, and ethnic studies, we will especially situate trans representation in relation to the institutionalization of minority difference under neoliberal capitalism. In line with scholarship, we'll approach trans representation as interlocking with structures like race, heteropatriarchy, dis/ability, immigration, and nationality and empire.

Class Format: There will also be some lecturing.

Requirements/Evaluation: Students will have ongoing short discussion post assignments, one midterm essay of 5-6 pages, and a final group media-making project with min. 6 pages of analytic writing to accompany their creative work.

Prerequisites: WGSS 101 or 202 would be helpful but are not required. Other background in WGSS or the humanities is also helpful.

Enrollment Limit: 20

Enrollment Preferences: Enrollment preference can go to WGSS majors and 3rd & 4th years. Statements of interest are welcome.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: For some proprietary media content, students will need subscriptions to popular streaming services (eg Netflix, Amazon, HBO Max). See WGSS chair about financial aid waivers and alternatives if this feels cost prohibitive.

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 311(D2) AMST 364(D2)

Difference, Power, and Equity Notes: This course provides a survey of issues facing marginalized trans communities via the lens of visual media, with an emphasis on how structures of power shaping trans experience intersect with the politics of race, capital, disability, migration, and other axes of social difference.

SEM Section: 01    M 7:00 pm - 9:40 pm     Abram J. Lewis

WGSS 312  (S)  An American Family and "Reality" Television  (WS)

Cross-listings: ARTH 310

Secondary Cross-listing

An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Lounds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the An American Family series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

Requirements/Evaluation: class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper.

Prerequisites: none

Enrollment Limit: 14

**WGSS 313  (F) Gender, Race, and the Power of Personal Aesthetics**

**Cross-listings:** AFR 326 / LATS 313 / AMST 313 / AAS 313

**Secondary Cross-listing**

This media/cultural studies course focuses on the politics of personal style amongst women of color in the US and around the globe in the digital era. We undertake a comparative, transnational exploration of the ways in which categories of difference such as gender, disability, sexuality, class, and ethno-racial identity inform normative beauty standards and ideas about the body. The class pays particular attention to the ways in which neoliberal capitalism shapes contemporary understandings of gendered bodies and the self. We examine an array of materials from across the disciplines including commercial websites, music videos, photography, histories, film, television, personal narratives, ethnographies, and sociological case studies. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we engage the following questions, among others: What are some of the everyday functions of personal style among women of color in the US and globally? How do Latina/x, Black, Arab American, and Asian American personal aesthetics reflect the specific circumstances of their creation, and the unique histories of these racialized communities? What role do transnational media and popular culture play in the development and circulation of gendered, raced, and sexualized aesthetic forms? How might the belief in personal style as an activist strategy complicate traditional understandings of feminist political activity? And what do the combined insights of ethnic studies, feminist studies, cultural studies, media studies, queer studies and disability studies contribute to our comprehension of gendered Asian American, Arab American, Black, and Latina/x bodies?

**Requirements/Evaluation:** participation, one student-led discussion period, two written essays of 5-6 pages, final written reflection.

**Prerequisites:** LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**WGSS 315  (F) Paris on Fire: Incendiary Voices from the City of Light  (DPE)**

**Cross-listings:** RLFR 316 / COMP 314

**Secondary Cross-listing**

During the 1830s, Honoré de Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer."
Similarly, writers from Victor Hugo to Émile Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been fêted as the "City of Light" for its Enlightenment legacy, Eiffel Tower modernity, and luminous energy, captured in countless paintings, photographs, and film. However, Paris is also the site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repeatedly sparked with incendiary passion and political protest. As fires raged during the 2005 riots, many heard the echo of Hitler's 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty-first century? Following the 2015 terrorist attacks, many wondered yet again what the future would hold for the City of Light. To answer these questions, we will examine the social, political, and literary landscape of Paris during the nineteenth, twentieth, and twenty-first centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. Conducted in French.

Requirements/Evaluation:  Active class participation, midterm exam, and two papers.
Prerequisites:  Strong performance in RLFR 106, or another RLFR 200-level or 300-level course, or permission of the instructor.
Enrollment Limit:  16
Enrollment Preferences:  French Majors and French Certificate students, Comparative Literature Majors.
Expected Class Size:  16
Grading:  yes pass/fail option,  no fifth course option
Distributions:  (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 316(D1) WGSS 315(D2) COMP 314(D1)
Difference, Power, and Equity Notes: This course examines the operations of difference, power, and equity in French film and fiction, history and politics, art and culture, from 1830 to 2025. In readings, lectures, and discussions, we will look at how class, ethnicity, gender, and sexuality structure the lives and struggles of the working class and urban poor, women and men, migrants and immigrants. Students will learn critical tools to better understand and interrogate social inequity and injustice.

WGSS 319 (F)  Gender and the Family in Chinese History  (DPE)
Cross-listings:  HIST 319 / ASIA 319
Secondary Cross-listing
Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generation, and sexuality in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and child-rearing practices associated with traditional ideals of family. We will also examine the wide variety of "heterodox" practices that existed alongside these ideals, debates over and critiques of gender, family, and sexuality in the twentieth century and in China today.
Requirements/Evaluation:  active participation in discussions and group work, short skills-based writing assignments (2-4 pgs) and short essays (5-7 pgs) leading toward a final paper (10-15 pages).
Prerequisites:  none; open to first year-students with instructors permission
Enrollment Limit:  25
Enrollment Preferences:  History and WGSS majors; Asian Studies concentrators.
Expected Class Size:  12
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 320  (S) Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture

Cross-listings: AFR 320 / AMST 320

Secondary Cross-listing

Whether presented as maternal saints, divas, video vixens, or bitches, black female celebrities navigate a tumultuous terrain in popular culture. This course considers the ways that black female celebrities such as Oprah, Rihanna, Nicki Minaj, Beyoncé, Janet Jackson, and Michelle Obama negotiate womanhood and sexuality, and the popular landscapes through which we witness that negotiation. It also engages contemporary black feminist scholarship, which most frequently presents the presentation of black female bodies in popular media forms as exploitive. We will review historical stereotypes of black women in popular media forms, discuss the history of the "politics of respectability" within black culture, engage black feminist responses to these types, and examine theoretical approaches to assess social constructions of womanhood and sexuality. We will also consider provocative questions relevant to discussions of contemporary black sexual politics: Should we view these women as feminists? Are they merely representatives of cultural commodification and control of black women's bodies? Do these women best exemplify the reiteration of problematic characterizations? Are they positive models for demonstrating female empowerment, agency, or "fierceness?" This course explores the histories of representation of black female figures in popular culture, and in so doing, troubles contemporary considerations of black womanhood and sexuality.

Requirements/Evaluation: evaluation will be based on attendance/participation, short response papers, and a midterm and final portfolio

Prerequisites: none

Enrollment Limit: 19

WGSS 321  (S) Contemporary Immigration Landscapes

Cross-listings: AMST 312 / LATS 335

Secondary Cross-listing

What is the relationship between racial formations, transnational migrations, and power in the United States? How do geometries of power shape our relationship to place? How do people navigate and resist the exercise of unequal power relations? This course examines geographies of transnational migration, bringing together insights from critical race theory, queer theory, and postcolonial theories to enrich our understanding of human geography. Theories on belonging, identity, and power will serve as a bridge between the state's role in structuring the lives of transnational migrants and the politics of conceiving futures as alternatives to current political geographic imaginations in the U.S. immigration landscape. Through an interdisciplinary exploration of 'migration,' we will examine the depth and range of migrants' experiences (such as through Javier Zamora's Solito: A Memoir) and how these communities' lives are structured through various axes of difference, such as race, gender, sexuality, class, and documentation status. We will give attention to the variegated landscape of immigration enforcement and its relationship to issues of labor, political economy, and incarceration, among others. Through materials that embrace both social science and humanities approaches, this course will help students develop a critical understanding of how space matters when considering transnational processes of migration as well as migrant communities' political practices throughout the US. This course asks students to compare and contrast the intellectual genealogies covered and apply these theories of identity and power to case studies that focus on political interventions for social justice (such as UndocuQueers in the immigrant justice movement).

Requirements/Evaluation: Your learning is evaluated through class participation (discussion, responses, & in-class worksheets), three assignments, and a final project.

WGSS 322 (S) Introduction to Critical Theory: The Enlightenment and Its Critics (DPE) (WS)

Cross-listings: PHIL 321

Secondary Cross-listing

We often associate modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress with the Enlightenment. How can we reconcile this faith with the persistence of domination today? Critical theory aims not merely to understand the "struggles and wishes of the age" as Marx one described it, but with emancipation from domination. Understood in this way, critical theory is identified closely with the intellectual tradition of the Frankfurt School. In this tutorial, will read works in critical theory from the 18th century to the present, some from the Frankfurt tradition, and some not. We will focus on particular topics, examples of which are the following: normative critique, capitalism, authoritarianism, mass culture, enlightenment and reason, progress, violence, the domination of nature, white supremacy, patriarchy and colonialism.

Class Format: students will work in pairs and meet for 75 minutes each week with the professor

Requirements/Evaluation: Each student will write and present a 5 or 6-page paper every other week and a commentary on their partner's essay on alternate weeks; evaluations are based on written work as well as level of preparation and the quality of intellectual engagement in tutorial meetings

Prerequisites: PHIL 202, Kant course, modern political theory, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors and students with background in modern political theory, or other relevant demonstrated background.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 328 (S) Austen and Eliot

Cross-listings:

Secondary Cross-listing

Austen and Eliot profoundly influenced the course of the novel by making internal consciousness crucial to narrative form. In this course we will
explore Austen's innovative aesthetic strategies and the ways in which Eliot assimilated and transformed them. By placing each writer's work in its political and philosophical context—in Austen's case, reactions to the aftermath of the French Revolution, in Eliot's, to the failed mid-century European revolutions and the pressures of British imperialism—we will consider how each writer conceives social and historical exigencies to shape comedies and dramas of consciousness. Readings will include Austen's Pride and Prejudice, Emma, Mansfield Park, and Persuasion; Eliot's The Mill on the Floss, The Lifted Veil; and Daniel Deronda; selected letters and prose; and critical essays.

**Class Format:** discussion

**Requirements/Evaluation:** two papers of approximately 8-10 pages

**Prerequisites:** a Gateway course or permission of the instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** junior and senior English majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**WGSS 329 (F) Writing Gender in Sci-Fi and Speculative Fictions (DPE)**

**Cross-listings:** ENGL 329 / STS 323

**Secondary Cross-listing**

This creative writing course will pair selected readings in feminist STS and queer theory with science fiction, speculative fiction, and horror stories that together put questions to gender. How and when is sci-fi a home for radical re-imaginings of gender? When and why does "genre fiction" house (and facilitate) radical gender politics—or their opposite? Readings may include works by Octavia Butler, Ursula Le Guin, Brian Evanson, and Samuel Delany. Students will both analyze these fictions and take them as inspirations for their own stories and worlds.

**Class Format:** This course balance seminar-style discussion with workshops examining students' creative writing.

**Requirements/Evaluation:** Students will be evaluated on three substantial pieces of writing, in multiple drafts. Students will be able to choose their balance of creative and analytical (expository) prose (2-1 or 1-2). Attendance, along with seminar and workshop discussion, will count toward the final grade. There will be no exam.

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** STS concentrators; WGSS majors; students who have not taken other creative writing courses at Williams.

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 329(D2) ENGL 329(D1) STS 323(D2)

**Difference, Power, and Equity Notes:** In this course students will confront and reflect on the operations of difference, power, and equity through readings, class discussions, and assignments. Readings include scholarship on the construction of gender and sexuality, as well as works of fiction that denaturalize the categories of sex and gender. Course assignments will include expository and creative writing, and students will work in both modes to imagine how this world could be otherwise and how other worlds could be.

**SEM Section:** 01  W 1:10 pm - 3:50 pm  Ezra D. Feldman

**WGSS 330 (S) "A language to hear myself": Advanced Studies in Feminist Poetry and Poetics (DPE)**
The title of this course comes from Adrienne Rich's 1969 poem "Tear Gas," grounding our study in 1960s, 70s, and 80s feminist activist poetry but also in our current moment to answer a fundamental question: what can poetry do for us? In this period, feminist activist poets were at the center of a revolutionary social justice movement that changed the world. Feminist presses published much of the new poetry. This course focuses on the theory and practice of feminist poetry and print culture during this period, and how feminist experiments in language changed how we understand American poetry. We focus on the theoretical writings and poetry chapbooks of a diverse group of poets who powered the movement, including Audre Lorde, Mitsuye Yamada, Nelly Wong, Robin Morgan, June Jordan, Joy Harjo, Gloria Anzaldúa, Sonia Sanchez, Adrienne Rich, Judy Grahn, and Pat Parker. We also read the work of some later feminist theorists, such as Sara Ahmed. We spend time in the archives, analyzing documents from the period, including feminist magazines and original publications of poetry chapbooks often published by the period's many feminist presses and consider how such attention allows us to construct alternative narratives for feminism and American poetry. Writing at the intersections of race, class, gender, and sexuality, and of multiple social justice movements (Civil Rights, anti-Vietnam War, LGBTQ activism, and Black Power), these poets gave us a new language to "hear," not only ourselves, but the experience and pain of others, and, in so doing, they moved personal experience into public discourse around issues of inequality and human flourishing in a democratic society.

Requirements/Evaluation: short analysis papers (4-5 pages), creative (1-2 pages), Perusall annotations, longer final researched paper (10-12 pages) or alternative digital project, curated exhibition of archival materials in Special Collections

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: English, Women's, Gender, and Sexuality Studies, American Studies majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 330(D2) ENGL 302(D1) AMST 310(D2)

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the feminist movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the period.

WGSS 332 (S) Gender, Sexuality & Disability (DPE)

Cross-listings: AMST 369

Primary Cross-listing

From classical mythology to reality TV, bodies and minds that depart from the ordinary have long been sources of popular fascination. In recent history, people marked as "disabled" have been subject to medical scrutiny, labeled deficient or defective, and often barred from full participation in society. Yet, what counts as "disability"--and who counts as disabled--varies greatly depending on cultural and historical context. Arguably, disability has more to do with social conditions than with any innate characteristics of disabled people themselves. This class introduces disability studies, situating disability within its historical, political, and cultural contexts. As a GWSS course, we'll center queer and feminist perspectives; this class also emphasizes recent work. Echoing arguments in gender and sexuality studies, scholars have insisted that disability is not a natural or biological fact, but a socially constructed category. As such, scholars and activists have challenged medical models that conceptualize disability as an individual defect in need of elimination. They have also questioned the idea that disability is simply a minority identity -- to the contrary, disability is a condition that most humans will experience at some point in our lives. This class frames "disability" broadly--encompassing not just conditions of physical impairment, but a wide range of bodily, sensory, cognitive, emotional, and behavioral differences and capacities. This class also centers how disability is produced intersectionally through regimes like race, capitalism, and empire. Topics include: theories of embodiment, eugenics, institutionalization and incarceration, neurodivergence, mad studies, the politics of health, storytelling and narrative, disability justice activism, neoliberalism, biopolitics, and crip theory. Along with scholarly writings, we'll consider activist texts, popular press, fiction, memoir, and a variety of
other media.

**Requirements/Evaluation:** Students will submit ongoing brief/informal forum posts, midterm essay, and a longer final research project (10-12 pgs); students will also work in small groups to facilitate a section of class twice per term.

**Prerequisites:** WGSS 101-level familiarity would be helpful, but is not required.

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference to majors, 3rd and 4th year students.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**WGSS 334 (F) Islam and Feminism**

**Cross-listings:** REL 332 / ARAB 332

**Secondary Cross-listing**

This course examines the relationship between feminism and Islam, exploring Islamic feminism, decolonial feminism, and the critiques of imperialist feminism, homonationalism, and femonationalism. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses to such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will explore the breadth of Islamic feminist literature, covering: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology. The final part of the course will focus on Muslim feminist and decolonial feminist critiques of feminism and its link to imperialism and the weaponization of gender and sexuality in global discourse.

**Requirements/Evaluation:** weekly responses, midterm essay, final research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**WGSS 336 (S) Foucault Now** (DPE) (WS)

**Cross-listings:** PHL 326

**Secondary Cross-listing**

If we think of Michel Foucault as engaged in writing histories, or genealogies, of his own present designed to undercut the sense of the obviousness of
certain practices and ways of thinking, categorizing, and knowing, we can easily imagine that he might now be questioning different aspects of our contemporary “present” than the ones standardly associated with his name, namely, panopticons and surveillance, discipline, criminalization, the biopolitics of health, the normal and the abnormal, etc. In this course we address the question: How is the present we find ourselves living today different from the one that the author Foucault wrote about in the 1960s, 70s and early 80s before his untimely death in 1984? What differentiates today from yesterday? And what present practices and ways of thinking and knowing might be questioned using Foucault’s tools, genealogy in particular, for resisting unnecessary constraints on freedom and the perpetuation of unnecessary suffering? What is his legacy today? In this tutorial you will read from a selection of Foucault’s texts (books, lectures, interviews) in order to acquire a firm grasp of his method of “critique” and his way of looking at the interconnections between forms of power and the knowledge associated with particular disciplines. We will also read more recent work by Foucault inspired scholars on topics such as the biopolitics of gender, the genealogy of terrorism, the informational person (how we become our data), and neoliberal subjects.

Class Format: I may use a seminar format at least twice during the semester.

Requirements/Evaluation: evaluation will be based on written work (six 5- to 6-page papers, and six 2-3 page commentaries on their partner’s papers) as well as the quality and level of preparation and intellectual engagement in our weekly meetings.

Prerequisites: Relevant background in critical theory, social theory, political theory or philosophy.

Enrollment Limit: 10

Enrollment Preferences: I will give preference to philosophy majors and to upper class students with a demonstrated background in critical theories. Some sophomores may be eligible.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 336(D2) PHIL 326(D2)

Writing Skills Notes: This is a tutorial. Students will write five or six 5-6-page papers during the course of the the semester and receive significant feedback on each paper. At the end of each tutorial meeting the student is asked to reflect on how they would approach the paper differently if they were to rewrite it.

Difference, Power, and Equity Notes: In this course we address power and domination, reflect on the difference between them, and treat power relations as not only an inevitable feature of any society, but as both enabling and constraining. Moreover, we will read material that uses Foucauldian tools to address contemporary issues involving sexism and racism, digital surveillance, and the abolition of prisons.

WGSS 342 (S) Sexuality in US Modernisms (DPE)

Cross-listings: ENGL 341

Secondary Cross-listing

This course investigates how sexual identities, desires, and acts are represented and reproduced in U.S. literary and popular culture. Focusing on 1880-1940 (when, in the U.S. the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), we will explore what it means to read and theorize "queerly." Among the questions we will ask are: What counts as "sex" or "sexual identity" in a text? Are there definably queer and/or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular literary developments--the move from realism to modernism--and historical events such as the rise of sexology, first-wave feminism and the Harlem Renaissance--have had on queer cultural production. The class will also introduce students to some of the most influential examples of queer literary and cultural theory. Readings may include works by authors such as James, Cather, Far, Hughes, Nugent, Stein, Fitzgerald, and Larsen, as well as queer literary theory and critique by scholars such as Butler, Coviello, Ferguson, Foucault, Freeman, Freund, Hartman, Lorde, Love, Muñoz, Rich, Rodriguez, Ross, and Sedgwick.

Class Format: discussion/seminar

Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one 7-9 -page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors and/or students interested in WGSS

Expected Class Size: 25

Not offered current academic year

WGSS 343 (S) Representations of Racial-Sexual Violence from Enslavement to Emancipation

Cross-listings: AMST 343 / INTR 343 / AFR 343

Secondary Cross-listing

This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, lgbtq and ethnic/black studies. Books include Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro; At the Dark End of the Street; films include
Birth of a Nation; Bush Mama; To Kill a Mockingbird. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

Class Format: students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence

Requirements/Evaluation: weekly primary and response papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference given to juniors and seniors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

WGSS 345 (F) The Pedagogy of Liberation (DPE)

Education is inherently political, and politics necessarily involves pedagogy. Who should teach, what is taught, how it is taught, and why it is taught are questions hotly debated at all levels and in all sites of education because the answers have implications for societal reproduction or transformation. Politicians, activists, even family members at the dinner table all seek to educate in ways that incline us toward particular political positions. At the heart of this class stands the question: if different pedagogies point us in different political directions, then what kind of pedagogy or pedagogies serve the end of liberation from oppression and why? Are there certain pedagogical "goods" that reliably serve the goal of liberation across sites? Or do different sites require different approaches? To begin to answer these questions, we will engage a variety of thinker-teachers and groups known for their commitment to a "pedagogy of liberation." While feminist thinkers will be foregrounded, we may also look to thinker-teachers who and groups that do not claim this label. In addition to engaging texts which reflect on different aspects of radical pedagogy (content, form, method, etc.) and radical pedagogy in different settings (the college classroom, the social movement headquarters, the home), we will witness radical pedagogy in practice. Moreover, we will enact various radical pedagogical strategies in our own classroom and beyond.

Requirements/Evaluation: Perusall, aspirational learning statement, syllabus co-construction and reflection, class facilitation, interview project and reflection, one-on-one discussions

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Preference will be given to WGSS majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This class is concerned with the relationship between pedagogy and equity - how can pedagogy be leveraged to combat oppression and encourage equity? In it, students will gain not just insight on, but practice in enacting radical democratic pedagogies that flatten power differentials and encourage effective engagement across difference.

WGSS 347 (F) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: AMST 358 / SOC 340 / THEA 341 / LATS 341

Primary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and
marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

Prerequisites: none; WGSS 202 would be helpful

Enrollment Limit: 15

Enrollment Preferences: a short statement of interest will be solicited; a subsection of applicants may be interviewed

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 358(D2) WGSS 347(D2) SOC 340(D2) THEA 341(D1) LATS 341(D2)

Difference, Power, and Equity Notes: This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

WGSS 349 Race, Gender, and Labor (DPE)

This course draws on approaches from sociology, labor studies, and Black studies to examine the historical and contemporary intersections of race, gender, and labor. In particular, we will explore the racial, classed, and gendered dimensions of the labor movement, historic economic shifts that impacted and reorganized U.S. labor regimes, Black labor in slavery’s afterlife as it relates to prisons, and global analyses of racialized gendered labor regimes for migrant and immigrant labor within the Global South and the U.S. We will begin the course by grounding ourselves in the Black feminist framework of intersectionality, which will guide our analyses of the intersections of race, class, and gender in labor formations. We will then focus on the monumental shift in labor relations that enslaved Black people’s toppling of the plantation system in the US South brought forth, as well as the technologies of re-enslavement instituted as a reaction to Black people’s emancipation. After that, we will move through different themes and time periods, considering how race, gender, and class intersect in regimes of labor exploitation and the successes and setbacks of labor movements.

Requirements/Evaluation: Major course requirements include engagement in course discussions, reading reflections, a midterm paper, group presentations, and final research paper.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology, Women, Gender, and Sexuality Studies (WGSS) and/or Africana Studies majors

Expected Class Size: 15

Grading:

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course foregrounds intersectional subjectivities and perspectives. It provides interdisciplinary toolkits to strengthen students’ ability to identify and address how unequal power dynamics sustain difference and inequity—e.g., in racial and gender pay gaps and inequalities in the globalized care economy—and to practice collective strategies for transformative social change, engaging with critical epistemologies developed by workers fighting for racial, gender, and economic justice.

Not offered current academic year

WGSS 351 (F) Trans/national Femininities (DPE)

This course studies femininity in a trans/national context. Here, trans suggests that we will not be looking at femininity as necessarily or inherently
attached to the biological category "female." Instead, we will think about femininity as a gender performed by and written on many kinds of bodies, with specific attention to trans feminine experiences. The term "transnational" suggests that we will attempt to talk about femininity not only in the context of the US and the "western" world but across different nations and within a broader socio-cultural framework. We will consider a broad range of disciplinary accounts of femininity in the US and beyond. We will discuss how class, bodily comportment, ability, and other facets affect feminine performance and feminine/feminist/queer politics. Our course materials include scholarship, film, art, and literature. Finally, this course centers the voices of trans and cis women, femmes, and queer BIPOC (black, indigenous, and/or people of color).

Requirements/Evaluation: short informal writing assignments, discussion facilitation, in class activities and discussion, student presentations, substantive student-led final project.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course examines how femininity is constructed on multiple kinds of bodies and across multiple national contexts. It employs a wide range of theoretical approaches for thinking about femininity and the diversity of feminine experiences. We examine femininity as a social location which intersects with embodiment, ability, class, and nation in order to consider structures of power that both effect and are affected by our understandings of femininity.

WGSS 359 (S) Queer of Color Critique and Literatures (DPE)

Queer of color critique (QoCC) takes an intersectional approach to the study of sexuality and is particularly interested in how sexuality is constituted with and through other social formations like race, class, ability, gender, and nation. It draws on many different theoretical frameworks (women of color feminisms, materialist and post structuralist critiques, and queer critiques) and draws from many different disciplines (sociology, literary studies, psychology, etc). In this course we will study the key histories, terms, and debates in QoCC. Rather than imagine QoCC as a response to queer critique alone, we will study it as a co-occurring field with a long history. Reflecting QoCC’s interest in national and diasporic formations, we will situate our exploration of queerness in a transnational and global perspective. Our course materials include scholarly works as well as arts and literatures which develop and employ QoCC. QoCC is not only a theoretical framework, or a way of interpreting the world. Through our discussions and assignments, we will use QoCC to imagine new worlds.

Requirements/Evaluation: short informal writing assignments, 2 formal essays, discussion facilitation, in class activities, substantive student-led final project.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: WGSS majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: his course examines non-normative sexualities in marginalized groups within and outside western communities. It draws on scholarship, literature, arts and film to understand diverse queer of color experiences and to understand queer of color critique as a field and methodology. It considers how sexuality is informed by and central to how we understand power, discrimination, normativity, and global sexual politics. It helps situate sexuality within a broader nexus of concerns about identity polit

Spring 2025
WGSS 361  (S) Marking Presence: Reading (Dis)ability in/to Latinx Media  (DPE)

Cross-listings:  LATS 344 / AMST 361

Secondary Cross-listing

This course explores the intersection of (dis)ability and Latinx identity in the contemporary US context. Employing Angharad Valdivia’s (2020) notion of “marking presence” to describe the intentional ways in which Latinx subjects gain and hold on to mainstream media space, the class places the fields of Disability Studies, Latinx Studies, Gender Studies and Media Studies into conversation. We address the following questions and others: What does media reveal to us about the place of (dis)ability and Latinidad in contemporary US life, particularly as these categories intersect with questions of gender, sexuality, national identity and citizenship? How might we read Latinidad and (dis)ability into media texts in which they are not otherwise centered? What are the advantages of deploying mainstream media presence as a claim to power for disabled Latinx individuals, particularly those who are multiply marginalized? What are the limitations of such an approach? We will focus on these questions, as well as deploy various media examples (podcasts, social media, film, television and music) alongside scholarly texts to explore topics impacting the Latinx communities such as the relationship between the relationship between immigration and (dis)ability, intergenerational trauma and migration, the gendered archetype of the Latina “Loca,” (dis)ability in academia, the politics of self-care amongst Latinxs in the neoliberal context, and the very legal, cultural, and social category of “(dis)abled” itself within dominant society as well as in Latinx communities.

Requirements/Evaluation:  Two short (5-6 page) essays; One media analysis exercise; One online group project; One final reflection letter.

Prerequisites:  None.

Enrollment Limit:  12

Enrollment Preferences:  Preference given to LATS concentrators, AMST majors and WGSS majors by seniority.

Expected Class Size:  12

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 362  (S)  "Rebel Ecologies": Black and Indigenous Struggles for Land and Life"

Cross-listings:  AFR 300 / ENVI 300 / AMST 362

Secondary Cross-listing

This course will ask, what other socioecological models exist? We will weave together a study of differing, yet often converging or synergistic traditions of Black/Womantist eco-feminism that often confronts the social constructions of race, gender, class and sexuality, dominant religion as a means of social control, imperialism, capitalism, and colonialism; Ecosocialism which often frames ecology in terms of a mode of production beyond or outside of capitalism; and Indigenous perspectives on resistance to capitalist extraction, imperialism, and colonialism. Given ongoing struggles against the extraction of land and labor, the urgent calls raised in the present-day "climate strike," the COVID-19 Pandemic, Black-led pandemic rebellions, along with long(er) histories of land-based peoples around the planet opposing racial capitalism, settler colonialism, and imperialism, this class will explore not only what those in opposition to both extractivism and expropriation resist, but also what we want. We will critique binaries, settler notions of time and explore theories of change. Additionally, this class will look to an array of literature, film, sound, and other forms of cultural production in order to not just "locate," but describe and reveal rebel ecological visions emerging "from below." Ultimately this class will consider how the above ecological praxis can work simultaneously and within a sense of plurality, examining what we can learn from the work of activists, intellectuals, and defenders on the frontline. This course is an extension of Dr. Guess' concept of a "rebel ecology."

Requirements/Evaluation:  The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader at least twice 20%; Weekly 500-word Literature Review 20%; One Final Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More projects might include, an annotated bibliography of 7 texts, film
We study and seek "campuses where students feel enabled to develop their life projects, building a sense of self-efficacy and respecting others, in
community spaces that work to diminish rather than augment power asymmetries.” -- Sexual Citizens (Hirsch and Khan, 2020). Students will design and pursue innovative ethnographic projects that explore campus or community health. We will learn ethnographic techniques such as observant participation, interviewing, focus groups, qualitative surveys, as well as design thinking and data visualization skills. We use and critique the methods of medical anthropology and medical sociology in order to hone our skills in participatory research. Every week, we collaborate with and share our research with our participants and peers both inside and outside class through a variety of innovative exercises. We attend to the parallel roles of narrative and listening in both medicine and ethnography, as we contrast the discourse of providers & patients along with researchers & participants. We aim to understand the strengths and limits of ethnographic inquiry while privileging marginalized voices and attending to power and identity within our participatory research framework. We recognize that our campus health projects are always already shaped by power and privilege, as we examine the ways that daily life, individual practices, and collective institutions shape health on and off campus. Our ethnographic case studies explore how systemic inequalities of wealth, race, gender, sex, ethnicity, and citizenship shape landscapes of pediatric care, mental health, maternity care, and campus sexual assault in the US and elsewhere. We consider how lived practices shape health access & outcomes as well as well-being in our communities and on our campus.

Requirements/Evaluation: Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a final presentation that includes data visualizations and analysis of research findings.

Prerequisites: A course in Anthropology, Sociology, STS or in DIV II is strongly recommended

Enrollment Limit: 19

Enrollment Preferences: Majors in Anthropology, Sociology, WGSS; Concentrators in PH, STS, ASIA, ENVI

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ANTH 371(D2) WGSS 371(D2) STS 370(D2)

Writing Skills Notes: This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

Difference, Power, and Equity Notes: This class uses experiential learning to examine the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It explores the ways that intersectionality and implicit bias shapes health and well-being in patient/provider encounters as well as ethnographic research. It engages with and critiques efforts to 'improve' community and individual health outcomes in the US and elsewhere across the globe.

WGSS 375 (S) Asian American Sexualities (DPE)

Cross-listings: AMST 375 / AAS 375

Secondary Cross-listing

Perceived as objects of sexual use and perversity, how might Asian/Asian American subjects contend with these projections and enact their own genders and sexualities? Anchored in this question, this theory-intensive seminar will provide a study of seminal and recent scholarship at the intersections of Asian American Studies, feminist criticism, and queer theory that focus on or are read in tandem with a collection of cultural expressions, including film, sculpture, poetry, drag performance, music, manifests, and visual and performance art. To first root us, the seminar will introduce key uses and theorizations of sex/gender, sexuality, and queerness. Then, across the semester, we will focus on deployments of them through a range of topics, including sexual subjugation and activism of "comfort women," orientalism/orientalism, the queering of Sikh, South Asian, and Muslim Americans post-9/11, western demands to "come out," representations in pornography, lesbian invisibility, devaluation of trans* lives, etc., exploring questions of racialized, gendered, and sexual subordination alongside power, pleasure, play, and critique. To this end, we will approach gender and sexuality not as identity categories that one is or has but socially and biologically construed categories, loci for intervention and play, anti-normative positions, lived experiences, and ever-evolving processes of doing, becoming, and unbecoming.

Requirements/Evaluation: in-class discussion, weekly posts, short presentation, one paper, and one longer paper or creative assignment that will be peer reviewed and revised

Prerequisites: AMST 125 or WGSS 101/202

Enrollment Limit: 15
**Enrollment Preferences:** AMST/WGSS majors and AAS concentrators will be given priority; prospective AA concentrators

**Expected Class Size:** 15

**WGSS 376 (F) Sex, Gender, and the Law in U.S. History (DPE)**

**Cross-listings:** HIST 376

**Secondary Cross-listing**

This course explores that ways in which the law has defined and regulated gender and sexuality in the United States, and the ways that individuals have experienced and responded to those definitions and regulations. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. This course examines how assumptions about gender and sexuality have informed the creation and development of American law and the changing meanings of citizenship; considers how laws regulating sex and gender have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others; and assesses the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty, work, and military service.

**Requirements/Evaluation:** four papers, including three short (3-5-pages) papers, and one final paper of 8-10 pages

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, Women's, Gender and Sexuality Studies majors

**WGSS 391 (F)  Contemporary North American Queer Literatures and Theories  (DPE)**

**Cross-listings:** ENGL 391

**Secondary Cross-listing**

Moving through the mid-twentieth century and into the twenty-first, this course will consider how North American writers have represented queer life in all its complexities. From the problem of the happy ending to the intersectional politics of representation, the narrative complexities of coming out to the rejection of identity, the course will consider the relationship between literary form and queer content. In so doing, it will also touch upon some of the key debates in queer literary theory and consider the impact of events such as civil rights movements, gay and lesbian and trans uprisings, the AIDS crisis, debates over respectability politics, and current efforts to police what students read in schools on literary and cultural production. Readings may include work by such authors as Baldwin, Highsmith, Rich, Lorde, Delany, Kushner, Feinberg, Bechdel, Thom, and Machado and theorists such as Ferguson, Sedgwick, Fawaz, Love, Butler, and Hartman.

**Requirements/Evaluation:** active class participation, several short writing assignments, two 5-page papers, and one longer research paper.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor;

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors; WGSS majors

Fall 2024
WGSS 398 (F) Feminist and Queer Horror Films (DPE)

Cross-listings: ENGL 333 / AMST 390 / COMP 390 / THEA 390

Primary Cross-listing
This course focuses on pairing theoretical readings with a variety of horror films with feminist or queer themes. Many tropes are associated with this genre - "the final girl" in slasher movies, "the transvestite murderer," femme lesbian vampires, supernatural BDSM figures, vampires as allegories for HIV/AIDS, werewolves as metaphors for FTM gender transitions or puberty, lonely mothers in creaky houses as unreliable narrators, Satanic spawn, and creepy long-haired girls. Some films reinforce gender stereotypes while others snap on more explicitly feminist and queer lenses. This course functions as a survey of many different genres, introducing students to classic 1970s films and working up to the present day and we will learn how these tropes developed and then were subverted by more modern day films such as those by A24 Studies and the new renaissance of Black horror, etc. Most films will focus on the US, with some notable exceptions in Japan, Spain, and elsewhere globally. There will be graphic content. You must be 18 or over to take this class.

Requirements/Evaluation: Class participation, short reflection papers, 2-3 extemporaneous oral class responses, several creative assignments.

Prerequisites: None. Prior WGSS courses will be helpful.

Enrollment Limit: 15

Enrollment Preferences: Stage 1 is a statement of interest form; Stage 2 will be a very brief interview. There is NO preference by major or class year.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Some of the creative assignments will have an "artsy-craftsy" component, but should not cost more than 25 dollars total per student per semester, though amounts will vary depending on how the student chooses to execute the assignment.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 398(D2) ENGL 333(D1) AMST 390(D2) COMP 390(D1) THEA 390(D1)

Difference, Power, and Equity Notes: This course necessarily examines power when it comes to gender and sexuality - who has it? what do they do with it? how does this power turn deadly? how can agency be regained? Horror is almost never about equitable situations but rather the imbalance that comes from difference (along whatever axis) causing a lack of equity.

WGSS 402 (F) Marxist Feminisms: Race, Performance, Labor (DPE) (WS)

Cross-listings: AMST 402 / AAS 402

Secondary Cross-listing
This seminar provides an overview of queer, black and women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, including Capital Volume I, we will examine a range of social positions and modes of extraction that complicate Marx’s emphasis on the white male industrial factory worker. Every week, we will focus on texts that foreground conditions of reproduction, racial slavery, care and domestic work, indentured servitude, immigrant labor, land expropriation, and sex work among others. Throughout the seminar and specifically at the close of it, we will turn to critical perspectives and aesthetic practices that not only respond to these conditions but also incite new social relations and ways of being in the world. As such, this seminar will equip students with critical understandings of how racial capitalism has fundamentally relied on the mass elimination, capture, recruitment, and displacement of different racialized, gendered, and abled bodies in and beyond the U.S. as well as how the capitalist system of value and life under these conditions can and must be undone and reimagined.

Requirements/Evaluation: in-class participation, presentation, weekly posts, paper, and final project (paper, community resource distribution proposal, and creative project options)

Prerequisites: AMST 101, AMST/AAS 125, or similar courses
Enrollment Limit: 12
Enrollment Preferences: AMST and WGSS juniors and seniors, AAS concentrators
Expected Class Size: 12
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 402(D2) AAS 402(D2) WGSS 402(D2)

Writing Skills Notes: In addition to weekly posts, students will engage a longer process of writing and sharing a presentation paper with the class, give/receive feedback, and submit a revised paper.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement as it explores difference, power, and equity by asking how racial, gendered, sexual, and class differences are produced, whose voices are centered and whose are excluded, and what forms of labor are valued/devalued over others.

WGSS 408 (S) Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers (DPE)

Cross-listings: RLFR 412 / COMP 412

Secondary Cross-listing

In 1834, Honoré de Balzac wrote that “Paris is a veritable ocean. Sound it: you will never know its depth.” The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the miserable housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social climber Julien Sorel, the ambitious undergraduate Eugène de Rastignac, and the domestically abused Gervaise Macquart became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. As recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.

Requirements/Evaluation: Active class participation, midterm exam, and two papers.

Prerequisites: A 200-level or 300-level RLFR course at Williams, or Advanced coursework during Study Abroad in France or the Francophone World, or permission of the instructor.

Enrollment Limit: 16
Enrollment Preferences: French Majors and French Certificate students, Comparative Literature Majors, Women's, Gender, & Sexuality Studies Majors.
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 408(D2) RLFR 412(D1) COMP 412(D1)

Difference, Power, and Equity Notes: This course analyzes difference, power, and equity through its examination of gender diversity, institutional misogyny, urban criminality, human sexuality, social injustice, and revolutionary struggle in nineteenth-century France. In class discussions and critical essays on 1830s-1880s France, students will examine and articulate the inequities and injustices between women and men, the privileged and oppressed, the wealthy and working class, and both the rural and urban poor.
WGSS 411  (S)  Psychoanalysis and Its Discontents: The Psyche and the Social  (DPE)

For many decades, psychoanalysis has been profoundly influential to radical thinkers seeking to overthrow regimes of racism, colonialism, heteropatriarchy, capitalism, and ableism. At the same time, psychoanalysis has also been crucial to enforcing those very regimes. Whether mobilized towards liberatory or oppressive ends, it is difficult to overstate psychoanalysis's influence on intellect, politics, and everyday social existence over the last century—even though we don’t always realize it's there. If you bristle at the mention of Freud but think microaggressions are real, content warnings are a good idea, or that sharing about your feelings supports your wellbeing and relationships, your beliefs and values are probably indebted to psychoanalysis. This class surveys psychoanalytic perspectives on "the social," that is, race, gender, sexuality, capitalism, dis/ability, imperialism, and so on. It also provides an introduction to basic foundations of psychoanalytic thought—especially Freud, object relations theory, and a bit of Lacan—with an emphasis on how the psychoanalytic canon underpins contemporary queer, feminist, and postcolonial theory; ethnic studies; disability studies; and religious studies. Building from foundations, we'll also examine radical psychoanalysis alongside radical critiques of psychoanalysis. Additional topics and bodies of thought include trauma, Afropessimism, sexual difference feminism, antipsychiatry, and schizoanalysis. This class satisfies the WGSS Junior/Senior Seminar major requirement.

Requirements/Evaluation:  weekly discussion questions, oral presentations, participation, dream journal, final research project
Prerequisites:  Students will benefit from coursework backgrounds in WGSS, AMST, ethnic studies, and/or the humanities broadly.
Enrollment Limit:  19
Enrollment Preferences:  WGSS majors, juniors/seniors
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Unit Notes:  senior seminar
Distributions:  (D2)  (DPE)

Difference, Power, and Equity Notes:  This class examines psychoanalysis's role in shaping difference, power, and equity.

WGSS 413  (F)  Feminist Technoscience  (DPE)

Cross-listings:  STS 413
Secondary Cross-listing

Are Feminism and Science compatible commitments? What do these nouns mean when paired with one another, when capitalized (or not), when pluralized (or not), and when deployed by a range of authors in different disciplines? Scholars of feminist science and technology studies (FSTS) have addressed these questions in their studies of scientific objectivity, technological vulnerability, environmentalism, and the makings (or doings) of race as well as gender. We will explore these questions and topics with a view to identifying the range of ethical, political, and epistemological practices within feminist and critical technoscience. We will read theoretical texts in FSTS, such as Donna Haraway’s "Situated Knowledges" and Safiya Umoja Noble's "A future for intersectional black feminist technology studies." We will also read case studies, such as Pat Treusch’s "The Art of Failure in Robotics" and Emily Martin's "The Egg and the Sperm: How Science Has Constructed a Romance Based on Stereotypical Male-Female Roles." While our preliminary readings will be set in advance, students will help shape the syllabus as we advance toward a better understanding of feminist technoscience's potentials and limitations at a time when technical change often outpaces careful consideration of its consequences.

Requirements/Evaluation:  discussion participation; five response papers (~2 pages); mid-semester essay (8 pages); annotated bibliography; final research project (12-15 page essay + in-class presentation)
Prerequisites:  none
Enrollment Limit:  12
Enrollment Preferences:  Science and Technology Studies concentrators
Expected Class Size:  12
Grading:  yes pass/fail option,  yes fifth course option
This course is cross-listed and the prefixes carry the following divisional credit:

STS 413(D2) WGSS 413(D2)

Difference, Power, and Equity Notes: Central to "Feminist Technoscience" is a recognition of and engagement with the historical under-privileging of women, women's work, and women's bodies in capital-S "Science" and in a wide range of other technoscientific practices. We will examine and elucidate several branches of feminist theory. We will also examine feminist accounts of contemporary technoscientific work as well as critical STS with a focus on race.

Attributes: STS Senior Seminars

Not offered current academic year

WGSS 414 (S) Race and Performance (DPE) (WS)
Cross-listings: AAS 414 / AMST 414

Secondary Cross-listing

How does one "do" race? This seminar offers a survey of foundational and emergent scholarship at the nexus of performance studies, critical ethnic studies, and gender and sexuality studies alongside contemporary visual and performance art works. It will explore how the framework of performance destabilizes notions of race, gender, and sexuality as identities that are inherent to us and approaches them as ones we enact, do, and undo. We will begin the course by tracing key concepts in performance studies (i.e., performance, performative, performativity) before examining a range of performances that respond to and negotiate life under the ongoing conditions of racial capitalism, empire, anti-blackness, and settler colonialism. To this end, we will focus on how qualities attributed to racialized and gendered bodies, such as silence, diseased, patience, depression, passivity, and aloofness, are retooled as feminist and queer of color actions or positions.

Requirements/Evaluation: in-class discussion, weekly posts, class presentation, short written assignments, and final project (with creative option)

Prerequisites: AMST 101 or WGSS 101/202 and upper level courses in AMST, WGSS, or related fields

Enrollment Limit: 12

Enrollment Preferences: AMST seniors and juniors; WGSS seniors and juniors; AAS concentrators

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 414(D2) AAS 414(D2) AMST 414(D2)

Writing Skills Notes: Weekly discussion posts, short writing assignments that will lead to the final assignment, and a self-assessment reflection. Additionally, students will draft and present an object-based analysis paper (incorporating primary and secondary materials), give and receive peer feedback, and submit a final, edited version.

Difference, Power, and Equity Notes: This course centrally examines the nexus of race, gender, sexuality, class, and ability and explores a bevy of strategies deployed to respond to overlapping structures of power, including racial capitalism, settler colonialism, anti-blackness, and empire.

Not offered current academic year

WGSS 415 (S) Breaking the Silence: Women Voices, Empowerment and Equality in the Francophone World (DPE)

Cross-listings: COMP 415 / RLFR 415

Secondary Cross-listing

How have Francophone women challenged the historical and current effects of colonialism and gendered racism in France and the Francophone world? How have Francophone women writers challenged the status quo of patriarchy and advocated for change? Beginning with political activist Olympe de Gouges, who published Le droit de la femme et de la citoyenne (1791) challenging gender inequality in France, we will then examine Claire de Duras' portrayal of the intersection between race and gender, Simone de Beauvoir's challenge to traditional femininity and gender roles, and Ananda Devi's intimate portrayal of violence against women in post-colonial societies. Throughout the course, we will use a feminist and intersectional lens to analyze how Francophone women writers have broken the silence then and now.

Requirements/Evaluation: Three 3-4-page response papers, a final 10-page research paper, presentation and active participation.
**Prerequisites:** Any 200-level RLFR course, or by permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** Senior French majors and students completing the certificate in French, but open to advanced students of French; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 415(D2) COMP 415(D1) RLFR 415(D1)

**Difference, Power, and Equity Notes:** In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity. This course uses a feminist and intersectional lens to analyze how French and Francophone women writers have challenged the historical and current effects of colonialism and gendered racism.

Not offered current academic year

WGSS 428 (S) Relationality and Its Antagonisms (DPE) (WS)

**Cross-listings:** AFR 396 / AMST 428

**Secondary Cross-listing**

Relationality has been the defining approach, feature, and framework of ethnic studies since its inception in the late 1960s. Since then, notable scholars have applied multiple keywords, including difference, comparison, entanglements, cacophonies, and intimacies, to emphasize how processes of racialization and racial formation are not isolated and separate but inextricably linked and shaped by one another. Only from these distinct, uneven, yet shared positions of oppression, as scholars argue, solidarity across race, gender, class, sexuality, and location may emerge. At its crux, this seminar will underscore major tensions and antagonisms against frameworks of relationality. Tracing primary sources, cultural expressions, and literature within the traditions of ethnic studies and transnational/women of color feminisms, it will trace the shifts in approaches to relationality, especially as it relates to practices of reciprocity and community-building across difference. At the same time, it will turn to works that name relationality as what Frank B. Wilderson calls a "ruse," or trick, that subsumes the specific, exceptional position of blackness. Our units will include discussions of Afro-Pessimism, indigeneity, racialized settler colonialism as well as queer theory debates on queer presentism (i.e., a queer "no future") versus queer futurity. Studying the tensions that emerge from multiple, distinct, and contradictory planes of power, oppression, and temporalities, how do we assess, work through, and reconcile, if at all, relations deemed as "irreconcilable" across vectors of difference?

**Requirements/Evaluation:** in-class participation, paper presentation, peer feedback, writing webs (short series of writing exercises), and final project developed from original research and/or creative work

**Prerequisites:** AMST 101 or WGSS 101

**Enrollment Limit:** 12

**Enrollment Preferences:** AMST and WGSS seniors and juniors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 396(D2) AMST 428(D2) WGSS 428(D2)

**Writing Skills Notes:** Students will regularly engage in a series of writing exercises and submit a longer paper presentation that will be peer reviewed and revised.

**Difference, Power, and Equity Notes:** The main objective of the course is to study and assess ethnic studies' approaches to questions of difference, particularly as it relates to theories of racialization and relationality across multiple nodes of power and oppression.

WGSS 470  (S)  Latinx Migrations: Stories and Histories  (WS)
Cross-listings:  LATS 470 / HIST 470

Secondary Cross-listing

Latinx migration histories are often told with sweeping data and within broad historical contexts. While these are important, the voices of the people leaving their home countries and coming to the United States can be lost or buried. During the 1970s, the emerging subfield of social history asserted the need to craft histories that took into consideration the everyday lives of everyday people. Oral history emerged a key tool in capturing the personal stories too often missed in historical archives. At the same time, Puerto Rican Studies, Chicano Studies, and later, Latinx Studies emerged to tell the histories of groups too often omitted from or misrepresented in the scholarship. These fields relied on traditions of testimonios or storytelling. This course focuses on Latinx oral histories, autobiographies, memoirs, testimonios, and other first-person narratives to explore how people are impacted by and experience those broad historical contexts, as well as how the decisions they make and the actions they take shape those broad historical contexts. As Latinx Studies is a field that has been at the forefront of exploring intersectionality, we also analyze how attention to first person narratives and lived experiences reveal the complexities of race, ethnicity, gender, sexuality, and class, as well as other visible and invisible markers of difference. Examining first person narratives in the context of specific Latinx groups in particular historical, geographical, and social contexts, we interrogate the methodological and interpretive challenges of working with oral histories and other first-person primary sources. Course topics include the gendered dimensions of migration, geopolitics and stories of exile, and the connections between lived experiences and political activism, particularly the feminist activism of the late 1960s and 1970s-- all while students develop and share their own research topics.

Requirements/Evaluation: class participation and presentations, short writing assignments, proposals, annotated bibliography, drafts of research paper, final presentation, and final paper of 15 to 20 pages

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: History majors, WGSS majors, and Latina/o Studies concentrators, seniors

Expected Class Size: 15

Grading:  no pass/fail option, yes fifth course option

Distributions:  (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
LATS 470(D2) HIST 470(D2) WGSS 470(D2)

Writing Skills Notes: This research seminar supports students as they define an appropriate topic, identify and use primary and secondary sources, and complete a 15-20 page final paper. Several short writing assignments focus on interpretations of primary sources and on honing in on scholars' key arguments in secondary sources. The final paper is written in stages, including proposals, an annotated bibliography, drafts for workshopping with other students, and a final presentation along with the final paper.

Not offered current academic year

WGSS 475  (S)  Dreaming Latina/x Feminist Disability Studies  (DPE)  (WS)
Cross-listings:  LATS 475 / AMST 413

Secondary Cross-listing

In this course we will defy the traditional notion that disabled and queer people of color have no right to future dreams, as we collectively imagine how the emergent field of Latina/x feminist disability studies might take shape. What are the sites of focus, methods, and political commitments of Latina/x feminist disability studies? Where is the power in meaningfully uniting an analysis of disability to one of sexuality and gendered Latinidad? How does a Latina/x-centric approach productively inform our understanding of disability? What is the political potential of Latina/x feminist disability studies -- not exclusively as a set of theories, but also as a mindset and an everyday call to action? If we were to collectively compose a manifesto for Latina/x feminist disability studies, what might it contain? How might we actively cultivate a community of care in the classroom as well as other spaces at Williams? Just what might Latina/x feminist disability justice dreams look like? How might Latina/x feminist disability justice dreams feel? Feminist, queer, and disabled crip-of-color scholars have recently called for a more meaningful engagement with race in feminist disability studies. Simultaneously, we have also witnessed a small but steady growth in the amount of Latinx studies scholarship that thoughtfully integrates questions of disability. This interdisciplinary course responds to these important shifts in its focus on a series of topics bridging Latinx studies, gender studies, queer studies, crip studies, and critical disability studies. These include but are not limited to the body, the environment, temporality, labor, citizenship,
dependency, and visibility/invisibility. Through these topics, we will explore the ways in which the different approaches to these specific issues across Latinx, critical disability, crip, queer and gender studies are in fruitful conversation with one another -- and sometimes even at odds -- as we actively interrogate the intersections of gender, race, ethnicity, sexuality, and disability within the everyday.

Requirements/Evaluation: Major assignments for this course include a semester-long independent research paper (15-20 pages) broken up into steps, participation in crafting the class manifesto, a semester-long collaborative artistic exercise, and a final reflection document (3-4 pages).

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Priority given to LATS concentrators by seniority, followed by WGSS and AMST majors by seniority.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Lab fee: $200 for art supplies per student

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 475(D2) LATS 475(D2) AMST 413(D2)

Writing Skills Notes: We focus on building writing and interdisciplinary research skills, with a particular emphasis on the processes of research, revision, and collaborative writing. The primary research paper (an independent project of 15-20 pages) is divided into stages, and students are required to revise and resubmit their work at various junctures in the research process. The written class manifesto requires students to compose a document together, revising their work as a group over the course of the semester.

Difference, Power, and Equity Notes: This course privileges an intersectional analysis regarding questions of race, ethnicity, gender, sexuality, and disability. It obligates students to consider how these categories of difference actively work in tandem with one another in everyday US Latina/x and transnational (US-Latin America and the Caribbean) contexts. This seminar also underscores how these categories of difference are actually products of a given historical and political moment.

Winter Study

WGSS 31 (W) Senior Thesis: Women's and Gender Studies
See description of Degree with Honors in Women's, Gender and Sexuality Studies.
Class Format: thesis
Grading: pass/fail only
Not offered current academic year

WGSS 99 (W) Independent Study: Women's and Gender Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
The Writing Skills (WS) requirement is to improve student writing proficiency across disciplines. Students in these courses will receive guidance on structure, style, argumentation, and other significant aspects of writing throughout the semester. This may be achieved through brief assignments spaced over the semester, sequenced assignments leading to a longer final paper, etc. WS courses may also include multiple drafts, peer review, conferences or class discussions designed to improve writing skills. (A course with a single long paper due at the end of the semester, but with no required or structured means of addressing writing issues, would not be considered a writing skills course.)

The primary function of the WS designation is to indicate that the course will provide consistent and ongoing feedback on students’ writing. Thus, the amount of writing should be substantial and well spaced, followed by timely evaluation and suggestions for improvement. Specifically, a WS course should require multiple assignments, each returned with comments which address writing problems and strategies, as appropriate. Because WS course instructors must pay attention to students’ writing skills as well as to their mastery of the content of the course, WS courses have a maximum enrollment of 19.

All students are required to take TWO WS courses: one by the end of sophomore year and one by the end of junior year. Students will benefit most from WS courses by taking them early in their college careers and are strongly encouraged to complete the requirement by the end of sophomore year.

**AAS 252  (F) Im/mobilities  (DPE) (WS)**

**Cross-listings:** AMST 252 / SOC 252

**Secondary Cross-listing**

We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic revealed, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move—or to stay still.

**Requirements/Evaluation:** Thoughtful and consistent class participation, several short reflection papers, two drafts of an opinion essay, class presentation

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Given to first-year students and sophomores, particularly those who have demonstrated an interest in AAS/SOC. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)  (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 252(D2) AAS 252(D2) SOC 252(D2)

**Writing Skills Notes:** Emphasis on the processes of writing and revising, several short papers on which students will receive close feedback, and drafts of a final written assessment

**Difference, Power, and Equity Notes:** This course explores a politics of im/mobilities: how we move through space through different bodies at the intersection of race, class, gender, ability, and citizenship. Students will use their own bodies as research sites for deepening their understanding of how we navigate the freedom to move or stay still.

AAS 402  (F)  Marxist Feminisms: Race, Performance, Labor  (DPE) (WS)

Cross-listings:  AMST 402 / WGSS 402

Secondary Cross-listing

This seminar provides an overview of queer, black and women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, including Capital Volume I, we will examine a range of social positions and modes of extraction that complicate Marx's emphasis on the white male industrial factory worker. Every week, we will focus on texts that foreground conditions of reproduction, racial slavery, care and domestic work, indentured servitude, immigrant labor, land expropriation, and sex work among others. Throughout the seminar and specifically at the close of it, we will turn to critical perspectives and aesthetic practices that not only respond to these conditions but also incite new social relations and ways of being in the world. As such, this seminar will equip students with critical understandings of how racial capitalism has fundamentally relied on the mass elimination, capture, recruitment, and displacement of different racialized, gendered, and abled bodies in and beyond the U.S. as well as how the capitalist system of value and life under these conditions can and must be undone and reimagined.

Requirements/Evaluation:  in-class participation, presentation, weekly posts, paper, and final project (paper, community resource distribution proposal, and creative project options)

Prerequisites:  AMST 101, AMST/AAS 125, or similar courses

Enrollment Limit:  12

Enrollment Preferences:  AMST and WGSS juniors and seniors, AAS concentrators

Expected Class Size:  12

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 159  (F) Crossing the Color Line: A History of Passing  (DPE) (WS)

Cross-listings:  HIST 159

Secondary Cross-listing

In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her white parents stated publicly that Dolezal is a white woman passing as black. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to become white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries—class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

Requirements/Evaluation:  Weekly formal response papers and written critiques.
**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 159(D2) AFR 159(D2)

**Writing Skills Notes:** Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2 pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students will also receive feedback from their tutorial partners.

**Difference, Power, and Equity Notes:** Narratives of racial passing provocatively raise questions about the construction, logic, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identically intelligibility.

**AFR 222 (S) Hip Hop Culture (DPE) (WS)**

**Cross-listings:** AMST 222 / ENGL 221 / MUS 217

**Secondary Cross-listing**

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced "diggin' in the crates"--a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop's tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

**Requirements/Evaluation:** Four papers, project with presentation, and a final exam.

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** AMST majors or prospective majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 222(D2) ENGL 221(D1) AFR 222(D2) MUS 217(D1)

**Writing Skills Notes:** Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

**Difference, Power, and Equity Notes:** This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the
material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

SEM Section: 01 TR 11:20 am - 12:35 pm Brian Murphy

AFR 260 (F) 1930s Black Literature (WS)
Cross-listings: ENGL 238
Secondary Cross-listing
This course explores Black literary output of the 1930s in all its forms with the belief that this often under-appreciated decade contains many of the impulses that would come to structure the literary landscape in the decades that follow. These include an unflinching embrace of humor and satire, engagements with social realism, and a keen attention to notions of the radical in the international context. Special attention will be paid to how the writing pushes away from the development of what we have come to understand as the Harlem Renaissance of the 1920s. Work to be considered throughout the term comes from, among others, Marita Bonner, Arna Bontemps, Sterling Brown, Langston Hughes, Zora Neal Hurston, George Schuyler, Dorothy West, Richard Wright, and Octavia Wynbush.

Requirements/Evaluation: weekly reading responses, active class participation, two close readings (500 words each), annotated bibliography, class presentation, final paper (8-10 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 260(D2) ENGL 238(D1)

Writing Skills Notes: Beyond the quantity of assigned writing, significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

AFR 328 (F) Poetry of Indignation: Poetics and Transnational Liberation (DPE) (WS)
Cross-listings: COMP 335 / ARAB 320
Secondary Cross-listing
Poetry is usually associated with beautiful, metered, and charged language. However, beyond its poeticity, poetry has also functioned as a tool of liberation and transnational construction of identities and solidarities. States have national poets, and, in many countries, national anthems were written by famous poets. From Abu al-Qasim al-Shabbi and Claude McKay to Pablo Neruda, poetry has acted as a space for life, rebellion, resistance, revolution, and the defense of a common humanity that transcends the barriers of language and national aesthetics. This course draws on a variety of materials from the Caribbean to Africa and from the Middle East to India to conceptualize a "poetics of indignation" against slavery, social injustice, colonization, authoritarianism, capitalism, and globalization. The students in this course will read poets, such as Okot p'Bitek, Derek Walcott, Tsitsi Jaji, Mahmoud Darwish, and Pablo Neruda, among many other poets, to examine how poetics changed and shifted across times and geographic boundaries while retaining a commitment to indignation, rebellion, and anger at almost the same recurring oppressive forces.

Requirements/Evaluation: Two 5pp. midterm papers; a 1000-word reflection statement; weekly GLOW posts; one 10-minute presentation; active
participation in the discussions in class.

Prerequisites: None

Enrollment Limit: 14

Enrollment Preferences: If the class is overenrolled, the students will submit a 200-word paragraph in which they explain how the course fits within their plan of study at Williams.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 328(D2) COMP 335(D1) ARAB 320(D1)

Writing Skills Notes: The students in this course will receive intensive feedback on their writing. This includes writing two 5pp. papers as well as a 10pp. final paper. The students will submit weekly GLOW posts and a final reflection statement.

Difference, Power, and Equity Notes: The students will understand that poetry is a field in which power dynamics and imbalances of access to resources are reflected. They will also pay attention to who writes what and who publishes where in order to understand the imbrication of inequality within the institutions that produce, disseminate, and reward poets.

AFR 367 (S) Black History is Labor History (DPE) (WS)

Cross-listings: HIST 367

Secondary Cross-listing

This seminar explores labor history in relation to black people, spanning the colonial period to the early twenty-first century. It racializes the history of work by tracing the long story of black labor in the U.S. from the plantation to the plant. Whereas the bulk of the course will analyze black labor and labor movements in the twentieth century, specifically focusing on the push for economic inclusion and mobility amid employment, societal and union-related racial discrimination, we will examine what involuntary black labor meant in the context of slavery and the construction of a capitalist economy. Likewise, we will devote attention to black workers with regard to such topics as antiunionism, deindustrialization, economic inequality, Fordism, informal economies, Jim and Jane Crow, labor radicalism and violence, New Deal and welfare, the rise of civil rights unionism, and slavery and capitalism, among other themes.

Requirements/Evaluation: Students are expected to participate actively and will write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper.

Prerequisites: Recommended for students with sophomore standing or above and first-year students who both have taken a 200-level history course and have received instructor permission to enroll into the course.

Enrollment Limit: 25

Enrollment Preferences: HIST and AFR majors followed by students with sophomore, junior, or senior standing. If the course is overenrolled, students will be given a questionnaire and only first-year students who have completed a 200-level history course will be enrolled.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 367(D2) AFR 367(D2)

Writing Skills Notes: Students will be required to write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages). Throughout the semester, these writing assignments will total roughly 22-30 pages. Students can expect to have line-edited feedback on their papers with substantial and timely, writing-related suggestions for improvement.
Difference, Power, and Equity Notes: This course racializes the study of labor history, focusing on black people and their experiences in the United States from the plantation to the plant. It challenges students to confront and to redefine what it means to labor, grasping how slavery, segregation, and systemic inequalities amid black people's pursuit of citizenship, equality, and freedom have shaped their economic, political, and social conditions and identities.

AFR 374 (S) Technologies of Race (DPE) (WS)

Cross-listings: AMST 372 / STS 373

Secondary Cross-listing

This course is an introduction to theories, methods, sources, and approaches for interdisciplinary research and creativity in and through the interdisciplinary field of American Studies. We will focus on the intersection of race, gender, sexuality, and disability with modern media technologies, from early photography in the mid-19th century to contemporary trends in machine learning and artificial intelligence. Through a process of shared inquiry, course participants will investigate the ways that historical legacies of oppression and futurist speculation combine to shape human lives in the present under racial capitalism. Whether analyses of the automation of militarized border control in Texas, or of the ways that obsolete, racist concepts are embedded in machine vision and surveillance systems, the readings in the course will chart out the key moments in the co-evolution of race and technology in the Americas. Students will gain a working competence in all four tracks of the American Studies major (Space and Place; Comparative Studies in Race, Ethnicity, and Diaspora; Arts in Context; and Critical and Cultural Theory). Finally, we will also explore alternative paths toward a future where technology might help to effect the abolition of oppressive structures and systems, rather than continue to perpetuate them.

Requirements/Evaluation: Four papers, in-class writing/reflective work, and a final exam.

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: AMST majors or prospective majors.

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 396 (S) Relationality and Its Antagonisms (DPE) (WS)

Cross-listings: AMST 428 / WGSS 428

Secondary Cross-listing

Relationality has been the defining approach, feature, and framework of ethnic studies since its inception in the late 1960s. Since then, notable scholars have applied multiple keywords, including difference, comparison, entanglements, cacophonies, and intimacies, to emphasize how processes
of racialization and racial formation are not isolated and separate but inextricably linked and shaped by one another. Only from these distinct, uneven, yet shared positions of oppression, as scholars argue, solidarity across race, gender, class, sexuality, and location may emerge. At its crux, this seminar will underscore major tensions and antagonisms against frameworks of relationality. Tracing primary sources, cultural expressions, and literature within the traditions of ethnic studies and transnational/women of color feminisms, it will trace the shifts in approaches to relationality, especially as it relates to practices of reciprocity and community-building across difference. At the same time, it will turn to works that name relationality as what Frank B. Wilderson calls a “ruse,” or trick, that subsumes the specific, exceptional position of blackness. Our units will include discussions of Afro-Pessimism, indigeneity, racialized settler colonialism as well as queer theory debates on queer presentism (i.e., a queer “no future”) versus queer futurity. Studying the tensions that emerge from multiple, distinct, and contradictory planes of power, oppression, and temporalities, how do we assess, work through, and reconcile, if at all, relations deemed as “irreconcilable” across vectors of difference?

Requirements/Evaluation: in-class participation, paper presentation, peer feedback, writing webs (short series of writing exercises), and final project developed from original research and/or creative work

Prerequisites: AMST 101 or WGSS 101

Enrollment Limit: 12

Enrollment Preferences: AMST and WGSS seniors and juniors

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 396(D2) AMST 428(D2) WGSS 428(D2)

Writing Skills Notes: Students will regularly engage in a series of writing exercises and submit a longer paper presentation that will be peer reviewed and revised.

Difference, Power, and Equity Notes: The main objective of the course is to study and assess ethnic studies' approaches to questions of difference, particularly as it relates to theories of racialization and relationality across multiple nodes of power and oppression.

AMST 101 (F)(S) America: The Nation and Its Discontents (DPE) (WS)

This course introduces students to the capacious and extraordinarily varied interdisciplinary field of American Studies. First institutionalized in the mid-twentieth century, American Studies once bridged literature and history in an attempt to discover a singular American identity. Over 80 years later, many American Studies scholars reject this exceptionalizing rhetoric, working instead to understand how genocide, enslavement, colonization, and militarism/war are foundational to the formation of the U.S. nation-state, and how marginalized and minoritized peoples have survived through, rebelled against, and created new visions for collectivity, relationality, and community. In this course, students will be introduced to the dynamic ways American Studies work links to ethnic studies; women, gender, and sexuality studies; literary studies, political science; critical geography; critical media studies; disability studies; history; anthropology; sociology; art; and more. We will anchor this array of approaches by examining beliefs, practices, places, and migrations that have shaped and been shaped by the U.S., and we will pay particular attention to the people who labor for, have been racialized by, and who think critically about “America.” Through close reading; discussions; and analyses of music, art, and film, we will collectively reckon with the questions of who and what makes “America” -- hemispherically, transnationally, globally. In the process, students will be encouraged to co-create a learning experience rooted in praxis, political consciousness, intersectionality, and mutual support.

Requirements/Evaluation: Four 4-5 page papers (with attention to revision process), one project with oral presentation, and a longer, final essay.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: Core Course
Distributions: (D2)  (DPE) (WS)

Writing Skills Notes: This Writing Skills course will include multiple papers, with attention to revision, as well as an oral presentation, and a longer, final essay. Attention will be paid to the process of composing a persuasive, interpretive essay based in close analysis of texts.

Difference, Power, and Equity Notes: This course requires students to think critically about the meanings of "America" and about the consequences and costs of racialization and other processes for making social differences. Students learn to discern the ways in which historical legacies of oppression continue in the present, and consider the mutual interrelation of local, national, and global contexts and events.

AMST 113  (F) The Feminist Poetry Movement  (DPE) (WS)

Cross-listings: ENGL 113 / WGSS 113
Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: two-three short analysis papers, creative (1-2 pages), curated final project (archival exhibit and digital project), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 113(D2) ENGL 113(D1) WGSS 113(D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: two to three four-to-five-page graded papers, one creative assignment, and a final digital research project (8-10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

Attributes: AMST Critical and Cultural Theory Electives  ENGL Criticism Courses  EXPE Experiential Education Courses  WGSS Racial Sexual + Cultural Diversity Courses  WGSS Theory Courses
How did the multiplicity of people who shaped "early" North America communicate with each other, across profound linguistic, cultural, social, political, and spiritual differences? What strategies did they use to forge meaning and connections in times of tremendous transformation, while maintaining vital continuities with what came before? This course examines histories of communication in North America and the technologies that communities have developed to record, remember, advocate, persuade, resist, and express expectations for the future. Using a continental and transoceanic lens of "Vast Early America," we will take up Indigenous oral traditions, Traditional Ecological Knowledge, wampum belts, and winter counts as expressions of ethics, identity, relationality, and diplomacy among sovereign Native/Indigenous nations. We will reflect on artistic and natural science paintings, engravings, and visual culture that circulated widely; and diaries and journals as forms of personal as well as collective memory. We will work with political orations, newspapers, pamphlets, and other forms of print culture that galvanized public opinion in the Age of Atlantic Revolutions; memorials and monuments that communities have created to honor ancestors and significant events; material culture such as baskets and weavings that signified through their imagery and physical forms; and social critique and visions of justice in the verse and prose of Phillis Wheatley Peters and William Apess. These materials take us into the complexities of individuals’ and communities’ interactions and relations of power. They also illuminate spaces of potential or realized solidarity, alliance, and co-building of new worlds. Throughout we will work together to understand different methodologies, theories, practices, and ethics involved in approaching the past. We will at every turn be attuned to the ongoing significances of these experiences among communities in the twenty-first century.

Requirements/Evaluation: active participation in class discussions, several short essays based on readings and discussion topics, museum/archives exercise, final essay/project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: limited to first- and second-year students who have not yet taken a 100-level course in History or American Studies; juniors and seniors only with the permission of the instructor

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 164(D2) HIST 163(D2)

Writing Skills Notes: Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

Difference, Power, and Equity Notes: This course centers experiences of diverse people in early America including substantial focus on Native American/Indigenous and African American communities. It introduces foundational methods for historical and interdisciplinary study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories; critical vantages on Euro-American settler colonialism; and scholarship on complex entanglements in multiracial and multiethnic communities

Attributes: HIST Group F Electives - U.S. + Canada HIST Group P Electives - Premodern
themselves violently denied them to others. There is a similar dismal irony to the American Revolution, as captured by the title of Frederick Douglass' famous 1852 speech, "What to the Slave Is the Fourth of July?" Not even the Civil War could resolve this issue, as demonstrated by the failure of Reconstruction and the rise of Jim Crow. To revisit this history, we will read W.E.B. Du Bois' great book, Black Reconstruction in America. Alongside a selection of readings by canonical postcolonial writers and current political theorists, James and Du Bois provoke us to ask what it would take for the democratic world to be truly free.

Requirements/Evaluation:
Mandatory in-class free writing, three five-page position papers, and three mandatory in-class debates

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: AMST majors or prospective majors, then sophomores

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: "Black and Brown Jacobins" is a writing-intensive course focused on persuasive argumentation. Each day in class will begin with 5-10 minutes of free writing in response to a prompt. At the end of each unit, students must complete a position paper (three in total). These papers will be accompanied by in-class debates in which students will be asked to argue both sides of the prompt they have been given.

Difference, Power, and Equity Notes: "Black and Brown Jacobins" calls into question the success of modern democracy from the perspective of minoritized groups, in particular Black Americans and Afro-Caribbeans. Students will grapple with the legacy of enslavement in the Americas, the Haitian Revolution (1791-1804), the American Civil War and Reconstruction (1861-1877), Jim Crow, and our current era of mass incarceration. The question driving this course is, what does it take to be free in the free world?

AMST 222 (S) Hip Hop Culture  (DPE) (WS)

Cross-listings: ENGL 221 / AFR 222 / MUS 217

Primary Cross-listing

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced "diggin' in the crates"--a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop's tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

Requirements/Evaluation:
Four papers, project with presentation, and a final exam.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: AMST majors or prospective majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 222(D2) ENGL 221(D1) AFR 222(D2) MUS 217(D1)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and
how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

AMST 252 (F) Im/mobilities (DPE) (WS)

Cross-listings: AAS 252 / SOC 252

Secondary Cross-listing
We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic revealed, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move—or to stay still.

Requirements/Evaluation: Thoughtful and consistent class participation, several short reflection papers, two drafts of an opinion essay, class presentation

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Given to first-year students and sophomores, particularly those who have demonstrated an interest in AAS/SOC. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 252(D2) AAS 252(D2) SOC 252(D2)

Writing Skills Notes: Emphasis on the processes of writing and revising, several short papers on which students will receive close feedback, and drafts of a final written assessment

Difference, Power, and Equity Notes: This course explores a politics of im/mobilities: how we move through space through different bodies at the intersection of race, class, gender, ability, and citizenship. Students will use their own bodies as research sites for deepening their understanding of how we navigate the freedom to move or stay still.

Fall 2024
SEM Section: 01 MR 2:35 pm - 3:50 pm Phi H. Su

AMST 258 (F) Transatlantic Political Theory (DPE) (WS)

Political theory tends to look towards Europe for inspiration. This course suggests an alternative. It traces how theory crisscrosses the Atlantic Ocean to and from Europe, Africa, and the Americas. We will begin with Alexis de Tocqueville's 1840 classic, Democracy in America, which is a snapshot of antebellum America from the perspective of a French aristocrat. Then we will flip things around and view Europe from America. During the Cold War,
American political theorists, including European émigrés, were preoccupied by the threat of totalitarianism. We will read the definitive text on this subject, Hannah Arendt's *The Origins of Totalitarianism*, paying special attention to the link she makes between totalitarianism and imperialism. In the final section of this course, we will read Richard Wright's reports on Europe and Africa during the decolonization era, and conclude with a reading of Cedric Robinson's classic, *Black Marxism*. Together, these texts emphasize the importance of an African perspective on modern politics. Assignments in this reading- and writing-intensive course consist of reading quizzes, term papers, and in-class debates.

Requirements/Evaluation: Students should expect to read 50-60 pages per class on average. Graded assignments will include daily reading quizzes, three five-page term papers, three in-class debates, and one three-page book report.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Enrollment preference will go first to AMST majors, then sophomores.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Assignments include daily writing activities (short-answer reading quizzes), a 2-3-page book report, and three term papers. In preparation for writing each term paper, students will participate in an in-class debate about the prompt. These debates are an opportunity for students to test and refine their arguments before writing their papers.

Difference, Power, and Equity Notes: This class interrogates the implicit Eurocentrism of political theory by (1) arguing that the development of modern Europe cannot be understood without considering the role of imperialism and (2) showing that modern political and social theory needs to be informed by an African perspective as well.

Attributes: AMST Critical and Cultural Theory Electives

Fall 2024

AMST 261  (S) America Inside Out  (DPE) (WS)

Why does the land of the free put so many people in prison? The United States of America has more prisoners than any other country in the world and one of the highest rates of incarceration. During the Cold War, prison writings such as Aleksandr Solzhenitsyn's *The Gulag Archipelago* were held up as the truest literature to escape the USSR. But could the same be true of the USA? Martin Luther King, Jr. is remembered as a prophet and peacemaker who spoke to America's soul. But in his own lifetime, he was famous for being a political prisoner locked in a Birmingham jail. What does it say about America when advocates of freedom and democracy end up behind bars? To be sure, there are people in prison who have committed crimes we would all consider heinous. But the plurality are non-violent offenders serving time on drug-related charges. This crackdown has continued regardless of rates of drug use and disproportionately targets poor people of color. In this class, we will explore the origins of the carceral state, starting with *Discipline and Punish* by Michel Foucault. From there, we will read the writings of US prisoners, such as Angela Davis and George Jackson, in comparison with literature from that other vast prison empire, the USSR. We will conclude by confronting the War on Drugs with Michelle Alexander's *The New Jim Crow*.

Requirements/Evaluation: Assignments include a daily free writing activity (graded on participation), two curated media "playlists," one 2-3-page book report, and three five-page term papers.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Enrollment preference goes to AMST majors, then sophomores

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Class assignments include a daily free writing activity, a 2-3-page book report, three term papers, and two curated and annotated media "playlists." Students will be encouraged to develop an ongoing, reflective writing practice in response to the readings.

Difference, Power, and Equity Notes: This class is focused on the US prison system, which disproportionately incarcerates poor people of color. We will trace the roots of this policy outcome from the failure of Reconstruction and the rise of Jim Crow to the War on Drugs and the current regime of mass incarceration.
AMST 326 (F) Unfinishing America (DPE) (WS)

Cross-listings: ENGL 316

Primary Cross-listing

The Great American Novel is a moribund cliché. Few would argue that any one work of fiction could capture the essence of American life. In this class, we will flip the Great American Novel on its head by reading Ralph Ellison's unfinished second novel. After publishing the acclaimed Invisible Man in 1952, Ellison seemed poised to deliver the next Great American Novel. But he never did. When he died in 1994, 42 years later, he left behind thousands of pages of material, but no finished second novel. Why wasn't he able to finish it? Some of it was bad luck. Some of it was a struggle with genre and form. However, perhaps the real reason Ellison's novel proved impossible is what it was trying to say. This is a book about the historical trauma of racism. Therefore, the thesis of this class is that the Great American Novel cannot be written as long as American history remains whitewashed. Ellison's manuscript shows this in surprising ways, from its depiction of racial passing and the taboo of interracial sex to its extended exploration of Black and Indigenous cultures in the former Oklahoma Territory. In addition to Ellison, we will read the work of the Chicano author Tomás Rivera, whose fragmentary fictions provoke similar questions. This class culminates in a final project that asks students to "unfinish" an American cultural object.

Requirements/Evaluation: Assignments include a daily free-writing exercise, graded note-taking, three 1-2-page reflective essays, two brief creative writing assignments, and a final creative project.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: AMST majors, then juniors and sophomores

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 316(D1) AMST 326(D2)

Writing Skills Notes: Each student will be responsible for producing a reader's guide to Ellison's unfinished second novel. Students will write, rewrite, and revise their reader's guide throughout the semester. Three drafts will be due throughout the semester. A quality reader's guide will highlight the book's main themes, profile the main characters, and retrace the book's development. Students will also complete one draft of a guide to Rivera's novella, due at the end of the semester.

Difference, Power, and Equity Notes: "Unfinishing America" satisfies the Difference, Power and Equity requirement because it calls into question mainstream American culture from Black, Chicano, and Indigenous perspectives. It interrogates the relations of power that have driven American history, from the Civil War and Westward expansion in the 19th century to the struggle for Civil Rights against Jim Crow in the 20th. Finally, it asks what it would mean to have true equity amidst great diversity in American culture.

AMST 372 (S) Technologies of Race (DPE) (WS)

Cross-listings: STS 373 / AFR 374

Primary Cross-listing

This course is an introduction to theories, methods, sources, and approaches for interdisciplinary research and creativity in and through the interdisciplinary field of American Studies. We will focus on the intersection of race, gender, sexuality, and disability with modern media technologies,
from early photography in the mid-19th century to contemporary trends in machine learning and artificial intelligence. Through a process of shared inquiry, course participants will investigate the ways that historical legacies of oppression and futuristic speculation combine to shape human lives in the present under racial capitalism. Whether analyses of the automation of militarized border control in Texas, or of the ways that obsolete, racist concepts are embedded in machine vision and surveillance systems, the readings in the course will chart out the key moments in the co-evolution of race and technology in the Americas. Students will gain a working competence in all four tracks of the American Studies major (Space and Place; Comparative Studies in Race, Ethnicity, and Diaspora; Arts in Context; and Critical and Cultural Theory). Finally, we will also explore alternative paths toward a future where technology might help to effect the abolition of oppressive structures and systems, rather than continue to perpetuate them.

Requirements/Evaluation: Four papers, in-class writing/reflective work, and a final exam.
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: AMST majors or prospective majors.
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 372(D2) STS 373(D2) AFR 374(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to contextualize technologies historically and in relation to one another, with attention to their entanglements with racial discourses and racism. Students gain critical skills that equip them to imagine possible futures where technologies serve increasingly as abolitionist tools.

AMST 402 (F) Marxist Feminisms: Race, Performance, Labor (DPE) (WS)

Cross-listings: AAS 402 / WGSS 402
Primary Cross-listing

This seminar provides an overview of queer, black and women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, including Capital Volume I, we will examine a range of social positions and modes of extraction that complicate Marx's emphasis on the white male industrial factory worker. Every week, we will focus on texts that foreground conditions of reproduction, racial slavery, care and domestic work, indentured servitude, immigrant labor, land expropriation, and sex work among others. Throughout the seminar and specifically at the close of it, we will turn to critical perspectives and aesthetic practices that not only respond to these conditions but also incite new social relations and ways of being in the world. As such, this seminar will equip students with critical understandings of how racial capitalism has fundamentally relied on the mass elimination, capture, recruitment, and displacement of different racialized, gendered, and abled bodies in and beyond the U.S. as well as how the capitalist system of value and life under these conditions can and must be undone and reimagined.

Requirements/Evaluation: in-class participation, presentation, weekly posts, paper, and final project (paper, community resource distribution proposal, and creative project options)
Prerequisites: AMST 101, AMST/AAS 125, or similar courses
Enrollment Limit: 12
Enrollment Preferences: AMST and WGSS juniors and seniors, AAS concentrators
Expected Class Size: 12
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
AMST 402(D2) AAS 402(D2) WGSS 402(D2)

Writing Skills Notes: In addition to weekly posts, students will engage a longer process of writing and sharing a presentation paper with the class, give/receive feedback, and submit a revised paper.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement as it explores difference, power, and equity by asking how racial, gendered, sexual, and class differences are produced, whose voices are centered and whose are excluded, and what forms of labor are valued/devalued over others.

AMST 407 (F) Colonialism and Critical Theory (DPE) (WS)

French philosopher Michel Foucault argued that "racism first develops with colonization, or in other words, with colonizing genocide." Many prominent philosophers have developed intellectual tools that can help us better understand the ongoing colonialisms that impact our world. At the same time, many of these same theorists--Foucault included--are criticized for failing to pay adequate attention to the colonialism that shaped their historical moments. Taking this paradox as our jumping-off point, this course will examine prominent philosophical and theoretical texts and assess their utility for understanding processes of colonialism, imperialism, and militarism. We will also explore how the interventions of Postcolonial Theory and Critical Indigenous Theory highlight gaps in prominent theories of political-economy, ideology, biopower, race, gender, sexuality, and more. How do ideas like orientalism, settler-colonialism, sovereignty, or decolonization challenge the traditional "canon" of critical theory? How do intellectual ideas evolve over time, and how can we use these tools to make sense of a complex world too-often organized around fundamental inequalities? In our class meetings students will develop the reading and discussion practices necessary to parse dense theoretical texts, and practice deploying theoretical concepts to better understand complex philosophical, ethical, and political questions. Since this course counts as a Senior Seminar (core course), writing will be organized around a longer, more intense research project that follows from a student's particular interests.

Requirements/Evaluation: Assignments will include participatory discussion, weekly responses to assigned readings, a midterm essay exam, and a final paper.

Prerequisites: Introductory course in American Studies, History, Native and Indigenous Studies, English, or Philosophy; or some prior coursework on colonialism, postcolonial theory, or critical theory

Enrollment Limit: 15

Enrollment Preferences: AMST senior major, but anyone with upper-level humanities training welcome

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: This course will develop student writing skills through short reading-response papers and smaller "low stakes" writing assignments, combined with a semester-long project that will break the research and writing process into manageable components, including revision and peer review.

Difference, Power, and Equity Notes: This course explores the intersections of race, gender, sexuality, class, and other social structures often organized around inequality. Students will develop tools to analyze how power shapes the differences produced by colonialism and similar historical processes.

AMST 413 (S) Dreaming Latina/x Feminist Disability Studies (DPE) (WS)

Cross-listings: WGSS 475 / LATS 475
In this course we will defy the traditional notion that disabled and queer people of color have no right to future dreams, as we collectively imagine how the emergent field of Latina/x feminist disability studies might take shape. What are the sites of focus, methods, and political commitments of Latina/x feminist disability studies? Where is the power in meaningfully uniting an analysis of disability to one of sexuality and gendered Latinidad? How does a Latina/x-centric approach productively inform our understanding of disability? What is the political potential of Latina/x feminist disability studies -- not exclusively as a set of theories, but also as a mindset and an everyday call to action? If we were to collectively compose a manifesto for Latina/x feminist disability studies, what might it contain? How might we actively cultivate a community of care in the classroom as well as other spaces at Williams? Just what might Latina/x feminist disability justice dreams look like? How might Latina/x feminist disability justice dreams feel? Feminist, queer, and disabled crip-of-color scholars have recently called for a more meaningful engagement with race in feminist disability studies. Simultaneously, we have also witnessed a small but steady growth in the amount of Latinx studies scholarship that thoughtfully integrates questions of disability. This interdisciplinary course responds to these important shifts in its focus on a series of topics bridging Latinx studies, gender studies, queer studies, crip studies, and critical disability studies. These include but are not limited to the body, the environment, temporality, labor, citizenship, dependency, and visibility/invisibility. Through these topics, we will explore the ways in which the different approaches to these specific issues across Latinx, critical disability, crip, queer and gender studies are in fruitful conversation with one another -- and sometimes even at odds -- as we actively interrogate the intersections of gender, race, ethnicity, sexuality, and disability within the everyday.

**Requirements/Evaluation:** Major assignments for this course include a semester-long independent research paper (15-20 pages) broken up into steps, participation in crafting the class manifesto, a semester-long collaborative artistic exercise, and a final reflection document (3-4 pages).

**Prerequisites:** None.

**Enrollment Limit:** 12

**Enrollment Preferences:** Priority given to LATS concentrators by seniority, followed by WGSS and AMST majors by seniority.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** Lab fee: $200 for art supplies per student

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 475(D2) LATS 475(D2) AMST 413(D2)

**Writing Skills Notes:** We focus on building writing and interdisciplinary research skills, with a particular emphasis on the processes of research, revision, and collaborative writing. The primary research paper (an independent project of 15-20 pages) is divided into stages, and students are required to revise and resubmit their work at various junctures in the research process. The written class manifesto requires students to compose a document together, revising their work as a group over the course of the semester.

**Difference, Power, and Equity Notes:** This course privileges an intersectional analysis regarding questions of race, ethnicity, gender, sexuality, and disability. It obligates students to consider how these categories of difference actively work in tandem with one another in everyday US Latina/x and transnational (US-Latin America and the Caribbean) contexts. This seminar also underscores how these categories of difference are actually products of a given historical and political moment.

**AMST 428 (S) Relationality and Its Antagonisms** (DPE) (WS)

**Cross-listings:** AFR 396 / WGSS 428

**Primary Cross-listing**

Relationality has been the defining approach, feature, and framework of ethnic studies since its inception in the late 1960s. Since then, notable scholars have applied multiple keywords, including difference, comparison, entanglements, cacophonies, and intimacies, to emphasize how processes of racialization and racial formation are not isolated and separate but inextricably linked and shaped by one another. Only from these distinct, uneven, yet shared positions of oppression, as scholars argue, solidarity across race, gender, class, sexuality, and location may emerge. At its crux, this seminar will underscore major tensions and antagonisms against frameworks of relationality. Tracing primary sources, cultural expressions, and literature within the traditions of ethnic studies and transnational/women of color feminisms, it will trace the shifts in approaches to relationality,
especially as it relates to practices of reciprocity and community-building across difference. At the same time, it will turn to works that name relationality as what Frank B. Wilderson calls a "ruse," or trick, that subsumes the specific, exceptional position of blackness. Our units will include discussions of Afro-Pessimism, indigeneity, racialized settler colonialism as well as queer theory debates on queer presentism (i.e., a queer "no future") versus queer futurity. Studying the tensions that emerge from multiple, distinct, and contradictory planes of power, oppression, and temporalities, how do we assess, work through, and reconcile, if at all, relations deemed as "irreconcilable" across vectors of difference?

**Requirements/Evaluation:** in-class participation, paper presentation, peer feedback, writing webs (short series of writing exercises), and final project developed from original research and/or creative work

**Prerequisites:** AMST 101 or WGSS 101

**Enrollment Limit:** 12

**Enrollment Preferences:** AMST and WGSS seniors and juniors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 396(D2) AMST 428(D2) WGSS 428(D2)

**Writing Skills Notes:** Students will regularly engage in a series of writing exercises and submit a longer paper presentation that will be peer reviewed and revised.

**Difference, Power, and Equity Notes:** The main objective of the course is to study and assess ethnic studies' approaches to questions of difference, particularly as it relates to theories of racialization and relationality across multiple nodes of power and oppression.

SEM Section: 01 W 1:10 pm - 3:50 pm  Kelly I. Chung

**AMST 490 (S) The Suburbs** (WS)

**Cross-listings:** ENVI 491 / HIST 491

**Secondary Cross-listing**

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

**Class Format:** Students will meet with the professor either in assigned pairs or "trios" at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

**Requirements/Evaluation:** This class follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and students with course work related to the topic.

**Expected Class Size:** 10
Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 491(D2) AMST 490(D2) HIST 491(D2)

Writing Skills Notes: Students will reflect on what their writing goals are for the semester, and they will receive feedback on their writing from the professor and from their tutorial partner. The final writing assignment will afford students the chance also to reflect back on their previous papers and the semester's course content.

ANTH 216 (F) Cities and Urbanism of the Ancient World (WS)

Cross-listings: GBST 216

Primary Cross-listing

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

Requirements/Evaluation: 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first years, sophomores, or majors in Anthropology or Sociology

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 216(D2) ANTH 216(D2)

Writing Skills Notes: Throughout the semester, writing skills (developing an argument, construction of paragraphs, use of case studies) will be emphasized. An opportunity to rewrite at least one tutorial paper will allow students to actively apply what they are learning.

ANTH 217 (S) Indigeneity Today: Comparative Indigenous Identities in the US and Russia (DPE) (WS)

Cross-listings: RUSS 217

Primary Cross-listing

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather
than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapple with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigenities.

Requirements/Evaluation: 10 posts to the course Glow discussion page, 3 times leading class discussion on the assigned readings, 1 short presentation, 1 extended portfolio project with regular shorter and longer writing submissions, and 1 final paper and final presentation (as the final part of the portfolio).

Prerequisites: None

Enrollment Limit: 16

Enrollment Preferences: Majors and certificate-seekers in Russian, then majors in Anthropology and Sociology, and then Global Studies concentrators

Expected Class Size: 12-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 217(D1) ANTH 217(D2)

Writing Skills Notes: This course has the following assignments: Weekly post to the Glow discussion page, 1 extended project with regular writing submissions, 1 final paper and final presentation. For the extended project, we will have instructor feedback for all project assignments. In instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed. There will also be peer feedback/review.

Difference, Power, and Equity Notes: In the course, students will learn about Indigeneity as a context-specific social formation. It understands Indigeneity as a category of difference with past and present importance. We will read about, discuss, and write about Indigeneity as a social category, along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.

ANTH 243  (S)  Reimagining Rivers  (DPE) (WS)

Cross-listings: ENVI 243

Secondary Cross-listing

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Requirements/Evaluation: Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 243(D2) ANTH 243(D2)

Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

Difference, Power, and Equity Notes: This course focuses on the role of rivers in struggles over cultural difference, social power, and environmental equity. Throughout the course, students read and write extensively about environmental justice, and they engage with diverse theoretical approaches to studying the intersection of water, power, and social identity. Our focus from beginning to end is on the profound impact of river management on the lives of marginalized indigenous, agrarian, and urban communities.

Spring 2025
TUT Section: T1    TBA     Nicolas C. Howe

ARAB 201  (F) Intermediate Arabic I  (DPE) (WS)

This course will build on the students' acquisitions in Arabic 102 to consolidate their learning of the Modern Standard Arabic and one variety of spoken Arabic. In addition to expanding students' vocabulary and enhancing their communication skills, the course will deepen their knowledge and use of grammar in both speaking and writing. Upon successful completion of this course, students will be able to hold conversations in Arabic with some fluency on a variety of topics while developing cultural appreciation of Arabic-speaking countries.

Requirements/Evaluation: quizzes, tests, homework, and active class participation
Prerequisites: ARAB 102 or placement test
Enrollment Limit: 18
Enrollment Preferences: If the course is overenrolled preference will be given to those who intend to major or do a certificate in Arabic.
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions:  (D1)  (DPE) (WS)

Writing Skills Notes: This course involves a great deal of writing, ranging from vocabulary and grammar-focused exercises to written assignments about a variety of topics. Students will receive extensive and timely feedback on this written work.

Difference, Power, and Equity Notes: Any language is the locus of issues of difference, power, and equity. Students will learn about gender and pronouns. They will wonder why Arabic does not have a gender neutral pronoun. Students will understand how Arabic acts as a dominant language in places minority languages in the Middle East and North Africa. Students will emerge from the course with a critical understanding of Arabic language's politics.

Cross-listings: COMP 234 / ENVI 208

Primary Cross-listing

Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts' fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality,
and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: If the course is over-enrolled, students will required to provide a 200-word paragraph in which they explain how the course fits within their plan of study at Williams.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 209(D1) COMP 234(D1) ENVI 208(D1)

Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

Attributes: ENVI Humanities, Arts + Social Science Electives

Spring 2025

SEM Section: 01    MR 2:35 pm - 3:50 pm     Brahim El Guabli

ARAB 301  (F) Advanced Arabic 1  (WS)

A continuation of Intermediate Arabic, ARAB 301 aims to expand students’ listening, reading, writing, and speaking skills in Arabic. The course will also stimulate students’ intellectual curiosity about the Arabic-speaking regions and enhance their intercultural competence. Using Al-Kitaab as well as a variety of authentic written and audiovisual materials, the course will advance their proficiency in Modern Standard Arabic. The course will also encourage enrolled students to engage critically with a wide variety of topics in Arabic language as they enrich their knowledge of the different aspects of Arabic language and culture. Students at this stage will also be assisted to generate more complex written and oral assignments.

Requirements/Evaluation: active class participation, daily assignments, presentations, quizzes, midterm exam, final exam

Prerequisites: ARAB 202 or equivalent

Enrollment Limit: 8

Enrollment Preferences: Arabic majors and anyone who has a level-appropriate knowledge of Arabic language.

Expected Class Size: 2

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will be writing multiple drafts in Arabic; the weekly written work expected from students is 800 words in Arabic language, students will also be doing translations from Arabic into English or vice-versa; and all written work from students will be evaluated, and students will receive feedback to rework it. Students will receive detailed and consistent feedback about their writing in Arabic language.

Fall 2024

SEM Section: 01    MWF 11:00 am - 12:15 pm     Nicholas R Mangialardi

ARAB 302  (S) Advanced Arabic 2  (DPE) (WS)
A continuation of Advanced Arabic 1, ARAB 302 aims to reinforce students’ listening, reading, writing, and speaking skills in Arabic through a deeper engagement with authentic materials. Built around a plethora of texts and audiovisual materials, the course seeks to assist students to develop their language and critical thinking skills in Arabic. Situated at the intersection of language learning and content teaching, this course will prepare students for more scholarly engagement with Arabic in the fourth year. Like ARAB 301, the course will be conducted entirely in Arabic.

Requirements/Evaluation: Reflections, discussions, essays, reading and writing project, quizzes, exams, and presentations.

Prerequisites: ARAB 301 or equivalent

Enrollment Limit: 18

Enrollment Preferences: Arabic Studies, or students who completed ARAB 301

Expected Class Size: 7

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage in daily writing and reflections involving prose responses (blogs, commentaries, etc.) to discussion prompts, movies, YouTube videos, comic analysis and articles. The students will also work on a portfolio with entries that will involve a careful process of revisions as well as rigorous research in Arabic recourses, summaries and essays. The instructor will give daily feedback on students’ writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes: The students will engage in an exploration of social, political, and economic realities in Arab societies across state and community boundaries. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. The selected texts will also expose students to issues of power and inequality based on internal and external factors in Arab societies as well as the social struggles of immigrants and refugees.

Spring 2025

SEM Section: 01 MWF 10:00 am - 10:50 am Nicholas R Mangialardi

ARAB 320 (F) Poetry of Indignation: Poetics and Transnational Liberation (DPE) (WS)

Cross-listings: AFR 328 / COMP 335

Primary Cross-listing

Poetry is usually associated with beautiful, metered, and charged language. However, beyond its poeticity, poetry has also functioned as a tool of liberation and transnational construction of identities and solidarities. States have national poets, and, in many countries, national anthems were written by famous poets. From Abu al-Qasim al-Shabbi and Claude McKay to Pablo Neruda, poetry has acted as a space for life, rebellion, resistance, revolution, and the defense of a common humanity that transcends the barriers of language and national aesthetics. This course draws on a variety of materials from the Caribbean to Africa and from the Middle East to India to conceptualize a “poetics of indignation” against slavery, social injustice, colonization, authoritarianism, capitalism, and globalization. The students in this course will read poets, such as Okot p’Bitek, Derek Walcott, Tsitsi Jaji, Mahmoud Darwish, and Pablo Neruda, among many other poets, to examine how poetics changed and shifted across times and geographic boundaries while retaining a commitment to indignation, rebellion, and anger at almost the same recurring oppressive forces.

Requirements/Evaluation: Two 5pp. midterm papers; a 1000-word reflection statement; weekly GLOW posts; one 10-minute presentation; active participation in the discussions in class.

Prerequisites: None

Enrollment Limit: 14

Enrollment Preferences: If the class is overenrolled, the students will submit a 200-word paragraph in which they explain how the course fits within their plan of study at Williams.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 328(D2) COMP 335(D1) ARAB 320(D1)

Writing Skills Notes: The students in this course will receive intensive feedback on their writing. This includes writing two 5pp. papers as well as a 10pp. final paper. The students will submit weekly GLOW posts and a final reflection statement.
Difference, Power, and Equity Notes: The students will understand that poetry is a field in which power dynamics and imbalances of access to resources are reflected. They will also pay attention to who writes what and who publishes where in order to understand the imbrication of inequality within the institutions that produce, disseminate, and reward poets.

Fall 2024
SEM Section: 01  MR 2:35 pm - 3:50 pm  Brahim El Guabli

ARAB 335 (F) Rhymes, Romance, and Revolution: Arabic Poetry in Translation  (WS)
Since pre-Islamic times, poetry has been "the record of Arab history," as an old adage holds. From ancient tribal odes and medieval mystical verse to modern love lyrics, Arabic poetry speaks to how people of the region have lived and interacted. Yet, beyond just recording, poetry has also played a central role in shaping society, culture, and politics in the Arab world. This course introduces students to the poetic tradition(s) of the region, traversing a broad chronology (early Islamic, medieval, modern) to explore such questions as: what are the themes and structures of Arabic poetry? Which elements have changed or persisted over time? And how is it that even classical Arabic poems continue to resonate with younger generations today? We will consider such questions as we read Arabic poems in translation, analyzing how these texts were composed, recited, set to music, and, sometimes, censored or banned by authorities. Students will become familiar with Arabic poetic genres--Classical, Sufi/religious, Diaspora, Free Verse--as well as major poets in the literary tradition. Readings and discussion will be in English. No knowledge of Arabic or poetry required.

Requirements/Evaluation: Daily attendance and participation in class discussion; short essays (1 page) every two weeks, final presentation, and final paper (10-12 pages).

Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Arabic majors; Comparative Literature majors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: Students will develop their writing skills by submitting one-page unit responses every two weeks and a final paper of 10-12 pages on a topic of their choice. Students will receive feedback on each writing assignment and have opportunities for multiple drafts and peer review throughout the semester with instructor and course Writing TA.

Fall 2024
SEM Section: 01  MR 2:35 pm - 3:50 pm  Nicholas R Mangialardi

ARAB 340 (S) Arab Women Memoirs: Writing Feminist History  (DPE) (WS)
In this seminar we review selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? How did these women writers carve a literary space for feminist memory in modern Arabic literature? In addition to the memoirs, we will look at women's blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere.

Requirements/Evaluation: Students will write the following: three response papers (2-3 pages), at least 6 journals entries (300 words per entry) and a final analytical research essay (7-10 pages). They will have a final performance project.

Prerequisites: None
Enrollment Limit: 19
Enrollment Preferences: Arabic Studies majors
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Writing Skills Notes: In addition to writing several short papers, a final research paper, a reflection on their final performance project, students will write six journals. The combination of research writing, personal reflection echoes the creative non-fiction genre of the course. It also provides students with the opportunity to reflect on forms of history/memory writing.

Difference, Power, and Equity Notes: Gender inequality, sexism, and the intersection of colonialism, nationalism and capitalism are the heart of this course. The memoirs of Arab women writers from the late 19th century to the present continue depict the history of women's movement and the struggle for women's rights in the Arab-speaking world while addressing the different hierarchies of power and domination that regulate them to second class citizens. Students will learn DPE vocabulary and critical terminology.

Spring 2025

SEM Section: 01  MR 1:10 pm - 2:25 pm  Amal Eqeiq

ARAB 369 (F) Indigenous Narratives: From the Fourth World to the Global South (DPE) (WS)

Cross-listings: COMP 369 / HIST 306 / GBST 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Requirements/Evaluation: active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7- to 10-pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 369(D1) HIST 306(D2) ARAB 369(D1) GBST 369(D2)

Writing Skills Notes: This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

Difference, Power, and Equity Notes: At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

Attributes: GBST Borders, Exiles + Diaspora Studies
ARAB 403  (S) Beyond the Letter: Visual Culture in the Arabic-Speaking World  (DPE) (WS)
Whereas poetry has been historically celebrated as the defining form of an “authentic” Arab culture from the pre-Islamic world to the present, visual culture, such as paintings, sculptures, installations, videotape, and photography, among others, has been relegated to the contemporary, the modern, the Westernized, and thereof, a representation of a less “authentic” Arab culture. In this course, we will challenge this false dichotomy by examining a variety visual culture artifacts from the Arabic-speaking world. Although the scope of our discussion will be limited to works from the 19th century to the present, our questions will investigate the deep roots of visual art in the Arabic-speaking world. We will also examine the work of poets-painters, such as Jabra Ibrahim Jabra and Etel Adnan that expanded from Palestine, Lebanon and Iraq to the United States, the manifestos of the Arab Surrealist Movement in Cairo in the 1930s, the Baghdad Modern Art Group in the 1950s and more recent works by individual artists navigating post-modern aesthetics, and dystopian futures, including Radia Bent Lhoucine, Amina Zoubair, Sophia Al-Maria and Juamana Manna, among others. In discussing these works, we will reflect on political and social events that shaped the production of visual culture in the Arabic-speaking world from the Gulf to the Maghreb. In addition to reading artists statements, exhibition reviews, art magazines and museum brochures that speak to the alphabet of visual culture, we will listen to interviews and watch short clips. In the process, we will active advanced grammar and vocabulary skills and employ paralinguistic analysis. The course is taught in Arabic.

Requirements/Evaluation:  Active in-class participation; active participation in discussion forums on GLOW; weekly writing assignments of 2-3 pages; two in-class presentations; a final 10-pages essay.
Prerequisites:  ARAB 302
Enrollment Limit:  10
Enrollment Preferences:  ARBIC
Expected Class Size:  7
Grading:  no pass/fail option, no fifth course option
Distributions:  (D1)  (DPE) (WS)
Writing Skills Notes:  Students will write 2-3 pages weekly and will produce a 10-pages essay at the end of the course. They will also provide written feedback to in-class presentations and online discussions. The writing assignments will involve working with several drafts, revisions, and regular annotations of artwork.
Difference, Power, and Equity Notes:  This course is motivated by addressing the power dynamics between art forms in the Arabic-speaking world (poetry versus visual culture). It also explores the intersection of gender, ethnicity, and access to different expressions and venues of art and art production.

ARAB 414  (F) Displacement: Global Histories of Refugees and Forced Migration  (DPE) (WS)
Cross-listings:  GBST 414 / HIST 402
Secondary Cross-listing
The Middle Eastern refugee has become a central figure in debates on migration, asylum, and the right to belong in Europe, Asia, and North America. Often stereotyped as threatening, alien, and rootless, these migrants are generally depicted as lacking histories and by extension not worthy of consideration or empathy. This course invites students to understand some of the most tragic humanitarian crises of our time and the massive involuntary displacements provoked by war, violence, and/or climate change. Taking a global perspective, this seminar examines the history of displacement, refugees, migration, diaspora in a focusing on the nineteenth century through the present. With special attention to the historical experience of various peoples of the Middle East, the course will start with theoretical approaches to the study of migration and then delve into case studies. A range of different moments of displacement will be analyzed such as the experiences of Armenians, Jews, Palestinians, Syrian, Iraqis, and Kurds. By examining the human geography and politics of forced displacement and migration, this course will address a number of important academic and political questions: what makes a history written by, about, and for displaced people powerful? How can writing from the perspectives of refugees challenge core debates about identity, the nation and borders? How does the focus on displacement help in understanding the nature of war and conflict?
Requirements/Evaluation: Final 25 page research paper, several drafts of paper, class presentations and in class writing exercises.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: History and Arabic Studies majors and Global Studies concentrators.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 414(D2) GBST 414(D2) HIST 402(D2)

Writing Skills Notes: This research seminar will involve the writing of a final 25 page paper. Prior to that stage, each process of writing will involve moments of feedback and sharing. Students will submit a proposal early on in the semester and then write an outline. These will receive peer and instructor feedback. They will then submit a five page draft in October, a 10 page draft in November, before the final submission in December. In this way, they will have opportunities to rework and improve their writing.

Difference, Power, and Equity Notes: This course takes a comparative approach by exploring the predicament of some of the most vulnerable people in the world, i.e, displaced peoples and refugees. The course will consider their legal status and their experience of leaving their homes due to wars or natural disaster. The area of study is the Middle East and we will examine the historical experience of a number of different people in the region including Kurds, Palestinians, Sephardi Jews, and Syrians.

ARTH 215 (F) Envisioning the Sacred: Representation and Religion in Christian and Muslim Cultures (WS)

Cross-listings: ASIA 212 / REL 211

Primary Cross-listing

How did medieval Christians and pre-modern Muslims imagine the sacred and how did they give what they imagined pictorial form? How were these pictures used, both in public and in private life, and why? How did the art of these unique religious traditions forge connections between the visible and invisible worlds? Paying particular attention to the function and experience of works of art within Christian and Islamic cultures, this seminar examines the evolution of devotional visual expression, while also exploring the problems sacred images generated in these distinct yet often overlapping traditions. Through readings and class discussion, the course will investigate, among other topics: the varied attitudes toward the representability of God in Judaism, Islam, and Christianity; the impact of earlier image traditions on the religious art of medieval Christians and pre-modern Muslims; the cult of the devotional image, concerns over idolatry, and the destruction of images; ideas about spiritual versus physical vision and their influence on the making and viewing of pictures; the relationship of sacred images to relics and to various aspects of organized ritual; and the possible roles played by pictures of the sacred in silencing or giving voice to dissent.

Requirements/Evaluation: Participation in class discussion; oral presentation; five 3-4-page papers, and a final 6-page paper

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Sophomores then juniors, but open to all

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: This seminar will be team taught, by Murad Mumtaz and Peter Low

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 212(D1) ARTH 215(D1) REL 211(D2)

Writing Skills Notes: In this 200-level seminar, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 3-4-page papers they will submit, with suggestions for improvement.
**ARTH 218 (F) From the Battlefield to the Hermit’s Cell: Art and Experience in Norman Europe (WS)**

**Cross-listings:** WGSS 284 / REL 284

*Primary Cross-listing*

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans—a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries—each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects—an embroidery, a building, and a book—give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.

**Requirements/Evaluation:** Participation in discussion; five 4-5-page tutorial papers; five 1-2-page response papers.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** First years and sophomores, but open to all.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 284(D2) REL 284(D2) ARTH 218(D1)

**Writing Skills Notes:** In this tutorial, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 5-7-page papers they will submit, with suggestions for improvement.

**Attributes:** ARTH pre-1800
phenomenology; the social functions of images and the social history of art; the materiality of art; race, gender, and sexuality; the global scope of art and art history.

Requirements/Evaluation: six 1,000-word analytical essays plus one 2,000-word writing project. Participation in class discussion. Attendance.

Prerequisites: any prior ARTH course (one or more 100-level ARTH course[s] recommended). In the absence of prior coursework in art history, permission of instructor is necessary for admission.

Enrollment Limit: 19

Enrollment Preferences: The course is limited to art-history and (with permission) art history/studio majors. If the course is over-enrolled, preference will be given to senior AH majors, then juniors. Second-year students intending to major in art may enroll with permission.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Unit Notes: Satisfies the ARTH 301 requirement for the art-history major. Will satisfy the methods/junior seminar requirement for the history/studio major, but students wishing to do so must have permission of instructor to enroll.

Distributions: (D1) (WS)

Writing Skills Notes: Students submit one 1,000-word essay every other week, for a total of six short essays. In addition, they submit a 2,000 writing project at the end of term. The purpose of the essays is to analyze the arguments and rhetoric of influential art-historical scholarship and criticism. The subject of the course, then, is how to write as an art historian. We discuss not only the content of the essays we read and write but also the form, both in class and in office hours.

Spring 2025

SEM Section: 01 MR 2:35 pm - 3:50 pm Murad K. Mumtaz

ARTH 302 (F) Methodologies of Art History (WS)

The purpose of this course is to trace the origin and development of key ideas that define the discipline of art history. They include the idea that art has a history, that style is unique to individuals but also definitive of entire periods or cultures, that interpretation should be contextual, that representation is fundamentally subjective, that art can be an instrument of power, that reception is as much a part of the history of art as production, among many others. This course begins with a series of texts from around 1900, which drew upon nineteenth-century fields such as cultural history, psychology of perception, and psychology of empathy, to articulate the first methodologies of art history. The course then considers the critiques of those methods that emerged in the middle twentieth century from the fields of iconology, marxism, feminism, structuralism, and ethnic studies, among others. The course concludes with a consideration of the current interest in a global history of art from perspectives such as anthropology, curation, phenomenology, aesthetics, new materialism, and “Bildwissenschaft.” In this way, it becomes possible to see that the history of art is not merely the sum total of information available throughout the world about art objects, but also a coherent tradition of methodological debate about what are the most effective and responsible ways of writing the history of art.

Requirements/Evaluation: Six 1,000-word analytical essays. Six short responses to the papers of other students. Participation in class discussion. Attendance.

Prerequisites: Two prior ARTH courses (100-level ARTH courses are ideal). In the absence of prior coursework in art history, permission of instructor is necessary for admission.

Enrollment Limit: 19

Enrollment Preferences: Art-history majors (seniors, then juniors). Then history and studio majors who need to complete the methods requirement. Then second-years intending to major in art history, but only by permission.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: Satisfies the requirement for methods of art history for the art-history major (i.e., it is the equivalent of ARTH 301). It will also satisfy the methods requirement for the history and studio major.

Distributions: (D1) (WS)

Writing Skills Notes: Students submit one 1,000-word essay every other week, for a total of six short essays. The purpose of the essays is to analyze the arguments and rhetoric of influential art-historical scholarship and criticism. The subject of the course, then, is how to write as an art historian. We discuss not only the content of the essays we read and write but also the form, both in class and in office hours.
ARTH 322 (S) Cold War Aesthetics in Latin America  (DPE) (WS)
The Cold War was far more complex than a military conflict, with battles waged more in the symbolic than in the physical realm. The Cold War was therefore "everywhere and nowhere," as new superpowers maneuvered to maintain geopolitical balance. Through a transnational lens this course considers the Cold War in Latin America as an aesthetic phenomenon with many facets, to recover how artistic practices unfolded myriad—and often conflicting--ideas regarding power, cultural influence, modernization, and revolution.

Requirements/Evaluation: Active participation, leading discussion, and five four-page writing assignments.
Prerequisites: One ARTH course.
Enrollment Limit: 12
Enrollment Preferences: If overenrolled, preference will be given to Art History majors.
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option
Distributions:  (D1)  (DPE)  (WS)
Writing Skills Notes: This course foregrounds writing and peer reviews to develop critical thinking. We will have five four-page writing assignments, spaced throughout the semester, which will incorporate our class discussions and research. Students will receive critical feedback on both form and content from their professor and from their peers.
Difference, Power, and Equity Notes: This course fulfills DPE requirements through historical and visual analyses that examine the contestations of power that defined the Cold War era and their ramifications in the shaping of notions such as modernism, modernization, progress, citizenship, and resistance. The course takes a transnational perspective to analyze diverse artistic practices in relation to race, gender, and class dynamics, and to issues of cultural imperialism, nationalism, revolutionary politics, and globalization.
Attributes: ARTH post-1800

Spring 2025

ARTH 325 (S) The Arts of the Book in Asia  (WS)

Cross-listings: ASIA 325
Primary Cross-listing
From palm leaf manuscripts to scrolls to Islamic codices, books have long served as vehicles of religious, cultural and artistic exchange in Asia. Owing both to their portability and status as finely crafted art objects, books have transmitted ideas across the continent, spreading courtly styles of painting from China to India, esoteric Buddhist teachings from Kashmir to Tibet and Mongolia, as well as the Quranic arts of calligraphy and illumination from Islamic South Asia to Southeast Asia. This co-taught seminar will highlight the interwoven history of book arts as it developed and disseminated across different regions of Asia. The course will also introduce students to the major art forms of the book, such as painting, calligraphy and illumination. The aim of the seminar is to understand the book as object while also investigating its content and its larger cultural significance. A number of class meetings will take place in the Chapin Library, where students will have the opportunity to study original manuscripts from the Special Collections. The course will culminate in an exhibition at Chapin Library which the students will curate using the Special Collections holdings.

Requirements/Evaluation: 3 essays, a final project/paper based on museum objects, wall label
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: preference will be given to Art and Asian Studies Majors, and then to students of any major interested in the art and culture of Asia
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions:  (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
Writing Skills Notes: Over the course of the semester students will write three papers at five pages each, culminating in a well-developed, focused final project. Students will be given extensive feedback on each assignment regarding grammar, style, and argument. The final paper will be part of a larger project in which students will work together to curate a small exhibition using the Chapin Library's Asian holdings. Each student will be asked to write a wall label for their selected object.

Spring 2025

SEM Section: 01    MW 11:00 am - 12:15 pm    Murad K. Mumtaz

ARTH 409  (F) Homer, Eakins, Sargent: American Painters in a Changing World  (WS)

What is the function of art in a rapidly changing world? Should it celebrate beauty, reveal truth, or describe the nature of modern life? America's finest painters of the nineteenth century -- Winslow Homer, Thomas Eakins, and John Singer Sargent -- did all those things, but in distinctly different ways. Homer transformed himself from a lively sketch artist for Harper's Weekly to a painter of scenes of sublime nature and heroic individualism. Eakins practiced a determined scientific realism and taught it to his students at the Pennsylvania Academy of the Fine Arts, until scandal led to his dismissal. And Sargent managed to produce the most exquisite fashionplate portraits of the era even as he imaginatively drew on the most progressive currents of contemporary art. This seminar looks at the work of these artists, their engagement with post-Civil War society, and how each of them dealt with profound mid-career crises. Topics to be explored will include different models of artistic education, the role of European travel and training, the art market, changes in public taste, and the rise and fall of critical reputations. There will be a major research paper, several small assignments, and a field trip.

Class Format: There will be a field trip to either New York or Philadelphia, as schedules permit.

Requirements/Evaluation: There will be a research paper of 20 - 25 pages. There will also be several smaller assignments, including a 5-minute oral presentation on a painting.

Prerequisites: ARTH 264 or consent of the instructor.

Enrollment Limit: 19

Enrollment Preferences: Preference given to senior majors and graduate students.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (WS)

Writing Skills Notes: Students will prepare a research paper of 20 to 25 pages in three stages: an annotated bibliography, a first draft (which I will return with comments and line-edits), and a revised final draft.

ASIA 111  (S) The Asia-Pacific War  (WS)

Cross-listings: HIST 112

Secondary Cross-listing

The "Asia-Pacific War," as it is known in Japan, raged from the full-scale Japanese invasion of China in 1937 until Japan's total defeat in 1945. This war, though certainly tied to the Allied war against Germany and Italy, was viewed by many participants at the time as truly a war apart due to the immense distances involved, the gleeful, racism-fueled brutality on both sides of the conflict, and the resultant abuses of POWs, use of atomic weapons, and other atrocities. Students will explore the intersection of colonialism, racism and opportunism that fed the conflagration, and the remarkable rapprochement between American and Japanese former enemies immediately after the war. It will examine in depth the roles of China and the USSR in this conflict, which are often mentioned but functionally ignored in the West. It will cover the various warzones and home fronts, focusing as much as possible on conveying the experiences of participants through primary sources. It will likewise seek to bridge the analysis of the military and socio-political sides of this conflict, which are often treated as distinct, by drawing on key academic works in the field.

Requirements/Evaluation: Weekly meetings with professor and one peer partner; 5-page papers (6 total); 2-page critiques of partner's papers (6 total)
Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: History majors and Asian Studies concentration students, then everyone else.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 112(D2) ASIA 111(D2)

Writing Skills Notes: Students will alternate weekly between writing 5-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners.

ASIA 209  (S) The Literature of Early China  (WS)

Secondary Cross-listing

Cross-listings: CHIN 217 / COMP 211

From poems on forbidden trysts and tales of bloody battles to aphorisms about filial piety and essays on moral governance, the literature of early China spans a wide range of topics and genres. In this course we will read, discuss, and write about literary works from the period stretching from approximately 600 BCE to the end of the Han empire in the third century CE, including poems, narratives, and philosophical works. All readings will be in English.

Requirements/Evaluation: Evaluation is based on writing assignments (1 paragraph, 3-4 pages, 5-6 pages, and 8-10 pages) and participation in class discussions.

Prerequisites: None
Enrollment Limit: 19
Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; current or prospective majors in Comparative Literature; and current or prospective concentrators in Asian Studies.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

Unit Notes: Counts as a core elective for majors in Asian Languages, Literatures, and Cultures.

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
CHIN 217(D1) ASIA 209(D1) COMP 211(D1)

Writing Skills Notes: Students will write a series of progressively longer papers, each involving drafting, commenting, and revising.

ASIA 212  (F) Envisioning the Sacred: Representation and Religion in Christian and Muslim Cultures  (WS)

Secondary Cross-listing

How did medieval Christians and pre-modern Muslims imagine the sacred and how did they give what they imagined pictorial form? How were these pictures used, both in public and in private life, and why? How did the art of these unique religious traditions forge connections between the visible and invisible worlds? Paying particular attention to the function and experience of works of art within Christian and Islamic cultures, this seminar examines
the evolution of devotional visual expression, while also exploring the problems sacred images generated in these distinct yet often overlapping traditions. Through readings and class discussion, the course will investigate, among other topics: the varied attitudes toward the representability of God in Judaism, Islam, and Christianity; the impact of earlier image traditions on the religious art of medieval Christians and pre-modern Muslims; the cult of the devotional image, concerns over idolatry, and the destruction of images; ideas about spiritual versus physical vision and their influence on the making and viewing of pictures; the relationship of sacred images to relics and to various aspects of organized ritual; and the possible roles played by pictures of the sacred in silencing or giving voice to dissent.

Requirements/Evaluation: Participation in class discussion; oral presentation; five 3-4-page papers, and a final 6-page paper

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Sophomores then juniors, but open to all

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: This seminar will be team taught, by Murad Mumtaz and Peter Low

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 212(D1) ARTH 215(D1) REL 211(D2)

Writing Skills Notes: In this 200-level seminar, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 3-4-page papers they will submit, with suggestions for improvement.

ASIA 481 (F) History of Taiwan  (WS)

Cross-listings: HIST 481

Secondary Cross-listing

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Requirements/Evaluation: weekly papers and critiques

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History and Asian Studies majors/concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 481(D2) ASIA 481(D2)

Writing Skills Notes: In this tutorial course, students will write bi-weekly 5- to 7-page papers with feedback from both the instructor and tutorial partner. Students will revise one of their tutorial papers as a final assignment. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

BIMO 401 (S) Topics in Biochemistry and Molecular Biology  (WS)

This seminar course involves critical reading, analysis, and discussion of papers from the current biochemistry and molecular biology literature. Specific topics vary from year to year but are chosen to illustrate the importance of a wide range of both biological and chemical approaches to addressing important questions in the biochemical and molecular biological fields. To facilitate discussion, students will prepare written critiques analyzing the data and conclusions of the chosen literature.

Class Format: three hours per week

Requirements/Evaluation: class presentations and discussion, frequent short papers, and a final paper

Prerequisites: BIOL 202 and BIMO 321

Enrollment Limit: 12

Enrollment Preferences: those completing the BIMO concentration; open to others with permission of instructor

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)
Writing Skills Notes: The critical analysis of published papers in the biochem literature, as expressed in clear and succinct writing, is a key learning goal for the course. The students write seven literature critiques (typically 5-6 pages long) throughout the semester. While the specific topic each week differs, the parameters of the assignment are the same each time, allowing students to progressively improve their writing. I provide extensive written feedback on each critique, returned before the next due date.

BIOL 209 (F) Animal Communication (WS)

Cross-listings: NSCI 209

Primary Cross-listing

Animal communication systems come in as many varieties as the species that use them. What they have in common are a sender that encodes information into a physical signal and a receiver that senses the signal, extracts the information, and adjusts its subsequent behavior accordingly. This tutorial will consider all aspects of communication, using different animal systems to explore different aspects of the biology of signaling. Topics will include the use of syntax to carry meaning in chickadee calls, synchronous signaling by fireflies, gestural communication by primates, long-distance chemical attractants that allow male moths to find the object of their desire, and cultural evolution within learned signaling systems.

Requirements/Evaluation: evaluation will be based on five 5-page papers, five short response papers, and the student's effectiveness in tutorial discussions.

Prerequisites: BIOL 101 and 102; open to sophomores, juniors, and seniors

Enrollment Limit: 10

Enrollment Preferences: Biology majors and Neuroscience concentrators who need a Biology elective to complete the concentration; then sophomores.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

NSCI 209(D3) BIOL 209(D3)

Writing Skills Notes: This course is a tutorial, and each student will write five position papers and five response papers. Extensive feedback will be provided; students will be required to rewrite one position paper, and may rewrite any of them.

Attributes: COGS Related Courses NSCI Group A Electives

Fall 2024

TUT Section: T1 TBA Heather Williams

BIOL 440 (S) Cell Signaling and Tissue Engineering: A Potential Fountain of Youth? (WS)

It is a long quest of mankind to have a healthy and long life but it is inevitable that our bodies lose function due to injury, disease or as we grow old. At the heart of tissue engineering is the idea that we can restore tissue function by replacing with or rebuild the right structure. To artificially generate tissues, organs or even organisms, one fundamental question must be addressed: How do our different organs, composed of cells with the identical genetic information, develop into such functionally different organs? Through the lens of tissue engineering, we will explore the mechanism by which cells sense the surrounding physical and chemical cues, and respond by changing their gene expression and consequent behaviors. We will devote most of our discussion to the scientific rationale and challenges of tissue engineering. Topics to be covered include 3D organoids in regenerative medicine, disease modeling, biobanking and drug discovery, computational modeling of stem cell dynamics, tissue growth and pattern formation, mechanotransduction, biomaterial fabrication, immunomodulation and cultured meat. Bioengineering of bone and cartilage, cardiovascular and nervous systems, etc. will be presented as case studies to illustrate details of certain aspects of tissue engineering in the broader context of the overall strategic approach used to solve a clinical problem. We will also consider the role of social factors like legislative regulation, health care philosophy, ethics and economics in the process of moving concept into the clinic and market.
Requirements/Evaluation: six 4-5 page papers; six 1-2 page response papers; tutorial presentations; contribution to the intellectual enterprise
Prerequisites: BIOL202 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Junior and seniors, with preference to senior Biology majors who have not had a 400-level course
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (WS)

Writing Skills Notes: Each student will write six 4-5 page papers that address questions given by the professor and six 1-2 page critiques of their tutorial partner's papers, either adding to or refuting the main points made. Both papers and critiques will receive feedback from professor regarding structure, style and argument. As a final assignment, each student will write a paper that requires synthesizing/revising their ideas from the previous five papers and also a peer review of their partner's final paper.

CAOS 351 (F)(S) Marine Policy (DPE) (WS)
Cross-listings: PSCI 319 / ENVI 351

Primary Cross-listing
Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available
Prerequisites: none

Enrollment Limit: 23
Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut
Expected Class Size: 22
Grading: no pass/fail option, no fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 319(D2) ENVI 351(D2) CAOS 351(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

CAOS 352  (F)(S)  American Maritime History  (DPE) (WS)

Primary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people’s complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading:  no pass/fail option,  no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352(D2) CAOS 352(D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

**COMP 111 (F)(S) The Nature of Narrative (WS)**

**Cross-listings:** ENGL 120
Narrative--storytelling--is a fundamental human activity. Narratives provide us with maps of how the world does or should or might work, and we make sense of our own experiences through the narratives we construct ourselves. This course examines the nature and functions of narrative using texts from a wide range of literary traditions, media, and genres. Readings may span classics (e.g. Homeric epic, The Tale of Genji, and/or the Popol Vuh), fiction ranging from nineteenth-century realism to postmodern experimentation (possibly including Kafka, Tolstoy, Toni Morrison, and/or Emile Habibi), and visual literature from film and drama to graphic memoir (possibly including Mizoguchi Kenji, Art Spiegelman, Alison Bechdel, and/or Joe Sacco). We may also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

Class Format: The second half of the course may incorporate a modified tutorial format, where small groups meet with the instructor once a week, with students’ papers and responses forming the basis of the discussion.

Requirements/Evaluation: Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Comparative Literature majors, students considering a major in Comparative Literature, first-years, sophomores.

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 117 (F) Introduction to Cultural Theory (WS)

Cross-listings: ENGL 117

Secondary Cross-listing

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study “culture,” what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word “culture” means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Laura Mulvey, but we will also, in order to put our new ideas to the test, watch several films (mostly of the class's choosing) and listen to a lot of rock and roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

Class Format: discussion

Requirements/Evaluation: four formal writing assignments totaling 20 pages (three full essays + one lead-in assignment), informal writing twice weekly, class attendance and participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 117(D1) ENGL 117(D1)

Writing Skills Notes: Students will write three five- to seven-page papers, on which I will provide extensive feedback. Before writing their first papers, students will submit theses and introductions, which I will help them refine. We will hold three extra writing sessions, to discuss how best to organize arguments. Students will write informally before every class.

COMP 161 (F) Metafiction (WS)
Cross-listings: ENGL 161

Secondary Cross-listing
This course will examine ways in which literary works reflect on their status as written texts. We'll look at the formal pleasures and puzzles generated by techniques including frame narratives, recursion, and self-reference, in novels, films, and stories by Vladimir Nabokov, Jorge Luis Borges, Kelly Link, Paul Park, and others. Ultimately, we will use our study of metafiction to focus inquiry into the socializing force of self-consciousness in human development. Note that students will be required to use, as well as interpret, metafictional techniques in their assigned writing, and will write one or two essays in collaboration with a Chat AI.
Requirements/Evaluation: Several short exercises; four or five papers of increasingly complexity, totaling 22 pages; consistent attendance and participation; a love of reading, and a willingness to reread.
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course; sophomores
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 161(D1) ENGL 161(D1)

Writing Skills Notes: Students write five essays with considerable feedback from the instructor.

Fall 2024
SEM Section: 01 TF 1:10 pm - 2:25 pm Shawn J. Rosenheim

COMP 211 (S) The Literature of Early China (WS)
Cross-listings: CHIN 217 / ASIA 209

Secondary Cross-listing
From poems on forbidden trysts and tales of bloody battles to aphorisms about filial piety and essays on moral governance, the literature of early China spans a wide range of topics and genres. In this course we will read, discuss, and write about literary works from the period stretching from approximately 600 BCE to the end of the Han empire in the third century CE, including poems, narratives, and philosophical works. All readings will be in English.
Requirements/Evaluation: Evaluation is based on writing assignments (1 paragraph, 3-4 pages, 5-6 pages, and 8-10 pages) and participation in class discussions.
COMP 216  (S)  Folk and Fairy Tales in Literature and Beyond  (WS)
From cannibalistic crones in sugary cottages to frogs who can be transformed with a kiss, the English term "folktale" covers a broad range of stories that have been beloved and belittled, transmitted and transformed for hundreds of years. This course will look broadly at folktale from different traditions, ranging from medieval China to early modern Europe and contemporary America. We will approach the folktale from a number of perspectives, including typologies; moral lessons embedded in tales; nationalism and the origins of folktale studies; modern transformations of old tales in new media such as film; and the often porous borders between the natural and the supernatural, the animal and the human, and the living and the dead.
We will explore the way normative gender and ethnic roles are portrayed and sometimes undermined. We will also consider the complex literary histories of folktales, looking at sources, the interplay of oral and written traditions, folktales as alternative histories, notions of authorship, and the ways stories transform over time.
Requirements/Evaluation:  Regular attendance and participation in class; multiple written assignments of varying lengths building towards a final paper of 10-12 pages.
Prerequisites:  none
Enrollment Limit:  19
Enrollment Preferences:  Comparative Literature majors
Expected Class Size:  19
Grading:  yes pass/fail option,  no fifth course option
Distributions:  (D1)  (WS)
Writing Skills Notes:  Students will complete multiple writing assignments over the course of the semester that prepare them to produce a polished paper (10-12 pages) by the end of the semester. The final paper will be drafted in stages, and students will receive substantial feedback on these drafts as well as on other written assignments.

SEM Section: 01    TR 11:20 am - 12:35 pm     Sarah M. Allen

COMP 227  (F)  Outdoor Pools: Where Eros Meets Thanatos  (WS)
In an outdoor swimming pool is where Eros meets Thanatos: in both F. Scott Fitzgerald's novel The Great Gatsby (1925) and Billy Wilder's movie Sunset Boulevard (U.S.A., 1950), the protagonists are shot dead in their pool, and in his adaptation of Romeo and Juliet (U.S.A., 1996) Baz Luhrmann transposes the balcony scene to an outdoor pool where romance unfolds. What is it about outdoor swimming pools that they irremediably capture our imagination? This interdisciplinary tutorial explores the function and significance of outdoor swimming pools in French, German, and U.S. culture through literature, painting, photography, and film. Whether we regard them as a symbol of status and wealth, the remnants of Hollywood's Golden Age era, the embodiment of order and discipline, or a major environmental impact factor, they nevertheless fascinate us. Because outdoor swimming pools, whether private or public, are a microcosm of society and a metaphor for human civilization, they have also been at the center of discussions
about racial segregation and religious discrimination in Europe as well as in the U.S.A.. Although pools are mostly governed by tacit rules, such as respect for personal space and the desexualization of encounters, visitors have often disregarded and broken these regulations. That explains why outdoor swimming pools have often served as the perfect backdrop for literature and cinema’s steamiest and most violent scenes. We will start the course with a brief social history of pools and read a few sociological studies of swimming pools by experts (Jeff Wiltse, Kate Moles, Susie Scott) to lay the theoretical ground for our analysis. In the course of the tutorial, we will explore through novels, photographs, paintings, and films the various functions assigned to outdoor swimming pools depending on the time period. We will also delve into the genre of summer pool side literature (the satirical Summer House with Swimming Pool (2011) by Hermann Koch, the thriller The Swimming Pool (2018) by Clare Mackintosh, and Julie Otsuka’s latest novel, The Swimmers) and try to explain its great popularity. While the outdoor pool functions as a mirror of excess and decadence in the 1920’s as evidenced by the lavish pool parties thrown by The Great Gatsby by F. Scott Fitzgerald (1925), it becomes the epitome of white middleclass suburban life in the 60’s as John Cheever’s short story The Swimmer narrates. During the 1970’s, the pool advances as a symbol of sexual liberation as the erotic thriller The Swimming Pool (France, 1969) by Jacques Deray, the sexually charged pool paintings Peter Getting Out of Nick’s Pool (1966) or Portrait of an Artist (Pool with Two Figures) (1972) by David Hockney, or the male nudes by Tom Bianchi in his Fire Island Pines: Poloroids 1975-1983 attest. In the 1980’s the outdoor pool becomes once more the mirror of opulence and eroticism, which Helmut Newton’s photographs of Hollywood celebrities (Liz Taylor swimming in her jewels) and for Playboy magazine capture as well as Paul Thomas Anderson’s film Boogie Nights (U.S.A.,1997) about the booming porn industry during the Reagan-era. Starting in the late 90’s, the outdoor swimming pool takes on greater political significance, largely due to the emergence and increasing visibility of female and gay filmmakers. In François Ozon’s thriller Swimming Pool (France, 1996), the pool is the setting of female solidarity and feminist revenge. In her character study movie Everyone else (Germany, 2009), Maren Ade carefully examines how gender roles and stereotypes play out and get reinforced during a pool party. At last, in her recent comedy Freibad, (Germany, 2022) Doris Dorrie chooses a women-only public outdoor pool as the backdrop to raise questions of racial segregation and religious discrimination

Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Freshmen, sophomores, and juniors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Each student will write five 5- to 7-page papers on which they will receive written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partners' papers. As the final assignment, each student will revise one of their five papers.

COMP 230 (S) The Renaissance in England and the European Continent: Self and World (DPE) (WS)

Cross-listings: ENGL 228

Secondary Cross-listing

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Requirements/Evaluation: Five four-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: A 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor
**Enrollment Limit:** 19  
**Enrollment Preferences:** First- and second-year students, and English majors who have yet to take a Gateway course  
**Expected Class Size:** 19  
**Grading:** no pass/fail option, yes fifth course option  
**Distributions:** (D1) (DPE) (WS)  

**This course is cross-listed and the prefixes carry the following divisional credit:**  
COMP 230(D1) ENGL 228(D1)  

**Writing Skills Notes:** The course asks students to write five four-page papers and offers exposure to a range of humanistic modes, from close reading to visual analysis to the exposition of philosophical claims. One paper will involve independent research. The instructor will provide frequent and extensive written feedback on student work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.  

**Difference, Power, and Equity Notes:** This course examines the role of historical and cultural difference within and beyond Europe at the very beginning of globalization. Students will become acquainted with the origins of colonialism and the global traffic in slaves, as well as with the complex role of writers and intellectuals in questioning, defending, and imagining these practices. We will consider the epistemological challenges of accessing the testimony of subordinated persons.

**COMP 231 (F) Postmodernism (WS)**  
**Cross-listings:** ENGL 266  

**Primary Cross-listing**  
In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by critics like Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and Azuma Hiroki; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.  

**Class Format:** After an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week.  
**Requirements/Evaluation:** participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)  
**Prerequisites:** a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor  
**Enrollment Limit:** 10  
**Enrollment Preferences:** Comparative Literature majors, students with a demonstrated interest  
**Expected Class Size:** 10  
**Grading:** no pass/fail option, no fifth course option  
**Distributions:** (D1) (WS)  

**This course is cross-listed and the prefixes carry the following divisional credit:**  
ENGL 266(D1) COMP 231(D1)  

**Writing Skills Notes:** Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as
COMP 234 (S) Saharan Imaginations  (DPE) (WS)

Cross-listings: ARAB 209 / ENVI 208

Secondary Cross-listing

Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts’ fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: If the course is over-enrolled, students will required to provide a 200-word paragraph in which they explain how the course fits within their plan of study at Williams.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 209(D1) COMP 234(D1) ENVI 208(D1)

Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

**COMP 268 (S) The Contemporary African American and Latin American Novella (WS)**

**Cross-listings:** ENGL 243

**Secondary Cross-listing**
This tutorial examines how the novella has been deployed in the African American and Latin American contexts in our present century. Throughout the term, we will grow a vocabulary to understand how, from the perspective of craft, an elongated brevity can often lend itself, perhaps counterintuitively, to such an immersive reading experience. We will also contemplate why so many of the texts appear focused on countering established historical narratives. What unique possibilities does the form of the novella offer in this regard? In these explorations, we will encounter novellas from, among others, César Aira, Yuri Herrera, Jocelyn Nicole Johnson, Gayl Jones, John Keene, Bruna Dantas Lobato, Toni Morrison, and Alejandro Zambra. These readings will be paired with brief critical texts that will frame the essays to be written each week.

Requirements/Evaluation: five tutorial essays (4-5 pages); five responses to partners tutorial essays; thoughtful participation in tutorial meetings

Prerequisites: A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 10

Enrollment Preferences: Sophomores, but juniors and seniors are also welcome.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) ENGL 243 (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 268 (D1) ENGL 243 (D1)

Writing Skills Notes: Beyond the quantity of assigned writing, significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

Spring 2025

TUT Section: T1 TBA Ricardo A Wilson

COMP 299 (F)(S) On Occupations: Work, Colonization and Contemporary Life (DPE) (WS)

Cross-listings: ENGL 294

Secondary Cross-listing

Reading political essays, critical theory, historiography, and literary works, in this course we will ask what thinking through the different senses of "occupation" can teach us about contemporary life. The course wagers that there is a connection between why some nations are or were "under" occupation and why, as individuals, all of us must "have" occupations. On the one hand, we will think about work: What does it mean to have an occupation today? There was a time when most people could distinguish between the time of work and that of leisure. But we live under a different regime. What now is the difference between work and leisure for those working "gigs"? In the case of "creatives," Bifo Berardi says, it is the soul itself that has been put to work. And then there are those who are unemployed, i.e., those occupied by the most widespread form of work there is--looking for work. On the other hand, we will ask questions about colonialism: Did not Europe's occupation of the globe birth this world in which the only way to live is to be occupied in a narrow sense, i.e., to always be working or looking for work? And isn't one economic function of the occupation of peoples in our own times to create a cheap workforce? Finally, we will ask what art and political organizing can teach us about a "de-occupied" life--a life after work, a life without colonization. Writers will include Marx, Jyotiba Phule, Du Bois, Raymond Williams, Premchand, M. E. O'Brien and Eman Abdelhadi, Bifo Berardi, David Graeber, Mahatma Gandhi, Rabindra Nath Tagore, Mahasweta Devi, Edward Said etc.

Requirements/Evaluation: Students will read 100-120 pages each week. Each student will do one classroom presentation about the week's readings. Other assignments include weekly journals, an annotated bibliography, a proposal, and a final paper.

Prerequisites: 100-level English course or a 5 on the AP literature exam, or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores considering majoring in English or Comparative Literature, and English majors who have not yet taken a gateway course.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

COMP 335  (F)  Poetry of Indignation: Poetics and Transnational Liberation  (DPE) (WS)

Cross-listings:  AFR 328 / ARAB 320

Secondary Cross-listing

Poetry is usually associated with beautiful, metered, and charged language. However, beyond its poeticity, poetry has also functioned as a tool of liberation and transnational construction of identities and solidarities. States have national poets, and, in many countries, national anthems were written by famous poets. From Abu al-Qasim al-Shabbi and Claude McKay to Pablo Neruda, poetry has acted as a space for life, rebellion, resistance, revolution, and the defense of a common humanity that transcends the barriers of language and national aesthetics. This course draws on a variety of materials from the Caribbean to Africa and from the Middle East to India to conceptualize a "poetics of indignation" against slavery, social injustice, colonization, authoritarianism, capitalism, and globalization. The students in this course will read poets, such as Okot p'Bitek, Derek Walcott, Tsitsi Jaji, Mahmoud Darwish, and Pablo Neruda, among many other poets, to examine how poetics changed and shifted across times and geographic boundaries while retaining a commitment to indignation, rebellion, and anger at almost the same recurring oppressive forces.

Requirements/Evaluation:  Two 5pp. midterm papers; a 1000-word reflection statement; weekly GLOW posts; one 10-minute presentation; active participation in the discussions in class.

Prerequisites:  None

Enrollment Limit:  14

Enrollment Preferences:  If the class is overenrolled, the students will submit a 200-word paragraph in which they explain how the course fits within their plan of study at Williams.

Expected Class Size:  14

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 328(D2) COMP 335(D1) ARAB 320(D1)

Writing Skills Notes: The students in this course will receive intensive feedback on their writing. This includes writing two 5pp. papers as well as a 10pp. final paper. The students will submit weekly GLOW posts and a final reflection statement.

Difference, Power, and Equity Notes: The students will understand that poetry is a field in which power dynamics and imbalances of access to resources are reflected. They will also pay attention to who writes what and who publishes where in order to understand the imbrication of inequality within the institutions that produce, disseminate, and reward poets.

COMP 343  (F)  Shakespeare on Page, Stage and Screen: Text to Performance  (WS)

Cross-listings:  ENGL 345 / THEA 340

Secondary Cross-listing
Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns--with matters of gender, sexuality, race, class, or materiality, for instance--against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the texts in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing. At the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will read six plays, of different genres and written at different periods of Shakespeare's career. These will likely be Romeo and Juliet, Henry V, Twelfth Night, Hamlet, The Tempest, and A Midsummer Night's Dream. Close reading of the texts will be the priority, but we will also attend to the demands and opportunities of performance, and assess a range of recent film and stage productions.

Requirements/Evaluation: Three papers ranging from 4 to 7 pages; regular Glow posts; class participation.

Prerequisites: A THEA course; a 100-level ENGL course; a score of 5 on the AP Literature exam or a 6 or 7 on the IB exam; or permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors or prospective majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 369 (F) Indigenous Narratives: From the Fourth World to the Global South (DPE) (WS)

Cross-listings: HIST 306 / ARAB 369 / GBST 369

Primary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Requirements/Evaluation: active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7- to 10-pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option
This course is cross-listed and the prefixes carry the following divisional credit:

COMP 369(D1) HIST 306(D2) ARAB 369(D1) GBST 369(D2)

Writing Skills Notes: This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

Difference, Power, and Equity Notes: At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

DANC 302 (S) Moving Words, Wording Dance (DPE) (WS)

Cross-listings: ENGL 335

Primary Cross-listing

How can we capture the "liveness" of dance and performance through writing? How can the spoken and written word promote a deeper understanding of felt emotions expressed through embodied practice? In this tutorial, we will explore different modes of writing about performance such as ethnography, non-/fiction, and performative writing. While there will be skill-based goals and a set outline for the tutorial, core texts that will anchor the conversations and paired writing assignments will be selected according to the interests of enrolled students. Texts will be complemented with visual materials and/or virtual conversation with artist-scholars to encourage a multilayered experience with writing about performance. The course is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

Class Format: enrollment in the course will require each student to have in-person or zoom meeting with the instructor before the first class meeting, and attendance in the first organizational meeting or class session.

Requirements/Evaluation: This tutorial is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: Juniors and seniors, and those with specific interest in performance, creative, and analytical writing. Prior dance or performance experience not required.

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 335(D1) DANC 302(D1)

Writing Skills Notes: Each student will write three 5- to 6- page papers on which the professor and peers will provide critical feedback on content, style, and form. After each cycle of feedback, students will have the option to submit a revision, and discuss the revision process and the revised paper. As the final assignment, students will select one of the three papers to develop into a longer essay, which will be 10-15 pages.

Difference, Power, and Equity Notes: The monographs that will anchor the tutorial engage with politics of identity as it manifests in both staged and in everyday performances. The introductory points of exploration and the objects of analysis in the course are bodies in motion. So our inquiry...
throughout the semester will necessarily include how bodies "make meaning" in a network of power relationships within the context of historical associations to markers of race, class, gender, sexuality, and socially constructed differences

Spring 2025

ECON 219 (S) Global Economic History (WS)
What generated the rise of agricultural civilizations and early empires in the ancient world? Why did Western Europe--and not China, India, or the Middle East--first experience the Industrial Revolution? Why did Latin America stagnate over the 20th century, while Japan and eventually China and India boomed? What explains the historical success of the US economy? Why did the Soviet Union rise and fall? And why was African economic growth slow for so long before taking off in recent decades? These and other questions will guide our exploration of global economic development over the past several millennia. Our focus will be broadly comparative across space and time, with an emphasis on how institutions, resource endowments, culture, technology, and market forces help explain economic differences and change around the world. Throughout the course, we will draw on micro and macroeconomic concepts and simple empirical tools to understand and interpret the historical roots of the modern global economy.

Class Format: tutorial; weekly one hour meetings in groups of two
Requirements/Evaluation: evaluation will be based on five 5- to 6-page papers, critiques of fellow students' papers, a longer revision of a paper, and engagement in discussion
Prerequisites: ECON 110 and ECON 120 or equivalent courses subject to instructor approval
Enrollment Limit: 10
Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or History
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)
Writing Skills Notes: This tutorial course requires students to write five 5-7-page papers, to write 1-2 page responses to their tutorial partner's papers, and to revise and extend one of their papers into a larger final paper of approximately 10-12 pages. Along the way, I offer detailed comments on all of their writing, with an eye towards producing a very polished final paper.

ECON 230 (S) The Economics of Health and Health Care (WS)
What is health? How do we improve it? Health is an essential component of individual well-being and a fundamental input to a productive economy, making its production a societal priority, as well as an individual one. This course examines the economics of the supply and demand for health through applied microeconomic analysis. The course focuses on three broad areas: the inputs to health and the demand for health care; the structure and functioning of health care markets and the roles of key institutions; and the role of public policy in furthering individual and population health. Special attention will be devoted to topics of current policy interest, including health disparities, problems of health care costs and cost containment, health insurance reform and the Affordable Care Act, the role of public health interventions, and drug development and regulation.

Class Format: The class is a mixture of lecture and discussion.
Requirements/Evaluation: Several short papers, participation in class discussion, and a final research project and presentation.
Prerequisites: ECON 110 and a class in statistics
Enrollment Limit: 30
Enrollment Preferences: Economics majors who need a 200-level elective, Political Economy majors, and Public Health concentrators
Expected Class Size: 30
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (WS)
**Writing Skills Notes:** Students will write 3 policy memos over the course of the semester. Synthesis of peer-reviewed literature, use of citation management systems, and clarity in technical writing will be emphasized. Students will receive timely, substantial, individualized feedback to develop their technical writing ability over the course of the semester. Opportunities to meet with professor outside of class at any stage of writing.

**ECON 367 (S) The Political Economy of Social Insurance** (WS) (QFR)

The Great Society policies of the 1960s dramatically changed the ways people living in poverty interacted with the federal government, but the benefits associated with these policies seem to have stagnated. Since 1965, the annual poverty rate in the United States has hovered between 10% and 15%, though far more than 15% of Americans experience poverty at some point in their lives. In this course, we will study public policies that, explicitly or implicitly, have as a goal improving the well-being of the poor in the United States. These policies include social insurance programs such as Unemployment Insurance; safety net programs such as Temporary Assistance to Needy Families, Supplemental Nutrition Assistance Program, Medicaid, and housing assistance; education programs such as Head Start and public education; and parts of the tax code, including the Earned Income Tax Credit and Child Tax Credit. We will explore the design and function of these programs, with a particular focus on the context in which they were developed. What political incentives and constraints have strung up our social safety net? How do these factors affect the goals of policy, the trade-offs inherent to the policy's design, and why poverty has not sustained a downward trend in the United States? Through careful consideration, students will learn how to communicate a path forward for public policy which accounts for theoretical economic expectations and the reality of political constraints in policy design.

**Class Format:** Lecture with substantial class discussion.

**Requirements/Evaluation:** Several short policy memos, participation in class discussion, and a final analytical essay.

**Prerequisites:** ECON 253 or 255

**Enrollment Limit:** 25

**Enrollment Preferences:** Students majoring in economics or political economy.

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)  (WS) (QFR)

**Writing Skills Notes:** Students will write 4 policy memos over the course of the semester followed by a longer, final analytical essay. Synthesis of peer-reviewed literature, use of citation management systems, and clarity in technical writing will be emphasized. Students will receive timely, substantial, individualized feedback to develop their technical writing ability over the course of the semester. Opportunities to meet with professor outside of class at any stage of writing.

**Quantitative/Formal Reasoning Notes:** This course will use quantitative tools of economics. Focus on building data visualization & science communication skills after ECON 255.

**Attributes:** POEC Skills

**ENGL 105 (F) American Girlhoods** (DPE) (WS)

**Cross-listings:** WGSS 105

**Primary Cross-listing**

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

**Requirements/Evaluation:** at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation
**Fall 2024**

**ENGL 107 (F) Temptation** (WS)

**Cross-listings:** COMP 106

**Primary Cross-listing**

We want most those things we can’t—or shouldn’t—have. Or, to put it another way, it is when limitations are placed on our actions by law, religion, or the facts of our own biology that we experience desire most acutely. In this course, we will examine fictional narratives, lyric poems, and philosophical meditations in which people are tempted to act against their better judgement. Free will, ambition, temperance, suspense, despair, and repression will be our conceptual preoccupations. We will get to know such writers and artists as Homer, Euripides, Ovid, Augustine, Shakespeare, Donne, Milton, Laclos, Mozart, Freud, Frost, and Scorsese.

**Requirements/Evaluation:** Four five-page papers, in-class presentation, thoughtful participation in discussions

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** First-year students who have not taken or placed out of a 100-level ENGL course

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENGL 107(D1) COMP 106(D1)

**Writing Skills Notes:** Students will write four five-page papers, each of which will receive timely and extensive written feedback from the instructor. Students will be invited to discuss their papers with the instructor at the draft stage.

---

**ENGL 108 (F)(S) Idleness & Insubordination: Literatures Against Work** (WS)

Under the regime of idleness, to kill the time, which kills us second by second, there will be shows and theatrical performances always and always.

--Paul Lafargue, "The Right to Be Lazy" What right do we have to stay in bed? To laze about in the heat of the day? What is the relationship between
loafing and literary production? Departing from the ancient paradigm of otium (idleness, leisure, retirement) and negotium (work, service, activity), this course tracks the diversions and detours by which artists and writers have insisted on not keeping busy. We’ll consider the possibilities and limits of idleness in the space of the household and on Wall Street; we’ll read about people who literally wander and those who stay in place and say, “I prefer not to.” Encountering Virgil’s world-weary shepherd-songs, Shakespeare’s colonial imaginary, and contemporary meditations on pastoral retreat, we’ll ask after the difference between idleness as rest and idleness as protest. What poetic, narrative, and visual forms constitute an “idle aesthetic”? Alongside literature and a few films, we’ll dip into a selection of theoretical essays that think about how repeated refusals to work can cultivate new subjectivities under capitalism. What forms of creativity and community are developed when we withhold our labors? How do such forms resist and remake the world? Our inquiry will likely include works by Nanni Balestrini, Zora Neale Hurston, June Jordan, Clarice Lispector, Herman Melville, Andrew Marvell, Arthur Robobaud, Ousmane Sembène, Agnès Varda, among others.

Requirements/Evaluation: 4-5 papers, with revisions; a creative assignment. Regular discussion posts, self-reflections, and annotation/journal-entries. Two conferences with instructor.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will produce at least 20 pages of polished writing across the semester. We’ll devote class time regularly to discussing successful writing and revisions skills. Students will receive timely feedback on their assignments. As regular writing is part of an engaged reading practice, students will also be asked to do frequent short informal exercises (in class and out).

ENGL 112 (F) Introduction to Literary Criticism (WS)

What determines meaning? How we interpret is inevitably inflected by our own priorities and preoccupations, by the contexts in which we read, by literary and other conventions, and by the historical and personal circumstances of a work’s composition, as well as deriving from the particular words of a text and from the mutable life of language itself. So how to go about the task of reading literature well? This course will focus on key introductory methods and critical approaches, and is intended to develop your skills in reading, writing about, discussing and interpreting literary texts. Our initial readings--mainly short fiction and poetry, along with selected introductory work in critical theory--will invite increased self-consciousness about literary form, the functions of criticism, and the process of reading and interpretation. In the last weeks of the course, we will address longer texts, including at least one play, one novel and one film.

Requirements/Evaluation: Four papers rising from 3-6 pages, regular Glow posts, and contribution to class discussions.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: First-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Four papers, rising from 3 pages for the first, to 6 pages for the last. Regular postings on Glow. Extensive written feedback on longer papers, plus the option of revision.

Fall 2024

SEM Section: 01 MR 1:10 pm - 2:25 pm James L. Pethica
ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)
Cross-listings: AMST 113 / WGSS 113

Primary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: two-three short analysis papers, creative (1-2 pages), curated final project (archival exhibit and digital project), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 113(D2) ENGL 113(D1) WGSS 113(D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: two to three four-to-five-page graded papers, one creative assignment, and a final digital research project (8-10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

SEM Section: 01 TF 2:35 pm - 3:50 pm Bethany Hicok

ENGL 117 (F) Introduction to Cultural Theory (WS)
Cross-listings: COMP 117

Primary Cross-listing

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study "culture," what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word "culture" means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see
cultural as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Laura Mulvey, but we will also, in order to put our new ideas to the test, watch several films (mostly of the class's choosing) and listen to a lot of rock and roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

Class Format: discussion

Requirements/Evaluation: four formal writing assignments totaling 20 pages (three full essays + one lead-in assignment), informal writing twice weekly, class attendance and participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 117(D1) ENGL 117(D1)

Writing Skills Notes: Students will write three five- to seven-page papers, on which I will provide extensive feedback. Before writing their first papers, students will submit theses and introductions, which I will help them refine. We will hold three extra writing sessions, to discuss how best to organize arguments. Students will write informally before every class.

Attributes: AMST Critical and Cultural Theory Electives

SEM Section: 02 TF 2:35 pm - 3:50 pm Christian Thorne

ENGL 120 (F)(S) The Nature of Narrative (WS)

Cross-listings: COMP 111

Secondary Cross-listing

Narrative—storytelling—is a fundamental human activity. Narratives provide us with maps of how the world does or should or might work, and we make sense of our own experiences through the narratives we construct ourselves. This course examines the nature and functions of narrative using texts from a wide range of literary traditions, media, and genres. Readings may span classics (e.g. Homerian epic, The Tale of Genji, and/or the Popol Vuh), fiction ranging from nineteenth-century realism to postmodern experimentation (possibly including Kafka, Tolstoy, Toni Morrison, and/or Emile Habibi), and visual literature from film and drama to graphic memoir (possibly including Mizoguchi Kenji, Art Spiegelman, Alison Bechdel, and/or Joe Sacco). We may also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

Class Format: The second half of the course may incorporate a modified tutorial format, where small groups meet with the instructor once a week, with students' papers and responses forming the basis of the discussion.

Requirements/Evaluation: Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Comparative Literature majors, students considering a major in Comparative Literature, first-years, sophomores.

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 111(D1) ENGL 120(D1)

Writing Skills Notes: Multiple writing assignments that build upon each other, including drafts and revisions, with substantial individualized feedback
ENGL 123  (S)  The Short Story  (WS)
The reading for this course will consist entirely of short stories by such writers as Poe, Hawthorne, James, Doyle, Hemingway, Faulkner, Gilman, Chopin, Cather, Toomer, McCullers, O'Connor, Borges, Nabokov, Kincaid, Saunders, Diaz, and Shepard. We will read one or two per class meeting; at the end of the course, we'll be reading one collection, by Raymond Carver. Reading short stories will allow us to pay close attention to the form of our texts, and to paragraphs, sentences, and words. The premise of the essays you will write is that short stories and short essays are both arts based on controlling the release of information and meaning, and that studying the two genres together will have reciprocal benefits for reading and writing.

Class Format: class meetings will be devoted almost entirely to discussion

Requirements/Evaluation: grades will be based on the five formal writing assignments, with rewards for improvement, plus class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken a 100-level English course; then sophomores who have not taken a 100-level English course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions:  (D1)  (WS)

Writing Skills Notes: There will be five formal writing assignments, totaling about twenty pages. My response to each paper will include extensive marginal comments on technical issues, and a typed page of comments on the ideas and structure of the paper as a whole. Final grades will be determined by both the student's intellectual engagement and his or her increasing mastery of the art of writing essays.

Attributes:  ENGL Creative Writing Courses

Spring 2025

SEM Section: 01  TR 9:55 am - 11:10 am  John K. Limon

ENGL 138  (S)  What is a Self? Investigations in Literature, Philosophy, and Psychology  (WS)
The experience of having a self (or a subjective point of view) informs and colors literally everything we think, see, and feel. And yet what is a self? Is it the unchanging essence of who we are as individuals? Or is it the historically contingent product of ever-changing cultural and political forces (like the media, gender norms, and ideologies about race, to name just a few)? Or, perhaps, is the belief that we have a self just one big illusion, as the Buddha suggested millennia ago and as modern philosophers and scientists have argued in their own different ways more recently? In this class, we'll explore the deep mystery of human existence that we call "the self" or "subjectivity," looking at various attempts to capture, represent, and explain it (even escape it!). Our investigations will be wide-ranging, looking at examples from literature, philosophy, religion, and psychology. Works we'll study include: Tim O'Brien's The Things They Carried, Toni Morrison's Beloved, and theoretical writings on the self by Plato, Thoreau, and Jean-Paul Sartre among others. We'll even try our hand at meditation, while learning about the Buddhist idea of "no self." Students who genuinely find the experience of the self puzzling and fascinating will get the most out of this class. Bring an open mind about what it is to have a mind in the first place.

Requirements/Evaluation: four essays totaling 18-20 pages; active class participation; participation in other short informal writing assignments.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option
ENGL 150 (F)(S) Expository Writing (WS)

Writing clearly is the most important skill you can learn in college. Do you suffer from writer's block? Do you receive consistent criticism of your writing without also learning strategies for how to improve? This course is for students who want to learn how to write a well-argued, intelligible essay that offers a complex interpretive argument based on close, critical analysis of texts. We will derive our method for mastering the complex art of writing from Atul Gawande's bestselling book, *The Checklist Manifesto*. In addition to sharpening your skills in reading, note-taking and literary analysis, this class will give you tools for generating drafts, peer editing, revising, and polishing your writing. The readings for this course will be literary works, scholarly essays and nonfiction -- mostly contemporary, and mostly American.

Requirements/Evaluation: Requirements include active class participation (including peer-editing), drafts and revisions of four to five papers totaling at least 20 pages. Overall evaluation will include improvement and effort.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-year students, especially students with demonstrated need for help with analytical writing

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course is devoted to the study of writing, focusing especially on expository essays. Four to five papers are assigned, totaling at least 20 pages. Special attention will be paid to drafts, revision and building peer editing skills. Regular, one-on-one meetings with professor will be encouraged.

SEM Section: 01 TF 2:35 pm - 3:50 pm Cassandra J. Cleghorn

ENGL 153 (S) Androids, Cyborgs, Selves (WS)

Cross-listings: STS 153

Primary Cross-listing

In this expository writing course, we will analyze and argue about how humanoid and partly human bodies appear in legend, fiction, and film. When are these bodies inviting? When are they threatening? How are they gendered, how are they raced, and why? Which technologies fit easily into human forms, and which are resistant? What do the persons who inhabit these near-human bodies desire? Students in this course will develop arguments in reply to these and related questions, developing 3 or 4 essays through multiple stages of planning, drafting, and revising. Because this is an expository writing seminar, we will spend half or more of our class time discussing and practicing writing skills.

Requirements/Evaluation: several response papers (500 words); three or four essays (1200-1500 words, in multiple drafts); class participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: See details for ENGL 100-level courses on English Department Website.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

STS 153(D2) ENGL 153(D1)

Writing Skills Notes: This expository writing course is dedicated to facilitating real improvement in students’ written argumentative work. Students will write and revise response papers and 5-page essays (in multiple drafts) over the course of the semester, receiving substantial instructor feedback. Students will practice: drafting, revising, and responding to critique; writing appropriately for given occasions and audiences; grounding their writing in close, analytical reading; and acknowledging sources.

Spring 2025
SEM Section: 01    TR 8:30 am - 9:45 am     Ezra D. Feldman

ENGL 156  (F)  New American Fiction  (WS)

The goal of this course is to teach you how to write a clear, well-argued, and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature, in this case, contemporary American fiction, examining the very, very recent (last thirty years) developments in American fiction. We will read short stories and novels by writers such as Danielle Evans, George Saunders, Kali Fajardo-Anstine, Mary Robison, Karen Russell, ZZ Packer, Ocean Vuong, Yiyun Li, among others.

Requirements/Evaluation: Active participation, written and verbal comments on published and peer work, five essays (2-7 pages each, most in multiple drafts, including a final radical revision of an essay of the student's choice).

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: First-Year students

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)  (WS)

Writing Skills Notes: Five essays ranging from 2-7 pages each, most in multiple drafts. Students will receive extensive written comments on their writing skills, with suggestions for improvement, and may choose to meet with the professor individually outside of class as often as they'd like. Students will also comment (verbal and written) on published work and their peers’ drafts, operating under the assumption that becoming a better writer involves becoming a better reader.

Fall 2024
SEM Section: 01    MR 1:10 pm - 2:25 pm     Karen L. Shepard

ENGL 161  (F) Metafiction  (WS)

Cross-listings: COMP 161

Primary Cross-listing

This course will examine ways in which literary works reflect on their status as written texts. We’ll look at the formal pleasures and puzzles generated by techniques including frame narratives, recursion, and self-reference, in novels, films, and stories by Vladimir Nabokov, Jorge Luis Borges, Kelly Link, Paul Park, and others. Ultimately, we will use our study of metafiction to focus inquiry into the socializing force of self-consciousness in human development. Note that students will be required to use, as well as interpret, metafictional techniques in their assigned writing, and will write one or two essays in collaboration with a Chat AI.

Requirements/Evaluation: Several short exercises; four or five papers of increasingly complexity, totaling 22 pages; consistent attendance and participation; a love of reading, and a willingness to reread.

Prerequisites: none

Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course; sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

SEM Section: 01 TF 1:10 pm - 2:25 pm Shawn J. Rosenheim

ENGL 209 (S) Theories of Language and Literature (WS)

Cross-listings: COMP 265

Primary Cross-listing

This course is made up of questions: What is literature and why would anyone want to study it? What can you figure out by examining language that you can't figure out by studying history or psychology? Do students of literature have distinctive ways of asking questions about the world? Why do we call some language literary? Can any language be literary if it appears in the right kind of book? Is there a difference between verbal forms of art and visual or auditory ones? Can novels do things that plays and poetry cannot? Why does anyone read poetry anyway?

Requirements/Evaluation: informal writing every week; three 6-page papers; class attendance and participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 265(D1) ENGL 209(D1)

Writing Skills Notes: Informal writing before every class (about 500 words); three 6-page essays, plus a lead-in assignment on which the professor comments; two special writing sessions; fifteen pages of writing advice. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 221 (S) Hip Hop Culture (DPE) (WS)

Cross-listings: AMST 222 / AFR 222 / MUS 217

Secondary Cross-listing

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced "diggin' in the crates"--a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop's tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and
Harvard to the Smithsonian National Museum of African American History and Culture?

Requirements/Evaluation: Four papers, project with presentation, and a final exam.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: AMST majors or prospective majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 222(D2) ENGL 221(D1) AFR 222(D2) MUS 217(D1)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

ENGL 228 (S) The Renaissance in England and the European Continent: Self and World (DPE) (WS)

Cross-listings: COMP 230

Primary Cross-listing

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Requirements/Evaluation: Five four-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: A 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: First- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 230(D1) ENGL 228(D1)

Writing Skills Notes: The course asks students to write five four-page papers and offers exposure to a range of humanistic modes, from close
reading to visual analysis to the exposition of philosophical claims. One paper will involve independent research. The instructor will provide frequent and extensive written feedback on student work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course examines the role of historical and cultural difference within and beyond Europe at the very beginning of globalization. Students will become acquainted with the origins of colonialism and the global traffic in slaves, as well as with the complex role of writers and intellectuals in questioning, defending, and imagining these practices. We will consider the epistemological challenges of accessing the testimony of subordinated persons.

ENGL 238 (F) 1930s Black Literature  (WS)

**Cross-listings:** AFR 260

**Primary Cross-listing**

This course explores Black literary output of the 1930s in all its forms with the belief that this often under-appreciated decade contains many of the impulses that would come to structure the literary landscape in the decades that follow. These include an unflinching embrace of humor and satire, engagements with social realism, and a keen attention to notions of the radical in the international context. Special attention will be paid to how the writing pushes away from the development of what we have come to understand as the Harlem Renaissance of the 1920s. Work to be considered throughout the term comes from, among others, Marita Bonner, Arna Bontemps, Sterling Brown, Langston Hughes, Zora Neal Hurston, George Schuyler, Dorothy West, Richard Wright, and Octavia Wynnush.

**Requirements/Evaluation:** weekly reading responses, active class participation, two close readings (500 words each), annotated bibliography, class presentation, final paper (8-10 pages)

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 19

**Enrollment Preferences:** first- and second-year students, and English majors who have yet to take a Gateway course

ENGL 240 (F) What is a Novel?  (WS)

What is a novel? Where did novels come from? Why would anyone invent such a thing in the first place? This course is an introduction to the ways literary critics have attempted to give a genre as hard-to-pin down as the novel a theoretical framework. For a long time, nobody thought the novel even needed a theory--too popular, too loose and baggy to be thought of as any one thing. Today, novel theory is legion. To name a few, one can find theories of the novel that identify themselves as formalist, psychoanalytic, post-structuralist, Marxist, historical, and post-colonial, as well as accounts that emphasize sexuality and gender, for example, or the novel's trans-national development. We will move back and forth from the theory of the novel to its practice in order to see how the novel and its understanding have changed over the past 200 or so years. We'll center our studies in the Age of the Novel in Britain, the 19th century (Jane Austen, Charles Dickens), and extend our investigations to one of its contemporary heirs (Sally Rooney).
Theorists will include Bakhtin, Benjamin, Marx, Lukacs, Barthes, Ian Watt, Jameson, Sedgwick, Said, Bersani, Moretti.

Requirements/Evaluation: 4 papers; weekly posts to glow; regular, substantial, and intensive participation in class discussion.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

ENGL 243 (S) The Contemporary African American and Latin American Novella (WS)

Cross-listings: COMP 268

Primary Cross-listing

This tutorial examines how the novella has been deployed in the African American and Latin American contexts in our present century. Throughout the term, we will grow a vocabulary to understand how, from the perspective of craft, an elongated brevity can often lend itself, perhaps counterintuitively, to such an immersive reading experience. We will also contemplate why so many of the texts appear focused on countering established historical narratives. What unique possibilities does the form of the novella offer in this regard? In these explorations, we will encounter novellas from, among others, César Aira, Yuri Herrera, Jocelyn Nicole Johnson, Gayl Jones, John Keene, Bruna Dantas Lobato, Toni Morrison, and Alejandro Zambra. These readings will be paired with brief critical texts that will frame the essays to be written each week.

Requirements/Evaluation: five tutorial essays (4-5 pages); five responses to partners tutorial essays; thoughtful participation in tutorial meetings

Prerequisites: A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 10

Enrollment Preferences: Sophomores, but juniors and seniors are also welcome.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 266 (F) Postmodernism (WS)

Cross-listings: COMP 231

Secondary Cross-listing

In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on
Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by critics like Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and Azuma Hiroki; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.

Class Format: After an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week.

Requirements/Evaluation: participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)

Prerequisites: a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Comparative Literature majors, students with a demonstrated interest

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 266(D1) COMP 231(D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as written peer feedback on the longer papers. (See requirements for details about the number and type of assignments.)

Fall 2024
TUT Section: T1 TBA Christopher A. Bolton

ENGL 293 (S) "Make it New": The Modernist Experiment (WS)

In her essay "Mr. Bennett and Mrs. Brown" (1924), Virginia Woolf proposed that around 1910 "human character" itself had suddenly changed, rendering existing conventions "in religion, conduct, politics, and literature" no longer adequate to express the new age. "And so the smashing and the crashing began. Thus it is that we hear all around us, in poems and novels . . . the sound of breaking and falling, crashing and destruction." This course will explore the effort of artists in the decade or so before and after World War I to "make it new." We will read work by Conrad, Yeats, Frost, Pound, Joyce, T.S.Eliot, Mansfield, Woolf, Faulkner, Wallace Stevens, William Carlos Williams and others, and chart the range of innovative narrative and formal strategies Modernist writers adopted in their efforts to represent consciousness, experience, memory and the objective world more fully and accurately in an era of massive social, political and technological change. We will also consider some non-print media, including developments in the visual arts from the post-impressionists through to the surrealists, the work of the Bahaus, and early experiments in film.

Requirements/Evaluation: Active class participation; three papers rising from 3-7 pages; regular short reading responses

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Students who have declared or are considering English or Comparative Literature majors; students who have taken or placed out of a 100-level ENGL course.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Three papers rising from 3-7 pages; regular short reading responses. Students will receive comprehensive feedback on their writing, and opportunities for revision.
ENGL 294  (F)(S)  On Occupations: Work, Colonization and Contemporary Life  
(DPE) (WS)

Cross-listings:  COMP 299

Primary Cross-listing

Reading political essays, critical theory, historiography, and literary works, in this course we will ask what thinking through the different senses of "occupation" can teach us about contemporary life. The course wagers that there is a connection between why some nations are or were "under" occupation and why, as individuals, all of us must "have" occupations. On the one hand, we will think about work: What does it mean to have an occupation today? There was a time when most people could distinguish between the time of work and that of leisure. But we live under a different regime. What now is the difference between work and leisure for those working "gigs"? In the case of "creatives," Bifo Berardi says, it is the soul itself that has been put to work. And then there are those who are unemployed, i.e., those occupied by the most widespread form of work there is--looking for work. On the other hand, we will ask questions about colonialism: Did not Europe's occupation of the globe birth this world in which the only way to live is to be occupied in a narrow sense, i.e., to always be working or looking for work? And isn't one economic function of the occupation of peoples in our own times to create a cheap workforce? Finally, we will ask what art and political organizing can teach us about a "de-occupied" life--a life after work, a life without colonization. Writers will include Marx, Jyotiba Phule, Du Bois, Raymond Williams, Premchand, M. E. O'Brien and Eman Abdelhadi, Bifo Berardi, David Graeber, Mahatma Gandhi, Rabindra Nath Tagore, Mahasweta Devi, Edward Said etc.

Requirements/Evaluation:  Students will read 100-120 pages each week. Each student will do one classroom presentation about the week's readings. Other assignments include weekly journals, an annotated bibliography, a proposal, and a final paper.

Prerequisites:  100-level English course or a 5 on the AP literature exam, or permission of the instructor.

Enrollment Limit:  19

Enrollment Preferences:  first-years and sophomores considering majoring in English or Comparative Literature, and English majors who have not yet taken a gateway course.

Expected Class Size:  19

Grading:  no pass/fail option,     no fifth course option

Distributions:  (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 294(D1)  COMP 299(D1)

Writing Skills Notes:  Students will write over 20 pages in the semester and they will receive extensive feedback.

Difference, Power, and Equity Notes:  Students will read and discuss texts about the organization of power in contemporary society. They will reflect upon the economic structures that underpin a range of oppressive social forms.

ENGL 316  (F) Unfinishing America  
(DPE) (WS)

Cross-listings:  AMST 326

Secondary Cross-listing

The Great American Novel is a moribund cliché. Few would argue that any one work of fiction could capture the essence of American life. In this class, we will flip the Great American Novel on its head by reading Ralph Ellison's unfinished second novel. After publishing the acclaimed Invisible Man in 1952, Ellison seemed poised to deliver the next Great American Novel. But he never did. When he died in 1994, 42 years later, he left behind thousands of pages of material, but no finished second novel. Why wasn't he able to finish it? Some of it was bad luck. Some of it was a struggle with
genre and form. However, perhaps the real reason Ellison’s novel proved impossible is what it was trying to say. This is a book about the historical trauma of racism. Therefore, the thesis of this class is that the Great American Novel cannot be written as long as American history remains whitewashed. Ellison’s manuscript shows this in surprising ways, from its depiction of racial passing and the taboo of interracial sex to its extended exploration of Black and Indigenous cultures in the former Oklahoma Territory. In addition to Ellison, we will read the work of the Chicano author Tomás Rivera, whose fragmentary fictions provoke similar questions. This class culminates in a final project that asks students to "unfinish" an American cultural object.

Requirements/Evaluation: Assignments include a daily free-writing exercise, graded note-taking, three 1-2-page reflective essays, two brief creative writing assignments, and a final creative project.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: AMST majors, then juniors and sophomores

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 316(D1) AMST 326(D2)

Writing Skills Notes: Each student will be responsible for producing a reader's guide to Ellison's unfinished second novel. Students will write, rewrite, and revise their reader's guide throughout the semester. Three drafts will be due throughout the semester. A quality reader's guide will highlight the book's main themes, profile the main characters, and retrace the book's development. Students will also complete one draft of a guide to Rivera's novella, due at the end of the semester.

Difference, Power, and Equity Notes: "Unfinishing America" satisfies the Difference, Power and Equity requirement because it calls into question mainstream American culture from Black, Chicano, and Indigenous perspectives. It interrogates the relations of power that have driven American history, from the Civil War and Westward expansion in the 19th century to the struggle for Civil Rights against Jim Crow in the 20th. Finally, it asks what it would mean to have true equity amidst great diversity in American culture.

ENGL 335 (S) Moving Words, Wording Dance (DPE) (WS)

Cross-listings: DANC 302

Secondary Cross-listing

How can we capture the "liveness" of dance and performance through writing? How can the spoken and written word promote a deeper understanding of felt emotions expressed through embodied practice? In this tutorial, we will explore different modes of writing about performance such as ethnography, non-/fiction, and performative writing. While there will be skill-based goals and a set outline for the tutorial, core texts that will anchor the conversations and paired writing assignments will be selected according to the interests of enrolled students. Texts will be complemented with visual materials and/or virtual conversation with artist-scholars to encourage a multilayered experience with writing about performance. The course is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

Class Format: enrollment in the course will require each student to have in-person or zoom meeting with the instructor before the first class meeting, and attendance in the first organizational meeting or class session.

Requirements/Evaluation: This tutorial is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

Prerequisites: none
Enrollment Limit: 8

Enrollment Preferences: Juniors and seniors, and those with specific interest in performance, creative, and analytical writing. Prior dance or performance experience not required.

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 335(D1) DANC 302(D1)

Writing Skills Notes: Each student will write three 5- to 6-page papers on which the professor and peers will provide critical feedback on content, style, and form. After each cycle of feedback, students will have the opportunity to submit a revision, and discuss the revision process and the revised paper. As the final assignment, students will select one of the three papers to develop into a longer essay, which will be 10-15 pages.

Difference, Power, and Equity Notes: The monographs that will anchor the tutorial engage with politics of identity as it manifests in both staged and everyday performances. The introductory points of exploration and the objects of analysis in the course are bodies in motion. So our inquiry throughout the semester will necessarily include how bodies "make meaning" in a network of power relationships within the context of historical associations to markers of race, class, gender, sexuality, and socially constructed differences.

Spring 2025
TUT Section: T1 TBA Munjulika R. Tarah

ENGL 345 (F) Shakespeare on Page, Stage and Screen: Text to Performance (WS)

Cross-listings: THEA 340 / COMP 343

Secondary Cross-listing

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns--with matters of gender, sexuality, race, class, or materiality, for instance--against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the texts in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing. At the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will read six plays, of different genres and written at different periods of Shakespeare's career. These will likely be Romeo and Juliet, Henry V, Twelfth Night, Hamlet, The Tempest, and A Midsummer Night's Dream. Close reading of the texts will be the priority, but we will also attend to the demands and opportunities of performance, and assess a range of recent film and stage productions.

Requirements/Evaluation: Three papers ranging from 4 to 7 pages; regular Glow posts; class participation.

Prerequisites: A THEA course; a 100-level ENGL course; a score of 5 on the AP Literature exam or a 6 or 7 on the IB exam; or permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors or prospective majors

ENVI 208 (S) Saharan Imaginations (DPE) (WS)

Cross-listings: ARAB 209 / COMP 234

Secondary Cross-listing

Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts' fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: If the course is over-enrolled, students will required to provide a 200-word paragraph in which they explain how the course fits within their plan of study at Williams.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 209(D1) COMP 234(D1) ENVI 208(D1)

Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

ENVI 243 (S) Reimagining Rivers (DPE) (WS)

Cross-listings: ANTH 243

Primary Cross-listing

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Requirements/Evaluation: Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.

Prerequisites: None

Enrollment Limit: 10
Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 243(D2) ANTH 243(D2)

Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

Difference, Power, and Equity Notes: This course focuses on the role of rivers in struggles over cultural difference, social power, and environmental equity. Throughout the course, students read and write extensively about environmental justice, and they engage with diverse theoretical approaches to studying the intersection of water, power, and social identity. Our focus from beginning to end is on the profound impact of river management on the lives of marginalized indigenous, agrarian, and urban communities.

ENVI 244 (S) Environmental Ethics (WS)

Cross-listings: PHIL 244

Primary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature, among others. Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: five essays (5-7 pages each) and five prepared oral responses to partners’ essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 244(D2) PHIL 244(D2)

Writing Skills Notes: Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

ENVI 291  (F)  Religion and Ecology in America  (WS)

Cross-listings:  REL 291 / SOC 291

Primary Cross-listing

This course examines the relationship between religious and environmental thought in American cultural history. Exploring a broad range of practices, stories, and beliefs, we will examine the spiritual roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have religious writers, thinkers, and artists shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biological theory, Buddhist eco-spirituality, and more.

Requirements/Evaluation:  Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner’s paper.

Prerequisites:  None

Enrollment Limit:  10

Enrollment Preferences:  Environmental Studies majors and concentrators

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 291(D2) REL 291(D2) SOC 291(D2)

Writing Skills Notes: Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

ENVI 351  (F)(S)  Marine Policy  (DPE)  (WS)

Cross-listings:  PSCI 319 / CAOS 351

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country’s total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation’s environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format:  This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation:  Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites:  none

Enrollment Limit:  23

Enrollment Preferences:  must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size:  22
Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 319(D2) ENVI 351(D2) CAOS 351(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

ENVI 450  (F)  Senior Seminar: Environmental Ethnography  (WS)
A key question orients this course: What can the embodied, place-based, and detailed approach of ethnographic study bring to our understandings of the environment? This upper-level seminar will explore this question through classroom discussions and a semester-length research project. Students will engage different styles of environmental ethnography while undertaking their own ethnographic projects involving the Williams College community and surrounding areas. Students will learn to work across different kinds of evidence as they draft fieldnotes, code fieldwork data, extrapolate key ideas from their fieldwork materials, and discover new ways of building environmental knowledge. Students will use these materials to collectively assemble an edited volume of ethnographic snapshots to be presented to the wider Environmental Studies community at Williams.

Requirements/Evaluation: Participation in seminar discussions; Weekly fieldnotes (2-3 pages per week); Mid-term coded fieldwork notes and summary statements (9-20 pages); Final ethnographic paper (10-12 pages) and short film

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; Juniors and Seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: This is a writing intensive capstone seminar. Students will produce and receive peer and professor feedback on weekly written assignments. The course includes a 9-20 page midterm and a 10-12 page final ethnographic paper.

ENVI 491  (S)  The Suburbs  (WS)
Cross-listings: AMST 490 / HIST 491

Secondary Cross-listing
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race),
consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: Students will meet with the professor either in assigned pairs or “trios” at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

Requirements/Evaluation: This class follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with course work related to the topic.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 216 (F) Cities and Urbanism of the Ancient World (WS)

Cross-listings: ANTH 216

Secondary Cross-listing

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

Requirements/Evaluation: 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first years, sophomores, or majors in Anthropology or Sociology

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
This course is cross-listed and the prefixes carry the following divisional credit:

**GBST 294 (S) Victimhood Nationalism in Global History & Memory** (DPE) (WS)

**Cross-listings:** HIST 294

**Primary Cross-listing**

As globalization of the 21st century has shifted its focus from imagination to memory, the global memory culture focusing on victims has dawned on us as an undeniable reality with the entangled memories of: Apartheid, American slavery, and white settler genocides of the indigenous peoples; German empire’s colonial genocide of the Nama and Herero in Namibia and the Nazi Holocaust; the Armenian genocide and the Holocaust; Vietnam War and Algerian war; Rwandan genocide and ethnic cleansing in the Balkans; Japanese military "comfort women" and gendered violence during the Yugoslav Wars; forced sexual labor in the Nazi concentration camps and sexual slavery of the Islamic State; political genocide of Stalinism and the Latin American military dictatorships; civilian massacres of developmental dictatorships in the global Cold War era. Global memory formation intensified the victimhood competition among national memories. Victimhood nationalism epitomizes nationalism’s metamorphosis under the globalization of memory in the 21st century. This course will trace the mnemonic-history of victimhood nationalism, focusing on the entangled memories of Poland, Germany, Israel, Japan, and Korea in the global memory formation. Other case studies, including former Yugoslavia, post-9/11 America, will also be discussed.

**Requirements/Evaluation:** Class participation, pop quizzes and a final research paper (approximately 5000 words)

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** GBST concentrators and History majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 294(D2) GBST 294(D2)

**Writing Skills Notes:** This seminar includes a final research paper on victimhood nationalism. Prior to submission, the paper will go through several drafts and edits.

**Difference, Power, and Equity Notes:** A comparative, global approach to the study of memory and nationalism exploring the particular role of victimhood and genocide. How is violence remembered? How has past violence been justified? Who is remembered as a victim and who is not?

**GBST 348 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference** (DPE) (WS)

**Cross-listings:** RUSS 348 / SOC 348

**Secondary Cross-listing**

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in
rank, class, gender or ethnicity were not supposed to matter, make sense of their post-socialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as Russia's invasion of Ukraine, or the lingering tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Ukraine and Russia, but will also read comparative studies, as well as works on East Germany and Georgia. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the post-socialist condition.

Requirements/Evaluation: 5-page paper every other week, written comments on the partner's paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 348(D2) RUSS 348(D1) SOC 348(D2)

Writing Skills Notes: This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshoped during the tutorial meetings.

Difference, Power, and Equity Notes: Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

TUT Section: T1  M 7:00 pm - 9:40 pm Olga Shevchenko

GBST 369 (F) Indigenous Narratives: From the Fourth World to the Global South (DPE) (WS)

Cross-listings: COMP 369 / HIST 306 / ARAB 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Requirements/Evaluation: active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7- to 10-pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 15
Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 369(D1) HIST 306(D2) ARAB 369(D1) GBST 369(D2)

Writing Skills Notes: This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

Difference, Power, and Equity Notes: At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

GBST 414 (F) Displacement: Global Histories of Refugees and Forced Migration (DPE) (WS)

Cross-listings: ARAB 414 / HIST 402

Secondary Cross-listing

The Middle Eastern refugee has become a central figure in debates on migration, asylum, and the right to belong in Europe, Asia, and North America. Often stereotyped as threatening, alien, and rootless, these migrants are generally depicted as lacking histories and by extension not worthy of consideration or empathy. This course invites students to understand some of the most tragic humanitarian crises of our time and the massive involuntary displacements provoked by war, violence, and/or climate change. Taking a global perspective, this seminar examines the history of displacement, refugees, migration, diaspora in a focusing on the nineteenth century through the present. With special attention to the historical experience of various peoples of the Middle East, the course will start with theoretical approaches to the study of migration and then delve into case studies. A range of different moments of displacement will be analyzed such as the experiences of Armenians, Jews, Palestinians, Syrian, Iraqis, and Kurds. By examining the human geography and politics of forced displacement and migration, this course will address a number of important academic and political questions: what makes a history written by, about, and for displaced people powerful? How can writing from the perspectives of refugees challenge core debates about identity, the nation and borders? How does the focus on displacement help in understanding the nature of war and conflict?

Requirements/Evaluation: Final 25 page research paper, several drafts of paper, class presentations and in class writing exercises.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: History and Arabic Studies majors and Global Studies concentrators.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 414(D2) GBST 414(D2) HIST 402(D2)

Writing Skills Notes: This research seminar will involve the writing of a final 25 page paper. Prior to that stage, each process of writing will involve moments of feedback and sharing. Students will submit a proposal early on in the semester and then write an outline. These will receive peer and instructor feedback. They will then submit a five page draft in October, a 10 page draft in November, before the final submission in December. In this way, they will have opportunities to rework and improve their writing.

Difference, Power, and Equity Notes: This course takes a comparative approach by exploring the predicament of some of the most vulnerable people in the world, i.e, displaced peoples and refugees. The course will consider their legal status and their experience of leaving their homes due to wars or natural disaster. The area of study is the Middle East and we will examine the historical experience of a number of different people in the region including Kurds, Palestinians, Sephardi Jews, and Syrians.

Attributes: HIST Group E Electives - Middle East
GEOS 201  (F)  Field Methods and Structural Geology (WS)
Geologic history is preserved in rocks and it can be deciphered using fundamental principles such as superposition and cross-cutting relationships. Field observations are essential to understanding the rock record, and data and interpretations are encoded in geologic maps. This course introduces students to topographic and geologic maps, best practices for geologic field work, the field identification of common minerals and rocks, geologic contacts, and structures such as folds, and faults. Students will develop skills for presenting field data in papers, figures, and oral presentations. This course is in the Solid Earth group for the Geosciences major.

Class Format: lecture and discussion, three hours per week and laboratory, three hours per week
Requirements/Evaluation: short weekly writing assignments will form the basis for two 10-page papers based on field trips and a final independent project
Prerequisites: Any 100 level geosciences course or permission of instructor.
Enrollment Limit: 16
Enrollment Preferences: Geosciences majors or students with a strong interest in geosciences
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $15 for field supplies
Distributions: (D3) (WS)
Writing Skills Notes: There will be two 10-page papers, each based on four field trips. Students will submit short field descriptions and figures with captions after each field trip. The shorter assignments will be incorporated in two papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
Attributes: GEOS Group C Electives - Solid Earth

GEOS 211  (F)  Rates and Dates: Calibrating the Rock Record (WS)
Late in the eighteenth century, the Scottish naturalist, James Hutton, argued that Earth had “no vestige of a beginning, no prospect of an end” challenging the widely held biblical view that Earth was a mere 6,000 years old. Yet it was not until the discovery of radioactive decay that geologists were able to accurately date rocks and assign absolute ages to the geologic time scale, which had been developed using fossils and relative dating of rocks. Before radiometric dating, there were numerous attempts to estimate the age of Earth using the rates of natural phenomena, but these early approaches were plagued by faulty assumptions about geologic processes. We still endeavor to estimate the rate of a wide variety of geologic processes, and many are critical to society, such as climate change, sea-level rise, plate motions, and mass extinctions. In this tutorial, we explore the methods of radiometric dating that allow us to determine the age of igneous rocks that cooled from a magma, estimate when deeply buried metamorphic rocks cooled below certain temperatures, and determine the age of organic materials from their radiocarbon signatures. We then examine methods used to estimate the rates of geologic processes with particular emphasis on diffusion -- the movement of matter or energy in response to a gradient in concentration, temperature, or potential energy -- and the explicit and implicit assumptions that are critical to rate calculations. Topics include the basic isotope systematics of geochronology (U-Pb, K-Ar, and 14C ages) and thermochronology (U-Th/He or 40Ar/39Ar), as well as the rates of processes such as plate motion, sea-level rise or fall, glacial advance or retreat, magma storage and ascent, and/or mineral growth rates. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.
Requirements/Evaluation: Four 5-page papers and four oral critiques of partner's papers, plus 2 problem sets
Prerequisites: Any 100-level Geosciences course
Enrollment Limit: 10
Enrollment Preferences: Geosciences majors or students with a strong interest in Geosciences.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Students will write four 5-page papers and will receive peer and instructor feedback on how to improve their writing skills and formulate sound arguments. In addition, there will be two quantitative problem sets.

GERM 366 (S) Reason and "Unreason" in the German Tradition (WS)

"I am proud of my heart alone, it is the sole source of everything, all our strength, happiness and misery. All the knowledge I possess everyone else can acquire, but my heart is all my own." So spoke Johann Wolfgang Goethe's young Werther in his groundbreaking novel from 1774, *The Sorrows of Young Werther*, which exposed the fault lines of the Enlightenment, with its emphasis on rationality, on universal human values, and on optimism about the future. Throughout the nineteenth and twentieth centuries in Germany and Austria, challenges arose to what was touted as the triumph of objective, scientific thought, often leading to alienation and despair for the writers and thinkers who explored the deepest recesses of the mind. These challenges led to some of the most creative cultural production in Western history, but the concatenation of reason and "unreason" also contributed to one of its biggest catastrophes. This course will explore and complicate the relationship between reason and those forces that throw it into question. Specifically, we will focus first on the moments around 1800 and 1900 when the tectonic plates of reason and supposed unreason converge and collide most forcefully, reading authors like Kant, Goethe, Novalis, Kleist, Büchner, Hoffmann, and Freud, then turn to the mid-twentieth century, when both forces combine to create the disaster of the "Third Reich" and the difficulties of its aftermath (Hitler, Harlan, Bachmann, Haneke). Finally, we will look at the complex ways in which rationality triumphs and is challenged in our current time by engaging with the debates around science that roil German and Austrian society. Readings and discussion in German (with some theoretical readings in English).

Requirements/Evaluation: Active participation, several short papers and reading responses, longer final project. All writing will include rewrites with corrected grammar and the final paper will be written in stages, including a draft that is workshopped in tutorial format.

Prerequisites: GERM 200-level course or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: German majors, German students

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will write and rewrite several short papers in German. A longer final paper will be written in stages that will include a draft that is workshopped in tutorial format.

HIST 112 (S) The Asia-Pacific War (WS)

Cross-listings: ASIA 111

Primary Cross-listing

The "Asia-Pacific War," as it is known in Japan, raged from the full-scale Japanese invasion of China in 1937 until Japan's total defeat in 1945. This war, though certainly tied to the Allied war against Germany and Italy, was viewed by many participants at the time as truly a war apart due to the immense distances involved, the gleeful, racism-fueled brutality on both sides of the conflict, and the resultant abuses of POWs, use of atomic weapons, and other atrocities. Students will explore the intersection of colonialism, racism and opportunism that fed the conflagration, and the remarkable rapprochement between American and Japanese former enemies immediately after the war. It will examine in depth the roles of China and the USSR in this conflict, which are often mentioned but functionally ignored in the West. It will cover the various warzones and home fronts, focusing
as much as possible on conveying the experiences of participants through primary sources. It will likewise seek to bridge the analysis of the military and socio-political sides of this conflict, which are often treated as distinct, by drawing on key academic works in the field.

Requirements/Evaluation: Weekly meetings with professor and one peer partner; 5-page papers (6 total); 2-page critiques of partner's papers (6 total)

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: History majors and Asian Studies concentration students, then everyone else.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 112(D2) ASIA 111(D2)

Writing Skills Notes: Students will alternate weekly between writing 5-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners.

HIST 134 (F) The Great War (WS)

In November 2018, world leaders gathered in France to commemorate the centennial of the end of the First World War. Yet the armistice that brought hostilities on the Western front to a close on the eleventh hour of the eleventh day of the eleventh month of 1918, did not have the same significance for Eastern Europe and the Middle East, where revolutions and civil wars continued to be fought well into 1923. Ultimately, the Great War toppled four empires (German, Habsburg, Russian, and Ottoman) and forcibly displaced and killed millions of civilians (including Armenians and Jews), creating new countries and colonies throughout Europe, the Middle East, and Africa. This tutorial will explore the global history of the First World War, a history that is indispensable for understanding the world of today. We will consider a broad range of topics and sources in our examination of the political, social, cultural, economic, and military histories of the Great War and its aftermath. For three-quarters of the semester, the tutorial follows a traditional format in which weekly tutorial meetings center on the writing of a paper and the partner's critique. The last segment of the course is structured around a research paper assignment, introducing students to archival research and longer-format writing.

Requirements/Evaluation: bi-weekly 5- to 7-page papers; bi-weekly written critiques; one revised paper; final 8- to 10-page research paper.

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Bi-weekly 5-7 page papers; one formal paper revision; 8-10 page research paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 135 (F) The Coffeehouse from Arabia to the Enlightenment (WS)

Invented in sixteenth-century Arabia, the coffeehouse soon made its way to Egypt and Istanbul and then to Western Europe. This institution offered a
social space where men (and women) could congregate to discuss politics and ideas. Everywhere, it was an object of suspicion, yet its onward march proved unstoppable, and it even became one of the central spaces of the European Enlightenment, the eighteenth-century movement that laid the foundations of modern Western secular thought. In this course, we will reconstruct the progress of the coffeehouse in order to understand what made it so special. Through its prism we will explore a crucial period in the history of Europe and the Middle East, and investigate how intercultural interactions and intellectual exchange shaped the modern world at a time of religious and political polarization.

**Requirements/Evaluation:** Attendance and participation; two 5-7-pp. papers (and a revision of each); final research project proposal and bibliography; a final, 10-12 pp. research paper; a final research presentation.

**Prerequisites:** First-year standing.

**Enrollment Limit:** 19

**Enrollment Preferences:** First-year students.

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** This class is designed as an intensive expository writing seminar for first-year students. We focus on the structure of expository argument, the importance of revision, on library and research skills, etc. Students receive detailed feedback on their writing throughout the semester and are expected to use the opportunity to hone their craft.

**HIST 144 (S) Brazil's Myth of Racial Democracy** (DPE) (WS)

The notion that race worked differently in Brazil took root in the early twentieth century and grew into a myth that the country was home to a unique "racial democracy." This course will examine the creation and surprisingly long life of this idea among not only Brazilians but also observers and visitors from the U.S., Europe, and Africa. We will look at how "racial democracy" became central to constructions of Brazilian national identity, how the country's governments tried to coopt Black cultural forms like samba and Carnaval into official culture, and how thinkers around the world used Brazil to define their understanding of race making in their own regions. The special focus, though, will be on how Afro Brazilians challenged the myth politically, intellectually, and artistically from the 1920s to the 1990s. Our texts will include the fiction, memoirs, manifestos, and scholarship of individuals like Abdias do Nascimento, Carolina Maria de Jesús, and Sueli Carneiro, as well as the activism of Black and feminist groups.

**Requirements/Evaluation:** Class participation, three 3-page papers, written responses, and a 10-12 page research paper.

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** Preference to first- and second-year students

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Students will write three 3-papers on set topics and a 10-12 page research paper. Revision of the first short paper, in response to instructor's comments is mandatory. Students will receive timely feedback on all pieces of writing and will participate in in-class workshops on identifying sources, formulating an argument, and presenting a compelling case.

**Difference, Power, and Equity Notes:** This course will examine how Brazilians created, lived, and contested categories of racial difference over the twentieth century. We will look at the intersections of gender, sexuality, regional, and national identities with race in Brazil and will make comparisons between processes of race-making in Brazil and around the Atlantic.

HIST 152 (F) The Fourteenth Amendment and the Meanings of Equality  (DPE) (WS)

Cross-listings:  WGSS 152

Primary Cross-listing
For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment’s meaning in the century that followed. Central themes in this course include the contested interpretations of “birthright citizenship,” “due process,” “privileges and immunities,” “equal protection,” and “life, liberty or property”; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

Requirements/Evaluation:  a series of short (3-page) response papers; and a final 10-12 page research paper

Prerequisites:  first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit:  19

Enrollment Preferences:  given first to sophomores who have been dropped from this class previously, then to first-years, then to sophomores who have not been dropped previously

Expected Class Size:  15-19

Grading:  no pass/fail option, yes fifth course option

Distributions:  (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 152(D2) HIST 152(D2)

Writing Skills Notes:  Students will write three short (3-page) response papers to the readings in the first part of the semester, and will also write a substantial (10- to 12-page) research paper. In preparation for the research paper, students will write proposals, develop bibliographies, write outlines and drafts, and do peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes:  This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

HIST 155 (S) School Wars  (WS)

Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of “school wars” in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day “school wars”? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

Requirements/Evaluation:  four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)

Prerequisites:  first-years or sophomores

Enrollment Limit:  10

Enrollment Preferences:  first-year students, and then sophomores who have not previously taken a 100-level seminar
In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her white parents stated publicly that Dolezal is a white woman passing as black. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to become white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries—class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

Requirements/Evaluation: Weekly formal response papers and written critiques.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 159(D2) AFR 159

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2 pages) of their peers’ work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

Difference, Power, and Equity Notes: Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.

Attributes: HIST Group F Electives - U.S. + Canada
HIST 161 (F)  W.E.B. Du Bois: A Century of Study and Struggle (WS)

This course will apply a historical lens to the life and thought of historian, activist, social theorist, and writer W.E.B. Du Bois. We will engage with Du Bois’ historical, sociological, and political writing, trace his intellectual transformation throughout the course of his nearly century-long life of study and struggle, and highlight his ongoing pertinence. Engaging with classic as well as lesser-known works by Du Bois, his contemporaries, and other scholars, a core aim of the course will be to comprehend the development of Du Bois’s ideas, placing them in historical context. In examining his work and its lasting influence we will touch on a range of topics including, the Civil War, Reconstruction, and the afterlife of slavery; race, the color line, and American citizenship; civil rights, Black advancement, and political leadership; Black urban life; war, colonialism, and global capitalism, among other topics.

Requirements/Evaluation:  Assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to a final paper (10-12 pages). All writing assignments are structured to build up the final paper.

Prerequisites:  None

Enrollment Limit:  19

Enrollment Preferences:  Preference to first- and second-year students

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (WS)

Writing Skills Notes:  Students will write two short (4-5 page) papers leading to a longer (10-12 page) research paper. Students will receive timely feedback on written work from peers and the instructor and will be required to submit revised drafts in response to feedback. Students will develop their final research paper in several stages, submitting a topic proposal, research question, outline, and annotated bibliography, with the instructor commenting on each step.

HIST 163 (F)  Communications in Early America (DPE) (WS)

Cross-listings:  AMST 164

Primary Cross-listing

How did the multiplicity of people who shaped "early" North America communicate with each other, across profound linguistic, cultural, social, political, and spiritual differences? What strategies did they use to forge meaning and connections in times of tremendous transformation, while maintaining vital continuities with what came before? This course examines histories of communication in North America and the technologies that communities have developed to record, remember, advocate, persuade, resist, and express expectations for the future. Using a continental and transoceanic lens of "Vast Early America," we will take up Indigenous oral traditions, Traditional Ecological Knowledge, wampum belts, and winter counts as expressions of ethics, identity, relationality, and diplomacy among sovereign Native/Indigenous nations. We will reflect on artistic and natural science paintings, engravings, and visual culture that circulated widely; and diaries and journals as forms of personal as well as collective memory. We will work with political orations, newspapers, pamphlets, and other forms of print culture that galvanized public opinion in the Age of Atlantic Revolutions; memorials and monuments that communities have created to honor ancestors and significant events; material culture such as baskets and weavings that signified through their imagery and physical forms; and social critique and visions of justice in the verse and prose of Phillis Wheatley Peters and William Apess. These materials take us into the complexities of individuals’ and communities’ interactions and relations of power. They also illuminate spaces of potential or realized solidarity, alliance, and co-building of new worlds. Throughout we will work together to understand different methodologies, theories, practices, and ethics involved in approaching the past. We will at every turn be attuned to the ongoing significances of these experiences among communities in the twenty-first century.

Requirements/Evaluation:  active participation in class discussions, several short essays based on readings and discussion topics, museum/archives exercise, final essay/project

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  limited to first- and second-year students who have not yet taken a 100-level course in History or American Studies; juniors and seniors only with the permission of the instructor

Expected Class Size:  19
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 164(D2) HIST 163(D2)

Writing Skills Notes: Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

Difference, Power, and Equity Notes: This course centers experiences of diverse people in early America including substantial focus on Native American/Indigenous and African American communities. It introduces foundational methods for historical and interdisciplinary study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories; critical vantages on Euro-American settler colonialism; and scholarship on complex entanglements in multiracial and multiethnic communities

HIST 168 (S) Black Film History (WS)

This course will examine the history of African American cinematic production since the silent era. By examining the work of Black filmmakers and cinematic representations of African Americans more broadly, we will explore a variety of key questions throughout the course of the semester, including: How did Black filmmakers address social and political questions in their work? How did filmmakers engage with and refute dominant cultural and Hollywood images of African Americans? What role did movie theaters play in the social lives of Black communities? How did film critics shape understandings of Black cinematic expression? What transformations occurred in the images of African Americans in film across the twentieth century? What role did filmmaking play in the Black Freedom Struggle? In addition to viewing a sampling of films, we will engage with a variety of scholarly and popular writing on the history of African American filmmaking, filmgoing, film criticism, and filmic performance.

Requirements/Evaluation: Active participation in class discussion, weekly 500-word discussion posts, two 4-5 page essays, and a final 10-12 page research paper

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Preference to first- and second-year students

Expected Class Size: 12-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write two short (4-5 page) papers leading to a longer (10-12 page) research paper. HIST 294 (S) Victimhood Nationalism in Global History & Memory (DPE) (WS)

Cross-listings: GBST 294

Secondary Cross-listing

As globalization of the 21st century has shifted its focus from imagination to memory, the global memory culture focusing on victims has dawned on us as an undeniable reality with the entangled memories of: Apartheid, American slavery, and white settler genocides of the indigenous peoples; German empire's colonial genocide of the Nama and Herero in Namibia and the Nazi Holocaust; the Armenian genocide and the Holocaust; Vietnam War and
Algerian war; Rwandan genocide and ethnic cleansing in the Balkans; Japanese military “comfort women” and gendered violence during the Yugoslav Wars; forced sexual labor in the Nazi concentration camps and sexual slavery of the Islamic State; political genocide of Stalinism and the Latin American military dictatorships; civilian massacres of developmental dictatorships in the global Cold War era. Global memory formation intensified the victimhood competition among national memories. Victimhood nationalism epitomizes nationalism’s metamorphosis under the globalization of memory in the 21st century. This course will trace the mnemo-history of victimhood nationalism, focusing on the entangled memories of Poland, Germany, Israel, Japan, and Korea in the global memory formation. Other case studies, including former Yugoslavia, post-9/11 America, will also be discussed.

Requirements/Evaluation: Class participation, pop quizzes and a final research paper (approximately 5000 words)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: GBST concentrators and History majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

HIST 306 (F) Indigenous Narratives: From the Fourth World to the Global South (DPE) (WS)

Cross-listings: COMP 369 / ARAB 369 / GBST 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a “boom” in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this “indigenous boom” by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent “boom” of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Requirements/Evaluation: active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7- to 10-pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option
This course is cross-listed and the prefixes carry the following divisional credit:

COMP 369(D1) HIST 306(D2) ARAB 369(D1) GBST 369(D2)

Writing Skills Notes: This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

Difference, Power, and Equity Notes: At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

HIST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: CAOS 352

Secondary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352(D2) CAOS 352(D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

SEM Section: 01 MW 9:00 am - 10:15 am Sofia E. Zepeda
HIST 367  (S)  Black History is Labor History  (DPE) (WS)

Primary Cross-listing

This seminar explores labor history in relation to black people, spanning the colonial period to the early twenty-first century. It racializes the history of work by tracing the long story of black labor in the U.S. from the plantation to the plant. Whereas the bulk of the course will analyze black labor and labor movements in the twentieth century, specifically focusing on the push for economic inclusion and mobility amid employment, societal and union-related racial discrimination, we will examine what involuntary black labor meant in the context of slavery and the construction of a capitalist economy. Likewise, we will devote attention to black workers with regard to such topics as antiunionism, deindustrialization, economic inequality, Fordism, informal economies, Jim and Jane Crow, labor radicalism and violence, New Deal and welfare, the rise of civil rights unionism, and slavery and capitalism, among other themes.

Requirements/Evaluation:  Students are expected to participate actively and will write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper.

Prerequisites:  Recommended for students with sophomore standing or above and first-year students who both have taken a 200-level history course and have received instructor permission to enroll into the course.

Enrollment Limit: 25

Enrollment Preferences:  HIST and AFR majors followed by students with sophomore, junior, or senior standing. If the course is overenrolled, students will be given a questionnaire and only first-year students who have completed a 200-level history course will be enrolled.

Expected Class Size: 15

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 367(D2) AFR 367(D2)

Writing Skills Notes:  Students will be required to write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages). Throughout the semester, these writing assignments will total roughly 22-30 pages. Students can expect to have line-edited feedback on their papers with substantial and timely, writing-related suggestions for improvement.

Difference, Power, and Equity Notes:  This course racializes the study of labor history, focusing on black people and their experiences in the United States from the plantation to the plant. It challenges students to confront and to redefine what it means to labor, grasping how slavery, segregation, and systemic inequalities amid black people's pursuit of citizenship, equality, and freedom have shaped their economic, political, and social conditions and identities.

Attributes:  HIST Group F Electives - U.S. + Canada
experience of various peoples of the Middle East, the course will start with theoretical approaches to the study of migration and then delve into case studies. A range of different moments of displacement will be analyzed such as the experiences of Armenians, Jews, Palestinians, Syrian, Iraqis, and Kurds. By examining the human geography and politics of forced displacement and migration, this course will address a number of important academic and political questions: what makes a history written by, about, and for displaced people powerful? How can writing from the perspectives of refugees challenge core debates about identity, the nation and borders? How does the focus on displacement help in understanding the nature of war and conflict?

Requirements/Evaluation: Final 25 page research paper, several drafts of paper, class presentations and in class writing exercises.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: History and Arabic Studies majors and Global Studies concentrators.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 414(D2) GBST 414(D2) HIST 402(D2)

Writing Skills Notes: This research seminar will involve the writing of a final 25 page paper. Prior to that stage, each process of writing will involve moments of feedback and sharing. Students will submit a proposal early on in the semester and then write an outline. These will receive peer and instructor feedback. They will then submit a five page draft in October, a 10 page draft in November, before the final submission in December. In this way, they will have opportunities to rework and improve their writing.

Difference, Power, and Equity Notes: This course takes a comparative approach by exploring the predicament of some of the most vulnerable people in the world, i.e., displaced peoples and refugees. The course will consider their legal status and their experience of leaving their homes due to wars or natural disaster. The area of study is the Middle East and we will examine the historical experience of a number of different people in the region including Kurds, Palestinians, Sephardi Jews, and Syrians.

HIST 434 (S) Humanitarianism and Jewish History (WS)

Cross-listings: JWST 434 / REL 335

Primary Cross-listing

In the twentieth century, Jewish history and humanitarian history became deeply intertwined. As the victims of persecution and expulsion, mass violence and genocide, Jews repeatedly figured as the recipients of aid and humanitarian intervention. At the same time, Jewish political figures, legal thinkers, intellectuals and scholars, social activists, and aid workers played central roles in the establishment of humanitarian organizations and in debates about the moral, political, and legal frameworks that have shaped approaches to humanitarianism across the decades since World War I. This research seminar is designed to open up big questions about the history of humanitarianism and to carve out space for students to conduct research on a particular place, time, and aspect of that larger history in conversation with other students working on related topics. In the first half of the semester, in discussions of common readings, we will examine various works of scholarship that connect to the history of humanitarianism from the nineteenth century to the present. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of humanitarianism using the digitized archives of the American Jewish Joint Distribution Committee, culminating in a twenty-plus-page paper. In the final weeks of the semester, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students' work. In this seminar, we are not merely studying history; you are actually doing history. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. The goal is for each student to produce a polished research paper based on engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

Requirements/Evaluation: class participation, several short papers, oral presentations, and a 20-page research paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: History majors and Jewish Studies concentrators
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
JWST 434(D2) REL 335(D2) HIST 434(D2)

Writing Skills Notes: Students will write two drafts of their research paper before submitting the final paper for a grade. They will receive timely comments on drafts from professor and peers, to be incorporated into their final paper.

HIST 481  (F)  History of Taiwan  (WS)
Cross-listings: ASIA 481

Primary Cross-listing
Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Requirements/Evaluation: weekly papers and critiques
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: History and Asian Studies majors/concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 481(D2) ASIA 481(D2)

Writing Skills Notes: In this tutorial course, students will write bi-weekly 5- to 7-page papers with feedback from both the instructor and tutorial partner. Students will revise one of their tutorial papers as a final assignment. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 486  (S)  Race and A Global War: Africa During World War II  (DPE) (WS)

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities
and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners. The final writing assignment will afford students the chance to reflect on their previous papers and the semester's course content.

Difference, Power, and Equity Notes: This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

HIST 487 (S) FIRE! A SOCIAL HISTORY (WS)

This tutorial offers a social history of fire in a national, international, and transnational framework. The aim of this course isn't to historicize fire, itself. Rather, "fire" is treated as a subtext to other historical developments and events in the twentieth and twenty-first centuries that have been factually and figuratively shaped by it. In this regard, we will grasp fire not only as combustion or conflagration but also through its nuanced meanings and their implications for how we think historically about issues related to capitalism, class, climate and environment, labor, gender, immigration, internationalism, policing, politics, race, radicalism, and sex. In essence, bodies might be on fire, burning with sexual desire; buildings might be on fire, engulfed in an intense conflagration; cities might be on fire, ignited by gunfire and urban unrests; workers might be fired or even fired up in a working-class movement, the latter incited by the push for labor democracy; or there might be fire weather, sparked by drier conditions and sweltering temperatures reflecting climate change. Thus, we will examine "fire" in a variety of historical contexts, from actual accounts of disastrous fire incidents due to environmental or industrial mishaps to stories of passion or protest inflaming individuals and groups to studies of rebellions and riots that produce fiery conditions. Lastly, we will analyze society's historical fascination with "fire" events, both real and imagined, and the way they have prompted efforts to rebuild, reform, and reimagine. To accomplish our goals, we will engage primary and secondary sources in addition to screening films that focus on histories directly or indirectly related to fire.

Requirements/Evaluation: Weekly formal papers and written critiques. 10-12 page research paper.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: Open to sophomores, juniors, and seniors. History majors will be prioritized. Should the course become overenrolled, I will have non-history majors complete a questionnaire.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

HIST 488 (F) Sites of Memory and American Wars (WS)
This tutorial will examine the ways that U.S. military ventures have been memorialized through a variety of physical sites, including landscapes, monuments and statues, museums, and other depictions. Given the enormous national conversation and reconsideration of many of these sites over the last decade, we will ask such questions as: How and why has the memorialization of U.S. wars changed since the country’s founding? Who determines what is preserved and what stories are told? What is the relationship between individual experiences, collective memories, and national narratives? What do “sites of memory” tell us about society's views of wars and soldiers and about the United States? Throughout, we will pay attention to how these sites reflect historical understandings of the time and have also served as focal points of social and political protests.

Class Format: Students will meet with the professor either in assigned pairs or “trios” at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

Requirements/Evaluation: This course follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: None

Enrollment Limit: 10
Enrollment Preferences: History majors and students with course work related to the topic.

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

Writing Skills Notes: At the start of the semester, students will outline what their writing goals are for the semester, and they will receive feedback on their writing from the professor and from their tutorial partner. The final writing assignment will afford students the chance to reflect on their previous papers and the semester's course content.

HIST 491 (S) The Suburbs (WS)
Cross-listings: ENVI 491 / AMST 490

Primary Cross-listing
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some
of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

**Class Format:** Students will meet with the professor either in assigned pairs or "trios" at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

**Requirements/Evaluation:** This class follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

**HIST 495 (F) The Medieval World System: Globalization before 1500 (WS)**

In recent years, scholars have turned increasing attention to global history in the pre-modern period. This tutorial takes as its focus the global Middle Ages: roughly speaking, the period between 500 and 1500 CE. This was a period that saw mass-produced consumer goods cross from China to India, East Africa, and the Middle East, inspiring admiration and imitation in multiple different markets. It saw games, music, and forms of literature become popular across continents, and saw religious communities forge networks spanning thousands of kilometers. To study the global Middle Ages is to place exchange and networks, both commercial and cultural, at the heart of our analysis. We will read and analyze many accounts by medieval travelers, merchants, and pilgrims who crossed Afro-Eurasia, alongside works by modern historians and archaeologists who have pieced together the patterns of movement and exchange that tied together the diverse societies of pre-modern Afro-Eurasia.

**Requirements/Evaluation:** Students will meet in pairs with the instructor once a week. Every other week each student will present a paper of approximately 5-7 pages on a topic determined by the instructor, due by 5pm the day before the tutorial meeting. The student not writing the paper will critique the paper written by their tutorial partner. Each student will write six papers and serve as a critic on the six papers of their tutorial partner.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Junior and Senior History majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

Fall 2024
JLST 272 (S)  Free Will and Responsibility  (WS)

Cross-listings: PHIL 272

Secondary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? We're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The key question, then, is whether, and how, agency is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Requirements/Evaluation: Six tutorial papers (5-6 pages in length) and five critiques (2-3 pages in length)
Prerequisites: one PHIL course (or permission of instructor; please email with any questions)
Enrollment Limit: 10
Enrollment Preferences: current and prospective Philosophy majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)  (WS)

LATS 322 (S) Fiction Writing Workshop  (DPE) (WS)

Cross-listings: ENGL 388

Primary Cross-listing

This workshop is focused on the art and practice of writing fiction and geared toward students interested in working on creative honors theses. Readings include published fiction by primarily Latine and other writers who center Global South experiences, with attention paid to how each author employs narrative elements—characterization, plotting, structure, dialogue mechanics, setting, tone, theme—as well as the values and visions expressed. Students will present short fiction or novel excerpts for peer critique and the editorial advice of the instructor. Regular in-class exercises and take-home assignments will help students expand their narrative skills.

Requirements/Evaluation: Attendance and class participation, regular writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final creative paper (close-reading a text and creative-writing response)

Prerequisites: LATS 222- Ficciones

Enrollment Limit: 15

Enrollment Preferences: LATS concentrators, honors theses

LATS 421 (F) Latinx Geographies  (WS)

This research seminar examines the history, framework, and scholarship of the growing field of Latinx Geographies within the context of interdisciplinary Latinx Studies. This course explores the perspectives, experiences, spatial politics, and place-making practices of Latines to consider their relationship to the built environment. We will examine recent theories regarding space, place, and race; explore them through various Latinx positionalities, such as gender, sexuality, class, and citizenship status; and apply them to literary and media representations of Latine spaces and
places, such as the US-Mexico borderlands, barrios, and rural fields. We will consider how undocumented queer and trans migrants have become prominent political actors in social movements, how migration, race, and the environment interact in pollution and activism, how undocumented women negotiate motherhood, how non-profit organizations market Latinidad for infrastructural development, and more. In this interdisciplinary and comparative course, students will be exposed to the genealogy of Latinx Geography, which finds its genesis embedded in Black Geography, Queer (Women) of Color Critique, Latinx Studies, and Ethnic Studies. Students will learn a geographical vernacular to think and articulate spatially in the social sciences and humanities, as they develop their own research projects. Collectively, we will interrogate case studies of Latines in the built environment to make visible how race and space are fundamental tenets of a Latinx geographical analysis. Students will select a research topic and develop their own research project independently and through coursework. Evaluation will be based on class participation, leading discussion, presentations, research proposal, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

Requirements/Evaluation: Class participation, leading class discussion, proposal, annotated bibliography, short writing assignments, writing workshop participation, presentation, drafts of final paper, and final 15-20 page research paper.

Prerequisites: N/A

Enrollment Limit: 19

Enrollment Preferences: LATS concentrators; seniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: This research seminar supports students as they define an appropriate topic, identify and use primary and secondary sources, and complete a 15-20 page final research paper. Several short writing assignments focus on interpretations of primary sources and on key arguments in secondary sources. The final paper is written in stages, including a proposal, an annotated bibliography, a draft for workshop with other students and faculty feedback, and a final presentation along with a revised draft.

LATS 475 (S) Dreaming Latina/x Feminist Disability Studies (DPE) (WS)

Cross-listings: WGSS 475 / AMST 413

Primary Cross-listing

In this course we will defy the traditional notion that disabled and queer people of color have no right to future dreams, as we collectively imagine how the emergent field of Latina/x feminist disability studies might take shape. What are the sites of focus, methods, and political commitments of Latina/x feminist disability studies? Where is the power in meaningfully uniting an analysis of disability to one of sexuality and gendered Latinidad? How does a Latina/x-centric approach productively inform our understanding of disability? What is the political potential of Latina/x feminist disability studies -- not exclusively as a set of theories, but also as a mindset and an everyday call to action? If we were to collectively compose a manifesto for Latina/x feminist disability studies, what might it contain? How might we actively cultivate a community of care in the classroom as well as other spaces at Williams? Just what might Latina/x feminist disability justice dreams look like? How might Latina/x feminist disability justice dreams feel? Feminist, queer, and disabled crip-of-color scholars have recently called for a more meaningful engagement with race in feminist disability studies. Simultaneously, we have also witnessed a small but steady growth in the amount of Latinx studies scholarship that thoughtfully integrates questions of disability. This interdisciplinary course responds to these important shifts in its focus on a series of topics bridging Latinx studies, gender studies, queer studies, crip studies, and critical disability studies. These include but are not limited to the body, the environment, temporality, labor, citizenship, dependency, and visibility/invisibility. Through these topics, we will explore the ways in which the different approaches to these specific issues across Latinx, critical disability, crip, queer and gender studies are in fruitful conversation with one another -- and sometimes even at odds -- as we actively interrogate the intersections of gender, race, ethnicity, sexuality, and disability within the everyday.

Requirements/Evaluation: Major assignments for this course include a semester-long independent research paper (15-20 pages) broken up into steps, participation in crafting the class manifesto, a semester-long collaborative artistic exercise, and a final reflection document (3-4 pages).

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Priority given to LATS concentrators by seniority, followed by WGSS and AMST majors by seniority.
**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** Lab fee: $200 for art supplies per student

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 475(D2) LATS 475(D2) AMST 413(D2)

**Writing Skills Notes:** We focus on building writing and interdisciplinary research skills, with a particular emphasis on the processes of research, revision, and collaborative writing. The primary research paper (an independent project of 15-20 pages) is divided into stages, and students are required to revise and resubmit their work at various junctures in the research process. The written class manifesto requires students to compose a document together, revising their work as a group over the course of the semester.

**Difference, Power, and Equity Notes:** This course privileges an intersectional analysis regarding questions of race, ethnicity, gender, sexuality, and disability. It obligates students to consider how these categories of different actively work in tandem with one another in everyday US Latina/x and transnational (US-Latin America and the Caribbean) contexts. This seminar also underscores how these categories of difference are actually products of a given historical and political moment.

**LEAD 290 (F) How Change Happens in American Politics** (WS)

**Cross-listings:** PSCI 290

**Secondary Cross-listing**

An unprecedented assault on the U.S. Capitol, the rise of white nationalism, a pandemic, economic volatility, racial reckoning, the overturning of Roe v. Wade, and rapidly evolving environmental crises -- American politics in the last four years has been tumultuous. What might we expect to come next? From the Founding to the present, the American political order has undergone cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably stable and enduring. How can this be? Where do we find continuities and where upheavals? Who or what has been responsible for the continuities, and who or what for the changes? What sorts of transformations have been possible, and why -- what marriage of individual action and contextual factors have created political change in the past and in the present? Finally, what are the costs of change (and of continuity) -- and who pays them? In this tutorial, we assess American political change, or lack of, to gain a sense of the role that political leaders have played in driving change. We examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including war, economic developments, demographic change, and constitutional and institutional practices. We consider general models of change, as well as specific case studies, including civil rights and social justice for racial and ethnic groups, gender equality and family relations, and reactionary or traditionalist politics. Finally, we will look at arguments that America has been "exceptional" -- or, unlike other countries -- as well as critiques of these arguments to help us gain an understanding of future prospects for political transformation.

**Requirements/Evaluation:** participation in weekly meetings as well as 4 lead essays (5-6 pages) and 4 critiques (2 pages)

**Prerequisites:** one prior course in political science

**Enrollment Limit:** 10

**Enrollment Preferences:** Declared and prospective Political Science majors and Leadership Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LEAD 290(D2) PSCI 290(D2)

**Writing Skills Notes:** Extensive written feedback will be provided on tutorial essays and critiques. Additionally, the tutorial sessions will include attention to the quality of the written argument in the paper that is the focus of each session. At the end of the semester, students will be required to revise one of the tutorial papers incorporating the feedback, oral and written, provided by their tutorial partner and the instructor.

LEAD 320  (F) Heroes and Villains: Iconic Leadership and the Politics of Memory  (WS)

Cross-listings:  PSCI 320

Primary Cross-listing

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson’s statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders’ images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious—or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history—including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write an 18-20 page research paper on a topic of their choice related to the core themes of the course.

Requirements/Evaluation:  Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites:  previous course in Leadership Studies, or Political Science, or permission of instructor

Enrollment Limit:  14

Enrollment Preferences:  Leadership Studies concentrators, Political Science majors

Expected Class Size:  14

Grading:  no pass/fail option,  no fifth course option

LEAD 425  (S) Senior Seminar: Leadership and the Anxieties of Democracy  (WS)

Cross-listings:  PSCI 357

Primary Cross-listing

This course, the senior capstone for Leadership Studies, examines the challenges and opportunities facing political leaders in contemporary liberal democracies. We will begin by seeking to place our current moment in the longer arc of history, examining the distinctive institutional and structural constraints facing contemporary political leaders and examining in detail previous eras in which the American political system has come under great pressure. Then, we will look at some important factors that shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and fraying institutions. While the course will focus primarily on the United States, our conceptual framework will be global. Our primary questions will be these: Why does transformative leadership seem so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world? As a final assignment, students will craft an 18-20-page research paper on a topic of their choice related to the themes of the course.

Requirements/Evaluation:  Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites:  LEAD 155 or permission of the instructor

Enrollment Limit:  14
Enrollment Preferences: Open to Leadership Studies concentrators or with the permission of the instructor; preference given to Political Science majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 313 (S) Introduction to Number Theory (WS) (QFR)
The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of number and prime in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer. This course will include a significant focus on mathematical proof writing and problem solving skills. This includes writing clear and rigorous mathematical proofs, clearly explaining mathematical ideas verbally and in writing, determining how to approach certain types of problems, looking for patterns and making conjectures, and asking good questions about the implications of certain ideas and theorems.

Requirements/Evaluation: Problem sets, project, and exams

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: If course is over-enrolled, enrollment preference will be based on answers to a questionnaire. Some preference will be given to students who have not yet had Math 355.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS) (QFR)

Writing Skills Notes: Students will complete weekly problem sets, with a strong emphasis on proof writing, as well as 2 5-10 page papers/projects. There will be feedback given on mathematical writing as well as accuracy, and discussion time during class on writing in math.

Quantitative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Spring 2025

LEC Section: 01    TR 9:55 am - 11:10 am     Allison Pacelli

MATH 389 (S) Advanced Analysis (WS) (QFR)
This course further develops and explores topics and concepts from real analysis, with special emphasis on introducing students to subject matter and techniques that are useful for graduate study in mathematics or an allied field. Material will be drawn, based on student interest, from many areas, including analytic number theory, Fourier series and harmonic analysis, generating functions, differential equations and special functions, integral operators, equidistribution theory and probability, random matrix theory and probabilistic methods. This will be an intense, fast paced class which will give a flavor for graduate school. In addition to standard homework problems, students will also write reviews for MathSciNet, referee papers for journals, write programs in SAGE or Mathematica to investigate and conjecture, and read classic and current research papers.

Class Format: lecture
**Requirements/Evaluation:** evaluation will be based primarily on homework, classwork, and exams

**Prerequisites:** MATH 350 or 351 and one additional 300-level MATH course, or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** students interested in graduate school in mathematics or an allied discipline

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** http://web.williams.edu/Mathematics/sjmiller/public_html/389/

**Distributions:** (D3)  (WS)  (QFR)

**Writing Skills Notes:** Students will improve and expand their writing skills by taking course material as a starting point and writing chapters for a book under contract with the American Mathematical Society. This will involve numerous iterations of the content, with feedback both from the professor and from an editor.

**Quantitative/Formal Reasoning Notes:** This is a post-core 300 level math class.

Spring 2025

LEC Section: 01  TR 11:20 am - 12:35 pm  Steven J. Miller

**MATH 408 (F) L-Functions and Sphere Packing**  (WS)  (QFR)

Optimal packing problems arise in many important problems, and have been a source of excellent mathematics for centuries. The Kepler Problem (what is the most efficient way to pack balls in three-space) is a good example. The original formulation has been used in such diverse areas as stacking cannonballs on battleships to grocers preparing fruit displays, and its generalizations allow the creation of powerful error detection and correction codes. While the solution of the Kepler Problem is now known, the higher dimensional version is very much open. There has been remarkable progress in the last few years, with number theory playing a key role in these results. We will develop sufficient background material to understand many of these problems and the current state of the field. Pre-requisites are real analysis.

**Requirements/Evaluation:** Class participation, homework, exams and participation in writing a textbook on the material. Each student will be responsible for working on a chapter of a book based on this material. In addition to obtaining critical writing feedback from myself and my co-author (who is a world expert in the subject), depending on timing we will also be able to share comments from an editor of a major publishing house or a referee. Chapters can range from short snapshots of a subject, on the order of 5 pages, to longer technical derivations of perhaps 10-30 pages.

**Prerequisites:** Math 350 or 351

**Enrollment Limit:** 40

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)  (WS)  (QFR)

**Writing Skills Notes:** Students will improve and expand their writing skills by taking course material as a starting point and writing chapters for a book under contract with the American Mathematical Society. This will involve numerous iterations of the content, with feedback both from the professor and from an editor.

**Quantitative/Formal Reasoning Notes:** This is a 400 level math class.

LEC Section: 01  MWF 11:00 am - 11:50 am  Steven J. Miller

**MUS 173 (S) Music, Medicine, and Madness**  (WS)

This class will explore intersections between medicine and music in Europe and the United States between 1750 and 1900, with particular attention to constructions of “madness” as a condition that could be triggered, treated, or expressed by music. Through focused readings, analysis of musical examples, and discussion, we will examine historical discourses concerning music’s ability to influence the mind and body—and through this examination gain perspective on current discussions of both mental and physical health. Topics will include the “mad scene” trope in 19th-century opera, the idea of the suffering genius composer, the history of music as medical treatment, and how factors like race, gender, and ability shaped
understandings of musical achievement and medical diagnosis.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** class participation, one-time discussion leading, musical analysis essay, article analysis essay, final research project proposal and presentation

**Prerequisites:** ability to read music helpful but not necessary

**Enrollment Limit:** 15

**Enrollment Preferences:** Music majors, those planning to major, or those with strong interest in music, medicine and its history, disability studies, or gender studies. If overenrolled, the instructor may ask students to answer a questionnaire to determine enrollment.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Three papers and engaged class participation. Outlines and drafts of two of the papers will be required. Students will receive detailed comments on each paper, allowing them to build upon those comments in subsequent writing assignments.

Spring 2025

LEC Section: 01   TF 1:10 pm - 2:25 pm   Sonja G. Wermager

**MUS 217 (S) Hip Hop Culture** (DPE) (WS)

**Cross-listings:** AMST 222 / ENGL 221 / AFR 222

**Secondary Cross-listing**

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced "diggin' in the crates"--a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop's tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

**Requirements/Evaluation:** Four papers, project with presentation, and a final exam.

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** AMST majors or prospective majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 222(D2) ENGL 221(D1) AFR 222(D2) MUS 217(D1)

**Writing Skills Notes:** Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

**Difference, Power, and Equity Notes:** This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

**Attributes:** AFR Culture, Performance, and Popular Technologies AMST Arts in Context Electives AMST Comp Studies in Race, Ethnicity, Diaspora
MUS 238 (S) Music in Modernism (WS)
The synthesis of the arts was a primary pursuit of modernist composers, artists, choreographers, and writers. Seeking either to realize Wagner's "total work of art" in the theater, or to uncover the more general correspondences celebrated by Baudelaire, modernists consistently looked beyond their own media. Collaborations on works of "total theater" were common: Satie, Cocteau, Massine, Picasso; Brecht, Hindemith, Weill; Stravinsky, Nijinsky, Bakst; Claudel, Honegger, Rubinstein. Modernists explored new connections between music and color (Scriabin, Kandinsky), music and literature (Joyce, Mann), and music and dance (Duncan, Graham). Occasionally, modernists attempted to unite the arts on their own: Schoenberg painted, Pound composed, and Kokoschka wrote. Our focus will be on those works of music, art, dance, and literature that explored new relationships between the arts. One goal will be to investigate whether specific equivalents exist between techniques of modernist painting, poetics, choreography, and composition. Aware of the risks and rewards of interdisciplinary study, we will attempt our own theories of artistic synthesis. This course is designed to bring multiple perspectives to the study of music in modernism.

Class Format: discussion

Requirements/Evaluation: Three papers (6, 8, and 12 pages in length) and engaged class participation. Outlines and drafts of two of the papers will be required. Students will receive detailed comments on each paper, allowing them to build upon those comments in subsequent writing assignments.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: If overenrolled, preference will be given to sophomores and juniors.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Attributes: MUS Music History: 1900-Present

---

MUS 476 (S) Orality and Literacy in Historical Musical Practice (WS)
Music is an inherently oral/aural, ephemeral art form. Music history is reliant upon, and tends to privilege, its symbolic rendering in fixed notation. Yet, notated music--described by musicologist Nino Pirrotta as "the visible tip of an iceberg... seven-eighths of [which] remain submerged"--tells only a fraction of the story we seek to understand when studying musics of the past. In this seminar, we will address the unique challenges of studying the relationship between orality and literacy in historical musical practice. We will begin by considering the creative role of memory and embodied ritual in oral musical performance and transmission, as well as the ways in which various cultures have attempted to preserve such practices and the inherently transformative process they undergo when fixed in notation. We will then explore the range of theories and methodologies that scholars and performers have taken in approaching oral musical practices of the past in relation to varying levels of textual and musical literacy. Topics may include studies of epic poetry, jazz improvisation, medieval plainchant, troubadour song, improvised counterpoint, son mexicano, Neapolitan lyric song and dance, Ethiopian Christian chant, medieval and early modern instrumental music practices, Arab-Andalusian music, music in the commedia dell'arte, and various examples of contrafacture. Over the course of the semester, students will develop and present their own independent research aimed at producing a collaborative mock conference/performance as a final project for the class.

Requirements/Evaluation: evaluation will be based on three 5-6 page papers, three presentations, a final collaborative conference/performance, and class participation

Prerequisites: ability to read music

Enrollment Limit: 8

Enrollment Preferences: junior and senior music majors, and any student with a demonstrated interest in music

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option
Unit Notes: satisfies the 400-level course requirement for the music major

Distributions:  (D1)  (WS)

Writing Skills Notes: Students will write three 5-6 page papers and will receive detailed feedback on their writing.

NSCI 209  (F)  Animal Communication  (WS)

Cross-listings:  BIOL 209

Secondary Cross-listing

Animal communication systems come in as many varieties as the species that use them. What they have in common are a sender that encodes information into a physical signal and a receiver that senses the signal, extracts the information, and adjusts its subsequent behavior accordingly. This tutorial will consider all aspects of communication, using different animal systems to explore different aspects of the biology of signaling. Topics will include the use of syntax to carry meaning in chickadee calls, synchronous signaling by fireflies, gestural communication by primates, long-distance chemical attractants that allow male moths to find the object of their desire, and cultural evolution within learned signaling systems.

Requirements/Evaluation: evaluation will be based on five 5-page papers, five short response papers, and the student's effectiveness in tutorial discussions.

Prerequisites:  BIOL 101 and 102; open to sophomores, juniors, and seniors

Enrollment Limit:  10

Enrollment Preferences: Biology majors and Neuroscience concentrators who need a Biology elective to complete the concentration; then sophomores.

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D3)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

NSCI 209(D3) BIOL 209(D3)

Cross-listings:  PSYC 319 / STS 319

Secondary Cross-listing

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation: six 5-page position papers and five 2-page response papers as well as participation in discussions

Prerequisites:  PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

Enrollment Limit:  10
Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 319(D3) STS 319(D2) NSCI 319(D3)

Writing Skills Notes: In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

PHIL 110 (F) History of Modern Moral and Political Philosophy (WS)

This course is a survey of 17th-, 18th-, and 19-century moral and political philosophy. We will consider what, if anything, justifies the rules of morality and law, and we will consider the nature, value, and limits of freedom. We will ask whether our individual actions and our social and political structures are based in our self-interested desires, our natural instincts, or our rationality. Authors will include: Hobbes, Locke, Rousseau, Hume, Kant, Smith, Marx, and Mill.

Requirements/Evaluation: Students will write a number of short essays.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write a series of short essays, developing key skills of philosophical writing, including, most prominently, formulating a thesis and developing an argument. Students will receive feedback on drafts, and be required to substantially revise their papers prior to submission.

Fall 2024

SEM Section: 01 TR 8:30 am - 9:45 am Justin B. Shaddock

PHIL 115 (S) Personal Identity (WS)

Through lectures, discussions, close readings and assigned writings, we will consider a variety of philosophical questions about the nature of persons, and personal identity through time. Persons are subjects of experiences, have thoughts and feelings, motivation and agency; a person is thought of as continuous over time, and as related to, recognized and respected by other persons. Thus, the concept of person plays a significant role in most branches of philosophy, e.g. metaphysics, epistemology, moral and political philosophy, philosophy of mind. Conceptions of person are equally important in science (especially in psychology), law, and the arts. Questions about persons are of central importance for a myriad of our theories and practices, and for the ways in which we live our lives. The aim of this course is to explore and evaluate a number of rival conceptions of persons and personal identity over time. Some of the questions which we will discuss are: What is a person? How do I know that I am one? What constitutes my knowledge of myself as a person, and does that knowledge differ in any significant respect from my knowledge of physical objects and of other people? Our starting and central question will be: What makes me the particular person that I am, and how is my identity as this individual person preserved over time? The course will place special emphasis on developing students’ intellectual skills in close, analytical reading; reconstructing and evaluating claims and reasons that support them; producing original ideas and arguments, orally and in writing; responding to the claims and arguments presented in texts and in class; and writing clear, polished, well-argued papers.
PHIL 116 (S) Mind, Knowledge, and Reality (WS)
This course is an introduction to philosophy through three major themes: The nature of the universe, the existence of gods, and the mind/body problem. Throughout, we will appeal to reason and evidence in forming our best beliefs. Our discussions will range over historical and contemporary works in the Western tradition.

Requirements/Evaluation: active participation; four (5-6 page) essays
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Strong preference given to first-years and sophomores; do not contact the instructor to plead for special enrollment consideration.
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Unit Notes: meets 100-level PHIL major requirement
Distributions: (D2) (WS)
Writing Skills Notes: Students will craft 4 six page essays, and each will receive extensive comments on structure and composition with an eye toward developing skills in philosophical writing.

Spring 2025
SEM Section: 01 MW 7:00 pm - 8:15 pm Bojana Mladenovic

PHIL 119 (F)(S) Why Obey the Law? (WS)
What social and political arrangements are most conducive to fostering human well-being and the common good? What makes governmental authority legitimate? A foundation in reason and morality? Popular sovereignty? Does might make right? We turn first to two of Plato’s most famous dialogues, The Apology and The Republic in which we encounter Socrates’ trial for impiety and corrupting the youth, and, Socrates effort to defeat an argument that might makes right, that only the weak agree to obey the law, by envisioning an ideal (non-democratic) city-state ruled by benevolent philosopher-kings. The rest of the course is devoted to figures in the history of modern political philosophy, both defenders and critics of democratic liberalism (e.g., Hobbes, Locke, Rousseau, Marx, J.S. Mill, Nietzsche, W.E.B Dubois, etc.). We conclude with contemporary reflections on the fate of democracy today.

Class Format: Class participation will involve individual and group activities meant to give you practice in thinking quickly, working with others, and building arguments.

Requirements/Evaluation: Six pass/fail short response essays of approximately 500 words each in which students write about a particular part of the assigned text (such as explaining what a passage means, drawing connections between different parts of the text, identifying an argument, responding to an argument, etc); two 5-page papers based on prompts; participation.
**Prerequisites:** None. Open to any student interested in the sources of our current understandings of government, the basis of its authority, and strengths and weaknesses of democracy.

**Enrollment Limit:** 19

**Enrollment Preferences:** Majors, first years, and sophomores will normally receive preference if the course over enrolls.

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** meets 100-level Phil major requirement

**Distributions:** (D2) (WS)

**Writing Skills Notes:** The professor and the teaching assistant will provide detailed comments on short and longer essays and provide occasional peer review opportunities, handouts and discussions of frequent types of errors, different approaches to writing and drafting, and the importance of editing and seeking the help of writing tutors. I encourage, but do not require, that students make appointments to discuss ideas and drafts with the TA or me.

**Attributes:** JLST Interdepartmental Electives  LEAD Ethical Issues of Leadership

---

There are three grains of sand on my desk. This is unfortunate, but at least there isn't a heap of sand on my desk. That would be really worrisome. On the other hand, there is a heap of sand in my backyard. I don't know how exactly how many grains of sand are in this heap, but let's say 100,000. My daughter removes one grain of sand. I don't know why, she just does. It seems like there is still a heap of sand in my backyard. In fact, it seems like you can't change a heap of sand into something that isn't a heap of sand by removing one grain of sand. Right? But now we have a problem. By repeated application of the same reasoning, it seems that even after she removes 99,997 grains of sand—I don't know what she wants with all this sand, but I'm starting to worry about that girl—there is still a heap of sand in my backyard. But three grains isn't enough for a heap. So there is not a heap in my backyard. Now I'm confused. Where did my reasoning go wrong? What we have here is an example of the *sorites* paradox. It is a paradox, because I started with seemingly true statements and used valid reasoning to arrive at contradictory conclusions. We can learn a lot about logic, language, epistemology and metaphysics by thinking through and attempting to resolve paradoxes. In this class, we'll work together to think through some ancient and contemporary paradoxes. We'll also work on writing lucid prose that displays precisely the logical structure of arguments, engages in focused critique of these arguments, and forcefully presents arguments of our own. Other topics could include: Zeno's paradoxes of motion and plurality, the liar's paradox, the surprise-exam paradox, paradoxes of material constitution, Newcomb's Problem, and the Prisoner's Dilemma.

**Requirements/Evaluation:** (i) short response papers; (ii) midterm paper (~5-6 pages) (iii) Final term-paper (~10 pages) in multiple drafts; (iv) Active and informed participation in class discussions.

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** First and second year students. Prospective philosophy majors.

**Expected Class Size:** 15-19

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** Meets 100-level PHIL major requirement

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write a number of short papers. Both the content and the writing will be evaluated. These papers will focus on clear and precise presentation and evaluation of arguments. There will be a midterm paper revising an earlier short paper. There will be a final term-paper written in multiple drafts.

**Spring 2025**

SEM Section: 01  TF 2:35 pm - 3:50 pm  Keith E. McPartland
PHIL 127 (F)(S) Meaning and Value  (WS)

What gives an individual life meaning? Pleasure? Success in fulfilling desires? Flourishing in ways distinctive to a rational agent or a human being (including, for example, developing rational capacities and self-mastery, succeeding in worthwhile projects, cultivating relationships, living morally, developing spiritually)? Can we be mistaken about how well our lives are going, or about what has value? What are the main sources of uncertainty here? Does the fact that our lives will end threaten their meaning? How can science contribute to our understanding of these issues? We'll examine these and related questions through historical and contemporary readings. This course aims to teach skills required for good philosophical thinking, including those involved in reading texts closely, reconstructing and evaluating arguments, articulating ideas clearly in discussion, and crafting well-structured and carefully-reasoned papers.

Class Format: Students will meet in trios for this tutorial. We will meet on a fixed weekly schedule agreed to by the instructor and participants.

Requirements/Evaluation: Four lead tutorial papers (5-6 pages in length), seven critiques (2 pages in length), and one rewrite.

Prerequisites: First-years and sophomores only.

Enrollment Limit: 12

Enrollment Preferences: First-years and sophomores, and students who need to fulfill their 100-level requirement for the philosophy major. This tutorial is an appropriate first course in PHIL.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: This tutorial meets the 100-level PHIL major requirement.

Distributions: (D2) (WS)

Writing Skills Notes: Each student will write a lead tutorial paper (5-6 pages in length) or a peer critique (2 pages) in alternating weeks. The instructor will provide timely comments on writing skills, with suggestions for improvement.

---

PHIL 212 (F) Ethics and Reproductive Technologies  (WS)

Cross-listings: WGSS 212 / STS 212

Primary Cross-listing

In her groundbreaking book, The Tentative Pregnancy, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace--or to let us think we can replace--chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as contraception, abortion, in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, uterine transplants, and "artificial wombs." Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

Class Format: discussion

Requirements/Evaluation: active participation in class discussions, three or four short reflection papers, and two longer papers (5-7 and 7-10 pages)

Prerequisites: none, but introductory-level course in PHIL and/or WGSS recommended

Enrollment Limit: 19

Enrollment Preferences: WGSS and PHIL majors (declared or prospective), PHLH and STS concentrators (declared or prospective)

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: meets Contemporary Value Theory requirement only if registration is under PHIL
This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 212(D2) PHIL 212(D2) STS 212(D2)

**Writing Skills Notes:** Students will write periodic short papers (2-3 pages each), a midterm paper (5-7 pages) and a final paper (7-10 pages). Short papers focus on concepts, arguments, and writing skills needed in the midterm and final papers, in which students are expected to describe and evaluate arguments from assigned readings, and to present clear and effective arguments in support of their own ethical positions. Students receive feedback on all papers and have the opportunity to revise midterm and final papers.

**Attributes:** PHIL Contemporary Value Theory Courses  PHLH Bioethics + Interpretations of Health
Prerequisites: One of the following: 100-level Philosophy course or permission of instructor. Exposure to history of modern European philosophy and/or intellectual history will be very helpful.

Enrollment Limit: 10

Enrollment Preferences: Philosophy majors or prospective majors and students with background and interest in modern philosophy and critical theories more generally.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students write five or six 5-6 page tutorial papers. Each will receive regular feedback to improve their ability to present clear, well-supported and engaging written arguments and interpretations.

Attributes: PHIL History Courses

Spring 2025

TUT Section: T1  TBA  Jana Sawicki

PHIL 243  (S) The Philosophy of Higher Education: College Controversies  (WS)

What are the purposes of higher education? What are the purposes of liberal arts colleges in America? What should be the goals of Williams College? We will begin examining these questions by studying the history of some controversies in American higher education, and then turn to contemporary controversies such as campus free speech, cancel culture, divestment, decolonization, and admissions criteria.

Class Format: This course is a tutorial. Students will meet in pairs with the instructor one hour per week.

Requirements/Evaluation: A 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners' papers in alternate weeks

Grading: none

Enrollment Limit: 10

Enrollment Preferences: I will be seeking a balance of interests and backgrounds; preference given to students who have taken at least one philosophy course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: A 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners' papers in alternate weeks, and will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

PHIL 244  (S) Environmental Ethics  (WS)

Cross-listings: ENVI 244

Secondary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature, among others. Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: five essays (5-7 pages each) and five prepared oral responses to partners' essays; evaluation will be based on essays,
oral responses, and quality of discussion

**Prerequisites:** ENVI 101 or one course in PHIL

**Enrollment Limit:** 10

**Enrollment Preferences:** declared and prospective Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 244(D2) PHIL 244(D2)

**Writing Skills Notes:** Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Spring 2025

TUT Section: T1    TBA    Julie A. Pedroni

**PHIL 272 (S) Free Will and Responsibility (WS)**

**Cross-listings:** JLST 272

**Primary Cross-listing**

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? We're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The key question, then, is whether, and how, agency is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

**Requirements/Evaluation:** Six tutorial papers (5-6 pages in length) and five critiques (2-3 pages in length)

**Prerequisites:** one PHIL course (or permission of instructor; please email with any questions)

**Enrollment Limit:** 10

**Enrollment Preferences:** current and prospective Philosophy majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 272(D2) JLST 272(D2)

**Writing Skills Notes:** Students will write a tutorial paper (5-6 pages in length) every other week, and a peer critique (2-3 pages in length) in alternating weeks, evenly spaced throughout the semester. The instructor will provide timely comments on writing skills, with suggestions for improvement.

**PHIL 274 (F) Messing with People: The Ethics of Human Experimentation (WS)**

The Tuskegee Syphilis Study and Stanley Milgram's Obedience experiments are infamous. Yet, other lesser known experiments are equally important landmarks in research ethics that continue to shape the design, conduct, and regulation of research involving human participants. In this tutorial we'll
closely examine a series of contemporary and historical cases of human experimentation (roughly, one case per week) with an eye toward elucidating the moral norms that ought to govern such research. A number of conceptual themes will emerge throughout the course of the term, including notions of exploitation and coercion, privacy and confidentiality, and the balance between public interests and individual rights. The cases will be drawn from different domains of research, including clinical medicine, public health, social and behavioral sciences, and education. Specific issues are likely to include the ethics of placebo research; deception in research; studies of illicit/illegal behavior; genetic research; research involving social media; experimentation with children, pregnant people and fetuses; research involving persons with mental illness, justice and research with marginalized populations, among other topics.

Requirements/Evaluation: evaluations will be based on written work, on biweekly papers, oral commentaries, and tutorial discussions
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Philosophy majors (declared and prospective); Public Health concentrators (declared and prospective)
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)
Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and resubmit. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Fall 2024
TUT Section: T1 TBA Julie A. Pedroni

POEC 253  (F) Empirical Methods in Political Economy  (WS) (QFR)
This course introduces students to common empirical tools used in policy analysis and implementation. Students will develop skills in statistical literacy to become critical consumers of public policy-relevant research. The emphasis in the course is split between an intuitive understanding of statistical foundations, and applications in data visualization and science communication. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; effective data visualization; statistical inference and hypothesis testing; and multiple regression analysis. A particular focus will be placed on understanding causality, the challenges of estimating causal relationships, and the design of evidence-based policy. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.
Requirements/Evaluation: Problem sets, group project, midterm exam, final exam
Prerequisites: MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255
Enrollment Limit: 20
Enrollment Preferences: Political Economy majors, Environmental Policy majors and sophomores
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Unit Notes: does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major
Distributions: (D2) (WS) (QFR)
Writing Skills Notes: Students will write 3 coding-intensive data briefs over the course of the semester. Creation of original exhibits from publicly accessible data, use of citation management systems, and clarity in technical writing will be emphasized.
Quantitative/Formal Reasoning Notes: The course teaches econometrics, i.e. statistics as economists use it, with applications in economics, political science, and other fields.
Attributes: POEC Required Courses
PSCI 160  (F)  Refugees in International Politics  (DPE) (WS)
Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be--how a crisis can be chronic, and for whom this chronic crisis is a solution. We investigate who refugees are, in international law and popular understanding; read refugee stories; examine international and national laws distinguishing refugees from other categories of migrants; evaluate international organizations’ roles in managing population displacement; look at the way that images convey stereotypes and direct a type of aid; consider refugee camps in theory and example; and reflect on what exclusion, integration, and assimilation mean to newcomers and host populations. In whose interest is the prevailing system? Who might change it, and how?

Requirements/Evaluation:  Ten essays: five lead, five response. The first two weeks’ essay grades will be unrecorded.
Prerequisites:  none
Enrollment Limit:  10
Enrollment Preferences:  first-year students, to be selected randomly from list of those enrolled.
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)  (DPE)  (WS)
Writing Skills Notes:  In addition to writing every week, students will have a chance work on specific skills cumulatively.
Difference, Power, and Equity Notes:  This course examines the way in which home states categorize people and oppress some, producing refugees; the way that host states categorize people and oppress some, using immigration to shore up the prevailing ethnic hierarchy; and why we worry about some of these categories of oppression more than others.
Attributes:  PSCI International Relations Courses

PSCI 208  (F)  Wealth in America  (WS)
The pursuit of wealth is an important feature of American political identity, captured by the ideas of the American dream and the Protestant work ethic. The accumulation of wealth has been lauded as both a worthy individual activity and a vital component of the nation's public interest. Yet inequality in wealth may conflict with the political equality necessary for democratic governance and public trust, leading to concerns that we are sacrificing community, fairness, and opportunity for the benefit of a small portion of the population. This course focuses on questions about the public value of wealth and its accumulation, which have become more pressing now that the richest one percent of Americans own about 40 percent of privately held wealth. Some readings will be historical, particularly those focusing on American political thought and the politics of the Gilded Age. Most readings will focus on contemporary political debates about the accumulation, concentration, and redistribution of wealth.

Requirements/Evaluation:  four 5-page papers and a final 10-page paper that is a revision and extension of a short paper
Prerequisites:  none; not suitable for first-year students
Enrollment Limit:  19
Enrollment Preferences:  Political Science majors with concentration in American politics and Political Economy majors
Expected Class Size:  19
Grading:  no pass/fail option,  no fifth course option
Unit Notes:  American concentration
Distributions:  (D2)  (WS)
Writing Skills Notes:  Four 5-page papers, peer review, and a revision of extension of one of these papers into a 10-page paper at the end of the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
Attributes:  POEC Depth  PSCI American Politics Courses
PSCI 290 (F) How Change Happens in American Politics (WS)

Cross-listings: LEAD 290

Primary Cross-listing

An unprecedented assault on the U.S. Capitol, the rise of white nationalism, a pandemic, economic volatility, racial reckoning, the overturning of Roe v. Wade, and rapidly evolving environmental crises -- American politics in the last four years has been tumultuous. What might we expect to come next? From the Founding to the present, the American political order has undergone cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably stable and enduring. How can this be? Where do we find continuities and where upheavals? Who or what has been responsible for the continuities, and who or what for the changes? What sorts of transformations have been possible, and why -- what marriage of individual action and contextual factors have created political change in the past and in the present? Finally, what are the costs of change (and of continuity) -- and who pays them? In this tutorial, we assess American political change, or lack of, to gain a sense of the role that political leaders have played in driving change. We examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including war, economic developments, demographic change, and constitutional and institutional practices. We consider general models of change, as well as specific case studies, including civil rights and social justice for racial and ethnic groups, gender equality and family relations, and reactionary or traditionalist politics. Finally, we will look at arguments that America has been "exceptional" -- or, unlike other countries -- as well as critiques of these arguments to help us gain an understanding of future prospects for political transformation.

Requirements/Evaluation: participation in weekly meetings as well as 4 lead essays (5-6 pages) and 4 critiques (2 pages)

Prerequisites: one prior course in political science

Enrollment Limit: 10

Enrollment Preferences: Declared and prospective Political Science majors and Leadership Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 290(D2) PSCI 290(D2)

Writing Skills Notes: Extensive written feedback will be provided on tutorial essays and critiques. Additionally, the tutorial sessions will include attention to the quality of the written argument in the paper that is the focus of each session. At the end of the semester, students will be required to revise one of the tutorial papers incorporating the feedback, oral and written, provided by their tutorial partner and the instructor.

PSCI 305 (F) Environmental Political Thought (WS)

Cross-listings: STS 305

Primary Cross-listing

In the face of planetary crisis, it is as difficult as it is crucial to find the time and calm "to think what we are doing" (Hannah Arendt's famous line). This course aims to hold space for that thinking; to collaboratively find the presence of mind to take the measure of the doings that caused, and that may redress, the awful reality of earth's degradation. To do so, we will read, discuss, and write about some of the most significant book-length works of environmental political thought published in the last five years. These books conceptualize and intervene into the politics of phenomena such as climate change, species depletion, toxic pollution and (a special interest of the instructor) waste by applying--and sometimes reinventing--approaches from political theory, political economy, science & technology studies, philosophy, and critical theory. They consider the enmeshment of environmental problems with racism, colonialism, economic inequality, and speciesism, among other modalities of power, and weigh the promise of political action and organization to reconstitute relationships among earth’s human and more-than-human elements. By interpreting, evaluating, applying and extending the arguments of these books in discussion and writing, students will be challenged to scrutinize their preconceptions and develop, support and articulate original arguments about politics and the environment.
Requirements/Evaluation: Four mini-essays of 2-3 pages each; one final paper of 7-10 pages that incorporates substantially revised material from at least one mini-essay; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Political theory concentrators, Political Science majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 305(D2) STS 305(D2)

Writing Skills Notes: Students will discuss and fine-tune their writing processes in class and office hours. Students will be given written feedback on mini-essays, with particular attention to developing a sense of voice and purpose in written argumentation. This feedback will support their revision of at least one mini-essay as part of writing the final paper.

PSCI 319  (F)(S) Marine Policy  (DPE) (WS)

Cross-listings: ENVI 351 / CAOS 351

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 319(D2) ENVI 351(D2) CAOS 351(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean
pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

PSCI 320  (F) Heroes and Villains: Iconic Leadership and the Politics of Memory  (WS)
Cross-listings: LEAD 320
Secondary Cross-listing

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious--or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history--including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write an 18-20 page research paper on a topic of their choice related to the core themes of the course.

Requirements/Evaluation: Seminar participation, research proposal, peer workshop, research paper, in-class research presentation
Prerequisites: previous course in Leadership Studies, or Political Science, or permission of instructor
Enrollment Limit: 14
Enrollment Preferences: Leadership Studies concentrators, Political Science majors

PSCI 326  (S) The Cyber Revolution  (WS)

This is a course about how the advent of digital technologies, and especially those related to cybersecurity, have reshaped international politics, as well as how they might affect the world order in the future. At its most basic level, it addresses a question that is of fundamental importance to both scholars and policymakers alike: Have cyberweapons and digital technologies revolutionized the way that international politics works, in a manner similar to the impact that nuclear weapons have had on the international system since 1945? Specifically, the course will focus on what is known as the "theory of the cyber revolution"; threats to critical infrastructure; the most significant cyberattacks that have occurred to date, namely, the US-Israeli Stuxnet attack on Iran's nuclear facilities in 2006-2010 and Russia's NotPetya attack on Ukraine in 2017; zero-day markets; information warfare and its effects on, respectively, authoritarian and democratic political systems; and the role that critical information technologies--such as advanced
semiconductors, quantum computing, and artificial intelligence systems—might play in the evolution of international security competition in future decades.

Requirements/Evaluation: Biweekly analytical essays, biweekly critiques, final paper, class participation

Prerequisites: PSCI 120

Enrollment Limit: 10

Enrollment Preferences: Preference given to PSCI majors, especially those concentrating in the international relations subfield

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will be writing biweekly analytical essays, biweekly critiques of their partner's work, and a final paper. Moreover, they will be providing peer review of one another's work throughout the semester.

Attributes: PSCI International Relations Courses

Spring 2025

PSCI 357 (S) Senior Seminar: Leadership and the Anxieties of Democracy (WS)

Cross-listings: LEAD 425

Secondary Cross-listing

This course, the senior capstone for Leadership Studies, examines the challenges and opportunities facing political leaders in contemporary liberal democracies. We will begin by seeking to place our current moment in the longer arc of history, examining the distinctive institutional and structural constraints facing contemporary political leaders and examining in detail previous eras in which the American political system has come under great pressure. Then, we will look at some important factors that shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and fraying institutions. While the course will focus primarily on the United States, our conceptual framework will be global. Our primary questions will be these: Why does transformative leadership seem so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world? As a final assignment, students will craft an 18-20-page research paper on a topic of their choice related to the themes of the course.

Requirements/Evaluation: Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites: LEAD 155 or permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: Open to Leadership Studies concentrators or with the permission of the instructor; preference given to Political Science majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 425(D2) PSCI 357(D2)

Writing Skills Notes: Students receive iterative feedback on their research projects: Their initial proposals receive substantive feedback from fellow students as well as substantive and stylistic feedback from the professor looking toward a formal proposal; and their formal proposals receive extensive comments from both the professor and a student colleague looking toward the final paper. The students will submit writing for feedback the third week of March, the third week of April, and the third week of May.

Spring 2025

SEM Section: 01 W 1:10 pm - 3:50 pm Mason B. Williams
The Arab-Israeli dispute receives more attention than arguably any other ongoing conflict in international politics, and for very good reason. The fact that it has lasted as long as it has—well over a century—been characterized by a remarkable (and depressing) degree of intensity; involved competing nationalisms, as well as different religions, cultures, and ethnicities; centered on territorial claims over land that is of special significance; and been connected to a number of important geopolitical questions, including ones involving great power competition, has made it a major focus of scholars of the Middle East, international relations analysts, and, of course, the general public. The issue is also of special interest, for a variety of reasons, in American political discourse. This seminar will examine the conflict in depth, beginning with its origins in the late nineteenth century, and ending with how it might run its course in the future. Specifically, the course will begin with an overview of the dispute's history and most salient aspects. Thereafter, it will cover Zionism and the Palestinian nationalist cause; the creation of the state of Israel and the 1948-1949 Arab-Israeli war; the June 1967 war; the debate, and controversy, over the "Israel lobby" in the United States; the October 1973 war and its aftermath; the road to the 1979 Egyptian-Israeli peace treaty; the arguably underappreciated role that nuclear weapons have played in the conflict; the rise and collapse of the Oslo peace process in the 1990s, as well as the outbreak of the Second Intifada in 2000; and the future of the dispute.

Requirements/Evaluation: class participation, three critical analytical essays, peer critiques/exchanges, final paper

Prerequisites: PSCI 120 and at least one other PSCI course from the international relations subfield

Enrollment Limit: 19

Enrollment Preferences: Political science majors, especially seniors, will be given priority for enrollment.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will need to do a large amount of analytical writing in this course, as well as critique and edit one another's papers. There will also be a component of the class that involves doing writing workshops.

PSYC 319 (S) Neuroethics (WS)

Cross-listings: STS 319 / NSCI 319

Primary Cross-listing

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation: six 5-page position papers and five 2-page response papers as well as participation in discussions

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 319(D3) STS 319(D2) NSCI 319(D3)

Writing Skills Notes: In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with
suggestions for improvement.

REL 211  (F)  Envisioning the Sacred: Representation and Religion in Christian and Muslim Cultures  (WS)
Cross-listings: ASIA 212 / ARTH 215

Secondary Cross-listing
How did medieval Christians and pre-modern Muslims imagine the sacred and how did they give what they imagined pictorial form? How were these pictures used, both in public and in private life, and why? How did the art of these unique religious traditions forge connections between the visible and invisible worlds? Paying particular attention to the function and experience of works of art within Christian and Islamic cultures, this seminar examines the evolution of devotional visual expression, while also exploring the problems sacred images generated in these distinct yet often overlapping traditions. Through readings and class discussion, the course will investigate, among other topics: the varied attitudes toward the representability of God in Judaism, Islam, and Christianity; the impact of earlier image traditions on the religious art of medieval Christians and pre-modern Muslims; the cult of the devotional image, concerns over idolatry, and the destruction of images; ideas about spiritual versus physical vision and their influence on the making and viewing of pictures; the relationship of sacred images to relics and to various aspects of organized ritual; and the possible roles played by pictures of the sacred in silencing or giving voice to dissent.

Requirements/Evaluation: Participation in class discussion; oral presentation; five 3-4-page papers, and a final 6-page paper
Prerequisites: None
Enrollment Limit: 12
Enrollment Preferences: Sophomores then juniors, but open to all
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option

REL 284  (F)  From the Battlefield to the Hermit's Cell: Art and Experience in Norman Europe  (WS)
Cross-listings: WGSS 284 / ARTH 218

Secondary Cross-listing
This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans—a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries—each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal
chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian
traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the
use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that
through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three
objects—an embroidery, a building, and a book—give students insight into the rich array of concerns and aspirations, from the political to the spiritual
and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more,
these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature
provides a compelling introduction to the discipline of art history itself, past and present.

Requirements/Evaluation: Participation in discussion; five 4-5-page tutorial papers; five 1-2-page response papers.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: First years and sophomores, but open to all.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

REL 291 (F) Religion and Ecology in America (WS)

Cross-listings: ENVI 291 / SOC 291

Secondary Cross-listing

This course examines the relationship between religious and environmental thought in American cultural history. Exploring a broad range of practices,
stories, and beliefs, we will examine the spiritual roots and branches of modern environmentalism. Rather than survey the formal teachings of
organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art,
philosophy, and popular culture. How have religious writers, thinkers, and artists shaped the way we think about nature? How have they shaped the
way we think about politics, science, and social justice? In pursuit of these questions, we will consider a diverse array of topics and cases, including
struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorism, Catholic
climate activism, Jewish eco-mysticism, atheist biological theory, Buddhist eco-spirituality, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their
partner's paper.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 291(D2) REL 291(D2) SOC 291(D2)

Writing Skills Notes: Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly
feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision.
Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

**Attributes:** ENVI Humanities, Arts + Social Science Electives

**REL 335 (S) Humanitarianism and Jewish History** (WS)

**Cross-listings:** JWST 434 / HIST 434

**Secondary Cross-listing**

In the twentieth century, Jewish history and humanitarian history became deeply intertwined. As the victims of persecution and expulsion, mass violence and genocide, Jews repeatedly figured as the recipients of aid and humanitarian intervention. At the same time, Jewish political figures, legal thinkers, intellectuals and scholars, social activists, and aid workers played central roles in the establishment of humanitarian organizations and in debates about the moral, political, and legal frameworks that have shaped approaches to humanitarianism across the decades since World War I. This research seminar is designed to open up big questions about the history of humanitarianism and to carve out space for students to conduct research on a particular place, time, and aspect of that larger history in conversation with other students working on related topics. In the first half of the semester, in discussions of common readings, we will examine various works of scholarship that connect to the history of humanitarianism from the nineteenth century to the present. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of humanitarianism using the digitized archives of the American Jewish Joint Distribution Committee, culminating in a twenty-plus-page paper. In the final weeks of the semester, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students’ work. In this seminar, we are not merely studying history; you are actually doing history. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. The goal is for each student to produce a polished research paper based on engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

**Requirements/Evaluation:** class participation, several short papers, oral presentations, and a 20-page research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**RLFR 105 (F) Advanced French: Advanced Studies in French Language and Francophone Culture** (DPE) (WS)

In this French course, we will read and examine literary texts from the twelfth to the 19th centuries, and films from the twentieth and twenty-first centuries. In order to analyze them, we will briefly situate them in their social and historical contexts. These works will help us better understand contemporary France and explore France's colonial past. We will also learn how to write two short research paper in French in the form of an explication de texte. While the themes, authors, time periods will vary, our approach will remain the same. Three themes, love, fear, and France's colonial past, will serve as the course's organizing principles. A small section of the course will be devoted to grammar revisions in order to continue to improve our reading and language skills. Throughout the semester we will develop our writing skills in French. Conducted in French
**Requirements/Evaluation:** class participation, online grammar exercises, 2 four-page papers, 1 class introduction, 2 low-stakes one-page response papers

**Prerequisites:** RLFR 104, placement exam, or by permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** All are welcome, but if overenrolled, preference will be given to first- and second-year students and French major and certificate students. If necessary, a statement of interest will be solicited.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** In this course students will practice writing two short structured papers in French where there will present their interpretation of literary or visual text. Students will write two response papers.

**Difference, Power, and Equity Notes:** In this course student will examine visual and literary texts that reframe difference, power and equity in relation to race, class, gender, ethnicity, sexuality, and religion.

**RLSP 106 (S) Advanced Grammar and Composition through Literature (WS)**

This course is designed for advanced students who wish to further polish and refine their grammatical, lexical, and writing skills in Spanish. The course may be taken immediately after 104, by placement exam results, or even after students have begun to sample the Department's literature and culture offerings at the 200- and 300-level. Classic works of short fiction by celebrated Latin American authors such as Gabriel García Márquez and Julio Cortázar will be discussed; selected Latin American films will be viewed as well. For written and oral assignments: weekly essays, in-class presentations, and language-laboratory activities. Conducted in Spanish.

**Class Format:** Grammatical practice. Study of idioms. Discussion of literary texts.

**Requirements/Evaluation:** A weekly essay based on the stories read in class. Written lab exercises. Participation in the grammatical and literary discussions. Oral presentations, quizzes, a mid-term exam, and a final exam

**Prerequisites:** RLSP 104, any course 201+, placement exam or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** In the event of over-enrollment, preference will be given to sophomores.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Weekly essays, corrected for both language and content. Constant feedback from instructor. Students will be required to revise and rewrite their graded essays.

**RLSP 202 (S) Introduction to the Analysis of Literature in Spanish (WS)**

This course is intended for students who are considering a major in Spanish, including those who have recently completed RLSP 105, 107, 200, 201 or 209. Using a textbook, *Aproximaciones al estudio de la literatura hispánica*, we will study the fundamentals of genre analysis while reading selected works of prose, poetry, and drama from Latin America and Spain. In addition to studying the principles and techniques of literary analysis, this course will continue to develop your speaking, writing, and reading comprehension skills with a particular emphasis on composition. Conducted in Spanish.

**Class Format:** Students are expected to be active participants at all scheduled class meetings, which will be used for discussion and collaborative
analysis of literary texts as well as workshopping student writing.

Requirements/Evaluation: Graded assignments will include three essays of five pages each as well as consistent preparation and class participation.

Prerequisites: RLSP 105, 107, 200, 209, or placement exam results indicating readiness for a 200-level course

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students who are considering the major in Spanish

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Each student will write and revise three essays of roughly give pages each. Feedback will be provided regarding grammar, style, and argument. On Fridays we will workshop student papers.

Spring 2025

SEM Section: 01 MWF 11:00 am - 11:50 am Jennifer L. French

RLSP 405 (S) Alternative American Literatures: From the Indigenous Chronicle to the Latin American & Chic. Novel (DPE) (WS)

Do the Americas have a common literature? If so, is it possible to trace their roots and continuity from the colonial era to the present? Literary critic Matin Lienhard suggests that it is indeed possible to trace the origin of a literature common to Latin America from the colonial era and into present by focusing on what he calls "alternative literatures"—literatures that relativize the importance of Europeanized and Creole literatures and valorize the richness of oral traditions in the Americas. Such literatures, he asserts, are closely tied to marginalized sectors of society. In this course, we will take Lienhard's concept of "alternative literatures" as a point of departure to pursue our own examinations of how these "alternative literatures" are constituted. While the primary aim of this course is to focus on the writings of Latin American authors, we will end by exploring the relationship between "alternative" Latin American literatures and Chicana/o/x literatures. Readings will include narrative texts such as Cartas de relación, chronicles of conquest, religious texts, indigenous annals, poetry, and drama, as well as contemporary Latin American and Chicana/o/x novels.

Requirements/Evaluation: Four essays, class presentations, active participation, and regular attendance required

Prerequisites: any 300-level RLSP course or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Senior Spanish Majors.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Each student will write four 4-6 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version.

Difference, Power, and Equity Notes: This course will highlight intellectual production of indigenous peoples of the Americas under Spanish colonial rule as well as the writings of more contemporary minority authors of Latin America. It will explore the new identities and textualities that emerge as a result of the encounter and subsequent conquest of the Americas. As such, students will gain critical skills to analyze a diversity of Spanish-American colonial texts from the 16th century as well as more contemporary narrative texts.

Spring 2025

SEM Section: 01 TF 1:10 pm - 2:25 pm Carlos Macias Prieto

RUSS 217 (S) Indigeneity Today: Comparative Indigenous Identities in the US and Russia (DPE) (WS)

Cross-listings: ANTH 217

Secondary Cross-listing

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and
Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapple with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigenities.

Requirements/Evaluation: 10 posts to the course Glow discussion page, 3 times leading class discussion on the assigned readings, 1 short presentation, 1 extended portfolio project with regular shorter and longer writing submissions, and 1 final paper and final presentation (as the final part of the portfolio).

Prerequisites: None

Enrollment Limit: 16

Enrollment Preferences: Majors and certificate-seekers in Russian, then majors in Anthropology and Sociology, and then Global Studies concentrators

Expected Class Size: 12-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
RUSS 217(D1) ANTH 217(D2)

Writing Skills Notes: This course has the following assignments: Weekly post to the Glow discussion page, 1 extended project with regular writing submissions, 1 final paper and final presentation. For the extended project, we will have instructor feedback for all project assignments. In instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed. There will also be peer feedback/review.

Difference, Power, and Equity Notes: In the course, students will learn about Indigeneity as a context-specific social formation. It understands Indigeneity as a category of difference with past and present importance. We will read about, discuss, and write about Indigeneity as a social category, along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.

RUSS 348  (F) Altering States: Post-Soviet Paradoxes of Identity and Difference  (DPE) (WS)

Cross-listings: GBST 348 / SOC 348

Secondary Cross-listing

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their post-socialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as Russia’s invasion of Ukraine, or the lingering tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Ukraine and Russia, but will also read comparative studies, as well as works on East Germany and Georgia. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the post-socialist condition.

Requirements/Evaluation: 5-page paper every other week, written comments on the partner’s paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 348(D2) RUSS 348(D1) SOC 348(D2)

Writing Skills Notes: This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

Difference, Power, and Equity Notes: Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

Fall 2024

TUT Section: T1  M 7:00 pm - 9:40 pm  Olga Shevchenko

SOC 252  (F)  lm/mobilities  (DPE) (WS)

Cross-listings: AMST 252 / AAS 252

Primary Cross-listing

We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic revealed, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move—or to stay still.

Requirements/Evaluation: Thoughtful and consistent class participation, several short reflection papers, two drafts of an opinion essay, class presentation

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Given to first-year students and sophomores, particularly those who have demonstrated an interest in AAS/SOC. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 252(D2) AAS 252(D2) SOC 252(D2)

Writing Skills Notes: Emphasis on the processes of writing and revising, several short papers on which students will receive close feedback, and drafts of a final written assessment

Difference, Power, and Equity Notes: This course explores a politics of im/mobilities: how we move through space through different bodies at the intersection of race, class, gender, ability, and citizenship. Students will use their own bodies as research sites for deepening their understanding of how we navigate the freedom to move or stay still.

Fall 2024

SEM Section: 01  MR 2:35 pm - 3:50 pm  Phi H. Su

SOC 291  (F)  Religion and Ecology in America  (WS)
This course examines the relationship between religious and environmental thought in American cultural history. Exploring a broad range of practices, stories, and beliefs, we will examine the spiritual roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have religious writers, thinkers, and artists shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biological theory, Buddhist eco-spirituality, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 291(D2) REL 291(D2) SOC 291(D2)

Writing Skills Notes: Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

Attributes: ENVI Humanities, Arts + Social Science Electives

SOC 348 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WS)

Cross-listings: GBST 348 / RUSS 348

Primary Cross-listing

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their post-socialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as Russia's invasion of Ukraine, or the lingering tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Ukraine and Russia, but will also read comparative studies, as well as works on East Germany and Georgia. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the post-socialist condition.

Requirements/Evaluation: 5-page paper every other week, written comments on the partner's paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
GBST 348(D2) RUSS 348(D1) SOC 348(D2)

**Writing Skills Notes:** This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

**Difference, Power, and Equity Notes:** Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

**Attributes:** GBST Russian + Eurasian Studies

**Fall 2024**

**TUT Section:** T1  M 7:00 pm - 9:40 pm  Olga Shevchenko

**STS 153 (S) Androids, Cyborgs, Selves (WS)**

**Cross-listings:** ENGL 153

**Secondary Cross-listing**

In this expository writing course, we will analyze and argue about how humanoid and partly human bodies appear in legend, fiction, and film. When are these bodies inviting? When are they threatening? How are they gendered, how are they raced, and why? Which technologies fit easily into human forms, and which are resistant? What do the persons who inhabit these near-human bodies desire? Students in this course will develop arguments in reply to these and related questions, developing 3 or 4 essays through multiple stages of planning, drafting, and revising. Because this is an expository writing seminar, we will spend half or more of our class time discussing and practicing writing skills.

**Requirements/Evaluation:** several response papers (500 words); three or four essays (1200-1500 words, in multiple drafts); class participation

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** See details for ENGL 100-level courses on English Department Website.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**
STS 153(D2) ENGL 153(D1)

**Writing Skills Notes:** This expository writing course is dedicated to facilitating real improvement in students' written argumentative work. Students will write and revise response papers and 5-page essays (in multiple drafts) over the course of the semester, receiving substantial instructor feedback. Students will practice: drafting, revising, and responding to critique; writing appropriately for given occasions and audiences; grounding their writing in close, analytical reading; and acknowledging sources.

**Spring 2025**

**SEM Section:** 01  TR 8:30 am - 9:45 am  Ezra D. Feldman

**STS 212 (F) Ethics and Reproductive Technologies (WS)**

**Cross-listings:** WGSS 212 / PHIL 212

**Secondary Cross-listing**

In her groundbreaking book, The Tentative Pregnancy, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace—or to let us think we can replace—chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as contraception, abortion, in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, uterine
transplants, and "artificial wombs." Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

**Class Format:** discussion

**Requirements/Evaluation:** active participation in class discussions, three or four short reflection papers, and two longer papers (5-7 and 7-10 pages)

**Prerequisites:** none, but introductory-level course in PHIL and/or WGSS recommended

**Enrollment Limit:** 19

**Enrollment Preferences:** WGSS and PHIL majors (declared or prospective), PHLH and STS concentrators (declared or prospective)

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** meets Contemporary Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 212(D2) PHIL 212(D2) STS 212(D2)

**Writing Skills Notes:** Students will write periodic short papers (2-3 pages each), a midterm paper (5-7 pages) and a final paper (7-10 pages). Short papers focus on concepts, arguments, and writing skills needed in the midterm and final papers, in which students are expected to describe and evaluate arguments from assigned readings, and to present clear and effective arguments in support of their own ethical positions. Students receive feedback on all papers and have the opportunity to revise midterm and final papers.

**Attributes:** PHIL Contemporary Value Theory Courses PHLH Bioethics + Interpretations of Health

---

**STS 305 (F) Environmental Political Thought (WS)**

**Cross-listings:** PSCI 305

**Secondary Cross-listing**

In the face of planetary crisis, it is as difficult as it is crucial to find the time and calm "to think what we are doing" (Hannah Arendt's famous line). This course aims to hold space for that thinking; to collaboratively find the presence of mind to take the measure of the doings that caused, and that may redress, the awful reality of earth's degradation. To do so, we will read, discuss, and write about some of the most significant book-length works of environmental political thought published in the last five years. These books conceptualize and intervene into the politics of phenomena such as climate change, species depletion, toxic pollution and (a special interest of the instructor) waste by applying--and sometimes reinventing--approaches from political theory, political economy, science & technology studies, philosophy, and critical theory. They consider the enmeshment of environmental problems with racism, colonialism, economic inequality, and speciesism, among other modalities of power, and weigh the promise of political action and organization to reconstitute relationships among earth's human and more-than-human elements. By interpreting, evaluating, applying and extending the arguments of these books in discussion and writing, students will be challenged to scrutinize their preconceptions and develop, support and articulate original arguments about politics and the environment.

**Requirements/Evaluation:** Four mini-essays of 2-3 pages each; one final paper of 7-10 pages that incorporates substantially revised material from at least one mini-essay; class participation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Political theory concentrators, Political Science majors

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 305(D2) STS 305(D2)

**Writing Skills Notes:** Students will discuss and fine-tune their writing processes in class and office hours. Students will be given written feedback on mini-essays, with particular attention to developing a sense of voice and purpose in written argumentation. This feedback will support their revision of
at least one mini-essay as part of writing the final paper.

**Attributes:** PSCI Political Theory Courses

**STS 319 (S)  Neuroethics  (WS)**

**Cross-listings:** PSYC 319 / NSCI 319

**Secondary Cross-listing**

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of “abnormal” personality; the use of “cosmetic pharmacology” to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

**Requirements/Evaluation:** six 5-page position papers and five 2-page response papers as well as participation in discussions

**Prerequisites:** PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Psychology majors and Neuroscience concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 319(D3)  STS 319(D2)  NSCI 319(D3)

**Writing Skills Notes:** In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Spring 2025

**STS 373 (S)  Technologies of Race  (DPE)  (WS)**

**Cross-listings:** AMST 372 / AFR 374

**Secondary Cross-listing**

This course is an introduction to theories, methods, sources, and approaches for interdisciplinary research and creativity in and through the interdisciplinary field of American Studies. We will focus on the intersection of race, gender, sexuality, and disability with modern media technologies, from early photography in the mid-19th century to contemporary trends in machine learning and artificial intelligence. Through a process of shared inquiry, course participants will investigate the ways that historical legacies of oppression and futuristic speculation combine to shape human lives in the present under racial capitalism. Whether analyses of the automation of militarized border control in Texas, or of the ways that obsolete, racist concepts are embedded in machine vision and surveillance systems, the readings in the course will chart out the key moments in the co-evolution of race and technology in the Americas. Students will gain a working competence in all four tracks of the American Studies major (Space and Place; Comparative Studies in Race, Ethnicity, and Diaspora; Arts in Context; and Critical and Cultural Theory). Finally, we will also explore alternative paths toward a future where technology might help to effect the abolition of oppressive structures and systems, rather than continue to perpetuate them.

**Requirements/Evaluation:** Four papers, in-class writing/reflective work, and a final exam.

**Prerequisites:** none
Enrollment Limit: 16
Enrollment Preferences: AMST majors or prospective majors.
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 372(D2) STS 373(D2) AFR 374(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to contextualize technologies historically and in relation to one another, with attention to their entanglements with racial discourses and racism. Students gain critical skills that equip them to imagine possible futures where technologies serve increasingly as abolitionist tools.

THEA 239  (F) Introduction to Dramaturgy: The Art & Practice of Storytelling  (WS)
The dramaturg is a storyteller and major collaborator in theatre. Working as part of an artistic ensemble, the dramaturg helps to tell a story, shape a theatrical production, and facilitate the rewarding process of creating a world on stage. This seminar/studio course will introduce students to the fundamentals of dramaturgy, including: new play development, production research, literary management, educational outreach, criticism/journalism, community engagement, and translation/adaptation. Assignments over the term will be hands-on, practical, creative, and project-based and include independent writing, research, and oral presentation. We will write, and we will revise. We will also read plays and discuss urgent topics in the theatre industry. During some terms, students may be invited to participate as dramaturgs on Theatre Department productions. As a culminating project, students will complete a creative written adaptation and accompanying dramaturgical casebook for a source of their choosing. Students may be asked to attend live performances and exhibitions when relevant.

Class Format: This is a studio course with a strong emphasis on writing and research, both critical and creative.

Requirements/Evaluation: Assignments will be project-based and will range from making image galleries to writing program notes and an educational study guide. In-class writing and participation in class discussion is required. A major project over the term will include the formation and assembly of a dramaturgy casebook, including: research and historical summary; timeline; artist's bio; educational guide; image gallery; program note; community outreach strategy; lobby design; critical/theoretical perspective; and creative adaptation.

Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: if overenrolled, preference will be given to declared Theatre majors followed by prospective Theatre majors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)  (WS)

Writing Skills Notes: This course fulfills the Writing Intensive distribution by requiring students to write for both public audiences and more internal-facing communities. Students will write several short critical pieces intended for lobby displays, programs, educational settings, and more journalistic venues. In addition, they will write and develop a short creative adaptation. All writing will receive feedback from both the instructor and class peers prior to its required revision.

Fall 2024
STU Section: 01    MW 11:00 am - 12:15 pm     Amy S. Holzapfel
THEA 266 (F) Introduction to Playwriting (WS)

Are you tired of the classics? Were you frustrated by casting choices in the past? Have you struggled to find a play to direct? Sometimes, you must step away from the canon and create your own work. Do you have something to say about race, gender, ethnicity, nationalism, yourself, and the Other? Do you have a story to tell? Did you ever want to write your own play but didn't know how to start? This is your chance. In this course, you will participate in a series of workshops that will lead to the writing of your first play. You will be guided through the principles of playwriting, beginning with understanding the basics: plot, character, dialog, setting, and theatricality. The mechanics of playwriting will be enhanced by a theoretical understanding of the concepts of genre, style, and aesthetics. Every week, your homework will be to write new dialogs, leading to the first draft of your first play. In class, students are expected to read each other's work aloud and, on occasion, to stage it. By the end of the semester, having brought at least one play into the world, you will not become an experienced playwright, but you will be well on your way to understanding the foundations of the craft. This course culminates with a festival of public staged readings of original student work.

Requirements/Evaluation: Participation; in-class workshops; and students are expected to write several graded drafts of two ten-minute plays and a single one-act play.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: In instance of over-enrollment, preference will be given to Seniors, Juniors, & Sophomores in the Theatre Major.

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Course is based on original composition and supervised revision of multiple texts.

Fall 2024
STU Section: 01 R 1:10 pm - 3:50 pm

THEA 340 (F) Shakespeare on Page, Stage and Screen: Text to Performance (WS)

Cross-listings: ENGL 345 / COMP 343

Primary Cross-listing

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns--with matters of gender, sexuality, race, class, or materiality, for instance--against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the texts in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing. At the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will read six plays, of different genres and written at different periods of Shakespeare's career. These will likely be Romeo and Juliet, Henry V, Twelfth Night, Hamlet, The Tempest, and A Midsummer Night's Dream. Close reading of the texts will be the priority, but we will also attend to the demands and opportunities of performance, and assess a range of recent film and stage productions.

Requirements/Evaluation: Three papers ranging from 4 to 7 pages; regular Glow posts; class participation.

Prerequisites: A THEA course; a 100-level ENGL course; a score of 5 on the AP Literature exam or a 6 or 7 on the IB exam; or permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors or prospective majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 345(D1) THEA 340(D1) COMP 343(D1)

Writing Skills Notes: Three papers rising from 4 to 6+ pages; regular discussion board postings and several short response papers. Students will receive substantive feedback on their writing, and there will be opportunities for revision.

Attributes: ENGL Literary Histories A
WGSS 101  (F)(S)  Introduction to Women's, Gender & Sexuality Studies  (DPE) (WS)
This course is designed to initiate you into the pleasures, pains and perplexities of critical thinking about gender and the situations of women across the globe. We will survey a wide variety of writers and issues—historical and contemporary, theoretical and practical. Above all, the course is intended as an exploration of the tremendous diversity of thought contained under the general rubrics of feminist and gender studies and a vehicle for developing skills in writing and research as well as analytical tools for further work in the field. The goal is not to bring about a specific point of view, but rather to learn to analyze issues critically using the methods and frameworks that feminist theory and queer theory have developed as academic disciplines.

Class Format: Mix of lectures and seminars

Requirements/Evaluation: Participation during class and in online forums, weekly reading responses, two short essays with revisions, and a final research paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS majors and potential WGSS majors

Expected Class Size: 19

Grading:  yes pass/fail option,  yes fifth course option

Unit Notes: required course for the Women's, Gender and Sexuality Studies major

Distributions:  (D2)  (DPE) (WS)

Writing Skills Notes: This course requires significant attention to the craft of writing. Essential to this craft is the process of editing and rewriting materials with feedback from peers and professors. Students are expected to focus on improving analytical skills, critical thinking, and argumentation through attention to the writing process. They are also expected to give meaningful critical feedback on the writing of their peers.

Difference, Power, and Equity Notes: This course meets the DPE requirement because it asks students to reflect critically on issues of gender and sexuality around the world in a comparative contextual framework. Students will be asked in seminar space to discuss the operation of difference and power within as well as across different gender, class, racial, and sexual identities while learning in lecture meetings about feminist and queer studies' history, activism, and theory.

WGSS 105  (F)  American Girlhoods  (DPE) (WS)

Cross listings: ENGL 105

Secondary Cross-listing

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 105(D2) ENGL 105(D1)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

Fall 2024
SEM Section: 01    TF 2:35 pm - 3:50 pm     Kathryn R. Kent

WGSS 113  (F)  The Feminist Poetry Movement  (DPE) (WS)
Cross-listings:  AMST 113 / ENGL 113
Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation:  two-three short analysis papers, creative (1-2 pages), curated final project (archival exhibit and digital project), presentations

Prerequisites: none

Enrollment Limit: 19
Enrollment Preferences:  first years
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 113(D2) ENGL 113(D1) WGSS 113(D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: two to three four-to-five-page graded papers, one creative assignment, and a final digital research project (8-10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.
Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

WGSS 152 (F) The Fourteenth Amendment and the Meanings of Equality (DPE) (WS)

Cross-listings: HIST 152

Secondary Cross-listing

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

Requirements/Evaluation: a series of short (3-page) response papers; and a final 10-12 page research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: given first to sophomores who have been dropped from this class previously, then to first-years, then to sophomores who have not been dropped previously

Expected Class Size: 15-19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 152(D2) HIST 152(D2)

Writing Skills Notes: Students will write three short (3-page) response papers to the readings in the first part of the semester, and will also write a substantial (10- to 12-page) research paper. In preparation for the research paper, students will write proposals, develop bibliographies, write outlines and drafts, and do peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

WGSS 212 (F) Ethics and Reproductive Technologies (WS)

Cross-listings: PHL 212 / STS 212

Secondary Cross-listing

In her groundbreaking book, The Tentative Pregnancy, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother-child bond, and to replace--or to let us think we can replace--chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and
development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as contraception, abortion, in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, possibly including pre-implantation genetic diagnosis (PGD), post-menopausal reproduction, uterine transplants, and "artificial wombs." Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.

Class Format: discussion

Requirements/Evaluation: active participation in class discussions, three or four short reflection papers, and two longer papers (5-7 and 7-10 pages)

Prerequisites: none, but introductory-level course in PHIL and/or WGSS recommended

Enrollment Limit: 19

Enrollment Preferences: WGSS and PHIL majors (declared or prospective), PHLH and STS concentrators (declared or prospective)

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: meets Contemporary Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 212(D2) PHIL 212(D2) STS 212(D2)

Writing Skills Notes: Students will write periodic short papers (2-3 pages each), a midterm paper (5-7 pages) and a final paper (7-10 pages). Short papers focus on concepts, arguments, and writing skills needed in the midterm and final papers, in which students are expected to describe and evaluate arguments from assigned readings, and to present clear and effective arguments in support of their own ethical positions. Students receive feedback on all papers and have the opportunity to revise midterm and final papers.

WGSS 284 (F) From the Battlefield to the Hermit's Cell: Art and Experience in Norman Europe (WS)

Cross-listings: REL 284 / ARTH 218

Secondary Cross-listing

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans--a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries--each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects--an embroidery, a building, and a book--give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.

Requirements/Evaluation: Participation in discussion; five 4-5-page tutorial papers; five 1-2-page response papers.

Prerequisites: None

Enrollment Limit: 10
Enrollment Preferences: First years and sophomores, but open to all.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 284(D2) REL 284(D2) ARTH 218(D1)

Writing Skills Notes: In this tutorial, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 5-7-page papers they will submit, with suggestions for improvement.

WGSS 402 (F) Marxist Feminisms: Race, Performance, Labor (DPE) (WS)

Cross-listings: AMST 402 / AAS 402

Secondary Cross-listing

This seminar provides an overview of queer, black and women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, including Capital Volume I, we will examine a range of social positions and modes of extraction that complicate Marx’s emphasis on the white male industrial factory worker. Every week, we will focus on texts that foreground conditions of reproduction, racial slavery, care and domestic work, indentured servitude, immigrant labor, land expropriation, and sex work among others. Throughout the seminar and specifically at the close of it, we will turn to critical perspectives and aesthetic practices that not only respond to these conditions but also incite new social relations and ways of being in the world. As such, this seminar will equip students with critical understandings of how racial capitalism has fundamentally relied on the mass elimination, capture, recruitment, and displacement of different racialized, gendered, and abled bodies in and beyond the U.S. as well as how the capitalist system of value and life under these conditions can and must be undone and reimagined.

Requirements/Evaluation: in-class participation, presentation, weekly posts, paper, and final project (paper, community resource distribution proposal, and creative project options)

Prerequisites: AMST 101, AMST/AAS 125, or similar courses

Enrollment Limit: 12

Enrollment Preferences: AMST and WGSS juniors and seniors, AAS concentrators

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 402(D2) AAS 402(D2) WGSS 402(D2)

Writing Skills Notes: In addition to weekly posts, students will engage a longer process of writing and sharing a presentation paper with the class, give/receive feedback, and submit a revised paper.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement as it explores difference, power, and equity by asking how racial, gendered, sexual, and class differences are produced, whose voices are centered and whose are excluded, and what forms of labor are valued/devalued over others.

WGSS 428 (S)  Relationality and Its Antagonisms  (DPE) (WS)

Cross-listings:  AFR 396 / AMST 428

Secondary Cross-listing

Relationality has been the defining approach, feature, and framework of ethnic studies since its inception in the late 1960s. Since then, notable scholars have applied multiple keywords, including difference, comparison, entanglements, cacophonies, and intimacies, to emphasize how processes of racialization and racial formation are not isolated and separate but inextricably linked and shaped by one another. Only from these distinct, uneven, yet shared positions of oppression, as scholars argue, solidarity across race, gender, class, sexuality, and location may emerge. At its crux, this seminar will underscore major tensions and antagonisms against frameworks of relationality. Tracing primary sources, cultural expressions, and literature within the traditions of ethnic studies and transnational/women of color feminisms, it will trace the shifts in approaches to relationality, especially as it relates to practices of reciprocity and community-building across difference. At the same time, it will turn to works that name relationality as what Frank B. Wilderson calls a "ruse," or trick, that subsumes the specific, exceptional position of blackness. Our units will include discussions of Afro-Pessimism, indigeneity, racialized settler colonialism as well as queer theory debates on queer presentism (i.e., a queer "no future") versus queer futurity. Studying the tensions that emerge from multiple, distinct, and contradictory planes of power, oppression, and temporalities, how do we assess, work through, and reconcile, if at all, relations deemed as "irreconcilable" across vectors of difference?

Requirements/Evaluation:  in-class participation, paper presentation, peer feedback, writing webs (short series of writing exercises), and final project developed from original research and/or creative work

Prerequisites:  AMST 101 or WGSS 101

Enrollment Limit:  12

Enrollment Preferences:  AMST and WGSS seniors and juniors

Expected Class Size:  12

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 396(D2) AMST 428(D2) WGSS 428(D2)

Writing Skills Notes:  Students will regularly engage in a series of writing exercises and submit a longer paper presentation that will be peer reviewed and revised.

Difference, Power, and Equity Notes:  The main objective of the course is to study and assess ethnic studies' approaches to questions of difference, particularly as it relates to theories of racialization and relationality across multiple nodes of power and oppression.

WGSS 475 (S)  Dreaming Latina/x Feminist Disability Studies  (DPE) (WS)

Cross-listings:  LATS 475 / AMST 413

Secondary Cross-listing

In this course we will defy the traditional notion that disabled and queer people of color have no right to future dreams, as we collectively imagine how the emergent field of Latina/x feminist disability studies might take shape. What are the sites of focus, methods, and political commitments of Latina/x feminist disability studies? Where is the power in meaningfully uniting an analysis of disability to one of sexuality and gendered Latinidad? How does a Latina/x-centric approach productively inform our understanding of disability? What is the political potential of Latina/x feminist disability studies -- not exclusively as a set of theories, but also as a mindset and an everyday call to action? If we were to collectively compose a manifesto for Latina/x feminist disability studies, what might it contain? How might we actively cultivate a community of care in the classroom as well as other spaces at Williams? Just what might Latina/x feminist disability justice dreams look like? How might Latina/x feminist disability justice dreams feel? Feminist, queer, and disabled crip-of-color scholars have recently called for a more meaningful engagement with race in feminist disability studies. Simultaneously, we have also witnessed a small but steady growth in the amount of Latinx studies scholarship that thoughtfully integrates questions of disability. This interdisciplinary course responds to these important shifts in its focus on a series of topics bridging Latinx studies, gender studies, queer studies, crip studies, and critical disability studies. These include but are not limited to the body, the environment, temporality, labor, citizenship,
dependency, and visibility/invisibility. Through these topics, we will explore the ways in which the different approaches to these specific issues across Latinx, critical disability, crip, queer and gender studies are in fruitful conversation with one another -- and sometimes even at odds -- as we actively interrogate the intersections of gender, race, ethnicity, sexuality, and disability within the everyday.

Requirements/Evaluation: Major assignments for this course include a semester-long independent research paper (15-20 pages) broken up into steps, participation in crafting the class manifesto, a semester-long collaborative artistic exercise, and a final reflection document (3-4 pages).

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Priority given to LATS concentrators by seniority, followed by WGSS and AMST majors by seniority.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Lab fee: $200 for art supplies per student

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 475(D2) LATS 475(D2) AMST 413(D2)

Writing Skills Notes: We focus on building writing and interdisciplinary research skills, with a particular emphasis on the processes of research, revision, and collaborative writing. The primary research paper (an independent project of 15-20 pages) is divided into stages, and students are required to revise and resubmit their work at various junctures in the research process. The written class manifesto requires students to compose a document together, revising their work as a group over the course of the semester.

Difference, Power, and Equity Notes: This course privileges an intersectional analysis regarding questions of race, ethnicity, gender, sexuality, and disability. It obligates students to consider how these categories of different actively work in tandem with one another in everyday US Latina/x and transnational (US-Latin America and the Caribbean) contexts. This seminar also underscores how these categories of difference are actually products of a given historical and political moment.
