AFRICANA STUDIES (Div II)
Chair: Professor Rhon Manigault-Bryant

- Messias Basques, Mellon Postdoctoral Fellow in Africana Studies
- Rashida K. Braggs, Professor of Africana Studies and Faculty Affiliate in Comparative Literature
- VaNatta S. Ford, Assistant Professor of Africana Studies
- Alexis P. Gumbs, Sterling Brown ’22 Visiting Professor of Africana Studies
- Atiya Husain, Associate Professor of Africana Studies
- James A. Manigault-Bryant, Chair and Professor of Africana Studies and Faculty Affiliate in Anthropology and Sociology and Religion; affiliated with: Africana Studies, Religion, Anthropology & Sociology
- Rhon S. Manigault-Bryant, Professor of Africana Studies and Faculty Affiliate in Religion
- Christopher O. Ndubuizu, Mellon Postdoctoral Fellow in Africana Studies
- Neil Roberts, Associate Dean of the Faculty, John B. McCoy and John T. McCoy Professor of Africana Studies and Faculty Affiliate in Political Science and Religion; affiliated with: Dean of the Faculty’s Office, Africana Studies, Religion, Political Science
- Armond R. Towns, Associate Professor of Africana Studies

GENERAL DEPARTMENT DESCRIPTION

Africana Studies is an interdisciplinary field of study that emerged from the freedom movements of the 1960s. At its core, Africana Studies seeks to expand knowledge of Black experiences in the broadest sense. It also intervenes in discourses that omit Black experiences or seek to ignore, suppress, and de-center the long history of global, anti-Black oppression. Our introductory course is open to non-majors including first-year students, who are especially encouraged to enroll. Our elective courses are open to students who meet the requirements or prerequisites specified in the course description. The senior level seminar may be open to nonmajors with permission of the instructor.

The Africana Studies Department builds knowledge about communities throughout the African Diaspora by way of interdisciplinary analyses of Black experience—which may take the form of cultural expressions in theater, literature, music, and religion; political strivings and imaginations; displacement and annihilation under environmental distress; and representations in, and creations of, new technologies. Several learning objectives unify our teaching in Africana Studies:

- to introduce students to the content and contours of Africana Studies as a long-standing and vibrant field of knowledge;
- to disrupt the peripheral placement of peoples of African descent in traditional disciplines by using interdisciplinary methods to center their histories, experiences, and perspectives;
- to illuminate the vast range, power, and influence of Black cultural productions;
- to parse out the deep roots of grassroots activism that dismantles innumerable manifestations of anti-Black racism both within and beyond communities of African descent;
- to understand rich intersections of race, gender, class, and sexuality, both historically and in contemporary societies.

THE CONCENTRATION IN AFRICANA STUDIES

***NOTE: only eligible for students who matriculated prior to fall 2023

Candidates for a concentration in Africana Studies must complete at least five courses listed as Africana courses [note: many Africana courses are cross-listed with departmental offerings; all these are considered Africana Studies courses and can be used to count both for the concentration and for the departmental major of which they are a part]. Two of these five courses are required courses that every concentrator takes. They are the introductory course, AFR 200, normally taken in the first and second years, but open to all students; and an Africana capstone Senior seminar, normally taken in the senior year, but also open to others at the Professor's discretion. Additional courses may be taken either with faculty in Africana Studies or with faculty and visiting professors affiliated with the department. However, at least one of these three additional courses must be listed as a “Core Elective;” all “Core Electives” are designated below. We also encourage students to take at least one course in an academic unit other than Africana Studies and consider an experiential learning winter study session. Concentrators are expected to meet with the Chair and/or an Africana Studies faculty member to plan their concentration.

REQUIREMENTS

Africana Studies courses required for the concentration:
AFR 200 Introduction to Africana Studies

and one of the following two AFR 400-level Senior Seminar capstone courses (not all 400-level courses meet the requirement for the concentration):

AFR 440(F) CAPSTONE: Performing Blackness

AFR 405(S) CAPSTONE: Africana Studies and the Disciplines

One core elective: Listed as “Core Elective” below

AFR 110 / WGSS 111 SEM Television, Social Media, and Black Women 'Unscripted'
   Taught by: TBA
   Catalog details
AFR 128 / COMP 129 / MUS 179(S) TUT James Baldwin's Song
   Taught by: Rashida Braggs
   Catalog details
AFR 135 / AMST 135 SEM Queen Sugar and Black Study
   Taught by: James Manigault-Bryant
   Catalog details
AFR 190(S) SEM Introduction to Afro-Latin American Studies
   Taught by: Messias Basques
   Catalog details
AFR 200(F, S) LEC Introduction to Africana Studies
   Taught by: Armond Towns
   Catalog details
AFR 202 / WGSS 206 / COMP 236(S) TUT Narrating Color: Black Women Sing and Write About Complexion
   Taught by: VaNatta Ford
   Catalog details
AFR 205 / WGSS 207 TUT She Speaks in Color: Examining the ‘Color Complex’ in Toni Morrison’s Writings
   Taught by: Meredith Coleman-Tobias
   Catalog details
AFR 208 / AMST 208 / REL 262 TUT Time and Blackness
   Taught by: TBA
   Catalog details
AFR 211 / AMST 211 / ENVI 211 / SOC 211 LEC Race, Environment, and the Body
   Taught by: TBA
   Catalog details
AFR 221 / REL 263(F) SEM Giving God a Backbeat: Rap Music, Religion & Spirituality
   Taught by: VaNatta Ford
   Catalog details
AFR 252 / GBST 252 / AMST 255(S) LEC Patterns of African Diasporas to the U.S.
   Taught by: Christopher Ndubuizu
   Catalog details
AFR 255 / SOC 255 / ENVI 256 / AMST 257(F) LEC Race, Environment, and the Body
   Taught by: Christopher Ndubuizu
   Catalog details
AFR 265(F) SEM Afrodiasporic Communities: Marronage, Quilombismo, and Black Towns
   Taught by: Messias Basques
   Catalog details
AFR 291(F) LEC Africana Studies Approaches to AI
   Taught by: Armond Towns
   Catalog details
AFR 302(S) SEM Complexion Complexities: Colorism in Literature, Lyrics & Everyday Life
   Taught by: VaNatta Ford
   Catalog details
AFR 317 / AMST 317 / DANC 317 / ENGL 317 / THEA 317 / COMP 319 SEM Black Migrations: African American Performance at Home and Abroad
   Taught by: Rashida Braggs
   Catalog details
AFR 320 / AMST 320 / WGSS 320 SEM Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture
   Taught by: TBA
   Catalog details
AFR 321(F) SEM Trending Black: Race & Social Media in the 21st Century
   Taught by: VaNatta Ford
   Catalog details
AFR 323 / ARTH 223 / COMP 322 / AMST 323 / ENGL 356(S) SEM Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora
THE MAJOR IN AFRICANA STUDIES

The major in Africana Studies is designed to accommodate breadth and depth of study. The breadth of one’s journey is achieved by way of a shared general study through three “routes” that every major travels through—1) theories, methods, and poetics; 2) culture, performance, and popular technologies; and 3) Black landscapes. The depth of one’s journey is accomplished by way of self-initiated learning within or among any of the routes. Candidates for a major in Africana Studies must complete a minimum of nine courses as outlined below:

(1) Core Courses. Majors are expected to take a preferred sequence of three (3) courses:
   a. AFR 200: Introduction to Africana Studies, usually taken no later than the fall of the sophomore year;
   b. One 300-level seminar or tutorial designated as a “Core Elective,” usually taken during the junior year;
   c. One 400-level seminar designated as the “Capstone” and usually taken during the senior year.

(2) Electives: Majors are expected to take six (6) additional electives to support their grounding in Africana Studies.
   a. Three (3) of the six electives must be “Core Electives” and must be equally distributed among the three routes so that all majors will take a minimum of one course in each area. No more than two of these three Core Electives can be at the same course level.
   b. The remaining three electives can be “Core Electives” and/or “Electives” in any combination, ideally driven by the student’s area(s) of interest. The three routes are as follows:
      1. Theories, Methods, and Poetics: courses within this route will engage theoretical and philosophical concerns within the field, the methodologies that inform our understanding of Africana experiences, and the discourses that have shaped them. Core Elective Courses include:
AFR 170(F) LEC What is Race in Black Studies?
     Taught by: Atiya Husain
Catalog details
AFR 205 / WGSS 207 TUT She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings
     Taught by: Meredith Coleman-Tobias
Catalog details
AFR 387 SEM Love is Lifeforce: June Jordan's Living Room
     Taught by: Alexis Gumbs
Catalog details
AFR 388 SEM "The Black Unicorn: Audre (Lorde) as Avatar"
     Taught by: TBA
Catalog details
AFR 405 SEM CAPSTONE: Africana Studies and the Disciplines
     Taught by: James Manigault-Bryant
Catalog details
AFR 410(S) SEM CAPSTONE: Black Epistemologies
     Taught by: Atiya Husain
Catalog details
AMST 372 / STS 373 / AFR 374(S) SEM Technologies of Race
     Taught by: Brian Murphy
Catalog details
AMST 428 / AFR 396 / WGSS 428(S) SEM Relationality and Its Antagonisms
     Taught by: Kelly Chung
Catalog details
PSCI 251 / AFR 258(S) SEM Thinking and Acting Politically in the Long Civil Rights Movement
     Taught by: Da'Von Boyd
Catalog details
PSCI 361 / AFR 364 SEM Black Political Thought
     Taught by: Da'Von Boyd
Catalog details

2. Culture, Performance, and Popular Technologies: courses within this route explore music, the arts, and performance, and many will examine future directions of the field and the technologies that inform those directions. Core Elective Courses include:

AFR 110 / WGSS 111 SEM Television, Social Media, and Black Women 'Unscripted'
     Taught by: TBA
Catalog details
AFR 111 / DANC 111 SEM Afro-Modern Dance I: Theory & Practice (Dunham Technique)
     Taught by: Saroya Corbett
Catalog details
AFR 135 / AMST 135 SEM Queen Sugar and Black Study
     Taught by: James Manigault-Bryant
Catalog details
AFR 19 SEM Black Storytelling From Page To Stage
     Taught by: TBA
Catalog details
AFR 202 / WGSS 206 / COMP 236(S) TUT Narrating Color: Black Women Sing and Write About Complexion
     Taught by: VaNatta Ford
Catalog details
AFR 221 / REL 263(F) SEM Giving God a Backbeat: Rap Music, Religion & Spirituality
     Taught by: VaNatta Ford
Catalog details
AFR 245 / DANC 220 SEM Dancing with the Hips, Butt, and Pelvis: Dangerous Bodies and Community Traditions
     Taught by: Saroya Corbett
Catalog details
AFR 249 / GBST 249 / AMST 250 SEM Penning the Path: Writing and Publishing Black Studies
     Taught by: Messias Basques
Catalog details
AFR 291(F) LEC Africana Studies Approaches to AI
     Taught by: Armond Towns
Catalog details
AFR 302(S) SEM Complexion Complexities: Colorism in Literature, Lyrics & Everyday Life
     Taught by: VaNatta Ford
Catalog details
AFR 317 / AMST 317 / DANC 317 / ENGL 317 / THEA 317 / COMP 319 SEM Black Migrations: African American Performance at Home and Abroad
Taught by: Rashida Braggs
Catalog details

Taught by: Saroya Corbett
Catalog details

3. **Black Landscapes**: these courses critically examine the ways that race, belief, identity, subjectivity, power, and/or embodiment are informed by conceptualizations of space, geography, literature, and/or history. Core Elective Courses include:

AFR 238 / ANTH 238 / GBST 238 SEM Black Voices in Anthropology
Taught by: Messias Basques
Catalog details

AFR 247(F) LEC Circa 1492: A Black Studies Perspective
Taught by: Atiya Husain
Catalog details

AFR 385(S) SEM Assata Shakur and the War on Terror
Taught by: Atiya Husain
Catalog details

AMST 412 / AFR 394 / STS 412 SEM Cold War Archaeology
Taught by: Brian Murphy
Catalog details

ENGL 238 / AFR 260(F) SEM 1930s Black Literature
Taught by: Ricardo A Wilson
Catalog details

ENVI 231 / AFR 231 / STS 231 SEM Africa and the Anthropocene
Taught by: TBA
Catalog details

**ADVISING**

All majors will be assigned a faculty advisor, typically the department chair. Majors must meet with their advisor during the first week of classes during the fall semester and at the time of the spring semester registration period in order to plan their journey through the major. Concentrators are expected to meet with the chair and/or an Africana Studies faculty member to plan their concentration. Students are encouraged to talk at any time with the department chair or other Africana Studies faculty about the major/concentration.

**THE DEGREE WITH HONORS IN AFRICANA STUDIES**

The Honors trajectory is reserved for students who wish to conduct advanced research and study. A student wishing to earn honors must complete an “Honors Dossier” during the Winter Study term and Spring semester of their Senior Year. This Dossier is comprised of three linked essays. Students may begin the project with two essays written for Africana Studies courses and, under their advisor’s guidance complete additional research, incorporate instructor feedback, and substantially re-write and expand these two papers. The third essay must be a new work, written specifically for the Honors project. Students must also write a substantive introduction that explains the theme (theoretical, geographic, chronological etc.) that connects the three essays. The introduction should address the significance of the theme to the interdisciplinary study of the peoples and cultures of the African diaspora. It should also explain the logic of the three papers and how they work together. Dossiers will be due in mid-April (after Spring Break). Under some circumstances, a student may want to include a record of a performance or piece of visual art in the Dossier. In this case,
A written analysis and explanation should accompany that piece. The total Honors Dossier should consist of no less than 45 pages of written work.

Students should submit a proposal for an Honors Dossier in the fall semester of their Senior year, no later than mid-October. They may draw on papers written in Africana courses during any semester including the fall semester of their Senior Year. Students may petition to include a paper written for a course outside of the Africana curriculum. Africana faculty will meet late in the fall semester to approve or decline Honors Dossier proposals. Students whose proposals are approved will be assigned an advisor and should register for W31-AFR 494 in the winter study/spring of the Senior Year.

At the Honors presentation night in the spring, each Honors student will prepare and give an oral defense of their dossier. During the defense, students will present the key points their overarching project and field questions from select faculty and student critics, all of whom will have read the dossier.

**Study Away from Williams**

We encourage students to pursue cross-cultural comparative studies. A major/concentration in Africana Studies can be combined with study away from Williams for a semester or a year if plans are made carefully. Many courses that will be approved for college credit may also count toward the major/concentration if their subject matter is explicitly connected to Africana culture. Students planning to be away in the junior year should ideally have taken AFR 200: Introduction to Africana Studies before they leave. Students should consult as early as possible with the chair or their advisor about their plans for fulfilling the requirements of the major.

**Electives**

**AFR 104 (S) Race and a Global War: Africa during World War II**  (DPE) (WS)

**Cross-listings:**  GBST 104 / HIST 104

**Secondary Cross-listing**

This course highlights African experiences of World War II. Although most histories have excluded Africa’s role in the war, the continent and its people were at the center of major developments during this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war’s impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

**Requirements/Evaluation:** active participation in discussion, map quiz, 2 reading responses, and 3 essays (of about 5 pages)

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 104(D2) HIST 104(D2) AFR 104(D2)

**Writing Skills Notes:** Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course explores the colonial relationship during a major global crisis. Students will examine existing
narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

**Attributes:** AFR Core Electives  GBST African Studies  HIST Group A Electives - Africa

**Not offered current academic year**

**AFR 110  (F)  Television, Social Media, and Black Women 'Unscripted'**

**Cross-listings:** WGSS 111

**Primary Cross-listing**

Nene Leaks, Issa Rae, Zendaya, Oprah Winfrey, Lavern Cox and Joy Reid have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

**Requirements/Evaluation:** class participation, podcast, vlogs, 10-page paper, and a formal class presentation

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** First year Students

**Expected Class Size:** 13

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

**Attributes:** AFR Core Electives  AFR Culture, Performance, and Popular Technologies  FMST Core Courses

**Not offered current academic year**

**AFR 111  (F)  Afro-Modern Dance I: Theory & Practice (Dunham Technique)**

**Cross-listings:** DANC 111

**Primary Cross-listing**

Modern African diasporic dance creates a conversation between the past and the present; it brings forth memories of the African "homeland" and of the dispersal of African bodies around the world, while simultaneously engaging the current joys, pains, challenges, and cultural growth of Black people. Through movement and rhythm, dancers experience the embodied knowledge of previous generations, while connecting to contemporary cultural, political, and economic realities. Katherine Dunham devoted her life to exploring and exposing the multiple layers and complexities of the African diasporic experience through her ethnographic dance choreographies, her dance technique, her schools, her music, and her writing. Dunham's work as a dance anthropologist, artist, educator, and humanitarian is manifested in Dunham Technique; the technique is a fusion of African diasporic dance, ballet and modern dance, and functions as an embodied medium for cultural communication. The technique is considered "a way of life" as it uses theory and philosophy to engage participants in a holistic experience that is not only physical, but also intellectual, emotional, and spiritual. Through this combination of physicality, history, theory, and philosophy, Dunham Technique is a tool to understand one's inner self and place oneself within a historical and cultural framework. In this course, students will explore the history, theory, and philosophies of Dunham Technique and Katherine Dunham, while actively participating with the technique's movement concepts and vocabulary. Students will engage in the fundamentals of a Dunham Technique movement class through center floor work, barre exercises, progressions, and choreography. The course will combine the studio experience of the physical technique with lectures and discussions. Students will learn about the three theories of Dunham Technique (Form and Function, Intercultural Communication, and Socialization through the Arts) and its three philosophies (Self-Examination, Detachment, and Discrimination) while also learning the history and historical context of the technique and its creator.

**Class Format:** The course meets in person, twice per week for the full semester. The course includes two main integrated components: physical dance training and lecture/discussion.
Requirements/Evaluation:  Students will be evaluated on the completion of journals, the quality of the final movement assignment, the completion of weekly reading assignments, and their participation during class activities/discussions.

Prerequisites:  None

Enrollment Limit:  12

Enrollment Preferences:  Students interested in expanding their knowledge of African diasporic dance and Dunham Technique.

Expected Class Size:  10-12

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
DANC 111(D1) AFR 111(D2)

Not offered current academic year

AFR 113 (F) Musics of Africa

Cross-listings:  MUS 120

Secondary Cross-listing

This course introduces musical traditions spanning the geographical breadth of continental Africa. We will prioritize hands-on experience and musical practice, critical listening, and deep social and political contextualization as strategies of musical engagement. Following an introductory exploration of overarching aesthetic and social trends in African musical practice, the course will then focus on 3-4 geographically rooted case studies, allowing us to discuss how different musical practices and subcultures (featuring traditional, contemporary, and popular forms) interrelate in a musical soundscape. The geographical focus of the case studies may vary but previous case studies have included: Ghana, Zimbabwe, Ethiopia, Egypt, Mali and the Democratic Republic of Congo.

Class Format:  discussion

Requirements/Evaluation:  grade based on attendance and participation, one synthesizing assignment at the end of each unit (for instance a 5-7 pg. paper, a podcast or performance-oriented assignment, an album review or curated listening list) and an 8-10pg final paper.

Prerequisites:  no prerequisites: prior musical background is not essential for this class

Enrollment Limit:  20

Enrollment Preferences:  current or prospective majors in Music and Africana Studies, seniors.

Expected Class Size:  12

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes:  GBST African Studies  MUS World Music/Ethnomusicology

Not offered current academic year

AFR 128 (S) James Baldwin’s Song

Cross-listings:  MUS 179 / COMP 129

Primary Cross-listing

"It is only in his music [. . .] that the Negro in America has been able to tell his story. It is a story which otherwise has yet to be told and which no American is prepared to hear," wrote James Baldwin in Notes of a Native Son in 1955. In this course, we strive to listen more closely to racialized experience through James Baldwin’s musical literature. Through analysis and creation of music, we hope to better understand cultural difference and collective humanity. In this course, we closely analyze James Baldwin’s use of song names, creation of musician characters, and replication of musical elements in his writing. Baldwin’s musical word play crosses historical and genre boundaries. So we will explore texts from his early to late career, such as the gospel music of his youth in the semi-autobiographical novel Go Tell It on the Mountain, the metaphor of the blues in the play written during the civil-rights movement Blues for Mr. Charlie, the jazz musician protagonist in "Sonny's Blues" written after World War II in Paris, and his only
musical recording in *A Lover's Question* set down near the end of his life. In addition to closely analyzing James Baldwin's attention to music throughout his literature, students will learn basic music writing and production skills. The tutorial will draw on a range of musical resources, including playlists, music workshops, guest lectures and performances. All of these resources will guide students to a more attuned hearing not only of music but also of the African American experience it reflects. By the end of the course, students will have written several short 1-2 page close analysis essays and song lyrics. For their final project, students will produce an original song based on key insights from the course. No musical experience is required, though an openness to learn and practice songwriting is expected.

**Requirements/Evaluation:** Several short 1-2 page close analysis essays of Baldwin's work, oral peer feedback presentations, song lyrics, and an original song composition for the final project.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** This course is specifically for first-year students and they will receive preference in this class; a statement of interest will be solicited from pre-registrants.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

Spring 2025

TUT Section: T1 TBA Rashida K. Braggs

**AFR 135 (F) Queen Sugar and Black Study**

**Cross-listings:** AMST 135

**Primary Cross-listing**

The critically acclaimed and award winning television series, *Queen Sugar*, follows the Bordelon family through its struggles to sustain hold of its ancestral land. An adaptation of the eponymously named 2014 novel by Natalie Baszile, the series will soon enter its seventh and final season. This gateway course to Africana Studies will explore the historical, political, and economic contexts of the making of the series before considering its representations and dramatizations of key topics of Black study: the afterlives of enslavement, plantation regimes, global sugar production, land dispossession, the carceral state, gender and sexualities, kinship, activism, and African-diasporic spiritualities.

**Class Format:** Over the course of the semester, students will be required to watch the entirety of the television series.

**Requirements/Evaluation:** weekly journal entries on episodes (300-500 words); in-class writing reflections; class presentation; final project that expands on a course topic

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** This seminar is designed for first-year students. Should the course be overenrolled, students will be selected after an interview with the instructor.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** AFR Core Electives AFR Culture, Performance, and Popular Technologies

Not offered current academic year

---

**AFR 158 (S) North of Jim Crow, South of Freedom** (DPE) (WS)
Secondary Cross-listing

This course analyzes the freedom struggle in the North during the twentieth century. Whereas black northerners drew from broader campaigns and traditions of black resistance, we will explore territorial distinctions in the region that otherwise have been flattened within the long history of civil rights discourse. To accomplish this aim, we will engage the following themes: black culture and radicalism; community formation and residential segregation; demographic and migratory transitions; deindustrialization and the war; gender and respectability politics; labor tensions and civil rights unionism; northern racial liberalism; and the influence of world affairs—all with an eye toward scrutinizing the freedom struggle in its northern variety.

Requirements/Evaluation: Students are expected to participate actively and will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (8-10 pages) in consultation with the instructor and will be required to submit a topic proposal.

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar. If the course is overenrolled, students with junior and/or senior status will be removed automatically. Other students will complete a questionnaire.

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 158(D2) HIST 158(D2)

Writing Skills Notes: Students will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course analyzes the long black freedom struggle in the North during the twentieth century. It examines black northerners' efforts to achieve citizenship and equality as well as their challenges and involvements with northern racial liberalism. It offers students the opportunity to think critically about how black resistance campaigns emerged and evolved as discriminatory racial practices persisted in spite of legal and legislative remedies.

AFR 159  (F) Crossing the Color Line: A History of Passing (DPE) (WS)

Cross-listings: HIST 159

Secondary Cross-listing

In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her white parents stated publicly that Dolezal is a white woman passing as black. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to become white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries—class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

Requirements/Evaluation: Weekly formal response papers and written critiques.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 159(D2) AFR 159(D2)

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2 pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students will also receive feedback from their tutorial partners.

Difference, Power, and Equity Notes: Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.

AFR 160 (S) After the Civil Rights Movement (WS)

Cross-listings: HIST 160

Secondary Cross-listing

This course examines African American politics, life, and culture from the period following the end of the civil rights movement in the late 1960s to today's Black Lives Matter movement. In examining this time period, we will pay particular attention to a number of key questions: What organizations, activists, and campaigns dominated Black politics in the post-civil rights movement era? How did organizers build on the issues and tactics of the movement in the years that followed? In what ways were structures of racial inequality reconfigured in the post-movement era? How did the popular culture of the era reflect the changing social, economic, and political lives of African Americans? How were the gains of the civil rights movement preserved or threatened in the post-movement era? In considering these questions, we will explore the ways that struggles for racial equality continued to shape American life in the 1970s, 80s, 90s, and 00s. Using scholarly works, film, music, oral history, and other primary and secondary sources, we will look at topics including: debates over the legacy of the civil rights movement; the impact of mass incarceration and the War on Drugs on Black communities; HIV/AIDS activism; Black conservatism in the age of Ronald Reagan; anti-police brutality activism in the years before the Black Lives Matter Movement; urban disinvestment and the rise of hip hop culture; electoral politics, Black political power, and the Obama presidency.

Requirements/Evaluation: Active participation in class discussion, weekly 500-word discussion posts, two 4-5 page essays, and a final 10-12 page research paper

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Preference to first- and second-year students

Expected Class Size: 12-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 170 (F)  What is Race in Black Studies?

Black/Africana Studies has offered much on the study of race, though race is not its sole focus. The goal of this course is to study theoretical perspectives and interrelated schools of thought on race in disciplines including and adjacent to Africana Studies. These perspectives include critical race theory, the Black radical tradition, whiteness studies, and decolonial theory. Our goal is to begin to notice the ways in which race -- far from being a singular or uniformly understood mode of difference -- can be theorized through a range of approaches. The course will explore questions including: What is at stake in various perspectives on race? What sort of redress is made possible using the framework of "race," and what transformative possibilities are foreclosed? How does the twentieth century trajectory of the concept shape the twenty-first century racial politics? How does the state-form structure the concept of race?

Requirements/Evaluation: A presentation and a final exam

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: Africana Studies, American Studies, Sociology, and Political Science majors and concentrators

AFR 190 (S)  Introduction to Afro-Latin American Studies

Although there is a common idea of "African American exceptionalism," the Black Experience in the Americas is far more complex and diverse than it may seem at first glance. Since the beginning of the 16th century, around 10.7 million Africans survived the Middle Passage, and around 4 percent disembarked in the USA. If it is true that each country has its own singularities, nation-building processes, and particular race and ethnic relations, it is also true that there are remarkable resonances and connections across and within the Black Diaspora in the Americas. Drawing on this historical background, the seminar introduces students to the flourishing field of Afro-Latin American Studies. The seminar will focus on the current experiences of Afro-Latin Americans in Haiti, Mexico, Brazil, and Colombia. Therefore, this is not a course about slavery or colonial history, even though it will shed light on the historical roots of the present-day struggles and experiences of Afro-Latin Americans. The seminar invites students to investigate and discuss the following questions: What does it mean to be Black in Latin America today? How are racial categories used in and by each country’s public policies and social movements? What is behind the idea of racial democracy? What role do affirmative action and cultural movements play in the fight against racism and Anti-Blackness? How did Black activists and movements foster an Afrodiasporic dialogue and collaboration throughout the Americas? The seminar aims to connect students with Afro-Latin American perspectives (drawn mainly from Anthropology, Sociology, and History); promote a welcoming space for class discussions; and provide students with guidance to structure and develop a written reflection (in any preferred format, such as essays, interviews, research papers, audiovisual creations) about a topic of their choice (in relation to the Black Experience in Latin America).

Requirements/Evaluation: Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); and a final essay or research paper (5-10 pages).

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Majors and concentrators in Africana Studies, Sociology, and Anthropology.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

AFR 200  (F)(S)  Introduction to Africana Studies

This course introduces students to the content and contours of Africana Studies as a vibrant field of knowledge. Through exploration of the genealogy, disciplinary diversity, and evolution of the field, we will examine the depth and range of experiences of African-descended peoples throughout the Americas, the Caribbean, Europe, and Africa. We will also give some attention to how members of the Diaspora remember and encounter Africa, as well as their diverse responses to the history of enslavement, colonialism, apartheid, racism, and globalization. Through materials that embrace both historical and contemporary perspectives, we seek to help students develop critical frameworks for understanding African diasporic experience while simultaneously illumining disjunctures and challenges for the field. This course features two pedagogical strategies: 1) a rotational, interdisciplinary approach that includes the expertise, methods, and specializations of Africana faculty; and 2) the incorporation of aesthetic materials--film, photography, music, dance, performance, and artwork--to enhance student ability to draw ongoing connections between visual and textual sources covered in the course. Close textual analysis, vibrant debate, and engaging discourse are expected.

Requirements/Evaluation:  class participation, weekly e-reading response papers, two short essays, and a final research project

AFR 201  (F)  African Dance and Percussion

Cross-listings:  DANC 201 / MUS 220

Secondary Cross-listing

We will examine two forms that embody continuity of tradition or the impact of societal, political or economic change. Lamban was created by the Djeli, popularly called Griots served many roles in the kingdoms of Ghana and Old Mali from the 12th century to current times. This dance and music form continues as folklore in modern day Guinea, Senegal, Mali and The Gambia where it is practiced by the Mandinka people. Bira is an ancient and contemporary spiritual practice of Zimbabwe's Shona people. While these forms are enduring cultural practices, Kpanlogo from the modern West African state of Ghana represents the post-colonial identity of this nation's youth and their aspirations for independence at the end of the 1950s. We will also consider the introduction of these forms outside of their origin. This course can be taken for academic and/or PE credit.

Class Format:  Class hours will be used to learn and use the dance and music of at least two forms including historical context, and individual or group performance project. When possible, our process will include guest artists and field trips to see live performances. As well as use of the archives at Jacob's Pillow Dance Festival, Sawyer Library and the art collection at Williams College Museum of Art.

Requirements/Evaluation:  Discussion of assignments, semester long group performance project rooted in the materials taught. Students enrolled for PE credit are responsible only for the performance-based projects

Prerequisites:  none

Enrollment Limit:  16

Enrollment Preferences:  Students who have taken a 100 level dance course or DANC 202; have experience in a campus-based performance ensemble; or have permission of the instructors

Expected Class Size:  12

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
Colorism, skin color discrimination where light skin is privileged over dark skin, is not a new phenomenon, but globally entrenched in our society and one of the many vestiges of white supremacy. For Black Americans of all backgrounds, colorism is a familiar and a living legacy concretized by the institution of slavery in the Americas. Although some believe that we are "post-color," similarly to those that naively believe we are "post-race," one can look to the recent example of misogynoir (misogyny directed at Black women) and skin color politics that Meghan Markle, the Duchess of Sussex, has faced at the hands of the British Monarchy, that her light-skinned color, biraciality, and class privileges couldn't protect her from. Alternatively, we can look at the numerous examples of colorism and anti-Black racism that tennis icon Serena Williams is subjected to because of her dark-brown skin complexion and body shape. One cannot fully understand the issue of colorism without understanding that it is an outgrowth or an extension of anti-Black racism firmly rooted in white supremacy, and so insidious that it impacts all aspects of Black life. Examining colorism through literary texts and music, provides a depth of understanding that both compliments and expands these empirical studies. Literature and music provide the narratives and rhythm that paint a vivid picture of the many ways that colorism impacts the lives of Black people. Through the methods of literary and rhetorical criticism we will examine the works of five Black women authors and music artists that take up issues around colorism and passing. We will explore, Toni Morrison's, *The Origins of Others* (2017), Brit Bennett's, *The Vanishing Half* (2020), Tressie McMillian Cottom’s, *Thick* (2019), Marita Golden’s, *Don’t Play in the Sun* (2004), Yaba Blay’s, *One Drop: Shifting the Lens on Race* (2021), Nina Simone’s, "Four Women" (1966) and "Young, Gifted and Black" (1958), Sara Martin's, "Mean Tight Mama" (1927), India.Arie's, "Brown Skin" (2001), Azealia Banks' "Liquorice" (2012), and Beyoncé's "Creole" (2012), "Formation" (2016) and "Brown Skin Girl" (2020). By examining colorism in both literature and music, it will give first year students a foundational and nuanced understanding of skin tone bias and equip them with the tools to critically engage literary and music texts.

Requirements/Evaluation: Three, short papers (4-5 pages) discussing aspects of the readings and songs; three response papers to tutorial partner's papers (2 pages long); two, video essays; two, Twitter threads explaining aspects of one of the books and one of the songs; and a curated playlist of songs that would serve as accompaniment to one of the texts from the class.

Prerequisites: N/A

Enrollment Limit: 10

Enrollment Preferences: This class is specifically designed for first year students. Sophomores can register only with advanced permission.

Grading: no pass/fail option, no fifth course option

Attributes: AFR Core Electives AFR Culture, Performance, and Popular Technologies
far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison's writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, *The Bluest Eye* (1970), *Sula* (1973), *Song of Solomon* (1977), *Love* (2003) and *God Help the Child* (2015), and some of her non-fiction writings. In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

**Requirements/Evaluation:** six 2-page papers, two 5- to 7-page papers, 10 minute vlog, annotated bibliography

**Prerequisites:** none

AFR 208 (S) Time and Blackness

Cross-listings: AMST 208 / REL 262

Primary Cross-listing

The concept of time has been one of the most examined, yet least explicitly theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory—which involves thinking about time—time itself has rarely the subject of sustained inquiry. This may be due to its abstractness as an idea, and the level of analysis its conceptualization demands, or because time in the Black experience cannot be understood outside of the meaning of race, which itself is not completely tangible. In this tutorial, "Time and Blackness," we will explore how Black writers across a number of genres—spiritual autobiography, fiction, memoir, literary criticism, and cultural theory—understand time, and create paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in Black writings? How does race shape the ways Black writers conceive the experience of time? And, finally, to what can we attribute the recent surge in explicit, theoretical examinations of "time and blackness"?

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies

AFR 211 (S) Race, Environment, and the Body

Cross-listings: ENVI 211 / SOC 211 / AMST 211

Primary Cross-listing

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions—like literature, scholarship, music, and film—we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference given to AFR concentrators, ENVI concentrators and majors, and ANSO majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option
AFR 212  (S)  Jazz Theory and Improvisation I

Cross-listings:  MUS 105

Secondary Cross-listing
The theory and application of basic harmonic structures and rhythm language used in jazz performance. An introductory level course to the practice of jazz improvisation. Blues forms, modal compositions, diatonic progressions, secondary and substitute dominant chords, modulations. This is a performance practice course appropriate for students with basic skill on their instrument and some theoretical knowledge including all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Vocalists and drummers will be encouraged to study the piano; all students will complete jazz-specific piano and percussion lab assignments. Pianists, guitarists and bassists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: Weekly assignments, (e.g. performance of exercises and repertoire, analysis) a midterm, a transcription project and the end of semester concert. Jazz piano and drum labs. Assignments from aural skills labs.

Prerequisites: MUS 103 or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

Enrollment Limit: 12

Enrollment Preferences: Prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: this course will share aural skills labs (but not piano labs) with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

AFR 218  (F)  ReReading/Righting Ballet's History: Celebrating BIPOC Figures in Ballet (w/ Ballet Technique)

Cross-listings:  DANC 207

Secondary Cross-listing
"What does dance give you?" asked the great African American dancer, teacher, and director Arthur Mitchell: "The freedom to be who you are and do what you want to do." In the ballet world, however, Black, Indigenous, and People of Color have struggled to achieve that "freedom" their white counterparts have enjoyed. In this course students continue their technical/artistic training in ballet while also exploring different topics in past and current ballet history; in Fall 2022, our main focus will be on some of the notable BIPOC figures in the world of ballet, with the history of ballet providing both a timeline and a sociopolitical backdrop against which we can trace and discover the intersectionality that has helped shape the aesthetics of ballet as well as other genres we know today. Though this is primarily a studio course (with twice-weekly ballet technique classes) readings and viewings relevant to our coursework will be assigned; a third weekly meeting will be held for group discussions on those assignments. Alongside broader ballet history texts, the essays and articles by authors such as Brenda Dixon Gottschild and Theresa Ruth Howard will offer keen insights into some of the more specific issues and topics regarding race and diversity in the field of ballet. In addition to informal, written responses to the readings and viewings, Howard's website "Memoirs of Blacks in Ballet" will be an important anchor/springboard for course projects. Howard will be a guest
collaborator in this course for Fall '22; in addition to joining us (remotely) for discussions, she will guide us in those projects.

**Class Format:** Students will be placed in either Beginning Ballet, or Intermediate/Advanced Ballet (see prerequisites for more information): ALL students will meet together for a third class meeting/seminar.

**Requirements/Evaluation:** Robust engagement in technique classes and meeting sessions; timely and thoughtful written (informal) responses to assigned readings and viewings; development and presentation of course projects.

**Prerequisites:** Technique for the two levels will be separate. For the beginner level NO prior experience is required. For the int/adv level, students must have at least three yrs of prior ballet training, and instructor's permission.

**Enrollment Limit:** 12

**Enrollment Preferences:** Students who are invested in learning both the physical aspect of ballet technique, as well as its broader history and the specific areas this course is investigating.

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option

**Materials/Lab Fee:** Ballet class attire (i.e., leotards, tights/leggings, slippers)--students are responsible for acquiring personal clothing and shoes. Est. cost $75-150.

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

**AFR 219 (S) Afro-Modern Dance II: Theory & Practice (Dunham Technique)**

**Cross-listings:** DANC 211

**Secondary Cross-listing**

Modern African diasporic dance creates a conversation between the past and the present; it brings forth memories of the African "homeland" and of the dispersal of African bodies around the world, while simultaneously engaging the current joys, pains, challenges, and cultural growth of Black people. Through movement and rhythm, dancers experience the embodied knowledge of previous generations, while connecting to contemporary cultural, political, and economic realities. Katherine Dunham devoted her life to exploring and exposing the multiple layers and complexities of the African diasporic experience through her ethnographic dance choreographies, her dance technique, her schools, her music, and her writing. Dunham's work as a dance anthropologist, artist, educator, and humanitarian is manifested in Dunham Technique; the technique is a fusion of African diasporic dance, ballet and modern dance, and functions as an embodied medium for cultural communication. The technique is considered "a way of life" as it uses theory and philosophy to engage participants in a holistic experience that is not only physical, but also intellectual, emotional, and spiritual. Through this combination of physicality, history, theory, and philosophy, Dunham Technique is a tool to understand one's inner self and place oneself within a historical and cultural framework. In this course, students will explore the history, theory, and philosophies of Dunham Technique and Katherine Dunham, while actively participating with the technique's movement concepts and vocabulary. Students will engage in the fundamentals of a Dunham Technique movement class through center floor work, barre exercises, progressions, and choreography. The course will combine the studio experience of the physical technique with lectures and discussions. Students will learn about the three theories of Dunham Technique (Form and Function, Intercultural Communication, and Socialization through the Arts) and its three philosophies (Self-Examination, Detachment, and Discrimination) while also learning the history and historical context of the technique and its creator. Students are expected to have taken DANC 111, DANC 204, DANC 206, or had some prior significant training in Dunham Technique.

**Class Format:** The course meets in person, twice per week for the full semester. The course includes two main integrated components: physical dance training and lecture/discussion. Students will experience guest artists certified in Dunham Technique.

**Requirements/Evaluation:** Students will be evaluated on the completion of (3) journals, the quality of the final movement assignment, the completion of weekly reading assignments, and their participation during class activities/discussions.

**Prerequisites:** Students are expected to have taken DANC 111, DANC 204, DANC 206, or had some prior significant training in Dunham Technique.

**Enrollment Limit:** 10

**Enrollment Preferences:** Students interested in expanding their knowledge of African diasporic dance and Dunham Technique.

**Expected Class Size:** 8-10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)
AFR 220  (S)  Introduction to African American Literature

Cross-listings:  ENGL 220 / AMST 220

Secondary Cross-listing

What does it mean, socially, culturally, historically, personally, and spiritually, to be African American? No single, simple answer suffices, but African American literature as a genre is defined by its ongoing engagement with this complex question. This course will examine a series of texts that in various ways epitomize the fraught literary grappling with the entailments of American blackness. Readings will include texts by Frederick Douglass, Booker T. Washington, Zora Neale Hurston, Langston Hughes, Richard Wright, Ralph Ellison, Amiri Baraka, Toni Morrison, and Ishmael Reed.

Requirements/Evaluation:  writing assignments for the course will total 20 pages, distributed over three papers

Prerequisites:  none

Enrollment Limit:  25

Enrollment Preferences:  English majors

Expected Class Size:  25

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)

AFR 221  (F)  Giving God a Backbeat: Rap Music, Religion & Spirituality

Cross-listings:  REL 263

Primary Cross-listing

On the surface, religion and rap music may seem as if they have little in common. Yet, like other Black musical traditions such as spirituals and the blues, rap is rooted in African American religious traditions. In this course, we will explore the ways in which rap music intersects with the sacred and secular worlds. Through an examination of black religious traditions, lyrics, music videos, and digital media, we will unearth what Anthony Pinn calls the "spiritual and religious sensibilities" of rap music. Grounded in culture-centered criticism, we will investigate the rhetoric of rap and religion through the theoretical ideas of Black Liberation Theology and hip-hop feminism.

Requirements/Evaluation:  students will be evaluated on their class participation, Twitter threads, response papers, quizzes, and a final class group project

Prerequisites:  none

Enrollment Limit:  18

Enrollment Preferences:  First year, sophomore, and juniors

Expected Class Size:  15

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 222 (S) Hip Hop Culture (DPE) (WS)

Cross-listings: AMST 222 / ENGL 221 / MUS 217

Secondary Cross-listing

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced "diggin' in the crates"—a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop's tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

Requirements/Evaluation: Four papers, project with presentation, and a final exam.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: AMST majors or prospective majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 222(D2) ENGL 221(D1) AFR 222(D2) MUS 217(D1)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

AFR 227 (F) Colonial Rule and Its Aftermaths in Africa (DPE)

Cross-listings: HIST 204 / GBST 203

Secondary Cross-listing

This course focuses on the history of Africa during the colonial and post-colonial periods, especially focusing on the period between 1885 and 2000. The first part of the course will explore the imposition of colonial rule and its attendant impacts on African societies. During this section, we will especially examine how Africans responded to colonialism, including the various resistance movements that arose at different moments to contest colonial rule. We will also explore the various transformations wrought by colonialism. The second part of the course will explore the African struggle to decolonize their societies and to fashion viable political systems. In addition to historical texts, the course will make use of cultural materials such as novels and films.

Class Format: Mixed format of lecture and discussion seminar

Requirements/Evaluation: active participation in discussion, map quiz, response papers, midterm and final exams, and case study paper (7-10 pages)

Prerequisites: None

Enrollment Limit: 30

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 227(D2) HIST 204(D2) GBST 203(D2)

Difference, Power, and Equity Notes: This course will introduce students to how Africans contended with the forces of colonialism and its aftermaths. It will examine how different African societies as well as social groups on the continent were affected by and responded to colonial rule. All of the readings, discussions, and assignments will ask students to contend with the issues of how to write African lives into the history of colonialism.

AFR 229 Black Outside the U.S.

This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one's racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like "Black," "noir" and "race" have
strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

Class Format: seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students

Requirements/Evaluation: evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report

Prerequisites: none
Enrollment Limit: 8
Enrollment Preferences: students who have taken other AFR courses, Francophone speakers and students

AFR 231  (S)  Africa and the Anthropocene  (DPE)

Cross-listings: STS 231 / ENVI 231

Secondary Cross-listing

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Requirements/Evaluation: Assignments include: 2 short written commentaries (2-3 pages each), mid-term current event analysis (5-7 pages), final analytical essay (10-12 pages) and class presentation

Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 232  (S)  Islam in Africa  (DPE)

Secondary Cross-listing

Islam in Africa is often relegated to the peripheries in the study of Islam, a religion most associated with Arabs and the Middle East. On the flip side,
Islam is also portrayed as foreign to African belief systems and institutions. The relationship between Islam and Africa, however, begins with the very advent of Islam when early Arab Muslim communities took refuge in the Abyssinian empire in East Africa. This course explores the history of Islam and Muslim societies on the African continent by focusing on the localized practices of Islam while also connecting it to Islam as a global phenomenon. The course will begin with a historical focus on the spread of Islam in Africa from East Africa and North Africa in the seventh century all the way to the spread of Islam through Sufi brotherhoods in the eighteenth and nineteenth centuries. The course will also take an anthropological approach, exploring the diverse practices of Islam in African Muslim communities and the social and cultural impact of Islam on African societies. Among the topics the course will cover include African Muslim intellectual traditions, local healing practices, religious festivals, early modern African Muslim abolitionist movements, and the historical interactions between African and Asian Muslim communities in the Indian ocean world.

Requirements/Evaluation: Two essays during the semester and final project.
Prerequisites: None
Enrollment Limit: 25
Enrollment Preferences: REL, HIST, ARAB, AFR, GBST majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 232(D2) AFR 232(D2) ARAB 232(D2) HIST 202(D2) REL 232(D2)

Difference, Power, and Equity Notes: The course will urge students to consider how scholars construct centers and peripheries through a study of Islam in Africa that is often rendered to the peripheries in the study of Islam. The course will also explore the diversity of African Muslim communities, getting students to think about the diversity of human experiences and interpretations of shared sacred texts.

AFR 236 (F) Europe and the Black Diaspora (DPE) (WS)

Cross-listings: GERM 234 / COMP 238

Secondary Cross-listing
This course provides an overview of the relationships and interactions between the Black diaspora and the European continent in the nineteenth and twentieth centuries. Drawing from biographies, autobiographies, reports, literature, creative arts and academic articles, we will consider the different relationships that have evolved between Black people and Europe over the course of time. Focusing on Central Europe, we will discuss the relationships established between Europe and the Black diaspora, such as Africans, African-Americans, Afro-Latinx and Afro-Caribbeans. Some of the themes we will address include the influence of cultural contact on intellectuals, writers, artists, soldiers, politicians and asylum seekers and their works, factors that established and influenced their relationship with Europe, as well the ways in which these selected people did or did not exert influence on European cultures. We will conclude by looking at some of the current discussions that still revolve around the relationship between the Black diaspora and Europe. Reading and Discussion in English.

Requirements/Evaluation: Active class participation, written homework, short papers and final research paper.
Prerequisites: None.
Enrollment Limit: 19
Enrollment Preferences: If course overenrolls (beyond cap), preference given to first-years, sophomores, and juniors.
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 236(D2) GERM 234(D1) COMP 238(D1)

Writing Skills Notes: Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: We will discuss how minorities and minoritized individuals and the identities they hold can be affected by the
dominant cultures around them. While we will focus on Europe, we will approach discussions with a comparative view, so as to encourage the students to reflect on how difference, power and equity interact and impact minorities in the context of the United States or wherever they come from.

AFR 237 (F) Islam in the United States: Race, Religion, Politics (DPE)

Cross-listings: REL 237 / AMST 237 / AAS 237

Secondary Cross-listing

Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of "Black Muslim" movements represented by Malcolm X, to the current "War on Terror" era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States. Throughout the course, we will be engaging with historical and anthropological material, autobiographies, documentaries, films, historical primary-source documents, music, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

Requirements/Evaluation: regular reading responses, 2 midterm essays, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Majors and concentrators in REL, AFR, and AMST

Expected Class Size: 20

Cross-listings: ANTH 238 / GBST 238

Primary Cross-listing

What names and faces come to your mind when you think about Anthropology? The course introduces students to the lives and work of pioneering Black anthropologists whose contributions are still unknown or overlooked. Through different styles, methods, and theoretical approaches, each of these intellectuals has developed antiracist perspectives on foundational topics in the Social Sciences and the Humanities, contributing to advancing the study of the African continent and the Black Diaspora. Throughout the classes, students will learn about each author's journeys, which can spark significant changes in how we think about our roles as social scientists within and outside academic boundaries.

Class Format: Students will be required to develop and give a class presentation focused on contemporary Black anthropologists from Africa and the Diaspora.

Requirements/Evaluation: Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); formal class presentation (individually or in groups); and a final essay or research paper (5-10 pages).

Prerequisites: None

Enrollment Limit: 20
Enrollment Preferences: Should the course be overenrolled, preference will be given to majors and concentrators in Africana Studies, Sociology, and Anthropology.

AFR 245  (S)  Dancing with the Hips, Butt, and Pelvis: Dangerous Bodies and Community Traditions

Cross-listings: DANC 220

Primary Cross-listing

Within the historical context of the U.S., dance that emphasizes hip, butt, and pelvic movement has been racialized and associated with the Black body. While the popularity of these dance styles has expanded and now different groups of people now embrace these movement vocabularies, the practices remain deeply connected to the history and culture of Black folk. Despite the increased popularity of these dances, within Eurocentric aesthetics, the Black dancing body carries the mark of vulgarity and should either be controlled, exploited, and/or exoticized. These dangerous bodies are considered sexually deviant and in need of influence and control through colonialism, imperialism, and religion. Yet, the dancing pelvis, hips, and butt write and document the Black experience. The dancing Black body carries the memories of the diaspora and provides space for the body to experience autonomy. This embodied knowledge, carried by Black bodies, is intertwined with the everyday lives of Black folk. Furthermore, through these practices, Black communities commune, resist dominant narratives, and embrace their humanity. Nevertheless, the pelvis/hips/butt dancing body is not embraced equally among Black people. In the practice of these movement genres, Black communities negotiate matters of respectability, pleasure, and self-actualization. This course is an exploration into the use of the hips, butt, and pelvis in three movement genres: bounce, a genre of hip-hop from New Orleans and origin culture of the term "twerking" Black majorette/dance team performance, a jazz and Black social dance infused form that originated from the marching band culture at Historically Black Colleges and Universities; and Caribbean winning, a hip rolling movement performed throughout the Caribbean. Students will engage with scholarship and participate in discussions focused on the individual and communal practice of these traditions. The class community will investigate themes such as respectability politics, the politics of pleasure, and communal
organizing to gain a better understanding of these practices. Additionally, students will physically explore these dance traditions and work with guest artists who specialize in these practices. The course will culminate in a public dance party that will be curated and facilitated by the class community.

**Class Format:** The course meets in person, twice per week for the full semester. The course includes two main integrated components: lecture/discussion and physical movement exploration.

**Requirements/Evaluation:** Students will be evaluated on the completion of assignments, participation during class activities/discussions, and their contribution towards the dance party event.

**AFR 247 (F) Circa 1492: A Black Studies Perspective**

How do we understand the 1492 moment that opened the doors to the civilization under which we live? This course considers the critiques put forth in Black studies to critically examine 1492 as not a moment of European achievement but as a world-altering moment. This moment has a prehistory and a future that is not limited to the Bristol-Guinea-Caribbean triangle of the slave trade, but also the England -- Moorish North African -- North America triangle that was the dominant triangle during the Age of Discovery, or the first few decades of the 1492 moment. The twin events of the 1492 moment are the expulsion of Moors and Jews from Iberia and Christopher Columbus's initiation of the conquest of the "New World." Taking seriously Arab-African cultures, practices, and thought, this course is grounded by the scholarship of core thinkers in Black studies including Sylvia Wynter, Cedric Robinson, RA Judy, and explores what they argue is missing from our understanding of the 1492 moment and its aftermath.

**Requirements/Evaluation:** A presentation and a final exam

**Prerequisites:** None

**Enrollment Limit:** 25

**Expected Class Size:** 25

**Grading:** no pass/fail option, no fifth course option

**Primary Cross-listing**

Since the mid-20th century, Black intellectuals from Africa and the Diaspora have founded seminal journals within and beyond academic boundaries. Despite being separated by global distances and different contexts, these initiatives have decisively contributed to the emergence and consolidation of Black and Pan-African studies. *Presence Africaine*, founded in Paris in 1947 by Senegalese intellectual Alioune Diop; *Quilombo*, first published in 1948 by the Afro-Brazilian intellectual Abdias do Nascimento; and *The Black Scholar*, founded in California in 1969 by Robert Chrisman, Nathan Hare, and Allan Ross are just a few groundbreaking examples. From this global perspective, students will explore these and other cornerstone journals which paved the way for the emergence of Black and Pan-African Studies in the US and abroad. Additionally, the course aims to encourage students to be part of a collective effort to relaunch Kaleido[scopes]: Diaspora Re-imagined, a student led-journal created in 2014 in the Africana Studies Department.
by Sevonna Brown ('15), Ahmad Greene-Hayes ('16), and Nneka Dennie ('13). Students will receive guidance and mentoring to conceive and write articles, essays, audiovisual creations, and interviews with students and intellectuals from the African continent and the Diaspora in the Americas and the Caribbean.

Class Format: Students will be required to develop and give a class presentation focused on pioneering Black Studies journals.

Requirements/Evaluation: Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); formal class presentation (individually or in groups); final projects (such as essays, papers, interviews, and audiovisual creations) aimed to be published in the new edition of Kaleido[scopes]: Diaspora Re-imagined (Spring 2024).

Prerequisites: None

Enrollment Limit: 15

Migration remains an integral aspect of Black experiences. This comprehensive course, formerly titled "Black Migrations: Histories of African Diaspora in the US," centers the histories of Black migration to and within the United States. Migration includes the involuntary, forceful movement of populations, but it also comprises voluntary movement of populations that seek new economic opportunities. Therefore, this course covers three historical periods of migration: 17th-19th century (Transatlantic slave trade), early 20th century (Great Migration and the arrival of Caribbean migrants to major urban centers in the United States), and the late 20th and early 21st century (Migration continental Africans to the US). This course will ask the following questions as it relates to Black migration: What were the social, political, and economic factors that contributed to the migration of Black populations to and within the US especially in the 20th and 21st century? How do current-day Black migration patterns differ from earlier periods? In what ways can migration be utilized as a form of resistance to oppression both domestically and internationally?

AFR 254  (S)  Bebop: The (R)evolution of Modern Jazz

Cross-listings: MUS 254

Secondary Cross-listing
In the 1940s, Jazz turned a corner, transitioning from the functional and popular music of the swing era to the increasingly complex art music known as bebop. The practitioners of this new sub-genre were seen not as showmen or entertainers, but (in the words of poet Ralph Ellison) as "frozen faced introverts, dedicated to chaos." This music was simultaneously old and new, a musical evolution interpreted through the lens of cultural revolution. This class will survey the lives, music and continuing impact of bebop's most pivotal figures: Charlie Parker, Thelonious Monk, Dizzy Gillespie, Bud Powell and Kenny Clarke among many others. Through score study, guided listening and performance, the class will examine the melodic, harmonic and rhythmic innovations associated with this pivotal era in jazz history. We will evaluate, compare and contrast examples of contemporary theoretical scholarship concerning this musical vocabulary and its evolution. Intersections between the music and parallel artistic, social and political movements will also be addressed.

Requirements/Evaluation: weekly reading, listening, musical memorization and performance. Short written responses to discussion prompts and participation in class discussion; quizzes on assigned readings and listening, and final exam

Prerequisites: MUS 104b or permission of instructor, instrumental or vocal proficiency.

AFR 258 (S) Thinking and Acting Politically in the Long Civil Rights Movement

Secondary Cross-listing

In this course, students will explore the various theories of political action that animated the Long Civil Rights Movement. Students will examine how these theories helped frame the political ideals, ideologies, and behaviors of multiple sects of the Black Freedom struggle. By analyzing the political thought of thinkers like Ella Baker, Amzie Moore, Pauli Murray, Florynce Kennedy, Fannie Lou Hamer, Robert F. Williams, and Martin Luther King, Jr.—among others, students will appreciate how their experiences influenced their approach to politics in diverse ways. Subsequently, students will evaluate the theories’ arguments and political actions while determining which frameworks should motivate contemporary political organizing. By challenging the charismatic leader model of teaching and learning Civil Rights politics, students will understand the Civil Rights Movement as a grassroots movement buoyed by the political activities and energies of ordinary Black citizens. Moreover, they will develop a broader understanding of the mechanics of grassroots organizing and mobilize their studies appropriately to argue persuasively how ordinary people should contest injustice by considering tactics, mobilization strategies, political visions and ideologies, and strategic dilemmas. Consequently, they will not view Civil Rights history and theory as an episode of the past but as a force that continues to shape our political imaginations.

AFR 265  (F)  Afrodiasporic Communities: Marronage, Quilombismo, and Black Towns
In the early 19th century, a small Black community formed in White Oaks, Williamstown/MA. In 1866, 32 West Africans founded Africatown/AL, one of the first cities established and governed by Black people in the United States. In the face of the impossibility of returning to their native lands, as recounted by the Martinican poet Aimé Cesaire, millions of Africans and their descendants sought to find home in the Diaspora. In so doing, they not only contributed to building cities, nations and societies. Frequently, and in several episodes alongside Amerindians, the Black population in the Americas endeavored numerous strategies that challenged the colonial order. Such experiences also occurred in the Caribbean and Latin America and are usually described as maroon societies, cimarrons, or quilombos. However, the literature does not usually address them via an Afrodiasporic framework. Drawing from the work of scholars such as Abdias do Nascimento (Brazil, 1914-2011), students will analyze the bonds of combative solidarity within and across the Black Diaspora in the Americas. Through this approach, the experiences of Afrodiasporic Communities are not only defined or limited to the forms of territorial organization. Instead, they can be viewed and studied as examples of Black association aligned with the struggles of emancipation -- from rural villages to urban neighborhoods and towns. The seminar invites students to investigate and discuss the following questions: What do these communities have in common? What are their main differences in countries such as the USA, Jamaica, Colombia, Suriname, French Guiana, and Brazil? What can we learn from the history of White Oaks and Africatown? How could we use concepts such as quilombismo and marronage to think about the Black Experience today? The seminar aims to provide students with an Afrodiasporic framework (drawn mainly from Anthropology, Sociology, and History) to investigate different experiences in the Black Diaspora.

Requirements/Evaluation: Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); and a final essay or research paper (5-10 pages)

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Majors and concentrators in Africana Studies, Sociology, and Anthropology

AFR 279  (F)  African American History Since 1865

Cross-listings: HIST 279

Secondary Cross-listing
This course provides an introduction to the history of African Americans from the post-emancipation era to the present day. Focusing on the collective and individual life experiences of African Americans, it will highlight the actors, organizations, and ideas that have been central to the African American experience. We will examine struggles for equality, justice, citizenship, and self-determination and the various ways African Americans have sought to achieve these ends. By the end of the semester students will have a basic understanding of core topics in African American history such as Reconstruction and Redemption; the rise of Jim Crow segregation; urban migrations and the "New Negro"; the Civil Rights Movement, in its Northern and Southern manifestations; the movement for Black Power and its antecedents; the rise of mass incarceration in the post-Civil Rights Era. The course will conclude with a discussion of the Presidency of Barack Obama and the Black Lives Matter Movement.

Requirements/Evaluation: Students will be graded on class participation, a midterm and a final exam, and two to three formal papers (3-5 pages
AFR 280 (S) Emancipation to BlackLivesMatter

Cross-listings: LEAD 280 / HIST 280

Secondary Cross-listing

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

Class Format: Class will be a mix of lecture/seminar

Requirements/Evaluation: Students will be graded on class participation and have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Students with demonstrated interest in material. If the course is overenrolled, students will be asked to complete a questionnaire.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olve Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerison, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

AFR 291  (F)  Africana Studies Approaches to AI

The rise of artificial intelligence is a hot topic in contemporary thought. However, much of this thought ignores Africana Studies. This class asks the question, what can Africana Studies tell us about the mid-twentieth century rise of artificial intelligence? The course's approach to answering this question has two parts. First, the course contextualizes the rise of artificial intelligence in the post-World War II moment, particularly around the Cold War. Second, it links this rise of artificial intelligence to the anticolonial politics and thought of this Cold War era, of which Africana Studies was central. In other words, the course shows that there is an increasing need for artificial intelligence in a world of challenges to the dominance of western thought and humanity. Just as western thought and humanity are challenged, via anticolonial action and Africana Studies thought, western thought and humanity increasingly go digital, into computers as a shield from critique.

AFR 300  (S)  "Rebel Ecologies': Black and Indigenous Struggles for Land and Life"

Cross-listings: WGSS 362 / ENVI 300 / AMST 362

Primary Cross-listing

This course will ask, what other socioecological models exist? We will weave together a study of differing, yet often converging or synergistic traditions of Black/Womanist eco-feminism that often confronts the social constructions of race, gender, class and sexuality, dominant religion as a means of social control, imperialism, capitalism, and colonialism; Ecosocialism which often frames ecology in terms of a mode of production beyond or outside of capitalism; and Indigenous perspectives on resistance to capitalist extraction, imperialism, and colonialism. Given ongoing struggles against the extraction of land and labor, the urgent calls raised in the present-day "climate strike," the COVID-19 Pandemic, Black-led pandemic rebellions, along
with long(er) histories of land-based peoples around the planet opposing racial capitalism, settler colonialism, and imperialism, this class will explore not only what those in opposition to both extractivism and expropriation resist, but also what we want. We will critique binaries, settler notions of time and explore theories of change. Additionally, this class will look to an array of literature, film, sound, and other forms of cultural production in order to not just "locate," but describe and reveal rebel ecological visions emerging "from below." Ultimately this class will consider how the above ecological praxis can work simultaneously and within a sense of plurality, examining what we can learn from the work of activists, intellectuals, and defenders on the frontline. This course is an extension of Dr. Guess' concept of a "rebel ecology."

**Requirements/Evaluation:** The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader at least twice 20%; Weekly 500-word Literature Review 20%; One Final Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More projects might include, an annotated bibliography of 7 texts, film analysis, syllabus, book review, a written play, an op-ed, etc. We will discuss further possibilities in class.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** If the course is overenrolled, preference will be given to Africana studies concentrators.

**Expected Class Size:** 7

**Grading:** no pass/fail option, no fifth course option

**AFR 302 (S) Complexion Complexities: Colorism in Literature, Lyrics & Everyday Life**

Often viewed as the "dirty laundry" of the Black American past, colorism, or skin color bias, is a pervasive force within modern global society. Although it is not a new issue, its impact is far reaching and continues to have damaging effects on people of color-especially members within the African Diaspora. From skin bleaching creams like "Whitenicious" to rap music's fetishization of light-skinned women, colorism is a very real and present issue affecting Black life. From the literary works of Wallace Thurman and Toni Morrison, to the lyrics of blues crooner Big Bill Broonzy and rapper Lil Wayne, we will analyze the many ways that the politics of color influence standards of beauty and attractiveness, perceptions of behavior and criminality, and economic attainment and stability.

**Requirements/Evaluation:** class participation, response papers, one 6- to 8-page paper, and a formal class presentation

**Prerequisites:** none

AFR 306 (F) Transcending Boundaries: The Creation and Evolution of Creole Cultures (DPE)

Cross-listings: COMP 310 / RLFR 320 / GBST 306

Secondary Cross-listing

Born out of a history of resistance, Creole cultures transcend racial boundaries. This course provides a comprehensive framework for understanding the creation of Creole nations in various parts of the world. Beginning with an examination of the dark history of slavery and French colonialism, we will reflect upon the cultural transformation that took place when people speaking mutually unintelligible languages were brought together. We will then delve into the study of how deterritorialized peoples created their languages and cultures, distinct from the ones imposed by colonizing forces. As we journey from the past to the present, we will also explore how international events such as a worldwide pandemic, social justice, racism, and police brutality are currently affecting these islands. Potential readings will include prominent authors from different Creole-speaking islands, including Frantz Fanon and Aimé Césaire from Martinique, Maryse Condé from Guadeloupe, Ananda Devi from Mauritius and Jacques Roumain from Haiti. Conducted in French with introductions to different creoles.

Requirements/Evaluation: Active class participation, three papers (of 3-4 pages each), presentation, final research paper (7-8 pages)

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; Comparative Literature majors; Africana Studies students; Global Studies students; and those with compelling justification for admission

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 308 Four Poets: Gwendolyn Brooks, Frank O'Hara, Sylvia Plath, and Amiri Baraka

The study of literature often relies on seemingly "objective" labels to sort and group writers. These four major American poets from the last century were often segregated into different categories: Gwendolyn Brooks (1917-2000) and Amiri Baraka (1934-2014) clumped together as black poets; Sylvia Plath (1932-1963) labelled a "Confessional Poet" and/or taught as a female poet but not a "white poet"; Frank O'Hara (1926-1966), designated
In looking closely at the poetry of these four writers, whose work is usually not taught side by side, we will ask questions about the assumptions implicit in the concepts and categories of American (and English-language) poetics and how literary history usually gets written. For example, who is the presumed "universal" poetic speaker? Who is the assumed reader? Do our attitudes about raced and gendered bodies influence how we read raced and gendered poets? Is a queer poet read with the same particularity as a black poet?

**Requirements/Evaluation:** Two short papers (4-5 pp.) = 25%; One final paper (8-10 pp.) = 50%; Two short response papers = 15%; Participation = 10%

**AFR 311  Women Warriors, Colonial Soldiers, and Slave Armies: Soldiering and Warfare in African History  (DPE)**

Soldiering is one of the oldest professions in African history. Throughout the continent's long history, ordinary soldiers have risen to become kings, queens, presidents, and held other positions of significance. Soldiers in African history have hailed from diverse backgrounds, ranging from the enslaved to those from the nobility. Notable soldiers in African history have been both men and women. Certainly, in Africa as in other world regions there is a tendency to associate the military profession with men. Yet, there have been famous female military warriors in African history, some of the most famous ones being Queen Nzinga in the seventeenth century; the all-female military units in the kingdom of Dahomey, known for their rigor and being effective fighters; and, more recently, Alice Lakwena who commanded a rebellion that nearly brought down the Ugandan government in the late twentieth century. Some of the other themes which we will explore include how warfare was organized from the precolonial era to more recent times; the impact of changing technologies on warfare and the everyday life of armed soldiers; colonial conquest and the soldiers who fought for Europeans and those who resisted; recruitment criteria during the colonial period, and colonial military identities; service in the military as labor and rebellions and mutinies over pay and work conditions; the army and nationalism. Throughout the course we will challenge the enduring Western image and stereotype of Africa as a violent place by focusing on a) the changing conditions that have pushed individuals and communities to go to war, and b) by examining how Africans have initiated and resolved conflict. Students will analyze a variety of resources including soldiers' biographies, films, oral traditions, and archival sources that will help them to come up with their own arguments about the role of the soldiers and the military in Africa.

**Requirements/Evaluation:** active participation in discussion, map quiz, response papers, a short analytic paper (3-5 pages), presentation, and one research paper (8-12 pages).

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

**Expected Class Size:** 20

**Grading:**

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course examines the critical questions of how and why Africans have waged military campaigns, and how they have inspired others to join them. From the pre-colonial era to the present, all forms of military action in Africa were in many respects expressions of societal imbalances based on ethnicity, race, gender, generation, and class.

**AFR 317  (F)  Black Migrations: African American Performance at Home and Abroad**

**Cross-listings:** THEA 317 / DANC 317 / AMST 317 / COMP 319 / ENGL 317

**Primary Cross-listing**

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did
musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: discussion

Requirements/Evaluation: class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

Prerequisites: none; open to all

AFR 320 (S) Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture

Cross-listings: AMST 320 / WGSS 320

Primary Cross-listing

Whether presented as maternal saints, divas, video vixens, or bitches, black female celebrities navigate a tumultuous terrain in popular culture. This course considers the ways that black female celebrities such as Oprah, Rihanna, Nicki Minaj, Beyoncé, Janet Jackson, and Michelle Obama negotiate womanhood and sexuality, and the popular landscapes through which we witness that negotiation. It also engages contemporary black feminist scholarship, which most frequently presents the presentation of black female bodies in popular media forms as exploitive. We will review historical stereotypes of black women in popular media forms, discuss the history of the "politics of respectability" within black culture, engage black feminist responses to these types, and examine theoretical approaches to assess social constructions of womanhood and sexuality. We will also consider provocative questions relevant to discussions of contemporary black sexual politics: Should we view these women as feminists? Are they merely representatives of cultural commodification and control of black women's bodies? Do these women best exemplify the reiteration of problematic characterizations? Are they positive models for demonstrating female empowerment, agency, or "fierceness?" This course explores the histories of representation of black female figures in popular culture, and in so doing, troubles contemporary considerations of black womanhood and sexuality.

Requirements/Evaluation: evaluation will be based on attendance/participation, short response papers, and a midterm and final portfolio

Prerequisites: none

AFR 321 (F) Trending Black: Race & Social Media in the 21st Century

The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently TikTok, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

AFR 323 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: ENGL 356 / ARTH 223 / AMST 323 / COMP 322

Primary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as the late Congressman John Lewis’ March and Ebony Flowers’ Hot Comb, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one’s visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art’s Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. This class may feature Object Lab participation, film screenings, and collaborations with guest speakers.

Requirements/Evaluation: class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken AFR 200, the department’s introductory course.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

AFR 326 (F) Gender, Race, and the Power of Personal Aesthetics

Cross-listings: WGSS 313 / LATS 313 / AMST 313 / AAS 313

Secondary Cross-listing

This media/cultural studies course focuses on the politics of personal style amongst women of color in the US and around the globe in the digital era. We undertake a comparative, transnational exploration of the ways in which categories of difference such as gender, disability, sexuality, class, and ethno-racial identity inform normative beauty standards and ideas about the body. The class pays particular attention to the ways in which neoliberal capitalism shapes contemporary understandings of gendered bodies and the self. We examine an array of materials from across the disciplines including commercial websites, music videos, photography, histories, film, television, personal narratives, ethnographies, and sociological case studies. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we engage the following questions, among others: What are some of the everyday functions of personal style among women of color in the US and globally? How do Latina/x, Black, Arab American, and Asian American personal aesthetics reflect the specific circumstances of their creation, and the unique histories of these racialized communities? What role do transnational media and popular culture play in the development and circulation of gendered, raced, and sexualized aesthetic forms? How might the belief in personal style as an activist strategy complicate traditional understandings of feminist political activity? And what do the combined insights of ethnic studies, feminist studies, cultural studies, media studies, queer studies and disability studies contribute to our comprehension of gendered Asian American, Arab American, Black, and Latina/x bodies?

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-6 pages, final written reflection.

Prerequisites: LAT 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

AFR 327 (F) Topics in Philosophy of Race: Hegel and Africana Philosophy (DPE)

Cross-listings: PHIL 319

Secondary Cross-listing

How are individual and social subjects formed, and how do they connect to questions of race? What is the nature of consciousness and how can it be unhappy, false or double? What do we mean when we talk about racial capitalism? This course introduces philosophy students to these and related questions through a parallel reading that brings together 19th century German philosopher Hegel and a tradition of Africana philosophy running through Douglas, Du Bois, Fanon, Gilroy, Hartman and Wynter. While Hegel studies tends to occur in isolation from philosophers in the Africana tradition, many of the above explicitly refer to and take up questions in Hegel. This course argues that by reference to the historically specific modes of subjectivity and sociality that resulted from the Transatlantic Slave Trade and the Haitian Revolution, for instance, we can better understand and address long-standing questions in European Social Philosophy. Topics to be considered include the nature of freedom (both individual and social), the master/slave dialectic and subject constitution, self-consciousness and double consciousness, the stages of history, and racial capitalism

Requirements/Evaluation: Progressive writing assignments including 4 exegetical commentaries, one 5 page paper and one 10-12 page final paper.

Prerequisites: One prior 100 level philosophy course or permission of instructor.
Enrollment Limit: 15
Enrollment Preferences: Preference given to philosophy majors and Africana studies concentrators.

AFR 328 (F) Poetry of Indignation: Poetics and Transnational Liberation (DPE) (WS)
Cross-listings: COMP 335 / ARAB 320
Secondary Cross-listing
Poetry is usually associated with beautiful, metered, and charged language. However, beyond its poeticity, poetry has also functioned as a tool of liberation and transnational construction of identities and solidarities. States have national poets, and, in many countries, national anthems were written by famous poets. From Abu al-Qasim al-Shabbi and Claude McKay to Pablo Neruda, poetry has acted as a space for life, rebellion, resistance, revolution, and the defense of a common humanity that transcends the barriers of language and national aesthetics. This course draws on a variety of materials from the Caribbean to Africa and from the Middle East to India to conceptualize a "poetics of indignation" against slavery, social injustice, colonization, authoritarianism, capitalism, and globalization. The students in this course will read poets, such as Okot p'Bitek, Derek Walcott, Tsitsi Jaji, Mahmoud Darwish, and Pablo Neruda, among many other poets, to examine how poetics changed and shifted across times and geographic boundaries while retaining a commitment to indignation, rebellion, and anger at almost the same recurring oppressive forces.
Requirements/Evaluation: Two 5pp. midterm papers; a 1000-word reflection statement; weekly GLOW posts; one 10-minute presentation; active participation in the discussions in class.
Prerequisites: None
Enrollment Limit: 14
Enrollment Preferences: If the class is overenrolled, the students will submit a 200-word paragraph in which they explain how the course fits within their plan of study at Williams.
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
AFR 328(D2) COMP 335(D1) ARAB 320(D1)
Writing Skills Notes: The students in this course will receive intensive feedback on their writing. This includes writing two 5pp. papers as well as a 10pp. final paper. The students will submit weekly GLOW posts and a final reflection statement.
Difference, Power, and Equity Notes: The students will understand that poetry is a field in which power dynamics and imbalances of access to resources are reflected. They will also pay attention to who writes what and who publishes where in order to understand the imbrication of inequality within the institutions that produce, disseminate, and reward poets.

AFR 334 Ghosts: Race, Memory, and Haunting in the United States (DPE)
This course explores interdisciplinary scholarship, literature, and artistic work related to race, memory, and haunting in the United States. Across diverse historical moments and sites of cultural production, ghosts and other absent presences are conjured to mediate the meanings of race, gender, colonialism, enslavement, patriotism, and other keywords in American Studies. From plantations and abandoned prisons, to battlefields and sites held
sacred by indigenous communities, the contemporary ghost tourism industry offers a blend of history, national mythology, and popular beliefs about paranormal activity to reshape national memory. During the 19th century, activities such as spirit photography, telepathic experiments, and seances engaged with ghostly phenomena. In the 21st century, digital technologies have the capacity to resurrect dead musicians and other cultural icons as "holograms" or "digital humans" that can interact with the living. In a series of self-designed, analytical essays, students will explore how haunting has played an important role in the formation of American identities, how various kinds of ghosts come to life through texts, material culture, performance, and technology, and how the past can be reimagined to generate new understandings of the present and the future.

Requirements/Evaluation: Four papers, in-class writing/reflective work, and a presentation.
Prerequisites: At least sophomore standing, permission of instructor (please email instructor a brief paragraph explaining your interest in the course)
Enrollment Limit: 12
Enrollment Preferences: American Studies majors or prospective majors
Expected Class Size: 12
Grading:
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course requires students to explore the history and afterlife of racialized, gendered, and otherwise inequitable social arrangements and labor systems in the United States. Students analyze historical narratives that operate through combinations of text, material culture, performance, tourism, and digital technology, and learn about scholarly and creative interventions for reshaping memory, questioning power, and building narratives that offer a fuller picture of the past.

AFR 335 (S) Sacred Custodians: Environmental Conservation in Africa (DPE)

Cross-listings: HIST 304 / GBST 304 / ENVI 304

Secondary Cross-listing

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of deforestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental degradation that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and one exam.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies.

Expected Class Size: 15-20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 304(D2) GBST 304(D2) ENVI 304(D2) AFR 335(D2)

Difference, Power, and Equity Notes: This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference

AFR 336 (S) The Walter Rodney Seminar

Born in Guyana in 1942, Walter Rodney is one of the more important Africana Studies thinkers of the twentieth century. His work marks an inseparable relationship between Africana Studies and Marxism. This course will examine written and audiovisual materials from Rodney himself, as well as situate his work in the context of everything from British colonization of the Caribbean to the Russian Revolution to African anticolonialism to North American Black Power. The course will also introduce students to Rodney and his interlocutors, such as the members of the Institute of the Black World, the Rastafari, and CLR James. Rodney’s thought and life, then, will be a vehicle to think about the development of Africana Studies.

Requirements/Evaluation: Essays
Prerequisites: None
Enrollment Limit: 13
Enrollment Preferences: Africana Studies, American Studies, and Global Studies majors and concentrators
Expected Class Size: 13
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)
Attributes: AFR Core Electives

AFR 343 (S) Representations of Racial-Sexual Violence from Enslavement to Emancipation

Cross-listings: AMST 343 / WGSS 343 / INTR 343

Secondary Cross-listing
This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, LGBTQ and ethnic/black studies. Books include Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro; At the Dark End of the Street; films include Birth of a Nation; Bush Mama; To Kill a Mockingbird. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

Class Format: students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence
Requirements/Evaluation: weekly primary and response papers
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: preference given to juniors and seniors
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 349 Race, Gender, and Labor (DPE)

This course draws on approaches from sociology, labor studies, and Black studies to examine the historical and contemporary intersections of race, gender, and labor. In particular, we will explore the racial, classed, and gendered dimensions of the labor movement, historic economic shifts that impacted and reorganized U.S. labor regimes, Black labor in slavery’s afterlife as it relates to prisons, and global analyses of racialized gendered labor
regimes for migrant and immigrant labor within the Global South and the U.S. We will begin the course by grounding ourselves in the Black feminist framework of intersectionality, which will guide our analyses of the intersections of race, class, and gender in labor formations. We will then focus on the monumental shift in labor relations that enslaved Black people's toppling of the plantation system in the US South brought forth, as well as the technologies of re-enslavement instituted as a reaction to Black people's emancipation. After that, we will move through different themes and time periods, considering how race, gender, and class intersect in regimes of labor exploitation and the successes and setbacks of labor movements.

**Requirements/Evaluation:** Major course requirements include engagement in course discussions, reading reflections, a midterm paper, group presentations, and final research paper.

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Anthropology and Sociology, Women, Gender, and Sexuality Studies (WGSS) and/or Africana Studies majors

**Expected Class Size:** 15

**Grading:**

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course foregrounds intersectional subjectivities and perspectives. It provides interdisciplinary toolkits to strengthen students’ ability to identify and address how unequal power dynamics sustain difference and inequity—e.g., in racial and gender pay gaps and inequalities in the globalized care economy—and to practice collective strategies for transformative social change, engaging with critical epistemologies developed by workers fighting for racial, gender, and economic justice.

*Not offered current academic year*

**AFR 350 (F) The Nile (DPE)**

**Cross-listings:** ARAB 308 / GBST 320 / ENVI 335 / HIST 308

**Secondary Cross-listing**

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity's most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people’s relationship with it, changed over the last century? This course will consider the history of the Nile and and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

**Requirements/Evaluation:** short papers and final project/paper

**Prerequisites:** none, though background in Middle East history is preferable

**Enrollment Limit:** 19

**Enrollment Preferences:** History and Arabic Studies majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARAB 308(D2) GBST 320(D2) AFR 350(D2) ENVI 335(D2) HIST 308(D2)

**Difference, Power, and Equity Notes:** The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

**Attributes:** HIST Group E Electives - Middle East HIST Group P Electives - Premodern

*Not offered current academic year*
American Studies emerged with the idea that transdisciplinarity is crucial for comprehending the concept of America. Building on this framework, this course foregrounds transepistemology as an equally important method for understanding the dynamics of America, both locally and globally, at the level of the world-system. In addition to tracing the consubstantial genealogy of racism and capitalism, we will examine their local manifestations, mainly in Asia, Europe, Africa and America, as well as their current geopolitical, social and economic outcomes, especially the reproduction of systemic inequalities and domination. Through an interdisciplinary approach and engagement with a variety of resources from economics, anthropology, sociology, critical race theory, comparative ethnic studies and decolonial thinking, this course will address the following: i) review the different forms of economic organization of human societies throughout history (with special focus on the work of Karl Polanyi); ii) trace the epistemological origins of capitalism and investigate what makes capitalism and its crises unique; iii) trace the genealogy of the concepts of race, racism and discrimination; iv) interrogate the intersection of racism and capitalism in different traditions of thought and epistemologies in Asia, Europe, Africa, and the Americas. For example, we will read key texts from "French theory", (Deleuze, Foucault, etc.), US Black tradition, (W. E. B. Du Bois and Cedric Robison, etc.), Chinese social sciences (Li Shenming, Cheng Enfu, etc.) and African economy and anthropology (Mahdi Elmandjra, Cheikh Anta Diop, etc.) and Latin American decolonial philosophy (Quijano, Dussel, Mignolo, etc.) By doing this, we will situate the rupture that capitalism and racism introduced at the level of global history, which is the first step to conceptualizing racism and capitalism. After showing that the development of capitalism and racism are historically linked, we will proceed to examine the manifestations of their interaction at local and global levels. Locally, we will focus on the effects of racism on the labor market: discrimination in hiring, wage discrimination, segregation, duality and stratification of the labor market, etc. We will also analyze how sexism and racism play out in the labor market in racialized communities. We will also reflect on the links between racism and politics and their effects on economic policies. From a more global perspective, we will analyze the roots of the global economic crisis and the resulting geopolitical issues at the international level and the racist dynamics they generate. Overall, as we will move through readings, we will situate the United States in a cross-regional perspective that would enable us to develop critical insights concerning links and convergences between capitalism and racism.

Requirements/Evaluation: Requirements: An active participation is required of students in terms of engaging in the in-class debates and weekly response paper as a feedback on the lectures as well as a final paper. Evaluation: Participation 25%; Weekly Response (350-500 words) 30%; Final Research Paper (12-15 pages) 45%

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: American Studies majors and seniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 353(D2) AMST 345(D2) GBST 344(D2)

Difference, Power, and Equity Notes: This course addresses questions of difference, power, and equity through its examination of domination, racialization, the economics of discrimination, geopolitical and epistemological inequalities at the world-system level. Students will learn how racism and capitalism produce social categories, such as race, ethnicity, and class; how they interact with issues of gender; and how they perpetuate difference, power dynamics, and inequalities across these categories.

AFR 364 (S) Black Political Thought

Cross-listings: PSCI 361

Secondary Cross-listing

This seminar will introduce students to the study of Black Political Thought as a set of critical normative and diagnostic gestures that help theorize the Black experience. By thrusting students into the “problem space” of Black Political Thought, students will examine the historical and structural conditions, normative arguments, theories of action, ideological conflicts, and conceptual evolutions that help define African American political imagination. Students will take up the central philosophical questions that shaped the tradition from the early nineteenth century to the present by engaging historical thinkers like Anna Julia Cooper, W.E.B. DuBois, Frantz Fanon, Ida B. Wells-Barnett, and Ella Baker and contemporary theorists.
like Saidiya Hartman, Charles Mills, bell hooks, and Frank Wilderson—among others. Guided by a Black diasporic consciousness, students will explore the canon's structural and ideological accounts of slavery, colonialism, patriarchy, racial capitalism, Jim Crow, and state violence and, subsequently, critique and imagine visions of Black liberation. With a theoretical grounding in the "Black radical tradition," students will leave this course with the conceptual resources and philosophical tools needed to realize political theory's potential as an instrument they can employ in their daily lives to normatively and diagnostically evaluate political, economic, cultural, and social institutions.

**Requirements/Evaluation:** Weekly discussion questions; two (1-2 pages) short reading responses; and three essay-style writing assignments, including one short (3-4 pages), one medium (5-6 pages), and one longer (10-12 pages)

**Prerequisites:** at least one prior course in political theory or permission of the instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** political theory concentrators, Political Science majors, Africana majors

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course explores slavery and the psyche through a constellation of Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa. Unwieldy and generative, the opacity of race within the field (and practice) of psychoanalysis shares a fraught intimacy with the co-constitutive terrains of violence and race that form the unconscious. Querying what escapes the hermeneutics of psychoanalysis and aesthetics in the fantasies race engenders, we will examine modernity's articulation of racialization through conceptualizations--both fantasmatic and real--of self, world, knowledge, and possibility. Course texts may include: Edwidge Danticat's The Farming of Bones, Adrienne Kennedy's Funnyhouse of a Negro, Bessie Head's A Question of Power, Arthur Jafa's APEX and Love is the Message and the Message is Death, Conceição Evaristo's Poncià Vicêncio, Lars von Trier's Manderlay, Charles Burnett's Killer of Sheep, Derek Walcott's "Laventille"; and, selections from Sigmund Freud, Jacques Lacan, David Marriott, Kathleen Pogue White, Franz Fanon, Hortense Spillers, Nathan Gorelick, Jaqueline Rose, Jared Sexton, Melanie Klein, Jacques-Alain Miller, Melanie Suchet, and Jean Laplanche. Note: This course will reflect the Continental tradition in philosophy. Student should be familiar with the basic interventions of psychoanalysis.

**Requirements/Evaluation:** Weekly discussion posts and questions, 2 Papers, 10-12 pages, Research presentation

**Prerequisites:** One Writing Skills or writing intensive course; one intro course in one of following: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, Women, Gender, and Sexuality Studies

**Enrollment Limit:** 15

**Enrollment Preferences:** Juniors or Seniors with majors or concentrations in any of the areas: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, and Women's, Gender, and Sexuality Studies

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

Not offered current academic year
AFR 367 (S) Black History is Labor History (DPE) (WS)

Cross-listings: HIST 367

Secondary Cross-listing

This seminar explores labor history in relation to black people, spanning the colonial period to the early twenty-first century. It racializes the history of work by tracing the long story of black labor in the U.S. from the plantation to the plant. Whereas the bulk of the course will analyze black labor and labor movements in the twentieth century, specifically focusing on the push for economic inclusion and mobility amid employment, societal and union-related racial discrimination, we will examine what involuntary black labor meant in the context of slavery and the construction of a capitalist economy. Likewise, we will devote attention to black workers with regard to such topics as antunionism, deindustrialization, economic inequality, Fordism, informal economies, Jim and Jane Crow, labor radicalism and violence, New Deal and welfare, the rise of civil rights unionism, and slavery and capitalism, among other themes.

Requirements/Evaluation: Students are expected to participate actively and will write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper.

Prerequisites: Recommended for students with sophomore standing or above and first-year students who both have taken a 200-level history course and have received instructor permission to enroll into the course.

Enrollment Limit: 25

Enrollment Preferences: HIST and AFR majors followed by students with sophomore, junior, or senior standing. If the course is overenrolled, students will be given a questionnaire and only first-year students who have completed a 200-level history course will be enrolled.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 367(D2) AFR 367(D2)

Writing Skills Notes: Students will be required to write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages). Throughout the semester, these writing assignments will total roughly 22-30 pages. Students can expect to have line-edited feedback on their papers with substantial and timely, writing-related suggestions for improvement.

Difference, Power, and Equity Notes: This course racializes the study of labor history, focusing on black people and their experiences in the United States from the plantation to the plant. It challenges students to confront and to redefine what it means to labor, grasping how slavery, segregation, and systemic inequalities amid black people's pursuit of citizenship, equality, and freedom have shaped their economic, political, and social conditions and identities.

AFR 369 (S) African Art and the Western Museum (DPE) (WS)

Cross-listings: ARTH 308

Secondary Cross-listing

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the current digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. Further, students will explore how the dialogues created between objects, individuals, and space often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of
the museum.

**Requirements/Evaluation:** Targeted bi-monthly writing assignments (3-5 pages in length) and bi-monthly peer response paper (1 page in length)

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Art History and African Studies Majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 369(D2) ARTH 308(D1)

**Writing Skills Notes:** Targeted bi-monthly writing assignments (3-5 pages in length) and bi-monthly peer response paper (1 page in length). Students can expect to receive timely comments on their writing skills, with suggestions for improvement from the instructor.

**Difference, Power, and Equity Notes:** This course explores issues of agency, authenticity, and appropriation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students will analyze how the meaning of "African art" has been largely dictated by a Western museum culture and how this hegemony is currently being disrupted through strategic exhibition and display practices and narratives.

**Not offered current academic year**

**AFR 372** (F) **Cuba, US, Africa, and Resistance to Black Enslavement, 1791-1991** (DPE)

**Cross-listings:** AMST 400 / GBST 400 / INTR 400 / PSCI 379

**Secondary Cross-listing**

This seminar focuses on the entwined histories of liberation movements against racism, enslavement, and imperialism in the US, Cuba and Africa. Readings include: Hugh Thomas, *Cuba: A History; Che Guevara: The Motorcycle Diaries;* Walter Rodney, *How Europe Underdeveloped Africa;* Laird Bergad, *The Comparative Histories of Slavery in Brazil, Cuba, and the United States;* Thomas Sankara, *Women's Liberation and the African Freedom Struggle;* Nelson Mandela and Fidel Castro, *How Far We Slaves Have Come!* Students will read and analyze texts, screen documentaries, collectively compile a comprehensive bibliography, and present group analyses. The seminar is open to all students; however, priority is given to seniors majoring in American Studies.

**Requirements/Evaluation:** Reading and analysis of texts, collective compilation of a comprehensive bibliography, presentation of group analyses; two brief papers due at midterm and the end of the semester

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Seniors majoring in American Studies

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Cross-listings:** AMST 372 / STS 373
Secondary Cross-listing

This course is an introduction to theories, methods, sources, and approaches for interdisciplinary research and creativity in and through the interdisciplinary field of American Studies. We will focus on the intersection of race, gender, sexuality, and disability with modern media technologies, from early photography in the mid-19th century to contemporary trends in machine learning and artificial intelligence. Through a process of shared inquiry, course participants will investigate the ways that historical legacies of oppression and futuristic speculation combine to shape human lives in the present under racial capitalism. Whether analyses of the automation of militarized border control in Texas, or of the ways that obsolete, racist concepts are embedded in machine vision and surveillance systems, the readings in the course will chart out the key moments in the co-evolution of race and technology in the Americas. Students will gain a working competence in all four tracks of the American Studies major (Space and Place; Comparative Studies in Race, Ethnicity, and Diaspora; Arts in Context; and Critical and Cultural Theory). Finally, we will also explore alternative paths toward a future where technology might help to effect the abolition of oppressive structures and systems, rather than continue to perpetuate them.

Requirements/Evaluation: Four papers, in-class writing/reflective work, and a final exam.

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: AMST majors or prospective majors.

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 372(D2) STS 373(D2) AFR 374(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to contextualize technologies historically and in relation to one another, with attention to their entanglements with racial discourses and racism. Students gain critical skills that equip them to imagine possible futures where technologies serve increasingly as abolitionist tools.

AFR 376 (S) Black Critical Theory, Black Avant-Garde (DPE)

Cross-listings: AMST 374 / ENGL 311

Secondary Cross-listing

What is the relationship between violence and what constitutes the Black avant-garde and Black critical theory? Is it possible to conceptualize the latter two without an investigation of Black rebellion and its relationship between Black artistic and intellectual production? Can one argue that Black critique is none other than Black experimentation in form, or that Black abstraction is the requisite effector for all modes of Black praxis and thought? This course will explore these questions through a study of Black continental and diasporic avant-garde texts in multiple mediums. Alongside, we will also consider the emergence of contemporary Black critical theory, chronicling its development as both experimental and critical. Through the works of historical subjects of experimentation also considered to be objects critiquing in experimental form, the course will approach Black avant-gardism and Black critical theory as a productive opportunity to think about Blackness as critique, as experimentation, and as theoria. This pairing of Black avant-gardes and Black critical theory takes "avant" at its root--indicating what precedes or takes precedent--and "garde" as what is preeminent, or what protects. As such, we will start with the question of whether blackness, as an ideological fiction produced through violent historical ideologies and practices, could ever, or ever not, be anything but avant-garde?

Requirements/Evaluation: Weekly discussion posts and questions, a research presentation, and two 10-12 page papers

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Preference will be given to AMST majors and prospective majors, as well as ENGL and AFR majors or prospective majors.
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option

AFR 377 (S) Policing, Punishment, and Protest in African American History

Cross-listings: HIST 369

Secondary Cross-listing
This seminar will examine the development of the criminal legal system in the United States from the early republic to the present. Topics of study will include legacies of racial slavery; convict leasing; dynamics of gendered state violence; police tactics and technologies; the Great Migration and its impact on policing in the urban North; prisoner rights movements; urban rebellions; law and order politics; the Wars on Crime and Drugs and the rise of mass incarceration. This course will pay particular attention to the distinct relationships between domestic regimes of policing and imprisonment and various Black political struggles. By placing these topics in conversation with the history of African American life and politics, this course seeks to highlight the ways in which the criminalization of Black people has circumscribed Black citizenship and inspired successive insurgent movements for reform of the American carceral system.

Requirements/Evaluation: Students will be graded on class participation, reading responses, an Op-Ed paper (1200-1500 words), a book review (5-7 pages). In addition, students will work in groups to develop a podcast related to course themes.

Prerequisites: None

Enrollment Limit: 25
Enrollment Preferences: History and Africana Studies majors

LEC Section: 01 MR 1:10 pm - 2:25 pm Andrew L. Grim

AFR 381 (F) Media and Society in Africa (DPE) (WS)

Cross-listings: GBST 480 / HIST 480

Secondary Cross-listing
The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.
Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: This course open to all students

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 480(D2) AFR 381(D2) HIST 480(D2)

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques - both oral and written - from the professor, as well as oral critiques from tutorial partners.

Difference, Power, and Equity Notes: Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

Not offered current academic year

AFR 383 (S) The City in African American History

Cross-listings: HIST 371

Secondary Cross-listing

This course will explore African American urban life in the twentieth century. In particular we will examine the complicated role that cities have played in African American history, serving simultaneously as sites of exclusion and exploitation, and as sites of community organizing and institution building. Through engaging with a variety of case studies, students will examine the ways that African American struggles for equality and self-determination have shaped, and been shaped by, the urban environment in the modern US. Topics of study will include the Great Migration; redlining, real estate, and residential segregation; crime, policing, and surveillance; suburbanization, urban divestment, and the "urban crisis"; municipal politics and policy making.

Requirements/Evaluation: Active participation in class discussion, three 5-6 page essays, a digital history exercise, and a final 8-10 page independent research paper

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: Preference to History majors and Africana Studies majors

Expected Class Size: 15-20

Grading: yes pass/fail option, yes fifth course option

AFR 385 (S) Assata Shakur and the War on Terror

Since the 1970s, various US policing units, ranging from local New Jersey police to the FBI, have considered Assata Shakur a terrorist. Importantly, most scholarship on terrorism traces contemporary terrorism discourse to the 1970s. This course therefore approaches the trajectory of Assata Shakur through state archives as a guide for understanding developments in counterterrorism. Attention to her story illuminates the relationship between
counterterrorism and the persistent question of armed resistance. It also highlights debates on the nature of black people's positioning in the US: as a racial group facing discrimination or as an internal colony? Archival materials like Shakur's letters from prison discussing Islam, her autobiography, and her other writings are an anchor for the course, giving a throughline to additional readings that will allow us to dive into a range of issues to which she is connected: Black land ownership in the South; the politics of the Black Liberation Army and similar Third World formations abroad; the influence of Black Islam through the story of the Shakur family; the experiences of women in prison; the role of Cuba, Algeria, and asylum across the Third World.

Requirements/Evaluation: Attendance/participation, presentation, and final paper
Prerequisites: None
Enrollment Limit: 13
Enrollment Preferences: Africana Studies, American Studies, and Religion majors and concentrators
Expected Class Size: 13

Spring 2025
SEM Section: 01 MW 11:00 am - 12:15 pm Aliya Husain

AFR 387 (S) Love is Lifeforce: June Jordan's Living Room
This course is an immersive look at Black feminist poet June Jordan's intimate anti-imperialist work Living Room. Drawing on Jordan's belief that "poems are housework," and her vision of "living room" as form of accountable inclusive peace on earth, this course will include weekly opportunities for reflective writing* prompted by Jordan's work, real-time engagement with a wide range of community members beyond Williams who are inspired by Jordan's life and poetry. The mid-term assignment will be for each student to create a "breathing room" resource or peace practice that is shareable with other students and the world and the final assignment will be to facilitate a workshop for a community of your own accountability (with 1 or more real-time participants) drawing on at least one poem from Living Room.

Requirements/Evaluation: Weekly reflective writing, a mid-term assignment asking you to create a self-care/political warfare resource that is shareable with other students and the world, and a final assignment involving the facilitation of a workshop for a community of your own accountability (with 1 or more real-time participants). Evaluation based completely on participation in the workshops and the completion of the mid-term and final assignments.
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Should the course be overenrolled, preference will be given to Africana Studies students.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
Attributes: AFR Theories, Methods, and Poetics
Not offered current academic year

AFR 388 (S) "The Black Unicorn: Audre (Lorde) as Avatar"
This course is a deep and expansive dive into Black lesbian feminist socialist warrior mother poet Audre Lorde's transoceanic poetic work The Black Unicorn. Guided by Lorde's vision that her poems would not only offer beautiful images to readers but teach readers how to "re-feel" their own capacity for being alive, this course will include weekly opportunities for reflective writing prompted by Lorde's work, and real-time engagement with a wide range of community members beyond Williams who are inspired by Lorde's work. Reflective writing, as I use it, is a technology for participants to use writing to gain clarity on their own internal life, which is different from writing to demonstrate knowledge or to create beauty in the world. The fall and spring sections of the course will focus on different poems in The Black Unicorn, offering students either a fall, spring, or year-long journey into this extraordinary collection.

Requirements/Evaluation: Weekly reflective writing, a mid-term assignment asking you to create a self-care/political warfare resource that is
shareable with other students and the world, and a final assignment involving the facilitation of a workshop for a community of your own accountability (with 1 or more real-time participants) drawing on at least one poem from The Black Unicorn. Evaluation based completely on participation in the workshops and the completion of the mid-term and final assignments.

Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Should the course be overenrolled, preference will be given to Africana Studies students.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
Attributes: AFR Theories, Methods, and Poetics

Not offered current academic year

AFR 394 (S) Cold War Archaeology (DPE) (WS)
Cross-listings: AMST 412 / STS 412

Secondary Cross-listing

In this advanced American Studies course, we will examine Cold War history and culture with attention to the intersection of racialization and nuclear paranoia. The concurrent unfolding of the struggle for Civil Rights and the national strategy of Civil Defense played out against the backdrop of a global ideological battle, as the United States and the Soviet Union fought each other for planetary domination. From the scientific fantasy of bombproofing and "safety in space," to the fears of both racial and radioactive contamination that drove the creation of the American suburbs, the affective and material dimensions of nuclear weaponry have, from the beginning, been entangled with race. Drawing on the critical and analytical toolkits of American Studies and media archaeology, students will dig beneath the surface of received narratives about the arms race, the space race, and race itself. Students will uncover generative connections between mineral extraction, the oppression of Indigenous populations, the destructive legacies of "urban renewal," and the figure of the "typical American family" huddled in their backyard bunker. Finally, this course will examine the ways in which the Cold War exceeds its historical boundaries, entangles with the ideology and military violence of the Global War on Terror, and persistently shapes the present through its architectural, affective, and cultural afterlives.

Requirements/Evaluation: Three short papers, in-class writing/reflective work, and a final paper.
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: AMST majors or prospective majors.
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 412(D2) STS 412(D2) AFR 394(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to contextualize historical events during the Cold War in relation to racialization, inequitable distributions of resources, and the stratification of national space in relation to risk and radioactivity. Students gain critical skills that equip them to see the ways in which the Cold War continues to shape processes of racialization, oppression, and imperial extraction, and spatial arrangements.

AFR 396 (S) Relationality and Its Antagonisms (DPE) (WS)
Cross-listings: AMST 428 / WGSS 428
Relationality has been the defining approach, feature, and framework of ethnic studies since its inception in the late 1960s. Since then, notable scholars have applied multiple keywords, including difference, comparison, entanglements, cacophonies, and intimacies, to emphasize how processes of racialization and racial formation are not isolated and separate but inextricably linked and shaped by one another. Only from these distinct, uneven, yet shared positions of oppression, as scholars argue, solidarity across race, gender, class, sexuality, and location may emerge. At its crux, this seminar will underscore major tensions and antagonisms against frameworks of relationality. Tracing primary sources, cultural expressions, and literature within the traditions of ethnic studies and transnational/women of color feminisms, it will trace the shifts in approaches to relationality, especially as it relates to practices of reciprocity and community-building across difference. At the same time, it will turn to works that name relationality as what Frank B. Wilderson calls a "ruse," or trick, that subsumes the specific, exceptional position of blackness. Our units will include discussions of Afro-Pessimism, indigeneity, racialized settler colonialism as well as queer theory debates on queer presentism (i.e., a queer "no future") versus queer futurity. Studying the tensions that emerge from multiple, distinct, and contradictory planes of power, oppression, and temporalities, how do we assess, work through, and reconcile, if at all, relations deemed as "irreconcilable" across vectors of difference? 

Requirements/Evaluation: in-class participation, paper presentation, peer feedback, writing webs (short series of writing exercises), and final project developed from original research and/or creative work

Prerequisites: AMST 101 or WGSS 101

Enrollment Limit: 12

Enrollment Preferences: AMST and WGSS seniors and juniors

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 396(D2) AMST 428(D2) WGSS 428(D2)

Writing Skills Notes: Students will regularly engage in a series of writing exercises and submit a longer paper presentation that will be peer reviewed and revised.

Difference, Power, and Equity Notes: The main objective of the course is to study and assess ethnic studies' approaches to questions of difference, particularly as it relates to theories of racialization and relationality across multiple nodes of power and oppression.

AFR 405 (S) CAPSTONE: Africana Studies and the Disciplines

Of the many things that distinguish Africana Studies from other fields of knowledge, most remarkable are its creative uses and critiques of disciplinary perspectives. In some instances, a scholar in the field might move between disciplines; in others, a scholar might integrate two or more disciplines into one point of view. Disciplinary creativity accommodates the array of information--written texts, music, visual art, film--that contributes to our understanding of the African Diaspora. This seminar will illuminate the disciplinary nuances and challenges of studying people of African descent. After outlining genealogies of Africana Studies and the field's complicated relationships to social science disciplines, students will closely read classic texts by some of the pioneers in the field and explore their uses of disciplinary perspectives. In the latter half of the course, students will have the opportunity to design and conduct their own research projects with the aforementioned disciplinary concerns in mind.

Requirements/Evaluation: class participation, a couple of short papers and the completion of a final research paper or project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Africana Studies majors and concentrators

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)
AFR 410 (S) CAPSTONE: Black Epistemologies
How do we know what we know? This course examines approaches to this question of epistemology in Black studies in comparative perspective. We read Black epistemologies in relation to other disciplines' and thinkers' approaches. The course examines overlap and departure across lines of difference. The work of intellectual giant W.E.B. Du Bois is an anchor for the course, given his wide-ranging career over many decades. We read his statistical work in relation to that of his European contemporaries on statistics. We also think about his relationship to sociology and relatedly ethnography, the autobiographical character of critical race theory, and the historiography of the Black radical tradition in which scholars like Cedric Robinson have situated Du Bois. We look at contemporary engagement with his work to think on trajectories of Black epistemologies from the early twentieth century until today.

AFR 440 (F) CAPSTONE: Performing Blackness
In modern parlance and scholarship, blackness is understood not as a biological but rather a socially constructed phenomenon. This course extends common perceptions by working from the foundational concept that blackness is not only social construction but also performance and lived experience. Using the lens of performance on racial identity foregrounds the active and shifting nature of race in contrast to the potentially passive, static connotation of construction. But what is this term performance that is now so widely used as to be an anathema? In this course, we explore performance broadly as entertainment, representation, social function, and lived experience. By the end of the course, students will analyze multiple performance types from theatrical and dance performance to performance of race in everyday life. They will also study and practice at least four core black performance studies methodologies: oral interpretation of literature, ethnography, written performance analysis, and embodied performance (i.e. movement, music and/or theatre). In this way, students will begin to understand performance as both subject matter and method. The course will be structured around discussions, written responses, and performance exercises that help students analyze and practice each methodology. At the end of the semester, students will create final creative research projects that articulate key theories of black performance studies and draw on at least one of the featured performance methodologies. While preference is given to Africana Studies concentrators, students are not required to have prior performance experience.

Requirements/Evaluation: class participation, performance exercises, response papers and a final creative research project

AFR 460  (S)  Capstone: Documenting Black

*Documenting Black* begins with a shared understanding that depicting the stories and lives of Black folks is its own important and necessary creative form. In this Africana Studies capstone seminar we will focus on the art of documentary production as a means through which Black lives are illustrated. We will also explore the historical and conceptual framing of Black experience in the field of documentary studies, consider documentary techniques and methodologies, and discover how artists and creatives have used the medium of documentary to interpret Black diasporic life. This course is a practicum that will culminate with students writing, designing, editing, and producing a documentary short of 3-5 minutes.

**Requirements/Evaluation:** In addition to weekly course sessions, for the final project students will submit a documentary short of 3-5 minutes, which students will write, design, edit, and produce.

**Prerequisites:** Must be an Africana Studies concentrator

**Enrollment Limit:** 12

**Enrollment Preferences:** As this is a capstone designed for Africana Studies concentrators, priority will be given to third and fourth year students who have declared the concentration.

**Expected Class Size:** 10

**Grading:**  no pass/fail option, no fifth course option

AFR 19  Black Storytelling From Page To Stage

Some of the most impactful Black artists have chosen multiple genres and interwoven genres to write stories about Black life. For example, Alice Walker’s *The Color Purple* began as a novel, then became a film and a musical. With *for colored girls who have considered suicide / when the rainbow is enuf*, Ntozake Shange wrote a choreopoem that merged dance with music and poetry. It was performed on the theatrical stage and was later adapted twice into film. These multi-genre stories of Black life have stood the test of time and captured the interest of diverse communities of fans. In advance of the course, Professor Rashida K. Braggs will choose one Black performance text that is relevant to winter study 2025. Students will engage with this text through multiple genres, including written and staged forms. The course will feature student discussion, writing and analysis of Black performance. Additionally, students will explore acting, moving, writing and film approaches that they will apply to the course text. In this way, students will not only learn by viewing, listening and discussing Black art, but by creating it too. Homework will include reading and viewing Black performance texts, short written responses to contribute to discussion, and rehearsal for in-class performances. The ending course goals are to see a performance of the featured text and for students to share their own performative interpretations of it. No prior performance experience is required, only an openness and curiosity about creating Black performance.

**Class Format:** Opportunity and budget permitting, there will be a class field trip to a relevant live performance that is integrated in the course.

**Requirements/Evaluation:** Attendance, weekly readings and viewings, class discussion, in-class performances/presentations, final performance/presentation

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference will be given to students majoring in Africana Studies.

GENERAL PROGRAM DESCRIPTION

The American Studies Program, a ten-course major, uses interdisciplinary approaches to develop students’ understanding of the complexity of the culture(s) usually labeled “American.” Examining history, literature, visual media, performance, and other forms of expression, we explore the processes of cultural definition as contested by diverse individuals and groups. We ask new questions about aspects of American life long taken for granted; we also use American culture as a laboratory for testing classic and contemporary theories about how cultures work.

NON-MAJORS, FIRST-YEAR STUDENTS, AND SOPHOMORES

America: the Nation and Its Discontents, our introductory course, is open to non-majors including first-year students, who are especially encouraged to take the class. All elective courses are open to students who meet the requirements or prerequisites specified in the course description. American Studies 301, the junior seminar required of majors, is open to non-majors with permission of the instructor.

COURSES AND COURSE NUMBERING

American Studies offers courses at all levels. Our 100-level electives, which give preference to first-year students, explore a substantive topic in-depth without seeking to introduce the field as a whole. Our introductory course, AMST 101, explores broad patterns of power and imagination, struggle and social change in American culture but also introduces the interdisciplinary approach and diverse cultural artifacts, genres, and media that distinguish American Studies as a form of inquiry. Both this course and our occasional 200-level electives are appropriate for students at all levels, including first-years. The intermediate electives at the 300-level are offered primarily for juniors and seniors, although, when space and instructor policy permits, they are open to sophomores. All majors are required to take AMST 301, the junior seminar, which teaches students how to employ theories and methods central to the field. The 400-level courses designated as senior seminars are designed for senior majors, though other students (majors and non-majors) with appropriate preparation are typically welcome in these courses as well.

THE MAJOR

Required Courses

American Studies 101, America: the Nation and Its Discontents
American Studies 301, Junior Seminar
One 400-level course designated Senior Seminar

Elective Courses
Seven courses: four should be chosen from your primary specialization field; the remaining three electives must represent each of the remaining three fields, to ensure breadth of your study. At least one of your seven electives should cover pre-1900 American history or culture.

THE DEGREE WITH HONORS IN AMERICAN STUDIES
ELIGIBILITY AND APPLICATION FOR HONORS

Candidates for honors in American Studies will undertake a substantial, year-long, independent project during their senior year. Applicants should have a consistent record of high achievement in courses taken for the major, and normally will have done work in the field of study of their proposed thesis. Students who wish to write or produce an honors project should consult with both the chair and a prospective faculty adviser in the fall or winter of their junior year. Students who wish to pursue honors must submit a brief proposal describing their project to the Chair of the American Studies Program by the time of spring registration of their junior year. Final admission to the honors thesis program will depend on the AMST advisory committee’s assessment of the qualifications of the student and the merits and feasibility of the project (including the availability of relevant faculty advisers). If your thesis is approved, you will enroll in AMST 491/Winter Study/AMST 492. These courses, taken together, count as one of your required electives.

TIMELINE FOR AMERICAN STUDIES HONORS THESIS STUDENTS

The fall and winter study deadlines vary widely, depending on your own rhythms, the timing of your meetings with your adviser, etc. The first part of the fall is typically devoted to refining the questions at the heart of your project, and the scope of your argument (including literature review, archival research, etc.) Most students begin this work over the summer. We encourage our students to start writing as soon as possible. Typically, we aim to have students write a draft of one substantive chapter and the introduction by the end of finals week in fall semester, though some have produced two substantive chapter drafts instead.

January is very important. Many pages of new writing and editing of previous work will can be done in this period. Occasionally, seniors will meet together in an informal thesis colloquium. The goal for Winter Study, generally speaking, is to know by the end of it what you will need to write in the last push as Spring semester begins. Your biggest push will come in February and March. All writing and revisions should be done by the end of spring break. Here are the approximate deadlines:

- Immediate after Spring Break: draft of entire thesis is due to your adviser and your two readers;
- Two – three weeks later: deadline for readers to respond to you with comments/suggestions;
- Wednesday of the last week of classes: final version of thesis due to readers.

Senior thesis writers will share their work with interested faculty and students in a public presentation in the last weeks of the spring semester. Designation of Honors or Highest Honors will be decided by the faculty at the end of the semester.

ADVISING

All majors will be assigned a faculty adviser. Majors must meet with their adviser during the first week of classes during the fall semester and at the time of the spring semester registration period in order to have their courses and plans for the American Studies major approved. Both majors and non-majors are encouraged to talk at any time with the program chair or other affiliated faculty about the major.

AMERICAN STUDIES AND OTHER PROGRAMS

Students majoring in American Studies are encouraged to consider pursuing concentrations in Africana Studies, Environmental Studies, Latina/o Studies, Performance Studies, and Women’s, Gender and Sexuality Studies. Many of the courses counted for those concentrations may also earn credit toward the American Studies major.

STUDY AWAY FROM WILLIAMS

We encourage students to pursue cross-cultural comparative studies. A major in American Studies can be combined with study away from Williams for a semester or a year if plans are made carefully. Many courses that will be approved for College credit may also count toward the American Studies major. Many of the courses offered by Williams at Mystic Program also count toward the major. Please see the chair if you have questions about how your study abroad may enhance your American Studies experience.

Students planning to be away in the junior year should have taken American Studies 101 before they leave; those who can take the Junior Seminar before they go away are strongly encouraged to do so. Students should consult as early as possible with the chair or their adviser about their plans for fulfilling the requirements of the major.

SPECIALIZATION FIELDS

To provide focus for work in the major, each student will choose one of the specialization fields listed below and record this choice when registering for the major. (This commitment can be revised, in consultation with the chair.) At least four electives should be taken from this primary field.

ARTS IN CONTEXT
This specialization is for students interested in American arts, literature and media. Its approaches are interdisciplinary: it trains students to examine cultural artifacts with attention to aesthetic form and to the contexts—historical, social, political—that determine and situate those forms. Broadly, it asks how history has shaped the arts and media and how the arts and media have shaped how we think and who we are. Students in this specialization take courses across a range of genres and media: poetry, fiction, music, film and video, pop culture, visual culture, performance, experimental and activist art.

**Elective Courses**

Students may check with the program chair to see if other courses not listed here might count as electives.

COMPARATIVE STUDIES IN RACE, ETHNICITY, AND DIASPORA

This interdisciplinary specialization examines the role of race, ethnicity, and diasporic movements in the construction of American identities. Students explore how experiences and concepts of race and ethnicity are transformed through the processes of diaspora and immigration. These courses may encompass a broad spectrum of fields such as history, literature, religion, politics, anthropology, gender studies, media and the performing arts, among others. NOTE: Concentrators in this area are required to take a combination of courses that will allow them to comparatively assess the experiences of at least two ethno-racial groups in the Americas.

CRITICAL AND CULTURAL THEORY

Critical and cultural theory is for students who want their American Studies work to combine philosophy, aesthetics, and social thought. Its approach is methodological, conceptual, and problem-driven. Students combine courses in feminist theory, anti-imperial and postcolonial theory, literary theory, critical race theory, queer theory, psychoanalysis, Marxism, and other counter-traditions in political theory and philosophy.

ARTH 264 / AMST 264 LEC American Art and Architecture, 1600 to Present
AMST 101 (F)(S) America: The Nation and Its Discontents (DPE) (WS)

This course introduces students to the capacious and extraordinarily varied interdisciplinary field of American Studies. First institutionalized in the mid-twentieth century, American Studies once bridged literature and history in an attempt to discover a singular American identity. Over 80 years later, many American Studies scholars reject this exceptionalizing rhetoric, working instead to understand how genocide, enslavement, colonization, and militarism/war are foundational to the formation of the U.S. nation-state, and how marginalized and minoritized peoples have survived through, rebelled against, and created new visions for collectivity, relationality, and community. In this course, students will be introduced to the dynamic ways American Studies work links to ethnic studies; women, gender, and sexuality studies; literary studies, political science; critical geography; critical
media studies; disability studies; history; anthropology; sociology; art; and more. We will anchor this array of approaches by examining beliefs, practices, places, and migrations that have shaped and been shaped by the U.S., and we will pay particular attention to the people who labor for, have been racialized by, and who think critically about "America." Through close reading; discussions; and analyses of music, art, and film, we will collectively reckon with the questions of who and what makes "America" -- hemispherically, transnationally, globally. In the process, students will be encouraged to co-create a learning experience rooted in praxis, political consciousness, intersectionality, and mutual support.

Requirements/Evaluation:  Four 4-5 page papers (with attention to revision process), one project with oral presentation, and a longer, final essay.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: Core Course

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: This Writing Skills course will include multiple papers, with attention to revision, as well as an oral presentation, and a longer, final essay. Attention will be paid to the process of composing a persuasive, interpretive essay based in close analysis of texts.

Difference, Power, and Equity Notes: This course requires students to think critically about the meanings of "America" and about the consequences and costs of racialization and other processes for making social differences. Students learn to discern the ways in which historical legacies of oppression continue in the present, and consider the mutual interrelation of local, national, and global contexts and events.

AMST 107 (F) Arts of Ancestral Native and Indigenous North America

Cross-listings: ARTH 107

Secondary Cross-listing

This course introduces students to the art and architecture of ancestral Indigenous and Native North America. It will consider the artistic productions of several pre-contact and early colonial cultures that emerged in the regions now referred to as Mesoamerica, the "United States," and "Canada." Cultures to be addressed include Olmec, Maya, Teotihuacan, Zapotec, Mexica (Aztec), Chaco, Mississippian, Inuit, and Native Hawaiian, among others. Students will learn not only about these cultures but also the sources and methods by which present-day scholars have come to know of their complexity. Artforms to be addressed will include ceramics, murals, sculpture, inscriptions, feather work, shell work, sacred architecture, residential architecture, and urbanism. This is one half of a two-course sequence that also includes, "Arts of Ancestral Native and Indigenous South America and the Caribbean," (Spring 2024) and may be taken in any order or independently.

Requirements/Evaluation: Weekly readings (50 pages); Regular attendance at lectures (20%); Four 2-page artwork analysis essays due at regular intervals throughout the semester (40%); One 6-8-page final essay on a thematic topic of the student's choice (40%).

Prerequisites: None

Enrollment Limit: 45

Enrollment Preferences: Art History majors and first year students

Expected Class Size: 45

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

Secondary Cross-listing

This course introduces students to the art and architecture of ancestral Indigenous and Native South America. It will consider the artistic productions of several pre-contact and early colonial cultures that emerged in the Andes, Amazonia, the Southern Cone, and the Caribbean. Cultures to be addressed include Chavín, Nazca, Moche, Tiwanaku, Inca, Casarabe, Tupi-Guarani, Coole, Taino, and Mapuche, among others. Students will learn not only about these cultures but also the sources and methods by which present-day scholars have come to know of their complexity. Artforms to be addressed will include ceramics, murals, sculpture, khipu, tocayp, feather work, shell work, sacred architecture, residential architecture, and settlement. This is one half of a two-course sequence that also includes, “Arts of Ancestral Native and Indigenous North America,” and may be taken in any order or independently.

Requirements/Evaluation: Weekly readings (50 pages); Regular attendance at lectures (20%); Four 2-page artwork analysis essays due at regular intervals throughout the semester (40%); One 6-8-page final essay on a thematic topic of the student's choice (40%).

Spring 2025

LEC Section: 01    MR 1:10 pm - 2:25 pm     Trenton D. Barnes

AMST 113  (F)  The Feminist Poetry Movement (DPE) (WS)

Cross-listings: ENGL 113 / WGSS 113

Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major “tool” for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: two-three short analysis papers, creative (1-2 pages), curated final project (archival exhibit and digital project), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years
**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 113(D2) ENGL 113(D1) WGSS 113(D2)

**Writing Skills Notes:** Writing skills taught through a series of assignments evenly spaced throughout the semester: two to three four-to-five-page graded papers, one creative assignment, and a final digital research project (8-10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

**Difference, Power, and Equity Notes:** The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

**AMST 125 (F)(S) Introduction to Asian American Studies (DPE)**

**Cross-listings:** AAS 125

**Primary Cross-listing**

Who or what constitutes the term "Asian American"? Leading with this provocation, this course offers an introductory overview of the interdisciplinary discipline of Asian American Studies, tracing its formation and evolution from the late 1960s onward. Focusing on an array of foundational texts, cultural production, and primary sources, we will ask who has been included/excluded from this term, what the bounds are (if any), and how others approach and negotiate this term. As such, we will analyze its shifting constructions and enactments alongside other markers of difference from the nineteenth century to the present. In particular, we will be attentive to how these constructions have been shaped both relationally through other racial formations as well as overlapping systems of power, including settler colonialism, U.S. war and empire, capitalism, and globalization within and beyond the U.S. With this, we will examine how this term has been widely undone and remade via political activism, visual and performance art, plays, media, poetry, etc. The aim of this course is not to identify a single or right definition of the term "Asian American" but to collectively assess and explore the limits, reaches, utility, and expansiveness of it.

**Requirements/Evaluation:** weekly readings, in-class discussions, weekly discussion posts, two papers, and a final paper or creative project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** first-year students, AAS concentrators or prospective concentrators, AMST majors or prospective majors

AMST 135  (F)  Queen Sugar and Black Study

Cross-listings:  AFR 135

Secondary Cross-listing

The critically acclaimed and award winning television series, *Queen Sugar*, follows the Bordelon family through its struggles to sustain hold of its ancestral land. An adaptation of the eponymously named 2014 novel by Natalie Baszile, the series will soon enter its seventh and final season. This gateway course to Africana Studies will explore the historical, political, and economic contexts of the making of the series before considering its representations and dramatizations of key topics of Black study: the afterlives of enslavement, plantation regimes, global sugar production, land dispossession, the carceral state, gender and sexualities, kinship, activism, and African-diasporic spiritualities.

Class Format: Over the course of the semester, students will be required to watch the entirety of the television series.

Requirements/Evaluation:  weekly journal entries on episodes (300-500 words); in-class writing reflections; class presentation; final project that expands on a course topic

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences:  This seminar is designed for first-year students. Should the course be overenrolled, students will be selected after an interview with the instructor.

Expected Class Size: 15

Grading:  no pass/fail option,  no fifth course option

AMST 142  (S)  AlterNatives: Indigenous Futurism and Science Fiction  (DPE)

Cross-listings:  STS 142

Primary Cross-listing

Indigenous people occupy a paradoxical position in time. As survivors of genocide, they are already post-apocalyptic, occupying what could be called "their ancestors' dystopia." But Indigenous people are also imagined to exist frozen in history, merely one step in the ceaseless march of civilization that brought us to the present. This tutorial explores how contemporary Native science and speculative fiction imagines and enacts futurity from this dynamic temporal position. Looking across numerous national and transnational Indigenous contexts, we will survey a diverse range of media, including short stories, novels, visual art, video games, films, and online platforms like Second Life. Pairing these with works in Science and Technology Studies (STS) and Native American and Indigenous Studies (NAIS), we will explore concepts like the Native "slipstream," eco-erotics, post-post-apocalyptic stress, Native pessimism, biomedical speculative horror, and what it would be like to fly a canoe through outer space.

Requirements/Evaluation:  participation, weekly 2- to 4-page written responses to class readings, short fiction prompts, and/or your partner's writing

Prerequisites:  permission of instructor

Enrollment Limit: 10

Enrollment Preferences:  first and second year students, American Studies majors, Science and Technology Studies concentrators

Expected Class Size: 10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 142(D2) STS 142(D2)

Difference, Power, and Equity Notes:  Students in this course will explore the relationship between political violence, resistance, and speculation. We
will develop close reading practices, analytical methods, and careful discussion dynamics to enable students to make sense and use of concepts like futurity, race, settler colonialism, gender, and technological determinism.

**Attributes:** AMST Arts in Context Electives  AMST Comp Studies in Race, Ethnicity, Diaspora

Not offered current academic year

**AMST 146  (S)  Introduction to Native American and Indigenous Studies**  (DPE)

Consider just the last few years... during the 2016 presidential campaign then-candidate Donald Trump called Senator Elizabeth Warren "Pocahontas," a disparaging reference to Warren's claim to Native American heritage. In 2017, Los Angeles became the largest US city to rename "Columbus Day" to "Indigenous Peoples Day." Indigenous-led resistance to oil pipelines continues in multiple locations, and in 2022 Washington DC's professional football team abandoned their old name, a racial slur for Native Americans, rebranding as the Washington Commanders. Struggles in Indian Country over politics, natural resources, and representation have become increasingly visible. This course will prepare students to better understand contemporary indigenous issues. Course content will actively work against the myth that Native American history ended in 1890 with the end of militant Native resistance to US expansion. Instead, we will ask: Who are indigenous peoples? How is their status and identity determined? How do Indian nations sit within and in relation to state and federal governments? What are the pressing issues of the present moment? What are the histories that make sense of those issues? How do we explain that curious American urge to claim "Indian blood" and to create novels and films about Indians? Course topics will include colonialism, tribal sovereignty, Native American art, literature, and culture, activism and "Red Power," struggles over natural resources, gender and sexuality, representations of indigenous people in popular culture, and more. We will enrich our classroom activities with visits to the Williams College Special Collections and the Williams College Museum of Art. This course offers a broad introductory survey of these and other issues as it explores the development and current state of the interdisciplinary field known as Native and Indigenous Studies.

**Requirements/Evaluation:** Assignments will include weekly discussion, responses to assigned readings, short papers, and essay exams for the midterm and final.

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** American Studies majors or first- and second-year students

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2)  (DPE)

**Difference, Power, and Equity Notes:** This course focuses on race, indigeneity, and the ongoing forms of colonialism that infringe on the sovereignty of indigenous nations. Students in the course are asked to explore how difference, power, and inequality have shaped the history of the United States and other settler-colonies.

**Cross-listings:** STS 150 / SOC 150 / WGSS 150 / INTR 150

**Secondary Cross-listing**

This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

**Class Format:** This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.
**Requirements/Evaluation:** Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

**Prerequisites:** None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

**Enrollment Limit:** 18

**Enrollment Preferences:** Students without prior college-level courses in statistics and programming.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

**Difference, Power, and Equity Notes:** This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGBTQ+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

**Quantitative/Formal Reasoning Notes:** This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

**AMST 164 (F) Communications in Early America (DPE) (WS)**

**Cross-listings:** HIST 163

**Secondary Cross-listing**

How did the multiplicity of people who shaped "early" North America communicate with each other, across profound linguistic, cultural, social, political, and spiritual differences? What strategies did they use to forge meaning and connections in times of tremendous transformation, while maintaining vital continuities with what came before? This course examines histories of communication in North America and the technologies that communities have developed to record, remember, advocate, persuade, resist, and express expectations for the future. Using a continental and transoceanic lens of "Vast Early America," we will take up Indigenous oral traditions, Traditional Ecological Knowledge, wampum belts, and winter counts as expressions of ethics, identity, relationality, and diplomacy among sovereign Native/Indigenous nations. We will reflect on artistic and natural science paintings, engravings, and visual culture that circulated widely; and diaries and journals as forms of personal as well as collective memory. We will work with political orations, newspapers, pamphlets, and other forms of print culture that galvanized public opinion in the Age of Atlantic Revolutions; memorials and monuments that communities have created to honor ancestors and significant events; material culture such as baskets and weavings that signified through their imagery and physical forms; and social critique and visions of justice in the verse and prose of Phillis Wheatley Peters and William Apess. These materials take us into the complexities of individuals' and communities' interactions and relations of power. They also illuminate spaces of potential or realized solidarity, alliance, and co-building of new worlds. Throughout we will work together to understand different methodologies, theories, practices, and ethics involved in approaching the past. We will at every turn be attuned to the ongoing significances of these experiences among communities in the twenty-first century.

**Requirements/Evaluation:** active participation in class discussions, several short essays based on readings and discussion topics, museum/archives exercise, final essay/project

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** limited to first- and second-year students who have not yet taken a 100-level course in History or American Studies; juniors and seniors only with the permission of the instructor

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
AMST 164(D2) HIST 163(D2)

Writing Skills Notes: Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

Difference, Power, and Equity Notes: This course centers experiences of diverse people in early America including substantial focus on Native American/Indigenous and African American communities. It introduces foundational methods for historical and interdisciplinary study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories; critical vantages on Euro-American settler colonialism; and scholarship on complex entanglements in multiracial and multiethnic communities

AMST 166  (F)  Being Muslim, Being American: American Muslim Literature in the 21st century  (DPE)

Cross-listings: COMP 166 / ENGL 268 / REL 166

Secondary Cross-listing
Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

Requirements/Evaluation: regular reading responses, short midterm essays, and final paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: First-year students and sophomores
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option

**Difference, Power, and Equity Notes:** This tutorial examines the Cold War between the US and the USSR and attempts to use intellectuals to shape and promote the objectives of powerful state entities. The power struggle between the two "superpowers" impacted cultural production and authors. Some of those authors influenced or enlisted into the Cold War sought equity and equality for their communities and eventually fought against the very political powers that employed them.

Not offered current academic year

**AMST 203 (S) Militarism and American Culture (DPE)**

This course examines the impact of warfare on the history of the United States. Considering a range of conflicts, from the violence of European colonialism to the ongoing War on Terror, the course pays particular attention to the ways in which military violence has shaped (and been shaped by) American culture. In particular, students will engage with texts that interrogate the relationship between race and violence in US history. Students will analyze shifting representations of war through engagement with cultural texts such as film, television, literature, and comics. The scope will be broad, with attention paid to larger conflicts such as the World Wars and the Cold War, as well the lesser-known wars and occupations that have continually occupied the US military.

**Requirements/Evaluation:** Assignments will include daily discussion, short papers, and essay exams for the midterm and final.

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** American Studies majors and students that have taken introductory AMST or History courses.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** Readings, assignments, and discussions in the course will focus on the relationship between race, class, gender, sexuality, and expansion of US power. In particular, students will engage with texts that interrogate the relationship between race and violence in US history, a relationship implicated in many of the topics we will focus on, including the "Indian Wars" of US continental expansion, the seizure of overseas territories such as the Philippines, and encounters with the Middle East.

**AMST 206 (S) Designer Genes (DPE)**

**Cross-listings:** ENGL 208 / STS 208 / WGSS 208

**Secondary Cross-listing**

In this course, we explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify
humans," as the anthropologist Eben Kirksey has documented in his new book The Mutant Project. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary In the Family, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel Dawn explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film Gattaca shows us a fully realized dystopian society where genetically modified humans are the norm—a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects.

Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

Requirements/Evaluation: Personal essay, short analysis papers, final research group project

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: None; if class is overenrolled, professor will ask for statements of interest.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 208(D1) STS 208(D2) WGSS 208(D2) AMST 206(D2)

Difference, Power, and Equity Notes: This course asks students to think deeply about questions of social justice in the context of the revolution in modern genetics. Race, class, gender, and sexuality all play a role in who has access to new life-saving technologies, and how these technologies are used. This course employs critical tools (feminist and queer theory, ethics’ case studies, close reading) to help students question and articulate the social injustices at play in scientific research and bioengineering.

AMST 208  (S)  Time and Blackness

Cross-listings: REL 262 / AFR 208

Secondary Cross-listing

The concept of time has been one of the most examined, yet least explicitly theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory—which involves thinking about time—time itself has rarely the subject of sustained inquiry. This may be due to its abstractness as an idea, and the level of analysis its conceptualization demands, or because time in the Black experience cannot be understood outside of the meaning of race, which itself is not completely tangible. In this tutorial, ”Time and Blackness,” we will explore how Black writers across a number of genres—spiritual autobiography, fiction, memoir, literary criticism, and cultural theory—understand time, and create paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in Black writings? How does race shape the ways Black writers conceive the experience of time? And, finally, to what can we attribute the recent surge in explicit, theoretical examinations of ”time and blackness”?

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies

AMST 209  (F)  Latinx Visual Arts

Cross-listings:  LATS 205 / ARTH 201

Secondary Cross-listing

This course introduces students to Latinx visual arts and the histories of the communities from where this artistic production emerges. Latinx art and artists have gained significant attention and inclusion in the art world. For example, the opening of the Cheech Marin Center for Chicano Art and Culture reignited interest in Chicana/o art and revamped pressure on peer institutions to diversify their collections, exhibitions, and programming. While this renewed interest is positive, this context runs the risk of framing Latinx art as a new and an emergent category, thus dismissing a longer history of visual arts within Latinx communities across the U.S. This course offers an historically grounded introduction to Latinx visual art by placing the artistic production for the groups included under the label "Latinx" in their social, political and historical contexts. The course provides students with the visual arts vocabulary and theoretical skills to analyze visual art forms including sculptures, murals, posters, performances, and altars, while exploring their relevance to Latinx communities and American art. In debunking the notion of Latinx art as a new phenomenon, students will understand the conditions, struggles, and modes of resistance that inspire Latinx visual arts production in the U.S. since the 19th century and into our contemporary moment. Students will deepen their visual art literacy, enrich their understanding of the histories encapsulated by the term "Latinx," and develop their appreciation for the visual arts.

Requirements/Evaluation:  Discussion participation, weekly reading responses, two 3-6-page essays, and a final 8-10 page paper.

Prerequisites:  None

AMST 211  (S)  Race, Environment, and the Body

Cross-listings:  ENVI 211 / SOC 211 / AFR 211

Secondary Cross-listing

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions--like literature, scholarship, music, and film--we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation:  class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites:  none

Enrollment Limit:  20

AMST 213  (F)  Asian/American Identities in Motion  (DPE)
Cross-listings:  AAS 216 / DANC 216 / GBST 214 / ASIA 216 / THEA 216
Secondary Cross-listing

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian American (including South Asian) communities are cultivated, expressed, and contested. Students will engage with how social and historical contexts influence the processes through which dance practices are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies to engage with issues such as nation formation, racial and ethnic identity politics, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include screenings, movement workshops, and discussion with guest artists and scholars. No previous dance experience is required.

Requirements/Evaluation: reading responses, in-class writing assignments, participation in discussions and presentations, two 5-6 page essays, and a final cumulative essay assignment.

Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences:  first years and sophomores
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AAS 216(D2) AMST 213(D2) DANC 216(D1) GBST 214(D2) ASIA 216(D1) THEA 216(D1)

Difference, Power, and Equity Notes: This course introduces students to the role of performance in nation formation in Asia and the history of Asian Americans in the US through analysis of dance practices. Student will explore how race was central to the formation of Asian and the American nations, and how social and legal discriminatory practices against minorities influence identity and popular cultural practices. The assigned material provide examples of how artists address these inequalities and differences in social power.

SEM Section: 01    WF 11:00 am - 12:15 pm    Munjulika R. Tarah

AMST 218  (S)  Black and Brown Jacobins  (DPE)  (WS)

What does it take to be free in the free world? In this class we explore the dark side of democracy. The title is inspired by C.L.R. James' famous book, Black Jacobins, about the Haitian Revolution (1791-1804). This revolution was the most successful revolt of the enslaved in recorded history. But the irony is that their oppressors were the leaders of the French Revolution across the Atlantic. Those who proclaimed "liberty, equality, fraternity" for themselves violently denied them to others. There is a similar dismal irony to the American Revolution, as captured by the title of Frederick Douglass’ famous 1852 speech, "What to the Slave Is the Fourth of July?" Not even the Civil War could resolve this issue, as demonstrated by the failure of Reconstruction and the rise of Jim Crow. To revisit this history, we will read W.E.B. Du Bois' great book, Black Reconstruction in America. Alongside a selection of readings by canonical postcolonial writers and current political theorists, James and Du Bois provoke us to ask what it would take for the democratic world to be truly free.
Requirements/Evaluation: Mandatory in-class free writing, three five-page position papers, and three mandatory in-class debates
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: AMST majors or prospective majors, then sophomores
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)

Writing Skills Notes: “Black and Brown Jacobins” is a writing-intensive course focused on persuasive argumentation. Each day in class will begin with 5-10 minutes of free writing in response to a prompt. At the end of each unit, students must complete a position paper (three in total). These papers will be accompanied by in-class debates in which students will be asked to argue both sides of the prompt they have been given.

Difference, Power, and Equity Notes: “Black and Brown Jacobins” calls into question the success of modern democracy from the perspective of minoritized groups, in particular Black Americans and Afro-Caribbeans. Students will grapple with the legacy of enslavement in the Americas, the Haitian Revolution (1791-1804), the American Civil War and Reconstruction (1861-1877), Jim Crow, and our current era of mass incarceration. The question driving this course is, what does it take to be free in the free world?

AMST 220 (S) Introduction to African American Literature

Cross-listings: ENGL 220 / AFR 220
Secondary Cross-listing

What does it mean, socially, culturally, historically, personally, and spiritually, to be African American? No single, simple answer suffices, but African American literature as a genre is defined by its ongoing engagement with this complex question. This course will examine a series of texts that in various ways epitomize the fraught literary grappling with the entailments of American blackness. Readings will include texts by Frederick Douglass, Booker T. Washington, Zora Neale Hurston, Langston Hughes, Richard Wright, Ralph Ellison, Amiri Baraka, Toni Morrison, and Ishmael Reed.

Requirements/Evaluation: writing assignments for the course will total 20 pages, distributed over three papers
Prerequisites: none

AMST 222 (S) Hip Hop Culture (DPE) (WS)

Cross-listings: ENGL 221 / AFR 222 / MUS 217
Primary Cross-listing

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced "diggin' in the crates"—a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop's tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a
media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

Requirements/Evaluation: Four papers, project with presentation, and a final exam.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: AMST majors or prospective majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 222(D2) ENGL 221(D1) AFR 222(D2) MUS 217(D1)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

AMST 224 (S) U.S. Latinx Religions

Cross-listings: LATS 224 / REL 224

Secondary Cross-listing

In this course, we will engage aspects of Latina/o/x/e religious beliefs, experiences, practices, and expressions in the United States of America. Given the diversity of Latinx communities and religious lives in the U.S.A., we consider select contexts that help us understand the challenges of studying and defining the "religious" and its hybridity in Latinx contexts. We will survey certain selected religious traditions and practices in Latinidad -- such as popular devotions to La Virgen de Guadalupe, healing traditions and curanderismo, home altar traditions, Latinx Pentecostalism, crypto-Judaism, Latinx Muslims, and African-rooted spiritualities such as Santería. In addition, we will study Latinx approaches to traditional US religious expressions of Roman Catholicism and Protestantism. By focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, film, we will seek to garner a greater understanding of how Latinx communities express and practice their religious traditions and spiritualities.

Class Format: discussion

Requirements/Evaluation: class participation, discussion forum posts, a 3-4 short essay on the nature of Latinx spirituality; a 5-page essay on a religious tradition previously unfamiliar to the student, and an 8-10-page final research paper doing comparative religious study.

Prerequisites: none

LEC Section: 01  TR 11:20 am - 12:35 pm  Efrain Agosto

AMST 225  Black Outside the U.S.

This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one's racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like "Black," "noir" and "race" have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

Class Format: seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students

Requirements/Evaluation: evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: students who have taken other AFR courses, Francophone speakers and students

AMST 226  (S) Gender and the Dancing Body  (DPE)

Cross-listings: DANC 226 / WGSS 226 / THEA 226

Secondary Cross-listing

This course posits that the dancing body is a particularly rich site for examining the history of gender in America and beyond. The aim of the course is to explore ideas related to gender as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative ideologies. We will examine a wide range of dance genres, from stage performances to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course and may also include film screenings, movement workshops, discussions with guest artists and scholars. No previous dance experience required.

Requirements/Evaluation: participation in discussions and presentations, reading responses, in-class writing assignments, two 5-6 page essays, and a final cumulative essay.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first years and sophomores

Expected Class Size: 10-15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
DANC 226(D1) AMST 226(D2) WGSS 226(D2) THEA 226(D1)

**Difference, Power, and Equity Notes:** In the course, students will explore the concept of gender as a social construction and how the body's historical associations to markers of gender and sexuality lead to differences in socio-political power. The assigned texts and viewings provide examples of how bodies and their movements make meaning in a network of power relationships, and how artists use dance to address social inequalities such as sexism, racism, and transmisogyny, to imagine a more just world.

Spring 2025

SEM Section: 01    WF 11:00 am - 12:15 pm     Munjulika R. Tarah

**AMST 232 Bewilderment: Contemporary U.S. Poetry and the Ethics of Unknowing** (DPE) (WS)

"I perceive I have not really understood any thing, not a single object, and that no man ever can," wrote Walt Whitman in a great poem of 1860. "Tell all the truth, but tell it slant," answered Emily Dickinson a few years later, as if suggesting a strategy for how to write one's way into Whitman's radical uncertainty. These articulations of knowing and unknowing, of telling and untelling, continue to thread their way into U.S. poetry today. This course will explore bewilderment as both a poetic strategy and an ethical position. How do error, randomness, contradiction, obliquity, and dissociation serve the poem and the poet? How do such strategies counter ideas of literary mastery, heroism, virtuosity, privilege and celebrity? What are the political possibilities of such counter stances, especially as embodied and expressed by poets who speak from outside the stronghold of the white male establishment? We will primarily read from recently published work in the U.S., but will also be interested to track the literary traditions that have shaped how contemporary poets think and write. Authors read may include: Wanda Coleman, Eileen Myles, Anne Carson, Layli Long Soldier, Vanessa Angelica Villarreal, Fanny Howe, Terrance Hayes, Jennifer Chang, Tiana Clark, Brenda Hillman, Jane Wong, Tommy Pico, Paisley Rekdahl, Brian Teare, Diana Khoi Nguyen, and C. D. Wright.

**Requirements/Evaluation:** Classroom participation in discussion, several papers of graduated lengths and complexity (for a total of 20 pages of writing).

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 19

**Enrollment Preferences:** potential sophomore English majors have first choice, then prospective or current American Studies majors

**Expected Class Size:** 19

**Grading:**

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Gateway courses in English traditionally emphasize writing skills, and this course is no exception. Attention will paid to drafts and revisions of essays.

**Difference, Power, and Equity Notes:** The vast majority of works read are authored by poets outside the white male straight cisgender establishment. More importantly, we will constantly engage the question of how poetry may serve the needs of equity and inclusion in the U.S. contemporary literary marketplace.

**Attributes:** ENGL 200-level Gateway Courses

Not offered current academic year

**AMST 233 (S) Memory and Forgetting** (DPE)

**Cross-listings:** SOC 230

**Secondary Cross-listing**

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even "individual" memories take shape through social frameworks, and we also remember "collectively" through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart—forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include autobiographical memory and self-identity; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and
reparations.

Requirements/Evaluation: thoughtful and consistent class participation; an autobiographical essay (4-5 pages); four response papers (2 pages each); and a research paper (8-10 pages) with class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 230(D2) AMST 233(D2)

Difference, Power, and Equity Notes: This course pays particular attention to how power and inequality shape narratives about the past. We will examine and compare several efforts to transform national memories, such as the Equal Justice Initiative memorial in the United States and the Truth and Reconciliation Commission in South Africa. In doing so, we will also consider the role of memory and memorialization in broader processes of social change.

Not offered current academic year

AMST 237  (F)  Islam in the United States: Race, Religion, Politics  (DPE)

Cross-listings:  AFR 237 / REL 237 / AAS 237

Secondary Cross-listing

Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of "Black Muslim" movements represented by Malcolm X, to the current "War on Terror" era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States. Throughout the course, we will be engaging with historical and anthropological material, autobiographies, documentaries, films, historical primary-source documents, music, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

Requirements/Evaluation: regular reading responses, 2 midterm essays, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Majors and concentrators in REL, AFR, and AMST

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 237(D2) REL 237(D2) AMST 237(D2) AAS 237(D2)

Difference, Power, and Equity Notes: The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

AMST 240  (S)  Latinx Language Politics: Hybrid Voices
Cross-listings: LATS 240 / COMP 210

Secondary Cross-listing

In this interdisciplinary course we focus on questions of language and identity in the contemporary cultural production and lived experience of various Latinx communities. We consider the following questions and more: In what ways does Spanish shift as it crosses over to the US from Latin America and the Caribbean? How does Latinx identity challenge traditional notions of the relationship between language, culture, and nation? How does careful attention to language elucidate the dynamics of gender and sexuality in the Latinx community? How are cultural values and material conditions expressed through Latinx linguistic practices? In what ways might Latinx literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic ideologies, we will examine code-switching or Spanglish, bilingual education, linguistic public policy, the English Only movement, and Latinx linguistic attitudes and creative responses to linguistic colonialism. In addition to a consideration of language and identity grounded in sociolinguistics, anthropopolitical linguistics, Latinx studies, and cultural studies, we will survey a variety of literary genres including memoir, novel, and poetry. Both directly and/or indirectly, these texts address Latinx language politics, as well as the broader themes of power, difference, and hybridity.

Requirements/Evaluation: participation, two essays, final written reflection

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, then American Studies majors and Comparative Literature majors by seniority

Expected Class Size: 12

AMST 242 (S) Americans Abroad (DPE)

Cross-listings: GBST 242 / COMP 242 / ENGL 250

Secondary Cross-listing

This course will explore some of the many incarnations of American experiences abroad from the end of the 19th century to the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war, peace, and pandemic. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler’s expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? How did recent lockdowns and border closings impact and/or interrupt these complex experiences?

Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors and artists we will study chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their (and our) concept of “home” into something that reflects individual identity, and not one imposed by any national culture—American or foreign.

Requirements/Evaluation: Each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student’s own experiences.

Prerequisites: Any literature course at Williams or permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: Comparative Literature, English or American Studies majors, and/or students who have studied away or plan on doing so,
and/or students who are from international and/or bilingual (or multilingual) backgrounds.

Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 242(D2) AMST 242(D2) COMP 242(D1) ENGL 250(D1)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

AMST 244 (F) What They Saw in America

Cross-listings: SOC 244 / HIST 366

Secondary Cross-listing

This course traces the travels and writings of important observers of the United States, including Alexis de Tocqueville, Max Weber, G.K. Chesterton, Sayyid Qutb, and Wang Huning. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider's view of America—one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors' respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race.

Requirements/Evaluation: A midterm examination, two short essays, and a final paper.
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Priority given to Sociology, History, Anthropology, and American Studies majors.
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

AMST 247 (S) Cities, Suburbs, and Rural Places (DPE)

Cross-listings: ENVI 257 / LATS 230

Secondary Cross-listing

Long associated with cities in the scholarly and popular imagination, transnational migrants have increasingly settled in U.S. suburbs and rural localities and have made these places home. Through the lens of new destinations for im/migrants, this course introduces spatial methods, perspectives, and concepts to understand cities, suburbs, and rural places. We ask how geographically specific forces and actors shape migrants' living conditions, as well as consider the spatially uneven outcomes of complex processes like globalization. We analyze how different actors discursively and materially demarcate who belongs and who does not, and how these boundaries shape migrants' everyday practices. This
interdisciplinary course highlights the legal, economic, political, environmental, social, and cultural dimensions of how transnational migrants become part of and create homes in new destinations. Through a range of textual materials (academic, literary, popular, visual), we explore the construction of landscapes, how people shape space at local and regional scales, and where people do life's work and come together to build cultural space. Rooted in critical race geographies, case studies are comparative across different racial and ethnic groups in the U.S. West, South, Midwest, and Northeast. This course will be mostly discussion-based, grading based on participation, short writing exercises, four assignments, and a final project.

**Class Format:** This is also a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

**Requirements/Evaluation:** Grading based on participation, short writing exercises, four assignments, and a final project. All writing materials and exams are based on coursework.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** LATS concentrators or those intending to become LATS concentrators

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 257(D2) AMST 247(D2) LATS 230(D2)

**Difference, Power, and Equity Notes:** Students examine how race, gender, sexuality, class, and documentation status also impact how immigrants 'transition' to new migration destinations. We consider how the exercise of unequal power affects migration, settlement, and place-making. Students analyze representations and demographic data to determine how people are portrayed and what their material conditions are.

**AMST 250 (S) Penning the Path: Writing and Publishing Black Studies**

**Cross-listings:** GBST 249 / AFR 249

**Secondary Cross-listing**

Since the mid-20th century, Black intellectuals from Africa and the Diaspora have founded seminal journals within and beyond academic boundaries. Despite being separated by global distances and different contexts, these initiatives have decisively contributed to the emergence and consolidation of Black and Pan-African studies. *Presence Africaine*, founded in Paris in 1947 by Senegalese intellectual Alioune Diop; *Quilombo*, first published in 1948 by the Afro-Brazilian intellectual Abdias do Nascimento; and *The Black Scholar*, founded in California in 1969 by Robert Chrisman, Nathan Hare, and Allan Ross are just a few groundbreaking examples. From this global perspective, students will explore these and other cornerstone journals which paved the way for the emergence of Black and Pan-African Studies in the US and abroad. Additionally, the course aims to encourage students to be part of a collective effort to relaunch Kaleido[scopes]: Diaspora Re-imagined, a student led-journal created in 2014 in the Africana Studies Department by Sevonna Brown ('15), Ahmad Greene-Hayes ('16), and Nneka Dennie ('13). Students will receive guidance and mentoring to conceive and write articles, essays, audiovisual creations, and interviews with students and intellectuals from the African continent and the Diaspora in the Americas and the Caribbean.

**Class Format:** Students will be required to develop and give a class presentation focused on pioneering Black Studies journals.

**Requirements/Evaluation:** Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); formal class presentation (individually or in groups); final projects (such as essays, papers, interviews, and audiovisual creations) aimed to be published in the new edition of Kaleido[scopes]: Diaspora Re-imagined (Spring 2024).

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Students interested in expanding their knowledge and skills in writing and publishing, focusing on Black Studies/Africana journals. Should the course be overenrolled, preference will be given to Africana Studies students.

**Expected Class Size:** 10-15
We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic revealed, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move—or to stay still.

Requirements/Evaluation: Thoughtful and consistent class participation, several short reflection papers, two drafts of an opinion essay, class presentation

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Given to first-year students and sophomores, particularly those who have demonstrated an interest in AAS/SOC. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 252(D2) AAS 252(D2) SOC 252(D2)

Writing Skills Notes: Emphasis on the processes of writing and revising, several short papers on which students will receive close feedback, and drafts of a final written assessment

Difference, Power, and Equity Notes: This course explores a politics of im/mobilities: how we move through space through different bodies at the intersection of race, class, gender, ability, and citizenship. Students will use their own bodies as research sites for deepening their understanding of how we navigate the freedom to move or stay still.

AMST 252 (F) Embodied Knowledges: Latinx, Asian American, and Black American Writing on Invisible Disability (DPE)

Cross-listings: LATS 254 / AAS 253

Secondary Cross-listing

This interdisciplinary course assumes an expansive approach towards disability, defining it not exclusively as a legible identity that one can lay claim to, but rather as an identity grounded in one's relationship to power (Kim and Schalk, 2020). This course centers on the critical role of lived experience as a key site of everyday theorization for the multiply marginalized, and specifically on the ways in which invisibly disabled Latinx, Asian American, and Black American individuals write the self. As scholars in disability studies argue, self-representations of disabled individuals carry the potential for us as a society to move beyond the binary narratives of "tragedy or inspiration" so often associated with disability. Rather, the self-produced narratives of
US disabled writers of color offer a much more nuanced portrayal of everyday life with disability/ies for the multiply marginalized. Much like invisible disability itself, these self-representations ultimately refute traditional depictions of disability, and underscore the ways in which the bodymind serves as a rich, albeit often overlooked, site of knowledge. Embodied Knowledges draws on the insights of disability studies, crip studies, anthropology, literary studies, medicine, psychology, education, cultural studies, ethnic studies, American studies, gender and sexuality studies, sociology, and trauma studies. We will examine the works of Latinx, Asian American, and Black American writers and scholars others in relationship to one another, and as points of departure for examining issues such as the relationship between immigration and disability; intergenerational trauma; the impacts of paradigms such as the Model Minority Myth and notions of cultural deficit; passing; the politics of disability disclosure, the paradoxes of invisible disability; invisible disability in academic spaces; the role of culture and categories of difference such as race, gender, class and immigration status in societal approaches to and understandings of invisible disability; and future visions in the realm of disability justice and care work.

Requirements/Evaluation: Two 5-6 page essays; One group question assignment; Final reflection document

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Preference given to majors or concentrators in LATS, AMST, and AAST, in order of seniority.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 253(D2) LATS 254(D2) AAS 253(D2)

Difference, Power, and Equity Notes: This course takes up issues of difference and power in every one of its readings and materials. In particular, we examine the intersection of race, ethnicity, dis/ability, gender, sexuality and nation in our discussions of how disability helps to define our understanding of US identity and citizenship, particularly for US communities of color.

AMST 254 (F) Sovereignty, Resistance, and Resilience: Native American Histories to 1865 (DPE)

Cross-listings: LEAD 254 / HIST 254

Secondary Cross-listing

This course surveys Native American/Indigenous North American histories from beginnings through the mid-nineteenth century, tracing the complex ways that sovereign tribal nations and communities have shaped Turtle Island/North America. Equally important, it reckons with the ongoing effects of these pasts in the twenty-first century, and communities’ own forms of interpretation, critique, action, and pursuits of justice. It also introduces foundational methodologies in Native American and Indigenous Studies (NAIS) and strategies for pursuing decolonizing scholarship and action. Emphasis is on primary and secondary works produced by Indigenous authors/creators. Starting with the diversity of Indigenous societies that have inhabited and cared for lands and waters since "time out of mind," it foregrounds the complexity of Native peoples, nations, and worldviews situated in particular homelands, as well as accounts of origins and migrations. It addresses how societies confronted devastating epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial processes of colonization, extraction, and enslavement. Indigenous nations’ multifaceted efforts to maintain sovereignty and homelands through pervasive violence, attempted genocide, and dispossession are addressed, as well as forms of relations and kinship with African-American and Afro-Indigenous people. It concludes with how different communities negotiated the tumultuous eras of the American Revolution, forced removal in the 1830s, and Civil War, and created pathways for endurance, self-determination, and security in its aftermath. The course centers on Indigenous actors--intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and many others--and consistently connects historical events with present-day matters of land, historical memory, education, caretaking, and activism. Additionally, it provides an opportunity to engage with original materials in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the Stockbridge-Munsee Mohican homelands in which Williams College is located.

Class Format: Lecture with small- and whole-group discussions

Requirements/Evaluation: Attendance at lectures, active participation in class discussion, midterm exam, short essays based on readings and discussion topics, museum/archives exercise, final essay/project.

Prerequisites: none

Enrollment Limit: 40
Enrollment Preferences: History and American Studies majors, followed by first- and second-year students

Expected Class Size: 30-40

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

AMST 255  (S)  Patterns of African Diasporas to the U.S.

Cross-listings: AFR 252 / GBST 252

Secondary Cross-listing

Migration remains an integral aspect of Black experiences. This comprehensive course, formerly titled "Black Migrations: Histories of African Diaspora in the US," centers the histories of Black migration to and within the United States. Migration includes the involuntary, forceful movement of populations, but it also comprises voluntary movement of populations that seek new economic opportunities. Therefore, this course covers three historical periods of migration: 17th-19th century (Transatlantic slave trade), early 20th century (Great Migration and the arrival of Caribbean migrants to major urban centers in the United States), and the late 20th and early 21st century (Migration continental Africans to the US). This course will ask the following questions as it relates to Black migration: What were the social, political, and economic factors that contributed to the migration of Black populations to and within the US especially in the 20th and 21st century? How do current-day Black migration patterns differ from earlier periods? In what ways can migration be utilized as a form of resistance to oppression both domestically and internationally?

Class Format: discussion

LEC Section: 01 TF 1:10 pm - 2:25 pm Christopher O. Ndubuisu

AMST 258 (F) Transatlantic Political Theory (DPE) (WS)

Political theory tends to look towards Europe for inspiration. This course suggests an alternative. It traces how theory crisscrosses the Atlantic Ocean to and from Europe, Africa, and the Americas. We will begin with Alexis de Tocqueville’s 1840 classic, Democracy in America, which is a snapshot of antebellum America from the perspective of a French aristocrat. Then we will flip things around and view Europe from America. During the Cold War, American political theorists, including European émigrés, were preoccupied by the threat of totalitarianism. We will read the definitive text on this subject, Hannah Arendt’s The Origins of Totalitarianism, paying special attention to the link she makes between totalitarianism and imperialism. In the final section of this course, we will read Richard Wright’s reports on Europe and Africa during the decolonization era, and conclude with a reading of Cedric Robinson’s classic, Black Marxism. Together, these texts emphasize the importance of an African perspective on modern politics. Assignments in this reading- and writing-intensive course consist of reading quizzes, term papers, and in-class debates.

Requirements/Evaluation: Students should expect to read 50-60 pages per class on average. Graded assignments will include daily reading quizzes, three five-page term papers, three in-class debates, and one three-page book report.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Enrollment preference will go first to AMST majors, then sophomores.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Assignments include daily writing activities (short-answer reading quizzes), a 2-3-page book report, and three term papers. In preparation for writing each term paper, students will participate in an in-class debate about the prompt. These debates are an opportunity for students to test and refine their arguments before writing their papers.

Difference, Power, and Equity Notes: This class interrogates the implicit Eurocentrism of political theory by (1) arguing that the development of modern Europe cannot be understood without considering the role of imperialism and (2) showing that modern political and social theory needs to be informed by an African perspective as well.

SEM Section: 01 MWF 11:00 am - 12:15 pm William Samuel Stahl

AMST 261 (S) America Inside Out (DPE) (WS)
Why does the land of the free put so many people in prison? The United States of America has more prisoners than any other country in the world and one of the highest rates of incarceration. During the Cold War, prison writings such as Aleksandr Solzhenitsyn's *The Gulag Archipelago* were held up as the truest literature to escape the USSR. But could the same be true of the USA? Martin Luther King, Jr. is remembered as a prophet and peacemaker who spoke to America's soul. But in his own lifetime, he was famous for being a political prisoner locked in a Birmingham jail. What does it say about America when advocates of freedom and democracy end up behind bars? To be sure, there are people in prison who have committed crimes we would all consider heinous. But the plurality are non-violent offenders serving time on drug-related charges. This crackdown has continued regardless of rates of drug use and disproportionately targets poor people of color. In this class, we will explore the origins of the carceral state, starting with *Discipline and Punish* by Michel Foucault. From there, we will read the writings of US prisoners, such as Angela Davis and George Jackson, in comparison with literature from that other vast prison empire, the USSR. We will conclude by confronting the War on Drugs with Michelle Alexander's *The New Jim Crow*.

**Requirements/Evaluation:** Assignments include a daily free writing activity (graded on participation), two curated media "playlists," one 2-3-page book report, and three five-page term papers.

**Prerequisites:** None

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Class assignments include a daily free writing activity, a 2-3-page book report, three term papers, and two curated and annotated media "playlists." Students will be encouraged to develop an ongoing, reflective writing practice in response to the readings.

**Difference, Power, and Equity Notes:** This class is focused on the US prison system, which disproportionately incarcerates poor people of color. We will trace the roots of this policy outcome from the failure of Reconstruction and the rise of Jim Crow to the War on Drugs and the current regime of mass incarceration.

**Attributes:** AMST Arts in Context Electives  AMST Critical and Cultural Theory Electives

---

**AMST 262 (F) Race-Making and the Politics of Performance** (DPE)

What is the relationship between contemporary understandings of race, American national identity, and performance? From the Sons of Liberty "playing Indian" during the Boston Tea Party to spectacles of racialized violence into the freakshow exhibition of "primitive, exotic Others" and the emergence of modern theater and film in the 19th and 20th century, performance has played a central role in shaping and disseminating ideas of race and racism in the American popular imaginary. This course will examine how the overlapping histories of settler colonialism, slavery, immigrant exclusion, and imperialism have been variously framed, justified, and contested through performance (in both an artistic and everyday sense). A central contention of this class is that race is constantly "made" (and remade) through performance, which we will explore through a historical survey of theater, film, popular culture, anthropological documents, and law. We will take a comparative ethnic studies approach that tracks the interconnections between Black, Indigenous, Asian, and Latina/o racial formations across public spectacle and theatrical/cinematic representation. We will also tend to the ways in which minoritized folks have used performance as a powerful tool to rethink identity, subjectivity, and community.

**Requirements/Evaluation:** In-class participation, weekly discussion questions, short reflection papers, final paper or creative project based on original research

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference will be given to American Studies majors and students interested in majoring in American Studies.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course examines histories of racialization and racial formation through visual representation, performance, public spectacle, and media. It offers a historical perspective on how ideas of race, difference, and "Otherness" are ascribed and
reproduced across time, with a particular focus on questions of embodiment and visuality. Students will engage performance as a capacious framework through which to examine and contest dominant representations of race, gender, and sexuality.

**AMST 264 (F) American Art and Architecture, 1600 to Present**

**Cross-listings:** ARTH 264

**Secondary Cross-listing**

American art is often looked at as a provincial version of the real thing—i.e., European art—and found wanting. This course examines American architecture, painting, and sculpture on its own terms, in the light of the social, ideological and economic forces that shaped it. Special attention will be paid to such themes as the Puritan legacy and attitudes toward art; the making of art in a commercial society; and the tension between the ideal and the real in American works of art.

**Requirements/Evaluation:** 15-page research paper (divided into an annotated bibliography, first draft and revised draft); weekly study questions on the readings; final 15-minute oral exam

**Enrollment Limit:** 60

**Expected Class Size:** 60

**Grading:** yes pass/fail option, yes fifth course option

**AMST 267 (F) The Roaring Twenties and the Rough Thirties**

**Cross-listings:** HIST 266

**Secondary Cross-listing**

This course will probe the domestic history of the U.S. from 1919 to 1939 and the cultural, economic, political, and social changes accompanying America's evolution into a modern society. Themes include: developments in work, leisure, and consumption; impact of depression on the organization of the public and private sectors; persistence of traditional values such as individualism and the success ethos in shaping responses to change; and the evolving diversity of America and the American experience.

**Requirements/Evaluation:** Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two short response papers and will complete an interpretative essay (5-7 pages) focused on art from the WPA Federal Art Project.

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** HIST and AMST majors as well as students with demonstrated interest in the material

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

Fall 2024
AMST 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: AFR 283 / WGSS 283 / ENGL 286

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

AMST 284 (F)(S) Asian American History (DPE)

Cross-listings: AAS 284 / HIST 284

Secondary Cross-listing

This course offers an overview of Asian American history from the late seventeenth century to the present. It will cover the earliest Asian migration and settlement in the U.S., the rise of anti-Asian movements, the experiences of Asian Americans during World War II and the Cold War, the emergence of the Asian American movement in the 1960s, the post-1965 Asian immigration, and the War on Terror. We will investigate broader themes including labor, citizenship, political resistance, gender and sexuality, community formation, empire, and transnationalism. We will also consider key contemporary issues, including race and ethnic relations, anti-Asian harassment and violence, and the legacy of U.S. colonialism in Asia-Pacific. Along the way, we will engage classic and recent scholarship in the field, and form our own interpretations of the past based on a wide range of sources--including films, novels, newspapers, government documents, political cartoons, and more. Throughout, the course advances the argument that citizenship and belonging in the U.S. cannot be fully understood without accounting for the experiences of Asian Americans.

Requirements/Evaluation: Attendance and participation in discussion, weekly reading responses (2 pages), midterm exam, and final in-class exam and take-home essay (7-10 pages)

Prerequisites: None

Enrollment Limit: 30

Enrollment Preferences: Preference given to History majors and Asian American Studies concentrators.

Expected Class Size: 25-30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
**AMST 284(D2) AAS 284(D2) HIST 284(D2)**

**Difference, Power, and Equity Notes:** This course introduces students to the incredible diversity of Asian Americans. It guides students through an examination of the historical events, policies and dynamics that have marginalized Asian American communities based on race, ethnicity, class, gender, sexuality, citizenship, and other forms of difference. It also explores the diverse ways that Asian Americans have sought inclusion and belonging in the U.S.

**AMST 299  (F) Let the Record Show: U.S, Literature of Research and Witness  (DPE) (WS)**

**Cross-listings:** ENGL 299

**Primary Cross-listing**
This is a course on the literature of research and witness in the U.S., from 1853 to the present. We will train our attention on works of long form journalism that stand at the intersection of reportage, archival history, documentary nonfiction, narrative and activism. The writers we study present quantitative and qualitative data that document the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development. How have American writers defied disciplinary boundaries to speak truth to power? What critical reading skills are mobilized by books of sweeping scope and unflinching detail? The course will be taught in reverse chronological order. Readings include: Sarah Schulman, *Let the Record Show*; Layli Long Soldier, *Whereas*; Nicholas Lemann, *The Promised Land*; Theresa Hak Kyung Cha, *Dictee*; James Agee, *Let Us Now Praise Famous Men*; Tillie Olsen, *Yonondio*; Ida B. Wells, *A Red Record*; and Harriet Beecher Stowe, *Key to Uncle Tom's Cabin*.

**Requirements/Evaluation:** Evaluation will be based on class participation, writing and discussion. According to the tutorial format, you will be assigned a semester-long partner. You will be expected to write a critical paper every other week, alternating with the critical response to your partner's work.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** This is a tutorial for sophomores. Priority will be given to potential American Studies majors, especially those who have taken AMST101; potential English majors will be considered as space is available.

**Expected Class Size:** 10

**Grading:** no pass/fail option,  no fifth course option

**Distributions:** (D2)  (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**
AMST 299(D2) ENGL 299(D1)

**Writing Skills Notes:** As per traditional tutorial format, this course will be writing intensive. Every week, one student will write a 5-page paper responding to the readings of the week; the other student will craft a response (a combination of written notes and critical conversation). The total amount of writing for each student will thus be upwards of 30 pages. there will be considerable attention given to argument, use of evidence, etc. The option to revise a paper will always be available.

**Difference, Power, and Equity Notes:** This course shares the core mission of the DPE initiative: to teach students how to "analyze the shaping of social differences, dynamics of unequal power, and processes of change." The course is built around U.S. texts that speak truth to power. Researching and exposing the quantitative and qualitative data that prove the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development, the writers we will study merge research, writing and activism.

**Attributes:** AMST Arts in Context Electives

**AMST 301  (F)(S)  Theories and Methods in American Studies (Junior Seminar)**

This seminar serves as an introduction to theories, methods, sources, and approaches for interdisciplinary research and creativity in and through the
interdisciplinary field of American Studies. We will study diverse ways of "doing" American Studies work (including but not limited to visual studies, ethnography, literary studies, theory, or museum studies) and how this work speaks to various intellectual and political priorities within the field. Through readings, discussions, and unit assignments, students will not only deepen their knowledge of American Studies but will also have concrete opportunities to research, explore, experiment, construct arguments, and play. In the process, students will gain a working competence in all four tracks of the major (Space and Place; Comparative Studies in Race, Ethnicity, and Diaspora; Arts in Context; and Critical and Cultural Theory). Topics in the course may include environmental justice, racial formation, social movements, the prison industrial complex, infrastructure, or the aesthetics and form of minority literature.

Requirements/Evaluation: Three short papers, quiz, in-class writing/reflective work, and final research paper.

Prerequisites: AMST 101 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Juniors and seniors majoring in American Studies; sophomores planning to declare the major (especially those thinking of going abroad in their junior year)

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Required for American Studies major

AMST 304 (F) Queer in Asian America (DPE) (WS)

Cross-listings: AAS 304 / WGSS 306

Primary Cross-listing

Asian America has always been queer. This is both to say that, since the first waves of Asian immigrants to the Americas, there have always been queer individuals counted among them, and that the Asian American subject has historically figured as "queer" and "different" within the Western cultural, social, and economic landscape. How does queerness resonate, rebound, or otherwise modulate the idea and experience of Asian Americanness? What are the textures and contours of this queerness? Does it have an aesthetic and literary dimension? This course surveys a range of scholarship and literature by queer and feminist Asian Americans that explore the interpenetrations of race, gender, and sexuality in the construction of Asian America and Asian American identity. Particular focus is paid to how Asian American artists and writers actualize queer subjectivity, relation, and intimacy across experiments in narrative, form, and media. The class will move between foundational scholarship at the intersections of Asian American studies, queer studies, and gender and sexuality studies alongside key works of art and literature. Potential artists and writers include Ocean Vuong, Justin Chin, Larissa Lai, Monique Truong, Alok Vaid-Menon, TT Takemoto, Jes Fan, and Leonard Suryajaya. Students will also have the opportunity to contribute their own selection of art and literature to the class conversation.

Requirements/Evaluation: In-class participation, two critical response papers, discussion posts, creative or scholarly written final assignment

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: AMST and WGSS majors, AAS concentrators, or students interested in majoring/concentrating in these areas.

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AAS 304(D2) WGSS 306(D2) AMST 304(D2)

Writing Skills Notes: Students will write two, 3-4 page critical response papers: one will focus on analyzing, critiquing, and synthesizing scholarly texts to advance an original argument on course topics and another will focus on analyzing a literary or artistic work of the student's choosing. The final consists of a longer paper of scholarly or creative writing that engages course topics. Assignments will emphasize close reading skills and will be
Difference, Power, and Equity Notes: This course examines gender and sexuality in Asian American racial formation and identity through the work of queer Asian American art, scholarship, and literature. Students will thus focus on how queerness/queer identity is constructed, embodied, and differently experienced in Asian America in dialogue with histories of immigration, Orientalism, assimilation, and exclusion.

AMST 305 (F) The Gay Menagerie: Gay Male Subcultures (DPE)
Cross-listings: ANTH 305 / WGSS 305 / THEA 304

Secondary Cross-listing
Bears. Cubs. Otters. Pups. Twinks. Radical Fairies. Leathermen. Mollies. Drag queens. Dandies. Sisters of Perpetual Indulgence. Gay men, including gay trans men, have organized themselves into various subcultures within their community for centuries. This seminar is devoted to exploring these subcultures in (a mostly US-context) in greater detail using ethnographic texts, anthropological studies, historical accounts (including oral histories), and media. Topics include cruising and flagging, the anthropological significance of gay bars, histories of bath house culture, rural vs urban queer experiences, the ball scene, drag, diva worship, the reclamation of "fabulousness and faggotry," the leadership roles of trans women and effeminate gay men in activist movements, gay gentrification, the growth of gay consumerism/gay tourism/homonationalism, hierarchies of masculinity in the gay community (i.e., masc for masc culture), HIV/AIDS and the politics of PrEP, chemsex, the role of racialized dating "preferences," genealogies of BDSM and leather culture, sexual health and discourses of "risk," the politics of barebacking and other sexual practices, queering consent, and the effects of hookup apps on gay culture. In addition to lectures, and discussions, there will also be some low-key performance-studies based exercises in queer praxis (e.g., drag workshops, mock debates, animal improvisation, role playing, etc.)

Class Format: There will be some minor performance elements such as workshops during class.

Requirements/Evaluation: Quizzes, journaling assignment, short diva report, 10 page research paper on a gay subcultural group

Prerequisites: None; WGSS 202 (Foundations in Sexuality Studies) will be helpful but is not required

Enrollment Limit: 12

Enrollment Preferences: WGSS majors; in the event of over-enrollment there statements of interest will be solicited

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

AMST 310 (S) "A language to hear myself": Advanced Studies in Feminist Poetry and Poetics (DPE)

Cross-listings: WGSS 330 / ENGL 302

Secondary Cross-listing

The title of this course comes from Adrienne Rich's 1969 poem "Tear Gas," grounding our study in 1960s, 70s, and 80s feminist activist poetry but also in our current moment to answer a fundamental question: what can poetry do for us? In this period, feminist activist poets were at the center of a revolutionary social justice movement that changed the world. Feminist presses published much of the new poetry. This course focuses on the theory and practice of feminist poetry and print culture during this period, and how feminist experiments in language changed how we understand American poetry. We focus on the theoretical writings and poetry chapbooks of a diverse group of poets who powered the movement, including Audre Lorde, Mitsuye Yamada, Nelly Wong, Robin Morgan, June Jordan, Joy Harjo, Gloria Anzaldúa, Sonia Sanchez, Adrienne Rich, Judy Grahn, and Pat Parker. We also read the work of some later feminist theorists, such as Sara Ahmed. We spend time in the archives, analyzing documents from the period, including feminist magazines and original publications of poetry chapbooks often published by the period's many feminist presses and consider how such attention allows us to construct alternative narratives for feminism and American poetry. Writing at the intersections of race, class, gender, and sexuality, and of multiple social justice movements (Civil Rights, anti-Vietnam War, LGBTQ activism, and Black Power), these poets gave us a new language to "hear," not only ourselves, but the experience and pain of others, and, in so doing, they moved personal experience into public discourse around issues of inequality and human flourishing in a democratic society.

Requirements/Evaluation: short analysis papers (4-5 pages), creative (1-2 pages), Perusall annotations, longer final researched paper (10-12 pages) or alternative digital project, curated exhibition of archival materials in Special Collections

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: English, Women's, Gender, and Sexuality Studies, American Studies majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 330(D2) ENGL 302(D1) AMST 310(D2)

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the feminist movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the period.
**AMST 311 Four Poets: Gwendolyn Brooks, Frank O’Hara, Sylvia Plath, and Amiri Baraka**

The study of literature often relies on seemingly "objective" labels to sort and group writers. These four major American poets from the last century were often segregated into different categories: Gwendolyn Brooks (1917-2000) and Amiri Baraka (1934-2014) clumped together as black poets; Sylvia Plath (1932-1963) labelled a "Confessional Poet" and/or taught as a female poet but not a "white poet"; Frank O’Hara (1926-1966), designated a "New York School" poet but not a "white poet" or "male poet." In looking closely at the poetry of these four writers, whose work is usually not taught side by side, we will ask questions about the assumptions implicit in the concepts and categories of American (and English-language) poetics and how literary history usually gets written. For example, who is the presumed "universal" poetic speaker? Who is the assumed reader? Do our attitudes about raced and gendered bodies influence how we read raced and gendered poets? Is a queer poet read with the same particularity as a black poet?

**Requirements/Evaluation:** Two short papers (4-5 pp.) = 25%; One final paper (8-10 pp.) = 50%; Two short response papers = 15%; Participation = 10%

**Prerequisites:** None

**Enrollment Preferences:** AMST majors

**Expected Class Size:** 15

**Grading:**

**Distributions:** (D2)

---

**AMST 312 (S) Contemporary Immigration Landscapes**

**Cross-listings:** LATS 335 / WGSS 321

**Secondary Cross-listing**

What is the relationship between racial formations, transnational migrations, and power in the United States? How do geometries of power shape our relationship to place? How do people navigate and resist the exercise of unequal power relations? This course examines geographies of transnational migration, bringing together insights from critical race theory, queer theory, and postcolonial theories to enrich our understanding of human geography. Theories on belonging, identity, and power will serve as a bridge between the state's role in structuring the lives of transnational migrants and the politics of conceiving futures as alternatives to current political geographic imaginations in the U.S. immigration landscape. Through an interdisciplinary exploration of 'migration,' we will examine the depth and range of migrants' experiences (such as through Javier Zamora's *Solito: A Memoir*) and how these communities' lives are structured through various axes of difference, such as race, gender, sexuality, class, and documentation status. We will give attention to the variegated landscape of immigration enforcement and its relationship to issues of labor, political economy, and incarceration, among others. Through materials that embrace both social science and humanities approaches, this course will help students develop a critical understanding of how space matters when considering transnational processes of migration as well as migrant communities' political practices throughout the US. This course asks students to compare and contrast the intellectual genealogies covered and apply these theories of identity and power to case studies that focus on political interventions for social justice (such as UndocuQueers in the immigrant justice movement).

**Requirements/Evaluation:** Your learning is evaluated through class participation (discussion, responses, & in-class worksheets), three assignments, and a final project.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** LATS concentrators or those intending to concentrate

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 312(D2) LATS 335(D2) WGSS 321(D2)
AMST 313 (F) Gender, Race, and the Power of Personal Aesthetics

Cross-listings: WGSS 313 / AFR 326 / LATS 313 / AAS 313

Secondary Cross-listing
This media/cultural studies course focuses on the politics of personal style amongst women of color in the US and around the globe in the digital era. We undertake a comparative, transnational exploration of the ways in which categories of difference such as gender, disability, sexuality, class, and ethno-racial identity inform normative beauty standards and ideas about the body. The class pays particular attention to the ways in which neoliberal capitalism shapes contemporary understandings of gendered bodies and the self. We examine an array of materials from across the disciplines including commercial websites, music videos, photography, histories, film, television, personal narratives, ethnographies, and sociological case studies. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we engage the following questions, among others: What are some of the everyday functions of personal style among women of color in the US and globally? How do Latina/x, Black, Arab American, and Asian American personal aesthetics reflect the specific circumstances of their creation, and the unique histories of these racialized communities? What role do transnational media and popular culture play in the development and circulation of gendered, raced, and sexualized aesthetic forms? How might the belief in personal style as an activist strategy complicate traditional understandings of feminist political activity? And what do the combined insights of ethnic studies, feminist studies, cultural studies, media studies, queer studies and disability studies contribute to our comprehension of gendered Asian American, Arab American, Black, and Latina/x bodies?

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-6 pages, final written reflection.

Prerequisites: LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

AMST 317 (F) Black Migrations: African American Performance at Home and Abroad

Cross-listings: THEA 317 / DANC 317 / AFR 317 / COMP 319 / ENGL 317

Secondary Cross-listing
In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics
through their own individual and group performances in class. No prior performance experience is necessary.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** Africana Studies majors and concentrators; Dance and Theatre majors; American Studies, Comparative Literature, and English majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**AMST 318 (S) Myths and the Making of Latine California (WS)**

**Cross-listings:** LATS 318 / REL 318

**Secondary Cross-listing**

California is home not only to the largest ethnic Mexican population in the USA but also to the largest Central American population, while also being home to long-standing Latine communities hailing from Chile to Cuba. Since the era of Spanish colonization, especially starting in 1769, California has been woven into fantastic imaginations among many peoples in the Americas. Whether imagined as Paradise or Hell, as environmental disaster or agricultural wonderland, as a land of all nations or a land of multiracial enmity, many myths have been inscribed onto and pursued within the space we call California. In a state whose name comes from an early modern Spanish novel, how did certain narratives of California come to be, who has imagined California in certain ways, and why? What impact have these myths had on different Latine populations in the history of California, and how have different Latines shaped, contested, and remade these myths as well as the California landscape that they share with other peoples? In this course, we consider "myth" as a category of socially powerful narratives and not just a simple term that refers to an "untrue story." We examine myths by focusing on a few specific moments of interaction between the Latine peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest are select creation stories (found in Jewish, Christian, and Indigenous traditions), imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as part of Greater México, California as "sprawling, multicultural dystopia," and California as "west of the west," including its imagination as a technological and spiritual "frontier."

**Requirements/Evaluation:** this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Latina/o Studies concentrators, Religion majors, American Studies majors, Environmental Studies majors and concentrators, Comparative Literature majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

LATS 318(D2) AMST 318(D2) REL 318(D2)

**Writing Skills Notes:** The students are expected to engage in regular writing of response papers, a mandatory revision of their first essay after receiving instructor feedback, a second essay, and a scaffolded final project with instructor and peer feedback at different stages. Attention to writing and the ways that writing interacts with myths, peoples, and place-making is part of the practice and the theoretical orientation of the course.

AMST 320 (S) Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture

Cross-listings: AFR 320 / WGSS 320

Secondary Cross-listing

Whether presented as maternal saints, divas, video vixens, or bitches, black female celebrities navigate a tumultuous terrain in popular culture. This course considers the ways that black female celebrities such as Oprah, Rihanna, Nicki Minaj, Beyoncé, Janet Jackson, and Michelle Obama negotiate womanhood and sexuality, and the popular landscapes through which we witness that negotiation. It also engages contemporary black feminist scholarship, which most frequently presents the presentation of black female bodies in popular media forms as exploitive. We will review historical stereotypes of black women in popular media forms, discuss the history of the "politics of respectability" within black culture, engage black feminist responses to these types, and examine theoretical approaches to assess social constructions of womanhood and sexuality. We will also consider provocative questions relevant to discussions of contemporary black sexual politics: Should we view these women as feminists? Are they merely representatives of cultural commodification and control of black women's bodies? Do these women best exemplify the reiteration of problematic characterizations? Are they positive models for demonstrating female empowerment, agency, or "fierceness?" This course explores the histories of representation of black female figures in popular culture, and in so doing, troubles contemporary considerations of black womanhood and sexuality.

Requirements/Evaluation: evaluation will be based on attendance/participation, short response papers, and a midterm and final portfolio

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Women's Gender & Sexuality Studies majors and Africana Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

AMST 323 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: ENGL 356 / ARTH 223 / AFR 323 / COMP 322

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as the late Congressman John Lewis’ March and Ebony Flowers’ Hot Comb, this course illustrates and critiques multiple ways the graphic novel comingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one’s visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art’s Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. This class may feature Object Lab participation, film screenings, and collaborations with guest speakers.

Requirements/Evaluation: class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken AFR 200, the department’s introductory course.

AMST 326  (F)  Unfinishing America  (DPE) (WS)

Cross-listings:  ENGL 316

Primary Cross-listing

The Great American Novel is a moribund cliché. Few would argue that any one work of fiction could capture the essence of American life. In this class, we will flip the Great American Novel on its head by reading Ralph Ellison's unfinished second novel. After publishing the acclaimed Invisible Man in 1952, Ellison seemed poised to deliver the next Great American Novel. But he never did. When he died in 1994, 42 years later, he left behind thousands of pages of material, but no finished second novel. Why wasn't he able to finish it? Some of it was bad luck. Some of it was a struggle with genre and form. However, perhaps the real reason Ellison's novel proved impossible is what it was trying to say. This is a book about the historical trauma of racism. Therefore, the thesis of this class is that the Great American Novel cannot be written as long as American history remains whitewashed. Ellison's manuscript shows this in surprising ways, from its depiction of racial passing and the taboo of interracial sex to its extended exploration of Black and Indigenous cultures in the former Oklahoma Territory. In addition to Ellison, we will read the work of the Chicano author Tomás Rivera, whose fragmentary fictions provoke similar questions. This class culminates in a final project that asks students to "unfinish" an American cultural object.

Requirements/Evaluation:  Assignments include a daily free-writing exercise, graded note-taking, three 1-2-page reflective essays, two brief creative writing assignments, and a final creative project.

Prerequisites:  None

Enrollment Limit:  15

Expected Class Size:  15

Grading:  no pass/fail option,     yes fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 316(D1) AMST 326(D2)

Writing Skills Notes:  Each student will be responsible for producing a reader's guide to Ellison's unfinished second novel. Students will write, rewrite, and revise their reader's guide throughout the semester. Three drafts will be due throughout the semester. A quality reader's guide will highlight the book's main themes, profile the main characters, and retrace the book's development. Students will also complete one draft of a guide to Rivera's novella, due at the end of the semester.

Difference, Power, and Equity Notes:  "Unfinishing America" satisfies the Difference, Power and Equity requirement because it calls into question mainstream American culture from Black, Chicoan, and Indigenous perspectives. It interrogates the relations of power that have driven American history, from the Civil War and Westward expansion in the 19th century to the struggle for Civil Rights against Jim Crow in the 20th. Finally, it asks what it would mean to have true equity amidst great diversity in American culture.

AMST 334 (S) Sexual Economies  (DPE)
Cross-listings: ANTH 301 / WGSS 301

Secondary Cross-listing

This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include “traditional” forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of “sex trafficking.” Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We have a variety of guest speakers to share their diverse lived experiences related to this topic.

Requirements/Evaluation: short-quizzes, reflection papers, participation, short Marco Polo video posts (app 3 min each)

Prerequisites: none, though WGSS 101 and/or 202 may be helpful, but not required

Enrollment Limit: 15

Enrollment Preferences: based on statement of interest, brief interviews if necessary

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ANTH 301(D2) AMST 334(D2) WGSS 301(D2)

Difference, Power, and Equity Notes: We pay particular attention to the intersecting questions of race, sexuality, gender, and class as we explore the political economy of commercial sex. The course teaches students to examine the underlying political and economic structures that create systems of privilege and power, thereby complicating questions and assumptions about sexual consent, coercion, agency, and empowerment with particular attention to race and gender in comparative transnational contexts.

AMST 338 (S) Literature of the American Renaissance

Cross-listings: ENGL 338

Secondary Cross-listing

The term “American Renaissance” refers to a period of US writing, primarily a couple of decades before the Civil War but extending after it: the time of Poe, Emerson, Thoreau, Hawthorne, Melville, Dickinson, Whitman, Jacobs, and Douglass. At stake throughout was the soul of the nation in a time of exuberant political expansion, spiritual optimism, social experimentation, deadening social conventionality, spiritual constriction, labor exploitation, and slavery. The question repeatedly asked was what it means to be free. The question is personal, political, social, and spiritual, and always, for writers, literary: what are the limits or possibilities of writing freely? The course is foundational for any understanding of American literature of the 20th- and 21st centuries.

Requirements/Evaluation: Three papers: 4 pp., 5 pp., 6-8 pp. Active class participation is expected and rewarded.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on he Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors; prospective English majors; American Studies majors; Comparative Literature majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)
This course explores who U.S.-Central Americans are through their visual cultural production, as well as how US-Central Americans have been portrayed by others. Recently, Central Americans have gained visibility in the U.S. public sphere as mainstream media coverage of the "crisis at the border" has sensationalized the arrival of migrant caravans. The images and visuals resulting from mainstream coverage has led to monolithic representations of Central Americans framing them as "illegal aliens," violent gang members, or agentless victims. By engaging with visual culture ranging from social media, films, and zines, we challenge these monolithic perceptions and representations of Central Americans by pursuing the following set of questions: How have others visualized Central Americans and what has been the effect on lived experiences of U.S. Central Americans? How do U.S.-Central American communities visualize their identity formation in the U.S.? What is the role of visual culture in their resistance to racism, classism, sexism, and other structures of marginalization in the U.S.? As part of this course, we explore the range of social, political, economic, and historical forces that have pushed migration from each of the countries in the isthmus and the formation of their respective diasporas in the U.S.

Requirements/Evaluation: Discussion participation, weekly reading responses, two 3-6-page essays, and a final 8-10 page paper.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: Latina/o Studies concentrators and AMST majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course critically reflects on how others have visualized Central Americans and how Central American communities use visual culture to assert their differences and contest the power dynamics that shape their lived experiences.

AMST 343 (S) Representations of Racial-Sexual Violence from Enslavement to Emancipation

This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, LGBTQ and ethnic/black studies. Books include Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro; At the Dark End of the Street; films include Birth of a Nation; Bush Mama; To Kill a Mockingbird. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

Class Format: students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence

Requirements/Evaluation: weekly primary and response papers
AMST 345 (F) Capitalism and Racism in the American Context and Beyond: A Global Approach (DPE)

Cross-listings: AFR 353 / GBST 344

Primary Cross-listing

American Studies emerged with the idea that transdisciplinarity is crucial for comprehending the concept of America. Building on this framework, this course foregrounds transepistemology as an equally important method for understanding the dynamics of America, both locally and globally, at the level of the world-system. In addition to tracing the consubstantial genealogy of racism and capitalism, we will examine their local manifestations, mainly in Asia, Europe, Africa and America, as well as their current geopolitical, social and economic outcomes, especially the reproduction of systemic inequalities and domination. Through an interdisciplinary approach and engagement with a variety of resources from economics, anthropology, sociology, critical race theory, comparative ethnic studies and decolonial thinking, this course will address the following: i) review the different forms of economic organization of human societies throughout history (with special focus on the work of Karl Polanyi); ii) trace the epistemological origins of capitalism and investigate what makes capitalism and its crises unique; iii) trace the genealogy of the concepts of race, racism and discrimination; iv) interrogate the intersection of racism and capitalism in different traditions of thought and epistemologies in Asia, Europe, Africa, and the Americas. For example, we will read key texts from "French theory", (Deleuze, Foucault, etc.), US Black tradition, (W. E. B. Du Bois and Cedric Robison, etc.), Chinese social sciences (Li Shenming, Cheng Enfu, etc.) and African economy and anthropology (Mahdi Elmandjra, Cheikh Anta Diop, etc.) and Latin American decolonial philosophy (Quijano, Dussel, Ignacio, etc.) By doing this, we will situate the rupture that capitalism and racism introduced at the level of global history, which is the first step to conceptualizing racism and capitalism. After showing that the development of capitalism and racism are historically linked, we will proceed to examine the manifestations of their interaction at local and global levels. Locally, we will focus on the effects of racism on the labor market: discrimination in hiring, wage discrimination, segregation, duality and stratification of the labor market, etc. We will also analyze how sexism and racism play out in the labor market in racialized communities. We will also reflect on the links between racism and politics and their effects on economic policies. From a more global perspective, we will analyze the roots of the global economic crisis and the resulting geopolitical issues at the international level and the racist dynamics they generate. Overall, as we will move through readings, we will situate the United States in a cross-regional perspective that would enable us to develop critical insights concerning links and convergences between capitalism and racism.

Requirements/Evaluation: Requirements: An active participation is required of students in terms of engaging in the in-class debates and weekly response paper as a feedback on the lectures as well as a final paper. Evaluation: Participation 25%; Weekly Response (350-500 words) 30%; Final Research Paper (12-15 pages) 45%

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: American Studies majors and seniors

AMST 354  (S) Race/War: Critical Readings on Violence  (DPE)

We live in a moment where the media visibility of warfare is surging. On both mainstream media outlets and social media platforms often-pervasive depictions of violence challenge our ability to analyze, historicize, and empathize. This course will step back and explore a longer history of military violence and its connection to key American Studies concepts including race, empire, settler colonialism, and more. We will interrogate a mix of historical, literary, and theoretical texts that offer tools for analyzing the tangled intersections of race and violence, with an emphasis on the history of the United States and its militarized relationship to the rest of the world. Course texts will invite us to investigate how categories like "civilized" and "savage" have intersected with concepts like the "rules of war," international law, and forms of violence that draw the label "race war." Course topics will include Native resistance to US continental expansion, overseas US imperialism in the late-nineteenth and early-twentieth centuries, indiscriminate violence during World War II, the relationship of Cold War foreign policy to the Global War on Terror, and more. Students can expect to engage a range of sources, including archival materials, legal texts, novels, films, video games, and much more.

Requirements/Evaluation: Requirements will include participatory discussion, selected responses to assigned readings, essay exams, and papers.

Prerequisites: none.

Enrollment Limit: 20

Enrollment Preferences: Junior/Senior students, and sophomores with previous coursework in American Studies and related disciplines.

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course centers race as a key category in the history of militarized violence, both in the United States and throughout the rest of the world. Students will analyze how difference and power have contributed to the history of violence, and the role these histories have played in inequitable power relations.

Spring 2025
AMST 358 (F) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: WGSS 347 / THEA 341 / SOC 340 / LATS 341

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

Prerequisites: none; WGSS 202 would be helpful

Enrollment Limit: 15

Enrollment Preferences: a short statement of interest will be solicited; a subsection of applicants may be interviewed

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

AMST 360 (F) The Atlantic World: Connections, Crossings, and Confluences (DPE)

Cross-listings: HIST 361 / CAOS 361

Secondary Cross-listing

This course considers the Atlantic World as both a real place and a concept: an ocean surrounded and shaped by diverse people and communities, and an imagined space of shared and competing affiliations. Moving from "time out of mind" to the early nineteenth century, it examines ecological, cultural, political, economic, intellectual, and spiritual transits as well as exchanges among Indigenous/Native American, African and African American, Asian and Asian American, and Euro-colonial people. It introduces conceptual dimensions of this Atlantic paradigm and case studies that illuminate its human subtleties, with the goal of examining "early American" histories through transnational and transoceanic lenses. The course takes an interdisciplinary approach to these intertwined histories, and reckons with how the very construction of "history" has, at different turns, affected what is shared, known, valued, and commemorated--or overwritten, denied, or seemingly silenced. Attentive to the structures of power that inflect every part of Atlantic histories, it offers specific ethical frameworks for approaching these topics. Blending methods grounded in oral traditions and histories, place-based knowledge systems, documentary/written archives, songs, archaeology, material culture, and other forms of expression and representation, it invites class members to revisit the nature and meanings of these connected spaces. The course consistently connects historical experiences with the twenty-first century, and how communities today are grappling with the afterlives and ongoing effects of these Atlantic pasts through calls to action for reparations, repatriation and rematriation, Land Back, climate justice, and other forms of accountability. The course also provides an opportunity to engage with original materials pertaining to Atlantic World histories in the Williams College Archives/Special Collections and Art Museum.

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives assignment, final essay/project

Prerequisites: none
Enrollment Limit: 25

Enrollment Preferences: If the course over-enrolls, preference is for sophomore, junior, and senior History and American Studies majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 360(D2) HIST 361(D2) CAOS 361(D2)

Difference, Power, and Equity Notes: This course examines the formation and articulation of racial, ethnic, cultural, and other forms of difference across the Atlantic World, and ways that people from Indigenous, African/American, and Asian/American communities have engaged with and challenged European colonization. It devotes substantial time to critical methodologies that re-center voices oftentimes treated as "silenced" or "absent" in colonial literatures, and helps students build fluencies in approaching and interpreting them.

AMST 361 (S) Marking Presence: Reading (Dis)ability in/to Latinx Media (DPE)

Cross-listings: WGSS 361 / LATS 344

Secondary Cross-listing

This course explores the intersection of (dis)ability and Latinx identity in the contemporary US context. Employing Angharad Valdivia's (2020) notion of "marking presence" to describe the intentional ways in which Latinx subjects gain and hold on to mainstream media space, the class places the fields of Disability Studies, Latinx Studies, Gender Studies and Media Studies into conversation. We address the following questions and others: What does media reveal to us about the place of (dis)ability and Latinidad in contemporary US life, particularly as these categories intersect with questions of gender, sexuality, national identity and citizenship? How might we read Latinidad and (dis)ability into media texts in which they are not otherwise centered? What are the advantages of deploying mainstream media presence as a claim to power for disabled Latinx individuals, particularly those who are multiply marginalized? What are the limitations of such an approach? We will focus on these questions, as well as deploy various media examples (podcasts, social media, film, television and music) alongside scholarly texts to explore topics impacting the Latinx communities such as the relationship between the relationship between immigration and (dis)ability, intergenerational trauma and migration, the gendered archetype of the Latina “Loca,” (dis)ability in academia, the politics of self-care amongst Latinxs in the neoliberal context, and the very legal, cultural, and social category of "(dis)abled" itself within dominant society as well as in Latinx communities.

Requirements/Evaluation: Two short (5-6 page) essays; One media analysis exercise; One online group project; One final reflection letter.

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Preference given to LATS concentrators, AMST majors and WGSS majors by seniority.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 361(D2) LATS 344(D2) AMST 361(D2)

Difference, Power, and Equity Notes: At its core, this course is about understanding difference and relationships of power through an intersectional lens and via the prism of everyday media. In each class we will be discussing issues directly revolving around questions of race, ethnicity, (dis)ability, gender, sexuality, and nation. Students will be expected to incorporate an analysis of these issues in their written and oral work for the course.

AMST 362 (S) ""Rebel Ecologies": Black and Indigenous Struggles for Land and Life""
This course will ask, what other socioecological models exist? We will weave together a study of differing, yet often converging or synergistic traditions of Black/Womanist eco-feminism that often confronts the social constructions of race, gender, class and sexuality, dominant religion as a means of social control, imperialism, capitalism, and colonialism; Ecosocialism which often frames ecology in terms of a mode of production beyond or outside of capitalism; and Indigenous perspectives on resistance to capitalist extraction, imperialism, and colonialism. Given ongoing struggles against the extraction of land and labor, the urgent calls raised in the present-day “climate strike,” the COVID-19 Pandemic, Black-led pandemic rebellions, along with long(er) histories of land-based peoples around the planet opposing racial capitalism, settler colonialism, and imperialism, this class will explore not only what those in opposition to both extractivism and expropriation resist, but also what we want. We will critique binaries, settler notions of time and explore theories of change. Additionally, this class will look to an array of literature, film, sound, and other forms of cultural production in order to not just “locate,” but describe and reveal rebel ecological visions emerging “from below.” Ultimately this class will consider how the above ecological praxis can work simultaneously and within a sense of plurality, examining what we can learn from the work of activists, intellectuals, and defenders on the frontline. This course is an extension of Dr. Guess' concept of a “rebel ecology.”

**Requirements/Evaluation:** The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader at least twice 20%; Weekly 500-word Literature Review 20%; One Final Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More projects might include, an annotated bibliography of 7 texts, film analysis, syllabus, book review, a written play, an op-ed, etc. We will discuss further possibilities in class.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** If the course is overenrolled, preference will be given to Africana studies concentrators.

**Expected Class Size:** 7

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 363(D2) STS 363(D2) INTR 350(D2) AMST 363(D2)

**Difference, Power, and Equity Notes:** Students will research issues of social justice in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

**Quantitative/Formal Reasoning Notes:** Students will use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

**Spring 2025**

**AMST 364 (F) Trans Film and Media**  (DPE)

**Cross-listings:**  WGSS 311

**Secondary Cross-listing**

This course provides an introduction to contemporary trans culture and politics via the lens of film and other (mostly visual) media. We'll focus mainly on media production in the U.S. since the early 1990s, as this moment is usually understood as inaugurating contemporary "transgender" politics; additionally, the 90s saw a profusion of diversity in popular representation generally. This class has two main priorities: first, to use visual media as a lens for surveying major developments in trans studies, politics, and representation over the last few decades; second, to develop a critical repertoire for thinking about our current conjuncture of "trans visibility" in particular. By tracking a longer history of both popular and alternative trans media production, this course will question the vanguardism and celebratory progress narratives associated with "trans tipping point" visibility conditions. Drawing from perspectives in WGSS, American studies, and ethnic studies, we will especially situate trans representation in relation to the institutionalization of minority difference under neoliberal capitalism. In line with scholarship, we'll approach trans representation as interlocking with structures like race, heteropatriarchy, dis/ability, immigration, and nationality and empire.

**Class Format:** There will also be some lecturing.

**Requirements/Evaluation:** Students will have ongoing short discussion post assignments, one midterm essay of 5-6 pages, and a final group media-making project with min. 6 pages of analytic writing to accompany their creative work.

**Prerequisites:** WGSS 101 or 202 would be helpful but are not required. Other background in WGSS or the humanities is also helpful.

**Enrollment Limit:** 20

**Enrollment Preferences:** Enrollment preference can go to WGSS majors and 3rd & 4th years. Statements of interest are welcome.

**Expected Class Size:** 20

**Grading:**  yes pass/fail option,  yes fifth course option

**Materials/Lab Fee:** For some proprietary media content, students will need subscriptions to popular streaming services (eg Netflix, Amazon, HBO Max). See WGSS chair about financial aid waivers and alternatives if this feels cost prohibitive.

**Distributions:** (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 311(D2) AMST 364(D2)

**Difference, Power, and Equity Notes:** This course provides a survey of issues facing marginalized trans communities via the lens of visual media, with an emphasis on how structures of power shaping trans experience intersect with the politics of race, capital, disability, migration, and other axes of social difference.

**Fall 2024**

**SEM Section: 01**  M 7:00 pm - 9:40 pm  Abram J. Lewis

**AMST 365 (F) Race and Psychoanalysis: Slavery and the Psyche**  (DPE)

**Cross-listings:**  ENGL 320 / GBST 365 / AFR 365

**Primary Cross-listing**
This course explores slavery and the psyche through a constellation of Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa. Unwieldy and generative, the opacity of race within the field (and practice) of psychoanalysis shares a fraught intimacy with the co-constitutive terrains of violence and race that form the unconscious. Querying what escapes the hermeneutics of psychoanalysis and aesthetics in the fantasies race engenders, we will examine modernity’s articulation of racialization through conceptualizations—both fantasmatic and real—of self, world, knowledge, and possibility. Course texts may include: Edwidge Danticat’s The Farming of Bones, Adrienne Kennedy's Funnyhouse of a Negro, Bessie Head's A Question of Power, Arthur Jafa’s APEX and Love is the Message and the Message is Death, Conceição Evaristo's Poncí Vicêncio, Lars von Trier's Manderlay, Charles Burnett's Killer of Sheep, Derek Walcott's "Laventille"; and, selections from Sigmund Freud, Jacques Lacan, David Marriott, Kathleen Pogue White, Franz Fanon, Hortense Spillers, Nathan Gorelick, Jaqueline Rose, Jared Sexton, Melanie Klein, Jacques-Alain Miller, Melanie Suchet, and Jean Laplanche. Note: This course will reflect the Continental tradition in philosophy. Student should be familiar with the basic interventions of psychoanalysis.

Requirements/Evaluation: Weekly discussion posts and questions, 2 Papers, 10-12 pages, Research presentation
Prerequisites: One Writing Skills or writing intensive course; one intro course in one of following: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, Women, Gender, and Sexuality Studies
Enrollment Limit: 15
Enrollment Preferences: Juniors or Seniors with majors or concentrations in any of the areas: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, and Women's, Gender, and Sexuality Studies
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 320(D1) AMST 365(D2) GBST 365(D2) AFR 365(D2)

Difference, Power, and Equity Notes: This course examines racialization as it relates to the racial violence of slavery on the psyche. Racialization as a process will be connected to concepts of self, world, and knowledge. Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa will be at the forefront of the course.
Attributes: AMST Critical and Cultural Theory Electives

Not offered current academic year

AMST 366  Music in Asian American History  (DPE) (WS)
Is "Asian American music" all music made by Asian Americans, music by Asian Americans specifically drawing on Asian heritage, or music engaging with Asian American issues? This course embraces all three definitions and the full diversity of Asian American musical experience. We will study the historical soundscapes of immigrant communities (Chinese opera in North America; Southeast Asian war refugees) and how specific traumatic political events shaped musical life (Japanese American internment camps). We will encounter works by major classical composers (Chou Wen-Chung; Chen Yi; Tan Dun; Bright Sheng) and will investigate the careers and reception of prominent classical musicians (Midori; Seiji Ozawa; Yo-Yo Ma). Afro-Asian fusions, inspired by civil rights protest movements, manifested in jazz (Jon Jang; Fred Ho; Anthony Brown; Hiroshima; Vijay Iyer) and hip hop (MC Jin; Awkwafina; Desi rappers). Asian Americans have been active in popular music at home and abroad (Don Ho; Yoko Ono; Wang Leehom; Mitsu). Finally, we will investigate communal forms of Asian American music making that have crossed racialized and gendered boundaries (taiko drumming; Indonesian gamelan; belly dance; Suzuki method). This seminar is designed to develop research skills, as we pursue original fieldwork, archival research, and oral history interviews.

Requirements/Evaluation: Active class participation; two short papers (5-6 pp.) and a research term paper (12-15 pp.).
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Students with curricular experience in Asian American history or music studies.
Expected Class Size: 10
Grading:
Distributions: (D1) (DPE) (WS)
Writing Skills Notes: Students will write three papers during the semester: two 5-6 page papers and a 12-15 page research paper, written in stages. Students will receive detailed comments on each paper and at each stage of the research paper process, allowing them to build upon those comments in subsequent writing assignments.
Difference, Power, and Equity Notes: Political and cultural forces of exclusion not only determined Asian American musical participation in American
music history but have shaped Asian American styles of music. We will study the history of Asian American political struggles as they have intersected
with music and how Asian Americans have at certain points sought allegiance through music with other marginalized groups. We will explore as well
popular media representations of Asian American musicians revealing race-based assumptions.

Attributes: AAS Core Electives  MUS Music History: 1900-Present

Not offered current academic year

AMST 367 (F)  Colonialism and the Environment  (DPE)

In this course students will explore the intersections of environmental history and the history of colonialism in the United States. We will examine how
scholars have crafted narratives that focus on "nature"--both as a cultural concept and as a set of biological processes and systems. Readings and
assignments will analyze the ways in which these different "natures" have acted as both agents and objects of historical change. We will pay particular
attention to how different environments were impacted by the Euro-American conquest of indigenous homelands. Course topics will include (but are
not limited to) European settlement in New England, the North American fur trade, US continental expansion and the destruction of the bison, the
transcontinental railroad, the creation of the National Park system, Native American environmental activism, and paramilitary responses to struggles
over natural resources (such as the Dakota Access Pipeline protests).

Requirements/Evaluation: Assignments will include participatory discussion, weekly responses to assigned readings, short papers, and a
semester-long research project.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference for upper-level (Junior/Senior) students

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)  (DPE)

Difference, Power, and Equity Notes: This course focuses on race, colonialism, and the inequalities that can result from ecological changes that
impact how communities live and interact with the natural world. Students in the course are asked to explore how difference, power, and inequality
have shaped the environmental history of the United States.

Attributes: AMST Space and Place Electives

Not offered current academic year

AMST 369  (S)  Gender, Sexuality & Disability  (DPE)

Cross-listings: WGSS 332

Secondary Cross-listing

From classical mythology to reality TV, bodies and minds that depart from the ordinary have long been sources of popular fascination. In recent
history, people marked as "disabled" have been subject to medical scrutiny, labeled deficient or defective, and often barred from full participation in
society. And yet, what counts as "disability"--and who counts as disabled--varies greatly depending on cultural and historical context. Arguably,
disability has more to do with social conditions than with any innate characteristics of disabled people themselves. This class introduces disability
studies, situating disability within its historical, political, and cultural contexts. As a GWSS course, we'll center queer and feminist perspectives; this
class also emphasizes recent work. Echoing arguments in gender and sexuality studies, scholars have insisted that disability is not a natural or
biological fact, but a socially constructed category. As such, scholars and activists have challenged medical models that conceptualize disability as an
individual defect in need of elimination. They have also questioned the idea that disability is simply a minority identity -- to the contrary, disability is a
condition that most humans will experience at some point in our lives. This class frames "disability" broadly--encompassing not just conditions of
physical impairment, but a wide range of bodily, sensory, cognitive, emotional, and behavioral differences and capacities. This class also centers how
disability is produced intersectionally through regimes like race, capitalism, and empire. Topics include: theories of embodiment, eugenics,
institutionalization and incarceration, neurodivergence, mad studies, the politics of health, storytelling and narrative, disability justice activism,
neoliberalism, biopolitics, and crip theory. Along with scholarly writings, we'll consider activist texts, popular press, fiction, memoir, and a variety of
other media.

Requirements/Evaluation: Students will submit ongoing brief/informal forum posts, midterm essay, and a longer final research project (10-12 pgs);
students will also work in small groups to facilitate a section of class twice per term.
Prerequisites: WGSS 101-level familiarity would be helpful, but is not required.

Enrollment Limit: 20

Enrollment Preferences: Preference to majors, 3rd and 4th year students.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 332(D2) AMST 369(D2)

Difference, Power, and Equity Notes: This class surveys the politics of disability in recent U.S. history, illustrating axes of difference and privilege based on ability as it intersects with various racial, gender, and other identities.

SEM Section: 01 MR 2:35 pm - 3:50 pm Abram J. Lewis

AMST 370 (S) Visual Politics

Cross-listings: ARTH 337 / PSCI 337

Secondary Cross-listing

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to the optical systems of military drones and contemporary forms of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, neuroscience, and STS. Possible authors include Arendt, Bal, Belting, Benjamin, Browne, Buck-Morss, Butler, Campt, Clark, Crary, Debord, Deleuze, Fanon, Foucault, Hobbes, Kittler, Mercer, Mitchell, Mulvey, Plato, Rancière, Scott, Sexton, Starr, Virilio, Warburg, and Zeki.

Requirements/Evaluation: regular, engaged class participation, several Glow posts, and *either* three 7- to 8-page papers *or* on short and one much longer paper.

Prerequisites: at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Political Science and Art History majors (including students in the grad program); then qualified students from all disciplines welcome, space permitting

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

AMST 371 (S) Rebels, Guerillas, and Insurgents: Resistance and Repression in US History (DPE)

This course examines histories of resistance and repression throughout US history. We will consider the role of militancy in social or revolutionary movements, how states deploy power to respond to those movements, and debates around "violence" and political action. Wide ranging in both chronology and topic, course materials will explore slavery, piracy, indigenous resistance to US continental expansion, the expansion of US empire to
places like Hawaii and the Philippines, social movements focused on race, class, gender, sexuality, and citizenship, as well as struggles over environmental justice and indigenous sovereignty. The course will also interrogate the rise of far-right paramilitary violence in the United States and the backlash to the social movements of the 1960s and 70s. Students will develop their skills in reading, writing, and communication, and classes will emphasize engagement with primary sources, cultural texts, and different forms of media.

**Requirements/Evaluation:** Assignments will include participatory discussion, short papers, a midterm, and a final exam.

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference for upper-level (Junior/Senior) students, and students that have taken introductory courses in American Studies, History, and other Humanities disciplines

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course focuses on resistance to different forms of inequality throughout US history. Students will gain a greater understanding of how race, gender, sexuality, class, and citizenship have been debated, contested, and reified through processes of resistance and repression. The course materials will seek to highlight the voices of groups and individuals that have often been left out of mainstream historical narratives.

**AMST 372 (S) Technologies of Race** (DPE) (WS)

**Cross-listings:** STS 373 / AFR 374

**Primary Cross-listing**

This course is an introduction to theories, methods, sources, and approaches for interdisciplinary research and creativity in and through the interdisciplinary field of American Studies. We will focus on the intersection of race, gender, sexuality, and disability with modern media technologies, from early photography in the mid-19th century to contemporary trends in machine learning and artificial intelligence. Through a process of shared inquiry, course participants will investigate the ways that historical legacies of oppression and futuristic speculation combine to shape human lives in the present under racial capitalism. Whether analyses of the automation of militarized border control in Texas, or of the ways that obsolete, racist concepts are embedded in machine vision and surveillance systems, the readings in the course will chart out the key moments in the co-evolution of race and technology in the Americas. Students will gain a working competence in all four tracks of the American Studies major (Space and Place; Comparative Studies in Race, Ethnicity, and Diaspora; Arts in Context; and Critical and Cultural Theory). Finally, we will also explore alternative paths toward a future where technology might help to effect the abolition of oppressive structures and systems, rather than continue to perpetuate them.

**Requirements/Evaluation:** Four papers, in-class writing/reflective work, and a final exam.

**Prerequisites:** none

**Enrollment Limit:** 16

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 372(D2) STS 373(D2) AFR 374(D2)

**Writing Skills Notes:** Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

**Difference, Power, and Equity Notes:** This course requires students to contextualize technologies historically and in relation to one another, with attention to their entanglements with racial discourses and racism. Students gain critical skills that equip them to imagine possible futures where technologies serve increasingly as abolitionist tools.

AMST 373 (F) US Empire in the Philippines: Capitalism, Colonialism, and Revolution (DPE)
Cross-listings: AAS 373

Primary Cross-listing
When the United States of America took official colonial control of the Philippines in 1898, Filipinos had already been fighting an anti-colonial struggle against Spain for several years. With the start of the Philippine-American War in 1899, that fight continued. Keeping the always-present possibilities of Filipino revolt in mind, this course takes an interdisciplinary approach to the study of U.S. empire-building in the Philippines from the late-nineteenth to the mid-twentieth centuries. We will frame our understanding in terms of racial capitalism and the coloniality of power, with particular attention to the materiality of empire -- infrastructure, architecture, financing, markets, and population management -- and U.S. empire's production of racial, gender, indigenous, religious, and sexual categories and difference. Our readings may be drawn from critical ethnic studies, gender & sexuality studies, American studies, postcolonial theory, Black studies, disability studies, and more. Topics include the military "management" of Muslim, Christian, and animist groups, the Katipunan society, interracial intimacies, and early 20th century Filipino migration to the United States. Students are expected to take an active role in discussion, but no prior knowledge of the Philippines is expected.

Requirements/Evaluation: Evaluation will be based on a semi-self-paced portfolio model: by two different points in the semester, students will be responsible for handing in a collection of 1-2 page response papers, discussion posts, discussion questions, and/or a paper analyzing a primary source or theoretical argument. The minimum requirement is a word count e.g. 3,000 words by 10/15, another 3,000 by 11/15. For the final, students will collect their work, revise at least 30% of it according to professor and peer feedback, and write a final reflection paper. In pairs, students will also lead discussion during one or more class sessions.

Prerequisites: None
Enrollment Limit: 15

Enrollment Preferences: First priority will go to AAS concentrators and AMST prospective and declared majors

Expected Class Size: 10-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 373(D2) AAS 373(D2)

Difference, Power, and Equity Notes: This course examines the creation and maintenance of racial, indigenous, religious, gender, sexual, and abilist categories in the context of world-historic systems of power, namely capitalism and colonialism. It tracks the unequal relations of power between American colonizers and Filipino colonized subjects, while keeping live the inherent power of Filipino people for revolt.

AMST 374 (S) Black Critical Theory, Black Avant-Garde (DPE)
Cross-listings: ENGL 311 / AFR 376

Primary Cross-listing
What is the relationship between violence and what constitutes the Black avant-garde and Black critical theory? Is it possible to conceptualize the latter two without an investigation of Black rebellion and its relationship between Black artistic and intellectual production? Can one argue that Black critique is none other than Black experimentation in form, or that Black abstraction is the requisite effector for all modes of Black praxis and thought? This course will explore these questions through a study of Black continental and diasporic avant-garde texts in multiple mediums. Alongside, we will also consider the emergence of contemporary Black critical theory, chronicling its development as both experimental and critical. Through the works of historical subjects of experimentation also considered to be objects critiquing in experimental form, the course will approach Black avant-gardism and Black critical theory as a productive opportunity to think about Blackness as critique, as experimentation, and as theoria. This pairing of Black avant-gardes and Black critical theory takes "avant" at its root--indicating what precedes or takes precedent--and "garde" as what is preeminent, or
what protects. As such, we will start with the question of whether blackness, as an ideological fiction produced through violent historical ideologies and practices, could ever, or ever not, be anything but avant-garde?

Requirements/Evaluation: Weekly discussion posts and questions, a research presentation, and two 10-12 page papers

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Preference will be given to AMST majors and prospective majors, as well as ENGL and AFR majors or prospective majors.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 374(D2) ENGL 311(D1) AFR 376(D2)

Difference, Power, and Equity Notes: This course examines race through the lens of historic modalities of power and violence. Additionally, it attends to the artistic, political, and intellectual production of a racialized population responding to ideological and state technologies that not only create difference, but also perpetuate asymmetrical relations of power.

AMST 375  (S)  Asian American Sexualities  (DPE)

Cross-listings: WGSS 375 / AAS 375

Primary Cross-listing

Perceived as objects of sexual use and perversity, how might Asian/Asian American subjects contend with these projections and enact their own genders and sexualities? Anchored in this question, this theory-intensive seminar will provide a study of seminal and recent scholarship at the intersections of Asian American Studies, feminist criticism, and queer theory that focus on or are read in tandem with a collection of cultural expressions, including film, sculpture, poetry, drag performance, music, manifestos, and visual and performance art. To first root us, the seminar will introduce key uses and theorizations of sex/gender, sexuality, and queerness. Then, across the semester, we will focus on deployments of them through a range of topics, including sexual subjugation and activism of "comfort women," orientalism/ornamentalism, the queering of Sikh, South Asian, and Muslim Americans post-9/11, western demands to "come out," representations in pornography, lesbian invisibility, devaluation of trans* lives, etc., exploring questions of racialized, gendered, and sexual subordination alongside power, pleasure, play, and critique. To this end, we will approach gender and sexuality not as identity categories that one is or has but socially and biologically construed categories, loci for intervention and play, anti-normative positions, lived experiences, and ever-evolving processes of doing, becoming, and unbecoming.

Requirements/Evaluation: in-class discussion, weekly posts, short presentation, one paper, and one longer paper or creative assignment that will be peer reviewed and revised

Prerequisites: AMST 125 or WGSS 101/202

Enrollment Limit: 15

Enrollment Preferences: AMST/WGSS majors and AAS concentrators will be given priority; prospective AA concentrators

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Spring 2025
AMST 379  (S)  American Pragmatism

Cross-listings: PHIL 379

Secondary Cross-listing

Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

Requirements/Evaluation: final paper, several short assignments
Prerequisites: at least three PHIL courses

How have scientific knowledge and medicine been tools of exclusion, violence, and imperial control against Asian Americans, as well as indigenous peoples, Black, Latinx, and white migrants, and their descendants? How have these groups negotiated and resisted encounters with such knowledge from the 19th century to the present? This seminar explores these questions by examining a series of case studies—including American colonial medicine and science in the Philippines and Hawai‘i, Cold War migration of Chinese scientists and South Asian doctors to the U.S., and the politics of HIV/AIDS, psychiatry, and culturally competent care in Black, Asian, and Cuban migrant communities. Together, we will survey the literature in history, English, Global Health, Sociology, and other fields and consider how the Asian/Pacific American experience in science and medicine has been integral to, as well as informed by, the experiences of other groups in the transpacific world. Students will leave this course with interdisciplinary tools for understanding present-day health inequities in underserved Asian/Pacific American communities and other marginalized groups.

Requirements/Evaluation: Attendance and active participation in discussion, three response papers (3-4 pages), and final research paper (12-15 pages), as well as topic proposal, annotated bibliography, outline, and draft of the final paper
Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: Preference to History majors, Asian American Studies concentrators, and Public Health concentrators

Expected Class Size: 20-25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 384(D2) AAS 384(D2) AMST 383(D2)
Difference, Power, and Equity Notes: This course explores how knowledge about science and medicine has been constituted and remade over time by various groups in the transpacific world to exert power over others on the structural, community and individual levels. We will also consider how individuals who experienced violence and inequities as a result of encounters with such knowledge challenged definitions and practices of science and medicine.

AMST 384  (S)  Asia and Asian Americans During the Cold War  (DPE)

Cross-listings:  HIST 364 / AAS 364

Secondary Cross-listing

This course traces how American geopolitical interests and involvement in Asia during the Cold War affected Asian Americans. It examines the history of the Cold War as a period of U.S. imperial expansion as well as a time when various actors and organizations, especially those of Asian descent, harnessed the East-West rivalry to advance their own agendas. We will consider how diverse diplomatic strategies including militarization, educational exchange, and immigration reform shaped East, South, and Southeast Asian migrations to and settlement in the United States and the social and material lives of these diverse communities. Case studies include transnational adoptees from Korea, Hmong and Vietnamese refugees in the U.S. and across Guam and Israel-Palestine, Black, Latinx, and Asian American activists who traveled to Vietnam, educated Indian and Pakistani immigrants, and American-born individuals of Japanese ancestry in Japan. We will also explore how individuals of Asian descent leveraged Cold War geopolitics and forged cross-ethnic, cross-class alliances to advocate for social change both at home and abroad.

Requirements/Evaluation: Attendance and active participation in discussion, three response papers (3-4 pages), and final research paper (12-15 pages), as well as topic proposal, annotated bibliography, outline, and draft of the final paper

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: History majors and Asian American studies concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions:  (D2)  (DPE)

Difference, Power, and Equity Notes: This course will examine how various global and local actors competed for power in Asia and the U.S. during the Cold War. It will consider how new political and economic decisions by policymakers created and reinforced inequalities rooted in race, gender, class and other forms of difference. It will also examine how grassroots changemakers, whom we know little about, creatively and comprehensively navigated and changed the political and social landscapes in and outside of the U.S.

AMST 390  (F)  Feminist and Queer Horror Films  (DPE)

Cross-listings:  WGSS 398 / THEA 390 / ENGL 333 / COMP 390

Secondary Cross-listing

This course focuses on pairing theoretical readings with a variety of horror films with feminist or queer themes. Many tropes are associated with this genre - “the final girl” in slasher movies, “the transvestite murderer,” femme lesbian vampires, supernatural BDSM figures, vampires as allegories for
HIV/AIDS, werewolves as metaphors for FTM gender transitions or puberty, lonely mothers in creaky houses as unreliable narrators, Satanic spawn, and creepy long-haired girls. Some films reinforce gender stereotypes while others snap on more explicitly feminist and queer lenses. This course functions as a survey of many different genres, introducing students to classic 1970s films and working up to the present day and we will learn how these tropes developed and then were subverted by more modern day films such as those by A24 Studies and the new renaissance of Black horror, etc. Most films will focus on the US, with some notable exceptions in Japan, Spain, and elsewhere globally. There will be graphic content. You must be 18 or over to take this class.

Requirements/Evaluation: Class participation, short reflection papers, 2-3 extemporaneous oral class responses, several creative assignments.

Prerequisites: None. Prior WGSS courses will be helpful.

Enrollment Limit: 15

Enrollment Preferences: Stage 1 is a statement of interest form; Stage 2 will be a very brief interview. There is NO preference by major or class year.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Some of the creative assignments will have an "artsy-craftsy" component, but should not cost more than 25 dollars total per student per semester, though amounts will vary depending on how the student chooses to execute the assignment.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 398(D2) THEA 390(D1) ENGL 333(D1) COMP 390(D1) AMST 390(D2)

Difference, Power, and Equity Notes: This course necessarily examines power when it comes to gender and sexuality - who has it? what do they do with it? how does this power turn deadly? how can agency be regained? Horror is almost never about equitable situations but rather the imbalance that comes from difference (along whatever axis) causing a lack of equity.

This seminar focuses on the entwined histories of liberation movements against racism, enslavement, and imperialism in the US, Cuba and Africa. Readings include: Hugh Thomas, *Cuba: A History*; Che Guevara, *The Motorcycle Diaries*; Walter Rodney, *How Europe Underdeveloped Africa*; Laird Bergad, *The Comparative Histories of Slavery in Brazil, Cuba, and the United States*; Thomas Sankara, *Women's Liberation and the African Freedom Struggle*; Nelson Mandela and Fidel Castro, *How Far We Slaves Have Come!* Students will read and analyze texts, screen documentaries, collectively compile a comprehensive bibliography, and present group analyses. The seminar is open to all students; however, priority is given to seniors majoring in American Studies.

**Requirements/Evaluation:** Reading and analysis of texts, collective compilation of a comprehensive bibliography, presentation of group analyses; two brief papers due at midterm and the end of the semester

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Seniors majoring in American Studies

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

**AMST 402 (F) Marxist Feminisms: Race, Performance, Labor** (DPE) (WS)

**Cross-listings:** AAS 402 / WGSS 402

**Primary Cross-listing**

This seminar provides an overview of queer, black and women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, including *Capital Volume I*, we will examine a range of social positions and modes of extraction that complicate Marx's emphasis on the white male industrial factory worker. Every week, we will focus on texts that foreground conditions of reproduction, racial slavery, care and domestic work, indentured servitude, immigrant labor, land expropriation, and sex work among others. Throughout the seminar and specifically at the close of it, we will turn to critical perspectives and aesthetic practices that not only respond to these conditions but also incite new social relations and ways of being in the world. As such, this seminar will equip students with critical understandings of how racial capitalism has fundamentally relied on the mass elimination, capture, recruitment, and displacement of different racialized, gendered, and abled bodies in and beyond the U.S. as well as how the capitalist system of value and life under these conditions can and must be undone and reimagined.

**Requirements/Evaluation:** in-class participation, presentation, weekly posts, paper, and final project (paper, community resource distribution proposal, and creative project options)

**Prerequisites:** AMST 101, AMST/AAS 125, or similar courses

**Enrollment Limit:** 12

**Enrollment Preferences:** AMST and WGSS juniors and seniors, AAS concentrators

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Writing Skills Notes:** In addition to weekly posts, students will engage a longer process of writing and sharing a presentation paper with the class, give/receive feedback, and submit a revised paper.
AMST 406 (F) Environmental Planning Workshop: Community Project Experience

Cross-listings: ENVI 402

Secondary Cross-listing

In this class you apply your education to effect social and environmental change in the Berkshires. Students work in small collaborative groups to address pressing issues facing the region. Class teams partner with community organizations and local & county governments to conduct applied research and to develop solutions. Students will learn experimentally and contribute to the community. The field of environmental planning encompasses the built environment (eg: housing, zoning, transportation, renewable energy, waste, neighborhood design), the natural environment (eg: farmland, ecosystems, habitat, natural resources, air and water pollution and climate change), and the social environment (eg: spatial geography, racial zoning, recreation, placemaking, ecojustice, food security, and public health). Skills taught include land use planning, community-based research, basic GIS mapping, developing/conducting surveys, interview technique, project management, public presentations and professional report-writing. The class culminates in presentations to the client organizations. Class hours include time for team project work, client meetings and team meetings with the professor. Recent project topics: https://ces.williams.edu/environmental-planning-papers/

Class Format: The weekly conference session (1 hour) is dedicated to site visit field trips, team project work, client meetings and team meetings with professor.

Requirements/Evaluation: Response papers (three 1-page papers), in-class exercises, class discussion, small group work, public meeting attendance, project work, final report (due in segments during semester) and final presentation.

Prerequisites: ENVI 101 recommended; open to juniors and seniors.

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators, American Studies majors, Maritime Studies concentrators.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Unit Notes: Course fulfills senior seminar requirement for Environmental Studies Majors & Environmental Studies Concentrators. American Studies Space & Place elective. Course is an Environmental Studies Concentration elective (ENVI Policy and ENVI Humanities, Arts + Social Science) and Environmental Studies Major elective.

many of these same theorists—Foucault included—are criticized for failing to pay adequate attention to the colonialism that shaped their historical moments. Taking this paradox as our jumping-off point, this course will examine prominent philosophical and theoretical texts and assess their utility for understanding processes of colonialism, imperialism, and militarism. We will also explore how the interventions of Postcolonial Theory and Critical Indigenous Theory highlight gaps in prominent theories of political-economy, ideology, biopower, race, gender, sexuality, and more. How do ideas like orientalism, settler-colonialism, sovereignty, or decolonization challenge the traditional "canon" of critical theory? How do intellectual ideas evolve over time, and how can we use these tools to make sense of a complex world too-often organized around fundamental inequalities? In our class meetings students will develop the reading and discussion practices necessary to parse dense theoretical texts, and practice deploying theoretical concepts to better understand complex philosophical, ethical, and political questions. Since this course counts as a Senior Seminar (core course), writing will be organized around a longer, more intense research project that follows from a student's particular interests.

Requirements/Evaluation: Assignments will include participatory discussion, weekly responses to assigned readings, a midterm essay exam, and a final paper.

Prerequisites: Introductory course in American Studies, History, Native and Indigenous Studies, English, or Philosophy; or some prior coursework on colonialism, postcolonial theory, or critical theory

Enrollment Limit: 15

Enrollment Preferences: AMST senior major, but anyone with upper-level humanities training welcome

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: This course will develop student writing skills through short reading-response papers and smaller "low stakes" writing assignments, combined with a semester-long project that will break the research and writing process into manageable components, including revision and peer review.

Difference, Power, and Equity Notes: This course explores the intersections of race, gender, sexuality, class, and other social structures often organized around inequality. Students will develop tools to analyze how power shapes the differences produced by colonialism and similar historical processes.

AMST 409 (F) Prehistories of the War on Terror (DPE) (WS)

On September 11th, 2001, members of the terrorist organization Al-Qaeda hijacked four airplanes and crashed them into the World Trade Center, the Pentagon, and rural Pennsylvania. For many Americans this tragedy seemed to come out of nowhere. In an attempt to historicize these shocking events, and the global wars that resulted from them, this course will examine the prehistories of the War on Terror. We will study the United States' emergence as a global power after World War II, US foreign policy and its relationship to the Middle East, and the political and cultural currents that informed American responses to the events of 9/11. We will also explore the history of the War on Terror itself. Topics will include the Cold War, the environmental history of oil, the history of terrorism, the relationship between race and war, and the invasions of Afghanistan and Iraq.

Requirements/Evaluation: Assignments will include participatory discussion, daily responses to assigned readings, short papers, and a research paper.

Prerequisites: Introductory course in American Studies or History; or some prior coursework on US history, empire, foreign relations, race, environment, and violence.

Enrollment Limit: 15

Enrollment Preferences: American Studies majors and students that have completed upper-level coursework in American Studies, History and related fields.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: In this workshop-style course students will focus on developing their skills in reading primary and secondary literature, advancing historical arguments, conducting research, engaging in discussion, and producing academic writing. Short writing assignments, peer
Difference, Power, and Equity Notes: This course explores the intersections of race, gender, sexuality, class, and other social structures often organized around inequality, with an emphasis on the Cold War and War on Terror. AMST 412 (S) Cold War Archaeology (DPE) (WS)

Cross-listings: STS 412 / AFR 394

Primary Cross-listing

In this advanced American Studies course, we will examine Cold War history and culture with attention to the intersection of racialization and nuclear paranoia. The concurrent unfolding of the struggle for Civil Rights and the national strategy of Civil Defense played out against the backdrop of a global ideological battle, as the United States and the Soviet Union fought each other for planetary domination. From the scientific fantasy of bombproofing and "safety in space," to the fears of both racial and radioactive contamination that drove the creation of the American suburbs, the affective and material dimensions of nuclear weaponry have, from the beginning, been entangled with race. Drawing on the critical and analytical toolkits of American Studies and media archaeology, students will dig beneath the surface of received narratives about the arms race, the space race, and race itself. Students will uncover generative connections between mineral extraction, the oppression of Indigenous populations, the destructive legacies of "urban renewal," and the figure of the "typical American family" huddled in their backyard bunker. Finally, this course will examine the ways in which the Cold War exceeds its historical boundaries, entangles with the ideology and military violence of the Global War on Terror, and persistently shapes the present through its architectural, affective, and cultural afterlives.

Requirements/Evaluation: Three short papers, in-class writing/reflective work, and a final paper.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: AMST majors or prospective majors.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 412(D2) STS 412(D2) AFR 394(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to contextualize historical events during the Cold War in relation to racialization, inequitable distributions of resources, and the stratification of national space in relation to risk and radioactivity. Students gain critical skills that equip them to see the ways in which the Cold War continues to shape processes of racialization, oppression, and imperial extraction, and spatial arrangements.

AMST 413 (S) Dreaming Latina/x Feminist Disability Studies (DPE) (WS)

Cross-listings: WGSS 475 / LATS 475

Secondary Cross-listing

In this course we will defy the traditional notion that disabled and queer people of color have no right to future dreams, as we collectively imagine how the emergent field of Latina/x feminist disability studies might take shape. What are the sites of focus, methods, and political commitments of Latina/x feminist disability studies? Where is the power in meaningfully uniting an analysis of disability to one of sexuality and gendered Latinidad? How does a Latina/x-centric approach productively inform our understanding of disability? What is the political potential of Latina/x feminist disability studies -- not exclusively as a set of theories, but also as a mindset and an everyday call to action? If we were to collectively compose a manifesto for Latina/x...
feminist disability studies, what might it contain? How might we actively cultivate a community of care in the classroom as well as other spaces at Williams? Just what might Latina/x feminist disability justice dreams look like? How might Latina/x feminist disability justice dreams feel? Feminist, queer, and disabled crip-of-color scholars have recently called for a more meaningful engagement with race in feminist disability studies. Simultaneously, we have also witnessed a small but steady growth in the amount of Latinx studies scholarship that thoughtfully integrates questions of disability. This interdisciplinary course responds to these important shifts in its focus on a series of topics bridging Latinx studies, gender studies, queer studies, crip studies, and critical disability studies. These include but are not limited to the body, the environment, temporality, labor, citizenship, dependency, and visibility/invisibility. Through these topics, we will explore the ways in which the different approaches to these specific issues across Latinx, critical disability, crip, queer and gender studies are in fruitful conversation with one another -- and sometimes even at odds -- as we actively interrogate the intersections of gender, race, ethnicity, sexuality, and disability within the everyday.

**Requirements/Evaluation:** Major assignments for this course include a semester-long independent research paper (15-20 pages) broken up into steps, participation in crafting the class manifesto, a semester-long collaborative artistic exercise, and a final reflection document (3-4 pages).

**Prerequisites:** None.

**Enrollment Limit:** 12

**Enrollment Preferences:** Priority given to LATS concentrators by seniority, followed by WGSS and AMST majors by seniority.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** Lab fee: $200 for art supplies per student

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 475(D2) LATS 475(D2) AMST 413(D2)

**Writing Skills Notes:** We focus on building writing and interdisciplinary research skills, with a particular emphasis on the processes of research, revision, and collaborative writing. The primary research paper (an independent project of 15-20 pages) is divided into stages, and students are required to revise and resubmit their work at various junctures in the research process. The written class manifesto requires students to compose a document together, revising their work as a group over the course of the semester.

**Difference, Power, and Equity Notes:** This course privileges an intersectional analysis regarding questions of race, ethnicity, gender, sexuality, and disability. It obligates students to consider how these categories of difference actively work in tandem with one another in everyday US Latina/x and transnational (US-Latin America and the Caribbean) contexts. This seminar also underscores how these categories of difference are actually products of a given historical and political moment.

**AMST 414 (S) Race and Performance** (DPE) (WS)

**Cross-listings:** WGSS 414 / AAS 414

**Primary Cross-listing**

How does one "do" race? This seminar offers a survey of foundational and emergent scholarship at the nexus of performance studies, critical ethnic studies, and gender and sexuality studies alongside contemporary visual and performance art works. It will explore how the framework of performance destabilizes notions of race, gender, and sexuality as identities that are inherent to us and approaches them as ones we enact, do, and undo. We will begin the course by tracing key concepts in performance studies (i.e., performance, performative, performativity) before examining a range of performances that respond to and negotiate life under the ongoing conditions of racial capitalism, empire, anti-blackness, and settler colonialism. To this end, we will focus on how qualities attributed to racialized and gendered bodies, such as silence, diseased, patience, depression, passivity, and aloofness, are retooled as feminist and queer of color actions or positions.

**Requirements/Evaluation:** in-class discussion, weekly posts, class presentation, short written assignments, and final project (with creative option)

**Prerequisites:** AMST 101 or WGSS 101/202 and upper level courses in AMST, WGSS, or related fields

**Enrollment Limit:** 12

**Enrollment Preferences:** AMST seniors and juniors; WGSS seniors and juniors; AAS concentrators

**Expected Class Size:** 12
Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 414(D2) AAS 414(D2) AMST 414(D2)

Writing Skills Notes:  Weekly discussion posts, short writing assignments that will lead to the final assignment, and a self-assessment reflection. Additionally, students will draft and present an object-based analysis paper (incorporating primary and secondary materials), give and receive peer feedback, and submit a final, edited version.

Difference, Power, and Equity Notes:  This course centrally examines the nexus of race, gender, sexuality, class, and ability and explores a bevy of strategies deployed to respond to overlapping structures of power, including racial capitalism, settler colonialism, anti-blackness, and empire.

Not offered current academic year

AMST 415 (S) Racial Melancholia, Queer Melancholia  (DPE) (WS)

Cross-listings:  WGSS 418 / AAS 415

Primary Cross-listing

The psychoanalytic theory of melancholia--the ways in which one refuses to fully let go of that which one has lost--is a foundational concept to the fields of ethnic studies, queer theory, and cultural studies. In the wake of losses due variously to histories of forced migration and slavery, the AIDS epidemic, war, and social exclusion, various scholars and critics have posited melancholia as a structuring condition of contemporary life as subjects differently navigate loss, displacement, and exclusion. Theories of racial and queer melancholia have emerged as supple frameworks through which to consider how queer and racialized subjects hold onto non-normative ways of being, relation, and sociality against the normalizing tides of erasure. We will chart out a connection between how we relate to and apprehend the past as it then pertains to how we relate to and apprehend others. Beginning with a dive into Freudian psychoanalysis, this seminar will explore concepts of loss and melancholia and their uptake into critical theory, critical race theory, and queer theory/queer of color critique. Alongside our scholarly inquiries, we will engage with a range of art, literature, performance, and film that explore topics of memory, trauma, migration, the queer past and the queer future, subjectivity, relationality, and gender and sexuality.

Requirements/Evaluation:  In-class participation, discussion posts, short analysis papers, and a final paper that engages original research and/or creative work.

Prerequisites:  None

Enrollment Limit:  15

Enrollment Preferences:  AMST, WGSS majors, AAS concentrators or students interested in majoring/concentrating in these areas.

Expected Class Size:  15

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 418(D2) AMST 415(D2) AAS 415(D2)

Writing Skills Notes:  Students will produce a number of written assignments that assess their analysis, critique, and interpretation of critical texts and artistic works. This includes regular discussion posts, paper presentations, and a final essay that will receive peer and instructor feedback.

Difference, Power, and Equity Notes:  This course engages with a major topic of concern--the theory of melancholia--across a number of fields including ethnic studies, women's, gender, and sexuality studies, and critical theory. In particular, attention is paid to the function of loss, dispossession, and displacement as it affects individuals and communities who are differently marginalized by colonialism, racial capitalism, and heteronormativity.

AMST 418 (S) Modernisms and the Archive

Cross-listings:  ENGL 418
Secondary Cross-listing
This seminar positions us at the intersection of archival theory, print culture, and literary study in order to chart new pathways for understanding the making of modern poetry and poetics during the period of literary history (from 1900 to 1945) that we most closely associate with the term Modernism. Modernist Studies is at the moment undergoing a major and exciting shift made possible by digital archives that allow us to access and document the rich intertextual experience of reading Modernism as it unfolded in the influential little magazines that came to define Modernisms. Some, like Poetry magazine, defined the new poetry strictly along aesthetic lines and treated these publications as collectible objects. Others, such as The Crisis, brought together poetry and the politics of race and social justice and encouraged, as Bartholomew Brinkman has argued, "both aesthetic and socially engaged readings." We take advantage of digital archives, as well as physical ones, in order to tell new stories about both familiar and unfamiliar writers that can be discovered at the intersections of literary history and archives. Students will also have the opportunity to work in the Sterling Brown archive here at Williams. Recently acquired by Williams College Library Special Collections, this significant archive documents the life, work, and poetic practice of African-American writer and educator Sterling Brown, whose poetry and prose spans nearly five decades of the twentieth century, yet Brown has often been left out of the narrative we tell about modern poetry. Work in the Sterling Brown archive will culminate in a curated public exhibition featuring your discoveries. Iain Bailey has argued that we should think of the archive "as a place of work, rather than as a cache from which to draw certainties." With this caveat in mind and in the spirit of discovery, we will act over the course of the semester as investigators, curators, collaborators, and inquirers in the workshop of literary production and its aesthetic products.

Requirements/Evaluation: Short papers, archival presentations, final paper or digital project (12-15 pages)
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

AMST 427 (F) Anticolonial Approaches to the Arts of Ancestral Indigenous Americans

Cross-listings: ARTH 428

Secondary Cross-listing
Approaches to the study of the arts of Ancestral Americans have traditionally emanated in both their conceptions and practices from settler colonialism, resulting in often hostile relations between investigators and descendant communities, the exclusion of Indigenous researchers, their sovereignties and knowledge regimes, and substantial distortions to historical understandings of the past. This course takes art histories of the Ancient Americas as its site for intervention as a means of introducing students to the oftentimes challenging labors of anticolonialism and the pursuit of the repair of past harms. Over the semester, students will learn how colonialism and its epistemologies have guided the formation of the field; how they can prioritize Indigenous and Native American ways of knowing and thinking in their understandings and research; how they can ethically conduct research without disturbing Ancestral American remains and the sovereignties of their descendants; and learn to make meaningful contributions to the projects of decolonization and repair.

Requirements/Evaluation: Weekly readings (100-200 pages); Participation -- regular attendance, contribution to in-class discussions, and demonstrated knowledge of readings (30%); One 10-12-page final essay, 3-page portions of which will be submitted for instructor feedback at monthly intervals (45%); Contribution to a collectively written class report through: 1) The co-authoring with a classmate of one report subsection of 2-3 pages (15%) and 2) Peer-review of subsections authored by other classmates (10%).

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Priority given to art history majors.

Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
AMST 428  (S) Relationality and Its Antagonisms  (DPE) (WS)

Cross-listings:  AFR 396 / WGSS 428

Primary Cross-listing

Relationality has been the defining approach, feature, and framework of ethnic studies since its inception in the late 1960s. Since then, notable scholars have applied multiple keywords, including difference, comparison, entanglements, cacophonies, and intimacies, to emphasize how processes of racialization and racial formation are not isolated and separate but inextricably linked and shaped by one another. Only from these distinct, uneven, yet shared positions of oppression, as scholars argue, solidarity across race, gender, class, sexuality, and location may emerge. At its crux, this seminar will underscore major tensions and antagonisms against frameworks of relationality. Tracing primary sources, cultural expressions, and literature within the traditions of ethnic studies and transnational/women of color feminisms, it will trace the shifts in approaches to relationality, especially as it relates to practices of reciprocity and community-building across difference. At the same time, it will turn to works that name relationality as what Frank B. Wilderson calls a "ruse," or trick, that subsumes the specific, exceptional position of blackness. Our units will include discussions of Afro-Pessimism, indigeneity, racialized settler colonialism as well as queer theory debates on queer presentism (i.e., a queer "no future") versus queer futurity. Studying the tensions that emerge from multiple, distinct, and contradictory planes of power, oppression, and temporalities, how do we assess, work through, and reconcile, if at all, relations deemed as "irreconcilable" across vectors of difference?

Requirements/Evaluation:  in-class participation, paper presentation, peer feedback, writing webs (short series of writing exercises), and final project developed from original research and/or creative work

Prerequisites:  AMST 101 or WGSS 101

Enrollment Limit:  12

Expected Class Size:  12

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 396(D2) AMST 428(D2) WGSS 428(D2)

Writing Skills Notes:  Students will regularly engage in a series of writing exercises and submit a longer paper presentation that will be peer reviewed and revised.

Difference, Power, and Equity Notes:  The main objective of the course is to study and assess ethnic studies' approaches to questions of difference, particularly as it relates to theories of racialization and relationality across multiple nodes of power and oppression.

AMST 435  Ghosts: Race, Memory, and Haunting in the United States  (DPE)

This course explores interdisciplinary scholarship, literature, and artistic work related to race, memory, and haunting in the United States. Across diverse historical moments and sites of cultural production, ghosts and other absent presences are conjured to mediate the meanings of race, gender, colonialism, enslavement, patriotism, and other keywords in American Studies. From plantations and abandoned prisons, to battlefields and sites held sacred by indigenous communities, the contemporary ghost tourism industry offers a blend of history, national mythology, and popular beliefs about paranormal activity to reshape national memory. During the 19th century, activities such as spirit photography, telepathic experiments, and seances...
engaged with ghostly phenomena. In the 21st century, digital technologies have the capacity to resurrect dead musicians and other cultural icons as "holograms" or "digital humans" that can interact with the living. In a series of self-designed, analytical essays, students will explore how haunting has played an important role in the formation of American identities, how various kinds of ghosts come to life through texts, material culture, performance, and technology, and how the past can be reimagined to generate new understandings of the present and the future.

**Requirements/Evaluation:** Four papers, in-class writing/reflective work, and a presentation.

**Prerequisites:** At least sophomore standing, permission of instructor (please email instructor a brief paragraph explaining your interest in the course)

**Enrollment Limit:** 12

**Enrollment Preferences:** American Studies majors or prospective majors

**Expected Class Size:** 12

**Grading:**

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course requires students to explore the history and afterlife of racialized, gendered, and otherwise inequitable social arrangements and labor systems in the United States. Students analyze historical narratives that operate through combinations of text, material culture, performance, tourism, and digital technology, and learn about scholarly and creative interventions for reshaping memory, questioning power, and building narratives that offer a fuller picture of the past.

**AM 455 (F) Material Cultures in North American History (DPE)**

**Cross-listings:** HIST 455

**Secondary Cross-listing**

Material culture studies consider the dynamic relationships that people develop with the physical world. Tangible items like clothing, furniture, tools, and the built environment are all shaped by communities’ identities, aspirations, resources, struggles, and forms of power. This course approaches North American histories through the lens of materiality, and examines how interdisciplinary methodologies can illuminate multiple or alternate understandings of the past—and its continuing impacts in the twenty-first century. While many historians emphasize written archives and documents as primary sources, scholars and practitioners of material culture studies center everyday as well as exceptional material items that communities have produced and interacted with over many generations. Equally important are the afterlives of these items. At different turns, and across time, social groups have cherished certain belongings; contested, rejected, or remade them; ascribed and activated meanings that may be very different from what the original makers conceived. These continuing transits compel reckoning with major issues of justice, rights, restitution, and sovereignty. The course traces key theories, ethics, and practices of caretaking, preservation, repatriation, curation, creative re-making, and digitization. Members will participate in a series of visits to area museums, collections, and meaningful places to deepen skills of critical analysis. The scope of the course is North American and at times transoceanic. It also includes substantial focus on our location in the Northeast and local formations of materiality and memory, as well as topics in Native American and Indigenous Studies, settler colonialism, and decolonizing approaches. Class members will build familiarity with appropriate techniques for approaching and handling different forms of material culture. They will also cultivate skills for developing and carrying out an original research project; and explore diverse modes of analysis and expression for representing the stories of materials and the communities who engage with them.

**Requirements/Evaluation:** Active participation in class discussion and visits, reading reflections, in-class presentation, research project prospectus, research project

**Prerequisites:** Two prior courses in American History, American Studies, Native American and Indigenous Studies, or a related area

**Enrollment Limit:** 15

**Enrollment Preferences:** If overenrolled, junior and senior History and American Studies majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 455(D2) AMST 455(D2)

**Difference, Power, and Equity Notes:** This course examines diverse communities’ historical experiences across North America in conjunction with resistances to Euro-American settler colonialism. It introduces students to foundational methodologies in material culture studies including
decolonizing approaches, and explores key topics about caretaking, interpretation, and repatriation to descendant communities, such as the Native American Graves Protection and Repatriation Act.

AMST 478 (S) Cold War Landscapes

Cross-listings: ENVI 478 / HIST 478

Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation: Class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

Prerequisites: none

AMST 490 (S) The Suburbs (WS)

Cross-listings: ENVI 491 / HIST 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: Students will meet with the professor either in assigned pairs or "trios" at a regularly scheduled time each week. Students in pairs will
meet for one hour; students in trios will meet for 75 minutes.

**Requirements/Evaluation:** This class follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and students with course work related to the topic.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 491(D2) AMST 490(D2) HIST 491(D2)

**Writing Skills Notes:** Students will reflect on what their writing goals are for the semester, and they will receive feedback on their writing from the professor and from their tutorial partner. The final writing assignment will afford students the chance also to reflect back on their previous papers and the semester's course content.

Winter Study  ---------------------------------------------------------------

AMST 11 (W) Remnants: The Social Life of Sewing
Weaver Ann Hamilton calls fabric our "second skin." As a baby, you may have been wrapped in a blanket that was stitched by a loved one. More likely, that piece was mass-produced in a distant place, by strangers who labor in conditions you may never know. What does it mean to surround ourselves with objects about which we have no knowledge and to which we have no organic connection? In this course, we will become makers as well as students of the crafts we are practicing: quilting, knitting, crocheting, embroidery, cross-stitch, and sewing. We may discuss slow fashion and farm-to-closet sustainability, reuse and upcycling, #blackmakersmatter and the intersection of social justice and ecological integrity. We may trade images by artist-activists, such as quilter Bisa Butler and textile artist Victoria Villasana. We may video conference with makers such as quilter Zak Foster, knitters Denise Bayron and Brandi Cheyenne Harper, recycled-denim artist Eliu Hernandez, and embroiderer Han Cao. Above all, we will sew together, stitch by stitch. Note: All levels welcome, including beginners. Professor will offer instruction and guidance on all techniques. This class will be a safe space for students of all gender identities and expressions. Reading may include: This Long Thread: Women of Color on Craft, Community and Connection; Fibershed: Growing a Movement of Farmers, Fashion Activists and Makers; Worn: A People's History of Clothing; Threads of Life: A History of the World Through the Eye of A Needle; All That She Carried: The Journey of Ashley's Sack, a Black Family Keepsake; Vanishing Fleece; and Knitting for Radical Self Care.

Class Format: Although we will only meet twice per week as a class, students will be encouraged to incorporate making into their daily practice. When possible, we will meet informally in optional, "pop-up sessions" to sew together in unexpected places.

Requirements/Evaluation: Final project or presentation. All members will take part in an end-of-term exhibit and slow-fashion show open to the community.

Prerequisites: No experience or equipment needed.
Enrollment Limit: 12
Enrollment Preferences: Students will be selected based upon a one-paragraph expression of interest and statement of intention. Preference will be given to students who have little to no experience with needlecraft or making-by-hand. Craft instruction will be provided.

Expected Class Size: NA
Grading: pass/fail only

Materials/Lab Fee: This course is committed to sustainability. We will make use of the Fab Lab for supplies, and will explore the art of scavenging.

- Ben Snyder, Associate Professor of Sociology
- Phi H. Su, Assistant Professor of Sociology; affiliated with: Anthropology & Sociology, Science & Technology Studies

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences.

Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. Archaeology extends this analysis to social formations of the historical and prehistorical past. Sociology studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

MAJORS

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology.
and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

**Requirements**

For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

**Core Courses**

Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

**Anthropology**

ANTH 101 How to Be Human

**Sociology**

SOC 101 Invitation to Sociology

**Joint Courses**

ANSO 205 Ways of Knowing

ANSO 305 Social Theory

ANSO 402 Senior Seminar

**Elective Courses**

Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology. Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

**STATISTICS AND DATA ANALYSIS**

In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

**AREA STUDIES CONCENTRATION**

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student's departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

**LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY**

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until AFTER they have taken the course.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes. We credit two, and in special cases three courses.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.
Are there specific major requirements that cannot be fulfilled while on study away?

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

ANSO 205  (S)  Ways of Knowing

An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? How do qualitative and quantitative approaches to social inquiry differ? How are they similar? What is the importance of history to sociological and anthropological research? How do social researchers use archival and other documentary materials to interpret society? What is the relationship between empirical data and the generation of social theory? What are the ethical dilemmas of fieldwork and of other kinds of social research? How do researchers’ personal biographies and values shape their work? We will approach these problems both abstractly and concretely, through readings in epistemology as well as a series of case studies, drawing upon the field experiences of departmental faculty and guest speakers. The course will also feature hands-on training in field methods, in which students design and undertake their own pilot field projects.

Requirements/Evaluation: full participation in the seminar, several short written assignments, and a final research essay/proposal

Prerequisites: ANTH 101 or SOC 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 19

Spring 2025

SEM Section: 01    TF 1:10 pm - 2:25 pm   Ben Snyder

ANSO 305  (F)  Social Theory

An introduction to social theory in anthropology and sociology, with strong emphasis on enduring themes that cut across disciplinary divides. How does social theory help us critically analyze the world in which we find ourselves? How do social thinkers construe "society" and "culture," and have these constructions withstood challenges over time? What role does human agency play in the unfolding of social life, and where does that sense of agency come from in the first place? What are the forces that animate social interaction on the level of individuals, social groups and complex units like nation-states? What are the possibilities and limits of systematic approaches to the study of human social experience? The course emphasizes differences between interpretive frameworks as well as the common elements that contribute to a deeper understanding of the social world.
**ANSO 402 (S) Senior Seminar**

This capstone seminar combines substantive discussion and individual research. Half of the course will be dedicated to discussion of topics of enduring significance to both anthropology and sociology. Through readings and class discussions of selected publications, we will address current debates, dilemmas, and developments in anthropology and sociology. The other half of the course will be devoted to original individual student projects involving qualitative social science methods (such as participant-observation, archival study, discourse analysis, material culture analysis or ethnographic interviews, among other possibilities). At the end of the course, students will present their projects to the seminar.

**Requirements/Evaluation:** several short response papers, participation, individual research project (resulting in 15 page paper), and class presentation

SEM Section: 01  TR 9:55 am - 11:10 am  Joel Lee

**ANSO 10 Urban Inequality, Policing, and Struggles for Racial Justice**

This class explores the connections between policing and struggles for more just and equal cities. Drawing on interdisciplinary approaches from sociology, Black studies, geography, history, and criminology, we will explore how the origins and development of different policing practices are intertwined with the racialization of space as well as how movements for racial, economic, and spatial justice make these connections. We will examine the evolution of these dynamics in the US context, focusing on the origins of policing, gendered and racialized post-Emancipation policing practices in US cities, the Black freedom struggle in the 1960s, struggles for just cities in the 21st century, and the relationship between gentrification and policing. While focusing on US cities, we will also draw on connections with policing and urban inequality in other nations, such as Brazil and South Africa. Students will gain hands-on experience in conducting interdisciplinary and critical research on urban inequality and policing as we explore these topics through collaborative and creative projects that draw on a range of data sources and modes of research communication that span across disciplines. This seminar-style class is focused on group-led discussions of readings and films, which will all be provided on GLOW. The main course requirements are active engagement in course discussions and a creative group project that draws on multiple forms of data (e.g., archival, census records, media sources, and self-exploratory reflections) to explore a contemporary issue or debate related to urban inequality, urban
redevelopment, and policing.

Requirements/Evaluation:  Presentation(s); Creative project(s); Other: Engagement with course discussions

Prerequisites:  None

Enrollment Limit:  15

Enrollment Preferences:  Students who have taken a previous course in Anthropology and Sociology or Africana Studies; after that, random selection

Expected Class Size:  NA

Grading:

Unit Notes:  Peter Kent-Stoll is a Ph.D. candidate in sociology at the University of Massachusetts. He has expertise in the sociology of race, urban sociology, political sociology, criminology, and decolonial and postcolonial theory.

ANSO 15  (W)  "It's a love story, baby, just say yes": Media, messages, and healthy relationships

Cross-listings:

Primary Cross-listing

From the time we're small children, we're inundated with media about romantic relationships: who to have them with, how they unfold, what the should look like. But what makes a relationship "healthy"? Are romantic relationships the pinnacle of what kinds of relationships we can have? How do we end relationships we don't want to be in anymore? Using a range of popular media--reality TV like the Bachelor/ette franchise and Love Is Blind; animated movies; rom-coms; short stories--as a lens to examine healthy relationships (romantic and friend); what stories are we told and do we create about how relationships form and deepen? What are the "right" and "wrong" reasons to be seeking and staying in relationships? How did first reality TV and now social media shape our notions of public and private in relationships? How do we have healthy relationships across identity differences? In addition to exploring the messages we receive, we'll have the opportunity to construct our own answers to these and other questions.

Requirements/Evaluation:  Paper(s) or report(s); Presentation(s); Creative project(s); Other: I typically offer a range of creative options, which has included podcast episodes, lit reviews, a course catalog, etc.

Prerequisites:  none

Enrollment Limit:  25

Enrollment Preferences:  An interest form

Expected Class Size:  NA

Grading:  pass/fail only

Unit Notes:  Meg Bossong '05 is the Executive Director of MASOC, the MA professional association of clinicians who work with children, youth, and young adults with problem sexual behaviors. She was previously the director of the PEACe Office at Williams.

Materials/Lab Fee:  $105

This course is cross-listed and the prefixes carry the following divisional credit:

ANSO 17  (W)  Journalism Today

Even as the field is constantly changing and reshaping itself, at the heart of journalism is the desire to thoughtfully report and write stories about the world around us. This course is a bottom-up examination of what that means, from the practical skills of how to hone a story idea and conduct an interview, to the process of crafting a finished work. Throughout the class, we'll do a series of small exercises to work on specific skills, building up to a feature-length work about a subject that matters to you by the end of the month. We'll read classic work from the past, as well as some exemplary pieces from today, and question and consider the ethical, legal, and professional questions that are inherent to nonfiction work. We'll also discuss the real-world applications of these ideas with a busy schedule of guest speakers (in-person and virtual), who will talk about their work and careers in the news business. Past guests, many of them Williams alumni, have included journalists from the New York Times, the Wall Street Journal, the Washington Post, NPR, ABC News, Politico, Bloomberg, and ProPublica. This course would be quite useful for students with experience in journalism
and are considering it as a career, but also for anyone who wants to understand more about how the media works, or would simply like to experiment with and try out new ways of telling stories that make a difference.

**Requirements/Evaluation:** Paper(s) or report(s); Presentation(s)

**Prerequisites:** n/a

**Enrollment Limit:** 15

**Enrollment Preferences:** If overenrolled, a statement of interest in journalism would be appreciated.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** I am an independent journalist who was a reporter and editor at the Berkshire Eagle, and earlier had covered national energy policy in Washington, wrote about sports in Moscow, and worked on the international desk at Newsweek in New York.

**Materials/Lab Fee:** $120

**Attributes:** EXPE Experiential Education Courses  STUX Winter Study Student Exploration  WELL Winter Study Wellness

ANTHROPOLOGY AND SOCIOLOGY (Div II)

ANTHROPOLOGY

Chair: Professor James Nolan

- Zaid Adhami, Assistant Professor of Religion and Faculty Affiliate in Anthropology & Sociology; affiliated with: Religion, Anthropology & Sociology
- David B. Edwards, James N. Lambert '39 Professor of Anthropology
- Antonia E. Foias, Preston S. Parish '41 Third Century Professor of Anthropology
- Venus M. Green, Gaius Charles Bolin Fellow in the Department of Anthropology and Sociology
- Kim Gutschow, Senior Lecturer in Religion and Anthropology/Sociology; affiliated with: Religion, Anthropology & Sociology
- Nicolas C. Howe, Professor of Environmental Studies and Faculty Affiliate in Anthropology and Sociology; affiliated with: Center for Environmental Studies, Anthropology & Sociology
- Peter Just, Professor of Anthropology
- Kamal A. Kariem, Gaius Charles Bolin Fellow in the Department of German and Russian and Faculty Affiliate in Anthropology and Sociology; affiliated with: German and Russian, Anthropology & Sociology
- Joel Lee, Associate Professor of Anthropology
- James A. Manigault-Bryant, Chair and Professor of Africana Studies and Faculty Affiliate in Anthropology and Sociology and Religion; affiliated with: Africana Studies, Religion, Anthropology & Sociology
- Gregory C. Mitchell, Professor of Women's, Gender and Sexuality Studies and Faculty Affiliate in Anthropology/Sociology; affiliated with: Women, Gender & Sexuality Studies, Anthropology & Sociology
- James L. Nolan, Washington Gladden 1859 Professor of Sociology
- Marketa Rulikova, Visiting Assistant Professor of Sociology
- Olga Shevchenko, Paul H. Hunn ’55 Professor in Social Studies
- Christina E. Simko, Chair and Associate Professor of Sociology; affiliated with: Anthropology & Sociology, American Studies
- Ben Snyder, Associate Professor of Sociology
- Phi H. Su, Assistant Professor of Sociology; affiliated with: Anthropology & Sociology, Science & Technology Studies

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences.

Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. Archaeology extends this analysis to social formations of the historical and prehistorical past. Sociology studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

MAJORS
The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

Requirements
For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

Core Courses
Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

Anthropology
ANTH 101 How to Be Human

Sociology
SOC 101 Invitation to Sociology

Joint Courses
ANSO 205 Ways of Knowing
ANSO 305 Social Theory
ANSO 402 Senior Seminar

Elective Courses
Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

STATISTICS AND DATA ANALYSIS
In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION
Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student's departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY
Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until AFTER they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes. We credit two, and in special cases three courses.
Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

ANTH 101  (F)(S) How To Be Human  (DPE)

Is there such a thing as "human nature"? This course is an introduction to cultural anthropology (also known as social or socio-cultural anthropology), the study of human society in all its profound variety. Through deep, sustained, systematic participation in and observation of a particular social context, anthropologists seek to comprehend and illuminate the human condition. Anthropologists’ insights into the ways in which human institutions - language, economy, religion, social stratification, law, sexuality, art, the state, and many more - are culturally constructed and reproduced have transformed the way the world is understood. Puncturing ethnocentrism, anthropology's attentiveness to the ideas and practices of cultures in every part of the globe vastly enriches the archive of human answers to human problems. The distinctive methods of the discipline enable anthropologists to discover patterns and phenomena not discernible in other modes of enquiry. With such findings anthropologists are able to make critical interventions in public discourse and to demonstrate how deeply we are all shaped by cultural forces.

Requirements/Evaluation:  weekly posts in response to readings, two group presentations, several short writing exercises, final exam

Prerequisites:  none

Enrollment Limit:  30

Enrollment Preferences:  first-year students and sophomores

Expected Class Size:  30

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

Difference, Power, and Equity Notes:  The course is an introduction to cultural anthropology and deals extensively with race, ethnicity, religion, gender, etc., as cultural constructs creating social difference, hierarchies of power, and the creation of inequities in communities and societies. Readings in ethnography, social theory, and sociology are designed to give students a deeper appreciation of all these issues.

ANTH 103  (F)  Pyramids, Bones, and Sherds: What is Archaeology?

Anthropology examines not only living societies, but also prehistoric cultures whose remains are found worldwide. This course will present how archaeology reconstructs the various aspects of human society from the physical record of prehistory. How do we study the subsistence and settlement patterns, the political and social organization, and the economy and ideology of prehistoric societies who have left behind mute material records? The objective of anthropological archaeology is to bring to life these prehistoric cultures through archaeological analysis. The different goals, approaches and methodologies of modern archaeology will be discussed theoretically and then applied to case studies.

Requirements/Evaluation:  class presentations, two 12-15pp analytical papers, midterm and final exams
Prerequisites:  none
Enrollment Limit:  30
Enrollment Preferences:  First and second year students.
Expected Class Size:  19
Grading:  no pass/fail option,  yes fifth course option
Distributions:  (D2)

ANTH 162  (S)  Languages of East Asia

Cross-listings:  ASIA 162 / CHIN 162 / GBST 162

Secondary Cross-listing

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? How are they used in Asian American speech communities? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format:  combination of lecture, discussion, and language practice
Requirements/Evaluation:  three quizzes, two 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper
Prerequisites:  none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)
Enrollment Limit:  20
Enrollment Preferences:  open to all with preference to first-year students and sophomores as well as majors/concentrators in CHIN, JAPN, EALC, ANTH, ASIA and GBST
Expected Class Size:  15
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ANTH 208  (F)  The U.S. and Afghanistan: A Post-Mortem  (DPE)

Cross-listings:  ASIA 208 / GBST 208

Primary Cross-listing
The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

Requirements/Evaluation: grading will be determined by class participation, two short (500 word) essays, and a 15-page research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference

Expected Class Size: 15-20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 208(D2) GBST 208(D2) ANTH 208(D2)

Difference, Power, and Equity Notes: Among the topics relevant to power and difference to be considered in this course are the American support and later disavowal of Islamist political parties to advance US geopolitical goals, public relations efforts "to save Afghan women" after 9/11, and the uses and misuses of American military, economic, and political power to build a western-style democratic government and bring western-oriented social reforms to a society radically different from U.S. society.

Not offered current academic year

ANTH 209 (F) Siberia: Region Making and Imperial Imagination in Russia

Cross-listings: RUSS 209

Primary Cross-listing

Siberia is often framed as an essential part of Russia and a repository of all that is Russian. However, imaginations of Siberia also paint contradictory images of the region: as a heaven or a hell, a wasteland or a breadbasket, a place of freedom or a place of imprisonment, a Russian colony or as the Russian heartland. This course takes as its root that Siberia is not any one thing and not any one place. Rather, Siberia is an idea and set of representations that change over time. In this course, we will analyze and unpack this idea. The course asks: what is Siberia; how did Siberia become so integral to Russia and ideas of Russianness; who defines Siberia; what are the images of Siberia and for whom do they matter; and what do these imaginations of Siberia facilitate and obscure? To answer these questions, we will engage in an interdisciplinary study of Siberia incorporating ethnography, history, film, and literature. The primary goal of the course is to expose students to the various ways Siberia has been imagined, who it has been imagined and represented by, and how these imaginations and representations have lives of their own. In doing so, the course will help students view Russia through its peripheries rather than through Moscow and Saint Petersburg and will enable students to grapple with how "regions" are created.

Requirements/Evaluation: Regular GLOW posts and participation in classroom discussion, a midterm paper, and a hybrid reflective and analytic paper comparing imaginations of Siberia with place from their own life that has been highly imagined.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Majors in Anthropology and Sociology and majors and certificate-seekers in Russian.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 209(D1) ANTH 209(D2)
ANTH 211  (F)  Music, Nationalism, and Popular Culture  (DPE)

Cross-listings:  MUS 211

Secondary Cross-listing

This course surveys the manner, function, and contexts through which sound and ideas of national belonging are linked. We will consider influential and iconic musicians (e.g. Umm Kalthoum, Amalia Rodriguez, Bob Marley, Carlos Gardel), international forums for the expression of national sentiment (the Olympics, World Cup, and Eurovision competitions), and a wide range of instruments, genres, and anthems that are strong conduits for national sentiment. Drawing on the work of critical theorists including Benedict Anderson, Michael Herzfeld, and Homi K. Bhabha, we will pursue a number of analytical questions: What parallels exist between musical and political structure? How do nations adjust as their policies and demographics change? How are cultural forms implicated in postcolonial nation building projects? What marginal populations or expressive forms are included, excluded, or appropriated in the formation of national identity? Finally, what differences emerge as we change our focus from a national to an international perspective, or from officially endorsed representations of national culture to unofficial popular forms of entertainment?

Requirements/Evaluation:  Class participation, regular short (1 page) written responses, two 5- to 6-page papers, a Final Paper/Project

Prerequisites:  none

Enrollment Limit:  20

Enrollment Preferences:  Upperclass students and music majors

Expected Class Size:  20

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 211(D1) ANTH 211(D2)

Difference, Power, and Equity Notes: Owing to its global focus and attention to power and privilege in political and musical structures, this course meets the DPE requirement. Topics include the use of music for social control and subversion in Mobutu's Zaire, its affective power in U.S. campaign ads, and the ways in which constructions of 'folk music' impact power differentials in a national political structure. Assignments help students develop an awareness of the specific strategies whereby music mobilizes national ideologies.

Attributes:  AMST Arts in Context Electives  MUS Ethnomusicology

ANTH 214  (F)  The Rise and Fall of Civilizations

Cross-listings:  ENVI 224

Primary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format:  Class discussion and debates will complement lectures based on powerpoint presentation.

Requirements/Evaluation:  midterm, final exam, 15pp analytical paper, two quizzes

Prerequisites:  none

Enrollment Limit:  30

Enrollment Preferences:  First and second years.

Expected Class Size:  19
Grading: no pass/fail option, yes fifth course option

ANTH 216  (F)  Cities and Urbanism of the Ancient World  (WS)

Cross-listings: GBST 216

Primary Cross-listing

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

Requirements/Evaluation: 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first years, sophomores, or majors in Anthropology or Sociology

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 216(D2) ANTH 216(D2)

Writing Skills Notes: Throughout the semester, writing skills (developing an argument, construction of paragraphs, use of case studies) will be emphasized. An opportunity to rewrite at least one tutorial paper will allow students to actively apply what they are learning.

Fall 2024

TUT Section: T1    TBA    Antonia E. Foias

ANTH 217  (S)  Indigeneity Today: Comparative Indigenous Identities in the US and Russia  (DPE)  (WS)

Cross-listings: RUSS 217

Primary Cross-listing

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapples with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigeneities.
Requirements/Evaluation: 10 posts to the course Glow discussion page, 3 times leading class discussion on the assigned readings, 1 short presentation, 1 extended portfolio project with regular shorter and longer writing submissions, and 1 final paper and final presentation (as the final part of the portfolio).

Prerequisites: None

Enrollment Limit: 16

Enrollment Preferences: Majors and certificate-seekers in Russian, then majors in Anthropology and Sociology, and then Global Studies concentrators

Expected Class Size: 12-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 217(D1) ANTH 217(D2)

Writing Skills Notes: This course has the following assignments: Weekly post to the Glow discussion page, 1 extended project with regular writing submissions, 1 final paper and final presentation. For the extended project, we will have instructor feedback for all project assignments. In instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed. There will also be peer feedback/review.

Difference, Power, and Equity Notes: In the course, students will learn about Indigeneity as a context-specific social formation. It understands Indigeneity as a category of difference with past and present importance. We will read about, discuss, and write about Indigeneity as a social category, along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.

Spring 2025

SEM Section: 01 TF 2:35 pm - 3:50 pm Kamal A. Kariem

ANTH 219 (S) The Art and Archaeology of Maya Civilization

Cross-listings: ARTH 209 / GBST 209

Primary Cross-listing

The ancient Maya civilization was one of the most sophisticated and complex cultures of prehispanic Central America. Its complex calendrics, astronomy, mathematics, art and hieroglyphic writing system are celebrated worldwide. The course will examine the trajectory and nature of ancient Maya civilization from the combined perspectives of archaeology and art history. The origins and evolution of the Maya states during the Preclassic period (1000 B.C.-A.D. 250) will be explored through the rich archaeological remains and Preclassic art styles. The Classic Maya civilization (A.D. 250-1000) will then be presented through a detailed survey of the archaeology, art and hieroglyphic texts of this period. Finally, the collapse of Classic Maya civilization and its transformation and endurance during the Postclassic period and under early Spanish rule (A.D. 1000-1600) will be critically evaluated through a review of the archaeological, iconographic, and ethnohistorical evidence.

Class Format: lecture/discussion

Requirements/Evaluation: midterm and final exams, hieroglyphic project, 15pp research paper

Prerequisites: none, but an introductory ARTH or ANTH course recommended

Enrollment Limit: none

Enrollment Preferences: Anthropology/Sociology and Art History majors

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

LEC Section: 01 TF 1:10 pm - 2:25 pm Antonia E. Foias
ANTH 225 (F) Ways of Seeing

This course examines the potential of images for revealing aspects of cultural normally obscured by the written word and for transmitting different, sometimes undervalued insights and knowledge of the social world. The central focus of this course is documentary film, and we will consider both the theory and practice of the documentary in the United States and abroad as it has evolved over time and as it is evident in contemporary filmmaking. In the course of the semester, we will examine some of the ways in which filmmakers, and ethnographic filmmakers in particular, have approached the task of documenting and understanding different aspects of social reality. Among the questions that we will consider are the following: What is the relationship between written texts and images? What is it that documentary films “document?” What is the relationship between images and stories, and should the techniques used in fiction films to construct voice, point of view, identification, narrative sequence, etc. apply as well in the creation of nonfiction films? What is the role of film in anthropology, and how does ethnographic filmmaking relate to anthropology and to the broader documentary film tradition? In the last part of the course, we will consider the proliferation of cell phone videos and platforms such as Youtube and Instagram and their significance for the documentary film genre more generally.

Requirements/Evaluation: Weekly response/critiques of assigned films, a longer written paper (10-12 pages) or video essay of comparable scope

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology/Sociology majors, open to first-year students

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ANTH 238 (F) Black Voices in Anthropology

Cross-listings: GBST 238 / AFR 238

Secondary Cross-listing

What names and faces come to your mind when you think about Anthropology? The course introduces students to the lives and work of pioneering Black anthropologists whose contributions are still unknown or overlooked. Through different styles, methods, and theoretical approaches, each of these intellectuals has developed antiracist perspectives on foundational topics in the Social Sciences and the Humanities, contributing to advancing the study of the African continent and the Black Diaspora. Throughout the classes, students will learn about each author’s journeys, which can spark significant changes in how we think about our roles as social scientists within and outside academic boundaries.

Class Format: Students will be required to develop and give a class presentation focused on contemporary Black anthropologists from Africa and the Diaspora.

Requirements/Evaluation: Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); formal class presentation (individually or in groups); and a final essay or research paper (5-10 pages).

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Should the course be overenrolled, preference will be given to majors and concentrators in Africana Studies, Sociology, and Anthropology.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 240  (S)  Work as a Cultural System  (DPE)

"You know my reputation," sang Billy Joe Shaver, "I am everything I do." In many ways we are homo faber, the species that makes its world and we are defined by what we make, by the work we do. This course will undertake a broad survey of work as cultural systems across time and space. How do societies define work, how do they organize it? Who controls the processes of work, who controls the product of work? When is work an act of pure creation and when is it stultifying labor? How is work enabled and how is it compensated? What defines the difference between work and leisure and how are they valued? How does control over access to work, the organization of work, and the appropriation of its products determine difference, power, and equity in a society? These questions will guide an examination of work drawing on works of philosophy, history, ethnography, literature, and film examining people at work ranging from hunter-gatherers to tin miners, from slaves to corporate managers, from merchant mariners in the age of sail to physicians struggling to adapt to computerized medical records.

Requirements/Evaluation: students will compose several response papers, a take-home midterm exam and a final research paper of 15-20 pages

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Access to work, control over the work process, control over the fruits of labor, and compensation for work, are a principal means for creating and maintaining social difference, power, and equity. It is impossible to seriously study the nature of work without discussing these topics. By placing the universal experience of work in a broad spatial and temporal context students will discover an enhanced analytical ability to critically understand their own experiences of work and those of others.

ANTH 243  (S)  Reimagining Rivers  (DPE) (WS)

Cross-listings: ENVI 243

Secondary Cross-listing

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Requirements/Evaluation: Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 243(D2) ANTH 243(D2)

Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each
Difference, Power, and Equity Notes: This course focuses on the role of rivers in struggles over cultural difference, social power, and environmental equity. Throughout the course, students read and write extensively about environmental justice, and they engage with diverse theoretical approaches to studying the intersection of water, power, and social identity. Our focus from beginning to end is on the profound impact of river management on the lives of marginalized indigenous, agrarian, and urban communities.

ANTH 249  (S) The Sacred in South Asia

Cross-listings: ASIA 242 / REL 149

Primary Cross-listing

Is religious identity necessarily singular and unambiguous? The jinn - Islamic spirits born of fire - are sought out for their healing and other powers not only by Muslims in India, but by Hindus, Christians and Sikhs, as well. In parts of Bengal statues of the Hindu goddess Durga are traditionally sculpted by Muslim artisans. Buddhist pilgrimage sites in Sri Lanka contain tombs of Muslim Sufi saints and shrines of Hindu deities. South Asia - where a fifth of humanity lives - provides some of the most striking examples of pluralism and religiously composite culture in our contemporary world. Yet at the same time, strident religious majoritarianism has been a defining feature of the politics of India, Pakistan and Sri Lanka for decades, and haunts Nepal and Bangladesh as well. Are these two modes of religious being - pluralistic and composite on the one hand, singular and majoritarian on the other - reflective of two different conceptions of selfhood? What if we turn from questions of community and identity to questions of unseen power and the sacred? This course is an exploration of lived religion in South Asia. It is simultaneously a study of popular Hinduism, Buddhism and Islam and an introduction to the anthropology of religion. Centered on in-depth studies of popular sites of ‘syncretic’ ritual practice (shared across religious difference) as well as studies of mass mobilizations that seek to align the religious community with the nation, we approach from multiple angles what the sacred might mean in modernity.

Requirements/Evaluation: weekly (1 page) posts on readings, two short (5 page) papers, and one (12-14 page) final research paper.

Prerequisites: Interest in the topic!

Enrollment Limit: 20

Enrollment Preferences: Students in all fields of study are most welcome; if overenrolled, priority will be given to majors in Anthropology, Sociology, Religion and Asian Studies.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

ANTH 254  (S) Food, Forests, & Fungi: Environmental Health in the Anthropocene  (DPE) (WS)

Cross-listings: STS 254 / ENVI 254

Primary Cross-listing

This tutorial will examine the impacts of the climate crisis on human, environmental, and planetary health via the lens of food systems & plant medicines in the Anthropocene. We use anthropological, environmental, evolutionary, & ecological approaches to explore the ecosystems connecting humans, plants, animals, and fungi that have been massively disrupted by systems of industrial agriculture, industrial forestry, corporate food systems, and corporate biomedicine. We will dwell on the growing signs of our climate catastrophe including the sharp rise of global temperatures, floods, hurricanes, alongside declining freshwater reserves, melting cryosphere, and falling crop yields, that are helping produce a growing wave of hunger and climate refugees in every world region. Along the way, we will hear from and read about youthful climate activists from Extinction Rebellion, Ende
Gelände, Fridays for the Future, 350.org, and the Sunrise Movement who are designing and implementing innovative, local, and sustainable solutions to inaction, apathy, and inertia even as situations of internal migration or displacement, food scarcity, food sovereignty, water shortages, and other climate-related disruptions are increasing in both developing and developed parts of our globe. We learn how activist narratives intersect with wider movements to promote more local and circular economies of regenerative agriculture and forestry, ethically produced and sourced organic food, wild & cultivated botanicals, and complementary medicines that are healing both humans and the planet.

**Requirements/Evaluation:** Weekly attendance, reading 200-300 pages/week, weekly lead essays or oral responses to texts, showing up in mind & body each week.

**Prerequisites:** none, but a class in ENVI or ANTH preferred

**Enrollment Limit:** 10

**Enrollment Preferences:** ANTH, ENVI, STS majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ST 54(D2) ANTH 54(D2) ENVI 54(D2)

**Writing Skills Notes:** Students will write essays: either a lead essay of 1400 words, or written & oral feedback on the lead essay plus an oral response to text. Students receive intensive weekly feedback on their essays and a mid semester writing chat with instructor to negotiate and understand strengths and weaknesses of their writing.

**Difference, Power, and Equity Notes:** We will examine the ways that food systems reproduce social and structural inequalities within public health, environmental health, climate health. We also examined the interconnected nature of the health of our planet, food systems, forests, and fungal networks and how climate activism and action can fight unequal access to food, forests, nature, and health.

**ANTH 255 (F) Buddhism: Ideas and Practices**

**Cross-listings:** ASIA 255 / REL 255

**Secondary Cross-listing**

This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

**Class Format:** discussion

**Requirements/Evaluation:** full attendance and active participation; two essays

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** religion majors or future religion majors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

ANTH 258  (F) Buddhism, Social Change, & Reproductive Justice in the Anthropocene  (DPE) (WS)

Cross-listings: REL 258 / WGSS 225 / ASIA 258

Primary Cross-listing

This course considers how three women profoundly shaped the Buddha’s life and legacy in terms of social change & reproductive justice. Our central characters are Maya—the Buddha’s mother, who died shortly after delivering him; Pajapati—the Buddha’s stepmother & aunt who raised him; and Yasodhara—his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women helped shape the Buddha’s radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for the past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha’s day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha’s day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

Requirements/Evaluation: Attendance, writing weekly essays or written feedback. There are no grades first half of the semester but weekly feedback on writing.

Prerequisites: none, but a course in ANTH or REL is preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, REL, WGSS majors and ASIA concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 258(D2) ANTH 258(D2) WGSS 225(D2) ASIA 258(D2)

Writing Skills Notes: We write every week—either 1500 word lead essays, or written feedback (and oral responses) to the lead essay and weekly text. We have a mid semester ‘writing chat’ with the instructor where we discuss strengths and weakness of individual student writing.

Difference, Power, and Equity Notes: We explore the three women who left a lasting legacy on the Buddha’s teachings and practices in terms of gender egalitarianism, social justice, and reproductive justice. Our historical genealogy explores how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice.

Not offered current academic year

ANTH 260  (F) Great Dramas of Archaeology

Was the tomb of Tutankhamun cursed? How did Esamun, Priest of Amun (c. 1100 BC) live in the Great Temple of Amun? How was his body mumified? Was Otzi the Ice Man (discovered in the Italian Alps) tattooed? Has Lidar (remote mapping using laser light) revolutionized archaeology? Was Yax Nuun Ayiin (one of the most important kings of the Maya city of Tikal) a foreigner? These are some of the questions and case studies of the course as we examine how great discoveries or new technologies have transformed archaeology over the last century. At the same time, these case studies will provide a window into ancient lives and livelihoods, as well as into how archaeologists reconstruct the past. We will pay particular attention to the perspectives of the less powerful, including women, children, and immigrants or foreigners. The course will provide hands-on experience with ArcGIS and Lidar data.

Requirements/Evaluation: two 5pp response papers; ArcGIS/Lidar-based project; class presentation and participation

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: first preference to first years or sophomores; second preference to ANSO majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)
ANTH 262  (S) Language and Power  (DPE)

"A language is a dialect with an army." This (originally Yiddish) aphorism points to ways in which language, often imagined to be a neutral or apolitical medium of communication, proves in practice to be a social domain fully implicated in the operations of power. How do we include, exclude, or accumulate cultural capital by the way that we talk? When a language is a goddess (as with Tamil), what forms of linguistic community follow? How is structural inequality sustained or subverted by language practices, and how can speech transform the world? This introduction to linguistic anthropology draws together classic works of linguistic and semiotic theory with studies of the politics of actual speech grounded in rich and particular cultural and historical contexts, from witchcraft accusations in rural France to the partition of Hindi and Urdu in colonial India. Students will gain familiarity with key concepts (speech acts, performatives, code-switching, language ideology), themes and debates in the social scientific study of language. The course is global in orientation, with special attention to South Asia. Assignments include in-class presentations and short response papers; students will also study language policy in a place of importance to them and make recommendations toward improving inclusivity. Finally students will conduct individual ethnographic projects analyzing a distinctive speech genre of their choice.

Requirements/Evaluation: In-class presentations, short response papers, short study of language policy, and an ethnographic final project (roughly 12 page paper).

Prerequisites: None.

Enrollment Limit: 16

Enrollment Preferences: Students in all fields of study are most welcome. If overenrolled, priority will be given to Anthropology or Sociology majors, Asian Studies concentrators, and final-year students.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course attends to the operations of power in several linguistic domains: colonial language policy in South Asia, everyday racism and "mock Spanish" in the United States, and conflict between users of "dialect" and "standard" in multiple language contexts. In their ethnographic projects students will carefully analyze the operations of power in language use in our own local community.

Attributes: Linguistics

Spring 2025

ANTH 269  (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience  (DPE) (WS)

Cross-listings: ASIA 269 / STS 269 / REL 269

Secondary Cross-listing

This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians, and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness for clinicians, therapists, and educators--all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation practices all semester, while learning to better appreciate our own minds, emotions, and relationships.

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: A prior class or some experience with meditation is recommended

Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 269(D2) STS 269(D2) REL 269(D2) ANTH 269(D2)

Writing Skills Notes: This class will involve weekly tutorial essays or oral responses, intensive written feedback on every essay, and a mid-semester 'writing chat' with the instructor.

Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can address the growing epidemic of anxiety, depression, and other mental health issues we find in the US today. We study mindfulness from an intersectional perspective and relate its benefits to intersecting inequities and intergenerational trauma in the US today.

Not offered current academic year

ANTH 299 (F) Ritual, Power and Transgression

Cross-listings: REL 274

Primary Cross-listing
The focus of this course is on the role of ritual in harnessing political power. In the first part of the semester, we examine some of the ways in which different cultures manufacture social order and political power through categories of inclusion and exclusion, clean and dirty, proper and improper, and licit and illicit. We will be particularly attuned to the ways in which these categories are performed through and maintained by rituals and how bodies are deployed in ritual spaces as instruments of persuasion and control. We will also look in depth at a variety of ritual forms, including scapegoating and sacrifice, and how they serve as engines of political control and protest, and we will examine the uses of dead bodies and memorials as vehicles for gaining and maintaining political power and the destruction and desecration of bodies and memorials as a form of political protest and dissent. Throughout the semester, we will be relating theoretical texts and historical cases to current political struggles in this country and abroad.

Requirements/Evaluation: class participation, biweekly responses to instructor prompts, two short (500 words) response papers, and one 12-page (2400 words) research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: ANSO and REL majors, open to first-years

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ANTH 301 (S) Sexual Economies (DPE)

Cross-listings: AMST 334 / WGSS 301

Secondary Cross-listing
This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We have a variety of guest speakers to share their diverse lived experiences related to this topic.

Requirements/Evaluation: short-quizzes, reflection papers, participation, short Marco Polo video posts (app 3 min each)

Prerequisites: none, though WGSS 101 and/or 202 may be helpful, but not required
Enrollment Limit: 15
Enrollment Preferences: based on statement of interest, brief interviews if necessary
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 301(D2) AMST 334(D2) WGSS 301(D2)

Difference, Power, and Equity Notes: We pay particular attention to the intersecting questions of race, sexuality, gender, and class as we explore the political economy of commercial sex. The course teaches students to examine the underlying political and economic structures that create systems of privilege and power, thereby complicating questions and assumptions about sexual consent, coercion, agency, and empowerment with particular attention to race and gender in comparative transnational contexts.

ANTH 305  (F) The Gay Menagerie: Gay Male Subcultures  (DPE)

Cross-listings: AMST 305 / WGSS 305 / THEA 304

Secondary Cross-listing

Bears. Cubs. Otters. Pups. Twinks. Radical Fairies. Leathermen. Mollies. Drag queens. Dandies. Sisters of Perpetual Indulgence. Gay men, including gay trans men, have organized themselves into various subcultures within their community for centuries. This seminar is devoted to exploring these subcultures in a mostly US-context in greater detail using ethnographic texts, anthropological studies, historical accounts (including oral histories), and media. Topics include cruising and flagging, the anthropological significance of gay bars, histories of bath house culture, rural vs urban queer experiences, the ball scene, drag, diva worship, the reclamation of "fabulousness and faggotry," the leadership roles of trans women and effeminate gay men in activist movements, gay gentrification, the growth of gay consumerism/ gay tourism/homonationalism, hierarchies of masculinity in the gay community (i.e., masc for masc culture), HIV/AIDS and the politics of PrEP, chemsex, the role of racialized dating "preferences," genealogies of BDSM and leather culture, sexual health and discourses of "risk," the politics of barebacking and other sexual practices, queering consent, and the effects of hookup apps on gay culture. In addition to lectures, and discussions, there will also be some low-key performance-studies based exercises in queer praxis (e.g., drag workshops, mock debates, animal improvisation, role playing, etc.)

Class Format: There will be some minor performance elements such as workshops during class.

Requirements/Evaluation: Quizzes, journaling assignment, short diva report, 10 page research paper on a gay subcultural group

Prerequisites: None; WGSS 202 (Foundations in Sexuality Studies) will be helpful but is not required

Enrollment Limit: 12
Enrollment Preferences: WGSS majors; in the event of over-enrollment there statements of interest will be solicited
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 305(D2) AMST 305(D2) WGSS 305(D2) THEA 304(D1)

Difference, Power, and Equity Notes: This course examines the how marginalized communities respond to their oppression through creative forms. It takes as central to its curriculum the role of sexual diversity and the relationship of the gay community to power through the central idiom of "difference."

Attributes: WGSS Racial Sexual + Cultural Diversity Courses

Not offered current academic year

ANTH 322  (F) Waste and Value
What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we ‘throw away’ things at Williams College, where exactly do they go, and who handles them ‘down the line’? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia and North America. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

Requirements/Evaluation: regular posting of critical response papers, field notes on waste streams, research-based final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: All students are welcome to the course. If overenrolled, preference will be given to majors in Anthropology and Sociology and concentrators in Environmental Studies and Asian Studies.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

ANTH 324 (S) Empires of Antiquity

Cross-listings: GBST 324

Primary Cross-listing

Cycles of rise and collapse of civilizations are common in our human past. Among the most fascinating cases are those of empires, conquest-based states that encompass a number of different ethnicities, polities and peoples. However, their rise and often rapid collapse begs an important question: how stable have empires been in human prehistory? Are they intrinsically unstable political forms? The course will address these questions by examining the major empires of the Old and New World in pre-modern history: Persian; Assyrian; Mongol; Roman; Qin Chinese; Ottoman; Aztec; and Inca empires. Using readings by political scientists, historians, epigraphers, archaeologists and political anthropologists, we will consider the causes of the expansion and collapse of these empires. We will also explore their sociopolitical and economic structures as mechanisms for their maintenance in order to provide a cross-cultural comparison of the differential success and final decline of all these empires.

Class Format: seminar

Requirements/Evaluation: research paper, class presentation and active participation

Prerequisites: none; open to first-year students

Enrollment Limit: 25

Enrollment Preferences: ANSO majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 324(D2) GBST 324(D2)
ANTH 334 (S) Imagining Joseph

Cross-listings: REL 334 / COMP 334 / JWST 334

Primary Cross-listing

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar’s wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur’an, as well as the more expansive pleasures of linking post-scriptural expressions together.

Requirements/Evaluation: occasional response papers; substantial final project and paper; class participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: based on responses to a questionnaire

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 334(D2) ANTH 334(D2) COMP 334(D1) JWST 334(D2)

Attributes: JWST Core Electives

ANTH 345 Political Life in India (DPE)

In 2020, tens of thousands of farmers parked their tractors on major highways leading into India’s national capital of Delhi, erected a city of tents and camped out until—sixteen months later—the legislation they were protesting was repealed. Beyond elections, how are politics practiced in the world’s largest democracy? In the birthplace of the fast-unto-death, the rasta roko (human road blockade), the relay hunger strike and Gandhian non-violent resistance, what does democracy look like beyond voting, and what might we learn from India’s distinctive modes of mass mobilization and traditions of political imagination? How do everyday practices conducive to religious, linguistic and ethnic pluralism contend with the rise of Hindu nationalism? This course explores political culture in postcolonial India by way of case studies of three ongoing foci of collective struggle: caste inequality, religious majoritarianism, and environmental injustice. Readings will include ethnographies of popular mobilizations on these issues and students will individually research a particular contemporary movement.

Requirements/Evaluation: Weekly writings in response to readings; periodic leading class discussion; assorted short writing assignments; individual research project culminating in a 12 page paper and presentation.

Prerequisites: Background knowledge of South Asia will be helpful in this course but is not a prerequisite.

Enrollment Limit: 12

Enrollment Preferences: All students are most welcome in the course. If overenrolled, preference will be given to majors in Anthropology and Sociology and concentrators in Asian Studies.
Expected Class Size: 12
Grading:
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Caste inequality, religious majoritarianism and environmental injustice are issues at the core of this course. This course examines these social injustices in postcolonial India in detail, interrogating the structures of power that underpin them, and investigates how people collectively mobilize to attempt to bring about substantive equality.

Not offered current academic year

ANTH 360  (S) Lessons Learned from Afghanistan on Governance and Development

Following the Taliban takeover and the US withdrawal, Americans have been quick to wipe from memory that the twenty year-long conflict in Afghanistan. This case of willful amnesia is unfortunate, not least because ignoring history ensures that past mistakes will be repeated. Without question, much went wrong, and it's important to learn from those mistakes. It's also the case that much went right, and it's equally important to recognize what was achieved in Afghanistan, even if those accomplishments have been overshadowed by the events of last summer. This course seeks to recover from the detritus of state collapse both the positive and negative lessons that can be learned from America's engagement in Afghanistan. This course will include students from Williams and the American University of Afghanistan (AUAF), and will be taught in collaboration with a team of Afghan alumni from Williams' Center for Development Economics who were directly involved in the state-building project in Afghanistan over the last two decades.

Class Format: The class will be held in collaboration with the American University of Afghanistan (AUAF), and AUAF students will also be participating in this class.

Requirements/Evaluation: Students will be expected to actively participate in class discussions and post responses and questions on each week’s topic. Williams and AUAF students will work together in the preparation of their final projects, which will be research papers on a topic chosen and developed in consultation with the instructor.

Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: There will be 15 Williams students and 15 AUAF students in the class. Enrollment preference for Williams students will be given to ANSO majors and students who have taken courses related to the subject matter of the course.
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Not offered current academic year

ANTH 371  (S) Campus and Community Health in Disruptive Times  (DPE) (WS)

Cross-listings: WGSS 371 / STS 370
Primary Cross-listing

We study and seek “campuses where students feel enabled to develop their life projects, building a sense of self-efficacy and respecting others, in community spaces that work to diminish rather than augment power asymmetries.” --Sexual Citizens (Hirsch and Khan, 2020). Students will design and pursue innovative ethnographic projects that explore campus or community health. We will learn ethnographic techniques such as observant participation, interviewing, focus groups, qualitative surveys, as well as design thinking and data visualization skills. We use and critique the methods of medical anthropology and medical sociology in order to hone our skills in participatory research. Every week, we collaborate with and share our research with our participants and peers both inside and outside class through a variety of innovative exercises. We attend to the parallel roles of narrative and listening in both medicine and ethnography, as we contrast the discourse of providers & patients along with researchers & participants. We aim to understand the strengths and limits of ethnographic inquiry while privileging marginalized voices and attending to power and identity within our participatory research framework. We recognize that our campus health projects are always already shaped by power and privilege, as we examine the ways that daily life, individual practices, and collective institutions shape health on and off campus. Our ethnographic case studies explore how systemic inequalities of wealth, race, gender, sex, ethnicity, and citizenship shape landscapes of pediatric care, mental health, maternity care, and campus sexual assault in the US and elsewhere. We consider how lived practices shape health access & outcomes as well as well-being in our communities and on our campus.

Requirements/Evaluation: Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a
final presentation that includes data visualizations and analysis of research findings.

**Prerequisites:** A course in Anthropology, Sociology, STS or in DIV II is strongly recommended

**Enrollment Limit:** 19

**Enrollment Preferences:** Majors in Anthropology, Sociology, WGSS; Concentrators in PH, STS, ASIA, ENVI

**Expected Class Size:** 19

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ANTH 371(D2) WGSS 371(D2) STS 370(D2)

**Writing Skills Notes:** This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

**Difference, Power, and Equity Notes:** This class uses experiential learning to examine the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It explores the ways that intersectionality and implicit bias shapes health and well-being in patient/provider encounters as well as ethnographic research. It engages with and critiques efforts to 'improve' community and individual health outcomes in the US and elsewhere across the globe.

Winter Study ---------------------------------------------------------------

ANTH 31 (W) Senior Thesis: Anthropology
To be taken by students registered for Anthropology 493-494.
Class Format: thesis
Grading:   pass/fail only
Not offered current academic year

ANTH 99 (W) Independent Study: Anthropology
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading:   pass/fail only
Not offered current academic year
ANTHROPOLOGY AND SOCIOLOGY (Div II)

SOCIOLOGY

Chair: Professor James Nolan

- Zaid Adhami, Assistant Professor of Religion and Faculty Affiliate in Anthropology & Sociology; affiliated with: Religion, Anthropology & Sociology
- David B. Edwards, James N. Lambert ’39 Professor of Anthropology
- Antonia E. Foias, Preston S. Parish ’41 Third Century Professor of Anthropology
- Venus M. Green, Gaius Charles Bolin Fellow in the Department of Anthropology and Sociology
- Kim Gutschow, Senior Lecturer in Religion and Anthropology/Sociology; affiliated with: Religion, Anthropology & Sociology
- Nicolas C. Howe, Professor of Environmental Studies and Faculty Affiliate in Anthropology and Sociology; affiliated with: Center for Environmental Studies, Anthropology & Sociology
- Peter Just, Professor of Anthropology
- Kamal A. Kariem, Gaius Charles Bolin Fellow in the Department of German and Russian and Faculty Affiliate in Anthropology and Sociology; affiliated with: German and Russian, Anthropology & Sociology
- Joel Lee, Associate Professor of Anthropology
- James A. Manigault-Bryant, Chair and Professor of Africana Studies and Faculty Affiliate in Anthropology and Sociology and Religion; affiliated with: Africana Studies, Religion, Anthropology & Sociology
- Gregory C. Mitchell, Professor of Women’s, Gender and Sexuality Studies and Faculty Affiliate in Anthropology/Sociology; affiliated with: Women, Gender & Sexuality Studies, Anthropology & Sociology
- James L. Nolan, Washington Gladden 1859 Professor of Sociology
- Marketa Rulikova, Visiting Assistant Professor of Sociology
- Olga Shevchenko, Paul H. Hunn ’55 Professor in Social Studies
- Christina E. Simko, Chair and Associate Professor of Sociology; affiliated with: Anthropology & Sociology, American Studies
- Ben Snyder, Associate Professor of Sociology
- Phi H. Su, Assistant Professor of Sociology; affiliated with: Anthropology & Sociology, Science & Technology Studies

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences. Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. Archaeology extends this analysis to social formations of the historical and prehistorical past. Sociology studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

MAJORS

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The
department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

Requirements
For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

Core Courses
Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

Anthropology
ANTH 101 How to Be Human

Sociology
SOC 101 Invitation to Sociology

Joint Courses
ANSO 205 Ways of Knowing
ANSO 305 Social Theory
ANSO 402 Senior Seminar

Elective Courses
Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

STATISTICS AND DATA ANALYSIS
In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION
Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student’s departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY
Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until AFTER they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes. We credit two, and in special cases three courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.
Are there specific major requirements that cannot be fulfilled while on study away?

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W3-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

SOC 101 (F)(S) Invitation to Sociology (DPE)

This course provides students with an introduction to sociological analysis and an overview of sociology as a discipline. We will focus on the relationship of individuals to the social world and become acquainted with systematic institutional analysis. Students will explore the intersection of biography, history, culture, and social structure as seen in the work of classical and contemporary social thinkers, including Marx, Durkheim, Weber, Simmel, Du Bois, and Goffman. Special consideration will be given to the social and cultural problems of capitalism, rationality and irrationality in modern institutions and organizations, the psychological dilemmas facing the individual in modern society, and the problem of social order and conflict. Students will emerge from the semester equipped with an analytical lens that will enable them to see the social world -- ranging from everyday interactions to broad political struggle -- in a new light.

Requirements/Evaluation: Thoughtful and consistent participation, several research memos and presentations, book review, final research paper

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: strictly limited to first-year students and sophomores (with exceptions for declared ANTH or SOC majors)

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course interrogates the social construction of identities, and how these differences manifest unequally in institutions.

Fall 2024
LEC Section: 01 MW 11:00 am - 12:15 pm Christina E. Simko
LEC Section: 02 TF 1:10 pm - 2:25 pm Ben Snyder

Spring 2025
LEC Section: 01 TR 11:20 am - 12:35 pm Olga Shevchenko

SOC 150 (F) Data for Justice (DPE) (QFR)

Cross-listings: STS 150 / AMST 150 / WGSS 150 / INTR 150
This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

Class Format: This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.

Requirements/Evaluation: Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

Prerequisites: None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

Enrollment Limit: 18

Enrollment Preferences: Students without prior college-level courses in statistics and programming.

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

Difference, Power, and Equity Notes: This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGTBO+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

Quantitative/Formal Reasoning Notes: This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

Fall 2024

LEC Section: 01 TR 9:55 am - 11:10 am Chad M. Topaz
LEC Section: 02 TR 11:20 am - 12:35 pm Chad M. Topaz

SOC 201 (S) Science, Technology, and Human Values

Cross-listings: STS 101

Secondary Cross-listing

This course offers an introduction to science and technology studies. Attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. With widespread use of new social media, controversial developments in such bio-technical practices as gene-editing and the cloning of mammals, rapid advances in various forms of technological surveillance, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. As with other features of modernity, however, technology has also had significant, albeit largely unanticipated, social consequences. This course will focus on the less often examined latent functions of science and technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: A midterm, final, and two short papers.

Prerequisites: none
Enrollment Limit: 20

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
STS 101(D2) SOC 201(D2)

Spring 2025

SEM Section: 01 TR 11:20 am - 12:35 pm James L. Nolan

SOC 211  (S)  Race, Environment, and the Body

Cross-listings: ENVI 211 / AMST 211 / AFR 211

Secondary Cross-listing

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions—like literature, scholarship, music, and film—we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

SOC 216  (F)  The City

Modern humans have moved to the city, a site with concentrated powers of various kinds, this move has effected irreversible change in human life. We will examine these forces through readings in urban theories as well as ethnographic studies. We will address themes such as the organization of urban life, the political economy of cities, housing and homelessness, and urban planning. The city is also the chief site of cultural production and meaning, and our scope of interest will range from studying subcultures, to reading graffiti, to analyzing monuments. Bearing in mind the inexorable social change of past decades, we will reconsider some classical thought on urban life in the context of postmodern discourse, conceptualize the post-industrial and global city, and conclude with an examination of the problems faced by cities in developing countries. This course is designed to provide students with a comprehensive introduction to urban studies. Students will become familiarized with both classical and modern urban theories, and in reading ethnographies they will have an opportunity to understand some fundamental methodological approaches to the study of the city.

Requirements/Evaluation: response papers, mid term exam and final research paper

Prerequisites: none

*Not offered current academic year*

**SOC 218 (S) Law and Modern Society**

This class is designed to introduce students to the field of law and society. The course begins with an overview of the various theoretical perspectives on the subject, including Durkheimian, Marxist, Foucauldian, and Weberian analyses of law and society; as well as the work of those following in the different theoretical schools established by these scholars. Informed by the theoretical overview, the next part of the course considers empirical research in selected areas of law, including tort law, criminal trial procedures, "community justice," jury trials, and the adjudication of drug offenses. Recognizing that understandings of our own legal practices are enlightened through comparisons to other legal systems, the second half of the course is primarily historical/comparative in focus. In this section, through an exploration of several case studies, American legal processes and habits are compared with related legal practices in such places as Japan, England, Scotland, Ireland, Australia, Germany, Norway, and Canada.

**Class Format:** discussion

**Requirements/Evaluation:** a short paper and midterm and final exams

*Spring 2025*

LEC Section: 01    MR 1:10 pm - 2:25 pm    James L. Nolan

**SOC 219 (F) Images and Society**

"This is obvious!" is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images—and even vision itself—are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, "high" art and popular culture.

**Requirements/Evaluation:** active class participation, several short papers, and a final project

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** FMST Related Courses
SOC 221 (F) Money and Intimacy
Does money matter in affectionate relationships? Can dollars buy love and care? What impact does market economics have on intimate relationships? This course will examine these questions and their relevance over the course of history, considering what forces have contributed to the shift in thinking about them, and, most importantly, how sociological research and knowledge helps us understand their current status. We will look into a wide range of aspects of private life that require actors to mix personal affairs with financial transactions, including romantic encounters, marriages (and divorces), families of various kinds and compositions, child adoptions, and outsourced care for dependents to name just a few. Intimacy carries different value and content in these contexts, as so does handling exchanges within them, and negotiating the balance of intimate and economic exchanges also necessitates applying diverse strategies vis-à-vis the external social world. The course will simultaneously look into the changing character of the economy as it has responded to shifting social values. We will specifically focus on how previously private concerns have penetrated the public sphere and shaped the evolution of what has been dubbed 'emotional capitalism'. People skills, teamwork, emotional labor, commodification of intimacy, care, sex, and body parts, are only few examples of the central concepts at stake. Naturally, a reflection on the growth of new technologies and social media will enrich many of the discussed themes.

Requirements/Evaluation: Each student will be expected to write a final research paper. Other requirements will include response papers to assigned readings and films, as well as contributions to both classroom and Glow discussions. There will be no final exam.

Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Not offered current academic year

SOC 224 (F) Going Nuclear: American Culture in the Atomic Age
Cross-listings: HIST 273 / STS 224

Primary Cross-listing
This course will examine the historical development and use of the nuclear bomb. Among other features of the early atomic age, the course will look at the Manhattan Project, the delivery of the bombs for combat, the destructive effects of the bomb's initial use in Hiroshima and Nagasaki, and the ongoing testing of nuclear weapons in the Marshall Islands after WWII. The class will investigate the role of the nuclear arms race in the Cold War, the consequences of nuclear production on specific communities, and the implications of the atomic age on our critical understanding of technological innovation more generally. We will also consider the saliency of competing narratives interpreting America's decision (and continuing policies) to build, use, and stockpile nuclear weapons. Employing both sociological and historical perspectives, we will explore the interactions between science, politics, and culture in the nuclear age.

Requirements/Evaluation: a midterm, a final exam, and a 10- to 12-page research paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Preference given to sociology and history majors.
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
HIST 273(D2) STS 224(D2) SOC 224(D2)
Attributes: HIST Group F Electives - U.S. + Canada
SOC 226  (F)  The Working Globe: North and South Workers in Globalized Production  (DPE)

Cross-listings: GBST 226

Primary Cross-listing

The course introduces students to the concept of globalization of production by focusing on how workers from distant cities and villages across the Global North and South are joined together in the same transnational labor processes. We will reflect on case studies that trace the real-world production of everyday goods and services like automobiles, garments, retail, and electronics. We will map global supply chains and investigate how they exploit and reproduce global inequalities. Focusing specifically on the labor process and on the condition of workers, students will acquire a grounded perspective on the global economy, as well as on the dynamics underlying precarity, deindustrialization, and uneven development. The key guiding concern for the course will be to understand the relationship between workers of the North and South: Does global production place these workers in a relation of fundamental conflict, or can a community of interest emerge between them?

Class Format: Assignments will require group work and presentations

Requirements/Evaluation: Class participation; 1-2 group presentations; 1 final paper

Prerequisites: None, open to all students

Enrollment Limit: 20

Enrollment Preferences: Preference given to ANTH/SOC majors and GBST concentrators

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 226(D2) SOC 226(D2)

Difference, Power, and Equity Notes: Primarily the course investigates how historical inequalities between countries are reproduced by centering production relations and the site of work. Students will delve deeply into the inequality between workers of the global North and South, and they will also encounter situations where these differences intersect with racial and gendered dynamics.

Not offered current academic year

SOC 228  (S)  The Panopticon: Surveillance, Power, and Inequality  (DPE)

Cross-listings: STS 229

Primary Cross-listing

Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today’s “surveillance societies” just by doing everyday activities. This course uses the metaphor of the “Panopticon” as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing when they are being observed. In Discipline and Punish, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the “disciplinary” power that lies at the heart of inequality in modern society. Since Bentham and Foucault’s time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today’s surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Can privacy, convenience, and safety ever be truly balanced? Topics include: the historical origins and expansion of surveillance in modern societies, policing and state surveillance, and social media surveillance.

Requirements/Evaluation: participation, reading responses, midterm essay, final paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
STS 229(D2) SOC 228(D2)

Difference, Power, and Equity Notes: This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance by police in Baltimore City and the question of if and when surveillance is appropriate there, given the city’s ongoing crisis of citizen and police violence. Students will discuss police surveillance in a context shaped by racial segregation and class inequality.

Spring 2025
SEM Section: 01    MR 2:35 pm - 3:50 pm     Ben  Snyder

SOC 230  (S)  Memory and Forgetting  (DPE)

Cross-listings: AMST 233

Primary Cross-listing

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even “individual” memories take shape through social frameworks, and we also remember “collectively” through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart—forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of “cosmopolitan” or “transcultural” forms of memory? Topics will include autobiographical memory and self-identity; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

Requirements/Evaluation: thoughtful and consistent class participation; an autobiographical essay (4-5 pages); four response papers (2 pages each); and a research paper (8-10 pages) with class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 230(D2) AMST 233(D2)

Difference, Power, and Equity Notes: This course pays particular attention to how power and inequality shape narratives about the past. We will examine and compare several efforts to transform national memories, such as the Equal Justice Initiative memorial in the United States and the Truth and Reconciliation Commission in South Africa. In doing so, we will also consider the role of memory and memorialization in broader processes of social change.

Not offered current academic year

SOC 241  (S)  Meritocracy

Cross-listings: PSCI 241

Secondary Cross-listing

Although fewer than 1% of Americans have a degree from the country’s top 30 colleges and universities, 39% of Fortune 500 CEOs, 41% of federal judges, 44% of the writing and editorial staff at the *New York Times*, 64% of Davos attendees, and 100% of Supreme Court justices do. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy—rule by the intelligent—in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as
take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

Requirements/Evaluation: one short paper, one long paper, take-home final exam, discussion questions, class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Political Science and Sociology majors, first-years and sophomores intending a Political Science or Sociology major

SOC 244 (F) What They Saw in America

Cross-listings: HIST 366 / AMST 244

Primary Cross-listing

This course traces the travels and writings of important observers of the United States, including Alexis de Tocqueville, Max Weber, G.K. Chesterton, Sayyid Qutb, and Wang Huning. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider's view of America--one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors' respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race.

Requirements/Evaluation: A midterm examination, two short essays, and a final paper.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Priority given to Sociology, History, Anthropology, and American Studies majors.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Fall 2024

SEM Section: 01 MR 1:10 pm - 2:25 pm James L. Nolan

SOC 246 (F) Goals Points Seconds

Sport is sometimes dubbed a civic religion in America. Figuratively, it has its values to uphold and rituals to follow, its professional sport gods to worship. Engaging in sports -- whether actively as athletes or passively as fans -- supplies a sense of personal identity, provides a basis for community, and even injects meaning into their lives. In the broader society, the world of sport anchors social hierarchies and mirrors other social dynamics. Through the analysis of the world of sports and athletics, broader social trends and trajectories can be traced. While some of these trends are a century old, some of them have evolved relatively recently, as sport has moved beyond its traditional role as ritual and recreation and become a centerpiece of capitalism and consumer culture. Particular attention will be paid to changing values and practices associated with amateur and professional sports, the transformation of collegiate sports, social mobility through athletics, the role of media and marketing, the rise of sports betting, esports, and the culture of sports celebrity and fandom.
We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic revealed, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move—or to stay still.

Requirements/Evaluation: Thoughtful and consistent class participation, several short reflection papers, two drafts of an opinion essay, class presentation
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Given to first-year students and sophomores, particularly those who have demonstrated an interest in AAS/SOC. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 252(D2) AAS 252(D2) SOC 252(D2)

Writing Skills Notes: Emphasis on the processes of writing and revising, several short papers on which students will receive close feedback, and drafts of a final written assessment

Difference, Power, and Equity Notes: This course explores a politics of im/mobilities: how we move through space through different bodies at the intersection of race, class, gender, ability, and citizenship. Students will use their own bodies as research sites for deepening their understanding of how we navigate the freedom to move or stay still.

Fall 2024
SEM Section: 01 MR 2:35 pm - 3:50 pm Phi H. Su
This course examines the relationship between structural racism and racial/ethnic health disparities. Through class discussions of readings and media images, we will explore three topics: 1) how racism intersects with classism, sexism, and xenophobia to govern the implementation of local, state and federal health care policies; 2) how the uneven enforcement of health care policies ultimately produces differences in mortality, morbidity, and quality of life among various populations; and 3) anti-racist public health scholarship that offers strategies for creating racial health equity.

**Class Format**: Discussion

**Requirements/Evaluation**: Class participation, 2-3 short papers (5-7 pages), and a final presentation

**SOC 262 (F) Paper Trails (DPE)**

**Cross-listings**: STS 262 / GBST 262

**Primary Cross-listing**

Long before the invention of the passport, states or state-like entities sought to document and manage populations and discipline bodies. This course invites students to critically reflect on documentation practices and systemic violence, particularly against racial, ethnic, sexual, and political minorities. Students will explore identity-making through documentary practices such as the three-generation life history, a biographical form that Soviet-allied countries used to reward loyalty and punish disloyalty. Labels, such as a criminal record or pre-existing health conditions, also trail or precede individuals their whole lives. Students will grapple with what happens when the paper trail goes cold--when identification documents are invalidated, birth certificates withheld, household registries purged, and archives destroyed. Students will explore the rise of surveillance and biometric data alongside the actors, technologies, and industries that try to circumvent them in places such as the Xinjiang Uyghur Autonomous Region and along the US-Mexico border. In this project-based course, students will exhume paper trails and imagine alternative ways to create, alter, and subvert them.

**Requirements/Evaluation**: thoughtful and consistent class participation, facilitation of guest speakers, Special Collections visit, project memos, and final project and presentations

**Prerequisites**: None

**Enrollment Limit**: 15

**Enrollment Preferences**: Anthropology and sociology majors, Global Studies concentrators; Science and Technology Studies concentrators. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

**Expected Class Size**: 15

**Grading**: no pass/fail option, no fifth course option

**Distributions**: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 262(D2) STS 262(D2) GBST 262(D2)

**Difference, Power, and Equity Notes**: In this course, students will interrogate some of the key documents that structure our lives and serve as tools for waging systemic violence against ethnic, racial, sexual, and political minorities. Students will synthesize and apply these lessons about bureaucratic documentation toward the benefit of a community partner.

---

Fall 2024
SOC 291 (F) Religion and Ecology in America  (WS)

Cross-listings:  ENVI 291 / REL 291

Secondary Cross-listing

This course examines the relationship between religious and environmental thought in American cultural history. Exploring a broad range of practices, stories, and beliefs, we will examine the spiritual roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have religious writers, thinkers, and artists shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorism, Catholic climate activism, Jewish eco-mysticism, atheist biological theory, Buddhist eco-spirituality, and more.

Requirements/Evaluation:  Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.

Prerequisites:  None

Enrollment Limit:  10

Enrollment Preferences:  Environmental Studies majors and concentrators

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 291(D2) REL 291(D2)  SOC 291(D2)

Writing Skills Notes:  Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

SOC 301 (S) Social Construction  (DPE)

Cross-listings:  COMP 315 / WGSS 302 / STS 301 / REL 301

Secondary Cross-listing

"Social construction" can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore look at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

Requirements/Evaluation:  regular attendance and participation, short weekly reflection papers, a 8-10 page research paper, and final project

Prerequisites:  none
Enrollment Limit: 15

Enrollment Preferences: Preference will be given to majors and concentrators from STS, ANSO, COMP, REL, PHIL, WGSS, AAS, LATS, JWST, and AFR. If the class is overenrolled students will be asked to submit an email about themselves and why they want to take the course.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 315(D1) WGSS 302(D2) STS 301(D2) SOC 301(D2) REL 301(D2)

Difference, Power, and Equity Notes: Central to REL 301 will be an analysis of the social construction of race, gender, and sexuality. It will show how power and difference are tied up in their construction and maintenance of these categories. Students will be taught how to critically analyze race, gender, and sexuality as well as social construction as such. Students will also learn sophisticated tools for studying systems of social power and difference.

SEM Section: 01 W 1:10 pm - 3:50 pm Jason Josephson Storm

SOC 303 (S) Cultures of Climate Change

Cross-listings: ENVI 303

Secondary Cross-listing

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about what climate change means? How does something as complex as climate change become a "problem" in the first place? And what can its many proposed "solutions" tell us about the role of culture in environmental policy, politics, and decision-making. This course will explore a broad array of factors, from religion to race, class to colonialism. Emphasizing ethnographic and historical accounts of climate change as lived experience, it will apply a range of theories from the social sciences and humanities to case studies from around the world.

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

SOC 308 (S) What is Power?

Cross-listings: STS 308 / REL 308

Secondary Cross-listing

What is power? Despite the importance of notions of power across the social sciences, there is a broad lack of consensus. Is power essentially domination or resistance? Is it freedom, empowerment, privilege, or oppression? Are there forms of unequal social power which are morally neutral or even good? Is power the kind of thing held by individuals, races, genders, classes, discourses, causal mechanisms, institutions, or social structures?
What is the connection between social and physical power? Does power obey laws? How does power relate to technology? Or knowledge? Or agency? Or ideology? This course begins with the observation that power is often described as a causal relation—an individual's power is supposed to equal their capacity to produce a change in someone else's behavior. This suggests that the better we can understand the nature of cause and effect, the better we can understand power. Fortunately, in recent decades philosophers have made significant progress in theorizing causation. Hence, this seminar will put two very different bodies of theory in conversation: critical theory about power and philosophy of science about cause and effect. We will touch on classic philosophical accounts of power and causation, but focus our attention on more recent developments in philosophy of science, political theory, and other fields. The insights we gain in this course from analyzing the nature of power should empower us to more effectively transform society. It will help students in the social sciences to understand the nature of causation in the social world, and it will help students interested in political action to better understand the nature of power. Thinkers to be considered may include: Aristotle, Amy Allen, Hannah Arendt, Bourdieu, Judith Butler, Nancy Cartwright, Foucault, Gramsci, Byung-Chul Han, Han Feizi, Giddens, Steven Lukes, Machiavelli, J.L. Mackie, Marx, Nietzsche, and Max Weber. (Note that in 2023 this course will also fulfill the senior seminar requirement for STS)

Requirements/Evaluation: critical annotations for every class, midterm review essay (4-6 pages), final essay (10-12 pages)

Prerequisites: None.

Enrollment Limit: 15

Enrollment Preferences: STS concentrators, then Religion, Sociology, and Political Science majors.

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

SOC 313 (S) The 626 (DPE)

Cross-listings: AAS 312

Primary Cross-listing

Ryka Aoki’s *Light from Uncommon Stars* is "a defiantly joyful adventure in California’s San Gabriel Valley, with cursed violins, Faustian bargains, and queer alien courtship over fresh-made doughnuts." What sociological insight could a sci-fi novel about intense extracurricular pressure, food, and foreignness have to offer about the San Gabriel Valley, area code 626? In this course, we take the fantastical characters and plots of Aoki's novel as an invitation to delve into the histories of Asian American settlement to Gabrielino/Tongva lands on the eastern fringes of present-day Los Angeles County. The multilingual boba shops, restaurants, and store fronts throughout the valley mask a history of violent backlash and English-only initiatives. Media reports of academic and musical prodigies skew a broader socioeconomic picture that includes crimmigration, deportation, and xenophobia. And the figure of an intergalactic refugee mother exposes the toll that crossing borders takes on individuals, families, and communities. In this project-based course, we survey the formation of a particular place and its surroundings. In doing so, students grapple with general questions such as: How does migration shape intergenerational dynamics? When and with what tools do people confront racism and intersecting forms of discrimination? How do ethnic enclaves form and fracture? And how do communities mobilize for political rights?

Requirements/Evaluation: thoughtful and consistent participation; mock film festival screening and vote; regular writing assignments; teach-ins

Prerequisites: N/A

Enrollment Limit: 15

Enrollment Preferences: ANSO majors and AAS concentrators. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

SEM Section: 01  TF 2:35 pm - 3:50 pm  Phi H. Su

SOC 320 (S) Thinking the Family Album

What is a family? How does it function as a metaphor, and is this metaphor a political one? How does the family remember, and how does it tell its own story? What do everyday forms of family memory, like scrapbooks and family photo albums, do to shape the family? Are they a thing of the past? What comes to replace them? Who talks through them, and who is there to listen? And how can we reclaim the many untold stories and unheard voices by engaging with the idea of a family album? This course will convene as a seminar in which the participants will engage with the notion of the family as a social institution, and with the genre of family photography as one of the key practices through which this institution is experienced and upheld. We will pay particular attention to the idea of a family album, as an object and as a metaphor, as expressed in the controversial exhibition The Family of Man (1955) and its critical reception, or in the ongoing participatory project Family Pictures USA by Thomas Allen Harris. The seminar's goal is to unsettle the uniform notion of the family, and to experiment with ways of making the genre of family photography better reflect the difficult and varied histories that the notion of the family may conceal.

Requirements/Evaluation: Thoughtful and consistent class participation, three position papers and a final project
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Anthropology and Sociology majors

SEM Section: 01  MR 2:35 pm - 3:50 pm  Olga Shevchenko

SOC 329 (F) Capitalism and the Future of Work

What does it mean to work? How does capitalism shape the way we work? What might work look like in the future? In this three-part course, students engage with global capitalism's past, present, and future, asking analytic and normative questions about work and the trajectory of capitalism. The first part of the course examines the historical origins of capitalism and leading theories about what capitalism is and how it stratifies the world into racialized social classes. A central theme in part one will be how capitalist labor relations shape meaning and subjectivity, particularly the experience of dignity. In part two, we examine recent and emerging trends in capitalist labor, such as the death of the career, the rise of the "gig" economy, platform capitalism, and even the seemingly inevitable end of work itself as entire occupations become automated by machine learning. A key question will be how these transformations exacerbate and/or alleviate longstanding inequalities from capitalism's 19th century past. The course concludes by asking students to imagine a better vision for work in the next century. Should we continue to work at all? What kinds of productive activity should we value, and how would we go about taming, eroding, or even smashing capitalism to allow them to flourish?

Requirements/Evaluation: participation, reading responses, midterm paper, final paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Fall 2024

SEM Section: 01  TF 2:35 pm - 3:50 pm  Ben Snyder
Could you be competing for a job—even after getting a college degree—with a robot or an AI-powered chatbot? As technologies advance, every few years debates emerge: will this new kind of automation increase unemployment, or will it generate new kinds of jobs? Will these new jobs be more interesting and high paying, or will they be boring and poorly paid? To think these questions through, in this course we will study some key attempts to understand the socio-economic and political determinants as well as the repercussions of automation. We will delve into the micro-level dynamics operating between machines and workers involved in concrete production processes. We will also explore the macro-level trends in national and global inequality that social scientists associate with automation. In our investigation of both macro- and micro-levels, we will focus on how the risks and benefits of automation get distributed unevenly along already existing axes of class, race, gender, etc.

Requirements/Evaluation: Class participation; 1 mid-term paper proposal; 1 final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: Preference given to ANTH/SOC majors and STS concentrators

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 331(D2) STS 331(D2)

Difference, Power, and Equity Notes: The course is centrally concerned with the iniquitous distribution of risks and benefits of automation. Students will gain familiarity with how social scientists study the impacts of automation on class, racial, and gendered dynamics. We will consider how automation may disempower certain workers, and deepen already existing social segmentations.

Not offered current academic year
criteria for statehood but are denied it, while others fall short of formal definitions but are still considered states. Students will assess the stakes of statehood for places that cannot achieve it or do not aspire to. They will creatively marshal these lessons to become the class expert on a "nowhere" that provides us with a lens for interrogating the world map as it currently exists.

SOC 340  (F)  Performing Masculinity in Global Popular Culture  (DPE)

Cross-listings:  AMST 358 / WGSS 347 / THEA 341 / LATS 341

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation:  masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

Prerequisites:  none; WGSS 202 would be helpful

Enrollment Limit:  15

Enrollment Preferences:  a short statement of interest will be solicited; a subsection of applicants may be interviewed

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 358(D2)  WGSS 347(D2)  THEA 341(D1)  SOC 340(D2)  LATS 341(D2)

Difference, Power, and Equity Notes:  This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

SOC 348  (F)  Altering States: Post-Soviet Paradoxes of Identity and Difference  (DPE) (WS)

Cross-listings:  GBST 348 / RUSS 348

Primary Cross-listing

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their post-socialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as Russia's invasion of Ukraine, or the lingering tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Ukraine and Russia, but will also read comparative studies, as well as works on East Germany and Georgia. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the post-socialist condition.

Requirements/Evaluation:  5-page paper every other week, written comments on the partner's paper in alternate weeks

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  Anthropology, Sociology, and Russian majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 349 (S) Race, Gender, and Labor (DPE)
This course draws on approaches from sociology, labor studies, and Black studies to examine the historical and contemporary intersections of race, gender, and labor. In particular, we will explore the racial, classed, and gendered dimensions of the labor movement, historic economic shifts that impacted and reorganized U.S. labor regimes, Black labor in slavery's afterlife as it relates to prisons, and global analyses of racialized gendered labor regimes for migrant and immigrant labor within the Global South and the U.S. We will begin the course by grounding ourselves in the Black feminist framework of intersectionality, which will guide our analyses of the intersections of race, class, and gender in labor formations. We will then focus on the monumental shift in labor relations that enslaved Black people's toppling of the plantation system in the US South brought forth, as well as the technologies of re-enslavement instituted as a reaction to Black people's emancipation. After that, we will move through different themes and time periods, considering how race, gender, and class intersect in regimes of labor exploitation and the successes and setbacks of labor movements.

Requirements/Evaluation: Major course requirements include engagement in course discussions, reading reflections, a midterm paper, group presentations, and final research paper.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology, Women, Gender, and Sexuality Studies (WGSS) and/or Africana Studies majors

Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course foregrounds intersectional subjectivities and perspectives. It provides interdisciplinary toolkits to strengthen students' ability to identify and address how unequal power dynamics sustain difference and inequity—e.g., in racial and gender pay gaps and inequalities in the globalized care economy—and to practice collective strategies for transformative social change, engaging with critical epistemologies developed by workers fighting for racial, gender, and economic justice.

SOC 362 (S) Stories We Tell
Cross-listings: COMP 362

Primary Cross-listing
From The Moth to StoryCorps to Williams College's own Storytime, stories are ubiquitous in contemporary society. Indeed, sociologists have argued that social life is itself "storied"—that we locate ourselves within familiar narrative structures, using them to "construct" identities and "tell" our lives. Stories, in this view, are not only the stuff of literature, but also the very fabric of social life: the foundation for individual and collective identities. This course grapples with the role of stories and storytelling in modern social life. What role do stories play in constituting personal identity? What cultural
templates structure the stories we tell? Why are memoirs so popular, and how can we explain the more recent resurgence of interest in oral forms of storytelling? What role does storytelling play in politics and social movements? Specific topics will include confessional culture, podcasts, memoir, politics, and social change. Along the way, we will pay explicit attention to medium, and consider how sociologists might learn from journalists, documentarians, and memoirists to convey stories from their own research.

Requirements/Evaluation: occasional discussion questions, one 2-page reflective essay, one 6-8 page paper, and a final project (either a 10-page paper or an equivalent podcast or video essay)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Spring 2025

SEM Section: 01   TR 9:55 am - 11:10 am   Christina E. Simko

SOC 380  (S) Who Cares?  (DPE)

What does it mean to care--about a person, a situation, or a cause? We often assume that care arises spontaneously and organically. Yet both feelings of care and acts of care always take shape in social contexts. In this course, we will uncover and critically interrogate the norms surrounding caring, caregiving, and care-receiving in our own communities. What social factors influence our willingness to offer care, and to accept it from others? Why is caregiving so heavily gendered and racialized? Is care inevitably corrupted by capitalism? Specific topics will include domestic work and reproductive labor; parenthood; therapy and mental health care; the discourse of self-care; and social movements that center around enacting care.

The course will culminate in a significant experiential learning component: as a class, we will work collaboratively to design and implement a project that pushes or challenges the "care norms" in the northern Berkshires.

Requirements/Evaluation: thoughtful and consistent participation, including in-class discussions and shared resources created outside of class time; four journal entries (2-3 pages each); collaboratively designed experiential learning project; annotated bibliography; op-ed style essay (4-5 pages)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

Difference, Power, and Equity Notes: This course centers the relationship between structural inequality and the cultural norms surrounding caregiving and care-receiving. Throughout the semester, we will reflect on how care norms both reflect and perpetuate larger systems of inequality, especially race and gender. Through a student-designed experiential learning project, we will strive to create social change in the local community.

SOC 390  (S) Sex Marriage Family

Cross-listings: PSCI 380

Secondary Cross-listing

Something has happened to America over the past fifteen years. Large minorities of young adults, especially young men, are now celibate. Cohabitation has skyrocketed but marriage is disappearing, and the country's birth rate is at an all-time low. Not surprisingly, loneliness has become epidemic. A similar story can be told for most other developed countries. The implications for political polarization, economic growth, social insurance
programs, public health, military defence, even national survival are grim. What is the cause of this loss of faith in the future? Can public policy reverse these trends? This course is an investigation into relations between the sexes in the developed world, the fate of children and the family, and government attempts to shape them. The course investigates family models in historical and comparative context; the family and the welfare state; the economics of sex, gender, marriage, and class inequality; the dramatic value and behavioral changes of Gen Z around sex, cohabitation, and parenthood; and state policies to encourage partnership/marriage and childbearing.

Requirements/Evaluation: Two short papers, research paper proposal, every-class discussion questions, class participation.

Prerequisites: none

Winter Study

SOC 31 (W) Senior Thesis: Sociology
To be taken by students registered for Sociology 493-494.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year

SOC 99 (W) Independent Study: Sociology
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
ARABIC STUDIES
(Div I, with some exceptions as noted in course descriptions)

Chair: Brahim El Guabli

Assistant Professors: A. Eqeiq; Associate Professor: B. El Guabli, L. Nassif; Visiting Assistant Professor: N. Mangialardi
Language Fellow: Salma Mohamed; Teaching Associate: Fedoua Rahmaouy
A. Eqeiq (on leave Spring); L. Nassif (on leave Fall, Spring)

Middle Eastern and Maghrebi Studies is a vibrant, growing, and important field in the United States and around the world. Students wishing to enter this rich and varied discipline can begin with a major in Arabic Studies at Williams. The major is designed to give students a foundation in the Arabic language and to provide the opportunity for interdisciplinary and multidisciplinary study of Arab, Islamic, North African and Middle Eastern literatures, art, film, history, religion and politics.

THE MAJOR IN ARABIC STUDIES
Students wishing to major in Arabic Studies must complete ten courses, including the following six courses:

- ARAB 101-102 Elementary Arabic
- ARAB 201 Intermediate Arabic I
- ARAB 202 Intermediate Arabic II
- ARAB 301 Advanced Arabic I
- ARAB 302 Advanced Arabic II

Students must also take at least one 400-level ARAB course, in addition to three other courses in Arabic and Middle Eastern Studies in Arabic Studies or affiliated units. At least one of these courses should be from the arenas of language and the arts (DIV I) and at least one from politics, religion, economics, history, etc. (DIV II). Students should consult with the Department to confirm that electives are authorized.

Students who place into more advanced language courses may substitute additional courses, adding up to a total of at least nine courses.

Up to four courses from approved study abroad programs may be counted toward the major.

Students will be granted 1 credit towards the major (or certificate) for intensive summer language study at department-approved programs. Upon completion of the summer program, students must take a language placement test in order to ascertain the appropriate level for subsequent courses in Arabic at Williams.

THE CERTIFICATE IN ARABIC
The Certificate in Arabic demonstrates that a student has acquired a working foundation in the language. The sequence of seven language and culture courses is designed to supplement a student’s major at Williams by enabling the student to expand their knowledge in a related field.

Required Courses

- ARAB 101
- ARAB 102
- ARAB 201
- ARAB 202
- ARAB 301
- ARAB 302

At least one elective course, either in Arabic literature, arts, or culture, or in Arabic history, religion, politics, economics, etc.

Students must earn a cumulative grade average of B or higher in the sequence of seven courses.

Students who enter Williams with previous training in Arabic may be exempted from up to two of the required seven courses. Thus, in order to earn a certificate, a student must take no fewer than five courses (including three language courses) after enrolling at Williams.

THE DEGREE WITH HONORS IN ARABIC STUDIES
Prerequisites
Honors candidates in Arabic are required to have maintained a GPA of 3.5 in the major to qualify for submitting a thesis proposal. In addition, candidates must demonstrate a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

**Timing**

Students wishing to pursue a thesis in Arabic are strongly urged to secure an advisor by the end of the week after Spring Break in their junior year. By May 15th of their junior year, candidates must submit to the Program Advisory Committee a one- to two-page proposal and a preliminary bibliography. The Advisory Committee will inform candidates by June 1 whether they may proceed with the thesis and advise them about any changes that should be made in the focus or scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and preparing for the process of writing the thesis.

In their senior year, candidates will devote two semesters and the winter study period to their theses (ARAB 493-W31-ARAB 494). By the end of the Fall semester, students will normally have undertaken substantial research and produced the draft of at least the first half of the project. At this point students should also have a clear sense of the work remaining for completion of the thesis. In the course of the Fall semester, students will also have chosen and met with a second reader for the project, who will provide additional guidance and read the final thesis. By the end of Winter Study, students should have completed a draft of the entire project. At that time, the Comparative Literature Advisory Committee, together with the advisor, will determine whether the project may continue as an Honors Thesis, or whether its first portions (ARAB 493-W) will be graded as Independent Studies.

The second semester of independent thesis work will be spent revising as necessary. The completed thesis in its final form will be due one week before the last day of classes. At the end of the Spring term, the student will make a public presentation of the final project, to which members of the Advisory Committee will be specially invited.

**Characteristics of the Thesis, Evaluation, and Major Credit**

The topic of the thesis must have to do with some aspect of Arabic language, culture, history, politics, etc. and will be worked out between the thesis writer and her/his advisor. It is also possible to write a thesis that consists of an original translation of a significant text or texts; in this case, a theoretical apparatus must accompany the translation. The complete thesis must be at least 50 and at most 75 pages in length, excluding the bibliography.

The advisor will assign the grades for the thesis courses (ARAB 493-W-494); the Advisory Committee will determine whether a candidate will receive Honors, Highest Honors, or no honors.

For students who pursue an honors thesis, the total number of courses required for the major-including the thesis course (ARAB 493-W-494)-is 10, i.e., one of the thesis courses may substitute for one elective.

**STUDY ABROAD**

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in many cases, though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments. We may need specific information (assigned readings) to determine whether the course counts for Div I or II major credit.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes, four.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

**Are there specific major requirements that cannot be fulfilled while on study away?**

No. Students can receive credit toward the major’s language requirements from for-credit summer language programs like Middlebury, etc. These count toward the 4-course maximum.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Yes. Make sure you have the needed number of Div I and Div II courses for the major. Know the difference.
Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

It has happened, but we try to be as flexible as possible.

ARAB 101  (F)  Elementary Arabic
This is the first course in the year-long Beginning Arabic sequence. It will help you establish a foundation of communicative competence and understanding of the Arabic language and culture. The course adopts an integrated-skills approach with a focus on “formal Arabic” (or so-called Modern Standard Arabic), the language of formal writing and speech in Arab countries, while simultaneously familiarizing you with one variety of spoken Arabic. The course focuses on day-to-day situations and familiar topics.

Requirements/Evaluation: Daily homework, active class participation, a skit, a culture portfolio, tests, final exam, and engagement in a variety of co-curricular activities

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: students considering a major in Arabic Studies

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Unit Notes: students registered for ARAB 101 and 102 are required to attend and pass the sustaining program during the Winter Study period; credit is granted only if both semesters (ARAB 101 and 102) are taken

Distributions: (D1)

Fall 2024
SEM Section: 01    M-F 9:00 am - 9:50 am    Amal Eqeiq

ARAB 102  (F)(S)  Elementary Arabic
This is the second semester of the Beginning Arabic sequence. This course will continue building the listening, speaking, reading and writing skills students acquired in Arabic 101. Arabic 102 will also develop your competence in Modern Standard Arabic (MSA) primarily. The students will be equipped with the vocabulary, reading facility, grammatical skills as well as the cultural competence they need to navigate familiar topics and simple communication situation in MSA. Students will expand the range of topics, grammar, tenses, and pronouns they use to express themselves both orally and in writing in MSA. This second semester will allow students to listen (to), speak, read, and write about a variety of topics that are geared toward consolidating and enriching their prior acquisitions in Arabic.

Requirements/Evaluation: weekly quizzes, daily homework, in-class participation, skits, presentations, and recordings. Students are highly encouraged to participated in the events organized by Arabic Studies and the Arabic TAs.

Prerequisites: ARAB 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: In the event the course is over-enrolled, priority will be given to students majoring or intending to major in Arabic Studies.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: students registered for ARAB 101 and 102 are required to attend and pass the sustaining program during the winter study period; credit is granted only if both semesters (ARAB 101 and 102) are taken.

Spring 2025
ARAB 109 (S) The Iranian Revolution (DPE) (WS)

Cross-listings: HIST 109

Secondary Cross-listing

The Iranian Revolution was a major turning point in world history that resulted in the establishment of the Islamic Republic of Iran. This tutorial will evaluate the causes and impact of the revolution and how this seminal event continues to have widespread repercussions around the globe. The first weeks will explore the history of pre-revolutionary Iran with special attention to religious and intellectual trends such as the ideas of Ayatollah Ruhollah Khomeini, Jalal al-e Ahmad, and Ali Shariati. We will then evaluate the revolution itself including the US hostage crisis, the downfall of the Shah Muhammad Reza Pahlavi Shah, and how Khomeini’s vision of society became paramount. Finally, we will explore the aftermath of the revolution including Iran’s geopolitics, the nature of the theocratic system in Iran as well as how the revolution impacted every day lives of Iranians in Iran and abroad particularly how they reflect on the revolution in memoirs, films, and literature.

Requirements/Evaluation: Weekly meetings. Weekly papers - either a 5 page primary paper or a 2-3 page response paper.

Prerequisites: No prerequisites.

Enrollment Limit: 10

Enrollment Preferences: First Years and Sophomores.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 109(D2) ARAB 109(D2)

Writing Skills Notes: As a tutorial, students are expected to regularly write analytical and critical papers on the readings. They will receive regular and consistent feedback from the instructor and their partner and will be given the opportunity to re-write some of their assignments.

Difference, Power, and Equity Notes: The Iranian Revolution, like other major social movements, offered a compelling critique of the status quo and promised a more just society that would be more equitable for all Iranians. The tutorial will consider the relationship between the rhetoric of the Revolution and the lived reality, especially how this seminal event impacted the lives ordinary Iranians. Was the Revolution simply a change in the composition of the political elite or did it yield new realities and more access for Iranians

Attributes: HIST Group E Electives - Middle East

Not offered current academic year

ARAB 201 (F) Intermediate Arabic I (DPE) (WS)

This course will build on the students' acquisitions in Arabic 102 to consolidate their learning of the Modern Standard Arabic and one variety of spoken Arabic. In addition to expanding students' vocabulary and enhancing their communication skills, the course will deepen their knowledge and use of grammar in both speaking and writing. Upon successful completion of this course, students will be able to hold conversations in Arabic with some fluency on a variety of topics while developing cultural appreciation of Arabic-speaking countries.

Requirements/Evaluation: quizzes, tests, homework, and active class participation

Prerequisites: ARAB 102 or placement test

Enrollment Limit: 18

Enrollment Preferences: If the course is overenrolled preference will be given to those who intend to major or do a certificate in Arabic.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: This course involves a great deal of writing, ranging from vocabulary and grammar-focused exercises to written assignments about a variety of topics. Students will receive extensive and timely feedback on this written work.

Difference, Power, and Equity Notes: Any language is the locus of issues of difference, power, and equity. Students will learn about gender and pronouns. They will wonder why Arabic does not have a gender neutral pronoun. Students will understand how Arabic acts as a dominant language in places minority languages in the Middle East and North Africa. Students will emerge from the course with a critical understanding of Arabic language's
ARAB 202 (S) Intermediate Arabic II

As a continuation of ARAB 201, this course will expose students to Modern Standard Arabic while increasing their communicative and intercultural competencies, and their knowledge of Arab cultures. Our main textbook will be *Al-Kitaab fii Ta'allum al-'Arabiyya Part II* but outside materials from diverse media such as television and newspapers will also be included. *Class will be conducted in Arabic.*

**Class Format:** class meets in three 75-minute sessions. Additional conversation sessions are required at designated times throughout the semester

**Requirements/Evaluation:** Active daily class participation, daily homework and homework corrections, writing portfolio and portfolio corrections, oral components, quizzes, final exam, and co-curricular activities

**Prerequisites:** ARAB 201 or placement test.

**Enrollment Limit:** 12

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

ARAB 207 (F) The Modern Middle East (DPE)

**Cross-listings:** REL 239 / HIST 207 / JWST 217 / GBST 102 / LEAD 207

**Secondary Cross-listing**

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

**Requirements/Evaluation:** participation, online responses, quizzes, midterm, and final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Expected Class Size:** 30-40

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 239(D2) ARAB 207(D2) HIST 207(D2) JWST 217(D2) GBST 102(D2) LEAD 207(D2)

**Difference, Power, and Equity Notes:** This course introduces students to the incredible diversity of the Middle East. It will explore how people of different backgrounds and in different situations have responded in diverse ways to the problems of the day. Students will acquire the critical tools to assess a number of interpretations of the past and how to understand and appreciate the many narratives in the Middle East today that have profound political and cultural implications.

Not offered current academic year
ARAB 209 (S) Saharan Imaginations (DPE) (WS)

Cross-listings: COMP 234 / ENVI 208

Primary Cross-listing

Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts' fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: If the course is over-enrolled, students will required to provide a 200-word paragraph in which they explain how the course fits within their plan of study at Williams.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 209(D1) COMP 234(D1) ENVI 208(D1)

Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

ARAB 211 (S) Understanding 9/11 and the War in Iraq (DPE) (WS)

Cross-listings: HIST 116

Secondary Cross-listing

What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East and the world in general? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied. In this segment, students will engage with oral histories and memoirs related to the fateful events of that day. In the following module the political and cultural responses will be considered. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized. Here students will analyze political rhetoric, public discourse, and activism through a range of sources including in the media, the academy, and in popular culture. Then the attention will be turned to the invasion of Iraq in March 2003, and the eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events, and the memory of this decade, continue to reverberate today.

Requirements/Evaluation: Several short papers and a final oral history.
**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** First-years and sophomores.

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 116(D2) ARAB 211(D2)

**Writing Skills Notes:** In this writing-intensive first-year seminar, students will engage with primary sources such as oral histories, autobiographies and political tracts and write short interpretive essays that will go through several editing stages. The final writing project will be an oral history of an individual who has a direct personal connection with either 9/11 and/or the wars in Iraq. The students will learn how to synthesize a range of experiences into a 10-12 page paper.

**Difference, Power, and Equity Notes:** This course will consider power and difference in a number of ways. First, it will evaluate how the US government used its political power to convince the public to support a military operation under questionable premises. Second, it will critically assess the "War on Terror" and who has benefited from it. Third, it will examine how the American military occupied Iraq and the ways in which Iraqis tried to resist the American designs on their country.

**ARAB 212 (F) Distant Encounters: East Meets West in the Art of the European Middle Ages** (WS)

**Cross-listings:** ARTH 212 / REL 210

**Secondary Cross-listing**

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in what they called the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey), the place of Christ's life, death, and believed resurrection. Large numbers of pilgrims even made the long journey to the Holy Land, and especially to Jerusalem, to visit a range of sacred sites related to Christ and his saints. When these sites became less accessible with the spread of Islam in the seventh century -- and even before this time -- Europeans sought to recreate many of them at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Through all of these centuries, moreover, the Christian, Greek-speaking empire of Byzantium, focused on its great capital of Constantinople (present-day Istanbul), interacted in myriad ways, both friendly and hostile, with the Latin-speaking polities of Western Europe, focused at least symbolically on their ancient capital of Rome. Together, by way of open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

**Requirements/Evaluation:** participation in discussion; five 4-5-page papers; five 1-2-page papers; and one 6-8-page final paper

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first- and second-year students, but open to all

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

ARTH 212(D1) ARAB 212(D1) REL 210(D2)

**Writing Skills Notes:** In this tutorial, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 4-5-page papers they will submit, with suggestions for improvement.
ARAB 214  (S)  Divas and Dervishes: Introduction to Modern Arab Music and Performance  (DPE) (WS)

Cross-listings:  COMP 270 / MUS 214

Primary Cross-listing

From Sufi rituals to revolutionary uprisings, music has long played a central role in the social, political, and religious life of the Arab world. This is especially audible in the modern era, when new technologies and institutions began to record, amplify, and broadcast the region's sounds, preserving centuries-old traditions while also producing new forms of popular music. This course introduces students to Arab musical genres and practices as they developed from the late nineteenth century. We will cover a broad geographical range, exploring the classical Andalusian repertoires of Algeria, ecstatic dervish chants in Egypt, patriotic pop tunes from Lebanon, and other topics. To highlight connections between musical traditions as well as their unique local features, we will ask questions such as: What can music tell us about interactions between sacred and secular life? How is music used to define social groups and negotiate identity, gender, and class? Which musical characteristics are associated with Arab "heritage" and "modernity," and how are these performed? In what ways does music shape everyday life in the Arab world? Class sessions and discussion will be based on academic readings and at-home listening assignments. No previous knowledge of Arabic or Arab music are required.

Requirements/Evaluation:  In-class participation, short essays (1 page) every two weeks, midterm presentation, and a final paper (12-14 pages).

Prerequisites:  None

Enrollment Limit:  19

Enrollment Preferences:  Arabic Studies and Music majors

Expected Class Size:  10

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 270(D1) MUS 214(D1) ARAB 214(D1)

Writing Skills Notes:  Students will develop their writing skills by submitting one-page unit responses every two weeks and a final paper of 12-14 pages on a topic of their choice. Students will receive feedback on each writing assignment and have opportunities for multiple drafts and peer review during the semester.

Difference, Power, and Equity Notes:  Through the lens of music, this course critically examines modern Arab society and power dynamics related to politics, gender, race, and class.

Not offered current academic year

ARAB 222  (F)  Photography in/of the Middle East  (DPE)

Cross-listings:  ARTH 222

Secondary Cross-listing

Photography has been globally disseminated and locally inflected since its invention. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic and art historical appreciation even as they grant visual access to the social and political dynamics operative in diverse cultural contexts. We will explore photographic practices in various zones of the Middle East--e.g., the Holy Land, Turkey, Egypt and the Persian sphere--by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the agency and power of images more generally--what work do photographs do? Who resists and who benefits? The goal will be to appreciate diverse styles and perspectives that underlie renderings of the Middle East.

Class Format: Discussion and GLOW posts required.

Requirements/Evaluation:  Discussion, GLOW Posts, final project

Prerequisites:  none

Enrollment Limit:  20

Enrollment Preferences:  majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 222(D1) ARAB 222(D1)

Difference, Power, and Equity Notes: Photographs are tricky. Whose experiences and values do they really represent—those who are depicted? Those who wield the camera? Or, those who view images that are so easily reproduced and widely shared? How does identity figure? Religious conviction? Political affiliation? And how are these variables encoded in the material evidence? Appreciating the myriad powers of images requires multiple skills—from close-looking to interdisciplinary analysis—useful in contemporary visual culture.

ARAB 244 (S) Second Language Learning: The Learner, the Classroom, and the Social World
Learning a second language is one of the most exhilarating, rewarding, and eye-opening experiences of a life-time. Millions of people around the globe embark on a journey of exploration of target languages and cultures while reflecting on the self and home culture(s) in the process. This course introduces you to core issues related to the learning of a second language. What are the processes involved in learning a second language? What does it mean to know another language? Is second language learning similar to first language learning? Why are some language learners more successful than others? What individual variables do learners bring to the learning process? How can classrooms facilitate second language learning? How do learners perceive teachers' feedback? How does the specific socio-cultural context impact language learning? How does learning about the target culture feed into language learning? How does the learner's identity evolve in the process of second language learning? These are some key second language learning questions that we will examine in this class. Readings are drawn from studies on the learning of different languages.

Requirements/Evaluation: Active class participation, assignments, article presentation and leading a class discussion, language learner interview, exam, a final project.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the course is overenrolled preference will be first given to Arabic majors, then seniors, then juniors.

Not offered current academic year

ARAB 232 (S) Islam in Africa (DPE)

Secondary Cross-listing
Islam in Africa is often relegated to the peripheries in the study of Islam, a religion most associated with Arabs and the Middle East. On the flip side, Islam is also portrayed as foreign to African belief systems and institutions. The relationship between Islam and Africa, however, begins with the very advent of Islam when early Arab Muslim communities took refuge in the Abyssinian empire in East Africa. This course explores the history of Islam and Muslim societies on the African continent by focusing on the localized practices of Islam while also connecting it to Islam as a global phenomenon. The course will begin with a historical focus on the spread of Islam in Africa from East Africa and North Africa in the seventh century all the way to the spread of Islam through Sufi brotherhoods in the eighteenth and nineteenth centuries. The course will also take an anthropological approach, exploring the diverse practices of Islam in African Muslim communities and the social and cultural impact of Islam on African societies. Among the topics the course will cover include African Muslim intellectual traditions, local healing practices, religious festivals, early modern African Muslim abolitionist movements, and the historical interactions between African and Asian Muslim communities in the Indian ocean world.

Requirements/Evaluation: Two essays during the semester and final project.
This course is cross-listed and the prefixes carry the following divisional credit:

GBST 232(D2) AFR 232(D2) ARAB 232(D2) HIST 202(D2) REL 232(D2)

Difference, Power, and Equity Notes: The course will urge students to consider how scholars construct centers and peripheries through a study of Islam in Africa that is often rendered to the peripheries in the study of Islam. The course will also explore the diversity of African Muslim communities, getting students to think about the diversity of human experiences and interpretations of shared sacred texts.

Attributes: HIST Group A Electives - Africa

ARAB 242 (S) Women, Gender, and Sexuality in Islam (DPE)

Cross-listings: REL 242 / WGSS 242

Secondary Cross-listing

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women’s own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Requirements/Evaluation: weekly discussion post, midterm essay, and final paper (6-8 pages)

ARAB 243 (F) Islamic Law: Past and Present

Cross-listings: HIST 302 / ASIA 243 / REL 243 / WGSS 243

Secondary Cross-listing

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give...
students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Requirements/Evaluation: weekly responses, midterm essay, final essay

ARAB 279 (S) Islam on the Indian Ocean

Cross-listings: REL 279 / ASIA 279 / CAOS 279

Secondary Cross-listing

While colonial and Eurocentric geographies speak in terms of continental separation, historically the continents of Africa and Asia have been connected to one another through a dual link: Islam and the Indian Ocean. Indian Ocean trade and travel have historically connected East Africa, the Arabian Peninsula, South Asia, and South East Asia, shaping the lives of people and communities who lived not only along the coasts but also inland. This course focuses on these transregional connections, looking at the Indian ocean as a connective space that binds people and regions together rather than separating them. The course will also examine the role of Islam as a religious, economic, social and political force that brought together Muslim communities throughout the regions along the Indian ocean. In exploring these connections, the course will cover a broad historical period, from the 7th century with the rise of Islam to European colonialism and the emergence of a global economy in the nineteenth century.

Requirements/Evaluation: weekly responses, midterm essay, final paper

ARAB 301 (F) Advanced Arabic 1 (WS)

A continuation of Intermediate Arabic, ARAB 301 aims to expand students' listening, reading, writing, and speaking skills in Arabic. The course will also stimulate students' intellectual curiosity about the Arabic-speaking regions and enhance their intercultural competence. Using Al-Kitaab as well as a variety of authentic written and audiovisual materials, the course will advance their proficiency in Modern Standard Arabic. The course will also encourage enrolled students to engage critically with a wide variety of topics in Arabic language as they enrich their knowledge of the different aspects of Arabic language and culture. Students at this stage will also be assisted to generate more complex written and oral assignments.
Requirements/Evaluation: active class participation, daily assignments, presentations, quizzes, midterm exam, final exam

Prerequisites: ARAB 202 or equivalent

Enrollment Limit: 8

Enrollment Preferences: Arabic majors and anyone who has a level-appropriate knowledge of Arabic language.

Expected Class Size: 2

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will be writing multiple drafts in Arabic; the weekly written work expected from students is 800 words in Arabic language, students will also be doing translations from Arabic into English or vice-versa; and all written work from students will evaluated, and students will receive feedback to rework it. Students will receive detailed and consistent feedback about their writing in Arabic language.

Fall 2024

SEM Section: 01  MWF 11:00 am - 12:15 pm  Nicholas R Mangialardi

ARAB 302  (S)  Advanced Arabic 2  (DPE) (WS)

A continuation of Advanced Arabic 1, ARAB 302 aims to reinforce students' listening, reading, writing, and speaking skills in Arabic through a deeper engagement with authentic materials. Built around a plethora of texts and audiovisual materials, the course seeks to assist students to develop their language and critical thinking skills in Arabic. Situated at the intersection of language learning and content teaching, this course will prepare students for more scholarly engagement with Arabic in the fourth year. Like ARAB 301, the course will be conducted entirely in Arabic.

Requirements/Evaluation: Reflections, discussions, essays, reading and writing project, quizzes, exams, and presentations.

Prerequisites: ARAB 301 or equivalent

Enrollment Limit: 18

Enrollment Preferences: Arabic Studies, or students who completed ARAB 301

Expected Class Size: 7

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage in daily writing and reflections involving prose responses (blogs, commentaries, etc.) to discussion prompts, movies, YouTube videos, comic analysis and articles. The students will also work on a portfolio with entries that will involve a careful process of revisions as well as rigorous research in Arabic recourses, summaries and essays. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes: The students will engage in an exploration of social, political, and economic realities in Arab societies across state and community boundaries. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. The selected texts will also expose students to issues of power and inequality based on internal and external factors in Arab societies as well as the social struggles of immigrants and refugees.

Spring 2025

SEM Section: 01  MWF 10:00 am - 10:50 am  Nicholas R Mangialardi

ARAB 307  (S)  To Die For? Nationalism in the Middle East  (DPE)

Cross-listings: HIST 307

Secondary Cross-listing

In 1932, or twelve years into his rule and twelve years after the establishment of Iraq, King Faysal I lamented that there were "no Iraqi people but only unimaginable masses of human beings, devoid of any patriotic idea, imbued with religious traditions and absurdities, connected by no common tie."

This course will consider how true the King's statement still holds by evaluating the various attempts at state and nation building in the modern Middle East. Some of the more prominent questions that this course will examine include: What is a nation? What are the essential characteristics of a nation? Who are a people? Why are people ready to die for the nation? And who is included and excluded in the nationalist narrative? After assessing
some of the more influential theories of nationalism, we will explore the historical experience of nationalism and national identity in Egypt, Israel, Turkey, Palestine, Iran, and Iraq. What has been at the basis of nationhood? How did European concepts of nation translate into the Middle Eastern context? What was the role of religion in these modern societies? How do traditional notions of gender effect concepts of citizenship? We will also explore some of the unresolved issues facing the various nations of the Middle East, such as unfulfilled nationalist aspirations, disputes over land and borders, and challenges to sovereignty.

Requirements/Evaluation: There will be several options to fulfill the requirements of this course including a weekly journal, oral exam or a final research paper (12-15 pages).

Prerequisites: None.

Enrollment Limit: 20

Enrollment Preferences: History and Arabic Studies majors, Global Studies concentrators, seniors, and students with a demonstrated interest in the Middle East.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 307(D2) ARAB 307(D2)

Difference, Power, and Equity Notes: This course examines the power of the state to decide who is included and not included in the nationalist narrative. How does it seek to promote unity and how does it explain differences within and outside of society? Though nationalism can be a very powerful unifying factor, this course will also consider examples where nationalism has the opposite effect.

ARAB 308 (F) The Nile (DPE)

Cross-listings: GBST 320 / AFR 350 / ENVI 335 / HIST 308

Secondary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity's most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people’s relationship with it, changed over the last century? This course will consider the history of the Nile and and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 308(D2) GBST 320(D2) AFR 350(D2) ENVI 335(D2) HIST 308(D2)
**ARAB 320 (F) Poetry of Indignation: Poetics and Transnational Liberation** (DPE) (WS)

**Cross-listings:** AFR 328 / COMP 335

**Primary Cross-listing**

Poetry is usually associated with beautiful, metered, and charged language. However, beyond its poeticity, poetry has also functioned as a tool of liberation and transnational construction of identities and solidarities. States have national poets, and, in many countries, national anthems were written by famous poets. From Abu al-Qasim al-Shabbi and Claude McKay to Pablo Neruda, poetry has acted as a space for life, rebellion, resistance, revolution, and the defense of a common humanity that transcends the barriers of language and national aesthetics. This course draws on a variety of materials from the Caribbean to Africa and from the Middle East to India to conceptualize a "poetics of indignation" against slavery, social injustice, colonization, authoritarianism, capitalism, and globalization. The students in this course will read poets, such as Okot p'Bitek, Derek Walcott, Tsitsi Jaji, Mahmoud Darwish, and Pablo Neruda, among many other poets, to examine how poetics changed and shifted across times and geographic boundaries while retaining a commitment to indignation, rebellion, and anger at almost the same recurring oppressive forces.

**Requirements/Evaluation:** Two 5pp. midterm papers; a 1000-word reflection statement; weekly GLOW posts; one 10-minute presentation; active participation in the discussions in class.

**Prerequisites:** None

**Enrollment Limit:** 14

**Enrollment Preferences:** If the class is overenrolled, the students will submit a 200-word paragraph in which they explain how the course fits within their plan of study at Williams.

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 328(D2) COMP 335(D1) ARAB 320(D1)

**Writing Skills Notes:** The students in this course will receive intensive feedback on their writing. This includes writing two 5pp. papers as well as a 10pp. final paper. The students will submit weekly GLOW posts and a final reflection statement.

**Difference, Power, and Equity Notes:** The students will understand that poetry is a field in which power dynamics and imbalances of access to resources are reflected. They will also pay attention to who writes what and who publishes where in order to understand the imbrication of inequality within the institutions that produce, disseminate, and reward poets.

**Cross-listings:** COMP 332

**Primary Cross-listing**

Since the uprisings in the Arab world in 2011 and the counter-revolutions that followed, much attention has been paid to the significant role of the "popular" in creating social and political transformations. The voice of the youth and "the street," in particular, emerged as massive sources and sites for political mobilization. But, are these categories identical? Does youth culture equal popular culture? This survey course is designed to provide students with an introduction to the different layers that constitute popular culture in the Arab world since the decolonization of Arab states in the 1950s. Questions that we will ask include: What constitutes "popular culture" in the Arab world? How is it different than folk culture, mass culture, or "high" culture? Who are the key players in the creation and dissemination of "popular" culture? Besides globalization, for example, what other social, political and economic dynamics engulf the definition of the "popular"? What are modes of self-fashioning and representation of Arab identity that characterize this culture? To answer these questions we will examine original sources (with English translation) that include a graphic novel, political
cartoon and graffiti, documentaries, TV shows, soap operas, video clips, music, comedy, blogs, news and social media. A selection of essays from anthropology, Arab culture studies, political science, journalism, and online videos will be used to provide historical and critical context for the material discussed in class.

**Requirements/Evaluation:** active class participation, two shorter papers (3-4 pages), two film reviews and critical reflections (1-page), a performance, and a longer final paper (7-10 pages)

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** students majoring in or considering a major in Arabic Studies

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 331(D1) COMP 332(D1)

**Difference, Power, and Equity Notes:** As the course description explains, this course engages the concept of the popular through a critical examination of difference, power, and equality in the context of national revolt against colonialism, dictatorship, and socioeconomic injustice in the Arab world since the 1950s. The content will focus on addressing how voices from the margins, particularly the youth, the urban poor, and women, articulated a political language of popular resistance against the dual hegemony of state and colony.

**Attributes:** GBST Middle Eastern Studies

Not offered current academic year

**ARAB 332 (F) Islam and Feminism**

**Cross-listings:** REL 332 / WGSS 334

**Secondary Cross-listing**

This course examines the relationship between feminism and Islam, exploring Islamic feminism, decolonial feminism, and the critiques of imperialist feminism, homonationalism, and femonalism. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses to such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will explore the breadth of Islamic feminist literature, covering: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology. The final part of the course will focus on Muslim feminist and decolonial feminist critiques of feminism and its link to imperialism and the weaponization of gender and sexuality in global discourse.

**Requirements/Evaluation:** weekly responses, midterm essay, final research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion, Arabic Studies, Women's, Gender and Sexuality Studies

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

SEM Section: 01  MR 2:35 pm - 3:50 pm  Saadia Yacoob

**ARAB 335 (F) Rhymes, Romance, and Revolution: Arabic Poetry in Translation** (WS)

Since pre-Islamic times, poetry has been "the record of Arab history," as an old adage holds. From ancient tribal odes and medieval mystical verse to
modern love lyrics, Arabic poetry speaks to how people of the region have lived and interacted. Yet, beyond just recording, poetry has also played a central role in shaping society, culture, and politics in the Arab world. This course introduces students to the poetic tradition(s) of the region, traversing a broad chronology (early Islamic, medieval, modern) to explore such questions as: what are the themes and structures of Arabic poetry? Which elements have changed or persisted over time? And how is it that even classical Arabic poems continue to resonate with younger generations today? We will consider such questions as we read Arabic poems in translation, analyzing how these texts were composed, recited, set to music, and, sometimes, censored or banned by authorities. Students will become familiar with Arabic poetic genres--Classical, Sufi/religious, Diaspora, Free Verse--as well as major poets in the literary tradition. Readings and discussion will be in English. No knowledge of Arabic or poetry required.

Requirements/Evaluation: Daily attendance and participation in class discussion; short essays (1 page) every two weeks, final presentation, and final paper (10-12 pages).

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Arabic majors; Comparative Literature majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will develop their writing skills by submitting one-page unit responses every two weeks and a final paper of 10-12 pages on a topic of their choice. Students will receive feedback on each writing assignment and have opportunities for multiple drafts and peer review throughout the semester with instructor and course Writing TA.

Fall 2024

SEM Section: 01 MR 2:35 pm - 3:50 pm Nicholas R Mangialardi

ARAB 340 (S) Arab Women Memoirs: Writing Feminist History (DPE) (WS)

In this seminar we review selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? How did these women writers carve a literary space for feminist memory in modern Arabic literature? In addition to the memoirs, we will look at women's blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere.

Requirements/Evaluation: Students will write the following: three response papers (2-3 pages), at least 6 journals entries (300 words per entry) and a final analytical research essay (7-10 pages). They will have a final performance project.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: In addition to writing several short papers, a final research paper, a reflection on their final performance project, students will write six journals. The combination of research writing, personal reflection echoes the creative non-fiction genre of the course. It also provides students with the opportunity to reflect on forms of history/memory writing.

Difference, Power, and Equity Notes: Gender inequality, sexism, and the intersection of colonialism, nationalism and capitalism are the heart of this course. The memoirs of Arab women writers from the late 19th century to the present continue depict the history of women's movement and the struggle for women's rights in the Arab-speaking world while addressing the different hierarchies of power and domination that regulate them to second class citizens. Students will learn DPE vocabulary and critical terminology.

ARAB 360 (F) Repairing a Broken World: Intro to North African Contemporary Art (DPE)

Cross-listings: RLFR 360 / ARTH 460 / ARTH 560 / COMP 361

Secondary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Conducted in French.

Requirements/Evaluation: For undergrads: Active participation, 8 1-page response papers, 5-page mid-term paper, 10-12 page final paper and presentation. For grad students: Active participation, 8 response papers, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 2 spots will be offered to Grad Art students.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 360(D1) ARTH 460(D1) ARTH 560(D1) ARAB 360(D1) COMP 361(D1)

Difference, Power, and Equity Notes: This course critically examines art work that engages colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity.

Fall 2024

ARAB 363 (S) Where are all the Jews? (DPE) (WS)

Cross-listings: COMP 363 / REL 268 / JWST 268

Primary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle’s schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews’ departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: students interested in critical and comparative literary, religious or historical studies.
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 363(D1) REL 268(D2) JWST 268(D2) ARAB 363(D1)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

Attributes: JWST Core Electives
Not offered current academic year

ARAB 369  (F)  Indigenous Narratives: From the Fourth World to the Global South  (DPE) (WS)

Cross-listings: COMP 369 / HIST 306 / GBST 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical perversegations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Requirements/Evaluation: active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7-10 pages)

Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Comparative Literature majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 369(D1) HIST 306(D2) ARAB 369(D1) GBST 369(D2)

Writing Skills Notes: This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.
Difference, Power, and Equity Notes: At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

Attributes: GBST Borders, Exiles + Diaspora Studies

Fall 2024

SEM Section: 01    MR 1:10 pm - 2:25 pm     Amal Eeqiq

ARAB 402 (S) Travel Literature in Arabic: The World through Arab/Amazigh Eyes  (DPE) (WS)

Arabic travel literature is a very rich genre that spans different periods and geographies, reflecting Arab/Amazigh writers’ understanding of themselves and the world around them. From India to Russia to Cuba and Namibia, Arabs/Amazighs have traveled the world and inscribed their observations about different people and cultures in a significant literary output. This course draws on poems, dictionary entries, short stories, novels, films, and memoirs to initiate students to the various ways Arab/Amazigh travelers–ancient and contemporary–made sense of other cultures through their experience-based or fictionalized travel accounts. Reading travel writings about West Asia, Turkey, Africa, Europe, and the Americas, students will have a complicated understanding not only of the Arabic-speaking world, but also of the forces that shaped travelers’ representations of other people and their cultures. The course will build students’ linguistic autonomy and provide them with the analytical skills they need to examine copious literary texts independently. Students enrolled in this course are required to use the language resources available on campus to improve their language skills in order to benefit maximally from the literary and intellectual opportunities offered in the texts under study.

Requirements/Evaluation: Weekly responses on Glow, active participation in class, one five-page essay, and one ten-page final paper. There is no exam in this course.

Prerequisites: 302 or equivalent.

Enrollment Limit: 10

Enrollment Preferences: Arabic major or students intending to major in Arabic. Students whose Arabic is strong enough to pursue a literary course in Arabic.

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (DPE) (WS)

Writing Skills Notes: Students will improve their writing in Arabic by: 1. Writing weekly responses on Glow (500 words per week; 250 words per session) 2. One five-page essay for the mid-term 3. one ten-page final research paper

Difference, Power, and Equity Notes: The course will help students understand how travel is enmeshed in power relations and discursive production about other people. Of all literary genres, travel literature is more likely to slip into exoticism, essentialization, and overgeneralization about people and place. However, an active reading that is aware of these slippages will also open up literary texts to a rich learning about geography, politics, history, landscape, and culture.

Not offered current academic year

ARAB 403 (S) Beyond the Letter: Visual Culture in the Arabic-Speaking World  (DPE) (WS)

Whereas poetry has been historically celebrated as the defining form of an “authentic” Arab culture from the pre-Islamic world to the present, visual culture, such as paintings, sculptures, installations, videoart, and photography, among others, has been relegated to the contemporary, the modern, the Westernized, and thereof, a representation of a less “authentic” Arab culture. In this course, we will challenge this false dichotomy by examining a variety visual culture artifacts from the Arabic-speaking world. Although the scope of our discussion will be limited to works from the 19th century to the present, our questions will investigate the deep roots of visual art in the Arabic-speaking world. We will also examine the work of poets-painters, such as Jabra Ibrahim Jabra and Etel Adnan that expanded from Palestine, Lebanon and Iraq to the United States, the manifestos of the Arab Surrealist Movement in Cairo in the 1930s, the Baghdad Modern Art Group in the 1950s and more recent works by individual artists navigating post-modern aesthetics, and dystopian futures, including Radia Bent Lhoucine, Amina Zoubair, Sophia Al-Maria and Juamana Manna, among others. In discussing these works, we will reflect on political and social events that shaped the production of visual culture in the Arabic-speaking world from the Gulf to the Maghreb. In addition to reading artists statements, exhibition reviews, art magazines and museum brochures that speak to the alphabet of visual culture, we will listen to interviews and watch short clips. In the process, we will active advanced grammar and vocabulary skills and employ paralinguistic analysis. The course is taught in Arabic.
Requirements/Evaluation: Active in-class participation; active participation in discussion forums on GLOW; weekly writing assignments of 2-3 pages; two in-class presentations; a final 10-pages essay.

Prerequisites: ARAB 302

Enrollment Limit: 10

Enrollment Preferences: ARBIC

Expected Class Size: 7

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will write 2-3 pages weekly and will produce a 10-pages essay at the end of the course. They will also provide written feedback to in-class presentations and online discussions. The writing assignments will involve working with several drafts, revisions, and regular annotations of artwork.

Difference, Power, and Equity Notes: This course is motivated by addressing the power dynamics between art forms in the Arabic-speaking world (poetry versus visual culture). It also explores the intersection of gender, ethnicity, and access to different expressions and venues of art and art production.

Spring 2025

SEM Section: 01  MW 11:00 am - 12:15 pm  Amal Eqeiq

ARAB 404  (S)  Topics in Contemporary Arab Cultures  (DPE) (WS)

What issues do contemporary Arab societies and cultures face? Through an exploration of various current issues, this course will introduce you to questions that engage Arab thought in modern times. What issues are central to women and young people today? How do the Arabic language and Arab identity intersect within increasingly multilingual and multicultural communities? What issues do minority communities in Arab countries face? How does globalization impact Arab societies? How do literature and art continue to reflect aspirations, challenges, and defiance? The course will explore these and other issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources. Taught in Arabic.

Class Format: The course involves two main sessions and a third to be organized as a group or broken into conversation sessions.

Requirements/Evaluation: Class participation, daily writing and reflections, blogs, quizzes, leading a class presentation and discussion, and a final project.

Prerequisites: ARAB 302 or equivalent.

Enrollment Limit: 18

Enrollment Preferences: If the course is overenrolled, preference will be given to Arabic majors.

Expected Class Size: 7

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage in daily writing and reflections involving prose responses to discussion prompts, movies, YouTube videos, and articles. The students will also write blogs, commentaries, and a final project. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes: The students will engage in an exploration of social, political, and economic realities in Arab societies across state and community boundaries. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. They will reflect on issues of power based on internal and external factors in Arab societies as positioned in a diverse region with unfolding political, social, and religious changes.

Not offered current academic year

ARAB 405  (F)  From Page to Stage: Singers and Songwriters of Modern Arab Music  (DPE) (WS)

Since its earliest history, Arab music has accorded special status to the singing of poetry. Over the last century, many of the most popular songs across the Arab world were the result of poets, composers, and singers collaborating to turn written words into performable masterpieces. In this course, we will explore a variety of famous Arabic songs, examining how they were written, edited, performed, and, sometimes, censored and banned.
Questions that we will ask in this course include: What is the process through which Arabic songs are made? Who is the "author" of the final song? How are song texts transformed when prepared for concert stages and recording studios? And what, in this process, shapes the success and popularity of a song? We will read song lyrics (poems) as literary texts to consider their language and poetic characteristics while also analyzing how songs can be used as a lens to think about politics, identity, religion, class, gender and broader topics related to modern Arab society. Students will become familiar with the lives and works of major singers, such as Umm Kulthum, Fairuz, and Marcel Khalife, and poets, such as Ahmad Shawqi, Nizar Qabbani, and Mahmoud Darwish. Readings and discussion will be in Arabic.

**Requirements/Evaluation:** Regular participation in class discussion; weekly listening assignments; biweekly one-page unit responses; final project/paper on a singer or songwriter from the twentieth or twenty-first century.

**Prerequisites:** ARAB 302 or equivalent.

**Enrollment Limit:** 19

**Enrollment Preferences:** If course is overenrolled, preference will be given to Arabic majors.

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Students will develop their Arabic writing skills by submitting one-page unit responses every two weeks and a final paper of 8-10 pages on a topic of their choice.

**Difference, Power, and Equity Notes:** Through the lens of music, this course critically examines topics such as media censorship, power dynamics related to gender, and representations of race and class.

*Not offered current academic year*

**ARAB 407 (F) Arabic Poetry: A Musical Introduction** (DPE)

For over a thousand years, poetry has served as a wellspring for Arabic song lyrics, creating an intimate bond between word and melody. Some of the most renowned Arab poets are those whose words were set to music, to be chanted by master singers and ordinary people alike. In this course, we explore Arabic poetry through the lens of song. Journeying between ancient verse and contemporary compositions, we will consider such questions as: What are the themes, structures, and linguistic features of Arabic poetry? How has it changed over time? And why is it that even classical Arabic poems can become modern pop hits circulating everywhere from Marrakesh to Muscat? We will consider such questions as we read and listen to Arabic poems, analyzing themes related to politics, identity, religion, and gender in Arab society. Students will become familiar with Arabic poetic genres--Classical, Andalusian, Mahjar, Free Verse--as well as major singers since the twentieth century. Readings and discussion will be in Arabic.

**Requirements/Evaluation:** Regular participation in class discussion; weekly presentations and listening assignments; biweekly one-page unit responses; final project on an Arab poet/poem.

**Prerequisites:** ARAB 302 or equivalent.

**Enrollment Limit:** 10

**Enrollment Preferences:** Arabic Studies majors.

**Expected Class Size:** 5

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** Through the lens of Arabic poetry, this course critically examines artistic expression and contemporary issues of literary and media censorship in the Arab world. Students explore cultural productions to gain awareness of how poets and singers have challenged conventional power dynamics related to gender, race, and religion. Students also study the circulation of people and texts over national borders to form nuanced understandings of migration in/around the region and global flows of culture.

*Fall 2024*

SEM Section: 01 Cancelled

**ARAB 413 (F) The Big Ideas: Intended and Unintended Consequence of Human Ambition** (DPE) (WS)

**Cross-listings:** HIST 413 / GBST 413 / ENVI 413

**Secondary Cross-listing**
What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefited and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

Requirements/Evaluation: A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Seniors, especially History, Arabic and Environmental Studies majors.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 413(D2) GBST 413(D2) ARAB 413(D2) ENVI 413(D2)

Writing Skills Notes: A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

Difference, Power, and Equity Notes: This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

Attributes: HIST Group E Electives - Middle East

Not offered current academic year

ARAB 414 (F) Displacement: Global Histories of Refugees and Forced Migration (DPE) (WS)

Cross-listings: GBST 414 / HIST 402

Secondary Cross-listing

The Middle Eastern refugee has become a central figure in debates on migration, asylum, and the right to belong in Europe, Asia, and North America. Often stereotyped as threatening, alien, and rootless, these migrants are generally depicted as lacking histories and by extension not worthy of consideration or empathy. This course invites students to understand some of the most tragic humanitarian crises of our time and the massive involuntary displacements provoked by war, violence, and/or climate change. Taking a global perspective, this seminar examines the history of displacement, refugees, migration, diaspora in a focusing on the nineteenth century through the present. With special attention to the historical experience of various peoples of the Middle East, the course will start with theoretical approaches to the study of migration and then delve into case studies. A range of different moments of displacement will be analyzed such as the experiences of Armenians, Jews, Palestinians, Syrian, Iraqis, and Kurds. By examining the human geography and politics of forced displacement and migration, this course will address a number of important academic and political questions: what makes a history written by, about, and for displaced people powerful? How can writing from the perspectives of refugees challenge core debates about identity, the nation and borders? How does the focus on displacement help in understanding the nature of war and conflict?

Requirements/Evaluation: Final 25 page research paper, several drafts of paper, class presentations and in class writing exercises.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: History and Arabic Studies majors and Global Studies concentrators.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 414(D2) GBST 414(D2) HIST 402(D2)

Writing Skills Notes: This research seminar will involve the writing of a final 25 page paper. Prior to that stage, each process of writing will involve moments of feedback and sharing. Students will submit a proposal early on in the semester and then write an outline. These will receive peer and instructor feedback. They will then submit a five page draft in October, a 10 page draft in November, before the final submission in December. In this way, they will have opportunities to rework and improve their writing.

Difference, Power, and Equity Notes: This course takes a comparative approach by exploring the predicament of some of the most vulnerable people in the world, i.e., displaced peoples and refugees. The course will consider their legal status and their experience of leaving their homes due to wars or natural disaster. The area of study is the Middle East and we will examine the historical experience of a number of different people in the region including Kurds, Palestinians, Sephardi Jews, and Syrians.

ARAB 427    Revolutions & Revolutionaries in the Arab World’s Modern History    (DPE) (WS)

What is the difference between a [Thawrah] (revolution), an [‘Inqil’b Sha’ab] (popular led-coup) and an [‘Intif’ah] (uprising)? Was the 2011 "Arab Spring" the first time that people in the Arab world had revolted against their governments? Were the 1977 bread "riots" in Egypt an [‘Intif’ah] or revolution that was quelled promptly? How does the 1958 coup in Iraq compare to the coup there five years later in 1963 or other coups across the Arab world? What were the role of the Amazigh in North Africa in rebelling against colonialism? In this course, we will be looking transnationally at the different revolutions, uprisings and coups that have taken place in the Arab world in its modern history. Through a variety of medium, the course will explore the socio-political and economic factors that resulted in these instances in history and the effects thereof. We will also be looking at the cultural production that flourished after revolutions, coups and uprisings from the blatantly propagandist to the nuanced and subversive! The course will be entirely in Arabic and aims to take participants from intermediate high to the advanced-mid/high level according to ACTFL standards. The course will be engaging with and developing, on a weekly basis all five language skills: reading, writing, listening, speaking and cultural proficiency and will focus on the language functions that are required at this level. This writing intensive course will consist of multiple forms of evaluation such as participation, debates, presentations, a mid-term video project and an end of year writing project.

Class Format: flipped classroom

Requirements/Evaluation: writing assignments, participation, debates, presentations, a mid-term video project, and an end of year writing project

Prerequisites: having done three years of Arabic language and preferably time abroad

Enrollment Limit: 10

Enrollment Preferences: seniors

Expected Class Size: 6

Grading:

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be expected to write 5-6 essays during the term, each of which consists of two drafts, in addition to a 5-page end of term paper. The focus in the essays in addition to knowledge of the subject matter, will be syntax, style, cohesion, development of arguments, and collocations. Prompt and detailed feedback will be given for both drafts to ensure improvement.

Difference, Power, and Equity Notes: The course will include material about multiple countries and their peoples in the Arab world while also being attentive to minorities and their status.

Winter Study

ARAB 14    Empowered Embodiment: An Introduction to Movement Improvisation
This guided improvisation class incorporates diverse movement modalities that bring awareness to our sensations, emotions, and thoughts, and aims to build new patterns in service of better relationships with our bodies as sites of learning, liberation and power. Appropriate for movers of all levels, this studio-based course encourages physical exploration to develop and deepen an embodied practice for participants that supports creativity and mindfulness, while enhancing compassion, mental health and emotional well being. Drawing on techniques including authentic movement, visualization, meditation, performance studies, music and play, as well as diverse movement traditions, participants will spend time moving, observing and reflecting in each 3 hr session (2 x week). Students will be encouraged to keep a daily journal and respond to prompts and readings, and develop a short daily movement practice both as a creative outlet and means of reducing stress and anxiety. Conversations and readings will interrogate the role of cultural and gender-based expectations on our physical patterns and well being. Movement prompts will provide new tools for critical thinking and creative problem solving by getting participants out of their "heads" and grounded in the liberatory and exploratory space of the body. Evaluation will be based on in-studio participation, reflective writings, and the creation of a personalized embodied practice program including an original
ARAB 15    Kafka Goes to Palestine
For more than a century, Franz Kafka has posed a challenge to interpretation. Philosophers have debated his work while theologians have probed its mystical elements. More recently, the legal battle over his physical papers took place in an Israeli court, confounding the Zionist identity of religion and nationalism. At the heart of this history are two questions which remain with us today: what can literature do? and for whom does it belong? We will begin the seminar by reading Kafka. Guided by a selection of parables and short stories, we will immerse ourselves in the intricacy of interpretation. How do we understand Kafka's world: of objects part-alive and bureaucratic mazes; of catastrophic events and narrative nonchalance? Along with Kafka, we will read his European commentators - Walter Benjamin, Theodor Adorno, and Hannah Arendt - dwelling on their notions of beauty, failure, and hope. In the second half of the seminar, we will follow Kafka to Palestine, gauging his ambivalence not only about religion and nationalism but also about literature itself. Considering Kafka's request to have his remaining papers burned, we will trace their fate as the literary property of a Jewish state. In doing so, we will ask how a piece of writing can make claims about justice, including its own right not to be owned. We will consider, in this regard, Kafka's reception in Palestine and the broader Arab world. Throughout the seminar, we will reflect on Kafka in the present. How do we express communal heritage - whether linguistic, religious, or cultural - when it is claimed by a state? And if writing can be free of politics, can it also be free of another manipulation, that of the market? Members of the seminar will be invited to submit a creative project, in a medium of their choice, which responds to a personal experience elicited by Kafka and his destinations.

Requirements/Evaluation:  Presentation(s); Creative project(s)
Prerequisites:  None
Enrollment Limit:  14
Enrollment Preferences:  Preference will be given on the basis of a statement of interest.

- Gerald E. Sheffield, Visiting Lecturer in Art
- Stefanie Solum, Professor of Art
- Junli Song, Gaius Charles Bolin Fellow in the Art Department
The Department offers students different paths to explore the vital connection between visuality and creativity. With courses of study in the History of Art and the Practice of Studio Art (or a combination of History and Studio), the Major is designed to train students to develop the technical, conceptual, critical, and historical tools they need to engage the visual world.

ADVISING

Majors are expected to discuss their choice of courses and path through the major with their advisor or another professor in the department. Official departmental advisors for each route through the major (listed here below) are available to field general questions concerning curriculum, requirements, and planning to study away.

Art History Faculty Advisor: Michelle Apotsos
Art Studio Faculty Advisor: Laylah Ali
History and Studio Faculty Advisor: Michelle Apotsos and Laylah Ali

ART HISTORY

The history of art is different from other historical disciplines in that it is founded on direct visual confrontation with objects that are both concretely present and yet documents of the past. We emphasize analysis of images, objects, and built environments as the basis for critical thought and visual literacy. In addition to formal and iconographic analysis, we use the work of other disciplines to understand visual images, such as social history, perceptual psychology, engineering, psychoanalysis, cultural studies, and archaeology. Because of its concentration on visual experience, the Art History major increases one's ability to observe and to use those observations as analytical tools for understanding history and culture.

Major Requirements

The Art History major requires a minimum of nine courses:

- Any three of the following six courses: ARTH 101, ARTH 102, ARTH 103, ARTH 104, ARTH 105, ARTH 106, ARTH 107 and ARTH 108
- Any ARTS (studio) course.
- Any two courses in Art History concerned with the following: one course in art history concerned with a period prior to 1800 and one course in art history concerned with post 1800.
- ARTH 301 Methods of Art History [NOTE: starting in 2024 – 2025, art history majors may take either ARTH 301 or ARTH 302 to satisfy the methods requirement]
- One 400-level Seminar or 500-level Graduate Seminar (in addition this course may be used to satisfy the pre-1800 or post-1800 requirement).
- One additional course, at any level.

The faculty encourages students to construct a major with historical depth and cultural breadth. The numbered sequence of courses is intended to develop knowledge and skills appropriate to students’ level of experience, ultimately supporting original, independent work at the 400-level.

100-LEVEL COURSES require no experience in the subject. They are introductions to the field that develop students’ skills in visual analysis, interpretation, and written expression and argumentation.

200-LEVEL COURSES are introductions to specific fields within art history, but normally open to students with no experience in art history. Often, there is a significant lecture component to the courses.

300-LEVEL COURSES focus more closely on specific art-historical problems, or present material in a tutorial format. The goal of these courses is to build skills needed for independent research and sustained analytical writing. Generally, there is a higher expectation of student participation or initiative, and longer and/or more frequent writing assignments. In the 300 level, students learn to work with and evaluate different types of sources, research tools, historical perspectives, and methodological approaches.

400-LEVEL COURSES are intensive discussion-oriented seminars that emphasize critical analysis and build toward student-initiated, independent work (oral presentations and sustained, analytical research papers). Advanced majors who have taken ARTH 301 are encouraged to work at the 400 or 500 level, and papers produced in these courses are normally the basis for the senior thesis.

HISTORY AND STUDIO

This route offers students the opportunity to propose a course of study that investigates a particular medium or a particular issue bridging both wings of the department. Examples of past History and Studio projects include topics related to architecture, curating, and performance, but are not limited to these.

In many cases, it is better to choose the Art History or the Studio Art route, to the major, while taking additional courses in the other wing, as desired. The History and Studio route is offered as a third option and requires approval.

The application for the History and Studio route must include both a written statement and a list of proposed courses. It must be approved by an advisor from both Art History and Studio Art and be submitted to the department’s administrative assistant before registering for the major.
History and Studio students whose projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ARTS 418) with permission of the instructor and to participate in the senior Studio exhibition. Those seniors with a History emphasis can apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Thesis Seminar (ARTH 494) which culminate in a thesis and thesis presentation. Or, a student may propose a senior independent study.

Major Requirements

The History and Studio major requires a minimum of nine courses:

- Any TWO of the following six courses: ARTH 101, 102, 103, 104, 105 or 106
- ARTS 100-level course
- ARTS 200-level course
- ARTH Methods OR ARTS 319 Junior Seminar [NOTE: starting in 2024 – 2025, History and Studio majors may take ARTH 301 or ARTH 302 to satisfy the ARTH methods requirement]
- ARTH 400-level OR 500-level course
- ARTS elective
- ARTH elective
- ARTS 300-level course

OR ARTS 418 (with permission), if pursuing a Studio tracking an Art History track

OR an ARTH 400-level course or ARTH 494 (with permission), if pursuing an Art History track

The application for the History and Studio route must include both a written statement of purpose and a list of proposed courses. Both must be approved by two advisors, one from Art History and the other from Studio Art, and be submitted to the department’s administrative assistant before the student may register for the major.

History and Studio students whose ongoing projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ARTS 418) with permission of the instructor and to participate in the senior Studio exhibition. Or, a student following the Studio Art track may propose a senior Independent Study project in order to pursue Honors. Those History and Studio majors with an Art History emphasis may apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Honors Seminar (ARTH 494).

One advisor from Art History and one from Studio Art must sign off each semester before a student may register for classes.

THE DEGREE WITH HONORS IN ART

Students who wish to become candidates for the degree with honors must show prior evidence of superior performance in the major as well as research capabilities to carry out the proposed project.

Art History

To graduate with honors in art history, students are to enroll in the Senior Thesis Seminar (ARTH 494) during the Spring semester of their senior year, where they will develop an original research paper (completed in a prior course, a travel research project, or an independent study). To be admitted to the seminar, students must submit their original research paper to the Art Department’s Administrative Assistant in Lawrence no later than the end of the reading period of the Fall semester. The paper must be properly formatted and include both illustrations and bibliography. It must additionally include a thesis project proposal of 500-700 words.

Students must also secure an academic advisor for their project and complete the advising Agreement Form (available from the Art Department’s Administrative Assistant) by the end of the reading period of the Fall semester. This form serves to verify: a) your advisor’s support of your project, and b) your advisor’s approval of your plans for Winter Study. Students should plan to dedicate Winter Study to work on their thesis project and, to this end, they should enroll in ARTH 31 immediately after (but not before) notification of admission into ARTH 494. (To avoid problems should they not be admitted to ARTH 494, students should pre-register in another Winter Study course). Because faculty are not usually available during this period, it is very important for students to plan, together with their advisors, a work schedule for Winter Study with concrete goals. Admission to the Senior Thesis Seminar will be determined by the instructor of the seminar, in consultation with the Art Department faculty. The important criteria for admission are: 1) the quality, originality, and potential of the research paper on which the thesis project will be based; 2) the availability of a suitable advisor for the project, and the commitment of that advisor to supervise the work during the Spring term; 3) strong past performance in the art history route to the Major; 4) completion of ARTH 301 by the time of the application (exceptions to this rule must be granted beforehand by the chair of the Department).

In early January, the instructor will notify students of their admission to the Thesis Seminar. Since enrollment is by invitation only, students should pre-register for four classes in the Spring semester. If invited to join the seminar, students should then drop one of those courses and add the Thesis
Seminar during drop-add period. The Thesis Seminar is to be taken in addition to the nine required courses for the art history route to the Major. Once in the seminar, students will revise, refine, and expand on previous research and produce a paper of approximately 25 pages. At the end of the semester, they will present a shortened version of the paper to the faculty and public at the Williams College Museum of Art.

Students who have identified a thesis topic and secured an advisor may apply early (in the Spring semester of their junior year) in order to pursue—in relation to their thesis project—summer research opportunities and/or a faculty-sponsored independent study in the following Fall semester. The procedure and criteria for students applying early are the same as those outlined above. (That is, students applying early would likewise take the Winter Study and Spring courses). Materials for early application (the same as outlined above) would be due by 5:00 pm on the Thursday preceding Spring Break.

History and Studio

History and Studio majors may follow either the Studio Art or Art History route to honors. Alternatively, a student may pursue honors through an Independent Study project, to be undertaken during Winter Study and the Spring semester under the guidance of their two advisors.

The review process for the honors candidates in the senior seminars (ARTS 418 or ARTH 494) will proceed according to the regular honors process for the respective wing of the Art Department, and will include both advisors. If the honors project is conducted via an Independent Study, the final project will be submitted to the two advisors who will determine whether or not it will receive honors. If the student chooses not to follow the Honors route, they may take either a 300-level ARTS course, or a 400-level ARTH seminar instead.

The route to honors is a combination of the art studio and art history routes to honors. At the beginning of senior year, a candidate for honors in History and Studio makes a proposal to two faculty members, one faculty advisor from each wing of the department. If both advisors agree to supervise the project, the candidate enrolls in an independent study and works through the Fall semester and Winter Study. The progress of the project is assessed by both advisors at the end of Winter Study; if the project is not well enough developed, the advisors may end it at that time. If the project is allowed to move forward, the student enrolls either in Senior Seminar (ARTS 418, for which they will need permission of the instructor), if the project is primarily a matter of making art, or in an Honors Independent Study, if it is primarily a writing project. The final project is submitted to the two advisors, who will determine whether or not it will receive honors.

STUDY ABROAD

The Art Department encourages students to travel during Winter Study, and to study abroad for a semester during the junior year. Students planning on studying abroad must: consult a departmental advisor, leave a copy of their Study Away Petition on file in the Department, and consider the required junior seminars (ARTH 301 and ARTS 319) that prepare students for the independent research and/or independent artistic production which is the focus of the senior year.

Art History

Art History majors must take ARTH 301 in their junior year unless they are planning to study abroad for a full year or unless there is only one section of 301 offered; in that case, they may take the required class in their senior year (and should consider taking the course as a second-semester sophomore). The Department does not pre-approve courses for the art history major, but will offer provisional credit for courses that appear to satisfy requirements for the major. Art history majors may satisfy no more than 3 requirements abroad (the ARTS requirement may be satisfied abroad only if the student is away for the full academic year. Student may not receive credit for 400-level work while abroad). Art history students should be aware that in many programs course selection is limited and is not known before one commits to the program. It may happen that none of the art history courses offered during the semester abroad satisfy distribution requirements for the major.

History and Studio

History and Studio majors must plan accordingly for their elected junior seminar. For art history courses taken abroad, history and Studio majors can seek provisional credit for courses that appear to satisfy requirements for the major. No provisional credit is possible for studio courses; students must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 2 major requirements may be satisfied per semester while abroad (one in studio, one in history), with no more than 3 courses total. History and Studio majors cannot satisfy ARTS 319 or any 400-level courses abroad.

ARTH 101 (S) Introduction to European Art Before 1700

Cross-listings: REL 105

Primary Cross-listing

A team-taught introduction to the art and architecture of Europe from the ancient Mediterranean to Baroque Italy. This course celebrates the glory of
works of art as physical objects, to be viewed and contemplated, to be sure, but also often to be worshiped, worn, touched (even licked), held, exhibited, bought and sold, passed through or around, and lived in. To help students begin to appreciate how these works of art might have been understood by those who originally made and used them, the course sets its objects of study within a number of revealing historical contexts, from the social and the political to the philosophical and the art historical. To give students time with original works of art, our discussion-centered conferences use the wealth of art resources in Williamstown: the Clark Art Institute, the buildings and sculpture of the Williams College Campus, and the Williams College Museum of Art.

**Class Format:** This course has 2 components: lectures and conferences. The lectures will be three times weekly, the conferences once per week. Both lectures and conferences will be held in person.

**Requirements/Evaluation:** Three shorter essays (one of which may be in the form of a final exam, either take-home or in-person), several quizzes, and engaged participation in conference sections

**Prerequisites:** none

**Enrollment Limit:** 60

**Enrollment Preferences:** Preference will be based on a short questionnaire, which students will be asked to complete if the course is over-enrolled.

**Expected Class Size:** 60

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

REL 105(D2) ARTH 101(D1)

**Attributes:** ARTH pre-1800

---

Spring 2025

**ARTH 102 (S) Art and Architecture from the Age of Enlightenment to the Present**

A semester-long, team-taught introduction to European and American art & architecture from approximately 1600 to the present. Students will learn how to analyze art made for the widest variety of purposes, from inspiration and contemplation to commemoration and condemnation. We will look at some of this era’s most deeply moving art, including works by Rembrandt and Maya Lin, Bernini and Frank Lloyd Wright, Van Gogh and Kehinde Wiley. To the extent that we are able, we will also spend time with original works and familiarize ourselves with the wealth of resources in Williamstown: the Williams College Museum of Art, the Clark Art Institute, and the Chapin Rare Book Library.

**Class Format:** conference discussion

**Requirements/Evaluation:** quizzes, participation in conferences, midterm, two papers and a final exam

**Prerequisites:** none

**Enrollment Limit:** 60

**Enrollment Preferences:** art history majors

**Expected Class Size:** 60

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**Attributes:** ARTH post-1800

---

Spring 2025
ARTh 103 (F) Introduction to East Asian Art

Cross-listings: ASIA 103

Primary Cross-listing

This course offers an introduction to the artistic traditions of China, Korea, and Japan, from the prehistoric era to the present day. Following a chronological order, the course surveys important artworks that represent major developments in medium, style, and subject matter in the three cultures, while paying attention to the movement of objects and art techniques across the region. Key themes of the course include bronzes, lacquerware, ceramics, tomb building, Buddhist reliquaries, ink painting, wood-block printmaking, and timber frame architecture. Students will learn about the development of art and artisanal practices in East Asia, while gaining a broader understanding of the continuity and discontinuity of the local artistic traditions in relation to the region's history, politics, religion, and culture. East Asia boasts a history of art that stretches five thousand years. In addition to gaining an overview of important artistic traditions in the region through the lectures, students will develop visual analysis skills and engage with critical methodologies in East Asian art through closelooking exercises and discussion-driven case studies during sections. The course pays special attention to how the constant cross-cultural exchanges between China, Japan, and Korea contributed to the development of art in unique ways across time. What is the shape of "East Asian art"? How does art help define East Asia culturally? And what does it tell us about East Asia's past, present, and future? Exploring these questions through art, students gain an object-based understanding of the civilizations in East Asia. The curriculum also integrates objects from the Williams College Museum of Art.

Class Format: A viewing session at the Williams College Museum of Art.

Requirements/Evaluation: Attendance and participation (25%), two 2-3 page artwork analysis essays (20%), four quizzes (10%), a midterm exam (20%), and a final exam (25%).

Prerequisites: None

Enrollment Limit: 45

Enrollment Preferences: Art history majors are prioritized if the course over-enrolls.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

LEC Section: 01 MW 11:00 am - 12:15 pm Ziliang Liu

ARTh 105 (S) Arts of South Asia (DPE)

Cross-listings: ASIA 105

Primary Cross-listing

South Asia, which includes the modern-day nations of Afghanistan, Pakistan, India, Bangladesh, Sri Lanka, Nepal, Bhutan and Maldives, is often compared to the European continent. Regional societies in the Indian "subcontinent" are as distinct from each other as those of Italy, Germany and France. Similarly, they also differ in their language, dress, diet, rituals and politics. However, parallel to the wealth of diversity, South Asia also demonstrates a rich history of interconnectedness. This complex web of culture, language, religion and politics is best manifested in the arts of the region. How does visual culture reflect regional variations? How does a survey of artistic style and iconography help uncover networks of exchange
across South Asia? What role did the arts play in the expression of religious traditions such as Buddhism, Hinduism, Jainism and Islam? With these questions in mind, this course is designed as a survey of the arts of South Asia starting with the height of the Indus Valley Civilization in 2600 BCE and ending in 1857 CE, a date that marks the cessation of independent rule in South Asia. Using the study of architecture, painting, sculpture and textiles, students will learn how to make stylistic and iconographic analyses, while also improving their art historical writing and analytic skills.

Prerequisites: none, open to all students

Enrollment Limit: 60

Enrollment Preferences: First years, sophomores and juniors

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 105(D1) ARTH 105(D1)

Difference, Power, and Equity Notes: In addition to a survey, the course also highlights the conceptual differences between the arts of South Asia and Western constructs of art and culture. The survey will analyze how South Asian art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. The course will encourage students to challenge longstanding biases and assumptions when studying these artworks.

Attributes: GBST South + Southeast Asia Studies

Not offered current academic year

ARTH 106 (F) An Invitation to World Architecture (DPE)

What is architecture? Built form? Object? Space? How do we think about architecture as we move around, within, and through it? What can architecture tell us not only about material, design, and engineering, but also about the individuals, groups, and communities who make it? These inquiries provide the starting points for thinking about what architecture means as concept, space, and practice, and how it affects the ways in which human beings experience the world. As the primary mode through which we organize our lived reality, architecture not only channels human behavior into specific repertoires of action and reaction but also symbolizes beliefs, value systems, and ideas about the self, gender, nation, race/ethnicity, community, life, death, and the transcendent. Such themes, thus, constitute the critical lenses that students will use over the course of the semester to unpack how structural form has and continues to define the human condition in the broadest sense. Drawing from a variety of texts and examples that emphasize the diversity and complexity of architectonic traditions around the world, this course will analyze how individuals have employed architectural strategies to solve the problems of living within diverse contexts and how such spaces not only provide meaning in everyday life but also actively and dynamically order the world as space, object, environment, text, process, and symbol.

Class Format: This course has 2 components: lectures and conferences / discussion sections. Students will be expected to attend two lectures and one conference / discussion section weekly. Students will sign up separately for the lecture component and the conference / discussion section component.

Requirements/Evaluation: Written evaluative measures: 6 - 8 object lab assignments and / or written responses to class prompts, and 6 in-class quizzes. Other evaluative measures: conference / discussion section participation and attendance.

Prerequisites: none

Enrollment Limit: 45

Enrollment Preferences: This course has a running waitlist. Students waitlisted from past semesters will have enrollment priority, followed by art history majors, and then first-year students.

Expected Class Size: 45

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills DPE requirements in two ways. First, it unsettles established presuppositions, biases, and predispositions that have positioned the "West" as "best" in canons of architectural history. Secondly, it explores how architecture - past and present - communicates, supports, and/or resists hierarchies of power and socio-political influence in society by acting as modes of propaganda, tools of imperialism, sites of resistance, and/or spaces of affirmation.
ARTh 107  (F)  Arts of Ancestral Native and Indigenous North America

Cross-listings: AMST 107

Primary Cross-listing

This course introduces students to the art and architecture of ancestral Indigenous and Native North America. It will consider the artistic productions of several pre-contact and early colonial cultures that emerged in the regions now referred to as Mesoamerica, the "United States," and "Canada."

Cultures to be addressed include Olmec, Maya, Teotihuacan, Zapotec, Mexico (Aztec), Chaco, Mississippian, Inuit, and Native Hawaiian, among others. Students will learn not only about these cultures but also the sources and methods by which present-day scholars have come to know of their complexity. Artforms to be addressed will include ceramics, murals, sculpture, inscriptions, feather work, shell work, sacred architecture, residential architecture, and urbanism. This is one half of a two-course sequence that also includes, "Arts of Ancestral Native and Indigenous South America and the Caribbean," (Spring 2024) and may be taken in any order or independently.

Requirements/Evaluation: Weekly readings (50 pages); Regular attendance at lectures (20%); Four 2-page artwork analysis essays due at regular intervals throughout the semester (40%); One 6-8-page final essay on a thematic topic of the student's choice (40%).

Prerequisites: None

Enrollment Limit: 45

Enrollment Preferences: Art History majors and first year students

ARTh 108  (S)  Arts of Ancestral Native and Indigenous South America and the Caribbean

Cross-listings: AMST 108

Primary Cross-listing

This course introduces students to the art and architecture of ancestral Indigenous and Native South America. It will consider the artistic productions of several pre-contact and early colonial cultures that emerged in the Andes, Amazonia, the Southern Cone, and the Caribbean. Cultures to be addressed include Chavín, Nazca, Moche, Tiwanaku, Inca, Casarabe, Tupi-Guarani, Coce, Taino, and Mapuche, among others. Students will learn not only about these cultures but also the sources and methods by which present-day scholars have come to know of their complexity. Artforms to be addressed will include ceramics, murals, sculpture, khipu, tocapu, feather work, shell work, sacred architecture, residential architecture, and settlement. This is one half of a two-course sequence that also includes, "Arts of Ancestral Native and Indigenous North America," and may be taken in any order or independently.

Requirements/Evaluation: Weekly readings (50 pages); Regular attendance at lectures (20%); Four 2-page artwork analysis essays due at regular intervals throughout the semester (40%); One 6-8-page final essay on a thematic topic of the student's choice (40%).

Prerequisites: None

Enrollment Limit: 45

Enrollment Preferences: Art majors and first year students.

ARTH 201 (F) Latinx Visual Arts
Cross-listings: AMST 209 / LATS 205
Secondary Cross-listing

This course introduces students to Latinx visual arts and the histories of the communities from where this artistic production emerges. Latinx art and artists have gained significant attention and inclusion in the art world. For example, the opening of the Cheech Marin Center for Chicano Art and Culture rekindled interest in Chicana/o art and revamped pressure on peer institutions to diversify their collections, exhibitions, and programming. While this renewed interest is positive, this context runs the risk of framing Latinx art as a new and an emergent category, thus dismissing a longer history of visual arts within Latinx communities across the U.S. This course offers an historically grounded introduction to Latinx visual art by placing the artistic production for the groups included under the label “Latinx” in their social, political and historical contexts. The course provides students with the visual arts vocabulary and theoretical skills to analyze visual art forms including sculptures, murals, posters, performances, and altares, while exploring their relevance to Latinx communities and American art. In debunking the notion of Latinx art as a new phenomenon, students will understand the conditions, struggles, and modes of resistance that inspire Latinx visual arts production in the U.S. since the 19th century and into our contemporary moment. Students will deepen their visual art literacy, enrich their understanding of the histories encapsulated by the term “Latinx,” and develop their appreciation for the visual arts.

Requirements/Evaluation: Discussion participation, weekly reading responses, two 3-6-page essays, and a final 8-10 page paper.
Prerequisites: None
Enrollment Limit: 25
Enrollment Preferences: Latina/o Studies concentrators and Art majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

ARTH 202 (F) Theories of Performance and Performativity

Performance Studies is an interdisciplinary field that focuses on the importance of the body and embodied practices in culture and in everyday life. In this course, we will learn the fundamental terms and theories in the field, and engage seminal artworks in the genre of performance art. Together, we will study artistic genealogies, analyze specific contemporary artworks, and center performance as a mode of analysis to engage the themes of identity, embodiment, self/other, memory, temporality, and systems of power. We will ask: What does performance do? How is performance art distinct from other creative modes of expression? What are the social, cultural, and political implications of using the body as material? This course will explore performance as an theoretical tool to understand everyday life and embodied practices, and as a creative mode of expression, critique, and world-building. Our readings will draw from feminist and queer theory, critical race theory, and disability studies, while centering various key strategies from contemporary performance art practices, including drag, camp, endurance-based works, re-enactment, performing for the camera, and collaboration. Class sessions will privilege group discussion.
ARTh 204 (F) Historical Research in Dance and Performance Studies

Cross-listings: DANC 103

Secondary Cross-listing

This course is an introduction to the analysis of historical and socio-political context of movement-based performances. While readings and viewings will focus on dance genres practiced at Williams and beyond, an important element of the course will be the practice of documenting, interpreting, and writing about performances. The course will enable students interested in dance, theater, and visual arts to hone their skills in the practice of analyzing still and moving images, while also offering students of history and art history the opportunity to develop competency in historical research. This is primarily a discussion-based seminar course. Learning objectives: to understand the social and political contexts for various artistic and performative genres; to develop the ability to document, analyze, and write about dance as a socio-historical practice; to explore interdisciplinary modes of engaging with movement-based performances.

Requirements/Evaluation: short weekly responses and in-class writing assignments, participation in discussions and presentations, two 5-6 page essays, one 6-7 page final essay
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: first-years and sophomores
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

ARTh 206 (S) What is Islamic Art? (DPE) (WS)

Cross-listings: REL 204

Primary Cross-listing

Through a deep engagement with primary sources--visual, performative and textual--this tutorial introduces students to global cultures that have participated in the production of Islamic art and culture through the centuries. Through a diverse set of readings, we will discuss how Islamic art is viewed today. How did, for instance, Colonialism and Orientalism from the 18th to the 20th centuries create an entrenched narrative for the study of the field, that continues to hold sway to this day? How have Muslim cultures defined their own artistic production? In particular, how can specific artworks, such as figural painting or palace architecture, be understood as "Islamic"? What are some key scholarly debates around the term "Islamic Art"? The tutorial is specifically designed keeping in mind the period of soul-searching the field is currently going through, even to the point of questioning the very term "Islamic art" and its epistemological parameters. By familiarizing students to an important discipline in art history, the aim of
the tutorial is to provide alternate methodologies as well as epistemologies that run parallel to more mainstream or familiar avenues of study.

**Requirements/Evaluation:** focused bi-monthly writing assignments, 5-7 pages in length, and bi-monthly peer response papers, 2 pages in length.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Art History majors and seniors, Religion majors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**ARTH 206(D1) REL 204(D2)**

**Writing Skills Notes:** This tutorial helps students develop writing skills in terms of grammar, structure, and organization. It is designed to teach students how to make clear, well-articulated arguments. Students will receive extensive feedback every other week on their writing assignments from the instructor and their peers. There will also be a comprehensive mid-semester review from the instructor.

**Difference, Power, and Equity Notes:** In addition to introducing students to an important field of art history, the tutorial analyzes how Islamic art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. The course will encourage students to challenge longstanding biases and assumptions when studying these artworks.

Not offered current academic year

**ARTH 208 (S) Chinese Painting**

**Cross-listings:** ASIA 206

**Primary Cross-listing**

This course surveys the Chinese painting tradition, from the second half of the first millennium BCE to the present. Following a dynastic timeline, the course covers important painting genres including funerary, religious, figures and portraiture, landscape, ink, bird-and-flower, and oil painting and considers them in relation to the shifting historical and cultural context of China. Key themes of the course include the relationship between the art of painting and religious beliefs, political ideology, self-expression, premodern painting theories and criticism, and encounters between the East and the West. As is the case with other cultures, the art of painting in China is shaped by both the painter and its time. In addition to an overview of the history of Chinese painting, students will develop skills in visually analyzing the style, the composition, and the brushstrokes of various painting genres, while gaining an understanding of how painting responded to different historical and cultural conditions in China. The course also pays special attention to primary sources on painting, through which students will learn to think about Chinese painting in its original artistic and intellectual context.

**Class Format:** A painting viewing session at the Williams College Museum of Art.

**Requirements/Evaluation:** Attendance and participation (20%), ungraded painting responses (due before every session, 20%), a short paper (4-6 pages, double-spaced, 15%), a mid-term exam (15%), and a final research paper with presentation (8-10 pages, double-spaced, 30%).

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Art history majors are prioritized if the course over-enrolls.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**ARTH 209 (S) The Art and Archeology of Maya Civilization**
The ancient Maya civilization was one of the most sophisticated and complex cultures of prehispanic Central America. Its complex calendrics, astronomy, mathematics, art and hieroglyphic writing system are celebrated worldwide. The course will examine the trajectory and nature of ancient Maya civilization from the combined perspectives of archaeology and art history. The origins and evolution of the Maya states during the Preclassic period (1000 B.C.-A.D. 250) will be explored through the rich archaeological remains and Preclassic art styles. The Classic Maya civilization (A.D. 250-1000) will then be presented through a detailed survey of the archaeology, art and hieroglyphic texts of this period. Finally, the collapse of Classic Maya civilization and its transformation and endurance during the Postclassic period and under early Spanish rule (A.D. 1000-1600) will be critically evaluated through a review of the archaeological, iconographic, and ethnohistorical evidence.

Class Format: lecture/discussion
Requirements/Evaluation: midterm and final exams, hieroglyphic project, 15pp research paper
Prerequisites: none, but an introductory ARTH or ANTH course recommended
Enrollment Limit: none
Enrollment Preferences: Anthropology/Sociology and Art History majors

ARTH 210 (S) Intro to Latin American and Latinx Art: Contradictions & Continuities, Postcolonial to the Present (DPE)
This course introduces students to the breadth and richness of the visual arts in Latin American and U.S. Latinx art. The course begins in the late 19th and early 20th centuries, when artists and writers first began formulating the notion of an art "native" to Latin America, and continues through the ever-expanding cultural expressions developed throughout the 20th and 21st centuries. Through a contextual approach, we will pay particular attention to Latin American artists' shifting relationships to race, class, and gender issues, their affiliations with political and revolutionary ideals, and their critical stance vis-à-vis the European avant-gardes. Similarly, we will analyze the emergence and development of Latinx artistic practices in the postwar U.S., tracing these artists' own exploration of race, class, and gender dynamics. This class introduces Latin American and Latinx artistic practices and scholarship to enable students to develop a critical understanding of the historical specificity of diverse movements, their relation to canonical definitions of modern and contemporary art, and their relevance to issues of colonialism, nationalism, revolutionary politics, and globalization. We will consider a vast array of genres--from painting and sculpture to printmaking, photography, conceptual, installation, and performance art--and will draw from artist statements, manifests, and secondary interpretive texts to consider both the impetus behind these dynamic artworks and their lasting legacies.
Requirements/Evaluation: midterm exam and non-cumulative final exam, short writing assignments, attendance, and active participation
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: if overenrolled, waitlisted students will be selected on a lottery
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)
Difference, Power, and Equity Notes: This course fulfills DPE requirements through historical, visual, and thematic analyses that explore the cultural biases and geopolitical forces that have restricted the exposure of Latin American and Latinx art in the canon of Western art history. The course also centers on contextualizing Latin American and Latinx artistic practices and analyzing them in relation to race, gender, and class dynamics, and to issues of colonialism, nationalism, revolutionary politics, and globalization.

ARTH 211  (S)  Art and Experience in Ancient Rome

Cross-listings: CLAS 210

Secondary Cross-listing

To see and be seen--it could be argued that this was the very definition of Roman culture. Much like today, spectacle and the dissemination of images lay at the heart of political and social life. The visual arts were crucial both to how the Romans rehearsed their identity and goals as a community, and to how individual Romans communicated their achievements and values. In this course, lectures on the art and architecture of ancient Rome (ca. 300 B.C.-A.D. 400) will provide the backdrop for an investigation into the role visual culture played in the lives of all Romans, including slaves and former slaves, women and children. Special topics will include the funeral and funerary portraiture; the military triumph and monuments of victory; the house as a site of memory; the use of images on coins; participation in religious celebrations; displays of war booty and prisoners of war; experience and audience at the racetrack and in the amphitheater; the spectacle of food and dining; and the Roman street as both contested space and a place for art. Readings will include a combination of primary and secondary sources. All readings are in translation.

Requirements/Evaluation: attendance and preparation, quizzes/short writing assignments, two exams, and a final project

ARTH 212  (F)  Distant Encounters: East Meets West in the Art of the European Middle Ages  (WS)

Cross-listings: ARAB 212 / REL 210

Primary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in what they called the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey), the place of Christ's life, death, and believed resurrection. Large numbers of pilgrims even made the long journey to the Holy Land, and especially to Jerusalem, to visit a range of sacred sites related to Christ and his saints. When these sites became less accessible with the spread of Islam in the seventh century -- and even before this time -- Europeans sought to recreate many of them at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Through all of these centuries, moreover, the Christian, Greek-speaking empire of Byzantium, focused on its great capital of Constantinople (present-day Istanbul), interacted in myriad ways, both friendly and hostile, with the Latin-speaking polities of Western Europe, focused at least symbolically on their ancient capital of Rome. Together, by way of open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation: participation in discussion; five 4-5-page papers; five 1-2-page papers; and one 6-8-page final paper

Prerequisites: none

ARTH 213 (F) The Human Figure in the Ancient Mediterranean

Cross-listings: CLAS 213

Primary Cross-listing

From the earliest representations in the third millennium BCE until the end of the Roman period in the fifth century CE the human body remained the foremost choice of subject for artists, patrons, critics, and the public in the ancient Mediterranean world. This course will consider cultural ideas about the body in antiquity, and trace their repercussions in the modern era. Over the course of the semester we will concentrate on 12 case studies, each representing a specific concept from an area of the Mediterranean. Topics include the "shining bodies" of bare-chested potentates in Egypt and the ancient Near East, statues that give the dead voice, the perfection and humanity of the bodies of the gods, ancient Greek science and the nude goddess, the pathos of Hellenistic athletes, and the interpretative challenge of the ambiguous and sensuous marble forms of the Barberini Faun or the Sleeping Hermaphrodite, both found in Roman contexts. We'll consider the cross-influences of ideas about gender, class, race and the body coded in public and private art. Reading material will include ancient literature in translation as well as contemporary critical essays. Evaluation will be based on participation in discussion and group presentations, short response paper, tests on images, and a final 8-page research paper. Engaged library research of original paper topics will be supported throughout the semester.

Class Format: Lecture and Discussion

Requirements/Evaluation: participation in discussion and group presentations, short response paper, tests on images, a final 8-page research paper.

Prerequisites: none

ARTH 215 (F) Envisioning the Sacred: Representation and Religion in Christian and Muslim Cultures (WS)

Cross-listings: ASIA 212 / REL 211

Primary Cross-listing

How did medieval Christians and pre-modern Muslims imagine the sacred and how did they give what they imagined pictorial form? How were these
pictures used, both in public and in private life, and why? How did the art of these unique religious traditions forge connections between the visible and invisible worlds? Paying particular attention to the function and experience of works of art within Christian and Islamic cultures, this seminar examines the evolution of devotional visual expression, while also exploring the problems sacred images generated in these distinct yet often overlapping traditions. Through readings and class discussion, the course will investigate, among other topics: the varied attitudes toward the representability of God in Judaism, Islam, and Christianity; the impact of earlier image traditions on the religious art of medieval Christians and pre-modern Muslims; the cult of the devotional image, concerns over idolatry, and the destruction of images; ideas about spiritual versus physical vision and their influence on the making and viewing of pictures; the relationship of sacred images to relics and to various aspects of organized ritual; and the possible roles played by pictures of the sacred in silencing or giving voice to dissent.

Requirements/Evaluation: Participation in class discussion; oral presentation; five 3-4-page papers, and a final 6-page paper

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Sophomores then juniors, but open to all

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 216 (S) Modernism, Anti-modernism, and the Avant-garde, 1900-1950

This course is designed to introduce students to the key artistic movements and aesthetic debates in the first half of the Twentieth Century in Europe, the U.S.S.R., Mexico, and the United States. We will trace the rise of Modernism and Anti-modernism and investigate the concept of the avant-garde. We will situate the crucial artistic movements of the period—from Fauvism to Futurism, Cubism to Constructivism, Social Realism to Surrealism, Art Deco to Dada, the Harlem Renaissance to the Bauhaus—within the social, political, economic and historical contexts in which they arose. Particular attention will be paid to how the work of women artists contributed to the aesthetic and philosophical motivations that shaped the avant-garde.

Requirements/Evaluation: Attendance, active participation, short writing assignments, regular quizzes, oral presentations.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: Art history majors and prospective majors

ARTH 218 (F) From the Battlefield to the Hermit’s Cell: Art and Experience in Norman Europe (WS)

Cross-listings: WGSS 284 / REL 284

Primary Cross-listing

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages:
the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans—a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries—each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects—an embroidery, a building, and a book—give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.

Requirements/Evaluation: Participation in discussion; five 4-5-page tutorial papers; five 1-2-page response papers.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: First years and sophomores, but open to all.

ARTH 221 (S) History of Photography

Cross-listings: STS 221

Primary Cross-listing

This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium’s emergence and acceptance as a fine art. We will also explore photography’s physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to “the real.” By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.

Requirements/Evaluation: three to four short papers, quizzes, virtual exhibition

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: art history majors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

ARTH 222 (F) Photography in/of the Middle East (DPE)

Cross-listings: ARAB 222

Primary Cross-listing

Photography has been globally disseminated and locally inflected since its invention. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic and art historical appreciation even as they grant visual access to the social and political dynamics operative in diverse cultural contexts. We will explore photographic practices in various zones of the Middle East--e.g., the Holy Land, Turkey, Egypt and the Persian sphere--by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the agency and power of images more generally--what work do photographs do? Who resists and who benefits? The goal will be to appreciate diverse styles and perspectives that underlie renderings of the Middle East.

Class Format: Discussion and GLOW posts required.

Requirements/Evaluation: Discussion, GLOW Posts, final project

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Majors

Expected Class Size: 15

Grading: Yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: Photographs are tricky. Whose experiences and values do they really represent--those who are depicted? Those who wield the camera? Or, those who view images that are so easily reproduced and widely shared? How does identity figure? Religious conviction? Political affiliation? And how are these variables encoded in the material evidence? Appreciating the myriad powers of images requires multiple skills--from close-looking to interdisciplinary analysis--useful in contemporary visual culture.

ARTH 223 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: ENGL 356 / AFR 323 / AMST 323 / COMP 322

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as the late Congressman John Lewis' March and Ebony Flowers' Hot Comb, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one's visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art's Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. This class may feature Object
Lab participation, film screenings, and collaborations with guest speakers.

**Requirements/Evaluation:** class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story)

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken AFR 200, the department's introductory course.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** this course is part of the Gaudino Danger Initiative

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

**ARTH 225 (F) Art and Archaeology in Early China**

This course offers a survey of art and architecture in China from the beginning of civilization to the end of the Han dynasty (206 BCE-220 CE). Students are introduced to important artworks in ceramics, bronze, lacquer, jade, and built spaces including royal palaces, mausoleums, and ritual monuments, while learning to think about them in their archaeological context. Special attention is paid to the relationship between artistic innovations and the rise of new materials and craft technologies, such as glass and fire gilding.

**Class Format:** Fieldtrips to museums and conservation labs, possibly the Harvard Art Museums or the Williamstown Art Conservation Center, pending planning and approval.

**Requirements/Evaluation:** In addition to attendance and participation, students will be graded on two short papers (4-6 pages, double-spaced), a final research paper (min 12 pages, doublespaced) or a creative project in consultation with the instructor, and a final presentation (15 mins).

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Majors are prioritized if the course overenrolls.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** ARTH pre-1800

Not offered current academic year

**ARTH 229 (F) The Art of Natural History** (WS)

**Cross-listings:** STS 226

**Primary Cross-listing**

The scientific revolutions of the eighteenth and nineteenth centuries fundamentally changed the way the natural world was seen and celebrated, classified and organized, displayed and manipulated. New discoveries in the natural sciences and competing theories of evolution intertwined with shifting conceptions of natural history, of nature, and of humankind's proper place within it. This course will investigate the links between art and natural science. It will seek to understand the crucial role of the visual arts and visual culture in the study and staging of natural history from the eighteenth century to the present. We will pursue the questions that preoccupied the artists themselves. How should an artist react to new ecological insights? What is the proper artistic response to newly discovered flora and fauna? What is the role of aesthetics in the communication of knowledge?
How are those aesthetics connected to ethics? How might a drawing of a plant convey information that is different from that of a photograph or a glass model of a plant? How might a theatrical diorama frame a scientific idea in a way that is different from a bronze statue? Students will seek to understand the myriad connections between seeing, depicting, and knowing, to question long-held assumptions about the division between "objective" science and "subjective" art, and to recognize that art has the ability not only to interpret, disseminate, and display scientific knowledge, but to create it as well.

Requirements/Evaluation: Five 5 page essays, five 1-2 page responses to partner's essays, critical conversation.

Prerequisites: None.

Enrollment Limit: 8

Enrollment Preferences: Sophomores with an interest in art history, art studio, ecology, environmental studies, and science and technology studies, juniors with these same interests, then art history majors, and science and technology majors, in that order.

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $150 Lab and materials fees for all classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 226(D2) ARTH 229(D1)

Writing Skills Notes: This course will require students to write a short paper or a critical response to their partner's paper each week. Students will receive critical feedback on both form and content from their professor and from their peers.

Attributes: ARTH post-1800

Not offered current academic year
the historical, ideological, and artistic forces behind this period of renovation and restoration that reshaped the urban and artistic fabric of the city. We will study the particularly Roman foundations for the period known as the High Renaissance, then, approaching art historical touchstones by Michelangelo, Raphael, and Bramante as works grounded in a uniquely Roman sense of time and historical destiny. We will conclude with a selective look at Baroque works by Caravaggio, Bernini and Borromini, exploring their powerful innovations and effects as a continuation of the Renaissance renewal of the eternal city.

Class Format: lecture

Requirements/Evaluation: Robust Community Discussions; 4-5 page visual and contextual analysis paper; 10-12 page research paper with multiple components (including prospectus, annotated bibliography, presentation); Google Earth Mapping Journal of Rome; Weekly Wellness

Prerequisites: none; open to Art majors as well as non-majors

Enrollment Limit: 15

Enrollment Preferences: Art majors current or prospective, and students following other majors with specific curricular interest in Roman history

ARTH 234 (S) Arts of Tibet -- Sacred Abode of the Himalayas

Cross-listings: ASIA 234

Primary Cross-listing

This course surveys the art and culture of Tibet from the time of the introduction of Buddhism in the seventh century to the modern period. Traditionally understood as the divine abode of Avalokitesvara, the bodhisattva who embodies the compassion of all buddha in Buddhist cosmology, Tibet was also fantasized as the immortal realm of "Shangri-la" by western interpreters. In this course, we will begin by examining the imagination and representation of Tibet and its culture in modern western discourses, and then shift the focus to the development of artistic forms of Tibet in the context of Tibet's history and religious movements, from ancient times to the present.

Class Format: A viewing session at museums, possibly at the Williams College Museum of Art, the MFA Boston, or the MET, pending planning and approval.

Requirements/Evaluation: In addition to attendance and participation, students will be graded on two ungraded quizzes, one movie response (1-2 pages, double-spaced), one midterm, and one final project (curating a mock exhibition or a 10-page double-spaced research paper along with a prospectus and a presentation).

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: Majors and concentrations are prioritized if the course overenrolls.

Expected Class Size: 15

ARTH 235 (F) Taswirkhana: Technique and Practice of Indian Drawing and Painting (DPE)

Cross-listings: ASIA 239 / ARTS 244

Secondary Cross-listing

Small in scale but vast in its representation, the world of Indian painting is famous for its stylized naturalism and mastery of line. It is an artistic practice whose legacy stretches back to at least the first century CE. This studio course will introduce students to the technique and practice of traditional
Indian drawing and painting. The course is designed as a workshop in which students will learn to use materials and techniques of this art form. By engaging with a non-western traditional practice, the aim of the course is to expose students to a pluralistic engagement with art making. Students will learn paper and pigment preparation, as well as the basics of traditional drawing and painting techniques. The class will learn from studying a selection of original masterworks of Indian art from the Williams College Museum of Art that will be displayed in the Object Lab. Working with original artworks will help students situate the hands-on study of Indian painting practice alongside exemplary historical examples.

Requirements/Evaluation: Class participation, discussions and critiques, successful completion of all assignments and attendance

Prerequisites: none, open to all students

Enrollment Limit: 12

Enrollment Preferences: Instructor permissions requires. If the course over enrolls preference will be given to studio art and art history majors.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $400

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 239(D1) ARTH 235(D1) ARTS 244(D1)

Difference, Power, and Equity Notes: The course invites students to engage with a pluralistic studio practice that is in stark contrast to mainstream modern and contemporary art practices. The course will follow a traditional, Indian workshop-style format which has its own particular rules and unique visual vocabulary. From the material preparation of pigments, paper and brushes, to the techniques of drawing and painting, the course will introduce students to an alternative, non-Western, mode of art making.

Fall 2024
STU Section: 01  MR 1:10 pm - 2:25 pm  Murad K. Mumtaz

ARTH 242  (F)  Art and Enlightenment in Europe

Cross-listings:

Primary Cross-listing

This lecture course traces the emergence of new modes of art- and image-making during two momentous centuries of European history that established the paradoxical foundations of our modern world. In this period, modern democracy was founded and determined by exploitative labor, the extraction of natural resources, and the rise of the trans-Atlantic slave trade. Over two centuries from the founding of the French Academy in 1648 to the 1839 invention of photography, this course traces these tensions in art and intellectual thought, examining beauty and the sublime, rationality and madness, personhood and enslavement, natural history and extraction, democracy and tyranny. Often defined in terms of the "Enlightenment," this intellectual and artistic period engaged with freedom of religious thought, scientific experiment, and a belief that humanity was guided by reason and rationality. Yet these same discourses also laid the foundation for the invention of race, nationalism, and the expansion of European colonialism.

Isolating a series of pivotal moments and emblematic figures in visual culture of this period, this course asks students to consider how art was implicated in Enlightenment, and, in turn, how Enlightenment was implicated in both newly liberatory and newly oppressive concepts of subjectivity and personhood. Particular emphasis will be placed on the history of science, and, relatedly, on the increasing global circulation of ideas, people, and goods. Artists in our purview include well-known figures like Velázquez, Rembrandt, Watteau, Hogarth, Goya, and Blake, as well as makers until recently left out of the art-historical canon, such as the Frankfurt-born botanical illustrator Maria Sibylla Merian, the Polynesian navigator and draftsman Tupaia, and the Guadeloupean neoclassical painter Guillaume Guillon-Lethière, the subject of a major upcoming exhibition at the Clark Art Institute. Designed for students with no prior experience studying art history, the course will work directly from objects in local collections, prioritizing methods of close looking and formal analysis. At the same time, the questions and methods of our inquiry will be fundamentally interdisciplinary. Readings will emphasize primary sources and recent scholarship. A separate discussion section will be offered for MA students.

Requirements/Evaluation: midterm exam; final exam; visual analysis paper (3 pages); final paper (10 pages)

Prerequisites: none

Enrollment Limit: 50

Enrollment Preferences: art history majors

Expected Class Size: 50

Grading: yes pass/fail option, yes fifth course option
ARTH 245  (S)  The Nature of Work

Cross-listings:  COMP 285 / CLAS 243

Secondary Cross-listing

Work is something that touches the lived experience and historical realities of almost every human being in every time and place. But how did ancient Mediterranean societies and cultures define and deploy the concepts of "work" and "working," as both an activity and as discourse? This is a question that has received remarkably little attention, in part since modern scholars have all too often followed the lead of elite authors, who obscure the nature of work through their focus on its products: agricultural prosperity, material luxury, urban grandeur, etc. In this course, we will seek to shed light on the world of work in antiquity, to better understand both the experiences of those who worked for a living across an array of spheres and professions, and the value of work as a cultural, aesthetic, and literary concept. Special topics will include: the place of work in conceptions of a "golden age"; the literary topoi of work (like the idle shepherd or the virtuous peasant); representations of "heroic work" (most famously, the Labors of Hercules); the elision or erasure of non-elite labor for elite audiences in art and text; the iconography of work in painting, mosaic, and sculpture; and investigations into specific trades, crafts, and other forms of "making" (from midwifery to shoe making). Readings will be a combination of primary and secondary sources. All readings will be in translation.

Requirements/Evaluation:  class participation; several short writing assignments; final paper

Prerequisites:  none

Enrollment Limit:  24

Enrollment Preferences:  Classics majors, Art History majors, Comp Lit majors, and intending majors

Expected Class Size:  20

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)

Not offered current academic year

ARTH 246  (S)  Museum Culture: Do you see what I see?!

Cross-listings:  none

Secondary Cross-listing

We are all citizens of global visual culture, subject to a daily assault of images, artifacts, information and experiences. What we see and how we make meaning from it all depends on so many variables--who we are, where we are, and what we choose to look at. A critical question is how art figures and what agency it wields in millennial settings. This class is an opportunity to explore these issues with particular reference to museums and the objects enshrined therein. Digitized collections enable us to wander freely in space and time, following ideas/images through history even as we might also engage the 'real thing' in person. Our approach will be comparative and interrogative; case studies might range from an oil painting to a wooden sculpture, a coin to an illuminated manuscript, a photograph to a video. Along the way, we will consider what "art" really is and how different visual cultures might be presented or distorted in museum exhibitions and public spaces.

Requirements/Evaluation:  Mandatory class attendance and substantive participation, weekly Glow Posts, curatorial term project.

Prerequisites:  none

Enrollment Limit:  12

Enrollment Preferences:  Sophomores and majors.

Expected Class Size:  12

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D1) (DPE)

Differences, Power, and Equity Notes:  We will cover museums in diverse cultures and explore the porous boundaries between the "Orient", Europe
and America. How art manifests inequalities of power and how museums privilege or erase particular groups of people will be addressed. Because collecting art entails money and privilege, understanding art history entails exploring social and cultural hierarchies.

Attributes: ARTH post-1800

Not offered current academic year

ARTH 248 (S) Revolutions in Art 1750-1850

This lecture course will focus on the dynamics of art, culture, and experience in Europe from the later eighteenth century to the middle of the nineteenth century. Spanning such conflicts as the French Revolution of 1789, Napoleonic occupations, and imperial wars, this period of dramatic intellectual and social change ushered in a revolution in art in turn, keyed to new conceptions of subjectivity, freedom, and human experience. How did painting and sculpture of this period convey, wrestle with and embody these crises? We will examine the work of leading artists in depth, particularly as revolutions in art helped explore new accounts of the modern subject, both the interior self and that self in the public sphere. Additionally, we will discuss the ways in which these works have been in art-historical writing into the present.

Class Format: A third of our class time will be devoted to discussion. This course may require students to visit WCMA, Special Collections, and the Clark.

Requirements/Evaluation: Attendance, participation, two essays (4-5 pages double spaced), midterm examination, final examination.

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: sophomores, juniors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ARTH pre-1800

Not offered current academic year

ARTH 262 (F) Modern Architecture

A century ago, the Modern Movement promised the most sweeping cultural transformation since the Renaissance. Architecture was only one lobe of a comprehensive movement that embraced literature and painting, music and theater, all aspiring to the same radical emancipation from traditional form and structures of authority. What happened? How and why did modern architecture abandon its utopian vision? Students will explore the major developments in Western architecture from 1900 to the present, and become familiar with its major figures: Loos, Wright, Gropius, Mies van der Rohe, Le Corbusier, Aalto, Kahn, Venturi, Gehry, Hadid, and others. Students will learn a variety of skills as they design a 1000-square foot vacation house and present it to the class in the form of a model and set of drawings at quarter-inch scale.

Requirements/Evaluation: two hour-long tests and a design project including drawings and a written statement

Prerequisites: none

Enrollment Limit: 50

Enrollment Preferences: juniors and sophomores

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Under $100

Distributions: (D1)

ARTH 264 (F) American Art and Architecture, 1600 to Present

Cross-listings: AMST 264
American art is often looked at as a provincial version of the real thing—i.e., European art—and found wanting. This course examines American architecture, painting, and sculpture on its own terms, in the light of the social, ideological and economic forces that shaped it. Special attention will be paid to such themes as the Puritan legacy and attitudes toward art; the making of art in a commercial society; and the tension between the ideal and the real in American works of art.

Requirements/Evaluation: 15-page research paper (divided into an annotated bibliography, first draft and revised draft); weekly study questions on the readings; final 15-minute oral exam

Enrollment Limit: 60

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

**ARTH 275 (S) Digital Humanities in Art History and Literary Studies**

**Cross-listings:** COMP 275

**Primary Cross-listing**

This course introduces students to critical topics, techniques, and methods related to digital scholarship in the humanities. Students will learn how to critique the reliability of published case studies that use digital methods, and how to construct basic projects that use digital techniques, including text analysis, digital mapping, 3d modeling & imaging, and data analysis with both quantitative and qualitative data sources. They will also explore different ways of sharing research through digital methods, including virtual storytelling and best practices of data communication. Digital Humanities in Art History and Literary Studies provides a foundation to encourage student exploration of digital projects in a variety of disciplines at Williams, whether students wish to incorporate digital methodologies into a humanities discipline or to understand the ways humanities materials require different approaches to data and digital projects in the sciences. While trying different tools and approaches, we will discuss the larger ramifications of using digital techniques in humanistic disciplines. What kinds of ethical questions should we consider? What sorts of environmental footprint or sustainability issues do our projects raise? What kinds of power structures do they create, reflect, sustain, or dismantle?

Requirements/Evaluation: Students are evaluated based on 1) preparation for and participation in class discussions and exercises, including assigned readings and project reviews; 2) completion of a digital portfolio that includes 6-8 assignments applying methods learned in class, with written analysis and responses to reflection prompts.

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: Junior majors in Division I receive preference, followed by juniors in other fields.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

LEC Section: 01  T 1:10 pm - 3:50 pm  Beth Fischer

**ARTH 284 (S) The Postwar Avant-Gardes**

Artistic discourse in the Western hemisphere dramatically changed course in the wake of the Second World War. The mass trauma inflicted by the war prompted artists and critics throughout the region to reassess the role and potential of art in society. But the war’s mass displacement of communities also displaced the centers for artistic activity, and avant-garde practices soon expanded vigorously throughout the Americas. Through comparative
studies, this course will analyze the artistic avant-gardes that emerged simultaneously in the United States and Latin America after 1945. We will place these myriad practices in dialogue, to elucidate the complexity, richness, and vitality of artistic practices in the postwar era.

Requirements/Evaluation: two exams, two short 2-page writing assignments, one 6- to 8-page research paper

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: If overenrolled, waitlisted students will be chosen on a lottery basis.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ARTH post-1800

Not offered current academic year

ARTH 289 (S) The Invention of Life Worlds

This course looks towards alternate and coexisting imaginaries of life worlds, examining their development in the arts and letters. With attention to visual and literary ethnography, science fiction, feminist theory, and creative non-fiction, we will contemplate methods of making and inventing in the contemporary world, focusing on the transhistorical and transcultural production of knowledge. Speculative forms of creative production and seminar discussion, as well as some of the most challenging ethical proposals for the future will guide our investigation of artworks, media, and literary production. Climate change, environmental justice, indigeneity, and multispecies interaction will resonate at the political center of this experimental seminar.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one 12-15 page paper

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Students planning to major in Art History, Art History and Studio Art majors, then any interested student

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ARTH 300 (F) Experimental Documentary Forms and the Archive (DPE)

This course will introduce students to contemporary lens and media-based practices that experiment with the traditional documentary narrative form and archival source materials. We will explore how artists and film-makers critique, expand, and reimagine documentary notions of objectivity, truth and authenticity, and creatively contaminate the form with fiction, self-reflection, performance, and abstraction. Through readings from the fields of visual art/criticism, film theory, and critical archival studies, as well as viewing films in class, we will explore complex debates related to the production of historical knowledge, the politics of the archive and archival practice, issues within documentary photography and film, and the creative possibilities of using traditional and non-traditional lens-based media in historical research. By bringing together a range of exploratory practices, such as strategies of docu-fiction, visual auto-ethnography, and collaboration, we will reflect on the archive and the source document not as a passive collection of material, but as an active and ongoing performance in the construction of historical narratives. This course will broaden student understanding of the history of experimental and alternative film and media practices, and will familiarize students with contemporary discourse on archival and documentary methodologies that aim to question processes of categorization and interpretation related to underrepresented histories and communities.

Requirements/Evaluation: Evaluation includes reading responses and journal entries, and an emphasis on class discussion and participation.

Prerequisites: There are no course pre-requisites. This class is open to majors and non-majors.

Enrollment Limit: 20

Enrollment Preferences: Preference for ARTH and ART majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)
Difference, Power, and Equity Notes: The curriculum includes U.S. based and international practices that explore the uneven power dynamics within representational strategies of documentation and historicization, and will center queer, anti-racist, and decolonial methodologies and theoretical analysis in relation to film and media.

Fall 2024
SEM Section: 01    T 1:10 pm - 3:50 pm    Shoghig M. Halajian

ARTH 301  (S) Methods of Art History  (WS)
This course on the methods and historiography of art history offers art-history majors an overview of the discipline. The course surveys influential definitions of the discipline, the evolving tasks it has set itself, and the methods it has developed for implementing and executing them. Works of art will inevitably enter into our discussions, but the main objects of study will be texts about art as well as texts about methods for an historical study of art. The course is designed to offer a pluralistic perspective on key theoretical and methodological approaches to art history. Readings will regularly compare the Western discipline with frameworks from other parallel cultures. Topics include: style and periodization; iconography, narratology, and phenomenology; the social functions of images and the social history of art; the materiality of art; race, gender, and sexuality; the global scope of art and art history.

Requirements/Evaluation: six 1,000-word analytical essays plus one 2,000-word writing project. Participation in class discussion. Attendance.

Prerequisites: any prior ARTH course (one or more 100-level ARTH course[s] recommended). In the absence of prior coursework in art history, permission of instructor is necessary for admission.

Enrollment Limit: 19

Enrollment Preferences: The course is limited to art-history and (with permission) art history/studio majors. If the course is over-enrolled, preference will be given to senior AH majors, then juniors. Second-year students intending to major in art may enroll with permission.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Unit Notes: Satisfies the ARTH 301 requirement for the art-history major. Will satisfy the methods/junior seminar requirement for the history/studio major, but students wishing to do so must have permission of instructor to enroll.

Distributions: (D1) (WS)

Writing Skills Notes: Students submit one 1,000-word essay every other week, for a total of six short essays. In addition, they submit a 2,000 writing project at the end of term. The purpose of the essays is to analyze the arguments and rhetoric of influential art-historical scholarship and criticism. The subject of the course, then, is how to write as an art historian. We discuss not only the content of the essays we read and write but also the form, both in class and in office hours.

Spring 2025
SEM Section: 01    MR 2:35 pm - 3:50 pm    Murad K. Mumtaz

ARTH 302  (F) Methodologies of Art History  (WS)
The purpose of this course is to trace the origin and development of key ideas that define the discipline of art history. They include the idea that art has a history, that style is unique to individuals but also definitive of entire periods or cultures, that interpretation should be contextual, that representation is fundamentally subjective, that art can be an instrument of power, that reception is as much a part of the history of art as production, among many others. This course begins with a series of texts from around 1900, which drew upon nineteenth-century fields such as cultural history, psychology of perception, and psychology of empathy, to articulate the first methodologies of art history. The course then considers the critiques of those methods that emerged in the middle twentieth century from the fields of iconology, marxism, feminism, structuralism, and ethnic studies, among others. The course concludes with a consideration of the current interest in a global history of art from perspectives such as anthropology, curation, phenomenology, aesthetics, new materialism, and “Bildwissenschaft.” In this way, it becomes possible to see that the history of art is not merely the sum total of information available throughout the world about art objects, but also a coherent tradition of methodological debate about what are the most effective and responsible ways of writing the history of art.

Requirements/Evaluation: Six 1,000-word analytical essays. Six short responses to the papers of other students. Participation in class discussion. Attendance.
Prerequisites: Two prior ARTH courses (100-level ARTH courses are ideal). In the absence of prior coursework in art history, permission of instructor is necessary for admission.

Enrollment Limit: 19

Enrollment Preferences: Art-history majors (seniors, then juniors). Then history and studio majors who need to complete the methods requirement. Then second-years intending to major in art history, but only by permission.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: Satisfies the requirement for methods of art history for the art-history major (i.e., it is the equivalent of ARTH 301). It will also satisfy the methods requirement for the history and studio major.

Distributions: (D1) (WS)

Writing Skills Notes: Students submit one 1,000-word essay every other week, for a total of six short essays. The purpose of the essays is to analyze the arguments and rhetoric of influential art-historical scholarship and criticism. The subject of the course, then, is how to write as an art historian. We discuss not only the content of the essays we read and write but also the form, both in class and in office hours.

Fall 2024

SEM Section: 01 TR 9:55 am - 11:10 am Guy M. Hedreen

ARTH 304  (S)  Indigenous American Urbanism: Teotihuacan and its Legacy in Comparative Perspective

This course offers students the opportunity to undertake close study of Teotihuacan, Mexico, (ca. 0-600 CE) the largest urban development of American antiquity as measured by spatial, and possibly also, population metrics. The first half of the semester involves an immersive look at the urbanism, architectural history, archaeology, and historiography of Teotihuacan, the present-day name of which means, "Where Men Become Gods," in the Mexico (Aztec) language of Nahuatl. The following four weeks of the course will consider those major Ancestral American polities with which Teotihuacan interacted, including Monte Alban, Oaxaca and Tikal, Guatemala, or upon which its legacy exerted influence, including Chichen Itza, Yucatan and Tenochtitlan, Mexico City. The final two weeks of the course will consider comparative settlement and architectural data from Indigenous North and South America. Topics to be addressed over the semester will include the role of space in forging complex ancient societies; criteria for the identification of cities through archaeological remains; definitions of "complexity;" economic inequity within and between city-states; and comparative settlement patterns.

Requirements/Evaluation: Weekly readings (80-100 pages); Participation -- regular attendance, contribution to in-class discussions, and demonstrated knowledge of readings (20%); Six 3-page thematic essays addressing topics of the student's choice (60%); Final presentation of research findings (20%).

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Priority given to art history majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ARTH 307  (F)  Contemporary methodologies in History and Practice

Cross-listings: ARTS 308

Primary Cross-listing

This course explores contemporary methodologies that traverse both collective research and artistic production, providing an overview of theoretical and practical frameworks in contemporary art through case studies, close reading, and interdisciplinary artistic projects. We will speculate on the role of the artist, the curator, and the critic as "host" in order to foreground how a care-centered and collective approach to knowledge production can run counter to existing power paradigms, such as patriarchy, colonialism, and capitalism. Building on existing exchanges between disciplines--from feminist thought, queer theory, disability studies, visual and media studies--this hybrid studio and critical theory course presents contemporary art as a field uniquely suited to imagine alternative structures of institutional support and mutual aid. Through engagement with critical and creative texts, as well as a series of making exercises, we will experiment with practices of care and resource-sharing through art production, and imagine how arts
practitioners can take a critical position that counters prevailing logics of individualism and enclosure.

Class Format: Studio

Requirements/Evaluation: Grade is evaluated based on class attendance and participation, completion of weekly readings and/or making exercises, and one final project that responds to course material and themes.

Prerequisites: At least one prior course in Art History or Studio Art, or permission of instructor.

Enrollment Limit: 15

Enrollment Preferences: History-and-Studio Majors get first priority, then regular Studio Majors and Art History Majors, then any interested student.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Under $500. Students on financial aid may utilize the book grant to defray any materials costs.

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 308(D1) ARTH 307(D1)

Attributes: ARTH post-1800

Not offered current academic year

ARTH 308 (S) African Art and the Western Museum (DPE) (WS)

Cross-listings: AFR 369

Primary Cross-listing

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the current digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. Further, students will explore how the dialogues created between objects, individuals, and space often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Requirements/Evaluation: Targeted bi-monthly writing assignments (3-5 pages in length) and bi-monthly peer response paper (1 page in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History and African Studies Majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 369(D2) ARTH 308(D1)

Writing Skills Notes: Targeted bi-monthly writing assignments (3-5 pages in length) and bi-monthly peer response paper (1 page in length). Students can expect to receive timely comments on their writing skills, with suggestions for improvement from the instructor.

Difference, Power, and Equity Notes: This course explores issues of agency, authenticity, and appropriation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students will analyze how the meaning of "African art" has been largely dictated by a Western museum culture and how this hegemony is currently being disrupted through strategic exhibition and display practices and narratives.

Not offered current academic year

ARTH 310 (S) An American Family and "Reality" Television (WS)

Cross-listings: WGSS 312
Primary Cross-listing

An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the An American Family series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

Requirements/Evaluation: class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: junior Art majors, followed by senior majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 310(D1) WGSS 312(D2)

Writing Skills Notes: There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ARTH 318 (S) Environmentalism in Experimental Media, Art and Politics, 1960s to Present

Over the semester we will address historical and contemporary debates on environmental politics from the critical perspective of artists, activists, and scholars from the 1960s to today. Organized thematically, this course addresses the aesthetics and politics of environmentalism alongside larger debates in the visual arts—including decolonial practices, globalization, conceptualism, collaboration and authorship, aesthetic reception, and the artistic transmission of ideas. We will place particular focus on lens-based and moving-image media practices with respect to the conceptualization of nature, as well as delve into the interrelation of materials and media in our greater cultural reckoning with climate change and environmental justice.

Experiential engagement in the forms of screenings, group assignments, and the creation of site-specific and creative works in all media will amplify our art and media historical study of environmental politics in the public sphere. Students will also conduct independent research and essay writing in order to analyze the way we interpret, engage, alter, and mediate the natural world.

Requirements/Evaluation: Bi-monthly response papers (2 pages); participation in class and online forums; one 6-8 page paper; and a final media documentation project with accompanying written concept (5-7 pages)

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Art History and Studio Art Majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ARTH post-1800

Not offered current academic year

ARTH 322 (S) Cold War Aesthetics in Latin America (DPE) (WS)

The Cold War was far more complex than a military conflict, with battles waged more in the symbolic than in the physical realm. The Cold War was therefore "everywhere and nowhere," as new superpowers maneuvered to maintain geopolitical balance. Through a transnational lens this course
considers the Cold War in Latin America as an aesthetic phenomenon with many facets, to recover how artistic practices unfolded myriad—and often conflicting—ideas regarding power, cultural influence, modernization, and revolution.

**Requirements/Evaluation:** Active participation, leading discussion, and five four-page writing assignments.

**Prerequisites:** One ARTH course.

**Enrollment Limit:** 12

**Enrollment Preferences:** If overenrolled, preference will be given to Art History majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** This course foregrounds writing and peer reviews to develop critical thinking. We will have five four-page writing assignments, spaced throughout the semester, which will incorporate our class discussions and research. Students will receive critical feedback on both form and content from their professor and from their peers.

**Difference, Power, and Equity Notes:** This course fulfills DPE requirements through historical and visual analyses that examine the contestations of power that defined the Cold War era and their ramifications in the shaping of notions such as modernism, modernization, progress, citizenship, and resistance. The course takes a transnational perspective to analyze diverse artistic practices in relation to race, gender, and class dynamics, and to issues of cultural imperialism, nationalism, revolutionary politics, and globalization.

**Attributes:** ARTH post-1800

**ARTH 324 (F) Japanese Art and Visual Culture: Private/Public/Pop (WS)**

**Cross-listings:** ASIA 324 / COMP 324

**Secondary Cross-listing**

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanô screen painting; nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

**Class Format:** Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

**Requirements/Evaluation:** For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

**Prerequisites:** No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one another.

**Enrollment Limit:** 10

**Enrollment Preferences:** Graduate Art students, followed by undergraduates majoring in Art History or Comparative Literature.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARTH 525(D1) ASIA 324(D1) ARTH 324(D1) COMP 324(D1)

**Writing Skills Notes:** Students will write several regularly spaced papers that build on one another by tackling similar problems from different angles. Students will receive detailed feedback from the instructor on each paper, addressing argument, organization, and style, as well as peer feedback.
ARTh 325 (S)  The Arts of the Book in Asia  (WS)

Cross-listings:  ASIA 325

Primary Cross-listing

From palm leaf manuscripts to scrolls to Islamic codices, books have long served as vehicles of religious, cultural and artistic exchange in Asia. Owing both to their portability and status as finely crafted art objects, books have transmitted ideas across the continent, spreading courtly styles of painting from China to India, esoteric Buddhist teachings from Kashmir to Tibet and Mongolia, as well as the Quranic arts of calligraphy and illumination from Islamic South Asia to Southeast Asia. This co-taught seminar will highlight the interwoven history of book arts as it developed and disseminated across different regions of Asia. The course will also introduce students to the major art forms of the book, such as painting, calligraphy and illumination. The aim of the seminar is to understand the book as object while also investigating its content and its larger cultural significance. A number of class meetings will take place in the Chapin Library, where students will have the opportunity to study original manuscripts from the Special Collections. The course will culminate in an exhibition at Chapin Library which the students will curate using the Special Collections holdings.

Requirements/Evaluation: 3 essays, a final project/paper based on museum objects, wall label

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: preference will be given to Art and Asian Studies Majors, and then to students of any major interested in the art and culture of Asia

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 325(D1)  ASIA 325(D1)

Writing Skills Notes: Over the course of the semester students will write three papers at five pages each, culminating in a well-developed, focused final project. Students will be given extensive feedback on each assignment regarding grammar, style, and argument. The final paper will be part of a larger project in which students will work together to curate a small exhibition using the Chapin Library's Asian holdings. Each student will be asked to write a wall label for their selected object.

SEM Section: 01  MW 11:00 am - 12:15 pm  Murad K. Mumtaz

ARTh 327 (F)  Acquiring Art: Selecting and Purchasing Objects For WCMA

Cross-listings:  ECON 227

Primary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation: Three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy for acquisition.

Prerequisites:  ECON 110 or permission of instructor
Enrollment Limit: 20

Enrollment Preferences: Senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 332 (S) Abstraction in Action: Global Modern and Contemporary Art  (WS)

Abstraction, be it gestural or geometrical, was a protagonist in the story of global modernisms and continues to be a powerful visual language in contemporary art. The term "abstraction" may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled formalist rupture, cultural co-optation, revolutionary politics, as well as racial, feminist, and queer critique. This object-oriented course will delve deeply into non-representation in global modern and contemporary art; we will supplement our careful study of artworks with primary documents, as well as with canonical theoretical frameworks and the reassessments that have sought to complicate these. This seminar is organized into two weekly sessions–a lecture and a discussion-to introduce key concepts and issues and to allow for ample group dialogue on these. Ultimately, the course seeks to revise and expand the cartographies and ontologies of abstraction in the 20th and 21st centuries. As such, it welcomes students with an interest in modern and contemporary art, yet does not require previous coursework in either.

Class Format: biweekly seminar, with one lecture session and one discussion session

Requirements/Evaluation: participation, weekly assignments, final 12- to 15-page paper written in stages throughout the semester

Prerequisites: must have previously taken one Art History course in any area

Enrollment Limit: 12

Enrollment Preferences: If overenrolled, preference will be given to Art History, Studio Art, and History + Studio majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will complete short written assignments and will prepare a final paper in three stages throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: ARTH post-1800

Not offered current academic year

ARTH 333 (S) Once More With Feeling: Reenactment in Contemporary Visual Culture  (WS)

Cross-listings: ARTS 330

Primary Cross-listing

The urge to relive the past is a fundamental human one, and artists have long drawn upon the ritualistic possibilities of reenactment as a way of interrogating time's uneasy returns and losses. In this course, we will study how artists working in a range of media deploy reenactment in collaboration with others, in order to ask what liberatory potential there might be in choosing to restage--and in many ways, relive--the past. This is a hybrid course with roughly 50% of the course dedicated to critical analysis and 50% studio practice. Case studies drawn from film, theater and other art forms will accompany scholarly readings and short writing assignments, and students will also devise their own reenactment experiments in order to access the embodied and experiential possibilities of the course topic.

Class Format: discussion and studio practice

Requirements/Evaluation: 2-3 written responses, 2-3 creative exercises, class participation, one 12-15-page paper OR one creative final project

Prerequisites: must have previously taken one Art History or Art Studio course in any area OR professor permission

Enrollment Limit: 14
Enrollment Preferences: majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: The cost of materials will vary depending on the individual student project(s). Students are responsible for the cost of the materials. Students on financial aid can utilize the Book Grant to cover these expenses.

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 333(D1) ARTS 330(D1)

Writing Skills Notes: There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: ARTH post-1800

Not offered current academic year

ARTH 337 (S) Visual Politics

Cross-listings: AMST 370 / PSCI 337

Secondary Cross-listing

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to the optical systems of military drones and contemporary forms of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, neuroscience, and STS. Possible authors include Arendt, Bal, Belting, Benjamin, Browne, Buck-Morss, Butler, Campt, Clark, Crary, Debord, Deleuze, Deleuze, Foucault, Freedberg, Hobbes, Kittler, Mercer, Mitchell, Mulvey, Plato, Rancière, Scott, Sexton, Starr, Virilio, Warburg, and Zeki.

Requirements/Evaluation: regular, engaged class participation, several Glow posts, and *either* three 7- to 8-page papers *or* one much longer paper.

Prerequisites: at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Political Science and Art History majors (including students in the grad program); then qualified students from all disciplines welcome, space permitting

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: PSCI Political Theory Courses

Not offered current academic year

ARTH 360 (F) The Gothic Cathedral: An Art History

Cross-listings: REL 360

Primary Cross-listing

Through their enormous scale, through the gravity-defying complexity of their construction, and through the sumptuousness of their materials and decoration, Gothic cathedrals -- the medieval equivalent of the blockbuster movie, and then some -- have amazed visitors for centuries. The
widespread social media reaction of shock and dismay to the fire at Notre Dame Cathedral in Paris four years ago, moreover, indicates that this power of the cathedral to dazzle and to capture hearts remains very much alive. But how have art historians, specifically, made sense of these extraordinary, and extraordinarily complex, monuments? And how have the questions they have asked about the cathedral changed over time? Through a close examination of a number of influential books, in particular -- each one of them a kind of miniature cathedral in its own right -- this 300-level seminar will investigate the shifting interpretation of the Gothic Cathedral over the past 150 years. In so doing, the seminar aims to shed light not only on the fascinating multiplicity of realities that make up the Gothic cathedral but also on the changing shape of the discipline of art history itself, from its beginnings to the early 2020s.

Requirements/Evaluation: participation in class discussion; 1 or 2 oral presentations; four 3-4-page papers, and a 6-8-page paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: art majors and sophomores, but open to all

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTh 361 (S) Latinx Sculpture Art: From Altares to Sonic Monuments

Cross-listings: LATS 360

Secondary Cross-listing

What constitutes Latinx sculpture? While the study of Latinx art has revolved around two dimensional art forms, this course tackles the question of three-dimensional art and examines the development of Latinx sculpture, its socio-political impact, and its aesthetic complexity. This interdisciplinary and hybrid course consists of studying Latinx sculpture art and how Latinx artists have engaged and rearticulated popular cultural traditions like altares, lowriders, and santería in their sculptural works by engaging varying disciplines. This course also includes a studio component. We will dissect the ways Latinx communities conceive of their identity, politics, and manifest resistance and belonging in the U.S. differently through the art form of sculpture, as we study artists like Amalia Mesa-Bains, Gilbert "Magu" Luján, Beatriz Cortez, Pepón Osorio, and Guadalupe Maravilla. Sculpture offers a new lens to expand our study of Latinx identity, politics, and aesthetics, via historical and contemporary theoretical frameworks in the disciplines of Latinx Studies, Chicana/o and Central American Studies, art history, museum studies, and urban studies. As a hybrid course with a studio component, students will also complete a term-long sculpture project, which will be accompanied by a research-based artist statement. In their research based artist statements, students will situate and contextualize their sculpture projects in relation to topics and aesthetic frameworks covered in the class.

Requirements/Evaluation: Class participation and on-going work on their final art project. Students will write two 5 page essays related to course material and one final 3 page research-based artist statement that will contextualize a final sculpture art project in relation to course content.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, especially those who have taken LATS 105 and/or Latinx Visual Arts, as well as Art majors, especially those who have taken some Latinx Studies courses.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Materials/Lab Fee: $150 for art materials

Attributes: LATS Core Electives

Spring 2025
ARTH 363  Space into Place: Composing Modernity through Maps and Landscape Paintings, 1500-1900

Colonial expansion and growing trade networks created new needs for picturing the globe in early modern Europe. In other words, globalization required a world broken down into concrete units that could be known and recognized. The artistic and the cartographic were two fundamental modes of representing space. What we might learn by bringing landscape paintings and maps together in dialogue? What are the aesthetic expectations of each genre? How were subject, scale, perspective, and proportion determined and by whom? Moving beyond a binary opposition of science versus art, we will study conventions and changes in mapmaking and landscape painting from the sixteenth to nineteenth centuries to analyze shifting conceptions of national identity, modernity, and the relation of humans to nature. Course lectures and an interdisciplinary array of readings will provide historical and conceptual support for object-based discussions in the Williams College Museum of Art, the Chapin Rare Book Library, and at the Clark Art Institute.

Class Format: this course will meet twice per week, the first meeting will be in the format of a lecture, the second will be a seminar-style discussion

Requirements/Evaluation: two short papers (4-5 pages), one longer final paper (10-12 pages), presentations, and participation in discussion

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 10

Grading:

Distributions: (D1)

ARTH 368  HIV + AIDS in Film and Video (DPE)

Spanning activist works, experimental film, Hollywood dramas and documentary, this course examines the role of moving images in reckoning with the global AIDS crisis, its aftermath, and its ongoing aftershocks. The AIDS crisis of the 1980s and 1990s was, in the words of Larry Kramer, a ‘plague’ of epic proportions, with an entire generation obliterated before it could reach maturity. And yet, the ‘plague’ years also spawned a remarkable amount of creative and activist image-making aimed at fighting, mourning, and grappling with AIDS. Now, we find ourselves in another pivotal moment: the past decade has yielded a new wave of artworks dedicated to memorializing the crisis, while for many communities, the crisis never ended. Together, we will ask difficult and probing questions about this phenomenon called the ‘AIDS epidemic,’ examining the role of art in frontline activism, the ethics of AIDS historiography, mainstream visions of the AIDS body, and the need for a diversity of AIDS narratives. This seminar-style course will combine weekly screenings with readings and intensive discussion.

Requirements/Evaluation: Discussion facilitation, attendance and participation, short response papers, long research paper

Prerequisites: ARTH 102 or permission of instructor; GRADART exempt from ARTH 102 prerequisite

Enrollment Limit: 12

Enrollment Preferences: senior majors

Expected Class Size: 12

Grading:

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This is an intersectional course in LGBTQ+ art history, with an examination of the relationship between sexuality, gender, ethnicity and power within AIDS activism and the AIDS crisis.

Not offered current academic year

ARTH 390  (F)  Art and Representation in the Wake of Empire, Europe After 1945 (DPE)

Foregrounding the exhibition as a critical form of aesthetic and political contestation, this course examines the transformation of colonial projects of early modernity to the post-World War II period. It will situate European visual culture within systems of transnational exchange and the art and cultures of other continents, while reflecting upon its economic and political impacts within its own newly reconfigured borders. National identity will be set in relief against a burgeoning cosmopolitanism, migration shifts, and increased tourism worldwide. Work in a variety of media will illustrate the multifaceted nature of these interactions and their engagement with materials, persons, and things in the commodification and use of natural
resources. Of the themes addressed in this course—postcolony, anticapitalism, imperialism, neocolonialism, and existentialism—particular attention will be focused upon the history of independence movements in the former European colonies and their reflection in works of art in Europe and abroad. We will consider the role major international and perennial art exhibitions—such as Documenta in Germany and the Venice Biennale in Italy—have played in the reconceptualization of the field of contemporary art, as well as other institutions of art confronting new waves of fascism in Europe. With a transhistorical approach, we will assess the work of international curators and cultural theorists who have remapped the relationship between art and politics, and the Global North and South.

**Requirements/Evaluation:** Weekly response papers (1-2 pages); participation in class; one 12-15 page paper

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Art History and Studio Art majors, then any interested student

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** The course examines difference, power, and equity in artistic practice as a means of rethinking European identity within a globalized world. Migration, diaspora, and citizenship—and their differentials of power and movement—are central to course assignments and discussions. It focuses on the lasting impacts of colonialism beyond European borders as a way of understanding the logic of cultural hegemony.

**Attributes:** ARTH post-1800

**Not offered current academic year**

**ARTH 400 (F) Clark Visiting Professor Seminar: Art, Media, and Politics in the Weimar Republic**

**Cross-listings:**

**Secondary Cross-listing**

In the fraught context of Germany between its defeat in the First World War in 1918 and the Nazi seizure of power in 1933, arguments about art, arguments about media, and arguments about politics were inextricably intertwined. Many saw the modernized city together with recently developed media such as film, radio, and the photographically illustrated magazine as transforming not only art, but also politics, sense perception, and the nature of subjectivity. In this course, we study signal works created in Germany during the Weimar Republic to understand the relations among aesthetics, politics, and media both old and new at this pivotal moment. The texts and films that we will examine will afford us a broad view of some of the most interesting and pertinent aspects of Weimar-era debates regarding the nature of gender and sexuality, the relation between the "German" and the "foreign," and the role in modernity of the artist and the work of art. We will study the writings of Walter Benjamin, Siegfried Kracauer, and Bertolt Brecht, writers who were formed by their participation in Weimar debates, then driven into exile by the rise of the Nazis, and whose texts have had a profound impact on contemporary thinking about art, media, and politics.

**Requirements/Evaluation:** active participation in discussions, weekly reading responses, and a research paper

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** places assured for 7 graduate students (second-years, then first-years) and 7 undergraduates (art history and studio art majors, then any interested student)

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARTH 401 (S) Museums: History and Practice

Cross-listings: LEAD 301

Secondary Cross-listing

Art museums express the cultural, aesthetic and social ideals of their period of formation and many of those ideals remain embedded in the values and practices of institutions today. Comparing institutions past and present internationally, seminar participants will envision the art museum's future while addressing programmatic and organizational challenges at this moment of participatory civic engagement and social, political unrest. With growing skepticism of institutional collecting practices and authoritative narratives, art museums, especially those in the US, face internal and external pressure to "decolonize" as they attempt to alter their canon through both acquisitions, deaccessioning and repatriation initiatives. There is pressure, as well, to embrace a more active role in climate and social justice movements. It is a time also marked by calls for compensation transparency, participatory decision making, staff and trustee diversity, and greater scrutiny of funders. The seminar will consider this environment against past and current norms of governance, management and curatorial policies and practices. We will examine the traditional role of architecture and installation in interpretation and experience, prevailing and proposed guidelines in the accessioning and deaccessioning of works of art and both internal and external attitudes towards the repatriation and restitution of cultural property. Studying museums ranging in size and type, seminar participants will hear how museum leaders are dealing with challenges to current practice in weekly zoom sessions. Participants will consider how future museums might strive to balance the institution's traditional roles with new civic and social responsibilities, mindful of financial stability in a market-driven, metric-conscious, not-for-profit environment, while addressing, in proposed program and practice, the demands on museums emanating from a more ethically insistent internal and external world.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

Prerequisites: undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

Enrollment Limit: 14

Enrollment Preferences: graduate students in the history of art, then senior undergraduate art history majors, then other undergraduates

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the seminar requirement for the undergraduate Art History major

ARTH 402 (S) Monuments and The Art of Memorial

The urge to commemorate is a timeless human impulse. Individuals, heroic acts, and historic events have been marked by mounds, architecture, images, words, and ephemera for over 5000 years. The value of the subject or focus of a commemoration changes over time. Entropy, iconoclasm, and vandalism have been seen as either positive or negative modes of destruction. Recent events have brought into high relief monuments long taken for granted as markers of the American urban landscape. Calls for the removal of monuments that have elevated individuals implicated in colonialism and racism have led to a powerful surge in alternative monument-making, and brought commemorative images back into public consciousness. Over the course of the seminar students will document and explore the concepts behind monuments and memorials in the Western tradition from their origins in the ancient Mediterranean (Mesopotamia, Egypt, Greece, Imperial Rome), and chart their reception, interpretation, destruction, and/or influence in later periods. We will also analyze the abstraction and inversion of monumental form, seen in the counter monuments of the late twentieth century such as Maya Lin's Vietnam Veterans Memorial (1982) or Gunter Demnig's Stumbling Stones project (Stolpersteine, 1992-the present), the world's largest decentralized memorial for the victims of Nazi terror. Our consideration of historical monuments will be paired with ongoing contemporary discussions of action around the removal of memorials, and the call for creative alternatives. During the second half of the semester seminar participants will research a memorial trend or a specific monument, and investigate and parse its context and reception over time. A short presentation and a substantial paper, written in stages, will be the end result of the research project.

Class Format: Discussion oriented course. Each student will have the opportunity to coordinate the discussion.

Requirements/Evaluation: The requirements of the course include: attendance, weekly posts on reading, and participation in discussion; a short
Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Art History majors and grad students, then any interested student

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Unit Notes: This course will fulfill the seminar requirement for the major in Art History. It can also fulfill the ARTH pre-1800 Course requirement if a seminar project is in the pre-modern era.

ARTH 403 (S) Clark Visiting Professor Seminar: Fascism and Art

Cross-listings:
Secondary Cross-listing

This course examines the complex and multifarious relations between art and fascism in interwar Europe, focusing on the cultural politics and the use of art in fascist movements and regimes, particularly in Germany and Italy. Exploring Walter Benjamin's dictum that fascism practices the "aestheticizing of politics" and Eric Michaud's argument that an "assimilation of work into artistic activity" lay at the center of the Nazi myth, we will also examine the role of art in fascist ideology as well as the problematic of artistic modernism and fascism. We will analyze fascist imaginaries of nation, empire, nature, technology, violence, gender, and race through the work of Ernst Jünger, F. T. Marinetti, Leni Riefenstahl, Le Corbusier, and Wyndham Lewis, among others. Early theories of fascism, including portions of Hannah Arendt's *Origins of Totalitarianism* and Max Horkheimer and Theodor W. Adorno's *Dialectic of Enlightenment*, as well as the work of contemporary historians and art historians, will inform our discussions.

Requirements/Evaluation: active participation in discussions, weekly reading responses, and a research paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students; places for 7 undergraduate and 7 graduate students assured

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 404 (S) The Enemies of Impressionism, 1870-1900

This class explores European and international painting and sculpture of the last quarter of the nineteenth-century, particularly the work of artists once famous in their day but whose reputations collapsed with the rise of Impressionism and Modernism. Once dismissed as trivializing, sensationalizing, politically suspect, kitsch, and simply "bad"--much of this art has attracted new attention and enthusiasm in recent years. Focus on aesthetic theory, narrative, cinema, and--most of all--viewer experience. Artists include Gérôme, Bouguereau, Alma-Tadema, and many others.

Requirements/Evaluation: readings; oral presentation; readings analysis; research paper

Prerequisites: none
ARTH 405 (F) Seminar in Architectural Criticism

How does one judge a building? According to its structural efficiency or its aesthetic qualities? Its social responsibility—or just its pizzazz? Depending on the building, and the critic, any of these questions might be pertinent, or impertinent. This seminar explores architectural criticism, that curious genre between literature and architecture, and looks at its history, nature and function. We will read and discuss classic reviews by historical and contemporary critics as John Ruskin, Mariana van Rensselaer, Lewis Mumford, Ada Louise Huxtable and Herbert Muschamp. Insights gained from these discussions will be applied by students to writing their own reviews, which will likewise be discussed in class. Early assignments will concentrate on mechanics: how to describe a building vividly and accurately, how to balance description and interpretation judiciously, how to compare. Subsequent ones will be more synthetic, encouraging students to write bold, lively and critical essays. The ultimate goal is to develop a distinctive and effective voice, and to gain a better understanding of the nature of criticism in general.

Requirements/Evaluation: students will write and revise six papers (5-7 pages) during the semester
Prerequisites: any 100 level ARTH course or permission of instructor

ARTH 409 (F) Homer, Eakins, Sargent: American Painters in a Changing World (WS)

What is the function of art in a rapidly changing world? Should it celebrate beauty, reveal truth, or describe the nature of modern life? America's finest painters of the nineteenth century -- Winslow Homer, Thomas Eakins, and John Singer Sargent -- did all those things, but in distinctly different ways. Homer transformed himself from a lively sketch artist for Harper's Weekly to a painter of scenes of sublime nature and heroic individualism. Eakins practiced a determined scientific realism and taught it to his students at the Pennsylvania Academy of the Fine Arts, until scandal led to his dismissal. And Sargent managed to produce the most exquisite fashionplate portraits of the era even as he imaginatively drew on the most progressive currents of contemporary art. This seminar looks at the work of these artists, their engagement with post-Civil War society, and how each of them dealt with profound mid-career crises. Topics to be explored will include different models of artistic education, the role of European travel and training, the art market, changes in public taste, and the rise and fall of critical reputations. There will be a major research paper, several small assignments, and a field trip.

Class Format: There will be a field trip to either New York or Philadelphia, as schedules permit.
Requirements/Evaluation: There will be a research paper of 20 - 25 pages. There will also be several smaller assignments, including a 5-minute oral presentation on a painting.
Prerequisites: ARTH 264 or consent of the instructor.
Enrollment Limit: 19
Enrollment Preferences: Preference given to senior majors and graduate students.

Enrollment Limit: 14
Enrollment Preferences: none
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
**Writing Skills Notes:** Students will prepare a research paper of 20 to 25 pages in three stages: an annotated bibliography, a first draft (which I will return with comments and line-edits), and a revised final draft.

**Fall 2024**

**SEM Section: 01**  W 1:10 pm - 3:50 pm  Michael J. Lewis

**ARTH 410  (S)  Art and the Myth of Community  (WS)**

The idea of community spans various forms of artistic practice, including performance, socially-engaged art, public works, and collectively-run and curatorial initiatives. Often, community is defined as a group of people who identify with each other by a set of common concerns or backgrounds. It connotes a sense of togetherness, wholeness, and consensus—despite the fact that difference and disagreements are an important part of any group. The concept of community also conjures up a broad set of themes, including identity, desire, friendship, interdependency, collaboration, spectatorship, and accountability. This course examines community, in its many forms, through contemporary artistic practices and relevant discourses from art criticism, feminist, queer, and decolonial thought. Readings are intended to offer useful concepts and theories to guide our analysis of artworks, films, and curatorial projects. Additionally, we will explore course concepts through group experiments in creative writing, storytelling, and performance. The goal of the course is to consider the interrelation between art and social life across genres, to theorize the aesthetic and political possibilities and limitations of community, and to explore what it means to be in relation to one another.

**Requirements/Evaluation:** Students will be responsible for crafting a 20-25 page research paper as well as participating and leading class discussions.

**Prerequisites:** No prerequisites

**Enrollment Limit:** 15

**Enrollment Preferences:** Preference will be given to History / Studio majors, followed by seniors and junior Art History Majors.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)  (WS)

**Writing Skills Notes:** This course will require final research paper that students will undertake in a progressive iterative capacity over the course of the semester. Students will learn writing strategies ranging from reverse outlines and mind maps to annotated bibliographies in the process of acquiring the fundamentals of crafting an intellectually rigorous research project.

**Attributes:** ARTH post-1800

Not offered current academic year

**ARTH 411  (S) Han Dynasty Art in the Ancient World**

**Cross-listings:** ASIA 411

**Primary Cross-listing**

Although the Han Empire (206 BCE-220 CE) is credited for defining the "Han ethnic identity" or the so-called "Chinese-ness" as we know it today, its culture was also richly cosmopolitan, marked by constant interaction with the outside world. This course considers Han dynasty art from a transregional perspective by examining artworks that attest to rigorous artistic exchanges with foreign cultures, ranging from the luxury items imported from the Hellenistic, the Central Asian, and the Steppe cultures and their domestic adaptations, to the exported Han artworks excavated in the South East and the East Asian regions. These objects illustrate the Han Empire’s growing awareness of its neighboring states and the ambition to visually assert itself as a powerful and open "universal empire." Students will learn about important artistic trends during one of the most international periods in ancient China, while gaining a materially-based vision of a globalizing ancient world bound closer than ever by the rise of the "Silk Roads" and maritime trade. The course is divided into five main sections following the logic of space. Beginning with the Han Empire (the "Center"), the seminar covers key themes in the development of Han art over four centuries. Assuming the viewpoint of the Han Empire, the course then examines the artistic exchanges with civilizations in the West (the Mediterranean and the Central Asian cultures) and moves clockwise to the North (the Steppe cultures), the East (Korea and Japan), and finally the South (maritime trade with South East Asian states). This arrangement of the syllabus is designed to help the students grasp and internalize the dynamic cultural contacts in a more embodied manner, while providing a working version of a spatial "grid" for navigating the students in their own exploration of the history of art in the ancient global world.

**Class Format:** A potential field trip to museums, possibly in New York or Boston, pending planning and approval.
Requirements/Evaluation: In addition to attendance and active participation in seminar discussions, each student will present on a topic of choice for two of the five main sections outlined in the course description (each 15-20 mins). Students will also write a final research paper on a topic of choice (15-20 pages, double-spaced) in consultation with the instructor and present their findings to the class (20 mins).

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Art history majors concentrating on Asian or ancient art are prioritized if the course over-enrolls.

ARTH 413  (S)  The Shosoin Imperial Treasury

Cross-listings: ASIA 415

Primary Cross-listing

Constructed in the eighth century to house artifacts associated with Emperor Shomu (reigned 724-749) and Empress Komyo (701-760), the Shosoin Imperial Treasury in Nara, Japan, preserves some of the finest examples of art objects produced across different cultural regions along the Silk Road, spanning Central Asia to Japan, from the sixth through the eighth century. Focusing on a selection of artworks, including painting, calligraphy, textiles, lacquerware, ceramics, glass, and metalwork, among others, this seminar examines issues of cross-cultural transmission of objects, artistic techniques, and cultural knowledge in the global medieval world, while also exploring the manners in which these artifacts visually and materially shaped kingship in eighth-century Japan and East Asia. Special attention is also paid to how recent relevant discoveries in archaeology and conservation science could contribute to art historical discourses.

Requirements/Evaluation: Attendance and active participation in discussions (30%), two presentations on a topic of choice (20% total), final paper proposal with annotated bibliography (10%), and final research paper with presentation (40% total, 30% paper and 10% presentation).

ARTH 418  Gothic Wonder: Exploring the Medieval Cathedral Then and Now

Through their enormous scale, through the gravity-defying complexity of their construction, and through the sumptuousness of their materials and decoration, Gothic cathedrals were built to amaze visitors—the medieval equivalent of the blockbuster movie, and then some. The goal was to activate and overwhelm all of the senses and thereby both to produce an experience of transcendence for the people entering and using the cathedral, and to capture their hearts. The widespread social media reaction of shock and dismay to the fire at Notre Dame in Paris last year suggests that this power of the medieval cathedral to captivate remains very much alive. But these cathedrals have also, over the centuries, embodied and perpetuated hierarchies of authority and privilege, and have consumed vast economic resources. As a result, they have often been centers of conflict—and this too remains true today, as the heated debate in France over the rebuilding of Notre Dame testifies. This seminar will investigate the multiplicity of realities
that make up the Gothic cathedral, from the Middle Ages to the present day. Together, we will look at a number of Europe's most renowned cathedrals, through time--in France (including Notre Dame in Paris), England, Italy, Germany, Spain, and elsewhere--and consider both how each building has changed over the centuries and how it has been differently interpreted. As this collective conversation is unfolding, students will also pursue individual research projects on a cathedral of their own choosing, the aim being similarly to examine one of these remarkable monuments over time and in its shifting contexts.

**Requirements/Evaluation:** Participation in class discussion; oral presentation; 15-20-page research paper.

**Prerequisites:** Permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Art majors, but open to all

**Expected Class Size:** 10

**Grading:**

**Distributions:** (D1)

**Not offered current academic year**

---

**ARTH 425** (S) Fragments and Healing: Disability Studies and Late Antique Art

**Cross-listings:** REL 425

**Primary Cross-listing**

This seminar will investigate some of the ways that contemporary Disability Studies can help us see and think about the complexities of differently abled bodies in Late Antiquity (broadly, from ca. 200 until ca. 750), the formative period for Christian art (and consequently for much of Western art). Disability Studies is an extremely active and rich body of literature and art that has not often been brought into conversation with historical periods of art, and so this seminar seeks to open up discussion of the insights possible from that conversation, not only how Late Antique art can be re-interpreted, but also how that period of art can reveal under-explored areas in the field of Disability Studies. The seminar will undertake a mutual interrogation of accepted notions in both fields and, in this way, to explore some new understandings of Disability Studies' capacities for allowing us to think with our art, culture, and bodies. The means at our disposal for this seminar are art of Late Antiquity and of the contemporary world, and that idea of mutual interrogation also operates in our study and display of that art. The seminar will look at art of healing and recuperation, art produced by and directed at diversely-abled bodies, and at fragments and restoration, and think about art as documents, reflections, and determinants of those bodies, now and in the past. It will, for this reason, work around the collection of WCMA, with exhibition and collection research, and the historical archives of the Library holdings, so that the widest possible study of bodies and difference is opened for our thinking and dialogue.

**Requirements/Evaluation:** participation in discussion; three 1-2-page reading reports; one 3-5-page exhibition response; one 15-20-page final essay

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** senior art-history majors and graduate students; other students will need instructor consent

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** In this seminar, students will develop skills of crafting clear and persuasive arguments through an iterative writing process. Further, to help them achieve these goals, they will receive timely comments on their written work.

**ARTH 428** (F) Anticolonial Approaches to the Arts of Ancestral Indigenous Americans

**Cross-listings:** AMST 427

**Primary Cross-listing**

Approaches to the study of the arts of Ancestral Americans have traditionally emanated in both their conceptions and practices from settler
colonialism, resulting in often hostile relations between investigators and descendant communities, the exclusion of Indigenous researchers, their sovereignties and knowledge regimes, and substantial distortions to historical understandings of the past. This course takes art histories of the Ancient Americas as its site for intervention as a means of introducing students to the oftentimes challenging labors of anticolonialism and the pursuit of the repair of past harms. Over the semester, students will learn how colonialism and its epistemologies have guided the formation of the field; how they can prioritize Indigenous and Native American ways of knowing and thinking in their understandings and research; how they can ethically conduct research without disturbing Ancestral American remains and the sovereignties of their descendants; and learn to make meaningful contributions to the projects of decolonization and repair.

Requirements/Evaluation: Weekly readings (100-200 pages); Participation -- regular attendance, contribution to in-class discussions, and demonstrated knowledge of readings (30%); One 10-12-page final essay, 3-page portions of which will be submitted for instructor feedback at monthly intervals (45%); Contribution to a collectively written class report through: 1) The co-authoring with a classmate of one report subsection of 2-3 pages (15%) and 2) Peer-review of subsections authored by other classmates (10%).

Prerequisites: None

ARTH 442 (F) Richardson, Sullivan, Wright: The Roots of American Modernism

Should a building express the facts of its program and materials--directly and without sentimentality? Or should a building be a physical manifestation of the personality and ego of its creator? These demands--one of radical objectivity, and one of radical subjectivity--seem to be mutually exclusive, yet together they form the basis for modern architecture at the start of the 20th century. The architectural lineage of Louis Sullivan, H. H. Richardson, and Frank Lloyd Wright is distinguished by the high degree of tension between the competing demands of factuality and selfhood. This seminar explores the theoretical roots of their architecture, its philosophical sources in transcendentalism, Unitarianism, German romanticism; and treating such aspects as decorative arts, architectural education and theory, and architectural autobiography.

Requirements/Evaluation: one hour presentation, 20-page paper

Prerequisites: any 100-level ARTH course or consent of instructor

Enrollment Limit: 11

Enrollment Preferences: senior Art majors and graduate students

Expected Class Size: 9

Grading: no pass/fail option, yes fifth course option

ARTH 460 (F) Repairing a Broken World: Intro to North African Contemporary Art (DPE)

Cross-listings: RLFR 360 / ARAB 360 / COMP 361

Secondary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one
another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Conducted in French.

Requirements/Evaluation: For undergrads: Active participation, 8 1-page response papers, 5-page mid-term paper, 10-12 page final paper and presentation. For grad students: Active participation, 8 response papers, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 2 spots will be offered to Grad Art students.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 360(D1) ARTH 460(D1) ARTH 560(D1) ARAB 360(D1) COMP 361(D1)

Difference, Power, and Equity Notes: This course critically examines art work that engages colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity.

Fall 2024

SEM Section: 01    TF 2:35 pm - 3:50 pm     Katarzyna M. Pieprzak

ARTH 465 (S) Contemporary Latin American Art  (DPE)

This course examines art produced in the region known as Latin America from the 1960s to the present, a period spanning the Cold War, the advent of military dictatorships, economic booms and crises, political polarizations, the rise of neoliberalism, and ecological upheaval. Using a transnational perspective, each week we will rigorously analyze practices as varied as painting, sculpture, photography, mail art, installations, performances, and ephemeral interventions through a specific theme, while also situating each work in its distinct social, political, and economic context. We will also pay special attention to the increased global dissemination of works from Latin America and by Latin American descendants in exhibitions and biennials since the 1990s, and will critically examine this historicization and its dominant trends.

Requirements/Evaluation: Regular short written assignments; final research paper.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If overenrolled, preference will be given to majors in Art History, Art Studio, and History and Practice.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills DPE requirements by taking a transnational perspective to analyze diverse artistic practices in relation to race, gender, sexuality, and class dynamics, and to issues of colonialism, cultural imperialism, nationalism, revolutionary politics, globalization, and extractivism.

ARTH 472 (S) Timelines

"Art" is really time-consuming--to make, to view, to use, to understand. We enshrine it, excavate it, curate it, deploy it and sometimes we deliberately
destroy it. We are always telling stories about the stuff. We seem to think that we control these many fabled things, though they meddle endlessly in the spaces between self and other, human and divine. Great art can be inspiring, enabling people to transcend time, or it can be traumatizing, making time stop altogether. Or both! To explore such powers, we will begin in the 19th century, when commonplace notions of past and present wobbled seriously with the invention of photography and the avid pursuit of archaeology. Thereafter, we will concentrate on the period between 1870 and 1930, but also operate across time and space. There will be no single story-line, but rather a series of case studies, ranging from iconic paintings and sacred spaces to photojournalism. Along the way, creativity and iconoclasm will be recurring themes. Choose this class if you are curious about the agency and power that art wields in our lives.

Requirements/Evaluation: Regular attendance and active class participation, Glow Posts, term project.

Prerequisites: one studio or art history class

Enrollment Limit: 15

ARTH 494 (S) Thesis Seminar

to graduate with honors in art history, students are to enroll in the Senior Honors Seminar during the Spring semester of their senior year, where they will develop an original research paper based on prior research. Under the guidance of the instructor, students will present and defend their own work in both written and oral form, as well as respond to, and critique, the work of their peers. As students work toward transforming their existing paper into an honors’ thesis, they will also be trained in skills necessary to analyze an argument effectively, and strategies of constructive critique.

Requirements/Evaluation: once in the seminar, students will revise, refine and expand on previous research and produce a paper of approximately 25 pages and present a shortened version of the paper to the faculty and public at the Williams College Museum of Art

Prerequisites: for requirements of entry into the course, please see “The Degree with Honors in Art, Art History”

Enrollment Limit: 8

Enrollment Preferences: permission of instructor required

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the Art History seminar requirement

ARTH 500 (F) Clark Visiting Professor Seminar: Art, Media, and Politics in the Weimar Republic

Cross-listings:

Primary Cross-listing

In the fraught context of Germany between its defeat in the First World War in 1918 and the Nazi seizure of power in 1933, arguments about art, arguments about media, and arguments about politics were inextricably intertwined. Many saw the modernized city together with recently developed media such as film, radio, and the photographically illustrated magazine as transforming not only art, but also politics, sense perception, and the nature of subjectivity. In this course, we study signal works created in Germany during the Weimar Republic to understand the relations among aesthetics, politics, and media both old and new at this pivotal moment. The texts and films that we will examine will afford us a broad view of some of the most interesting and pertinent aspects of Weimar-era debates regarding the nature of gender and sexuality, the relation between the "German" and the "foreign," and the role in modernity of the artist and the work of art. We will study the writings of Walter Benjamin, Siegfried Kracauer, and Bertolt Brecht, writers who were formed by their participation in Weimar debates, then driven into exile by the rise of the Nazis, and whose texts have had a profound impact on contemporary thinking about art, media, and politics.

Requirements/Evaluation: active participation in discussions, weekly reading responses, and a research paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: places assured for 7 graduate students (second-years, then first-years) and 7 undergraduates (art history and studio art majors, then any interested student)

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTH 501 (S) Museums: History and Practice

Cross-listings: LEAD 301

Primary Cross-listing

Art museums express the cultural, aesthetic and social ideals of their period of formation and many of those ideals remain embedded in the values and practices of institutions today. Comparing institutions past and present internationally, seminar participants will envision the art museum's future while addressing programmatic and organizational challenges at this moment of participatory civic engagement and social, political unrest. With growing skepticism of institutional collecting practices and authoritative narratives, art museums, especially those in the US, face internal and external pressure to "decolonize" as they attempt to alter their canon through both acquisitions, deaccessioning and repatriation initiatives. There is pressure, as well, to embrace a more active role in climate and social justice movements. It is a time also marked by calls for compensation transparency, participatory decision making, staff and trustee diversity, and greater scrutiny of funders. The seminar will consider this environment against past and current norms of governance, management and curatorial policies and practices. We will examine the traditional role of architecture and installation in interpretation and experience, prevailing and proposed guidelines in the accessioning and deaccessioning of works of art and both internal and external attitudes.
towards the repatriation and restitution of cultural property. Studying museums ranging in size and type, seminar participants will hear how museum leaders are dealing with challenges to current practice in weekly zoom sessions. Participants will consider how future museums might strive to balance the institution's traditional roles with new civic and social responsibilities, mindful of financial stability in a market-driven, metric-conscious, not-for-profit environment, while addressing, in proposed program and practice, the demands on museums emanating from a more ethically insistent internal and external world.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

Prerequisites: undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

Enrollment Limit: 14

Enrollment Preferences: graduate students in the history of art, then senior undergraduate art history majors, then other undergraduates

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the seminar requirement for the undergraduate Art History major

ARTH 504  (F) Proseminar in Research and Method
In this graduate Proseminar on Research and Method, we will read a number of texts that form the foundation of art history as a discipline, including the writings of Plato, Panofsky, Lessing, Heidegger, Wölfflin, and Barthes (among others). We will study these works against the grain, considering how art history is currently transforming under the fields of ecology, disability studies, queer theory, and radical black feminism. Students will work closely with the collections of the Clark to theorize how absences are integral to institutional histories, and we will think about how we can, as historians, responsibly address voices that have been removed from the canons of art history. This course considers not only central writings of art historical methodology but also the limits for decolonizing art history and the museum, as we will examine how the formation of the discipline depended upon absenting critical perspectives and voices.

**Requirements/Evaluation:** class participation, writing assignments

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** limited to and required of first-year students in the Graduate Program in the History of Art

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

---

**Fall 2024**

**SEM Section:** 01  T 1:00 pm - 3:50 pm  Caroline O. Fowler

**ARTH 506  (S)  Expository Writing Workshop**

This writing seminar for graduate students in the history of art will afford intensive full group discussions of writing skills and substantial one-on-one writing consultations. Group discussions will center on three kinds of texts: writing about writing, published writing related to the discipline of Art History, and student writing in progress. In six group discussions we will improve our vocabulary and method for discussing writing; we will learn to build better and more sophisticated sentences, paragraphs, and arguments; and we will practice anticipatory reading and writing in order to strengthen our control of both voice and structure. Each discussion will be supported with examples and exercises, and our watchword in all cases will be "revision." In one-on-one consultations (3-4 per person), the instructor will offer tailored critiques of each student's work, setting aside time as needed to troubleshoot sentences, paragraphs, or arguments together.

**Requirements/Evaluation:** Class participation, participation in consultation meetings, writing assignments

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Limited to and required of first-year students in the Graduate Program in the History of Art

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

---

**Spring 2025**

**SEM Section:** 01  T 1:00 pm - 3:50 pm  Ezra D. Feldman

**ARTH 507  (F)(S)  Object Workshop**

This workshop engages graduate students in intimate observational study of objects through six sessions held over two semesters. Organized in conversation with experts on collections from the Clark Art Institute, the Williams College Museum of Art, and the Chapin Library at Williams College, each session will focus on close engagement with a particular type of object (e.g., painting, sculpture, print, photograph, building, book, furniture, etc.). There are no assignments or assessments for this course, but there may be occasional reading.

**Class Format:** in-person study of objects, outdoors, in the galleries, or in study rooms at the Clark, WCMA, the Chapin, or elsewhere, 3x/semester

**Requirements/Evaluation:** Attendance is required at all sessions. There are no assignments or assessments for this course, but there may be occasional reading.

**Prerequisites:** none

**Enrollment Limit:** 14
Enrollment Preferences: required of first-year students in the Graduate Program in the History of Art

Expected Class Size: 12

Grading: pass/fail option only

Distributions: (D1)

---

**ARTH 508 (S)** Art and Conservation: An Inquiry into History, Methods, and Materials

In this course students will learn to recognize the materials present in cultural heritage collections, understand the history of artists’ methods and techniques, and hone their observation and examination skills for working with material culture. Students will form a basis in art conservation and condition assessment vocabulary and will exercise handling and examination skills for a variety of materials and artworks. Students will explore cultural heritage through the lens of the art conservator and form a broader awareness of the ethics and procedures of conservation and preservation. An understanding of the vulnerabilities and condition issues of cultural materials and how to care for them will be developed as an impactful, practical resource for future careers in cultural heritage. A multi-disciplinary group of teachers from the staff at the Williamstown + Atlanta Art Conservation Center (W+AACC) will conduct lectures, practicums, discussions on conservation research literature, and visits to nearby art institutions. Sessions are held at the W+AACC Conservation Center in the Lunder Center at Stone Hill on the Clark Art Institute campus. Students receive a syllabus with session outlines and required reading lists. Required readings are available via GLOW and on reserve at the Clark Library. Three exams will be given throughout the course. Attendance is required at all sessions in lieu of a final exam (each exam and attendance are weighted at 25% of the final grade).

Class Format: slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

Requirements/Evaluation: Attendance is required at all sessions; the course grade is based on three exams given throughout the semester; there is no final exam.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Graduate students in the history of art, then undergraduate majors in art history or studio art and related disciplines.

---

**ARTH 509 (S)** Graduate Symposium

This course is designed to assist qualified fourth-semester graduate students in preparing a scholarly paper to be presented at the annual Graduate Symposium. Working closely with a student and faculty ad hoc advisory committee, each student will prepare a twenty-minute presentation based on the Qualifying Paper. Special emphasis is placed on the development of effective oral presentation skills.

Class Format: committee discussions, workshops, practice runs, symposium

Requirements/Evaluation: Each student will submit a Qualifying Paper, which will be revised into a presentation. Each student will then present three practice runs and a final oral presentation at the Symposium.

Prerequisites: Successful completion and acceptance of the Qualifying Paper.

Enrollment Limit: 12

Enrollment Preferences: This course is limited to and required of second-year students in the Graduate Program in the History of Art.
Expected Class Size: 12
Grading: pass/fail option only
Distributions: (D1)

ARTH 511  (F)  Interspecies beings: demigods and monsters in art and culture, ancient to modern
Cross-listings: CLAS 436

Primary Cross-listing
Horse-men, cat-women, bull-men, mermaids, snake-people: interspecies creatures are everywhere in ancient Greek and Roman art and poetry. Embodied in satyrs, sphinxes, centaurs, nymphs, and other part-human, part-animal beings is an alternative evolutionary and cultural history. In it, humans and animals live as one. There is no distinction between nature and culture. Male and female are equal. The industrial revolution never happens. This course traces the history of interspecies beings from their origin in ancient Greek art and poetry until today. Three points are important: 1) the relationship between the imagery and ancient political theory about "primitive" life; 2) evolving conceptions of biology and the environment, and 3) the role played by interspecies beings in the conceptualization of what is possible in art. The first half of the course examines the origins and character of interspecies beings in works of ancient art such as the Parthenon, and in ancient writers including Hesiod and Ovid. We examine relevant religious practices, materialist conceptions of nature, and biological theories of speciation, in Empedokles, On nature, Euripides’ Bakchai, Plato’s Phaidros, and Lucretius’ De rerum natura. The second half of the course investigates the survival of classical monsters in the work of early-modern artists such as Botticelli, Michelangelo, Titian, and Dürrer, and the rediscovery of ancient materialist theory. We consider the role played by interspecies beings in the formation of late modernism in art and literature. Key texts include Rousseau and Hobbes, Nietzsche’s Birth of Tragedy, Mallarmé’s “L’Apres midi d’une faune,” and Stoppard’s Arcadia. Problems include the relationship between nymphs and sex-workers in Manet, the meaning of the Minotaur in Picasso, and the interest in interspecies beings in the work of women surrealists such as Leonora Carrington. We conclude with contemporary popular culture such as the Hunger Games.

Class Format: Lecture and discussion.
Requirements/Evaluation: The requirements of the course include: attendance and participation in discussion; preparing summaries/analyses of reading assignments for discussions; one presentation on a research project, and one 20-page paper on the research project.
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Priority goes to graduate students in art history. If space is available, senior art-history majors, classics majors, and environmental studies majors may enroll.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Unit Notes: This course will satisfy the seminar requirement in art history.
Distributions: (D1)

ARTH 512  (F)  Why Look at Animals? Animality in Contemporary Art
This seminar considers the so-called "animal turn" in contemporary art, in which more and more artists have taken nonhuman animals seriously in their work. Animals have long appeared in art as mere objects--to possess, consume, or symbolize with--rather than as subjects endowed with specific forms of intelligence, agency, or cross-species kinship. In this course we will analyze the work of artists who represent, emulate, or even collaborate with nonhuman animals, practices that take on particular urgency against the present backdrop of mass extinction. We will pay special attention to indigenous artistic practices and intersectional approaches to the burgeoning, multidisciplinary field of animal studies. Along the way, we will discuss animal ethics, the Anthropocene, and posthumanism, among other topics.
**ARTH 513 (S) Contours of Abstraction in Modern and Contemporary Art**

Abstraction, be it gestural or geometrical, was a protagonist of global modernisms and continues to be a powerful visual language in contemporary art. The term "abstraction" may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled formalist rupture, revolutionary politics, appropriation, as well as racial, feminist, and queer critique. We will delve deeply into abstraction in global modern and contemporary art through myriad primary documents and theoretical frameworks so as to revise and expand its canonical contours and cartographies.

**Requirements/Evaluation:** Weekly presentations, response papers, final 20-page research paper

**Prerequisites:** Students at the undergraduate level must be seniors and Art History majors

**Enrollment Limit:** 12

**Enrollment Preferences:** Art History MA students and undergraduate Art History seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**ARTH 514 Art and the Body in Ancient China**

What is the relationship between art and the body? In what ways can art be more than representation of the body, and body the subject and the beholder? What effects, if any, can art have on the body? While these questions pertain to art across different cultures and eras, ancient Chinese artworks offer a distinct and yet substantially untapped vantage point for contemplating the art-body relationship. Examining a wide range of materials, ranging from exquisite artifacts unearthed from tombs and Buddhist temples to the earliest examples of painting and calligraphy, in relation to the political, cosmological, and religious conceptualizations of the body in ancient China, this graduate seminar considers the capacities and limitations of how art engages with the body, particularly in ways beyond representation and looking.

**Requirements/Evaluation:** Attendance and active participation in discussions (30%); two research presentations (20-30 minutes each, 30%); a research paper (15-20 pages) accompanied by a presentation (40%).

**Prerequisites:** None.

**Enrollment Limit:** 15

**Enrollment Preferences:** Graduate students and advanced art history majors are prioritized.

**Expected Class Size:** 8

**Grading:**

**Distributions:** (D1)

**Attributes:** ARTH pre-1800

*Not offered current academic year*
ARTH 521 (F) Islam and the Image (DPE) (WS)

Cross-listings: REL 420

Primary Cross-listing

This seminar responds to a recent incident at a US liberal arts university where a professor was sacked for showing images of Prophet Muhammad as part of her section on Islamic art. Why is image-making so hotly contested in Islam? What is the history of figural depictions in this tradition? The seminar explores artworks made for Muslim patrons from the medieval period to the modern era, considering how paintings produced for Muslim audiences can be situated within the frameworks of "Islamic art," a loaded historiographical term that has been questioned in recent times. The seminar also addresses some of the major problems that continue to haunt art scholarship in the field. For most of its history, the academic study of Islamic art has seldom considered contemporaneous literary voices that shed light on the motivations behind artworks. Furthermore, the historiography, deeply entrenched in its colonial and orientalist roots, has largely isolated images from their supporting texts--a curious oversight in light of the fact that painting in Muslim lands has historically been primarily an art of the book. These biases have affected the way museums have collected, displayed and interpreted paintings. For example, Western museums continue to place figural depictions made for books and albums in "South Asian" collections while textual manuscripts and calligraphic specimens made for the same Muslim audiences—even at times bound in the same albums—are categorized as "Islamic art." What does this isolation of text from image imply about prevailing views of Islamic art? To better understand the cultural, historical and religious context surrounding artworks students will read primary literature ranging from autobiography to devotional poetry, often written by the very patrons and subjects of the paintings to be discussed.

Requirements/Evaluation: class participation, short weekly writing assignments, final essay project

Prerequisites: Undergraduates wishing to enroll must have taken at least one art history course or one religious studies course. Undergraduates must email indicating their interest in the course prior to enrolling.

Enrollment Limit: 19

Enrollment Preferences: MA students, then advanced undergraduates

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 521(D1) REL 420(D2)

Writing Skills Notes: Weekly writing assignments consisting of 300-500 words. Final papers 15-20 pages for graduate students. 12-15 pages for undergraduate students. 1-page abstract for the final paper due by mid-November. A 4-5 page project outline due right after Thanksgiving break. After receiving feedback and comments from the instructor, the final paper will be due in the last week of classes.

Difference, Power, and Equity Notes: Highlights a global art history that is underrepresented. The class focuses on pluralistic engagements with non-Western cultures and epistemologies.

Attributes: ARTH pre-1800

Not offered current academic year

ARTH 525 (F) Japanese Art and Visual Culture: Private/Public/Pop (WS)

Cross-listings: ASIA 324 / COMP 324

Secondary Cross-listing

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanô screen painting; nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

Class Format: Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

Requirements/Evaluation: For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research
Prerequisites: No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one another.

Enrollment Limit: 10

Enrollment Preferences: Graduate Art students, followed by undergraduates majoring in Art History or Comparative Literature.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 525(D1) ASIA 324(D1) ARTH 324(D1) COMP 324(D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by tackling similar problems from different angles. Students will receive detailed feedback from the instructor on each paper, addressing argument, organization, and style, as well as peer feedback. (See requirements for details about the number and type of assignments.)

Not offered current academic year

ARTH 527 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA

Cross-listings: ECON 227

Secondary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation: Three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy for acquisition.

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTH 529 (S) Muertos: Ancestral Mexican Arts of Mortality

The Mexican Días de los Muertos, which coincides with the Catholic holy days of All Saints' Day and All Souls' Day on November 1 and 2 of each year, numbers among the most widely recognized holidays practiced in contemporary Latin America. Available scholarly accounts of this holiday's historical origins, which tend to minimize the degree to which it reflects ancestral Indigenous Mexican religious practices, typically draw their earliest evidence from the Mexica (Aztec) capital of Tenochtitlan (present-day Mexico City) of c. 1300-1521 CE. However, the Mexica--well known for their
practices of human and animal sacrifice, as well as other social practices that implicated mortality--were themselves the inheritors of a millennial tradition that venerated death. This course considers the theme and actual practice of death over the Mexican longue durée. It begins in the first two centuries CE, which saw a substantial population collapse in central Mexico that was followed soon thereafter by the first known mass-human sacrificial event in Mesoamerica. It then follows the social construction of death in Mesoamerica through early modernity when the importation of Eurasian pathogens into the Americas alongside the atrocities of European colonization led to the death of an estimated 90% of Indigenous Americans. The final weeks of the course will consider how modern artists have responded to ancestral artistic and historical precedents. Artworks to be considered include the Temple of the Feathered Serpent of Teotihuacan, the sarcophagus of Pakal the Great of Palenque, the Great Ball Court of Chichen Itza, and the novel Pedro Páramo by Juan Rulfo.

Requirements/Evaluation: readings (100-200pp/week), participation, paper proposal, mid-semester paper draft (10-12pp), final research paper (20-25pp)

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: graduate students in the history of art, then advanced undergraduate art history majors

ARTH 531 (S) 19th-Century American Performance and Popular Culture

This course will study a wide variety of performances and emerging popular culture in 19th-century America, many of which, although not unique to the United State, reflect the U.S. back to itself in complex ways. Topics will include blackface minstrelsy, circuses and humbugs, male impersonators and burlesque, ethnic caricature, allegorical paintings on tour, vast panorama painting, anti-slavery imagery, late 19th-century theatre and spectacle, wild west shows as well as other mythologizing of indigenous Americans and the American landscape, the birth of the American art museum, and representations of significant moments of popular resistance, from the Lakota to the Great Railroad Strike of 1877. The central questions animating this course will be around the nature of performance and the popular. What can these two concepts tell us about the nature of art?

Requirements/Evaluation: Reading/writing assignments and class participation

Prerequisites: None

Enrollment Limit: 18

Enrollment Preferences: Grad students, undergrads must have approval from Professor Schmenner

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ARTH post-1800

Not offered current academic year

ARTH 539 (F) The Matter of French Encounter (1564-1789)

The story of artistic production in the Ancien Régime usually focuses on painting and on Paris. In this seminar, we will chart an alternative history of early modern French art through a closer look at those materials forged in the cross-currents of armed trade, expansion, and colonial resistance between France and East Asia, India, the Ottoman Empire, North America, and the Caribbean. We will explore how luxury wares (such as porcelain, silver, and textiles), tools of observation (such as prints and drawings), and ornamental ensembles (such as furnished interiors and gardens) were all shaped by forces of circulation, appropriation, and extraction. Through these objects, we will ask the following questions: How did habits of production and consumption change in an era of pre-industrial globalization? How did material and visual culture construct notions of difference and hierarchy? What are the ethics of ascribing agency to inanimate things that emerged in an era of rampant dehumanization? Assignments will foster students' ability to interpret and discuss artisanal and decorative objects that art history has traditionally kept at the margins. We will interrogate the utility of concepts such as turquerie, chinoiserie, and the "exotic," and we will call upon both primary sources and contemporary theory to critically examine
how alterity and subjectivity can be cultivated through things. Note: Final papers that address early modern intercultural encounters outside of France are welcome.

**Requirements/Evaluation:** Participation in class, a short reading presentation (c. 5 minutes), a short creative writing assignment (3-4 pages), a final presentation (c. 10 minutes), and a final research paper (15-18 pages).

**Prerequisites:** None

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate students in the history of art, then undergraduate art history majors.

**ARTH 545 Architectural Theory in Crisis**

Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory—in the form of treatises, manifestos, and critical reviews—has exercised an enormous effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but that is not the case today. Why? We will investigate. Students will give short presentations on key theorists, such as Vitruvius, Alberti, Palladio, Laugier, Boulée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 20-page seminar paper, based on comments and discussion following a classroom presentation.

**Class Format:** presentations

**Requirements/Evaluation:** several short presentations and a final 30-minute presentation, to be followed by a 20-page paper

**Prerequisites:** permission of instructor

**Enrollment Limit:** 11

**Enrollment Preferences:** Graduate students

**Expected Class Size:** 10

**Grading:**

**Distributions:** (D1)

**ARTH 552 (F) Art and Enlightenment in Europe**

**Cross-listings:**

Secondary Cross-listing

This lecture course traces the emergence of new modes of art- and image-making during two momentous centuries of European history that established the paradoxical foundations of our modern world. In this period, modern democracy was founded and determined by exploitative labor, the extraction of natural resources, and the rise of the trans-Atlantic slave trade. Over two centuries from the founding of the French Academy in 1648 to the 1839 invention of photography, this course traces these tensions in art and intellectual thought, examining beauty and the sublime, rationality and madness, personhood and enslavement, natural history and extraction, democracy and tyranny. Often defined in terms of the "Enlightenment," this intellectual and artistic period engaged with freedom of religious thought, scientific experiment, and a belief that humanity was guided by reason and rationality. Yet these same discourses also laid the foundation for the invention of race, nationalism, and the expansion of European colonialism. Isolating a series of pivotal moments and emblematic figures in visual culture of this period, this course asks students to consider how art was implicated in Enlightenment, and, in turn, how Enlightenment was implicated in both newly liberatory and newly oppressive concepts of subjectivity and personhood. Particular emphasis will be placed on the history of science, and, relatedly, on the increasing global circulation of ideas, people, and
goods. Artists in our purview include well-known figures like Velázquez, Rembrandt, Watteau, Hogarth, Goya, and Blake, as well as makers until recently left out of the art-historical canon, such as the Frankfurt-born botanical illustrator Maria Sibylla Merian, the Polynesian navigator and draftsman Tupai'a, and the Guadeloupean neoclassical painter Guillaume Guillon-Lethière, the subject of a major upcoming exhibition at the Clark Art Institute. Designed for students with no prior experience studying art history, the course will work directly from objects in local collections, prioritizing methods of close looking and formal analysis. At the same time, the questions and methods of our inquiry will be fundamentally interdisciplinary. Readings will emphasize primary sources and recent scholarship. A separate discussion section will be offered for MA students.

**Requirements/Evaluation:** midterm exam; final exam; visual analysis paper (3 pages); final paper (10 pages)

**Prerequisites:** none

**Enrollment Limit:** 50

**Enrollment Preferences:** art history majors

**Expected Class Size:** 50

**Grading:** yes pass/fail option, yes fifth course option

**ARTH 553 (F) New Ecologies in Contemporary Art**

This seminar will consider a range of current artistic approaches to environmental questions, especially through the relational, systemic terms implied by ecology. As scholars have argued, where "nature" connotes that which is monolithic, ahistorical, and apart from humans, ecology reveals a situated and specific web of relationships, interdependencies, and power in which we are all implicated. Our seminar will pay particular attention to intersectional practices that acknowledge the ways extraction, exploitation, and dispossession have produced the environmental crises of the present, which also affect the most vulnerable and least responsible—both human and nonhuman—with greatest force. In addition to studying the work of emerging and established artists, we will read texts by the academics and activists with whom they are in dialogue, and welcome some of them as guests to our class. This seminar anticipates a group show on the subject at the Clark in summer 2023.

**Requirements/Evaluation:** seminar presentations; research paper (approximately 20pp)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** MA students first, then art history majors; By application if over-enrolled

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** ARTH post-1800

**ARTH 555 (F)(S) Picturing Time in American Art**

The problem of history and the promise of the future have always shaped public discourse in the United States. This seminar explores the aesthetic and ideological operations of time in works of art and visual culture made in the U.S. context from the late colonial period through the present. From paintings of extinct animals and biblical disasters to expressions of a distinctly national art and Indigenous sovereignty, from visual records of territorial expansion and photographic motion studies to postmodern performance and Afro- and other futurist aesthetics, we will consider how ideas about time have shaped the iconography, materiality, and politics of visual representation in the U.S., with attention to the way time has been conceived in relation to concepts of progress, religion, nature, race, labor, and technology. We will explore how ideas about time are encoded in artworks through process, subject matter, and interpretation, and in relation to social systems such as slavery, settler colonialism, and capitalism.

**Requirements/Evaluation:** Attendance and participation in discussion; weekly responses and/or short writing assignments; final research project (proposal; abstract and annotated bibliography; 10-min oral presentation; 18-20pp research paper)

**Prerequisites:** None
Enrollment Limit: 14

ARTH 558  (S)  Circa 1850: Artistic Currents and Cross-Currents

Although the history of nineteenth-century European art has often been narrated as a succession of "sms," the notion of discrete artistic movements following one upon the other is of course highly misleading. Despite common perceptions of Realism as the prevailing force at mid-century, many contradictory impulses were simultaneously at work. The Romantic strain in visual art continued, though sometimes in sublimated form, and historicizing and avant-garde perspectives alike jockeyed for influence in art criticism, sales rooms, and exhibition venues. Abetting this collision of styles was a proliferation of new media in visual culture more broadly. Focusing on European and American examples from the middle decades of the nineteenth century, this course addresses the emergence of new tendencies in art and the persistence or revival of old ones. We will explore a variety of topics, including the invention of photography and its impact on other image-making techniques; the opening of Japan and the vogue for Japonisme; medieval nostalgia in the face of rampant Haussmannization; and the role of tradition in vanguard art. On the American side, we will consider printmaking and photography as tools of documentation and self-fashioning during the Civil War era. This course will take place in the Manton Study Center for Works on Paper. Each session will engage directly with works from the Clark's collection, to be discussed and analyzed in conjunction with critical and theoretical readings.

Requirements/Evaluation: Reading/writing assignments, participation.

Prerequisites: None

Enrollment Limit: 16

Enrollment Preferences: Graduate students first. Undergraduates must receive permission from the instructor.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 559  (F)  Photographing City Life: Diane Arbus/James Van Der Zee

Diane Arbus and James Vander Zee in Manhattan. In this seminar we will discuss two photographers of city life: Diane Arbus (1923–1971) and James Van Der Zee (1886–1983). So doing, we will also observe how life in New York changed during their years of great productivity. In the first part of the course, "Diane Arbus in Manhattan," we will talk about Arbus’ relationship to New York--the city of her birth. For most of her career, Arbus worked in Manhattan; indeed, one could think of the city as another character in her work. Arbus’ relationship to myth--to storytelling--was profound. A great reader throughout her life, she was drawn to those writers who saw cities as very individualized places. In addition to looking at Arbus’ photographs of life in Manhattan in the nineteen fifties, sixties, and in 1970, we will read her published letters, and those authors who inspired her with their artistry, and fascination with myth, including Borges, and Kafka. In the second part of the course, "James Van Der Zee and the Black Village," we will discuss the great Black photographer whose archives were just purchased by the Metropolitan Museum of Art (where Arbus’ archives are as well). Born in Lenox, Massachusetts, Van Der Zee settled in Harlem in 1916; there, he opened a photography studio where he became known for his portraits of Black life as it was lived uptown. Admired by Arbus and others, Van Der Zee’s interest in and commitment to his community extended to all aspects of Harlem life, including death. To support our discussions of Van Der Zee's Black village, we will read modernist classics, including Jean Toomer's "Cane," and Toni Morrison's "Jazz" that deal specifically with village life. Please note that seminar meetings will be held biweekly on 9/8, 9/29, 10/13, 10/20, 11/3, 11/17. The seminar will include several mandatory viewing excursions outside Williamstown. The dates of these excursions are TBD, but will be restricted to Fridays or weekends. Professor Als will hold office hours following the seminar at hours TBD. Application may apply.
ARTH 560  (F)  Repairing a Broken World: Intro to North African Contemporary Art  (DPE)

Cross-listings:  RLFR 360 / ARAB 360 / COMP 361

Secondary Cross-listing
How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Conducted in French.

Requirements/Evaluation:  For undergrads: Active participation, 8 1-page response papers, 5-page mid-term paper, 10-12 page final paper and presentation.  For grad students: Active participation, 8 response papers, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites:  Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit:  18

Enrollment Preferences:  If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 2 spots will be offered to Grad Art students.

Expected Class Size:  15

Grading:  yes pass/fail option,    no fifth course option

Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 360(D1)  ARTH 460(D1)  ARTH 560(D1)  ARAB 360(D1)  COMP 361(D1)

Difference, Power, and Equity Notes:  This course critically examines art work that engages colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity.

ARTH 561  (S)  Land, Memory, Materiality: Histories and Futures of Indigenous North American Arts  (DPE)

Cross-listings:  HIST 454

Primary Cross-listing
This course engages Indigenous North American traditions of creative expression, remembrance, and representation in historical, contemporary, and future-facing ways. Drawing upon diverse Native American and First Nations theories and practices, it ranges widely across the continent to consider Indigenous arts and material culture within specific cultural, socioeconomic, and political contexts. Part of the course is grounded in the Native Northeast, including the Indigenous homelands of the Stockbridge-Munsee Mohican Community in which the Graduate Art Program and Williams
College are situated. Other units will focus on continuities and transformations in artistic and maker-traditions within and across specific Indigenous nations and communities. The course is especially interested in connections between past and present, and the innovative ways Indigenous artists, makers, and knowledge-keepers have reckoned with what has come before, while also mapping meaningful future pathways. Topics will include repatriation and community-led restorative efforts to bring home ancestors and important heritage items "collected" over the centuries following 1492; concepts and practices of cultural, intellectual, visual, and political sovereignty; decolonizing museums; the complex dynamics of collaboration; Indigenous, African-American, and Afro-Indigenous artistic connections and solidarities; and Indigenous challenges to Eurocentric and settler colonial approaches to preservation, interpretation, and classification. Seminar members will develop familiarity with methods and ethics grounded in Native American and Indigenous Studies, and with new scholarship by leading and emerging critics and creators.

**Class Format:** The course will feature seminar discussions as well as local trips to museums, libraries, and archives with pertinent collections and exhibitions.

**Requirements/Evaluation:** Engaged participation in discussions; in-class presentations; short writing assignments in preparation for final project; final original research and interpretive project, with presentation to seminar.

**Prerequisites:** For undergraduates, at least two prior courses in or related to History, Art History, Native American and Indigenous Studies, and/or Museum Studies.

**Enrollment Limit:** 16

**Enrollment Preferences:** Priority for Graduate Art students. Four seats are reserved for undergraduates, with preference to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to cd10@williams.edu.

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARTH 561(D1) HIST 454(D2)

**Difference, Power, and Equity Notes:** The course centers theories, experiences, and expressions from Native American/Indigenous communities, scholars, and artists/makers, while engaging foundational and new work in Native American and Indigenous Studies (NAIS). The course also provides students with critical tools for reckoning with settler colonialism and its historical as well as enduring impacts in Indigenous contexts; and with race, ethnicity, sovereignty, and tribal nationhood as key interpretive frames.

**Attributes:** HIST Group F Electives - U.S. + Canada

Not offered current academic year

**ARTH 563 (F)(S) Contemporary Curatorial Workshop**

Seminar for graduate art history students to engage in discourse around contemporary curatorial practice with professionals in the field. Guest curators discuss their work and methodology and students enrolled in the course who are working on curatorial projects have the opportunity to workshop their ideas with their peers and guests. Under the direction of the chairs, students will participate in class discussions, present projects, host local and visiting curators, travel to visit exhibitions regionally as the schedule allows, and explore key topics in modern and contemporary art and curatorial practice.

**Class Format:** workshop, meets 4x a semester

**Requirements/Evaluation:** Attendance is required at all sessions. There are no assignments or exams.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Graduate students in the history of art; undergraduates may audit the course for no credit with prior approval of the instructors and as space allows.

**Expected Class Size:** 25

**Grading:** pass/fail option only

**Distributions:** (D1)

**Attributes:** ARTH post-1800

Fall 2024
ARTH 565 (F) Sonic Ecologies: Queer Listening, Orientations, and Objects

This seminar considers sound, the aural imagination, and practices of listening in visual art and time-based media. Focusing on work produced in the 20th and 21st centuries, we will explore theoretical, media, aesthetic, and reception issues through an intersectional lens. While we will focus on queer theory and related artworks and art historical accounts, the course will also draw heavily on recent writings on and artistic practices that take up other related aspects of "ecology" broadly understood: interspecies relationality, the environment, the climate crisis, and scholarship grounded in the specificity of critical race theory, Latinx, Caribbean, and diasporic studies. Readings will tend toward the theoretical—from Sara Ahmed and José Esteban Muñoz to Tina Campt and Ren Ellis Neyra, among many others—but will be accompanied by art historical accounts and each class meeting will be grounded by in-depth discussion of several specific works of art. When resonant, we will take advantage of access to relevant exhibitions, performances, or events at the Clark, Williams College Museum of Art, MASS MoCA, or Bennington College. The course will prioritize student-facilitated discussion, and student work will be focused on producing a substantial research paper (with an option to produce a hybrid research/creative project, developed in conversation with the instructor). Undergraduates welcome with permission of the course instructor.

Requirements/Evaluation: Reading and writing requirements, class participation

Prerequisites: None

Enrollment Limit: 18

Enrollment Preferences: Grad students first, then music majors and art majors, but undergraduates must seek approval from Professor Woolsey

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ARTH post-1800

Not offered current academic year

ARTH 569 (F) Gérôme

This course explores work and career of Jean-Léon Gérôme (1824-1904), perhaps the most renowned, popular, and influential artist of the later nineteenth century. With commercial and artistic relationships that spread his influence across the globe, Gérôme has come to seem very much like a highly successful contemporary artist, specifically with regard to his place in an international art world that married elite institutional practices to new technologies of reproduction, marketing techniques, and other instruments of modern mass culture. Gérôme's fame was short lived, however. In the wake of the Modernist revolution on the one hand, and Post-Colonial critique on the other, no discussion of the artist can avoid wrestling with complaints that have left him thoroughly diminished—though less forgotten than scorned. Not only did his art, as it seemed, help perpetrate a gigantic aesthetic error, it blundered onto ethically compromising terrain. Today Gérôme stands as Exhibit A in wide-ranging critique of Orientalism's ideological work. The course will interrogate the Modernist and Post-Colonial complaints against Gérôme in detail, even as it also explores his art from a range of other perspectives, many developed very recently. Topics include Gérôme's relationship to photography, to Orientalism and animal studies, to the cinema, to polychrome sculpture, his approach to historical narrative, and well as his voyeurism and other other manipulations of viewer experience so critical to his art. The seminar will engage the Clark's important collection of Gérôme paintings, and also travel to the Walters Art Gallery in Baltimore, conditions permitting. Students may prepare papers on any aspect of global late-nineteenth-century "academic" or "official" art that was informed by Gérôme's example.

Requirements/Evaluation: class participation, presentations in seminar, research paper (approximately 20 pp)

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: MA students, then art history majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 578  (F)  The "Book" Dissected: Making and Meaning in Medieval Manuscripts
How did medieval and Renaissance "books" work, when the codex was only one form of the book, which continually evolved, and when they weren’t only used for reading? This course will explore the book as object and the book as concept. Drawing on the collection of manuscripts, incunables, and later printed books at WCMA, Chapin, and surrounding museums, the course will consider how the forms and materiality of books could have affected readers’ reception and perceptions, and in turn, how religious, cultural, political, and economical forces shape their format, decoration, and paratext. While it will primarily deal with Western books, we will also consider early ones from around the world. Students will develop codicological and bibliographic analytical skills as we study our changing uses and relationships with and to books as instruments of doctrine and devotion, power and identity.

Requirements/Evaluation:  class presentations; research papers; other assignments
Prerequisites:  none
Enrollment Limit:  14
Enrollment Preferences:  Graduate students in the history of art, then advanced undergraduate art history majors

ARTH 579  (F)  Art and the Body in Ancient China
What is the relationship between art and the body? In what ways can art be more than representation of the body, and body the subject and the beholder? What effects, if any, can art have on the body? While these questions pertain to art across different cultures and eras, ancient Chinese artworks offer a distinct and yet substantially untapped vantage point for contemplating the art-body relationship. Examining a wide range of materials, ranging from exquisite artifacts unearthed from tombs and Buddhist temples to the earliest examples of painting and calligraphy, in relation to the political, cosmological, and religious conceptualizations of the body in ancient China, this graduate seminar considers the capacities and limitations of how art engages with the body, particularly in ways beyond representation and looking.

Requirements/Evaluation:  Attendance and active participation in discussions (30%); two research presentations (20-30 minutes each) per student per semester (30%); a research paper (15-20 pages) accompanied by a presentation (40%).
Prerequisites:  None
Enrollment Limit:  14
Enrollment Preferences:  Graduate students in history of art and undergraduate art history majors.

ARTH 584  (S)  Fragments and Healing: Disability Studies and Late Antique Art
Cross-listings:  REL 425
Secondary Cross-listing
This seminar will investigate some of the ways that contemporary Disability Studies can help us see and think about the complexities of differently abled bodies in Late Antiquity (broadly, from ca. 200 until ca. 750), the formative period for Christian art (and consequently for much of Western art). Disability Studies is an extremely active and rich body of literature and art that has not often been brought into conversation with historical periods of art, and so this seminar seeks to open up discussion of the insights possible from that conversation, not only how Late Antique art can be
re-interpreted, but also how that period of art can reveal under-explored areas in the field of Disability Studies. The seminar will undertake a mutual interrogation of accepted notions in both fields and, in this way, to explore some new understandings of Disability Studies’ capacities for allowing us to think with our art, culture, and bodies. The means at our disposal for this seminar are art of Late Antiquity and of the contemporary world, and that idea of mutual interrogation also operates in our study and display of that art. The seminar will look at art of healing and recuperation, art produced by and directed at diversely-abled bodies, and at fragments and restoration, and think about art as documents, reflections, and determinants of those bodies, now and in the past. It will, for this reason, work around the collection of WCMA, with exhibition and collection research, and the historical archives of the Library holdings, so that the widest possible study of bodies and difference is opened for our thinking and dialogue.

Requirements/Evaluation: participation in discussion; three 1-2-page reading reports; one 3-5-page exhibition response; one 15-20-page final essay
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: senior art-history majors and graduate students; other students will need instructor consent
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Unit Notes: In this seminar, students will develop skills of crafting clear and persuasive arguments through an iterative writing process. Further, to help them achieve these goals, they will receive timely comments on their written work.

Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 585 (S) Facing Portraiture
What constitutes a portrait? How do portraits act in the world? What histories do they hold, and what stories can they tell? This seminar will explore how artists, sitters, viewers, and historians have approached this genre and to what ends. We will interrogate the possibilities and limits of portraiture; examine how portraiture encodes forms of difference through ideological claims to power, likeness, and self-possession; and explore how technological developments inform portraiture’s shifting private and public uses. Attending to historical and cultural specificity--with particular though not exclusive attention to the post-1800 period and the United States--we will also excavate the genre’s legacy by exploring its contemporary presence, asking what concerns shape conceptions of portraiture in contexts such as the National Portrait Gallery’s triennial Outwin Competition and popular discourse. Bridging past and present, and in conversation with objects held in the collections of the Clark, WCMA, and the Chapin Library, we will work toward our own definition of portraiture and, in so doing, discover and complicate the relationship between personhood, identity, and representation. Students are welcome to develop final projects on relevant topics and materials outside the temporal and geographic contexts addressed in class.

Requirements/Evaluation: attendance and participation in discussion; weekly responses; final research project (proposal; select annotated bibliography; abstract; 15-min oral presentation; 15-20pp research paper)
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: graduate students, then undergraduate art history majors, then any interested student
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option

ARTH 588 (S) The Scene of Decapitation in European Art
From Goliath to Medusa, from Judith to Salome, from the invention of the guillotine to the mythology of the executioner under "Oriental despotism," the "scene" of decapitation has long stood as a central focus of European art and letters. This course examines that scene as an artistic, psychological, and intellectual problematic across painting, sculpture, and other media, from the late-middle ages to the end of the nineteenth century. Although part and parcel of the larger spectacle of juridical punishment, the scene of decapitation arguably constitutes its own series, and for this reason has attracted numerous artists and a prestigious literature. Artists include Caravaggio, Artemisia Gentileschi, Théodore Géricault, Gustave Moreau, Henri
ARTH 589 (S) Imitation, Copy, Reproduction

Focusing primarily on European and American art before 1900, this course addresses the related categories of imitation, copy, and reproduction with particular attention to prints and other works of art on paper. We will consider the status of the multiple, the role of imitation in classical art theory and pedagogy, the motivations for (and protections against) different kinds of copying, the emergence of photomechanical processes, and the centrality of reproducible images to the art-historical enterprise, among other topics. The basis of our investigations will be works from the Clark's own collection, to be studied with a close eye to their medium and materiality. We will explore concepts of originality, fidelity, authenticity, and value in the light of critical and theoretical texts, while also examining the historical conditions that underlie distinct instances of image reproduction. This course will take place in the Manton Study Center for Works on Paper. Each session will offer direct engagement with works in the Clark's permanent collection.

ARTH 590 (F) Guillaume Lethière (1760-1832) and Caribbean Networks in France during the 18th and 19th centuries

Born in the French colony of Guadeloupe, Guillaume Lethière (1760-1832) was a key figure in French painting during the late eighteenth and early nineteenth centuries. The son of a white plantation owner and a formerly enslaved woman of mixed race, Lethière moved to France with his father at age fourteen. He trained as an artist and successfully navigated the tumult of the French Revolution and its aftermath to achieve the highest levels of recognition in his time. A favorite artist of Napoleon's brother, Lucien Bonaparte, he served as director of the Académie de France in Rome, as a member of the Institut de France, and as a professor at the École des Beaux-Arts. Despite his many accomplishments and sizeable corpus of paintings and drawings, Lethière has notably disappeared from the "canon" of art history. Such a lacunae begs many questions about the circles of sociability in which he traveled, the reception of Caribbean artists in France in the eighteenth and early nineteenth centuries, and the lack of widespread knowledge on these topics today. This seminar will be timed with the major monographic exhibition taking place at the Clark Art Institute in the summer/fall of 2024. The course will also provide an opportunity for close examination of objects in the Clark's permanent collection.

Requirements/Evaluation: class participation, presentations, research paper (approx. 20pp)

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Graduate students in the history of art, then undergraduate art history majors
ARTh 593 (S) The Sonic Turn

Over the last two decades, art history has experienced something of a sonic turn. What does attending to sound open up for art historians, so long trained principally in visual analysis and critique? This seminar delves into sonic practices, methods, and theories in the visual arts from 1960 to the present. While we will examine time-based media, including film, performance, and intermedia works, this course considers the aural imagination and practices of listening more expansively and addresses artworks outside what might conventionally be deemed “sound art.” Course readings will include art historical accounts, art criticism, and artist's writings, as well as relevant texts from adjacent disciplines including sound studies, media studies, performance theory, queer theory, disability studies, Black Studies, and Latinx and Chicana studies. The course will explore the cross-pollination of theater, music, and artistic experimentation in the 1960s; the immersive installations of “radical architecture” by groups like Archigram; the strident politics of experimental Italian interventions in the 1970s; the reverberations of the AIDS crisis, for so long silenced in the United States, in the 1980s and early 90s; recent work by Deaf artists critiquing ableist hearing ideologies; and contemporary Caribbean artists using sonic methods today to grapple with histories of oppression, climate change, and diaspora, among other topics.

Requirements/Evaluation: Attendance and participation in discussion; short writing assignments; final research projects (including 10-minute oral presentation and 15-20 pg. paper)

Prerequisites: none

ARTH 599  Muertos: Ancestral Mexican Arts of Mortality
The Mexican Días de los Muertos, which coincides with the Catholic holy days of All Saints' Day and All Souls' Day on November 1 and 2 of each year, numbers among the most widely recognized holidays practiced in contemporary Latin America. Available scholarly accounts of this holiday's historical origins, which tend to minimize the degree to which it reflects ancestral Indigenous Mexican religious practices, typically draw their earliest evidence from the Mexica (Aztec) capital of Tenochtitlan (present-day Mexico City) of c. 1300-1521 CE. However, the Mexica--well known for their practices of human and animal sacrifice, as well as other social practices that implicated mortality--were themselves the inheritors of a millennial tradition that venerated death. This course considers the theme and actual practice of death over the Mexican longue durée. It begins in the first two centuries CE, which saw a substantial population collapse in central Mexico that was followed soon thereafter by the first known mass-human sacrificial event in Mesoamerica. It then follows the social construction of death in Mesoamerica through early modernity when the importation of Eurasian pathogens into the Americas alongside the atrocities of European colonization led to the death of an estimated 90% of Indigenous Americans. The final weeks of the course will consider how modern artists have responded to ancestral artistic and historical precedents. Artworks to be considered will include the Temple of the Feathered Serpent of Teotihuacan, the sarcophagus of Pakal the Great of Palenque, the Great Ball Court of Chichen Itza, and the novel Pedro Páramo by Juan Rulfo.

Requirements/Evaluation: Readings (100-200 pages/week); Participation (25%) ; Essay proposal 1 page (10%); Essay mid-semester draft 10-12 pages (25%); Final research essay, 20-25 pages (40%)
Prerequisites:  None.
Enrollment Limit:  12

Winter Study  

ARTH 14  (W)  The Digital Humanities Toolkit
This course will provide students an introduction to digital humanities methods and hands-on experience with a variety of essential tools. Students will curate a digital exhibition in Omeka using the Visual Resources Center's historic photograph collection. In the process, students will learn about digital imaging, metadata, mapping, timelines, virtual reality, and data analytics and visualization. Discussion and lab time in the Visual Resources Center will be paired with cross-campus visits, where guest speakers will share their expertise and engage students in topics such as 3D modeling and printing, and artificial intelligence. Short readings and videos will be assigned to supplement materials presented in class. Students will present their final exhibition projects at the end of the course. While the course will often approach digital humanities through the image-intensive lens of Art History, students pursuing a variety of disciplines are welcome. Students will complete the course having been introduced to a broad range of ways to incorporate digital technologies into their humanities research.

Requirements/Evaluation:  Other: Final project and presentation
Prerequisites:  None
Enrollment Limit: 10
Enrollment Preferences: Preference will be given to students who have completed one or more Art History courses.
Expected Class Size: NA
Grading: pass/fail only
Unit Notes: Amy McKenna, Director of Visual Resources, develops digital humanities teaching projects with Art faculty and curates digital and historic teaching collections.
Attributes: EXPE Experiential Education Courses STUX Winter Study Student Exploration

**ARTH 18 Archaeological Illustration: Problems in the Representation of Antiquity**

This course will consider historiographic problems in the representation of human antiquity, with a focus on the arts of the ancestral Americas. Students will study how archaeological sites and artworks have been represented since the advent of concerted archaeological research in the 19th century until the present. Students will also complete a portfolio of 8-10 drawings representing archaeological materials and buildings, a portion of which should focus on Classical Mayan hieroglyphs.

Requirements/Evaluation: Attendance and participation (40%); Folio of 8-10 drawings of ancient artworks and/or inscriptions (30%); 3-page reflection essay (30%)
Prerequisites: Comfort with drawing, but no formal prior coursework is necessary
Enrollment Limit: 10
Enrollment Preferences: Art majors
Expected Class Size: 10
Grading: Not offered current academic year

**ARTH 19 Chinese Painting: Deep Looking**

This course focuses on the art of painting in China across five dynasties (Tang, Song, Yuan, Ming, and Qing), spanning from the seventh to the nineteenth century. Instead of a lecture-survey class format, students will participate in intensive close-looking exercises and engage in seminar-style discussions on a selection of masterpieces (“deep looking”) in each class, under the guidance of the instructor. These exercises will revolve around a collection of high-quality facsimiles of the paintings, supplemented by high-definition digital images when necessary, to replicate the embodied viewing experience as demanded by the traditional formats of Chinese painting. In addition to gaining an introduction to the history of Chinese painting through the dynasties, students will develop critical skills in visually analyzing the style, composition, and brushstrokes of various painting genres, while also exploring how these aspects of image-making mediated ideas throughout history in China.

Requirements/Evaluation: Attendance and active participation in close looking exercises and discussions (50%); ungraded weekly reflections (20%); one response paper to a painting in the WCMA collection (20%); one linmo "emulation copying" painting after a painting of choice (10%)
Prerequisites: None.
Enrollment Limit: 10
Enrollment Preferences: Art and art history majors are given priority.
Expected Class Size: 10
Grading: Not offered current academic year

**ARTH 20 Brazilian Avant-Garde Film**

This course will immerse students in the alternative cinema of Brazil in the 1960s, an explosive cultural and political moment that saw the emergence of radical experimentation across the arts. The crosscurrents of conservatism and countercultures clashed in Brazil in the 1960s. A military dictatorship seized power in 1964 as part of a swell of far-right authoritarianism in Latin America; at the same time, artists, musicians, writers, and filmmakers sought to profoundly challenge aesthetic and social norms. We will focus on key films of what became known as Cinema Novo (New Cinema) and Tropicalism, closely analyzing their innovative aesthetics to understand how the medium became a vehicle for avant-garde experimentation and powerful political critique during this time. We will also place these films in their larger cultural milieu, getting to know artworks, music, and poetry that
surrounded these filmmakers, so as to reconstruct key aspects of a period that has remained a cultural touchstone in Brazil and internationally. Films are subtitled, and no previous knowledge of film history or Brazilian history is required, as we will incorporate readings and discussions to establish context.

**Class Format:** The course will consist of mandatory in-class screenings followed by discussion.

**Requirements/Evaluation:** Attendance, participation, short written assignments, and a team presentation

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** If overenrolled, preference will be given to Art Majors

**Expected Class Size:** 12

**Grading:**

**Attributes:** ARTH post-1800

**Not offered current academic year**

**ARTH 21 Islam and Spirituality: in Practice**

The course is an audio-visual journey into lived Islam, which has one of the world's most enduring and widespread spiritual traditions. Scholarly readings will be kept to a minimum. Instead the focus will be on viewing musical performances, reading and listening to poetry, films, and documentaries that highlight the embodied nature of Islamic spirituality across the globe. Material will include Qawwali performances, a docu-film on the medieval scholar-saint Ghazzali, early Muslim devotional poetry from North Africa and the Middle East, and examining the art of the book from Iran and South Asia.

**Requirements/Evaluation:** A final paper or report; or a presentation or performance; a creative project is also an option. Example of a final assignment could include (but is not restricted to) a journal chronicling the class experience and the questions it raises; an 8 - 10 page essay; a video essay; an artwork responding to the content covered in class; an image-focused StoryMap project

**Prerequisites:** statement of interest proving some prior familiarity with Islam

**Enrollment Limit:** 12

**Enrollment Preferences:** none

**Expected Class Size:** 12

**Grading:**

**Not offered current academic year**

**ARTH 23 Art and Access: Disability Justice as Subject, Material, and Form in Contemporary Art**

This course offers an introduction to the principles of Disability Justice and Crip theory through the lens of contemporary art. A number of recent exhibitions have foregrounded the work of artists whose work both represents and critically examines the experience of disability in its social, aesthetic, and political dimensions. We will be charting the emergence of a cohesive history of art and accessibility through specific objects and techniques, with particular attention paid to the formal aspects of accommodations, from captions to image description, to accessible architecture and language justice, among others. Discussion of selected essays by noted scholars and practitioners will frame our investigation of the key themes and concerns operating in artworks that consider accessibility overtly, as subject, material, and form. In addition to short weekly writing assignments, students will be asked to complete one research project on a topic related to explorations of accessibility in contemporary art-this research project may be in the form of a manuscript, curatorial proposal, or mixed-method creative project. Finally, we will schedule field trips throughout the course to nearby institutions to conduct informal ‘accessibility audits’, taking into account the way arts organizations construct visitor experience through wayfinding, guides, exhibition materials, and other accommodations-in anticipation of specific audiences.

**Requirements/Evaluation:** Paper(s) or report(s); Presentation(s); Creative project(s)

**Prerequisites:** At least one class in Art (Studio or Art History)

**Enrollment Limit:** 15

**Enrollment Preferences:** preference will be given to juniors and seniors who have taken two or more courses in art (studio or art history).

**Expected Class Size:** NA

**Grading:**

**Unit Notes:** Luke Fischbeck is a transdisciplinary artist, researcher, and technologist whose work considers computation, affect, collectivity, and
their practice-based research has diverse foundations in sound, technology studies, and performance.

Materials/Lab Fee: $40

ARTH 27  Introduction to Art Writing

Course Title: Introduction to Art Writing This course offers a dynamic exploration of art writing, providing students with the opportunity to refine their critical lens while engaging with various members of the Williams and Williamstown/North Adams community. Through a blend of theoretical discussions, practical exercises, and hands-on experiences, students will immerse themselves in different forms of art writing, ranging from wall labels to essays for general audiences.

Requirements/Evaluation: Paper(s) or report(s)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Priority given to Art and Art History majors

Expected Class Size: NA

Grading:

Unit Notes: Alexandra Méndez, Williams College 2017, holds an MA in Art History from UT Austin. She lives and works in San Juan, Puerto Rico where she has an art writing practice and is currently curatorial assistant at the Museo de Arte Contemporaneo.

Materials/Lab Fee: $110

Not offered current academic year

ARTH 28  Beyond Looking: Experiencing Multisensory Art

When we think about art, usually we think about painting or sculpture, but there is a whole world of art-making and experience that also engages listening, touching, smell, and even taste. In this course we will examine a range of modern and contemporary artists who create immersive or multisensory works, or art projects that require audience participation. In addition, we will think together about artworks that are conventionally visual to understand how even more traditional works can communicate and open up multisensory possibilities for the viewer. This course emphasizes being in museum spaces and spending time with works of art at Williams and other local museums. Students will also have an opportunity to be in conversation with other specialists from these institutions, to learn first-hand about topics like cutting-edge approaches to curating multimedia art for diverse audiences or using digital storytelling to make museum collections more accessible. Artists discussed range from billboards by Korean-American Deaf artist Christine Sun Kim to Jacoby Satterwhite’s immersive installations that engage queer theory; Wolfgang Laib’s pollen “sculptures”; James Turrell’s sensory immersion installations of light and space; Ermenzo Neto aromatic hanging sculptures; and participatory works by Rirkrit Tiravanija, Carsten Höller and EJ Hill, to name just a few, as well as Jeffrey Gibson’s installation and performance series on view at MASS MoCA winter 2025.

Requirements/Evaluation: Paper(s) or report(s); Presentation(s); Creative project(s)

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Priority will be given to upper-level students who have not yet taken an art or art history course at Williams; if still overenrolled, students meeting the above criteria will be asked to submit 1 paragraph expressing their interest in the course.

Expected Class Size: NA

Grading:

Unit Notes: Caitlin Woolsey is an art historian who focuses on the historical intersections of visual art, media, and performance in the twentieth century. She is assistant director of the Research and Academic Program at the Clark and teaches in Grad Art.

Materials/Lab Fee: $50

Attributes: EXPE Experiential Education Courses  STUX Winter Study Student Exploration

Not offered current academic year
ARTH 31 (W) Senior Thesis: Art History
To be taken by students registered for ArtH 494. For requirements of entry into the course, please see “The Degree with Honors in Art, Art History” in the catalogue or on the Art Department’s webpage.

Class Format: independent study
Requirements/Evaluation: Independent research and writing, attendance at sessions at Sawyer Library, Clark Institute Library, and Williams Writing Center
Prerequisites: Submission of thesis application, according to guidelines in course catalogue, and departmental acceptance into ARTH 494
Enrollment Limit: 8
Enrollment Preferences: Students need permission of the department to register for this course
Expected Class Size: 8
Grading: pass/fail only
Not offered current academic year

ARTH 33 (W) Honors Independent Study: Art History
To be taken by candidates for honors by the independent study route.

Class Format: independent study
Grading: pass/fail only
Not offered current academic year

ARTH 51 (W) International Study Trip
The International Study Trip, required of all first-year students in the Program, is unique among graduate art history programs. Students travel as a group for approximately three weeks, accompanied by the Program Director and other faculty. The Program covers the cost of travel, accommodation, admission, and additional expenses. Locations for study are selected based on faculty expertise and interest and have included in recent years: Italy, Sicily, Denmark, Sweden, Great Britain, France, Austria, Hawaii, Australia, Japan, China, Taiwan, and Russia.

Requirements/Evaluation: Attendance and participation in trip activities.
Prerequisites: None
Enrollment Limit: 13
Enrollment Preferences: Grad students only. Required for grad students in their first year.
Expected Class Size: 13
Grading: pass/fail only
Attributes: ARTH post-1800
Not offered current academic year

ARTH 99 (W) Independent Study: Art History
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: Independent study
Grading: pass/fail only
Not offered current academic year

- Stefanie Solum, Professor of Art
- Junli Song, Gaius Charles Bolin Fellow in the Art Department
The Department offers students different paths to explore the vital connection between visuality and creativity. With courses of study in the History of Art and the Practice of Studio Art (or a combination of History and Studio), the Major is designed to train students to develop the technical, conceptual, critical, and historical tools they need to engage the visual world.

ADVISING

Majors are expected to discuss their choice of courses and path through the major with their advisor or another professor in the department. Official departmental advisors for each route through the major (listed here below) are available to field general questions concerning curriculum, requirements, and planning to study away.

Art History Faculty Advisor: Michelle Apotsos
Art Studio Faculty Advisor: Laylah Ali
History and Studio Faculty Advisor: Michelle Apotsos and Laylah Ali

ART STUDIO

The Studio division of the art major has been structured to develop students’ perceptions and imaginations as they investigate a variety of visual media and to foster the development of a critical understanding of making art to support creative interests.

Major Requirements

The Studio Art major requires a minimum of nine courses:

- ARTS 100 Drawing I
- One art history course (preferably taken by the end of the junior year)
- A combination of at least three 100 and 200-level courses in three different media (ARTS 100 and tutorials do not satisfy this requirement)
- ARTS 319 Junior Seminar
- One 300-level ARTS course
- One elected ARTS course
- ARTS 418 Senior Seminar

The numbered sequence of courses in the Studio Art major is intended to develop knowledge and skills appropriate to students’ levels of experience, ultimately supporting original, independent work at the 400-level. ARTS 100 is an introduction to the principles of drawing and design, which are the foundation of visual expression. An art history course not only increases visual knowledge of other periods and cultures, but also provides exposure to the methods of visual analysis. 100 and 200-level ARTS courses introduce the relation between form and content and serve as introductions to a variety of media including architecture, painting, performance, photography, printmaking, sculpture, and video. 300-level courses place greater emphasis on the application of visual skills to thematic concerns, and to the development of the student’s individual vision. The capstone to the major, ARTS 418, provides a comprehensive, professional exhibition experience. Students not only define, research, and create an original body of work, but are also engaged in all aspects of producing an exhibition at the Williams College Museum of Art.

The faculty encourages students to begin exploring studio art in the first year so that they can fully explore a variety of media in preparation for independent work in the junior and senior year. A successful route through the major might look like this:

First year: two classes at the 100 and/or 200 level in different media and an art history class. We encourage students to explore media with which they are unfamiliar, as doing so provides a good base and allows for more flexibility later on. While there is only one art history class required for the major, we encourage students to take advantage of the rich art history offerings throughout their four years of study.

Second year: at least two 100 and/or 200 level courses.

Third year: Junior seminar, a 200- or 300-level course and a possible second art history class.

Fourth year: one 300-level course, ARTS 418, and other courses chosen to support your individual interests.

HISTORY AND STUDIO

This route offers students the opportunity to propose a course of study that investigates a particular medium or a particular issue bridging both wings of the department. Examples of past History and Studio projects include topics related to architecture, curating, and performance, but are not limited to these.

In many cases, it is better to choose the Art History or the Studio Art route, to the major, while taking additional courses in the other wing, as desired. The History and Studio route is offered as a third option and requires approval.

The application for the History and Studio route must include both a written statement and a list of proposed courses. It must be approved by an
advisor from both Art History and Studio Art and be submitted to the department’s administrative assistant before registering for the major.

History and Studio students whose projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ARTS 418) with permission of the instructor and to participate in the senior Studio exhibition. Those seniors with a History emphasis can apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Thesis Seminar (ARTH 494) which culminate in a thesis and thesis presentation. Or, a student may propose a senior independent study.

**Major Requirements**

**The History and Studio major requires a minimum of nine courses:**

- Any TWO of the following six courses: ARTH 101, 102, 103, 104, 105 or 106
- ARTS 100-level course
- ARTS 200-level course
- ARTH Methods OR ARTS 319 Junior Seminar  [NOTE: starting in 2024 – 2025, History and Studio majors may take ARTH 301 or ARTH 302 to satisfy the ARTH methods requirement]
- ARTS 400-level OR 500-level course
- ARTS elective
- ARTH elective
- ARTS 300-level course

OR ARTS 418 (with permission), if pursuing a Studio tracking an Art History track

OR an ARTH 400-level course or ARTH 494 (with permission), if pursuing an Art History track

The application for the History and Studio route must include both a written statement of purpose and a list of proposed courses. Both must be approved by two advisors, one from Art History and the other from Studio Art, and be submitted to the department’s administrative assistant before the student may register for the major.

History and Studio students whose ongoing projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ARTS 418) with permission of the instructor and to participate in the senior Studio exhibition. Or, a student following the Studio Art track may propose a senior Independent Study project in order to pursue Honors. Those History and Studio majors with an Art History emphasis may apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Honors Seminar (ARTH 494).

One advisor from Art History and one from Studio Art must sign off each semester before a student may register for classes.

**THE DEGREE WITH HONORS IN ART**

Students who wish to become candidates for the degree with honors must show prior evidence of superior performance in the major as well as research capabilities to carry out the proposed project.

**Art Studio**

Studio art concentrators who wish to be candidates for honors are required to take an extra studio course, of their choosing, for a total of ten courses. One of the ten courses must be the 400-level Senior Seminar (ARTS 418). Students must also take the Honors Independent Study course (ARTS 31) during Winter Study of their senior year. Studio faculty will provide feedback on the progress of the honors project at the beginning of the Spring semester.

Honors candidates enrolled in the Senior Seminar must demonstrate prior experience in the media chosen for the honors work. This proof may consist of one or more 200-level courses in the medium, course work at the 300 level, and/or a portfolio demonstrating the student’s proficiency in the media chosen for the honors project. This work must be presented to the instructor of the Senior Tutorial at the start of the Spring semester. At the end of the Spring semester of senior year, honors candidates will orally defend their work in the senior exhibition at WCMA. The entire studio faculty will attend each defense. Based on the work and the oral defense, the studio faculty (as a whole) will designate honors, high honors or no honors.

**History and Studio**

History and Studio majors may follow either the Studio Art or Art History route to honors. Alternatively, a student may pursue honors through an Independent Study project, to be undertaken during Winter Study and the Spring semester under the guidance of their two advisors.

The review process for the honors candidates in the senior seminars (ARTS 418 or ARTH 494) will proceed according to the regular honors process for the respective wing of the Art Department, and will include both advisors. If the honors project is conducted via an Independent Study, the final project will be submitted to the two advisors who will determine whether or not it will receive honors. If the student chooses not to follow the Honors route, they may take either a 300-level ARTS course, or a 400-level ARTH seminar instead.
STUDY ABROAD

The Art Department encourages students to travel during Winter Study, and to study abroad for a semester during the junior year. Students planning on studying abroad must: consult a departmental advisor, leave a copy of their Study Away Petition on file in the Department, and consider the required junior seminars (ARTH 301 and ARTS 319) that prepare students for the independent research and/or independent artistic production which is the focus of the senior year.

Art Studio

Studio Art Majors must take the required Junior Seminar (ARTS 319) in the fall semester of their junior year, unless they are planning to study abroad for a full year, or unless they have permission of the chair of the department (in these cases, they may take the required class in their sophomore or senior year). The Department does not grant pre-approval or provisional credit for study abroad courses; studio majors must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 1 requirement for the major can be taken per semester abroad (2 if one of the courses is in art history). Courses must be in fine arts fields to qualify for major credit. ARTS 319 and ARTS 418 cannot be fulfilled abroad.

History and Studio

History and Studio majors must plan accordingly for their elected junior seminar. For art history courses taken abroad, history and studio majors can seek provisional credit for courses that appear to satisfy requirements for the major. No provisional credit is possible for studio courses; students must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 2 major requirements may be satisfied per semester while abroad (one in studio, one in history), with no more than 3 courses total. History and studio majors cannot satisfy ARTS 319 or any 400-level courses abroad.

ARTS 101  (F)  Drawing I

Drawing provides a wonderful vehicle for encountering and interpreting your experiences. This course will heighten your awareness of the visual world, teach basic drawing skills, and demonstrate how drawing operates as a form of visual exchange. A variety of materials will be covered as you explore the 2-dimensional concepts of line, form, proportion, gesture, spatial depth, and value. Towards the latter part of the semester, more emphasis will be placed on the use of drawing as idea, and you will be encouraged to express yourself through the visual language of drawing.

Requirements/Evaluation: This is an intensive studio course, requiring working in the drawing studio outside of scheduled class hours. Grading takes into account the quality and quantity of work produced, depth and quality of investigative process, participation in critiques, and attendance.

Prerequisites:  none

Enrollment Limit:  18

Enrollment Preferences:  Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students

Expected Class Size:  18

Grading:  no pass/fail option,  no fifth course option

Materials/Lab Fee:  $350-$500 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions:  (D1)

Not offered current academic year

ARTS 102  (F)(S)  Drawing I

This course is designed to introduce the fundamentals of drawing. A significant portion of class time will be devoted to learning some of the basics of drawing, such as line, gesture, composition, and value. Acquiring technical skill is an important goal of this class, and intensive weekly assignments are a significant part of that process. Studio classes will also provide a general overview of broader art concepts, such as theme, consistency and style, to further expand their understanding of contemporary drawing practices.

Requirements/Evaluation: quality of work produced as well as successful completion of all assignments and attendance

Prerequisites:  none
Enrollment Limit: 18
Enrollment Preferences: art majors, first-years and sophomores
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $350-$500. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)

Fall 2024
STU Section: 01 M 10:00 am - 12:50 pm Gerald E. Sheffield

Spring 2025
STU Section: 01 M 10:00 am - 12:50 pm Gerald E. Sheffield

ARTS 103  (S) Drawing I
This course is designed to introduce students to perceptual, experiential and analytical moments associated with the language of drawing, and to do so in ways that offer the opportunity to see the world with greater clarity, and with a broader understanding of art and the visual language. This course provides technical skills associated with observational drawing, experiential moments with a variety of materials, and the opportunity for self expression and the communication of ideas. Each studio class blends drawing practices and exercises designed to further one's understanding of the language of drawing, and more broadly, offers a foundation for further study in the visual arts.
Requirements/Evaluation: Individual critiques, a mid-term critique, a final portfolio submission, attendance, effort and participation
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students
Expected Class Size: 18
Grading: no pass/fail option, yes fifth course option
Materials/Lab Fee: $350-$500 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)

Spring 2025
STU Section: 01 W 7:00 pm - 9:40 pm Frank Jackson

ARTS 104  (F)(S) Drawing I
This inclusive drawing course welcomes students who are completely new to the study of art as well as those with prior experience. Using the tools of perceptual drawing as a shared language, students will embark on drawing inquiries and projects that bridge representational and abstract approaches to image making. Drawing from nature, communally built, immersive sculptural installations, architecture, light phenomena and the human body, students will actively seek new ways to engage with the visual representation of form and space, and the construction of meaning through images. The course will emphasize the craft of drawing through explorations of classic graphic media--charcoal, chalk, crayon, pencil--as well as experimental materials including foraged botanical inks, unusual drawing surfaces and collage. In addition to demonstrations and studio exercises the course includes weekly drawing assignments, group critiques, midterm and end of semester projects, and a final portfolio review. Skill-oriented formal learning will be supported by occasional readings, critical discussion and direct engagement with artworks from the drawing collections of WCMA and the Clark.
Requirements/Evaluation: Homework assignments, midterm critique, final critique, a final portfolio submission, attendance, effort and participation
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students
**ARTS 110  Digital Photography, Identity and Place**

This introductory level course offers an in-depth exploration of digital photography. Emphasis is placed on the camera's relationship to the body and constructions of identity. Students will develop a fundamental control of photographic techniques through various exercises, experimentation, field, at home and/or studio experience. Students will learn how to use DSLR cameras and introductory level Photoshop editing techniques to create a personal body of work that examines the medium's role in representing various identities. Additionally, visiting artist lecture presentations and thorough critique will foster theoretical and visual literacy for the analysis of works. How is photography implicated in the construction and performance of identity? How does it complicate national, cultural, gender, race and sexual identity.

**Requirements/Evaluation:** Students must budget roughly ten hours per week outside of class for photographing and editing; Students must complete all projects on time. Students will create a photographic body of work with accompanying artist statement. Students must be active participants during class discussion and critiques.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Art majors who have not yet taken an introductory photography class

**Expected Class Size:** 12

**Grading:**

**Materials/Lab Fee:** $350-$500 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1)

---

**ARTS 111 (S) Introduction to Video Art**

This introductory-level course offers an expansive definition of video art, exploring the overlap between video and other disciplines within contemporary art. Video art's inherent heterogeneity is examined as a vital part of the medium's identity and as a radical mechanism for cultural discourse. Coursework includes lectures, readings, discussions, hands-on tutorials, production assignments, and active participation in dialog/critique. Camera, sound, lighting, and editing techniques are taught alongside key theoretical, historical, and aesthetic approaches to video art. Experimentation and interdisciplinary approaches are encouraged in considering how video art hybridizes with other media, ingests emerging technologies, and develops new distribution models. Assignments emphasize the creation and presentation of an original body of video work for critique, alongside research, writing, and discussion of theoretical texts and artworks, including the work of Hito Steyerl, Trinh T. Minh-ha, Joan Jonas, Arthur Jafa, Pipilotti Rist, Cauleen Smith, Sondra Perry, Martine Syms, among others.

**Requirements/Evaluation:** Quality of work produced, depth and quality of investigative process, participation in critique and discussion, class citizenship, attendance

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Preference will be given to art majors, sophomores, juniors, and seniors in that order. In case of over enrollment, there will be a waitlist.

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option
Materials/Lab Fee: $250-350  Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Spring 2025
STU Section: 01    W 1:10 pm - 3:50 pm    Sarah  Rara

ARTS 112  (S) Introduction to Documentary Filmmaking  (DPE)
In a 2010 article, New York Times film critic A. O. Scott described documentary film as 'heterogeneous to the point of anarchy.' However, in the intervening decade, documentary has become simultaneously more commercial and formulaic. This course takes this notion of heterogeneity to heart, acquainting students with a wide array of creative approaches and key debates in documentary film. In addition to a historical, ethical and critical foundation in the field of documentary, students will acquire a basic grounding in the fundamentals of video production, including cinematography, sound and editing. Course requirements include class attendance and regular critiques, weekly film screenings and readings outside class, 2-3 minor filmmaking exercises, and major assignments in the form of 3-4 short nonfiction video projects.

Requirements/Evaluation: timely and committed completion of assignments, attendance and participation
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: majors have priority
Expected Class Size: 16

Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $250-$350. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions:  (D1)  (DPE)

Difference, Power, and Equity Notes: The practice of documentary film is centrally bound to ethics—who and how we represent onscreen. Historically, documentary has tended to gaze on marginalized communities in problematic ways; this course will make issues of power, race, class and representation central to the production of documentary media.

Spring 2025
STU Section: 01 M 1:10 pm - 3:50 pm     Cecilia  Aldarondo
STU Section: 02 Cancelled

ARTS 113  (S) Visual foundations: Locating the Self
In this hands-on, introductory level studio art class, students will learn methods in drawing, ink painting, and collage while being introduced to a variety of methods of organizing two-dimensional space (from Renaissance one-point perspective, to the multiple point perspective used in Chinese scroll paintings, and a variety of inventive contemporary approaches to addressing point-of-view through composition). In this class, we will explore who we are in relation to each other, the places we come from and the place in which we find ourselves. Artmaking will be used as a means of mapping the self as a relational entity, while considering how each mode of organizing space brings its own constraints and possibilities.

Requirements/Evaluation: projects, assignments, class participation, attendance
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: first-years and sophomores
Expected Class Size: 16

Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $300-$500. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions:  (D1)

Not offered current academic year
ARTS 117 (S)  Paint! An Introduction to Pigments and Binders

This introductory studio course offers a materials-based approach to painting. Guided by ancient artists' accounts and contemporary craft manuals, we will begin by making our own paints using non-toxic and inexpensive ingredients, combining earth and mineral pigments with binders like egg, oil, sap, casein, and wax. Experimenting with mark-making on a broad range of found and prepared substrates, we will carefully observe the affordances and constraints of each medium. Assignments will be simple and iterative: the semester-long repetition of a single, uncomplicated form will allow us to focus entirely on qualities of hue, texture, weight, transparency and opacity. Supplementary readings, museum visits, and group discussions will touch upon histories of pigment extraction and circulation as well as the production and evolution of paint media with special attention to environmentally gentle and sustainable practices. This course will include an introduction to the rare and ancient technique of buon fresco.

Requirements/Evaluation: Grading will take into consideration attendance, the timely completion of weekly studio assignments, the maintenance of a descriptive journal, engaged participation in studio exercises and group discussions, a demonstrated willingness to experiment, and active stewardship of our collaborative studio environment.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Students who pre-register should email the instructor a description of interest. Preference will go first to students dropped from the Spring 2022 Section of ARTS 223, and then to first-years and sophomores.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $400-$600. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Not offered current academic year

ARTS 121 (F) Performing Identities: Introduction to Video and Performance Art

This course introduces students to the intersections of video and performance art with a focus on the unique history of artists performing for the video camera. Engaging critical questions about the politics of the body, this course explores the wide range of ways artists have performed their identities through a direct engagement of the camera and centers the lineages of BIPOC, queer and feminist art. Students will learn video basics (camera, sound, lighting, and editing) while exploring the elements of performance art (identity, guise, self/representation, performativity, spectator, site). We will consider viewing contexts such as social media platforms and art institution installations. While no prior experience is required, students will be invited to engage their interests and experiences in performance, including theater, dance, music, speech/debate, comedy, athletics and more. Students are expected to do a significant amount of solo work outside of class as well as a self-directed final project exploring a subject matter of their choosing.

Requirements/Evaluation: Completion of all weekly assignments and final project, participation in critique and discussion, class citizenship, attendance

Prerequisites: None

Enrollment Limit: 16

Enrollment Preferences: Preference will be given to art majors, sophomores, juniors, and seniors in that order. In case of over enrollment, there will be a waitlist.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $250 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Not offered current academic year

ARTS 122 (F) Intro to Photography: Identity and the Absence of Representation

This introductory level course offers an in-depth exploration of the DSLR camera and image by utilizing photographic digital technology. Emphasis is placed on the camera's relationship to queer and marginalized subjects portrayed in the studio, domestic space as well as the landscape and sites of our imagination. Students will develop a fundamental control of photographic processes through technical exercises and experimentations. Students
will learn how to use DSLR cameras, editing techniques and photographic curation to create a portfolio and artist statement reflecting on a personal body of work that examines the medium’s role in representing both the personal and the political. There will be weekly readings and in-depth critiques to foster theoretical and visual literacy for the analysis of works. How is photography implicated in the construction and performance of identity? How does it complicate national, cultural, gender, race and sexual identity?

Requirements/Evaluation: Students midterm and final critique of their body of work and accompanying artist statement

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Art majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Fall 2024
STU Section: 01 W 10:00 am - 12:50 pm Ohan Breiding

ARTS 124 (S) Video Essay

This introductory studio course engages the genre of video essay within contemporary art. Situated at the intersection of video art and documentary film practices, video essay explores the interval between politics and aesthetics, fiction and non-fiction, in an attempt to create a personal language with which to describe the tension between social, political, and personal realities. Students gain hands-on video production experience with editing, cinematography, and sound design grounded in the editorial and rhetorical strategies of video essay which articulate a language of relationships: between sound and image, artist and subject, fact and feeling, memory and language. Self-referential and reflexive, video essay operates in a space of inquiry incorporating poetry, philosophy, autobiography, politics, and cultural studies. The course examines how artists working with video essay move across disciplines in pursuit of a renewed relationship to processes of observation, memory, and recognition. Assignments emphasize the creation and presentation of an original body of video work for critique, alongside research, writing, and discussion of theoretical texts and artworks, including the work of Chris Marker, Hito Steyerl, Trinh T. Minh-ha, Harun Farocki, Agnès Varda, Arthur Jafa, Barbara Hammer, Derek Jarman, Renee Green, Moyra Davey, among others.

Requirements/Evaluation: Quality of work produced, depth and quality of investigative process, participation in critique and discussion, class citizenship, attendance

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: art majors

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

Materials/Lab Fee: $250-$350 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Not offered current academic year

ARTS 125 (S) Introduction to Fresco Painting Materials and Techniques

This course offers a rare introduction to the materials, methods, and chemistry of buon fresco: the ancient craft of wall-painting with earth and mineral pigments onto freshly applied lime plaster. Fresco painting is an emphatically collaborative tradition, and as such we will treat the studio-classroom as a shared laboratory for collective study and practice. Working together, students will gain hands-on experience with every step of the fresco-painting process: we will grind earth and mineral pigments, sift riverbed sand, mix and apply lime plasters, and paint with pigment suspensions using bristle brushes while following recipes and instructions gleaned from artists’ accounts and painting manuals. Testing a range of fresco techniques on a series of portable panels as well as on a classroom test-wall, students can expect to develop both troweling and painting skills, and to discover the nuances of color and texture that can be achieved through various combinations of natural pigments and plaster. The course will encourage descriptive and
instructional writing, diagrammatic drawing, and photographic documentation as tools for craft stewardship and technical knowledge-sharing. Prior experience with drawing and/or painting will be helpful, but are not required. Lectures will provide a historic overview of fresco painting and its uses across cultures, and students will have an opportunity to explore a particular material, chemical, environmental, or socio-political aspect of the centuries-old wall-painting technique through the development of a final essay.

**Requirements/Evaluation:** Students are expected to produce a series of small fresco studies; to maintain a descriptive journal of processes, recipes and observations; and to submit one final essay (5-7 pages). Grading will also take into consideration attendance, the depth and quality of the investigative process, active participation in studio exercises and group discussions, and a demonstrated willingness to collaborate with peers.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Current and prospective Art Studio and Art History Majors. If over-enrolled, a wait-list will be maintained. Wait-listed students should submit a brief description of interest to the instructor.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $400-$600. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1)

*Not offered current academic year*

**ARTS 126 (S) Introduction to Digital Photography: Contemporary Photography Practices**

This introductory studio course focuses on the making, editing, and printing of digital photographs. Rooted in the creation of original artworks, the course exposes students to the digital camera as a tool for developing a personal visual syntax and a body of work throughout the semester. We study contemporary photography practices and issues from the 1970’s to the present, including portraiture, abstraction, documentary, performance, and more. The course oscillates between lectures and class discussions, critiques, technical demonstrations, and studio work-time. Through discussions and the study of artworks and texts, students will develop visual literacy skills to aid in the critical analysis, and creation, of photographs. Technically, students will learn to understand light and exposure, composition, color correction, a digital workflow through Adobe Bridge and Photoshop, and inkjet printing.

**Class Format:** Studio, seminar, lecture

**Requirements/Evaluation:** Students must budget 8 hours a week outside of class to photograph, edit, print, read, and write. Students will be evaluated on their effort and active participation, quality of work, contributions to discussions and critiques, midterm critique, final project, and artist statement.

**Prerequisites:** None

**Enrollment Limit:** 16

**Enrollment Preferences:** Art majors who have not yet taken an introductory photography course, Seniors, Juniors, prospective art majors. In case of over enrollment, a waitlist will be created.

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $300 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1)

STU Section: 01 F 1:10 pm - 3:30 pm Genesis Baez

**ARTS 127 (S) Introduction to Digital Photography: Photography & Identity**

This introductory studio course focuses on the making, editing, and printing of digital photographs, with particular emphasis on understanding photography’s crucial role in shaping, revising, and visualizing identities. Rooted in the creation of original artworks, the course exposes students to the digital camera as a tool for developing a personal visual syntax and a body of work throughout the semester. The course oscillates between class discussions, critiques, technical demonstrations, and studio work-time. We’ll consider how photography intersects with digital technologies,
surveillance, media, colonial legacies, race, feminisms, gender, queerness, and archives. Through discussions and the study of artworks and texts, students will develop visual literacy skills to aid in the critical analysis, and creation, of photographs. Technically, students will learn to understand light and exposure, composition, color correction, a digital workflow through Adobe Bridge and Photoshop, and inkjet printing.

**Requirements/Evaluation:** Students must budget 8 hours a week outside of class to photograph, edit, print, read, and write. Students will be evaluated on their effort and active participation, contributions to discussions and critiques, midterm critique, final project, and artist statement.

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Art majors, seniors who have not taken a photography class at Williams, and everyone else.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $300 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1)

Not offered current academic year

**ARTS 131 (F) Moments of intimacy in photography**

This course is an introduction to the black & white silver photographic process. Students will learn the mechanics of the analog 35mm camera, the process of developing films into negatives, and the technique of making perfect prints. By studying different approaches in the works of photographers from the early 20th century to the contemporary period (August Sanders, Walker Evans, Roy DeCarava, Duane Michals, Nan Goldin, Klavdij Sluban, etc.), students will develop their personal vision and create a portfolio related to the theme of the course, moments of intimacy. Finally, the students will experience how the ultimate step of the photographic film process, printing in the darkroom, can serve as an intimate and spiritual practice that reveals their creativity. Each student will exhibit a series of photographs along with an artist statement.

**Requirements/Evaluation:** One midterm evaluation and a final critique of the student's body of work, including the accompanying artist statement.

**Prerequisites:** Knowledge of black and white analog photography is preferred but not required.

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference goes first to studio art majors needing major credit, then to other art majors, then to any interested student, beginning with first-years, then second-years, then third-years, then fourth-years

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $250 lab fee. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1)

Not offered current academic year

**ARTS 132 (F) Introduction to Sculpture: From Multiples to Inflatables**

This hands-on studio course will introduce students to techniques in three-dimensional making including cutting and joining wood, bending and welding steel, casting with plaster, and making inflatable forms. Technical workshops will be augmented with museum visits and presentations on contemporary artists who explore a diverse range of subjects including the body as a site for socio-political negotiation (A K Burns), art as a site for healing (Guadalupe Maravilla), sculptures as tools for performance (Tamar Zohara Ettun), using found material rich with personal and cultural associations (David Hammons), and exploring issues of ecological sustainability (Mary Mattingly). Through prompt-based assignments, students will be encouraged to develop their own visual and material poetics by exploring themes of importance to them.

**Requirements/Evaluation:** This is an intensive hands-on studio course, requiring working in the sculpture studio outside of scheduled class hours. Grading takes into account the quality and quantity of work produced, depth and quality of investigative process, participation in critiques, and attendance.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Art Studio majors have priority

**Expected Class Size:** 12
ARTS 133 (F) Introduction to Video Art

This studio course focuses on honing visual literacy and personal visual language through the study and creation of video artworks. An introduction to video art histories and practices, this course will expose students to a variety of approaches and perspectives to creating video, emphasizing the digital camera as a tool for re-framing and exploring understandings of ourselves and environments. Thematic topics include performance and identity, place and landscape, the internet and social media, amongst others. Students will learn to make, edit, critically discuss and share digital videos, with an emphasis on experimentation. The semester consists of various creative assignments, screenings, lectures by visiting artists, technical workshops in camera use, sound recording, and post production, and will culminate in the creation of a final video-based project.

Requirements/Evaluation: Quality of work produced, effort and commitment, attendance, participation in critique and discussions.
Prerequisites: None
Enrollment Limit: 16
Enrollment Preferences: Studio Art majors, seniors, prospective art majors, juniors, everyone else, in that order. In case of over enrollment, a waitlist will be created.
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $250-350 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)

Fall 2024
STU Section: 01  W 1:10 pm - 3:50 pm  Rit Premnath

ARTS 134 (S) Mokuhanga and shibori: Explorations in Japanese woodblock printmaking and textile dying

Within a wider historical context which emphasizes East Asian innovation within printmaking and textile arts, this course is a hands-on intensive studio class which focuses on traditional Japanese techniques of woodblock printing and indigo dying. Japanese woodblock printmaking reached its height during the Edo period, leaving us with iconic images such as Hokusai’s The Great Wave. Known as mokuhanga, this form of printmaking utilizes water-soluble inks and tools which can be used in any space, making this a sustainable process both creatively and environmentally. Students will learn the basics of mokuhanga printmaking, as well as a later offshoot that began in Provincetown in the United States in the 20th century, known as white line printmaking. Textile explorations will focus on the tradition of indigo dying including a unique form of shibori, known as mokume shibori, as well as one or two other methods of resist dying. All projects allow students the freedom to create and work with personal imagery of their choosing.

Requirements/Evaluation: Grading based on projects, assignments, class participation, attendance.
Prerequisites: None
Enrollment Limit: 12
Enrollment Preferences: art majors though students with no prior experience also encouraged to take the class
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $400 to $600 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)
ARTS 200  (F)  Designing Character: Introduction to Costume Design for Performance

Cross-listings:  THEA 305

Secondary Cross-listing

This course introduces students to the processes and techniques of costume design for performance. With a focus on building character through research and design, students will practice developing costume design concepts and using them to illuminate a script, tell a story, and explore characters. Coursework is project-based and will include reading plays, researching period, rendering characters in costumes, expressing design ideas, and sharing and receiving feedback. Class projects will include The Bald Soprano by Eugene Ionesco and Intimate Apparel by Lynn Nottage. Drawing experience not required, but you must be brave enough to try.

Requirements/Evaluation: Project-based costume design work includes period research, drawing, painting, short writing assignments, and presentation. Class participation includes sharing work in process, receiving feedback, and offering generous feedback to classmates.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Theatre and Art Studio majors

Expected Class Size: 10

Grading:  yes pass/fail option,  yes fifth course option

Unit Notes: does not satisfy any requirements for the Art major

Materials/Lab Fee: $100 lab fee charged to term bill

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 200(D1) THEA 305(D1)

Fall 2024

STU Section: 01    W 1:10 pm - 3:50 pm     Sydney Maresca

ARTS 201  (S)  Worldbuilding: Design for the Theater

Cross-listings:  THEA 201

Secondary Cross-listing

This course examines designers' creative processes as they investigate a theatrical text and then dream-into-being the fictional worlds of a hypothetical production. Class will consist of several practical projects in multiple areas of design. We will practice a two-pronged technique in response to a text: developing a personal, intuitive creative response while simultaneously supporting all logistical requirements, resulting in an inventive yet dramaturgically sound design. Emphasis will be on folding this individual work process into a larger group collaboration by refining methods of communication, presentation, and group critique.

Requirements/Evaluation: Coursework is group class discussion and critiques, paired with several hands-on projects throughout the term.

Prerequisites: THEA 101 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Theatre majors

Expected Class Size: 8

Grading:  yes pass/fail option,  yes fifth course option

Unit Notes: this course is a prerequisite for all upper-level design and directing courses; this course does not count toward the Art major

Materials/Lab Fee: $125 for materials and copying charged to term bill

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 201(D1) THEA 201(D1)
ARTS 202 (S) Painterly Printmaking
This course focused on monotype printmaking, an improvisational and expressive form of painting on a plexiglas plate to make a unique print. Students will learn a variety of painterly and experimental techniques including but not limited to: monotype, stencil, collagraph, embossment, chine-colle, and transfer techniques. Weekly assignments will be process-based with no limitations placed on subject matter or content, but students are encouraged to build their own lexicon of imagery and interests. The final third of the course will be a student-guided final project where interdisciplinary approaches will be welcome, such as installation, books/zines, animation, and site-specific interventions (to name a few!). Students will be expected to work a minimum of 10 hours outside of class in the print studio. $300 to 500 lab fee
Requirements/Evaluation: Students will have weekly assignments, a mid-term portfolio review, and a final project.
Prerequisites: Any ARTS class at Williams.
Enrollment Limit: 12
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $300-500. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)
Not offered current academic year

ARTS 204 (F) Introduction to Performance Art: Bodies, Borders and Resistance
In this introductory tutorial class, we will explore time, space and politics through the presence of the artist's body as well as the relation between the artist and the audience. We will study the history of Performance Art, beginning with its origins in the early 20th century and leading us to contemporary Performance Art work presented in art contexts and in everyday life. We will read and discuss texts, watch films and videos, attend live events and analyze the role of photography as documentary witness, all via themes of liveness and ephemerality. Using this information as inspiration, we will create our own performances, which will include designing, writing and performing, as well as watching and documenting the performances through photography and video, accumulating in intimate conversations, feedback and critique. Specifically, we will think about and create Performance Art through our own body's lived experiences--exploring the borders of the body through race, gender and ability as well as relationships to place and land--to create, rebel and resist.
Requirements/Evaluation: We will discuss weekly readings and create live performances which will be evaluated throughout the semester. You will be required to create a unique performance art piece for your midterm and final that will also be documented photographically and via video/sound.
Prerequisites: One studio art class or permission of the instructor
Enrollment Limit: 12
Enrollment Preferences: Art Majors
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $100-$300 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)

ARTS 206 (F) Installation Art
This intensive studio art course welcomes students invested in any medium--including drawing, painting, sculpture, video and performance--to
consider how the placement of materials in relation to each other shapes the meaning of an artwork. We will expand beyond traditional exhibition strategies by exploring the possibilities that various locations hold, both indoors and outdoors. When, how and where we see an artwork shapes the meaning of our encounter. Through workshops, presentations and studio projects, we will deepen our consideration of material relations within an artwork while also learning how to choreograph a viewer’s encounter with our artwork. This course will introduce students to global trajectories of Installation Art that include the varied practices of Pope L., Kishio Suga, Sheela Gowda, Xu Bing, Abraham Cruzvillegas, and Ann Hamilton, to name a few.

Requirements/Evaluation: projects, assignments, class participation, attendance

Prerequisites: students are required to have taken at least one ARTS 100-level class in sculpture, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Art Studio Majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $400-$600. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1) Not offered current academic year

ARTS 222 (F) Critical Practice of Architecture: Theories, Methods, and Techniques (DPE)

Cross-listings: ENVI 202

Primary Cross-listing

In this course, students will transform an architectural or urban space through design interventions that contribute to reorienting public perception, imagination, and politics. Skills taught include methods and techniques for critical architecture practice, including architecture drawing, 2D graphic design, and 3D modeling (digital and physical). Students will also build on design strategies (e.g., spatial hijacking and détournement), community architecture, and visual techniques to rethink normative understandings of space and time. Through selected readings and discussions, we will examine key ideas that have inspired design thinking and activism. The class culminates in a presentation to external reviewers and a final exhibition.

Requirements/Evaluation: This is an intensive studio tutorial requiring working in the architecture studio and/or PC lab outside of scheduled class hours. The class will meet in large and small groups throughout the semester for critique and discussion. Assignments include weekly discussions and design projects requiring drawings and model design. Final project: design project to reorient public perception, imagination, and politics. Evaluation will be based on the design quality at theoretical/conceptual levels.

Prerequisites: Drawing I or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1) (DPE) This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 222(D1) ENVI 202(D1)

Difference, Power, and Equity Notes: This design studio invites students to think critically about how power, equity, and difference are manifested through the built environment. It will equip them with the tools to become active agents of change through design activism. We will use design as a cultural practice and creative technique to envision more just and equitable futures through interventions in architectural or urban spaces.

Attributes: ENVI Humanities, Arts + Social Science Electives

Fall 2024

STU Section: 01 TR 9:55 am - 11:10 am Giuseppina Forte
ARTS 225 (S) Video Ecologies
This studio course in video art investigates human connection with landscapes and multi-species worlds, developing strategies by which our environment is witnessed, altered, and negotiated through videographic acts. Video ecologies consider our environment as relational and invested with notions of identity. What can immersion in our environment as apprehended through the senses (including and beyond vision) reveal about historical and lived experience? How might video serve to open up new understandings, relationships, entanglements, accountabilities? This course will critically examine socio-political and personal dimensions of video art through readings and discussion engaging with environmentalism, intersectional feminism, feminist technoscience, queer theory, crip theory, and postcolonialism. With in-depth instruction on technical and conceptual strategies used in video art, the emphasis of the course will be on the creation of an original body of work that includes several short video assignments and a substantial final video or sound work grounded in research on a specific ecological subject chosen by the student. In-class tutorials provide hands-on experience with lens-based production strategies in the context of historical and contemporary examples of video art that explore land as a site for multiple temporalities and multi-species entanglements.

Requirements/Evaluation: quality of work produced, depth and quality of investigative process, participation in critique and discussion, class citizenship, attendance.

Prerequisites: 100 level video course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Art majors with preference to seniors, juniors, sophomores in that order.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $250-$350 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Not offered current academic year

ARTS 226 (S) Intermediate Photography: Photography and the Senses
In the speed of a digital world, what can a slower, more tactile engagement with our materials and surroundings teach us about ourselves? This studio course builds on the skills of Introduction to Digital Photography through a multi-sensorial, tactile, and experimental approach. Students learn more advanced techniques in Photoshop and inkjet printing, and explore various paper types, material possibilities, and installation techniques. Through a series of creative assignments, we tap into all 5 senses (not just vision) in order to unlock embodied knowledge and new ways of seeing. Activities include, but are not limited to, engaging with sound experiments, creative writing games, activities exploring texture and material in nature, collage, and where appropriate, somatic exercises. An emphasis will be placed on play and experimentation, hands-on learning, and class discussions of artwork, texts, poetry, and other media. Students will work to create a series of works on a topic of their choice, to be discussed in regular critiques.

Requirements/Evaluation: Students must budget roughly ten hours per week outside of class for photographing, editing and printing. Students must complete all projects on time. Students must participate in class discussions and critiques, and submit a final project and artist statement.

Prerequisites: Intro to Digital Photography

Enrollment Limit: 12

Enrollment Preferences: Students who have taken Introduction to Digital Photography

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

ARTS 229 (S) Radical Sonics
Radical Sonics explores sound in the practice of contemporary art, interrogating how listening can be used to actively address societal, geopolitical, and ecological concerns. Radical Sonics combines research and production in modalities of noise, deep listening, remote listening, voice, sound
objects, soundscapes, acoustic ecology, Deaf studies, field recording, spatialized listening, silence, and assistive listening. This course places an extended focus on listening as a radical strategy within contemporary art and critical discourse, addressing approaches to sonic materialism and audio culture found in feminist, queer, and crip theory. Screenings, readings, and discussion are supported by hands-on workshops in acoustics, formalized listening strategies, recording, editing, post-production, installation, and documentation. The course combines theory and practice, asking students to produce sound projects informed by an awareness of the historical and conceptual issues that structure sonic media and technologies. Students leave this course with skills in listening, performance, audio production, and critique, building a strong foundation for creating sound-based projects intersecting with other media.

Requirements/Evaluation: Quality of work produced, depth and quality of investigative process, participation in critique and discussion, class citizenship, attendance.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art Majors. If overenrolled there will be a waiting list. Preference to sophomore, junior, freshman, senior in that order.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Materials/Lab Fee: $250-$350 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

STU Section: 01    T 9:55 am - 12:35 pm     Sarah Rara

ARTS 230 (S) Drawing II

This intermediate drawing course focuses on technique, style and content. Class sessions will focus on representing the human figure in representational and abstract styles, including cubism and abstract expressionism. Homework projects will focus on developing individual concepts and personal expression. Exercises will include traditional materials on paper as well as non-traditional methods and exercises. The course culminates with an independent project of work in series. Critique sessions will be held every other week in small, breakout meetings, which will be scheduled when class begins.

Requirements/Evaluation: the quality of work produced, participation in class discussions and critiques, successful completion of all assignments and attendance

Prerequisites: ARTS 100. Students with significant drawing or painting experience who have not taken Arts 100 may submit a portfolio for review. Contact the professor for portfolio requirements.

Enrollment Limit: 12

Enrollment Preferences: Art majors, Seniors, Juniors, Sophomores, First Year students

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $350 - $450 lab fee charged to term bill

Distributions: (D1)

Spring 2025

STU Section: 01    R 8:30 am - 12:50 pm     Pallavi Sen

ARTS 234 (S) A Watery Place: Photography and the Fluid Process of Belonging

"I am a singular, dynamic whorl dissolving in a complex, fluid circulation," writes the feminist and environmental theorist Astrida Neimanis. How may we use lens-based media to think through belonging in more fluid terms? This studio course in photography explores belonging as an unfixed, continuous process. What does belonging mean to you? Can you belong to something that you can't see, or, as the poet Warsan Shire writes, to a place that won't let you stay? How are our attachments shaped, disrupted, and conjured? From Instagram accounts archiving images of communities pre-gentrification, to experimental films about family made with weather-damaged film, to self-portraiture and documentations of a changing landscape,
this course explores the nuances that photography and lens-based media may reveal about the political and affective dimensions of belonging. The emphasis of the course will be on the creation of photographic and lens-based artwork, to be discussed in critique. We'll support our process by first studying texts and artworks that situate belonging in relation to place and place-making, geography, and ecology. We'll expand into more fluid embodiments of belonging, particularly in the context of migrations and diasporas, family and community, spirituality, climate change and our futures. We'll speculate how lens-based media may not only visualize experiences of belonging (or non-belonging), but facilitate connection. Technically, students will learn more advanced techniques in Photoshop and inkjet printing, and will explore various paper types, material possibilities, and installation techniques.

Requirements/Evaluation: Students must budget 10 hours a week outside of class to photograph/film, edit, print, read, and write. Knowledge of making photographs or video with dslr cameras, and editing/printing with Adobe Lightroom and/or Photoshop are required. Students will be evaluated on their effort and active participation, contributions to discussions and critiques, midterm critique, final project, and artist statement.

Prerequisites: Art majors who have taken a prior photo class at Williams, or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Art majors working with themes of identity politics, home, place and the environment in their artwork and/or research.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: $250 - $350. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

ARTS 235  (F)  Intaglio Printmaking

Intaglio printmaking--also known as etching--is a graphic medium in which the surface of a metal plate is transformed, inked and pressed onto paper to create an image. From its 16th-century origins to the many innovative forms of intaglio being practiced by artists today, etching offers a surprisingly flexible and expansive array of graphic possibilities that intersect with drawing, painting, collage and arts of the book. This course will begin by surveying different approaches to transforming the surface of a copper etching plate through drypoint (drawing directly into the plate with a metal stylus); soft and hardground etching (“biting” an image into the plate using selective acid exposure); and aquatint (using acid to create a range of tonal effects). Students will learn methods for printing their etched plates in intentional and exploratory ways. As they work toward developing an individualized formal language appropriate to their subject matter and ideas, they will be encouraged to think about material decision making—their choice of inks, paper, registration, printing technique, etc.—in conceptual terms. The course will culminate with a final project in which students will develop a serial body of work exploring constellations of imagery and the idea of the multiple, taking strategic cues from collage, artist books and other forms of narrative object making. As a rigorously hands on experience, the course will foreground transformative material processes and self-directed studio practice, while also incorporating slide lectures, occasional readings and engagement with WCMA’s contemporary print collection.

Requirements/Evaluation: quality of work, investment of time and focus, active presence in discussions and critique, attendance, willingness to experiment, contributions to collaborative studio environment

Prerequisites: Any 100-level studio art course

Enrollment Limit: 12

Enrollment Preferences: based on portfolio and student questionnaire

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300-$550 charged to term bill; lab fees are covered by the Book Grant for students receiving financial aid.

Distributions: (D1)

Not offered current academic year

ARTS 236  (F)(S)  LINOCUTS! An introduction to relief printing

A subset of relief printmaking, linocuts are images made by carving the surface of soft linoleum blocks. Relying almost completely on our hands, we will learn to work with a variety of cutting tools, controlling their speed and pressure to create bold, clear imagery. The course will include introductions to various methods in lino printing including stencilling, collaging, reduction printing, while also familiarising students with the fundamentals of printmaking inks and papers—how to use them, choose them, modify them. Lectures will consider the history of the block print, its present day
interdisciplinary potential, and virtual visits with contemporary practitioners. Students will work towards creating a diverse portfolio that demonstrates fluency across various techniques, using them individually or in combination. NOTE: this class has a new, longer format and does indeed start at 8:30 am and end at 12:50 pm. This duration allows for more studio time, a richer syllabus, and a break for breakfast.

**Requirements/Evaluation:** completion of work, investment of time and focus, active presence in discussions and critique, attendance, inventiveness.

**Prerequisites:** Any 100 level studio art class. If you don't have this but would love to learn printmaking, write to me and share a portfolio of your existing work and/or any creative projects you have been a part of.

**Enrollment Limit:** 12

**Enrollment Preferences:** If the class is overenrolled, a portfolio of your creative work will be requested.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $300-$550 charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1)

---

**ARTS 240 (S) Introduction to Oil Painting**
This course is an exploration of the basic techniques of oil painting. We will push paint in color and form to wildly varying ends, each student being encouraged to develop a personal relationship to the materials. We begin with color theory: students will learn to identify, feel, and modulate value, chroma, and temperature. They will build their capacities to see and translate from observation, navigating the relationship between painting and drawing along the way. We will also cover the basics of stretching canvas, priming surfaces, and using mediums. Throughout the semester, there will be presentations, readings, writing exercises, and discussions that offer insights into the theory and global history of painting. Students will be expected to dedicate about 10 hours per week to work outside of class.

**Requirements/Evaluation:** Evaluation will be based on assignments and engagement with in-class exercises and discussions.

**Prerequisites:** ARTS 100

**Enrollment Limit:** 14

**Enrollment Preferences:** Art majors, sophomores

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $400-$600 charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1)

*Not offered current academic year*

---

**ARTS 241 (F)(S) Introduction to Oil Painting**
This course is an exploration of the basic techniques of oil painting. We will push paint in color and form to wildly varying ends, each student being encouraged to develop a personal relationship to the materials. We begin with color theory: students will learn to identify, feel, and modulate value, chroma, and temperature. They will build their capacities to see and translate from observation, navigating the relationship between painting and drawing along the way. We will also cover the basics of stretching canvas, priming surfaces, and using mediums, so that students can carry their painting practices forward after the semester ends. Group critiques and discussions will help us hone our skills of looking and talking about work; presentations and readings will offer insights into the theory and global history of painting. Students should expect to dedicate upwards of 10 hrs/wk to their work outside of class.

**Requirements/Evaluation:** Evaluation will be based on assignments and engagement with in-class exercises and discussions.

**Prerequisites:** ARTS 100
Enrollment Limit: 14

Enrollment Preferences: Art majors, sophomores

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $400-$600 charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

ARTS 244 (F) Taswirkhana: Technique and Practice of Indian Drawing and Painting (DPE)

Cross-listings: ASIA 239 / ARTH 235

Primary Cross-listing

Small in scale but vast in its representation, the world of Indian painting is famous for its stylized naturalism and mastery of line. It is an artistic practice whose legacy stretches back to at least the first century CE. This studio course will introduce students to the technique and practice of traditional Indian drawing and painting. The course is designed as a workshop in which students will learn to use materials and techniques of this art form. By engaging with a non-western traditional practice, the aim of the course is to expose students to a pluralistic engagement with art making. Students will learn paper and pigment preparation, as well as the basics of traditional drawing and painting techniques. The class will learn from studying a selection of original masterworks of Indian art from the Williams College Museum of Art that will be displayed in the Object Lab. Working with original artworks will help students situate the hands-on study of Indian painting practice alongside exemplary historical examples.

Requirements/Evaluation: Class participation, discussions and critiques, successful completion of all assignments and attendance

Prerequisites: none, open to all students

Enrollment Limit: 12

Enrollment Preferences: Instructor permissions requires. If the course over enrolls preference will be given to studio art and art history majors.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $400

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 239(D1) ARTH 235(D1) ARTS 244(D1)

Difference, Power, and Equity Notes: The course invites students to engage with a pluralistic studio practice that is in stark contrast to mainstream modern and contemporary art practices. The course will follow a traditional, Indian workshop-style format which has its own particular rules and unique visual vocabulary. From the material preparation of pigments, paper and brushes, to the techniques of drawing and painting, the course will introduce students to an alternative, non-Western, mode of art making.

Fall 2024
STU Section: 01  MR 1:10 pm - 2:25 pm  Murad K. Mumtaz

ARTS 251 (S) The Personal Documentary (DPE)

In this course, we will survey the terrain of personal documentary in all its complexity—its marginal roots, and its current mainstream appeal. Examining a wide array of formal approaches from diary films, to archival excavations, to first-person odysseys, we will ask: what does it mean to tell a story that is personal, vulnerable, ethical? How to avoid predictability and narcissism, and instead use self-reflection productively? How do race, sexuality, class and gender inflect personal filmmaking? Major assignments will include 3-4 short videos; supplementary assignments include a daily diary, weekly film
screenings, and 1-2 readings per week.

**Requirements/Evaluation:** preparation and participation; 3-4 short videos; daily diary; weekly film screenings, 1-2 readings per week

**Prerequisites:** 100 level video course or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** sophomores, juniors, majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Materials/Lab Fee:** $250-$350 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course will consider the role of race, gender and sexuality in representing personal experience onscreen.

Spring 2025

STU Section: 01  M 8:30 am - 11:50 am  Cecilia Aldarondo

**ARTS 254 (S) Architecture as Politics: Space, Design, Technology (DPE)**

**Cross-listings:** ENVI 264

**Primary Cross-listing**

This course delves into the intersection of architecture as a form of political expression, technology, and their collective impact on societal change. Emphasizing architecture as a discipline deeply intertwined with politics and shaped by technological advancement, this course will examine how a spectrum of art tools—from traditional to digital and computational—helps shape buildings and public spaces, shifts power structures, and hinders or promotes social justice. The curriculum blends theoretical exploration with practical application. Students will engage in critical analysis, technology-driven design workshops, and peer evaluations, culminating in a final project that melds techno-political theory with cutting-edge architectural practices. This course is ideal for students keen on leveraging technological architectural techniques to craft spaces with profound political and social impact.

**Requirements/Evaluation:** This is an intensive studio tutorial requiring working outside of scheduled class hours. In this course, students can work with the following media assuming that they can master them for a 200-level course: architecture models (physical and digital), photo reportages, 2D collages (e.g., Photoshop), digital humanities (cartographies, counter mapping, oral histories, digital archives), and curatorial platforms. Students will participate in tutorials plus a final project of significant scope. Evaluation will be based primarily on the quality of the final project but also on participation.

**Prerequisites:** Drawing I or permission of instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** Studio Art majors, Art History and Studio Art majors, ENVI majors and concentrators.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARTS 254(D1) ENVI 264(D1)

**Difference, Power, and Equity Notes:** This tutorial will employ theories and approaches from design activism and critical environmental studies to analyze the relationship between space and difference, including, but not limited to, race, class, ethnicity, gender, sexuality, religion, and species. Students will apply these theories and approaches to creating place-based projects.

Spring 2025

TUT Section: T1  TR 11:20 am - 12:35 pm  Giuseppina Forte
ARTS 261  (S)  Design and Environmental Justice  (DPE)

Cross-listings: ENVI 260

Secondary Cross-listing

This seminar/digital art studio offers key literature to examine the relationship between design and environmental justice. It will help build a vocabulary to study the environment as disputed terrain between technological fixes and issues of race, ethnicity, gender, sexuality, class, and colonial status. Students will develop textual/graphic projects about a chosen case study aiming to reorient public perception and imagination around environmental justice. Case studies include contemporary issues like "natural" disasters, eco-cities, and urbanization in the Global South and North. Skills taught include design-thinking and collaborative design, digital art (Photoshop), and participation in collective reviews and public presentations. The class culminates in a presentation to external reviewers and a final exhibition.

Class Format: Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project). Requirements/Evaluation: Active presence in class discussions and presentations, quality of work, depth and quality of the investigative process, willingness to experiment, and contributions to a collaborative learning environment. This intensive seminar/digital art studio requires working in the architecture studio and/or PC lab outside of scheduled class hours.

Prerequisites: Drawing I, ENVI 101, or permission from the instructor.

Enrollment Limit: 15

Enrollment Preferences: Envi majors and concentrators, Studio Art majors, Art History and Studio Art majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 261(D1) ENVI 260(D2)

Difference, Power, and Equity Notes: This seminar/digital art studio examines the interrelationship between design and environmental justice from an intersectional perspective. It encourages students to develop a critical understanding of the role that technical rationality, devoid of ethics and respect for difference, plays in producing racist, heteropatriarchal, and ecocidal forms of oppression. In parallel, we will explore place-based practices that counter neoliberal and extractivist approaches to the (built) environment.

Attributes: ENVI Humanities, Arts + Social Science Electives  EVST Culture/Humanities

Not offered current academic year

ARTS 266  (S)  Intermediate Digital Photography: Contemporary Photo Practices

This course builds on skills developed in Intro to Digital Photo, with a focus on contemporary photography practices and issues from the 1970's–present. The emphasis of the course will be on the creation of photographic and lens-based artwork, to be discussed in critique. We will critically engage various aesthetic, cultural, social, and political points of view through the study of artworks, texts, publications, physical prints, films, and other media. Technically, students will learn more advanced techniques in Photoshop and inkjet printing, and will explore various paper types, material possibilities, and installation techniques.

Requirements/Evaluation: Students must budget 8-10 hours a week outside of class to photograph, edit, print, read, and write. Students will be evaluated on their effort and active participation, contributions to discussions and critiques, midterm critique, final project, and artist statement.

Prerequisites: Introduction to Digital Photography at Williams College

Enrollment Limit: 12

Enrollment Preferences: Art majors, seniors who have not yet taken Intermediate Photo, anyone else

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Not offered current academic year
ARTS 269 (F) Intermediate Digital Video

This intermediate video course focuses on the creation of video-based artworks and development of personal visual language, while exploring video's intersections with various artistic mediums such as collage, performance, sculpture, and photography. Through a series of creative experiments and a final project, students will explore their personal interests and expand the material possibilities of digital moving images and sound. Students will also explore various modes of presentation and dissemination, as well as advanced techniques in digital video and sound editing. From Joanna Tam's video performances, Sofía Gálissá Muriente's painterly stop motions, Natalia Lassalle Morillo's experiments in theater directing with a camera, and Sondra Perry's sculptural video installations, to name a few, this course delves into expanded possibilities of motion and digital cameras.

Requirements/Evaluation: Quality of work produced, effort and commitment, attendance, participation in critique and discussions.

Prerequisites: Introduction to Digital Video, or permission from professor Baez

Enrollment Limit: 16

Enrollment Preferences: Studio Art majors, seniors, prospective art majors, juniors, everyone else, in that order. In case of over enrollment, a waitlist will be created.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $250-350 $250 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

STU Section: 01  F 1:10 pm - 3:50 pm  Genesis Baez

ARTS 275 (S) Introduction to Sculpture

This course is an exploration of the media and processes of sculpture with the ultimate goal being visual fluency and the successful expression of your ideas. The focus will be on the development of technical and analytical skills as they relate to the interplay of form, content, and materials. You will be introduced to a variety of techniques and processes associated with the making of sculpture, including, but not limited to, woodworking, welding and building forms out of cardboard. The field of sculpture has expanded to encompass wide-ranging approaches towards manipulating form and space, thus a wide variety of media exploration is encouraged.

Requirements/Evaluation: The quality of the work produced, as well as participation in critiques, and attendance.

Prerequisites: Any ARTS 100-level course or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Art Majors have priority.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $400-600 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Spring 2025

STU Section: 01  T 1:10 pm - 3:50 pm  Amy D. Podmore

ARTS 287  Design for Film & Television

The production designer is responsible for creating, controlling, and managing 'the look' of films and narrative television from page to screen. This hands-on course explores the processes of production design, art direction, and lighting direction processes as related to design for film and television. From initial Production Design sketches and 'Feel-Boards' to accommodating desired cinematographic angles when designing a studio set, design for film requires a designer to shape an entire visual world while keeping in mind the story as a whole. The goal of this course is to provide an initial understanding of the Production Design process in practice through studio work and instruction.

Class Format: This class will be a combination of instruction and in class studio work.
**Requirements/Evaluation:** committed participation in class discussion and feedback; and the thoughtful, timely completion and presentation of multiple design projects of varying scales, focusing on scenic and lighting design, considered both individually and when working in tandem

**Prerequisites:** THEA 201, THEA 285, ARTS 100, or permission from instructor with equivalent experience

**Enrollment Limit:** 12

**Enrollment Preferences:** In instance of over-enrollment, preference will be given to Seniors, Juniors, & Sophomores in the Theatre Majors & Art Majors

**Expected Class Size:** 8

**Grading:**

**Materials/Lab Fee:** up to $125 for materials and copying charged to term bill

**Distributions:** (D1)

*Not offered current academic year*

---

**ARTS 304 (S) Color Theory: The Poetics and Politics of Color**

This course will combine studio projects, workshops, and discussions to explore the multiple connotations of color. We will learn to use color not only as an aesthetic and emotional signifier, but also as a means of philosophical and political inquiry. The aim of this course will be to better understand and control the use of color by grappling with a wide range of perceptual, formal, and theoretical approaches. Shorter studio projects—including exercises in observational painting and color interaction—will lead to more sustained projects in which students explore their individual interests. Class presentations and short readings will introduce students to a variety of texts and artists, including Wittgenstein's *Remarks on Color* alongside Josef Albers' *Interaction of Color* and Byron Kim's *Synecdoche* and Hito Steyerl's video *Adorno's Gray* amongst others.

**Requirements/Evaluation:** projects, assignments, class participation, attendance

**Prerequisites:** students are required to have taken at least two ARTS 100-level class, or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Art Studio Majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $400-$600. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1)

*Not offered current academic year*

---

**ARTS 305 (S) Collaboration in Practice**

"Collaboration in Practice" offers multiple views into collaborative art production, explored through a series of intensive group studio projects, informed by the history and theory of collective cultural work. Students work collaboratively in a range of artistic media—including but not limited to drawing, painting, video, sculpture, textiles, and performance—to locate possibilities for making and interpreting as mutual and relational actions. Studio art provides numerous points of entry for attenuating between individual and group identities, as well as the means to fruitfully explore communal alternatives to normative (patriarchal, colonial) notions of authorship, self-sufficiency and self-improvement. This studio-based course welcomes students with a variety of experiences and interests, building on diverse techniques and tactics developed in our individual creative practices and research interests as points of departure. As a practical engagement with group relations and choreographies of power, this course foregrounds the interdependence and polyvocality that underlie and facilitate all cultural work, giving clarity to the concerns and potentialities of collaborative practice.

**Requirements/Evaluation:** Grade is evaluated based on class attendance and participation, completion of intensive weekly creative assignments as well as readings, and one final project that responds to course material and themes.

**Prerequisites:** 2 studio courses OR 1 studio and one art history course

**Enrollment Limit:** 14

**Enrollment Preferences:** art majors but also open to any students who meet prerequisites

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $400-600 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
ARTS 308  (F)  Contemporary methodologies in History and Practice  
Cross-listings:  ARTH 307  
Secondary Cross-listing  
This course explores contemporary methodologies that traverse both collective research and artistic production, providing an overview of theoretical and practical frameworks in contemporary art through case studies, close reading, and interdisciplinary artistic projects. We will speculate on the role of the artist, the curator, and the critic as "host" in order to foreground how a care-centered and collective approach to knowledge production can run counter to existing power paradigms, such as patriarchy, colonialism, and capitalism. Building on existing exchanges between disciplines—from feminist thought, queer theory, disability studies, visual and media studies—this hybrid studio and critical theory course presents contemporary art as a field uniquely suited to imagine alternative structures of institutional support and mutual aid. Through engagement with critical and creative texts, as well as a series of making exercises, we will experiment with practices of care and resource-sharing through art production, and imagine how arts practitioners can take a critical position that counters prevailing logics of individualism and enclosure.  
Class Format: Studio  
Requirements/Evaluation: Grade is evaluated based on class attendance and participation, completion of weekly readings and/or making exercises, and one final project that responds to course material and themes.  
Prerequisites: At least one prior course in Art History or Studio Art, or permission of instructor.  
Enrollment Limit: 15  
Enrollment Preferences: History-and-Studio Majors get first priority, then regular Studio Majors and Art History Majors, then any interested student.  
Expected Class Size: 15  
Grading: no pass/fail option, no fifth course option  
Materials/Lab Fee: Under $500. Students on financial aid may utilize the book grant to defray any materials costs.  
Distributions: (D1)  
This course is cross-listed and the prefixes carry the following divisional credit:  
ARTS 308(D1) ARTH 307(D1)  
Attributes: ARTH post-1800  
Not offered current academic year

ARTS 313  (F)  Inhabited Theatrical Environments: Scenic Design for Performance  
Cross-listings: THEA 315  
Secondary Cross-listing  
How do you develop a point of view and translate it to the stage? What is an effectively inhabited space for performance? We will explore the different ways a scenic environment provides the visual foundation for live theatrical events in theaters as well as site-specific shows. In addition to working intuitively, this course combines critical readings of texts to contextualize works for the current moment. Research will be at the center of our work -- deepening skills to source, curate, and present personal points of view as designers and creators. This work will serve to expand our imaginations to the aesthetic possibilities of performance. Students will also develop a basic knowledge of model building and drafting. Class time is a combination of discussions of theatrical texts, student project presentations, and studio work.  
Requirements/Evaluation: Creative projects preparation and presentation. Active participation in class and critique sessions. Occasional writing assignments to accompany design work.  
Prerequisites: None  
Enrollment Limit: 10  
Enrollment Preferences: Theatre majors  
Expected Class Size: 8
ARTS 316 (F) Governing Cities by Design: the Built Environment as a Technology of Space (DPE)

Cross-listings: ENVI 316

Secondary Cross-listing

Like in the classic era, cities of the 19th century were metaphors for government: good government could not exist without good governance of the city. This creative seminar charts the transformation of the built environment (architecture and urbanism) as a technology of space to govern cities and citizens from the mid-19th century until the present. Through debates and case studies across geographies and historical timeframes, we will analyze how regimes of government shape and are shaped by the built environment. The seminar has a studio component that consists of an urban project where students will apply theories and approaches to a real case study using digital art (2D and 3D modeling).

Class Format: Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project)

Requirements/Evaluation: Active presence in class discussions and presentations, willingness to experiment, contributions to a collaborative seminar/studio environment, quality of work, depth and quality of the investigative process.

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: 15

Enrollment Preferences: ENVI majors and concentrators, Studio Art majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $250-$350 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 316(D1) ENVI 316(D2)

Difference, Power, and Equity Notes: Using theoretical perspectives from urban studies, this seminar/workshop explores how the built environment, as a technology of space, contributes to the production of difference, the establishment of certain regimes of power, and the erasure of specific urban histories--mainly those of underrepresented groups. Students will engage in multimedia place-based projects to imagine and create more equitable built environments.

Attributes: ENVI Humanities, Arts + Social Science Electives

Fall 2024

SEM Section: 01 TR 8:30 am - 9:45 am Giuseppina Forte

ARTS 319 (F) Junior Seminar

Junior Seminar is a dynamic and immersive class tailored for art majors, aimed at exploring and fortifying their creative interests through a rigorous studio practice, engaging group discussions, and exposure to current themes, topics, materials, and concerns in contemporary art and its allied disciplines. Through a multifaceted approach that includes readings, presentations, lectures by visiting artists, and visits to art institutions and artists’ studios, students will be immersed in the vibrant and interdisciplinary nature of contemporary art. They will be exposed to a diverse range of materials, techniques, and historical perspectives on art-making, while also contemplating the ecological, political, personal, cultural, and aesthetic implications associated with each of them.

Requirements/Evaluation: Grades will be determined by the effort put into projects, as reflected in research, and the quality and quantity of work produced. Attendance and active participation in class discussions and critiques are a key part of this class and will affect grades.

Prerequisites: three studio courses required for the major
Enrollment Limit: 12
Enrollment Preferences: Enrollment is limited to Studio Art Majors and History & Practice Majors.
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Unit Notes: Studio Art and Art History and Practice majors are required to take this course in the junior year unless studying abroad during the fall semester
Materials/Lab Fee: The cost of materials will vary depending on the individual student project(s). Students are responsible for the cost of the materials. Students on financial aid can utilize the Book Grant to defray these expenses.

ARTS 322  (S) The Empowered Object
The development of "found object" in the language of art has played a significant role in constructing meaning in the consciousness of the twenty-first century. This tutorial will have students explore that tradition further through their own creative endeavors. They will be asked to add to the lineage of art that uses "found objects" in a creative and meaningful way. They will have the freedom to choose which medium will convey their ideas most effectively. They include, but are not limited to: sculpture, painting, drawing, photography, printmaking and video. For example, within the investigation of the "found object", projects might focus on: still life painting or incorporating real objects via collage, assemblage, etc. The "found object" in art will be examined through: art practice, readings and presentations. As a tutorial, the course is designed to meet individual needs and to stress student participation and responsibility for learning. Students will meet weekly with a peer and the professor to review work.
Requirements/Evaluation: Evaluation is based on the conceptual and technical quality of the work, as well as the level of participation in the tutorial meetings.
Prerequisites: Any 200-level art course in the area that you are planning to work that is housed in the studio wing of the art department.
Enrollment Limit: 10
Enrollment Preferences: Art majors have priority.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: 300-500 lab fee charged to term bill
Distributions: (D1)

Spring 2025
TUT Section: T1  R 1:10 pm - 3:50 pm  Amy D. Podmore

ARTS 328  (F) The Art of Almost Nothing
In this studio tutorial class, students will create studio art projects by using materials that are mainly not bought but found, repurposed, and/or overlooked and ubiquitous. In this time of extreme material production and consumption, with a great deal being thrown out and unrecoverable, how can we make intentional, creative meaning from what is around us? This class is concerned with impacts on the environment but also with how consumer culture has wielded profound influence in the current production of studio art. How can we engage with our major concerns--aesthetic, topical, critical--and use what is around us mindfully and creatively with desired impact? Some of the artists we will look at: William Pope L., Ana Mendieta, David Hammons, Tania Bruguera, and the Yes Men. This class is a hands-on studio class with weekly assignments.
Class Format: studio class, 3 hours per week
Requirements/Evaluation: projects, assignments, class participation, attendance
Prerequisites: Three studio art classes of any kind at Williams or previous studio experience with permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Any student who has taken at least three or more previous studio art classes at Williams
ARTS 330 (S)  Once More With Feeling: Reenactment in Contemporary Visual Culture  (WS)

Secondary Cross-listing

The urge to relive the past is a fundamental human one, and artists have long drawn upon the ritualistic possibilities of reenactment as a way of interrogating time's uneasy returns and losses. In this course, we will study how artists working in a range of media deploy reenactment in collaboration with others, in order to ask what liberatory potential there might be in choosing to restage--and in many ways, relive--the past. This is a hybrid course with roughly 50% of the course dedicated to critical analysis and 50% studio practice. Case studies drawn from film, theater and other art forms will accompany scholarly readings and short writing assignments, and students will also devise their own reenactment experiments in order to access the embodied and experiential possibilities of the course topic.

Class Format: discussion and studio practice

Requirements/Evaluation:  2-3 written responses, 2-3 creative exercises, class participation, one 12-15-page paper OR one creative final project

Prerequisites: must have previously taken one Art History or Art Studio course in any area OR professor permission

Enrollment Limit:  14

Enrollment Preferences: majors

Expected Class Size:  14

Grading:  no pass/fail option,  no fifth course option

Materials/Lab Fee:  The cost of materials will vary depending on the individual student project(s). Students are responsible for the cost of the materials. Students on financial aid can utilize the Book Grant to cover these expenses.

Distributions:  (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 333(D1) ARTS 330(D1)

Writing Skills Notes: There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes:  ARTH post-1800

Not offered current academic year

ARTS 332  (S)  Living Things: Bodies and Objects in Sculpture and Performance

Secondary Cross-listing

This studio course seeks to promote art making that transgresses the boundaries between the visual and performing arts to see a life that animates both bodies and objects. Cultivating various approaches to the experience of embodiment and kinesthetic responses to objects, props, and clothing, students will perform sculptures and sculpt performances indoors and outdoors. Exploring relationships between time and space will support creating works that suggest and invite movement, encourage interaction, and investigate the physical potency inherent in objects, people, and performance. Emphasis will be made on collaborative process and developing dialogue between actors, dancers, and visual artists.

Requirements/Evaluation: Evaluation will be based on participation in studio exercises, bi-weekly collaborative group projects, a final solo work to be performed at the end of the semester, and five 2-page reflection essays.
**Prerequisites:** Students must have completed at least one course either in Theatre or in Studio Art.

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference will be given to Theatre and Studio Art majors.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $200-$350 for supplies such as fabrics, papers, paints, markers, props, etc. as needed.

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 332(D1) THEA 333(D1)

Not offered current academic year

**ARTS 333 (S) Narrative Strategies**

In this tutorial, we will examine the use of narrative in a range of fine art practices, which could include painting, drawing, video, sculpture, installation, public art, sound art, and mixed media work. Students who are interested in telling or referencing stories in their work in some way will be given the opportunity to develop their ideas and skills in a challenging studio class. In addition to intensive projects, we will look at and discuss the work of artists like Allison Janae Hamilton, Lorna Simpson, Joe Sacco, Lydia Davis, and Omer Fast among others. One of the aims of this course is to challenge traditional notions and expectations of narrative. For instance, what could minimally constitute a narrative piece? How do different mediums allow for time to unfold in unexpected ways? How does omission play a powerful role in a narrative? How might the role of the narrator (often so powerful and present in novels and short stories) change in a visual arts context? This is a studio tutorial with an emphasis on demanding, weekly projects. Students will work both in mediums of their choice and be asked to experiment with new, unfamiliar formats. Readings, outside lectures, and screenings may be required in addition to tutorial hours.

**Class Format:** studio tutorial with an emphasis on demanding, weekly projects; students will work both in mediums of their choice and be asked to experiment with new, unfamiliar formats; readings and screenings will be required in addition to tutorial hours

**Requirements/Evaluation:** evaluation based on assignments, studio performance, class participation, and attendance

**Prerequisites:** students are required to have taken at least two ARTS 200-level classes in any medium, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Art Studio majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** The cost of materials will vary depending on the individual student project(s). Students are responsible for the cost of the materials. Williams financial aid recipients can utilize the Book Grant to cover these expenses.

**Distributions:** (D1)

Not offered current academic year

**ARTS 345 (S) Art in Times of Crisis (DPE)**

In an era of ever-increasing emergency, what is the role of art? Can poems save us? What media and forms of exhibition are best suited to respond to urgent crises? What creative methodologies might we develop in collaboration with one another, in the interest of building community as well as making great art? This course is an interdisciplinary, experimental intervention into our present era. In addition to producing multiple original artworks, students will do readings and investigations into art activist case studies from social movements such as Puerto Rican sovereignty, HIV + AIDS, and global climate justice.

**Requirements/Evaluation:** readings, screenings, attendance, participation, and committed completion of assignments

**Prerequisites:** any 200-level art studio class or submit a portfolio for consideration

**Enrollment Limit:** 10

**Enrollment Preferences:** majors and seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option
ARTS 369 (F) QUILTY!
A quilt is a glorious formation to be asleep under, and in this class we will spend the entire semester making a single wonderful one. A dynamic composition for the home! Students will learn how to collect and choose fabrics, cut them into bold lively shapes, and practice efficient ways of using a needle and thread to sew them together. By looking at quilting traditions internationally, both improvisational and hyper precise methods of construction will be adopted - the quilt is for everyone! Students will also learn basic embroidery and applique techniques to embellish the quilt top, and draw with thread as they bind and stuff the layers of their quilt with (local) wool.

Requirements/Evaluation: a single quilted and bound queen sized quilt.
Prerequisites: 200 level studio art classes completed, and/or letter stating enthusiasm and investment in handwork and textiles, and/or previous sewing experience.
Enrollment Limit: 10
Enrollment Preferences: studio art majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $300-$500
Distributions: (D1)

Fall 2024
STU Section: 01 R 11:20 am - 12:35 pm R 1:10 pm - 3:50 pm Pallavi Sen

ARTS 383 (F) The Actor-Creator: Introduction to Physical Theatre Tools
Cross-listings: THEA 283
Secondary Cross-listing
This course is an introductory course to the Jacques Lecoq Pedagogy which was born in France and uses observation as a first creative tool. The body is at the heart of this pedagogy and we will have rigorous physical training in order to become more expressive, more precise, and more creative. Improvisation will be the key tool to learn and discover how to write theater on our feet. In the course, we will first observe life: spaces and people. What are the specifics of the different spaces that exist around us and how do they change the body that is in them? Then, we will look at the actor's body. How do you enhance its presence? What brings life to this body? How can we allow ourselves to start using the body as a creative tool that will be able to transform and write? We will next observe the body within the elements. What kind of character will come out of fire? Or of air? What happens when air meets fire? By letting the elements transform us we will find specificity in the character's physicality and relationships. Then we will look at painting, poetry, and music; How can we translate a poem on stage? How do words move? And colors? Is yellow's rhythm the same as brown? We will end the course by working with full masks created by the students/artists and also brought by the teacher. Mask work is an incredible tool to help actors articulate their thoughts, and feelings, and craft their acting. What stories will come out of that? Who's destiny will we learn about? This will be an occasion to bring forth stories you are interested in, that touch you and move you. This course is open to anyone who is interested in creating live performances. Whether you are a writer, a painter, a director, a musician, or an actor you are welcome to bring your fierce and curious artist spirit to create theater that will be telling the stories that matter to you today.

Requirements/Evaluation: Attendance and active participation in each class session. Assigned project and scene work (solo and in small groups). Creation of physical performance objects (masks, etc.) Solo and group presentation of assigned work in class.
Prerequisites: None
Enrollment Limit: 16
Enrollment Preferences: Theatre majors
Expected Class Size: 12
This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 383(D1) THEA 283(D1)

ARTS 396 WONDERFUL THINGS!
A spinning top! A clock! A toy! A sundial, a deck of cards, a lantern, pompoms, building blocks that rise and topple, puppets, paper kites, paper planes, toy boats that float --play objects are born into the world over and over, transforming in colour and shape, yet holding onto an essential structure that give them their name and purpose. In this class, students will construct their own versions of (some of) these classic objects using humble and lovely materials: paper, glue, bamboo, cloth, light, wood, perhaps wind, string. Our guides will be existing histories of making, the wonderful image of disparate objects on a well made shelf, all the handmade objects we have loved, childhood toys, a desire to play still, and delight.

Requirements/Evaluation: weekly assignments, final project
Prerequisites: Drawing 100 and/or sculpture classes and/or portfolio of studio work
Enrollment Limit: 10
Enrollment Preferences: Studio art majors
Expected Class Size: 10
Grading: Distributions: (D1)

ARTS 418 (S) Senior Seminar
In this capstone class for studio art majors, students define, research, create and present an original body of work which will be exhibited. The emphasis will be on producing a strong and coherent body of artwork for their senior exhibition at the Williams College Museum of Art, (in person or virtual). Students will focus on strengthening ideas, developing formal skills and practicing critical analysis. They may work in any medium in which they have developed a high degree of proficiency. To prepare to partake in an exhibition on this level, students must learn to schedule and pace themselves, communicate, deal with spatial considerations beyond their studio, document their work effectively and work within firm deadlines. The nature of this course will have you working closely as a team, as well as individually, towards creating a strong and exciting student show this May at the Williams College Museum of Art (or via a virtual platform). The class will meet in large and small groups throughout the semester for critique and discussion and also have assigned readings, films, and/or lectures.

Class Format: intensive studio art class
Requirements/Evaluation: Art is a visual language, which speaks to us through our sense of sight and implied touch; you will be evaluated first and foremost on your ability to speak powerfully in this language. Evaluation also takes into account: effort, attitude, creativity, studio responsibility and participation. If you miss more than one unexcused class your grade will automatically drop a letter grade. All work must be completed by the final critique.
Prerequisites: You must be a senior Art Studio major with all requirements fulfilled by the end of this term
Enrollment Limit: 15
Enrollment Preferences: Studio Art major; permission of instructor is required for History and Practice majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: The cost of materials will vary depending on the individual student project(s). Students are responsible for the cost of the materials. Williams financial aid recipients can utilize the Book Grant to cover these expenses.
Distributions: (D1)

Winter Study ----------------------

ARTS 17  (W)  Visible Mending as a Political Act

In this course students will explore a variety of hand mending techniques including patching, sashiko, daming, applique and embellished mending. We will approach this activity as both a sustainable practice and a relaxing skill-building experience. Learning about the waste produced by the textile industry will provide us with the impetus to resist our culture of fast fashion. Mending clothes is a political act that gives us a way out of the fast fashion loop and is a step towards divesting from the billionaires who own clothing chains. Visible mending can be a fashion statement that shows others that we have taken the time and care to extend the lives of our clothes. Students will be encouraged to bring in their own clothing with holes, stains, tears, and worn spots to strategize and create fun and fashionable mends of different types. Demonstrations and hands-on work will be supplemented with readings from "Mend! A Refashioning Manual and Manifesto" by Kate Sekules. All skill levels are welcome. Some hand sewing experience is good for this course but not entirely necessary. Anyone can learn to mend!

Requirements/Evaluation: Presentation(s); Creative project(s)
Prerequisites: Basic hand sewing skills are helpful but not required.
Enrollment Limit: 12
Enrollment Preferences: Priority given to students who express an interest in learning mending.
Expected Class Size: NA
Grading: pass/fail only

Unit Notes: Megan Piontkowski is an artist and illustrator living and working in Brooklyn, NY. Her first visible mend was a "pocket patch" on the knee of a pair of leggings when she was about 10 years old.

Materials/Lab Fee: $100
Attributes: EXPE Experiential Education Courses  SLFX Winter Study Self-Expression

Not offered current academic year

ARTS 26  Multifaceted Performance
For this course, we will consider how performance intersects with drawing, sculpture, and video. The course is open to all majors and encourages cross-disciplinary inquiry, research methods, and fun. Each week will focus on different media and build upon the previous meeting. We will begin with drawing by creating large-scale drawing tools. This will expand to movement, as we play with lighting strategies to explore shapes formed by the body through light and shadow. The following week, students will bring an object of significance to activate through performance exercises, documented with their phones and equipment accessible through the library. The final week will explore video within live performance and ways to merge students’ drawing, sculpture, and video experiments. The course will end with a presentation of performances, videos, or an exhibition.

Requirements/Evaluation: Presentation(s); Performance(s); Creative project(s)

Prerequisites: None. I encourage non-art majors to take the course.

Enrollment Limit: 12

Enrollment Preferences: It will be based on seniority and whether the students will have the opportunity to take the class again.

Expected Class Size: NA

Grading:

Unit Notes: Zoe Berg received her BFA in Studio Art from UT-Austin and MFA in Sculpture at Tyler School of Art and Architecture, Temple University. She participated in Land Arts of the American West and has attended residencies at Ox-Bow, ACRE, and VSC.

Attributes: EXPE Experiential Education Courses SLFX Winter Study Self-Expression

Not offered current academic year

ARTS 31 (W) Senior Studio: Independent Project Art Studio
Independent project to be taken by candidates for honors in Art Studio.

Class Format: Independent project

Grading: pass/fail only

Not offered current academic year

ARTS 35 Leaf, Cocoon, Cloth: Silk Painting and Introduction to Natural Dyes
This course explores techniques used to paint on the most luxurious of surfaces: silk. Unlike traditional painting, where the medium sits on top of canvas, the dyes used in silk painting become part of the fabric grain itself. This allows the artist to play with transparency, layering, and movement. Students will leave the course with a brief overview of silk’s history, its lifecycle and production, and the various applications of dye and resist across cultures. They will also be introduced to relief printing by hand and how to design a repeatable pattern. Utilizing the natural dye lab in the Spencer Printshop, students will also learn the basics of natural dye processing. They will learn how to derive color from leaves, twigs, and insects, which mordants to use for which fibers, and aid in building a communal color library. Emphasis will be placed on materials that can be sourced from common food waste and the local landscape (even in the dead of winter!) These dyes will be used as material for individual works as well as printed yardage. The resulting final project will either be one large-scale silk painting, multiple smaller paintings, or a sculptural work built from silk yardage. The works will be featured in an end of semester group exhibition in the Spencer Studio Art Building.

Requirements/Evaluation: Creative project(s)

Prerequisites: Experience in drawing, painting, sculpture, or printmaking is a plus. If a student has not taken any art classes at Williams they are welcome to email with a statement of interest and proposed project.

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to Art and Art History majors. Otherwise, it will be given to Seniors who have taken courses in drawing, painting, sculpture, or printmaking.

Expected Class Size: NA

Grading:

Unit Notes: Krystal DiFronzo is an artist and educator based in Adams, MA. They received their MFA from Yale School of Art in 2020 and BFA from The School of the Art Institute of Chicago in 2012. They are currently the Print and Studio Technician at Williams.

Materials/Lab Fee: $250

Attributes: EXPE Experiential Education Courses SLFX Winter Study Self-Expression

Not offered current academic year
ARTS 36  Art and AI: Generative Art Making

AI art is here and the media narrative is alarmist - artists will lose their jobs to machines, AI will replace human creativity. A more optimistic future imagines a world where artists can harness the power of AI to expand their palette, boost their productivity, and experiment with new forms. In this course, students will learn the basic skills of generative art making through hands-on learning using AI tools to produce works from concept to completion while engaging in critical thinking to examine the ethical considerations of AI through instructor-led discussions and tutorials. Students will create original still images (drawings, paintings, photographs) and use generative AI to apply dynamic motion to the image resulting in a cinematic rendering of the original still image. Students will be equipped with an understanding of how images are recreated and imagined by artificial intelligence. Students will write a description of their process, why they chose the particular image, what it made them think about critically from an artistic and art history perspective. At the end of the session students will present their work in a group exhibition. The final artworks will be edited together for exhibition on a digital screen and students can also consider prototyping installation concepts that merge digital and physical elements.

Requirements/Evaluation:  Creative project(s)

Prerequisites:  This course welcomes students of all disciplinary backgrounds and levels of experience in the arts, especially beginners. No technical experience is required.

Enrollment Limit:  12

Enrollment Preferences:  Students will be asked to submit a brief written statement answering two questions 1) Why is it important for you to take the course at this moment in your time at Williams 2) What kind of artistic concept are you interested in exploring in this course?

Expected Class Size:  NA

Grading:

Unit Notes:  Debra McGrory is an educator and entrepreneur working at the intersection of art and technology. She is co-founder and President of Kinetek, a generative media company, and has served as Assistant Professor at The New School since 2013.

Materials/Lab Fee:  $35

Attributes:  EXPE Experiential Education Courses  SLFX Winter Study Self-Expression

Not offered current academic year

ARTS 37  The Still Life as Micro-History

Still life painting—a genre of ancient origins—crystallized into a distinct artistic category around the 16th century. The seemingly humble act of gathering inanimate objects manages to outweigh the sum of its individual parts to convey a narrative, a quality that has enabled its ongoing status in the history of art. What can one say about oneself, or one's respective time, place, culture, political atmosphere, and/or personal beliefs, by assembling an arrangement of personal belongings, materials, and artifacts to construct an image? In this course, we will arrange our own still life compositions and paint them, in oil on canvas, over the span of the winter term, culminating in an exhibition of the resulting works. We will also analyze the surprisingly flexible genre of the still life, looking at and talking about historic examples from the past two millennia—from excavations in Pompeii to memento mori and vanitas—as well as its use in contemporary art—particularly its resurgence feminist, queer, and other political artistic expressions that prod and challenge the genre's ties to the patriarchal Western Canon of visual art. The course will meet three times per week to engage in dedicated studio work and group visual analysis. The bulk of the time will be spent working towards a single, polished painting to be displayed in a final group exhibition in the Spencer Art Building's Wilde Gallery, at which time each artist will present their finished work.

Requirements/Evaluation:  Presentation(s); Creative project(s)

Prerequisites:  No experience necessary, but some background in painting and drawing is a plus.

Enrollment Limit:  15

Enrollment Preferences:  Preference will be given to studio and art history students, and will be given to Seniors thereafter. Students who have taken ARTS 100 or ARTS 241 will certainly hit the ground running a bit better but not essential.

Expected Class Size:  NA

Grading:

Unit Notes:  Scottish-American artist Willie Binnie lives and works in Williamstown, MA and has been a visiting lecturer at Williams College since 2019.

Materials/Lab Fee:  $100

MASTER OF ARTS IN ART HISTORY

Requirements

To qualify for the Master of Arts degree in art history, candidates complete a minimum of twelve courses for graduate credit plus two winter study periods, the latter comprising an international Study Trip in the first year (ARTH 51) and preparation of a Draft Qualifying Paper in the second (ARTH 52). Students must also demonstrate reading proficiency in one foreign language, though further study in primary-research languages is encouraged. At the end of the second year, all students present a shortened version of the Qualifying Paper in the annual Graduate Symposium.

At least seven of the twelve courses required for graduation must be graduate seminars. (Students are free to pursue additional courses beyond those required for the degree.) Among the twelve courses counted towards the degree, three are required of all students: ARTH 504, “Proseminar in Research and Method,” to be taken in the first semester of study; ARTH 506, “Expository Writing Workshop,” to be taken in the second; and ARTH 509, “Graduate Student Symposium,” to be taken in the fourth semester. Additionally, all students must complete ARTH 507, “Object Workshop,” which is pass/fail, in their first year of study. The optional Curatorial Workshop, ARTH 563, is also pass/fail. Neither ARTH 507 nor ARTH 563 counts among the twelve courses required to complete the degree.

Students must also fulfill a distribution requirement by undertaking coursework in two of four geographical areas and two of three chronological periods.

Geographical Areas:
1) Europe and the Mediterranean Basin
2) Asia and the Pacific
3) The Americas
4) Africa and the Middle East

Chronological Periods:
1) Prehistoric to 1200
2) 1200 to 1800
3) 1800 to the present

Students may petition the Director to apply a thematic or non-period/geographic-specific course toward the distribution requirement by demonstrating substantial work in an appropriate area.

Undergraduate Courses and Independent Studies

With permission from the Director and the individual instructors, students may take up to five undergraduate courses for graduate credit, with the understanding that research papers submitted in such courses meet a standard commensurate with those prepared for graduate seminars.

In addition to regularly offered seminars and classes, students may arrange one independent study (ARTH 595/596) by submitting petitions to the
Director describing the substance of their projects and the nature of the work they will submit for evaluation. The petitions must be co-signed in advance by both the student and their faculty supervisor.

Of the minimum requirement of twelve courses, the combined number of independent studies and undergraduate courses applied to the degree may not exceed five.

The Qualifying Paper

The Qualifying Paper is a substantially revised piece of academic writing produced in coursework at Williams in one of the previous three semesters, expanded and refined over the second Winter Study term and a portion of the fourth semester. Students submit the topic of the Qualifying Paper in writing by the final day of exams of their third semester. Before this, students must obtain their original faculty supervisor's agreement to be engaged in the Qualifying Paper process.

Three weeks prior to the Friday before Spring Break, students submit the final draft of their Qualifying Paper, including illustrations, to three faculty readers (generally the original faculty supervisor, the Director, and the Associate Director). Qualifying Papers should not exceed 8,000 words, including footnotes and bibliography.

Before Spring Break, students meet with their three readers to receive critical comments on the final QP and discuss its transformation into a twenty-minute presentation.

The Graduate Symposium

All second-year students speak in the Symposium, presenting twenty-minute talks developed from their Qualifying Papers. Each student has an ad hoc committee to give advice in preparing these presentations (ad hoc committees comprise the Director, the Associate Director, one additional faculty mentor, one first-year graduate student, and one second-year graduate student). Preparations include at least three practice sessions for each student. Speakers present the first and third of these run-throughs to the ad hoc committee, the second to the other second-year students in a workshop scheduled by the Director. The Graduate Symposium is scheduled for the Friday immediately preceding Commencement.

Languages

The Graduate Program's degree requires A2-level proficiency in one language other than English (or two college-level classes or equivalent) in a language of scholarly and academic relevance to the student's art-historical interests. This requirement can be fulfilled by college-level language coursework prior to matriculating at Williams, by language coursework at Williams College, by summer language study, or by other methods (such as language exposure at home). The requirement represents the minimum for graduation; the program supports and strongly encourages proficiency in multiple languages. Beyond the required languages, a maximum number of two additional language courses may be applied to the degree. Such additional language work may not count towards the seven required graduate seminars. Additional language work may be taken for a letter grade, pass/fail, or audit, subject to instructor approval.

Grades and Academic Standing

The Program uses the following grading system:

A+ = truly exceptional (4.33)
A  = outstanding (4.00)
A-  = excellent (3.67)
B+  = good (3.33)
B   = satisfactory (3.00)
B-  = barely adequate (2.67)
C   = inadequate (0)
E   = failing (0)

The Director reviews students' records at the end of their first year; those with GPAs of 3.00 or lower may be asked to withdraw from the Program. Letter grades are used in all seminars except ARTH 507, 509, and 563. These and the Winter Study courses (ARTH 51 and 52) are Pass/Fail. Course instructors set the deadlines for coursework. If students seek and receive extensions that result in semester grades of Incomplete, they must hand in their work by the instructor's revised deadline, which will be no later than the second Monday of the next semester's classes. Extensions beyond this date will be solely at the discretion of the Director (in consultation with the instructor).

Students who withdraw from the Program may, after a period of at least one year, petition to the Director for re-admission. Such a petition must include evidence that deficiencies have been remedied and that the student is capable of completing the course of study without further interruption.

The M.A. requirements are designed for completion in two consecutive academic years in residence. There is no credit for coursework done prior
to matriculation in the Program. The Program is full time, requires students to live in Williamstown or its vicinity, and does not normally admit students on a part-time basis.

**ARTH 500  (F)  Clark Visiting Professor Seminar: Art, Media, and Politics in the Weimar Republic**

**Cross-listings:**

**Primary Cross-listing**

In the fraught context of Germany between its defeat in the First World War in 1918 and the Nazi seizure of power in 1933, arguments about art, arguments about media, and arguments about politics were inextricably intertwined. Many saw the modernized city together with recently developed media such as film, radio, and the photographically illustrated magazine as transforming not only art, but also politics, sense perception, and the nature of subjectivity. In this course, we study signal works created in Germany during the Weimar Republic to understand the relations among aesthetics, politics, and media both old and new at this pivotal moment. The texts and films that we will examine will afford us a broad view of some of the most interesting and pertinent aspects of Weimar-era debates regarding the nature of gender and sexuality, the relation between the "German" and the "foreign," and the role in modernity of the artist and the work of art. We will study the writings of Walter Benjamin, Siegfried Kracauer, and Bertolt Brecht, writers who were formed by their participation in Weimar debates, then driven into exile by the rise of the Nazis, and whose texts have had a profound impact on contemporary thinking about art, media, and politics.

**Requirements/Evaluation:** active participation in discussions, weekly reading responses, and a research paper

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** places assured for 7 graduate students (second-years, then first-years) and 7 undergraduates (art history and studio art majors, then any interested student)

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARTH 500(D1) ARTH 400(D1)

**Attributes:** ARTH post-1800

---

**ARTH 501  (S) Museums: History and Practice**

**Cross-listings:** LEAD 301

**Primary Cross-listing**

Art museums express the cultural, aesthetic and social ideals of their period of formation and many of those ideals remain embedded in the values and practices of institutions today. Comparing institutions past and present internationally, seminar participants will envision the art museum's future while addressing programmatic and organizational challenges at this moment of participatory civic engagement and social, political unrest. With growing skepticism of institutional collecting practices and authoritative narratives, art museums, especially those in the US, face internal and external pressure to "decolonize" as they attempt to alter their canon through both acquisitions, deaccessioning and repatriation initiatives. There is pressure, as well, to embrace a more active role in climate and social justice movements. It is a time also marked by calls for compensation transparency, participatory decision making, staff and trustee diversity, and greater scrutiny of funders. The seminar will consider this environment against past and current norms of governance, management and curatorial policies and practices. We will examine the traditional role of architecture and installation in interpretation and experience, prevailing and proposed guidelines in the accessioning and deaccessioning of works of art and both internal and external attitudes towards the repatriation and restitution of cultural property. Studying museums ranging in size and type, seminar participants will hear how museum leaders are dealing with challenges to current practice in weekly zoom sessions. Participants will consider how future museums might strive to balance the institution's traditional roles with new civic and social responsibilities, mindful of financial stability in a market-driven, metric-conscious, not-for-profit environment, while addressing, in proposed program and practice, the demands on museums emanating from a more ethically insistent internal and
external world.

**Requirements/Evaluation:** oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

**Prerequisites:** undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

**Enrollment Limit:** 14

**Enrollment Preferences:** graduate students in the history of art, then senior undergraduate art history majors, then other undergraduates

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** satisfies the seminar requirement for the undergraduate Art History major

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**SEM Section:** 01 W 1:00 pm - 3:50 pm Michael Conforti

**ARTH 503 (S) Clark Visiting Professor Seminar: Fascism and Art**

**Cross-listings:**

**Primary Cross-listing**

This course examines the complex and multifarious relations between art and fascism in interwar Europe, focusing on the cultural politics and the use of art in fascist movements and regimes, particularly in Germany and Italy. Exploring Walter Benjamin's dictum that fascism practices the "aestheticizing of politics" and Eric Michaud's argument that an "assimilation of work into artistic activity" lay at the center of the Nazi myth, we will also examine the role of art in fascist ideology as well as the problematic of artistic modernism and fascism. We will analyze fascist imaginaries of nation, empire, nature, technology, violence, gender, and race through the work of Ernst Jünger, F. T. Marinetti, Leni Riefenstahl, Le Corbusier, and Wyndham Lewis, among others. Early theories of fascism, including portions of Hannah Arendt's *Origins of Totalitarianism* and Max Horkheimer and Theodor W. Adorno's *Dialectic of Enlightenment*, as well as the work of contemporary historians and art historians, will inform our discussions.

**Requirements/Evaluation:** active participation in discussions, weekly reading responses, and a research paper

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** second-year graduate students, then first-year graduate students, then advanced undergraduate students; places for 7 undergraduate and 7 graduate students assured

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**Spring 2025**

**SEM Section:** 01 M 1:00 pm - 3:50 pm Annie Bourneuf

**ARTH 504 (F) Proseminar in Research and Method**

In this graduate Proseminar on Research and Method, we will read a number of texts that form the foundation of art history as a discipline, including the writings of Plato, Panofsky, Lessing, Heidegger, Wölfflin, and Barthes (among others). We will study these works against the grain, considering how art history is currently transforming under the fields of ecology, disability studies, queer theory, and radical black feminism. Students will work closely with the collections of the Clark to theorize how absences are integral to institutional histories, and we will think about how we can, as
historians, responsibly address voices that have been removed from the canons of art history. This course considers not only central writings of art historical methodology but also the limits for decolonizing art history and the museum, as we will examine how the formation of the discipline depended upon absenting critical perspectives and voices.

Requirements/Evaluation: class participation, writing assignments
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: limited to and required of first-year students in the Graduate Program in the History of Art
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

Fall 2024
SEM Section: 01  T 1:00 pm - 3:50 pm  Caroline O. Fowler

ARTH 506  (S)  Expository Writing Workshop
This writing seminar for graduate students in the history of art will afford intensive full group discussions of writing skills and substantial one-on-one writing consultations. Group discussions will center on three kinds of texts: writing about writing, published writing related to the discipline of Art History, and student writing in progress. In six group discussions we will improve our vocabulary and method for discussing writing; we will learn to build better and more sophisticated sentences, paragraphs, and arguments; and we will practice anticipatory reading and writing in order to strengthen our control of both voice and structure. Each discussion will be supported with examples and exercises, and our watchword in all cases will be "revision." In one-on-one consultations (3-4 per person), the instructor will offer tailored critiques of each student's work, setting aside time as needed to troubleshoot sentences, paragraphs, or arguments together.

Requirements/Evaluation:  Class participation, participation in consultation meetings, writing assignments
Prerequisites: None
Enrollment Limit: 12
Enrollment Preferences: Limited to and required of first-year students in the Graduate Program in the History of Art
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

Spring 2025
SEM Section: 01  T 1:00 pm - 3:50 pm  Ezra D. Feldman

ARTH 507  (F)(S)  Object Workshop
This workshop engages graduate students in intimate observational study of objects through six sessions held over two semesters. Organized in conversation with experts on collections from the Clark Art Institute, the Williams College Museum of Art, and the Chapin Library at Williams College, each session will focus on close engagement with a particular type of object (e.g., painting, sculpture, print, photograph, building, book, furniture, etc.). There are no assignments or assessments for this course, but there may be occasional reading.

Class Format: in-person study of objects, outdoors, in the galleries, or in study rooms at the Clark, WCMA, the Chapin, or elsewhere, 3x/semester
Requirements/Evaluation:  Attendance is required at all sessions. There are no assignments or assessments for this course, but there may be occasional reading.
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: required of first-year students in the Graduate Program in the History of Art
Expected Class Size: 12
Grading: pass/fail option only
ARTH 508  (S)  Art and Conservation: An Inquiry into History, Methods, and Materials

In this course students will learn to recognize the materials present in cultural heritage collections, understand the history of artists’ methods and techniques, and hone their observation and examination skills for working with material culture. Students will form a basis in art conservation and condition assessment vocabulary and will exercise handling and examination skills for a variety of materials and artworks. Students will explore cultural heritage through the lens of the art conservator and form a broader awareness of the ethics and procedures of conservation and preservation. An understanding of the vulnerabilities and condition issues of cultural materials and how to care for them will be developed as an impactful, practical resource for future careers in cultural heritage. A multi-disciplinary group of teachers from the staff at the Williamstown + Atlanta Art Conservation Center (W+AACC) will conduct lectures, practicums, discussions on conservation research literature, and visits to nearby art institutions. Sessions are held at the W+AACC Conservation Center in the Lunder Center at Stone Hill on the Clark Art Institute campus. Students receive a syllabus with session outlines and required reading lists. Required readings are available via GLOW and on reserve at the Clark Library. Three exams will be given throughout the course. Attendance is required at all sessions in lieu of a final exam (each exam and attendance are weighted at 25% of the final grade).

Class Format: slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

Requirements/Evaluation: Attendance is required at all sessions; the course grade is based on three exams given throughout the semester; there is no final exam.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Graduate students in the history of art, then undergraduate majors in art history or studio art and related disciplines.

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

Spring 2025

SEM Section: 01  MR 5:30 pm - 7:45 pm  Julie  Reilly

ARTH 509  (S)  Graduate Symposium

This course is designed to assist qualified fourth-semester graduate students in preparing a scholarly paper to be presented at the annual Graduate Symposium. Working closely with a student and faculty ad hoc advisory committee, each student will prepare a twenty-minute presentation based on the Qualifying Paper. Special emphasis is placed on the development of effective oral presentation skills.

Class Format: committee discussions, workshops, practice runs, symposium

Requirements/Evaluation: Each student will submit a Qualifying Paper, which will be revised into a presentation. Each student will then present three practice runs and a final oral presentation at the Symposium.

Prerequisites: Successful completion and acceptance of the Qualifying Paper.

Enrollment Limit: 12

Enrollment Preferences: This course is limited to and required of second-year students in the Graduate Program in the History of Art.

Expected Class Size: 12

Grading: pass/fail option only

Distributions: (D1)
ARTH 511  (F)  Interspecies beings: demigods and monsters in art and culture, ancient to modern

Cross-listings:  CLAS 436

Primary Cross-listing

Horse-men, cat-women, bull-men, mermaids, snake-people: interspecies creatures are everywhere in ancient Greek and Roman art and poetry. Embodied in satyrs, sphinxes, centaurs, nymphs, and other part-human, part-animal beings is an alternative evolutionary and cultural history. In it, humans and animals live as one. There is no distinction between nature and culture. Male and female are equal. The industrial revolution never happens. This course traces the history of interspecies beings from their origin in ancient Greek art and poetry until today. Three points are important: 1) the relationship between the imagery and ancient political theory about "primitive" life; 2) evolving conceptions of biology and the environment, and 3) the role played by interspecies beings in the conceptualization of what is possible in art. The first half of the course examines the origins and character of interspecies beings in works of ancient art such as the Parthenon, and in ancient writers including Hesiod and Ovid. We examine relevant religious practices, materialist conceptions of nature, and biological theories of speciation, in Empedokles, On nature, Euripides' Bakchai, Plato's Phaidros, and Lucretius' De rerum natura. The second half of the course investigates the survival of classical monsters in the work of early-modern artists such as Botticelli, Michelangelo, Titian, and Dürer, and the rediscovery of ancient materialist theory. We consider the role played by interspecies beings in the formation of late modernism in art and literature. Key texts include Rousseau and Hobbes, Nietzsche's Birth of Tragedy, Mallarmé's "L'Apres midi d'une faun," and Stoppard's Arcadia. Problems include the relationship between nymphs and sex-workers in Manet, the meaning of the Minotaur in Picasso, and the interest in interspecies beings in the work of women surrealists such as Leonora Carrington. We conclude with contemporary popular culture such as the Hunger Games.

Class Format: Lecture and discussion.

Requirements/Evaluation: The requirements of the course include: attendance and participation in discussion; preparing summaries/analyses of reading assignments for discussions; one presentation on a research project, and one 20-page paper on the research project.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Priority goes to graduate students in art history. If space is available, senior art-history majors, classics majors, and environmental studies majors may enroll.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: This course will satisfy the seminar requirement in art history.

Distributions:  (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ARTH pre-1800

Not offered current academic year

ARTH 512  (F) Why Look at Animals? Animality in Contemporary Art

This seminar considers the so-called "animal turn" in contemporary art, in which more and more artists have taken nonhuman animals seriously in their work. Animals have long appeared in art as mere objects--to possess, consume, or symbolize with--rather than as subjects endowed with specific forms of intelligence, agency, or cross-species kinship. In this course we will analyze the work of artists who represent, emulate, or even collaborate with nonhuman animals, practices that take on particular urgency against the present backdrop of mass extinction. We will pay special attention to indigenous artistic practices and intersectional approaches to the burgeoning, multidisciplinary field of animal studies. Along the way, we will discuss animal ethics, the Anthropocene, and posthumanism, among other topics.

Requirements/Evaluation: active class participation, presentations, writing assignments

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Graduate students in the history of art, then advanced art history undergraduates; by application if over-enrolled
ARTH 513  (S)  Contours of Abstraction in Modern and Contemporary Art

Abstraction, be it gestural or geometrical, was a protagonist of global modernisms and continues to be a powerful visual language in contemporary art. The term "abstraction" may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled formalist rupture, revolutionary politics, appropriation, as well as racial, feminist, and queer critique. We will delve deeply into abstraction in global modern and contemporary art through myriad primary documents and theoretical frameworks so as to revise and expand its canonical contours and cartographies.

**Requirements/Evaluation:** Weekly presentations, response papers, final 20-page research paper

**Prerequisites:** Students at the undergraduate level must be seniors and Art History majors

**Enrollment Limit:** 12

**Enrollment Preferences:** Art History MA students and undergraduate Art History seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**Attributes:** ARTH post-1800

Not offered current academic year

ARTH 514  Art and the Body in Ancient China

What is the relationship between art and the body? In what ways can art be more than representation of the body, and body the subject and the beholder? What effects, if any, can art have on the body? While these questions pertain to art across different cultures and eras, ancient Chinese artworks offer a distinct and yet substantially untapped vantage point for contemplating the art-body relationship. Examining a wide range of materials, ranging from exquisite artifacts unearthed from tombs and Buddhist temples to the earliest examples of painting and calligraphy, in relation to the political, cosmological, and religious conceptualizations of the body in ancient China, this graduate seminar considers the capacities and limitations of how art engages with the body, particularly in ways beyond representation and looking.

**Requirements/Evaluation:** Attendance and active participation in discussions (30%); two research presentations (20-30 minutes each, 30%); a research paper (15-20 pages) accompanied by a presentation (40%).

**Prerequisites:** None.

**Enrollment Limit:** 15

**Enrollment Preferences:** Graduate students and advanced art history majors are prioritized.

**Expected Class Size:** 8

**Grading:**

**Distributions:** (D1)

**Attributes:** ARTH pre-1800

Not offered current academic year

ARTH 521  (F)  Islam and the Image  (DPE) (WS)

**Cross-listings:** REL 420

**Primary Cross-listing**

This seminar responds to a recent incident at a US liberal arts university where a professor was sacked for showing images of Prophet Muhammad as
part of her section on Islamic art. Why is image-making so hotly contested in Islam? What is the history of figural depictions in this tradition? The seminar explores artworks made for Muslim patrons from the medieval period to the modern era, considering how paintings produced for Muslim audiences can be situated within the frameworks of "Islamic art," a loaded historiographical term that has been questioned in recent times. The seminar also addresses some of the major problems that continue to haunt art scholarship in the field. For most of its history, the academic study of Islamic art has seldom considered contemporaneous literary voices that shed light on the motivations behind artworks. Furthermore, the historiography, deeply entrenched in its colonial and orientalist roots, has largely isolated images from their supporting texts--a curious oversight in light of the fact that painting in Muslim lands has historically been primarily an art of the book. These biases have affected the way museums have collected, displayed and interpreted paintings. For example, Western museums continue to place figural depictions made for books and albums in "South Asian" collections while textual manuscripts and calligraphic specimens made for the same Muslim audiences--even at times bound in the same albums--are categorized as "Islamic art." What does this isolation of text from image imply about prevailing views of Islamic art? To better understand the cultural, historical and religious context surrounding artworks students will read primary literature ranging from autobiography to devotional poetry, often written by the very patrons and subjects of the paintings to be discussed.

Requirements/Evaluation: class participation, short weekly writing assignments, final essay project

Prerequisites: Undergraduates wishing to enroll must have taken at least one art history course or one religious studies course. Undergraduates must email indicating their interest in the course prior to enrolling.

Enrollment Limit: 19

Enrollment Preferences: MA students, then advanced undergraduates

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 521(D1) REL 420(D2)

Writing Skills Notes: Weekly writing assignments consisting of 300-500 words. Final papers 15-20 pages for graduate students. 12-15 pages for undergraduate students. 1-page abstract for the final paper due by mid-November. A 4-5 page project outline due right after Thanksgiving break. After receiving feedback and comments from the instructor, the final paper will be due in the last week of classes.

Difference, Power, and Equity Notes: Highlights a global art history that is underrepresented. The class focuses on pluralistic engagements with non-Western cultures and epistemologies.

Attributes: ARTH pre-1800

Not offered current academic year

ARTH 525 (F) Japanese Art and Visual Culture: Private/Public/Pop  (WS)

Cross-listings: ASIA 324 / COMP 324

Secondary Cross-listing

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanô screen painting; nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

Class Format: Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

Requirements/Evaluation: For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

Prerequisites: No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one another.

Enrollment Limit: 10
Enrollment Preferences: Graduate Art students, followed by undergraduates majoring in Art History or Comparative Literature.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 525(D1) ASIA 324(D1) ARTH 324(D1) COMP 324(D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by tackling similar problems from different angles. Students will receive detailed feedback from the instructor on each paper, addressing argument, organization, and style, as well as peer feedback. (See requirements for details about the number and type of assignments.)

Not offered current academic year

ARTH 527  (F)  Acquiring Art: Selecting and Purchasing Objects For WCMA

Cross-listings: ECON 227

Secondary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation: Three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy for acquisition.

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 529  (S)  Muertos: Ancestral Mexican Arts of Mortality

The Mexican Días de los Muertos, which coincides with the Catholic holy days of All Saints' Day and All Souls' Day on November 1 and 2 of each year, numbers among the most widely recognized holidays practiced in contemporary Latin America. Available scholarly accounts of this holiday's historical origins, which tend to minimize the degree to which it reflects ancestral Indigenous Mexican religious practices, typically draw their earliest evidence from the Mexica (Aztec) capital of Tenochtitlan (present-day Mexico City) of c. 1300-1521 CE. However, the Mexica--well known for their practices of human and animal sacrifice, as well as other social practices that implicated mortality--were themselves the inheritors of a millennial tradition that venerated death. This course considers the theme and actual practice of death over the Mexican longue durée. It begins in the first two centuries CE, which saw a substantial population collapse in central Mexico that was followed soon thereafter by the first known mass-human sacrificial event in Mesoamerica. It then follows the social construction of death in Mesoamerica through early modernity when the importation of Eurasian pathogens into the Americas alongside the atrocities of European colonization led to the death of an estimated 90% of Indigenous
Americans. The final weeks of the course will consider how modern artists have responded to ancestral artistic and historical precedents. Artworks to be considered include the Temple of the Feathered Serpent of Teotihuacan, the sarcophagus of Pakal the Great of Palenque, the Great Ball Court of Chichen Itza, and the novel *Pedro Páramo* by Juan Rulfo.

**Requirements/Evaluation:** readings (100-200pp/week), participation, paper proposal, mid-semester paper draft (10-12pp), final research paper (20-25pp)

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** graduate students in the history of art, then advanced undergraduate art history majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**Attributes:** ARTH pre-1800

---

**ARTH 531 (S) 19th-Century American Performance and Popular Culture**

This course will study a wide variety of performances and emerging popular culture in 19th-century America, many of which, although not unique to the United State, reflect the U.S. back to itself in complex ways. Topics will include blackface minstrelsy, circuses and humbugs, male impersonators and burlesque, ethnic caricature, allegorical paintings on tour, vast panorama painting, anti-slavery imagery, late 19th-century theatre and spectacle, wild west shows as well as other mythologizing of indigenous Americans and the American landscape, the birth of the American art museum, and representations of significant moments of popular resistance, from the Lakota to the Great Railroad Strike of 1877. The central questions animating this course will be around the nature of performance and the popular. What can these two concepts tell us about the nature of art?

**Requirements/Evaluation:** Reading/writing assignments and class participation

**Prerequisites:** None

**Enrollment Limit:** 18

**ARTH 539 (F) The Matter of French Encounter (1564-1789)**

The story of artistic production in the Ancien Régime usually focuses on painting and on Paris. In this seminar, we will chart an alternative history of early modern French art through a closer look at those materials forged in the cross-currents of armed trade, expansion, and colonial resistance between France and East Asia, India, the Ottoman Empire, North America, and the Caribbean. We will explore how luxury wares (such as porcelain, silver, and textiles), tools of observation (such as prints and drawings), and ornamental ensembles (such as furnished interiors and gardens) were all shaped by forces of circulation, appropriation, and extraction. Through these objects, we will ask the following questions: How did habits of production and consumption change in an era of pre-industrial globalization? How did material and visual culture construct notions of difference and hierarchy? What are the ethics of ascribing agency to inanimate things that emerged in an era of rampant dehumanization? Assignments will foster students’ ability to interpret and discuss artisanal and decorative objects that art history has traditionally kept at the margins. We will interrogate the utility of concepts such as turquerie, chinoiserie, and the “exotic,” and we will call upon both primary sources and contemporary theory to critically examine how alterity and subjectivity can be cultivated through things. Note: Final papers that address early modern intercultural encounters outside of France are welcome.

**Requirements/Evaluation:** Participation in class, a short reading presentation (c. 5 minutes), a short creative writing assignment (3-4 pages), a final presentation (c. 10 minutes), and a final research paper (15-18 pages).
Prerequisites: None
Enrollment Limit: 14

Enrollment Preferences: Graduate students in the history of art, then undergraduate art history majors.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ARTH pre-1800

ARTH 545 Architectural Theory in Crisis

Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory—in the form of treatises, manifestos, and critical reviews—has exercised an enormous effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but that is not the case today. Why? We will investigate. Students will give short presentations on key theorists, such as Vitruvius, Alberti, Palladio, Laugier, Boulée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 20-page seminar paper, based on comments and discussion following a classroom presentation.

Class Format: presentations

Requirements/Evaluation: several short presentations and a final 30-minute presentation, to be followed by a 20-page paper

Prerequisites: permission of instructor

Enrollment Limit: 11

Enrollment Preferences: Graduate students

Expected Class Size: 10

Grading:

Distributions: (D1)

ARTH 552 (F) Art and Enlightenment in Europe

Cross-listings:

Secondary Cross-listing

This lecture course traces the emergence of new modes of art- and image-making during two momentous centuries of European history that established the paradoxical foundations of our modern world. In this period, modern democracy was founded and determined by exploitative labor, the extraction of natural resources, and the rise of the trans-Atlantic slave trade. Over two centuries from the founding of the French Academy in 1648 to the 1839 invention of photography, this course traces these tensions in art and intellectual thought, examining beauty and the sublime, rationality and madness, personhood and enslavement, natural history and extraction, democracy and tyranny. Often defined in terms of the "Enlightenment," this intellectual and artistic period engaged with freedom of religious thought, scientific experiment, and a belief that humanity was guided by reason and rationality. Yet these same discourses also laid the foundation for the invention of race, nationalism, and the expansion of European colonialism. Isolating a series of pivotal moments and emblematic figures in visual culture of this period, this course asks students to consider how art was implicated in Enlightenment, and, in turn, how Enlightenment was implicated in both newly liberatory and newly oppressive concepts of subjectivity and personhood. Particular emphasis will be placed on the history of science, and, relatedly, on the increasing global circulation of ideas, people, and goods. Artists in our purview include well-known figures like Velázquez, Rembrandt, Watteau, Hogarth, Goya, and Blake, as well as makers until recently left out of the art-historical canon, such as the Frankfurt-born botanical illustrator Maria Sibylla Merian, the Polynesian navigator and draftsman Tupaia, and the Guadeloupean neoclassical painter Guillaume Guillon-Lethière, the subject of a major upcoming exhibition at the Clark Art Institute. Designed for students with no prior experience studying art history, the course will work directly from objects in local collections, prioritizing methods of close looking and formal analysis. At the same time, the questions and methods of our inquiry will be fundamentally interdisciplinary.
Readings will emphasize primary sources and recent scholarship. A separate discussion section will be offered for MA students.

**Requirements/Evaluation:** midterm exam; final exam; visual analysis paper (3 pages); final paper (10 pages)

**Prerequisites:** none

**Enrollment Limit:** 50

**Enrollment Preferences:** art history majors

**Expected Class Size:** 50

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

**ARTH 553 (F) New Ecologies in Contemporary Art**

This seminar will consider a range of current artistic approaches to environmental questions, especially through the relational, systemic terms implied by ecology. As scholars have argued, where "nature" connotes that which is monolithic, ahistorical, and apart from humans, ecology reveals a situated and specific web of relationships, interdependencies, and power in which we are all implicated. Our seminar will pay particular attention to intersectional practices that acknowledge the ways extraction, exploitation, and dispossession have produced the environmental crises of the present, which also affect the most vulnerable and least responsible—both human and nonhuman—with greatest force. In addition to studying the work of emerging and established artists, we will read texts by the academics and activists with whom they are in dialogue, and welcome some of them as guests to our class. This seminar anticipates a group show on the subject at the Clark in summer 2023.

**Requirements/Evaluation:** seminar presentations; research paper (approximately 20pp)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** MA students first, then art history majors; By application if over-enrolled

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** ARTH post-1800

Not offered current academic year

**ARTH 555 (F)(S) Picturing Time in American Art**

The problem of history and the promise of the future have always shaped public discourse in the United States. This seminar explores the aesthetic and ideological operations of time in works of art and visual culture made in the U.S. context from the late colonial period through the present. From paintings of extinct animals and biblical disasters to expressions of a distinctly national art and Indigenous sovereignty, from visual records of territorial expansion and photographic motion studies to postmodern performance and Afro- and other futurist aesthetics, we will consider how ideas about time have shaped the iconography, materiality, and politics of visual representation in the U.S., with attention to the way time has been conceived in relation to concepts of progress, religion, nature, race, labor, and technology. We will explore how ideas about time are encoded in artworks through process, subject matter, and interpretation, and in relation to social systems such as slavery, settler colonialism, and capitalism.

**Requirements/Evaluation:** Attendance and participation in discussion; weekly responses and/or short writing assignments; final research project (proposal; abstract and annotated bibliography; 10-min oral presentation; 18-20pp research paper)

**Prerequisites:** None

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate students in the history of art, then undergraduate art history majors, then any interested student

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

ARTH 558  (S) Circa 1850: Artistic Currents and Cross-Currents

Although the history of nineteenth-century European art has often been narrated as a succession of "sms," the notion of discrete artistic movements following one upon the other is of course highly misleading. Despite common perceptions of Realism as the prevailing force at mid-century, many contradictory impulses were simultaneously at work. The Romantic strain in visual art continued, though sometimes in sublimated form, and historicizing and avant-garde perspectives alike jockeyed for influence in art criticism, sales rooms, and exhibition venues. Abetting this collision of styles was a proliferation of new media in visual culture more broadly. Focusing on European and American examples from the middle decades of the nineteenth century, this course addresses the emergence of new tendencies in art and the persistence or revival of old ones. We will explore a variety of topics, including the invention of photography and its impact on other image-making techniques; the opening of Japan and the vogue for Japonisme; medieval nostalgia in the face of rampant Haussmannization; and the role of tradition in vanguard art. On the American side, we will consider printmaking and photography as tools of documentation and self-fashioning during the Civil War era. This course will take place in the Manton Study Center for Works on Paper. Each session will engage directly with works from the Clark's collection, to be discussed and analyzed in conjunction with critical and theoretical readings.

Requirements/Evaluation: Reading/writing assignments, participation.
Prerequisites: None
Enrollment Limit: 16
Enrollment Preferences: Graduate students first. Undergraduates must receive permission from the instructor.
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Attributes: ARTH post-1800

Not offered current academic year

ARTH 559  (F) Photographing City Life: Diane Arbus/James Van Der Zee

Diane Arbus and James Vander Zee in Manhattan. In this seminar we will discuss two photographers of city life: Diane Arbus (1923--1971) and James Van Der Zee (1886--1983). So doing, we will also observe how life in New York changed during their years of great productivity. In the first part of the course, "Diane Arbus in Manhattan," we will talk about Arbus' relationship to New York--the city of her birth. For most of her career, Arbus worked in Manhattan; indeed, one could think of the city as another character in her work. Arbus' relationship to myth--to storytelling--was profound. A great reader throughout her life, she was drawn to those writers who saw cities as very individualized places. In addition to looking at Arbus' photographs of life in Manhattan in the nineteen fifties, sixties, and in 1970, we will read her published letters, and those authors who inspired her with their artistry, and fascination with myth, including Borges, and Kafka. In the second part of the course, "James Van Der Zee and the Black Village," we will discuss the great Black photographer whose archives were just purchased by the Metropolitan Museum of Art (where Arbus' archives are as well). Born in Lenox, Massachusetts, Van Der Zee settled in Harlem in 1916; there, he opened a photography studio where he became known for his portraits of Black life as it was lived uptown. Admired by Arbus and others, Van Der Zee's interest in and commitment to his community extended to all aspects of Harlem life, including death. To support our discussions of Van Der Zee's Black village, we will read modernist classics, including Jean Toomer's "Cane," and Toni Morrison's "Jazz" that deal specifically with village life. Please note that seminar meetings will be held biweekly on 9/8, 9/29, 10/13, 10/20, 11/3, 11/17. The seminar will include several mandatory viewing excursions outside Williamstown. The dates of these excursions are TBD, but will be restricted to Fridays or weekends. Professor Als will hold office hours following the seminar at hours TBD. Application may apply.

Requirements/Evaluation: Class participation, graded writing assignments
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: Grad students only. Application may be required.
ARTH 560  (F) Repairing a Broken World: Intro to North African Contemporary Art  (DPE)

Cross-listings:  RLFR 360 / ARAB 360 / COMP 361

Secondary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Conducted in French.

Requirements/Evaluation:  For undergrads: Active participation, 8 1-page response papers, 5-page mid-term paper, 10-12 page final paper and presentation.  For grad students:  Active participation, 8 response papers, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites:  Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit:  18

Enrollment Preferences:  If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 2 spots will be offered to Grad Art students.

Expected Class Size:  15

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 360(D1) ARTH 460(D1) ARTH 560(D1) ARAB 360(D1) COMP 361(D1)

Difference, Power, and Equity Notes:  This course critically examines art work that engages colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity.

ARTH 561  (S) Land, Memory, Materiality: Histories and Futures of Indigenous North American Arts  (DPE)

Cross-listings:  HIST 454

Primary Cross-listing

This course engages Indigenous North American traditions of creative expression, remembrance, and representation in historical, contemporary, and future-facing ways. Drawing upon diverse Native American and First Nations theories and practices, it ranges widely across the continent to consider Indigenous arts and material culture within specific cultural, socioeconomic, and political contexts. Part of the course is grounded in the Native Northeast, including the Indigenous homelands of the Stockbridge-Munsee Mohican Community in which the Graduate Art Program and Williams College are situated. Other units will focus on continuities and transformations in artistic and maker-traditions within and across specific Indigenous nations and communities. The course is especially interested in connections between past and present, and the innovative ways Indigenous artists, makers, and knowledge-keepers have reckoned with what has come before, while also mapping meaningful future pathways. Topics will include repatriation and community-led restorative efforts to bring home ancestors and important heritage items "collected" over the centuries following 1492; concepts and practices of cultural, intellectual, visual, and political sovereignty; decolonizing museums; the complex dynamics of collaboration;
Indigenous, African-American, and Afro-Indigenous artistic connections and solidarities; and Indigenous challenges to Eurocentric and settler colonial approaches to preservation, interpretation, and classification. Seminar members will develop familiarity with methods and ethics grounded in Native American and Indigenous Studies, and with new scholarship by leading and emerging critics and creators.

**Class Format:** The course will feature seminar discussions as well as local trips to museums, libraries, and archives with pertinent collections and exhibitions.

**Requirements/Evaluation:** Engaged participation in discussions; in-class presentations; short writing assignments in preparation for final project; final original research and interpretive project, with presentation to seminar.

**Prerequisites:** For undergraduates, at least two prior courses in or related to History, Art History, Native American and Indigenous Studies, and/or Museum Studies.

**Enrollment Limit:** 16

**Enrollment Preferences:** Priority for Graduate Art students. Four seats are reserved for undergraduates, with preference to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to cd10@williams.edu.

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 561(D1) HIST 454(D2)

**Difference, Power, and Equity Notes:** The course centers theories, experiences, and expressions from Native American/Indigenous communities, scholars, and artists/makers, while engaging foundational and new work in Native American and Indigenous Studies (NAIS). The course also provides students with critical tools for reckoning with settler colonialism and its historical as well as enduring impacts in Indigenous contexts; and with race, ethnicity, sovereignty, and tribal nationhood as key interpretive frames.

**Attributes:** HIST Group F Electives - U.S. + Canada

Not offered current academic year

**ARTH 563 (F)(S) Contemporary Curatorial Workshop**

Seminar for graduate art history students to engage in discourse around contemporary curatorial practice with professionals in the field. Guest curators discuss their work and methodology and students enrolled in the course who are working on curatorial projects have the opportunity to workshop their ideas with their peers and guests. Under the direction of the chairs, students will participate in class discussions, present projects, host local and visiting curators, travel to visit exhibitions regionally as the schedule allows, and explore key topics in modern and contemporary art and curatorial practice.

**Class Format:** workshop, meets 4x a semester

**Requirements/Evaluation:** Attendance is required at all sessions. There are no assignments or exams.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Graduate students in the history of art; undergraduates may audit the course for no credit with prior approval of the instructors and as space allows.

**Expected Class Size:** 25

**Grading:** pass/fail option only

**Distributions:** (D1)

**Attributes:** ARTH post-1800

ARTH 565 (F) Sonic Ecologies: Queer Listening, Orientations, and Objects

This seminar considers sound, the aural imagination, and practices of listening in visual art and time-based media. Focusing on work produced in the 20th and 21st centuries, we will explore theoretical, media, aesthetic, and reception issues through an intersectional lens. While we will focus on queer theory and related artworks and art historical accounts, the course will also draw heavily on recent writings on and artistic practices that take up other related aspects of “ecology” broadly understood: interspecies relationality, the environment, the climate crisis, and scholarship grounded in the specificity of critical race theory, Latinx, Caribbean, and diasporic studies. Readings will tend toward the theoretical—from Sara Ahmed and José Esteban Muñoz to Tina Campt and Ren Ellis Neyra, among many others—but will be accompanied by art historical accounts and each class meeting will be grounded by in-depth discussion of several specific works of art. When resonant, we will take advantage of access to relevant exhibitions, performances, or events at the Clark, Williams College Museum of Art, MASS MoCA, or Bennington College. The course will prioritize student-facilitated discussion, and student work will be focused on producing a substantial research paper (with an option to produce a hybrid research/creative project, developed in conversation with the instructor). Undergraduates welcome with permission of the course instructor.

Requirements/Evaluation: Reading and writing requirements, class participation

Prerequisites: None
Enrollment Limit: 18
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Attributes: ARTH post-1800

Not offered current academic year

ARTH 569 (F) Gérôme

This course explores work and career of Jean-Léon Gérôme (1824-1904), perhaps the most renowned, popular, and influential artist of the later nineteenth century. With commercial and artistic relationships that spread his influence across the globe, Gérôme has come to seem very much like a highly successful contemporary artist, specifically with regard to his place in an international art world that married elite institutional practices to new technologies of reproduction, marketing techniques, and other instruments of modern mass culture. Gérôme's fame was short lived, however. In the wake of the Modernist revolution on the one hand, and Post-Colonial critique on the other, no discussion of the artist can avoid wrestling with complaints that have left him thoroughly diminished—though less forgotten than scorned. Not only did his art, as it seemed, help perpetrate a gigantic aesthetic error, it blundered onto ethically compromising terrain. Today Gérôme stands as Exhibit A in wide-ranging critique of Orientalism's ideological work. The course will interrogate the Modernist and Post-Colonial complaints against Gérôme in detail, even as it also explores his art from a range of other perspectives, many developed very recently. Topics include Gérôme's relationship to photography, to Orientalism and animal studies, to the cinema, to polychrome sculpture, his approach to historical narrative, and well as his voyeurism and other other manipulations of viewer experience so critical to his art. The seminar will engage the Clark's important collection of Gérôme paintings, and also travel to the Walters Art Gallery in Baltimore, conditions permitting. Students may prepare papers on any aspect of global late-nineteenth-century "academic" or "official" art that was informed by Gérôme's example.

Requirements/Evaluation: class participation, presentations in seminar, research paper (approximately 20 pp)

Prerequisites: none
Enrollment Limit: 16
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

Not offered current academic year

ARTH 578 (F) The "Book" Dissected: Making and Meaning in Medieval Manuscripts

How did medieval and Renaissance "books" work, when the codex was only one form of the book, which continually evolved, and when they weren't only used for reading? This course will explore the book as object and the book as concept. Drawing on the collection of manuscripts, incunables, and later printed books at WCMA, Chapin, and surrounding museums, the course will consider how the forms and materiality of books could have affected
readers' reception and perceptions, and in turn, how religious, cultural, political, and economical forces shape their format, decoration, and paratext. While it will primarily deal with Western books, we will also consider early ones from around the world. Students will develop codicological and bibliographic analytical skills as we study our changing uses and relationships with and to books as instruments of doctrine and devotion, power and identity.

**Requirements/Evaluation:** class presentations; research papers; other assignments

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate students in the history of art, then advanced undergraduate art history majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**Attributes:** ARTH pre-1800

---

**ARTH 579 (F) Art and the Body in Ancient China**

What is the relationship between art and the body? In what ways can art be more than representation of the body, and body the subject and the beholder? What effects, if any, can art have on the body? While these questions pertain to art across different cultures and eras, ancient Chinese artworks offer a distinct and yet substantially untapped vantage point for contemplating the art-body relationship. Examining a wide range of materials, ranging from exquisite artifacts unearthed from tombs and Buddhist temples to the earliest examples of painting and calligraphy, in relation to the political, cosmological, and religious conceptualizations of the body in ancient China, this graduate seminar considers the capacities and limitations of how art engages with the body, particularly in ways beyond representation and looking.

**Requirements/Evaluation:** Attendance and active participation in discussions (30%); two research presentations (20-30 minutes each) per student per semester (30%); a research paper (15-20 pages) accompanied by a presentation (40%).

**Prerequisites:** None

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate students in history of art and undergraduate art history majors.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**Attributes:** ARTH pre-1800

---

**ARTH 584 (S) Fragments and Healing: Disability Studies and Late Antique Art**

**Cross-listings:** REL 425

**Secondary Cross-listing**

This seminar will investigate some of the ways that contemporary Disability Studies can help us see and think about the complexities of differently abled bodies in Late Antiquity (broadly, from ca. 200 until ca. 750), the formative period for Christian art (and consequently for much of Western art). Disability Studies is an extremely active and rich body of literature and art that has not often been brought into conversation with historical periods of art, and so this seminar seeks to open up discussion of the insights possible from that conversation, not only how Late Antique art can be re-interpreted, but also how that period of art can reveal under-explored areas in the field of Disability Studies. The seminar will undertake a mutual interrogation of accepted notions in both fields and, in this way, to explore some new understandings of Disability Studies’ capacities for allowing us to think with our art, culture, and bodies. The means at our disposal for this seminar are art of Late Antiquity and of the contemporary world, and that idea of mutual interrogation also operates in our study and display of that art. The seminar will look at art of healing and recuperation, art produced by and
directed at diversely-abled bodies, and at fragments and restoration, and think about art as documents, reflections, and determinants of those bodies, now and in the past. It will, for this reason, work around the collection of WCMA, with exhibition and collection research, and the historical archives of the Library holdings, so that the widest possible study of bodies and difference is opened for our thinking and dialogue.

Requirements/Evaluation: participation in discussion; three 1-2-page reading reports; one 3-5-page exhibition response; one 15-20-page final essay
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: senior art-history majors and graduate students; other students will need instructor consent
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Unit Notes: In this seminar, students will develop skills of crafting clear and persuasive arguments through an iterative writing process. Further, to help them achieve these goals, they will receive timely comments on their written work.
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ARTH pre-1800
Not offered current academic year

ARTH 585  (S)  Facing Portraiture

What constitutes a portrait? How do portraits act in the world? What histories do they hold, and what stories can they tell? This seminar will explore how artists, sitters, viewers, and historians have approached this genre and to what ends. We will interrogate the possibilities and limits of portraiture; examine how portraiture encodes forms of difference through ideological claims to power, likeness, and self-possession; and explore how technological developments inform portraiture’s shifting private and public uses. Attending to historical and cultural specificity—with particular though not exclusive attention to the post-1800 period and the United States—we will also excavate the genre’s legacy by exploring its contemporary presence, asking what concerns shape conceptions of portraiture in contexts such as the National Portrait Gallery’s triennial Outwin Competition and popular discourse. Bridging past and present, and in conversation with objects held in the collections of the Clark, WCMA, and the Chapin Library, we will work toward our own definition of portraiture and, in so doing, discover and complicate the relationship between personhood, identity, and representation. Students are welcome to develop final projects on relevant topics and materials outside the temporal and geographic contexts addressed in class.

Requirements/Evaluation: attendance and participation in discussion; weekly responses; final research project (proposal; select annotated bibliography; abstract; 15-min oral presentation; 15-20pp research paper)
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: graduate students, then undergraduate art history majors, then any interested student
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Not offered current academic year

ARTH 588  (S)  The Scene of Decapitation in European Art

From Goliath to Medusa, from Judith to Salome, from the invention of the guillotine to the mythology of the executioner under "Oriental despotism," the "scene" of decapitation has long stood as a central focus of European art and letters. This course examines that scene as an artistic, psychological, and intellectual problematic across painting, sculpture, and other media, from the late-middle ages to the end of the nineteenth century. Although part and parcel of the larger spectacle of juridical punishment, the scene of decapitation arguably constitutes its own series, and for this reason has attracted numerous artists and a prestigious literature. Artists include Caravaggio, Artemisia Gentileschi, Théodore Géricault, Gustave Moreau, Henri Regnault, and numerous others. Interdisciplinary readings as well as a large body of art historical literature. Weekly readings, discussion, oral presentation, and research paper on a relevant topic from 1300 to 1900.

Requirements/Evaluation: class presentation; research paper (approx 20pp)
**Prerequisites:** none  

**Enrollment Limit:** 14  

**Enrollment Preferences:** graduate students in the history of art, then advanced undergraduate art history majors  

**Expected Class Size:** 12  

**Grading:** no pass/fail option, no fifth course option

SEM Section: 01  R 1:00 pm - 3:50 pm  Marc Gotlieb  

**ARTH 589 (S) Imitation, Copy, Reproduction**  

Focusing primarily on European and American art before 1900, this course addresses the related categories of imitation, copy, and reproduction with particular attention to prints and other works of art on paper. We will consider the status of the multiple, the role of imitation in classical art theory and pedagogy, the motivations for (and protections against) different kinds of copying, the emergence of photomechanical processes, and the centrality of reproducible images to the art-historical enterprise, among other topics. The basis of our investigations will be works from the Clark's own collection, to be studied with a close eye to their medium and materiality. We will explore concepts of originality, fidelity, authenticity, and value in the light of critical and theoretical texts, while also examining the historical conditions that underlie distinct instances of image reproduction. This course will take place in the Manton Study Center for Works on Paper. Each session will offer direct engagement with works in the Clark's permanent collection.  

**Requirements/Evaluation:** seminar presentation; research paper (approx 20pp)  

**Prerequisites:** none  

**Enrollment Limit:** 14  

**Enrollment Preferences:** graduate students in the history of art, then advanced undergraduate art history majors

**ARTH 590 (F) Guillaume Lethière (1760-1832) and Caribbean Networks in France during the 18th and 19th centuries**  

Born in the French colony of Guadeloupe, Guillaume Lethière (1760-1832) was a key figure in French painting during the late eighteenth and early nineteenth centuries. The son of a white plantation owner and a formerly enslaved woman of mixed race, Lethière moved to France with his father at age fourteen. He trained as an artist and successfully navigated the tumult of the French Revolution and its aftermath to achieve the highest levels of recognition in his time. A favorite artist of Napoleon's brother, Lucien Bonaparte, he served as director of the Académie de France in Rome, as a member of the Institut de France, and as a professor at the École des Beaux-Arts. Despite his many accomplishments and sizeable corpus of paintings and drawings, Lethière has notably disappeared from the "canon" of art history. Such a lacunae begs many questions about the circles of sociability in which he traveled, the reception of Caribbean artists in France in the eighteenth and early nineteenth centuries, and the lack of widespread knowledge on these topics today. This seminar will be timed with the major monographic exhibition taking place at the Clark Art Institute in the summer/fall of 2024. The course will also provide an opportunity for close examination of objects in the Clark's permanent collection.  

**Requirements/Evaluation:** class participation, presentations, research paper (approx. 20pp)  

**Prerequisites:** none  

**Enrollment Limit:** 14  

**Enrollment Preferences:** Graduate students in the history of art, then undergraduate art history majors  

**Expected Class Size:** 12  

**Grading:** no pass/fail option, no fifth course option
Over the last two decades, art history has experienced something of a sonic turn. What does attending to sound open up for art historians, so long trained principally in visual analysis and critique? This seminar delves into sonic practices, methods, and theories in the visual arts from 1960 to the present. While we will examine time-based media, including film, performance, and intermedia works, this course considers the aural imagination and practices of listening more expansively and addresses artworks outside what might conventionally be deemed “sound art.” Course readings will include art historical accounts, art criticism, and artist’s writings, as well as relevant texts from adjacent disciplines including sound studies, media studies, performance theory, queer theory, disability studies, Black Studies, and Latinx and Chicana studies. The course will explore the cross-pollination of theater, music, and artistic experimentation in the 1960s; the immersive installations of “radical architecture” by groups like Archigram; the strident politics of experimental Italian interventions in the 1970s; the reverberations of the AIDS crisis, for so long silenced in the United States, in the 1980s and early 90s; recent work by Deaf artists critiquing ableist hearing ideologies; and contemporary Caribbean artists using sonic methods today to grapple with histories of oppression, climate change, and diaspora, among other topics.

Requirements/Evaluation: Attendance and participation in discussion; short writing assignments; final research projects (including 10-minute oral presentation and 15-20 pg. paper)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Grad students first, then music majors and art majors, but undergraduates must seek approval from Professor Woolsey

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTh 599  Muertos: Ancestral Mexican Arts of Mortality

The Mexican Días de los Muertos, which coincides with the Catholic holy days of All Saints’ Day and All Souls’ Day on November 1 and 2 of each year, numbers among the most widely recognized holidays practiced in contemporary Latin America. Available scholarly accounts of this holiday’s historical origins, which tend to minimize the degree to which it reflects ancestral Indigenous Mexican religious practices, typically draw their earliest evidence from the Mexica (Aztec) capital of Tenochtitlan (present-day Mexico City) of c. 1300-1521 CE. However, the Mexica—well known for their practices of human and animal sacrifice, as well as other social practices that implicated mortality—were themselves the inheritors of a millennial tradition that venerated death. This course considers the theme and actual practice of death over the Mexican longue durée. It begins in the first two centuries CE, which saw a substantial population collapse in central Mexico that was followed soon thereafter by the first known mass-human sacrificial event in Mesoamerica. It then follows the social construction of death in Mesoamerica through early modernity when the importation of Eurasian pathogens into the Americas alongside the atrocities of European colonization led to the death of an estimated 90% of Indigenous Americans. The final weeks of the course will consider how modern artists have responded to ancestral artistic and historical precedents. Artworks to be considered will include the Temple of the Feathered Serpent of Teotihuacan, the sarcophagus of Pakal the Great of Palenque, the Great Ball Court of Chichen Itza, and the novel Pedro Páramo by Juan Rulfo.

Requirements/Evaluation: Readings (100-200 pages/week); Participation (25%); Essay proposal 1 page (10%); Essay mid-semester draft 10-12 pages (25%); Final research essay, 20-25 pages (40%)

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: 1) Graduate art history students 2) third and fourth year undergraduate art majors 3) third and fourth year undergraduate American Studies majors

Asian American Studies is a vibrant interdisciplinary field of study about race and racism, colonialism and empire, immigration and diaspora, war and militarism, labor and embodiment, citizenship and identity, and much more. AAS research and teaching are grounded in the histories, social relations, and cultural expressions related to Asian American, Asian immigrant, and/or Asian diasporic people. Asian Americanist scholars, artists, and activists thus continuously generate critical insights into these communities within, or in relation to, the United States or the Americas more broadly. The field encompasses comparative methods of study, transnational analysis, and the work of scholars from around the globe. AAS courses at Williams encourage inquiry within traditional disciplines, bolster a number of interdisciplinary fields, and showcase a wide variety of theories, methods, and methodologies (both creative and scholarly). AAS courses emphasize intersectional analyses of difference (e.g. race, gender, sexuality, ability, religion, citizenship, class), as well as the social and cultural construction of place and identity. Knowledge in this field is thus crucial for understanding society, history, literature, religion, culture, art, and beyond.

The concentration in Asian American Studies requires five courses. Students are required to take at least one 100- or 200-level introductory gateway course, one 400-level senior seminar in which to pursue a capstone project, and three electives. One elective must be a core elective, one must have a country-of-origin, transnational, diasporic, or comparative ethnic studies approach, and one must be at the 300-level or higher. These attributes are not mutually exclusive; some courses may satisfy all three attributes at once. The electives must also be taken in at least two different divisions of the college. Additional courses may be approved by the program advisory committee. Up to one course may be taken while studying abroad or away; the program advisory committee must approve this course as well.

Who or what constitutes the term "Asian American"? Leading with this provocation, this course offers an introductory overview of the interdisciplinary discipline of Asian American Studies, tracing its formation and evolution from the late 1960s onward. Focusing on an array of foundational texts, cultural production, and primary sources, we will ask who has been included/excluded from this term, what the bounds are (if any), and how others approach and negotiate this term. As such, we will analyze its shifting constructions and enactments alongside other markers of difference from the nineteenth century to the present. In particular, we will be attentive to how these constructions have been shaped both relationally through other racial formations as well as overlapping systems of power, including settler colonialism, U.S. war and empire, capitalism, and globalization within and beyond the U.S. With this, we will examine how this term has been widely undone and remade via political activism, visual and performance art, plays, media, poetry, etc. The aim of this course is not to identify a single or right definition of the term "Asian American" but to collectively assess and explore the limits, reaches, utility, and expansiveness of it.

Requirements/Evaluation: weekly readings, in-class discussions, weekly discussion posts, two papers, and a final paper or creative project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first-year students, AAS concentrators or prospective concentrators, AMST majors or prospective majors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AAS 206 (S) Beyond the Tiger Mom: Depictions of East Asian Mothers in Contemporary American Literature (WS)

Cross-listings: ENGL 206

Secondary Cross-listing

A tutorial designed to explore the interpretative difficulties and possibilities of East Asian mothers and motherhood in contemporary American literature (fiction and memoir). The "Tiger Mom"—highly controlling, strict, severe almost to the point of abuse—has become the go-to phrase for many Americans when referring to traditional East Asian mothering styles. This attempt to categorize and simplify cultural differences fails to capture the complex nature of East Asian mothering. While the American public imagines East Asian parenting as only unwavering and harsh, immigrant parents, for example, must often find a parenting strategy that bridges traditional East Asian and mainstream American norms. This course will explore the ways that contemporary Asian American authors depict the complexity of East Asian mothering and mothers. What kinds of mothering does the reductive category of Tiger Mom ignore? What are the central questions these authors pose about mothers and motherhood? How do they negotiate the tension between the individual versus the community, or the pursuit of the child's own interests as opposed to success as defined by the parent when it comes to that child's future? And what are the pitfalls of reading literature as social science? In keeping with tutorial format, students will meet in pairs with the instructor once a week; during these meetings, one student will present a short analytical paper on the texts covered that week. The other student will write a response paper and join the instructor in a discussion of both papers. The reading list may include work by Ocean Vuong, Yiyun Li, Michelle Zauner, Celeste Ng, Amy Tan, Jessamine Chan, Maxine Hong Kingston, Alice Sola Kim, and Amy Chua, among others.

Class Format: In keeping with tutorial format, students will meet in pairs with the instructor once a week; during these meetings, one student will present a short analytical paper on the texts covered that week. The other student will write a response paper and join the instructor in a discussion of both papers.

Requirements/Evaluation: A paper or response each week; extensive comments (verbal and written) on published and student work; active participation in class; creation of writing assignments and discussion questions.

Prerequisites: A 100-level English course, or the equivalent.

Enrollment Limit: 10

Enrollment Preferences: Anyone who has taken a 100-level English course, or the equivalent.

AAS 214 (S) Racial and Ethnic Politics in America

Cross-listings: PSCI 214

Secondary Cross-listing

Arguably, the dominant discourse in American politics today is about race. Race is connected to salient issues like immigration and police conduct; to politicians across the political spectrum; and (some argue) to virtually everything in American politics, including fundamental concepts that have no manifest racial content, like partisanship and the size and scope of government. We will evaluate the role of race as it relates to public opinion, political behavior, campaigns, political institutions, and public policy debates, with special attention devoted to the nature of racial attitudes. Most of the course will focus on the historical and contemporary relations between whites and African Americans, but we will also explore topics involving other pan-ethnic communities, particularly Latinos and Asian Americans.

Requirements/Evaluation: class participation, one to two short papers (5-7 pages), one medium paper (8-12 pages), an oral presentation, and a final exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: poli sci majors first, seniors second, juniors third, sophomores fourth
Expected Class Size: 15

AAS 215  (S) Introduction to Asian American Literature  (DPE)
Cross-listings: ENGL 215
Secondary Cross-listing
This course will provide an introduction to some of the major works of Asian American literature, from the mid-20th century to the present. Throughout, we'll attend to the intersection of aesthetics and politics, exploring the creative ways Asian American literary texts both reflect and respond to the historical forces that have shaped Asian American experiences and identities, including exclusion, internment, and U.S. wars and imperialism in Asia. Works we're likely to read include: John Okada's *No-No Boy*, Maxine Hong Kingston's *The Woman Warrior*, Theresa Hak Kyung Cha's *Dictee*, Jessica Hagedorn's *Dog eaters*, Lê thỹ diệm thúy's *The Gangster We Are All Looking For*, and Jhumpa Lahiri's *Interpreter of Maladies*.
Requirements/Evaluation: class participation, occasional informal discussion posts, a 5-page midterm paper, and an 8-10 page final paper.
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: If over-enrolled, enrollment preference will be given to Asian American Studies concentrators and prospective concentrators.
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)  (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
AAS 215(D2) ENGL 215(D1)
Difference, Power, and Equity Notes: This course offers students the opportunity to learn and think critically about Asian American community struggles throughout U.S. history while examining the forms of literary expressions that arise out of and in relation to those struggles. It also delves into the intersectional nature of Asian American community struggles as they emerge along the fault lines of race, class, and gender/sexuality.

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian American (including South Asian) communities are cultivated, expressed, and contested. Students will engage with how social and historical contexts influence the processes through which dance practices are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies to engage with issues such as nation formation, racial and ethnic identity politics, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include screenings, movement workshops, and discussion with guest artists and scholars. No previous dance
Experience is required.

Requirements/Evaluation: reading responses, in-class writing assignments, participation in discussions and presentations, two 5-6 page essays, and a final cumulative essay assignment.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first years and sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AAS 237 (F) Islam in the United States: Race, Religion, Politics (DPE)

Cross-listings: AFR 237 / REL 237 / AMST 237

Secondary Cross-listing

Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of "Black Muslim" movements represented by Malcolm X, to the current "War on Terror" era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States. Throughout the course, we will be engaging with historical and anthropological material, autobiographies, documentaries, films, historical primary-source documents, music, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

Requirements/Evaluation: regular reading responses, 2 midterm essays, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Majors and concentrators in REL, AFR, and AMST

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

AAS 252 (F) Im/mobilities (DPE) (WS)
Cross-listings: AMST 252 / SOC 252

Secondary Cross-listing

We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic revealed, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move—or to stay still.

Requirements/Evaluation: Thoughtful and consistent class participation, several short reflection papers, two drafts of an opinion essay, class presentation

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Given to first-year students and sophomores, particularly those who have demonstrated an interest in AAS/SOC. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 252(D2) AAS 252(D2) SOC 252(D2)

Writing Skills Notes: Emphasis on the processes of writing and revising, several short papers on which students will receive close feedback, and drafts of a final written assessment

Difference, Power, and Equity Notes: This course explores a politics of im/mobilities: how we move through space through different bodies at the intersection of race, class, gender, ability, and citizenship. Students will use their own bodies as research sites for deepening their understanding of how we navigate the freedom to move or stay still.

Fall 2024

AAS 253 (F) Embodied Knowledges: Latinx, Asian American, and Black American Writing on Invisible Disability (DPE)
Cross-listings: AMST 253 / LATS 254

Secondary Cross-listing

This interdisciplinary course assumes an expansive approach towards disability, defining it not exclusively as a legible identity that one can lay claim to, but rather as an identity grounded in one’s relationship to power (Kim and Schalk, 2020). This course centers on the critical role of lived experience as a key site of everyday theorization for the multiply marginalized, and specifically on the ways in which invisibly disabled Latinx, Asian American, and Black American individuals write the self. As scholars in disability studies argue, self-representations of disabled individuals carry the potential for us as a society to move beyond the binary narratives of “tragedy or inspiration” so often associated with disability. Rather, the self-produced narratives of US disabled writers of color offer a much more nuanced portrayal of everyday life with disability/ies for the multiply marginalized. Much like invisible disability itself, these self-representations ultimately refute traditional depictions of disability, and underscore the ways in which the bodymind serves as a rich, albeit often overlooked, site of knowledge. Embodied Knowledges draws on the insights of disability studies, crip studies, anthropology, literary studies, medicine, psychology, education, cultural studies, ethnic studies, American studies, gender and sexuality studies, sociology, and trauma studies. We will examine the works of Latinx, Asian American, and Black American writers and scholars others in relationship to one another,
and as points of departure for examining issues such as the relationship between immigration and disability; intergenerational trauma; the impacts of paradigms such as the Model Minority Myth and notions of cultural deficit; passing; the politics of disability disclosure, the paradoxes of invisible disability; invisible disability in academic spaces; the role of culture and categories of difference such as race, gender, class and immigration status in societal approaches to and understandings of invisible disability; and future visions in the realm of disability justice and care work.

Requirements/Evaluation: Two 5-6 page essays; One group question assignment; Final reflection document

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Preference given to majors or concentrators in LATS, AMST, and AAST, in order of seniority.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 253(D2) LATS 254(D2) AAS 253(D2)

Difference, Power, and Equity Notes: This course takes up issues of difference and power in every one of its readings and materials. In particular, we examine the intersection of race, ethnicity, dis/ability, gender, sexuality and nation in our discussions of how disability helps to define our understanding of US identity and citizenship, particularly for US communities of color.

AAS 275 (S) Acting Out: Performativity, Production, and Politics in East Asian Theatres (DPE)

Cross-listings: CHIN 275 / THEA 271 / COMP 271 / ASIA 275

Secondary Cross-listing

"Asian Theaters," for those in the West, can conjure up a variety of exotic impressions: spectacle and cacophony, mysterious masks and acrobatic bodies, exquisite styles and strangely confusing conventions. Although Asian theaters have been studied systematically in the West for at least a century, the West has never truly left its "othering" look at them. Yet, what is "different" for the West is bedrock for Asian cultures. Theatre, one of the most important and dynamic forms of cultural production and communication, has actively involved all strata of Asian societies for a millennium. How to explain theatre's continued presence and relevance for Asian nations? What do the traditions of Kun, Kabuki, and P’ansori reveal about the cultures and communities in which they were created? This course seeks to understand from the Asian perspective, rather than "exoticize" and "other," musical and dance theatres from China, Japan, and Korea. Examining the evolving presentations of signature dramas dating from the sixteenth to the eighteenth centuries, we will act out Asian theatres in the following ways: (1) by reading the original plays in translation in tandem with their contemporary and intercultural reproductions, we will explore how Asian theatres fare in the era of globalization within and beyond national borders; (2) by revealing the "technologies" of writing, reading, acting, and staging these plays in different cultural milieus, we will consider what kinds of language and rhetoric, forms of music and movement, as well as visual components are deployed to convey evolving messages; (3) by considering key performances held outside of the proscenium stage, we will gain exposure to alternative theatrical spaces in Asian and diasporic communities that reform performing conventions, reconfigure staging environments, and renegotiate cultural values. In this manner, we will together gain an appreciation for the aesthetic devices, thematic concerns, and production politics of East Asian theatres and their global reproductions. Class materials include drama, production videos, and invited zoom sessions with Asian theatre practitioners and directors who live in the U.S. and other diasporic communities. All materials are in English. No language prerequisite. Funded by the Global Initiatives Venture Fund, this course includes an all-expense-paid travel component, a cultural and academic exchange project titled "Redefining Amateurism: Experiential Learning with Student Theatre in Contemporary China," which will bring up to eight Williams students to Nanjing, China during the Spring Break (3/23-4/3/2025). Students will participate in workshops with playwrights and theater-makers in contemporary China and engage in black-box theater productions with students from Nanjing University and Shanghai Theatre Academy. This travel component is OPTIONAL for students taking this course. However, students enrolled in this class will receive priority consideration to be included in the free travel project. Selection criteria include active participation, excellent performance in the course, etc.

Class Format: Funded by the Global Initiatives Venture Fund, this course includes an all-expense-paid travel component, which will bring up to eight Williams students to Nanjing, China during the Spring Break (3/23-4/3/2025). This travel component is OPTIONAL for students taking this course. However, students enrolled in this class will receive priority consideration to be included in the free travel project. Selection criteria include active participation, excellent performance in the course, etc.
Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) three small projects (papers and audio/video essays); 3) a take-home midterm; and 4) Poster presentation based on students’ final projects.

Prerequisites: None; open to all. No knowledge of Asian languages required, though students with advanced Asian language proficiency are encouraged to work with primary sources if they wish.

Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Theatre majors; Comp Lit majors; Concentrators in Asian Studies or Asian American Studies.

AAS 284 (F)(S) Asian American History (DPE)

Cross-listings: AMST 284 / HIST 284

Secondary Cross-listing

This course offers an overview of Asian American history from the late seventeenth century to the present. It will cover the earliest Asian migration and settlement in the U.S., the rise of anti-Asian movements, the experiences of Asian Americans during World War II and the Cold War, the emergence of the Asian American movement in the 1960s, the post-1965 Asian immigration, and the War on Terror. We will investigate broader themes including labor, citizenship, political resistance, gender and sexuality, community formation, empire, and transnationalism. We will also consider key contemporary issues, including race and ethnic relations, anti-Asian harassment and violence, and the legacy of U.S. colonialism in Asia-Pacific. Along the way, we will engage classic and recent scholarship in the field, and form our own interpretations of the past based on a wide range of sources—including films, novels, newspapers, government documents, political cartoons, and more. Throughout, the course advances the argument that citizenship and belonging in the U.S. cannot be fully understood without accounting for the experiences of Asian Americans.

Requirements/Evaluation: Attendance and participation in discussion, weekly reading responses (2 pages), midterm exam, and final in-class exam and take-home essay (7-10 pages)

Prerequisites: None

Enrollment Limit: 30

Enrollment Preferences: Preference given to History majors and Asian American Studies concentrators.

Expected Class Size: 25-30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 284(D2) AAS 284(D2) HIST 284(D2)

Difference, Power, and Equity Notes: This course introduces students to the incredible diversity of Asian Americans. It guides students through an examination of the historical events, policies and dynamics that have marginalized Asian American communities based on race, ethnicity, class, gender, sexuality, citizenship, and other forms of difference. It also explores the diverse ways that Asian Americans have sought inclusion and belonging in the U.S.

AAS 304 (F) Queer in Asian America (DPE) (WS)

Cross-listings: WGSS 306 / AMST 304

Secondary Cross-listing

Asian America has always been queer. This is both to say that, since the first waves of Asian immigrants to the Americas, there have always been queer individuals counted among them, and that the Asian American subject has historically figured as "queer" and "different" within the Western cultural, social, and economic landscape. How does queerness resonate, redound, or otherwise modulate the idea and experience of Asian Americanness? What are the textures and contours of this queerness? Does it have an aesthetic and literary dimension? This course surveys a range of scholarship and literature by queer and feminist Asian Americans that explore the interpenetrations of race, gender, and sexuality in the construction of Asian America and Asian American identity. Particular focus is paid to how Asian American artists and writers actualize queer subjectivity, relation, and intimacy across experiments in narrative, form, and media. The class will move between foundational scholarship at the intersections of Asian American studies, queer studies, and gender and sexuality studies alongside key works of art and literature. Potential artists and writers include Ocean Vuong, Justin Chin, Larissa Lai, Monique Truong, Alok Vaid-Menon, TT Takemoto, Jes Fan, and Leonard Suryajaya. Students will also have the opportunity to contribute their own selection of art and literature to the class conversation.

Requirements/Evaluation: In-class participation, two critical response papers, discussion posts, creative or scholarly written final assignment

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: AMST and WGSS majors, AAS concentrators, or students interested in majoring/concentrating in these areas.

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AAS 304(D2) WGSS 306(D2) AMST 304(D2)

Writing Skills Notes: Students will write two, 3-4 page critical response papers: one will focus on analyzing, critiquing, and synthesizing scholarly texts to advance an original argument on course topics and another will focus on analyzing a literary or artistic work of the student's choosing. The final consists of a longer paper of scholarly or creative writing that engages course topics. Assignments will emphasize close reading skills and will be receive written feedback from the instructor.

Difference, Power, and Equity Notes: This course examines gender and sexuality in Asian American racial formation and identity through the work of queer Asian American art, scholarship, and literature. Students will thus focus on how queerness/queer identity is constructed, embodied, and differently experienced in Asian America in dialogue with histories of immigration, Orientalism, assimilation, and exclusion.

Attributes: AMST Critical and Cultural Theory Electives
Media reports of academic and musical prodigies skew a broader socioeconomic picture that includes crimmigration, deportation, and xenophobia. And the figure of an intergalactic refugee mother exposes the toll that crossing borders takes on individuals, families, and communities. In this project-based course, we survey the formation of a particular place and its surroundings. In doing so, students grapple with general questions such as: How does migration shape intergenerational dynamics? When and with what tools do people confront racism and intersecting forms of discrimination? How do ethnic enclaves form and fracture? And how do communities mobilize for political rights?

Requirements/Evaluation: thoughtful and consistent participation; mock film festival screening and vote; regular writing assignments; teach-ins

Prerequisites: N/A

Enrollment Limit: 15

Enrollment Preferences: ANSO majors and AAS concentrators. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Differences, Power, and Equity Notes: This course explores the making of the San Gabriel Valley as the "Asian American Holy Land." It delves into actors' diverse responses to the model minority stereotype, class, and belonging. Students will evaluate (pan)ethnicity as something to be explained, rather than explanatory, and consider the gaps between diversity and inclusion versus equity in the so-called majority-minority context of the 626.

AAS 313 (F) Gender, Race, and the Power of Personal Aesthetics

Cross-listings: WGSS 313 / AFR 326 / LATS 313 / AMST 313

Secondary Cross-listing

This media/cultural studies course focuses on the politics of personal style amongst women of color in the US and around the globe in the digital era. We undertake a comparative, transnational exploration of the ways in which categories of difference such as gender, disability, sexuality, class, and ethno-racial identity inform normative beauty standards and ideas about the body. The class pays particular attention to the ways in which neoliberal capitalism shapes contemporary understandings of gendered bodies and the self. We examine an array of materials from across the disciplines including commercial websites, music videos, photography, histories, film, television, personal narratives, ethnographies, and sociological case studies. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we engage the following questions, among others: What are some of the everyday functions of personal style among women of color in the US and globally? How do Latina/x, Black, Arab American, and Asian American personal aesthetics reflect the specific circumstances of their creation, and the unique histories of these racialized communities? What role do transnational media and popular culture play in the development and circulation of gendered, raced, and sexualized aesthetic forms? How might the belief in personal style as an activist strategy complicate traditional understandings of feminist political activity? And what do the combined insights of ethnic studies, feminist studies, cultural studies, media studies, queer studies and disability studies contribute to our comprehension of gendered Asian American, Arab American, Black, and Latina/x bodies?

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-6 pages, final written reflection.

Prerequisites: LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
AAS 316  (F)  Music in Asian American History  (DPE) (WS)

Cross-listings:  MUS 316

Secondary Cross-listing

Is "Asian American music" all music made by Asian Americans, music by Asian Americans specifically drawing on Asian heritage, or music engaging with Asian American issues? This course embraces all three definitions and the full diversity of Asian American musical experience. We will study the historical soundscapes of immigrant communities (Chinese opera in North America; Southeast Asian war refugees) and how specific traumatic political events shaped musical life (Japanese American internment camps). We will encounter works by major classical composers (Chou Wen-Chung; Chen Yi; Tan Dun; Bright Sheng) and will investigate the careers and reception of prominent classical musicians (Midori; Seiji Ozawa; Yo-Yo Ma). Afro-Asian fusions, inspired by civil rights protest movements, manifested in jazz (Jon Jang; Fred Ho; Anthony Brown; Hiroshima; Vijay Iyer) and hip hop (MC Jin; Awkwafina; Desi rappers). Asian Americans have been active in popular music at home and abroad (Don Ho; Yoko Ono; Wang Leehom; Mitski). Finally, we will investigate communal forms of Asian American music making that have crossed racialized and gendered boundaries (taiko drumming; Indonesian gamelan; belly dance; Suzuki method). This seminar is designed to develop research skills, as we pursue original fieldwork, archival research, and oral history interviews.

Requirements/Evaluation:  Active class participation; two short papers (5-6 pp.) and a research term paper (12-15 pp.).

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  Students with curricular experience in Asian American history or music studies.

Expected Class Size:  10

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
MUS 316(D1)  AAS 316(D1)

Writing Skills Notes:  Students will write three papers during the semester: two 5-6 page papers and a 12-15 page research paper, written in stages. Students will receive detailed comments on each paper and at each stage of the research paper process, allowing them to build upon those comments in subsequent writing assignments.

Difference, Power, and Equity Notes:  Political and cultural forces of exclusion not only determined Asian American musical participation in American music history but have shaped Asian American styles of music. We will study the history of Asian American political struggles as they have intersected with music and how Asian Americans have at certain points sought allegiance through music with other marginalized groups. We will explore as well popular media representations of Asian American musicians revealing race-based assumptions.

AAS 351  (F)  Racism in Public Health  (DPE)

Cross-listings:  PHLH 351

Secondary Cross-listing

Across the nation, states, counties and communities have declared racism a public health crisis. This push to identify systemic racism as a high priority in public health action and policy is an important symbolic and political move. It names the faults of histories, systems and institutions but also brings to the spotlight the individual and community responsibility to dismantle racism in the US. In this tutorial, we will examine racism in public health policy, practice and research through an investigation of several mediums of evidence and information, ranging from peer reviewed literature to news editorials, podcasts and documentaries. We will explore specific pathways by which legacies of colonialism and racism function in various public health
disciplines such as epidemiology, social & behavioral sciences, health policy and environmental health while also examining the dynamics of power and history in research and community practice. We will take deep dives into issues on how health can be impacted by redlining, racist medical algorithms, racial trauma and stress and police violence, to name a few. Students will also have two opportunities to select their own case studies, as a way for you to research and learn about particular racial health issues that are of personal interest. This course is also about self-reflection and exploration of the ways in which our identities and lived experiences impact our understanding and perspective. We will gain skills in speaking across differences and articulation of how our own perceptions and lived experiences of race and racism impact our study of public health. This tutorial requires an openness to self-reflection and the practice of listening and articulation.

Requirements/Evaluation: bi-weekly tutorial papers, weekly journaling, oral commentaries and tutorial discussion

Prerequisites: PHLH 201 or instructor approval.

Enrollment Limit: 10

Enrollment Preferences: 1-Public Health concentrators. 2-Asian American Studies concentrators.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AAS 351(D2) PHLH 351(D2)

Difference, Power, and Equity Notes: In this course students will examine and critically examine the inequities and race based social and health injustices, and the ways racism infiltrates public health action and policy, both historically and currently. They will also refine their self reflection skills in understanding how their own positions of privilege and power, or lack thereof, inform their understanding of public health.

AAS 364  (S)  Asia and Asian Americans During the Cold War  (DPE)

Cross-listings: HIST 364 / AMST 384

Secondary Cross-listing

This course traces how American geopolitical interests and involvement in Asia during the Cold War affected Asian Americans. It examines the history of the Cold War as a period of U.S. imperial expansion as well as a time when various actors and organizations, especially those of Asian descent, harnessed the East-West rivalry to advance their own agendas. We will consider how diverse diplomatic strategies including militarization, educational exchange, and immigration reform shaped East, South, and Southeast Asian migrations to and settlement in the United States and the social and material lives of these diverse communities. Case studies include transnational adoptees from Korea, Hmong and Vietnamese refugees in the U.S. and across Guam and Israel-Palestine, Black, Latinx, and Asian American activists who traveled to Vietnam, educated Indian and Pakistani immigrants, and American-born individuals of Japanese ancestry in Japan. We will also explore how individuals of Asian descent leveraged Cold War geopolitics and forged cross-ethnic, cross-class alliances to advocate for social change both at home and abroad.

Requirements/Evaluation: Attendance and active participation in discussion, three response papers (3-4 pages), and final research paper (12-15 pages), as well as topic proposal, annotated bibliography, outline, and draft of the final paper

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: History majors and Asian American studies concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)  (DPE)

AAS 373  (F)  US Empire in the Philippines: Capitalism, Colonialism, and Revolution  (DPE)

Cross-listings: AMST 373

Secondary Cross-listing

When the United States of America took official colonial control of the Philippines in 1898, Filipinos had already been fighting an anti-colonial struggle against Spain for several years. With the start of the Philippine-American War in 1899, that fight continued. Keeping the always-present possibilities of Filipino revolt in mind, this course takes an interdisciplinary approach to the study of U.S. empire-building in the Philippines from the late-nineteenth to the mid-twentieth centuries. We will frame our understanding in terms of racial capitalism and the coloniality of power, with particular attention to the materiality of empire -- infrastructure, architecture, financing, markets, and population management -- and U.S. empire's production of racial, gender, indigenous, religious, and sexual categories and difference. Our readings may be drawn from critical ethnic studies, gender & sexuality studies, American studies, postcolonial theory, Black studies, disability studies, and more. Topics include the military "management" of Muslim, Christian, and animist groups, the Katipunan society, interracial intimacies, and early 20th century Filipino migration to the United States. Students are expected to take an active role in discussion, but no prior knowledge of the Philippines is expected.

Requirements/Evaluation: Evaluation will be based on a semi-self-paced portfolio model: by two different points in the semester, students will be responsible for handing in a collection of 1-2 page response papers, discussion posts, discussion questions, and/or a paper analyzing a primary source or theoretical argument. The minimum requirement is a word count e.g. 3,000 words by 10/15, another 3,000 by 11/15. For the final, students will collect their work, revise at least 30% of it according to professor and peer feedback, and write a final reflection paper. In pairs, students will also lead discussion during one or more class sessions.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: First priority will go to AAS concentrators and AMST prospective and declared majors

Expected Class Size: 10-15

Grading:  no pass/fail option,  yes fifth course option

Distributions: (D2) (DPE)  This course is cross-listed and the prefixes carry the following divisional credit:

AMST 373(D2) AAS 373(D2)

Difference, Power, and Equity Notes: This course examines the creation and maintenance of racial, indigenous, religious, gender, sexual, and abilist categories in the context of world-historic systems of power, namely capitalism and colonialism. It tracks the unequal relations of power between American colonizers and Filipino colonized subjects, while keeping live the inherent power of Filipino people for revolt.

AAS 375  (S)  Asian American Sexualities  (DPE)

Cross-listings: AMST 375 / WGSS 375

Secondary Cross-listing

Perceived as objects of sexual use and perversity, how might Asian/Asian American subjects contend with these projections and enact their own genders and sexualities? Anchored in this question, this theory-intensive seminar will provide a study of seminal and recent scholarship at the intersections of Asian American Studies, feminist criticism, and queer theory that focus on or are read in tandem with a collection of cultural expressions, including film, sculpture, poetry, drag performance, music, manifestos, and visual and performance art. To first root us, the seminar will introduce key uses and theorizations of sex/gender, sexuality, and queerness. Then, across the semester, we will focus on deployments of them through a range of topics, including sexual subjugation and activism of "comfort women," orientalism/ornamentalism, the queering of Sikh, South
Asian, and Muslim Americans post-9/11, western demands to "come out," representations in pornography, lesbian invisibility, devaluation of trans* lives, etc., exploring questions of racialized, gendered, and sexual subordination alongside power, pleasure, play, and critique. To this end, we will approach gender and sexuality not as identity categories that one is or has but socially and biologically construed categories, loci for intervention and play, anti-normative positions, lived experiences, and ever-evolving processes of doing, becoming, and unbecoming.

**Requirements/Evaluation:** in-class discussion, weekly posts, short presentation, one paper, and one longer paper or creative assignment that will be peer reviewed and revised

**Prerequisites:** AMST 125 or WGSS 101/202

**Enrollment Limit:** 15

**AAS 384 (F)(S) Comparative History of Science and Medicine in Asian/Pacific America, 1800-Present** (DPE)

**Cross-listings:** HIST 384 / AMST 383

**Secondary Cross-listing**

How have scientific knowledge and medicine been tools of exclusion, violence, and imperial control against Asian Americans, as well as indigenous peoples, Black, Latinx, and white migrants, and their descendants? How have these groups negotiated and resisted encounters with such knowledge from the 19th century to the present? This seminar explores these questions by examining a series of case studies—including American colonial medicine and science in the Philippines and Hawai‘i, Cold War migration of Chinese scientists and South Asian doctors to the U.S., and the politics of HIV/AIDS, psychiatry, and culturally competent care in Black, Asian, and Cuban migrant communities. Together, we will survey the literature in history, English, Global Health, Sociology, and other fields and consider how the Asian/Pacific American experience in science and medicine has been integral to, as well as informed by, the experiences of other groups in the transpacific world. Students will leave this course with interdisciplinary tools for understanding present-day health inequities in underserved Asian/Pacific American communities and other marginalized groups.

**Requirements/Evaluation:** Attendance and active participation in discussion, three response papers (3-4 pages), and final research paper (12-15 pages), as well as topic proposal, annotated bibliography, outline, and draft of the final paper

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Preference to History majors, Asian American Studies concentrators, and Public Health concentrators

AAS 402 (F) Marxist Feminisms: Race, Performance, Labor (DPE) (WS)

Cross-listings: WGSS 402 / AMST 402

Secondary Cross-listing

This seminar provides an overview of queer, black and women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, including *Capital Volume I*, we will examine a range of social positions and modes of extraction that complicate Marx's emphasis on the white male industrial factory worker. Every week, we will focus on texts that foreground conditions of reproduction, racial slavery, care and domestic work, indentured servitude, immigrant labor, land expropriation, and sex work among others. Throughout the seminar and specifically at the close of it, we will turn to critical perspectives and aesthetic practices that not only respond to these conditions but also incite new social relations and ways of being in the world. As such, this seminar will equip students with critical understandings of how racial capitalism has fundamentally relied on the mass elimination, capture, recruitment, and displacement of different racialized, gendered, and abled bodies in and beyond the U.S. as well as how the capitalist system of value and life under these conditions can and must be undone and reimagined.

Requirements/Evaluation: in-class participation, presentation, weekly posts, paper, and final project (paper, community resource distribution proposal, and creative project options)

Prerequisites: AMST 101, AMST/AAS 125, or similar courses

Enrollment Limit: 12

Enrollment Preferences: AMST and WGSS juniors and seniors, AAS concentrators

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Cross-listings: WGSS 414 / AMST 414

Secondary Cross-listing

How does one "do" race? This seminar offers a survey of foundational and emergent scholarship at the nexus of performance studies, critical ethnic studies, and gender and sexuality studies alongside contemporary visual and performance art works. It will explore how the framework of performance destabilizes notions of race, gender, and sexuality as identities that are inherent to us and approaches them as ones we enact, do, and undo. We will begin the course by tracing key concepts in performance studies (i.e., performance, performative, performativity) before examining a range of...
performances that respond to and negotiate life under the ongoing conditions of racial capitalism, empire, anti-blackness, and settler colonialism. To this end, we will focus on how qualities attributed to racialized and gendered bodies, such as silence, diseased, patience, depression, passivity, and aloofness, are retooled as feminist and queer of color actions or positions.

**Requirements/Evaluation:** in-class discussion, weekly posts, class presentation, short written assignments, and final project (with creative option)

**Prerequisites:** AMST 101 or WGSS 101/202 and upper level courses in AMST, WGSS, or related fields

**Enrollment Limit:** 12

**Enrollment Preferences:** AMST seniors and juniors; WGSS seniors and juniors; AAS concentrators

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

---

**AAS 415 (S) Racial Melancholia, Queer Melancholia** (DPE) (WS)

**Cross-listings:** WGSS 418 / AMST 415

**Secondary Cross-listing**

The psychoanalytic theory of melancholia--the ways in which one refuses to fully let go of that which one has lost--is a foundational concept to the fields of ethnic studies, queer theory, and cultural studies. In the wake of losses due variously to histories of forced migration and slavery, the AIDS epidemic, war, and social exclusion, various scholars and critics have posited melancholia as a structuring condition of contemporary life as subjects differently navigate loss, displacement, and exclusion. Theories of racial and queer melancholia have emerged as supple frameworks through which to consider how queer and racialized subjects hold onto non-normative ways of being, relation, and sociality against the normalizing tides of erasure. We will chart out a connection between how we relate to and apprehend the past as it then pertains to how we relate to and apprehend others. Beginning with a dive into Freudian psychoanalysis, this seminar will explore concepts of loss and melancholia and their uptake into critical theory, critical race theory, and queer theory/queer of color critique. Alongside our scholarly inquiries, we will engage with a range of art, literature, performance, and film that explore topics of memory, trauma, migration, the queer past and the queer future, subjectivity, relationality, and gender and sexuality.

**Requirements/Evaluation:** In-class participation, discussion posts, short analysis papers, and a final paper that engages original research and/or creative work.

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** AMST, WGSS majors, AAS concentrators or students interested in majoring/concentrating in these areas.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 418(D2) AMST 415(D2) AAS 415(D2)

**Writing Skills Notes:** Students will produce a number of written assignments that assess their analysis, critique, and interpretation of critical texts and artistic works. This includes regular discussion posts, paper presentations, and a final essay that will receive peer and instructor feedback.

**Difference, Power, and Equity Notes:** This course engages with a major topic of concern--the theory of melancholia--across a number of fields including ethnic studies, women's, gender, and sexuality studies, and critical theory. In particular, attention is paid to the function of loss, dispossession, and displacement as it affects individuals and communities who are differently marginalized by colonialism, racial capitalism, and
heteronormativity.

Winter Study ----------------------------------------------------------------------------------------------------------

AAS 10  Reading + Drawing Asian American Graphic Narratives
While some of the first visual depictions of Asian immigrants in the United States were often racist caricatures, Asian Americans have been recording
their own experiences in comics as early as the 1930s. Early examples include Henry Yoshitaka Kiyama's The Four Immigrants Manga and Miné
Okubo's Citizen 13660, both depicting the experiences of early Japanese immigrants and Japanese Americans in California. More recently, Asian
American graphic novelists and memoirists have published diverse works that use the combinations of words and images to explore race, gender,
sexuality, class, and immigration. In this course, students will read both historical and contemporary examples of Asian American graphic narratives (fiction and non-fiction) as well write and draw their own. Students do not have to have experience in comics, just an openness to experiment and sometimes draw "badly." Class sessions will include conversations about assigned readings, time to draw and write together, and opportunities to share and discuss one another's work.

**Requirements/Evaluation:** Presentation(s); Creative project(s)

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Students concentrating or planning to concentrate/major in Asian American Studies or American Studies, Art Studio, or English.

**Expected Class Size:** NA

**Grading:**

**Unit Notes:** Laura Chow Reeve is the author of the short story collection, A SMALL APOCALYPSE. Her writing and graphic work has been published in The Offing, Literary Hub, Catapult, The Rumpus, and elsewhere. She is working on a graphic memoir and novel.

**Materials/Lab Fee:** $170

**Attributes:** SLFX Winter Study Self-Expression  STUX Winter Study Student Exploration

---

**AAS 11  Visual Literature: An Exploration of Image and Text**

In this series we'll look at ways writers incorporate image and text, and play with generative prompts to inspire writing and visual art creation alike. We'll study graphic literature and creative works, primarily by AAPI writers, that approach the blending of image and text through different lenses—from the graphic poems of Naoko Fujimoto to the graphic memoirs of Mira Jacob, from the mixed media collages of Victoria Chang to the multimedia approach of Don Mee Choi's DMZ Colony. Assignments will include weekly readings, analysis, and discussion, daily free writes/drawings, and guided in-class prompt-based exercises. We will engage with experimental prompts including writing with our non-dominant hand, creating collages, and drawing personal archives to insert into prose. Students will regularly share works-in-progress, and the Winter Study will culminate in an end-of-course showcase and celebration. Students will walk away with a strong introductory understanding blending creative writing with visual work, new access points for an ever-evolving writing practice, and a framework from which to build future projects.

**Requirements/Evaluation:** Paper(s) or report(s); Performance(s); Creative project(s)

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Students concentrating or planning to concentrate/major in Asian American Studies, Asian Language Literatures and Cultures, American Studies, Art Studio, or English

**Expected Class Size:** NA

**Grading:**

**Unit Notes:** Emilly Prado is a writer and community organizer based in Portland, OR. Her essay collection, Funeral for Flaca, earned a 2022 Pacific Northwest Book Award, amongst other prizes. She teaches creative writing at Pacific Northwest College of Art.

**Materials/Lab Fee:** $85

**Attributes:** EXPE Experiential Education Courses  SLFX Winter Study Self-Expression

Department of Asian Languages, Literatures, & Cultures
Chinese, Japanese, East Asian Languages & Cultures

(Div I & II, see explanation below)

Chair: Professor Man He

Cecilia Chang, Frederick Latimer Wells Professor of Chinese; Masashi Harada, Assistant Professor of Japanese; Man He, Associate Professor of Chinese; Shinko Kagaya, Professor of Japanese; Cornelius C. Kubler, Stanfield Professor of Asian Studies; Christopher M. B. Nugent, John W. Chandler Professor of Chinese; Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese; Li Yu, Herbert H. Lehman Professor of Chinese

Visitors: Yumemi Hanaki, Visiting Lecturer in Japanese; Xiaoming Hou, Visiting Assistant Professor of Chinese; Ju-Yin Wang, Visiting Lecturer in Chinese; Language Fellows: Xuechan Dai, Yen-Yu Lin; Teaching Associate: Mei Ki (Lina) Law

Department Mission Statement and Curricular Goal

The mission of the department is to produce “global citizens” with multilingual abilities, intercultural communicative competence, and multicultural leadership skills, who will be able to make contributions in different sectors of society in a globalized and diverse world. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.
THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

LANGUAGE PLACEMENT

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their language study at the college should complete a placement evaluation before pre-registering for a language course. More information about the Chinese placement evaluation can be found at https://chinese.williams.edu/faq/. Students who wish to take the Japanese placement test should contact the Japanese faculty.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in
working for their thesis by the end of the fall semester of their junior year.

Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student’s grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one-to-one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Fellowships for Summer Study in Asia which fund selected students’ summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar’s office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

“DALLC Majors and Faculty” (open to all current and prospective Chinese, Japanese, or East Asian Languages and Cultures majors):

CHIN 101 (F) Basic Chinese

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China, the de facto official language of Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing at about the 200-character level. The relationship between language and
culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively. CHIN 101 and CHIN 102 constitute an integral, indivisible year-long course. Students who register for a year-long course are required to complete both semesters of that course within the same academic year. Students who fail to take and pass the second half of a year-long course will incur a course deficiency.

**Class Format:** (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral and silent reading, questions and discussion in Chinese, translation and explanation in English as needed.

**Requirements/Evaluation:** classroom performance, homework, quizzes, unit tests, and an oral and written final exam

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** If the course is overenrolled, priority will be given to first-year students, sophomores, and majors in the Department of Asian Languages, Literatures & Cultures.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** Course credit is granted only if both semesters (CHIN 101 and CHIN 102) as well as the Winter Study Sustaining Program, which is taken in addition to a regular Winter Study course, are taken and passed.

**Distributions:** (D1)

### CHIN 102  (S) Basic Chinese

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China, China and Taiwan, and one of the de facto official languages of Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing at about the 500-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively. Traditional characters will be introduced. CHIN 101 and CHIN 102 constitute an integral, indivisible year-long course. Students who register for a year-long course are required to complete both semesters of that course within the same academic year. Students who fail to take and pass the second half of a year-long course will incur a course deficiency.

**Class Format:** (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral and silent reading, questions and discussion in Chinese, translation and explanation in English as needed.

**Requirements/Evaluation:** attendance and participation, daily quizzes in the form of dialog or reading performance, homework, regular unit tests, and oral and written exams.

**Prerequisites:** CHIN 101 and WSP Sustaining Program or equivalent. Students who have never taken a Chinese language course at Williams should complete the Chinese Placement Evaluation in GLOW before registering for this course.

**Enrollment Limit:** 12

**Enrollment Preferences:** If the course is overenrolled, first priority will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; and second priority will be given to first-year students and sophomores.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** Course credit is granted only if both semesters (101 and 102) as well as the Winter Study Sustaining Program, which is taken in addition to a regular Winter Study course, are taken and passed.

**LEC Section: 02** M-F 10:00 am - 10:50 am  Ju-Yin Wang
CHIN 131  (S) Basic Cantonese

Cross-listings: ASIA 130

Primary Cross-listing

An introduction to Standard Cantonese, a major regional language of southern China which is spoken by over 70 million people in Hong Kong, Macao, Guangdong, and Guangxi as well as by many overseas Chinese in Southeast Asia, Hawaii, and North America. Due to the pervasive influence of Hong Kong as well as the economic transformation of Guangdong Province, the prestige of Cantonese within greater China rose steadily in the period 1980-2010 and it continues to be an important language today. Our focus in this course will be on developing basic listening and speaking skills, though some attention will also be paid to written Cantonese, including the special characters which have been used for centuries to write colloquial Cantonese, which have become even more widely used in Hong Kong since 1997. Since students will ordinarily possess prior proficiency in Mandarin, a rather closely related language, they should be able to attain in one semester approximately the same proficiency level that is attained in the first two semesters of Mandarin.

Class Format: dialog performance, drills, communicative exercises, oral reading, questions, and discussion

Requirements/Evaluation: Evaluation is based on classroom performance, quizzes, unit tests, and an oral and written final exam.

Prerequisites: CHIN 202 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Chinese and East Asian Languages & Cultures majors as well as Asian Studies concentrators

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 130(D1) CHIN 131(D1)

Not offered current academic year

CHIN 152  (S) Basic Taiwanese/Southern Min

Cross-listings: ASIA 152

Primary Cross-listing

This course constitutes an introduction to Taiwanese, the majority language of Taiwan, which is essentially the same as the native language of Xiamen, China and environs. Different varieties of this language, which is also known as Amoy, Hokkien, Fukienes, and Southern Min are spoken by about 50 million people in Taiwan, southern Fujian, the Philippines, Indonesia, Malaysia, and Singapore. Suppressed in Taiwan by the Japanese from 1895-1945 and by the KMT Chinese government from 1945 through the 1970s, Taiwanese--in both its spoken and written forms--has been experiencing a fascinating revival in recent decades. The most divergent of all the Sinitic languages, this language is of special linguistic interest because it has preserved a number of features of Old Chinese. Our focus will be on developing basic listening and speaking skills, though we will also study some of the special characters used to write Taiwanese. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Since students in the course will ordinarily possess prior proficiency in Mandarin, a related language, we should be able to cover in one semester about as much as is covered in the first two semesters of Mandarin. Classes will include dialog performance, drills, communicative exercises, and oral reading and discussion of written Taiwanese.

Requirements/Evaluation: classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: CHIN 301 or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: if course is over-enrolled, preference given to majors in CHIN, EALC, JAPN and concentrators in Asian Studies

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 152(D1) CHIN 152(D1)

Not offered current academic year
CHIN 162 (S) Languages of East Asia

Cross-listings: ANTH 162 / ASIA 162 / GBST 162

Primary Cross-listing

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we’ll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we’ll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren’t they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? How are they used in Asian American speech communities? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice

Requirements/Evaluation: three quizzes, two 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

Prerequisites: none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)

Enrollment Limit: 20

Enrollment Preferences: open to all with preference to first-year students and sophomores as well as majors/concentrators in CHIN, JAPN, EALC, ANTH, ASIA and GBST

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: Linguistics

Not offered current academic year

CHIN 200 (F) Accelerated Chinese on Special Topics for Heritage Speakers

Cross-listings: ASIA 201

Primary Cross-listing

This course is tailor designed for students who already possess intermediate-level proficiency in speaking Chinese but lack the basic reading and writing skills, commonly referred to as heritage speakers of Chinese. They will make accelerated progress in their literacy skills through this course and be able to take either CHIN 202 or CHIN 302 in the spring semester. Adopting a semi-tutorial format (a mix of group classes and two/three-people classes) , this course aims to provide differentiated instruction to heritage learners of varying proficiency levels whose Chinese speaking and listening abilities exceed their reading and writing skills. This tailored course will help students effectively expand their literacy skills while helping to solidify the linguistic foundation for continuous proficiency advancement. The main theme of the course is focused on the experiences of Chinese Americans in a global context. Students will gain a deeper understanding of Chinese culture by way of individual projects that are meaningful and relevant to their intellectual interests. Students who are placed into CHIN 102 or 202 at the beginning of the fall semester should consider taking this course in the fall.

Class Format: Semi-tutorial format, students will meet as a large group in most weeks for linguistic development and two-to-three-people groups in some weeks for project-based discussions.

Requirements/Evaluation: Active participation in class, homework, quizzes, essays, oral presentations, and a final project

Prerequisites: Students must complete the Chinese Placement Evaluation in GLOW before registering for this course

Enrollment Limit: 12
Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, concentrators in the Program of Asian Studies, and then to first-year students and sophomores.

Expected Class Size: 12

Grading:  no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 201(D1) CHIN 200(D1)

Fall 2024
LEC Section: 01 MR 2:35 pm - 3:50 pm Cecilia Chang

CHIN 201  (F) Intermediate Chinese I

Intermediate Chinese I and II are designed to consolidate the foundations built in Basic Chinese and continue developing students' skills in aural comprehension, speaking, reading, writing, and intercultural communication. Upon completion of the courses, students should be able to speak Chinese with fluency on everyday topics, reach a literacy level of 1000 characters (approximately 1200 common words written in both traditional and simplified characters), read materials written in simple standard written Chinese, and produce both orally and in writing short compositions on everyday topics. Traditional characters will be introduced. Conducted in Mandarin.

Class Format: Students will do dialog performance and communicative exercises in the speaking/listening classes. We will do read-aloud, questions and answers in the reading/writing classes.

Requirements/Evaluation: attendance and active participation, daily quizzes in the form of speaking or reading performances, homework, regular unit tests, and a final exam (including both oral and written portions)

Prerequisites: CHIN 102 or permission of instructor. Students who have never taken a Chinese language course at Williams should complete the Chinese Placement Evaluation in GLOW before registering for this course.

Enrollment Limit: 12

Enrollment Preferences: Priorities will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, first-year students and sophomores, then to juniors and seniors.

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Fall 2024

CHIN 202  (S) Intermediate Chinese II

Intermediate Chinese I & II are designed to consolidate the foundations built in Basic Chinese and continue developing students' skills in aural comprehension, speaking, reading, writing, and intercultural communication. Upon completion of the courses, students should be able to speak Chinese with fluency on everyday topics, reach a literacy level of 1000 characters (approximately 1200 common words written in both traditional and simplified characters), read materials written in simple standard written Chinese, and produce both orally and in writing short compositions on everyday topics. Students will continue to improve reading proficiency in both simplified and traditional characters. Conducted in Mandarin.

Requirements/Evaluation: attendance and active participation, daily homework and quizzes, regular written and oral unit tests, essays, and a final exam.

Prerequisites: CHIN 201 or permission of instructor. Students who have never taken a Chinese language course at Williams should complete the Chinese Placement Evaluation in GLOW before registering for this course.

Enrollment Limit: 12

Enrollment Preferences: Priorities will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, first-year students and sophomores, then to juniors and seniors.
CHIN 215 (S) Foundations of Confucian Thought (DPE) (WS)

Cross-listings: REL 295 / ASIA 215

Primary Cross-listing

How should people treat each other? What constitutes human nature and does it tend towards good or evil? How should we organize society, by focusing on laws and regulations, or on ritual and moral guidance? What is the nature of moral rulership? What is the proper relationship between the individual and larger units of society, from the family to the state? These are some of the key questions that the school of thought that has come to be known as “Confucianism” addresses. As the dominant moral and political philosophy for thousands of years in much of East Asia, Confucianism has shaped our world, past and present, in innumerable ways. In this class we will focus on the foundational texts of the Confucian tradition: the Analects (purported to record the words of Confucius himself), Mengzi (often romanized as “Mencius”), and Xunzi. Beyond those questions noted above, we will further examine how these texts construct their arguments; how they were first composed, compiled, and circulated; how they employ such key concepts as “humaneness” (ren), “moral power” (de), and “ritual propriety” (li); and how they functioned as part of the larger philosophical, linguistic, political, and historical context that we now think of as “early China.”

Requirements/Evaluation: Evaluation is based on writing assignments (3-4 pages, 5-6 pages, and 10-12 pages) and participation in class discussions.

Prerequisites: None.

Enrollment Limit: 19

Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; current or prospective Asian Studies concentrators; and Religion majors.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 215(D1) REL 295(D2) ASIA 215(D1)

Writing Skills Notes: Writing will include short writing assignments (1 paragraph, 3-4 pages, and 5-6 pages) that will involve drafts, feedback and revision, and one longer final paper of 10-12 pages that will involve close consultation with the instructor during the writing process.

Difference, Power, and Equity Notes: Throughout the course we will examine how these texts deal with issues of differentials of power, both political and social, in a range of contexts. In particular, we will discuss how these texts conceptualize political and social power and how they see hierarchy and difference functioning in both beneficial and deleterious ways in society.

Not offered current academic year

CHIN 217 (S) The Literature of Early China (WS)

Cross-listings: ASIA 209 / COMP 211

Primary Cross-listing

From poems on forbidden trysts and tales of bloody battles to aphorisms about filial piety and essays on moral governance, the literature of early China spans a wide range of topics and genres. In this course we will read, discuss, and write about literary works from the period stretching from approximately 600 BCE to the end of the Han empire in the third century CE, including poems, narratives, and philosophical works. All readings will be in English.

Requirements/Evaluation: Evaluation is based on writing assignments (1 paragraph, 3-4 pages, 5-6 pages, and 8-10 pages) and participation in class discussions.
Prerequisites: None
Enrollment Limit: 19
Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; current or prospective majors in Comparative Literature; and current or prospective concentrators in Asian Studies.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Counts as a core elective for majors in Asian Languages, Literatures, and Cultures.
Distributions: (D1) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
CHIN 217(D1) ASIA 209(D1) COMP 211(D1)
Writing Skills Notes: Students will write a series of progressively longer papers, each involving drafting, commenting, and revising.

CHIN 226 (F) Chinese Film and Its Significant Others (DPE)

Cross-listings: ASIA 226 / COMP 296

Primary Cross-listing

From the first "wows" that the short films invoked at a Shanghai teahouse in 1896, Chinese films have made successive wonders that straddle reality and fantasy, technological modernity and shadow-making craft, aesthetic experiments and monetary yearnings, global investments and local interest. This seminar will explore the evolving relationships between Chinese films and five "significant others" that are central to film and filmmaking. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) Pre-class discussion posts based on reading (Graded as Complete or Incomplete); 3) Three short papers (3 pages); and 4) the final group project (including a presentation, and a paper or other form of project. Students will be graded both individually and as a group).
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: current or prospective majors in Department of Asian Languages, Literatures, and Cultures; Comp Lit majors; those with Asian Studies Concentration.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
CHIN 226(D1) ASIA 226(D1) COMP 296(D1)

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the clashes and negotiations between Western media technological modernities and Chinese indigenous understanding of shadows, visuality, and sound. By discussing various films produced from mainland China, Hong Kong, Taiwan, and other diaspora areas from 1920 to now, this course asks students to explore how cinema invokes (and erases) differences, and consolidates (and challenges) hegemonic notions of nation, gender, and class.

CHIN 275 (S) Acting Out: Performativity, Production, and Politics in East Asian Theatres  (DPE)

Cross-listings: THEA 271 / COMP 271 / ASIA 275 / AAS 275

Primary Cross-listing

"Asian Theaters," for those in the West, can conjure up a variety of exotic impressions: spectacle and cacophony, mysterious masks and acrobatic bodies, exotic styles and strangely confusing conventions. Although Asian theaters have been studied systematically in the West for at least a century, the West has never truly left its "othering" look at them. Yet, what is "different" for the West is bedrock for Asian cultures. Theatre, one of the most important and dynamic forms of cultural production and communication, has actively involved all strata of Asian societies for a millennium. How to explain theatre's continued presence and relevance for Asian nations? What do the traditions of Kun, Kabuki, and P'an-sori reveal about the cultures and communities in which they were created? This course seeks to understand from the Asian perspective, rather than "exoticize" and "other," musical and dance theatres from China, Japan, and Korea. Examining the evolving presentations of signature dramas dating from the sixteenth to the eighteenth centuries, we will act out Asian theatres in the following ways: (1) by reading the original plays in translation in tandem with their contemporary and intercultural reproductions, we will explore how Asian theatres fare in the era of globalization within and beyond national borders; (2) by revealing the "technologies" of writing, reading, acting, and staging these plays in different cultural milieux, we will consider what kinds of language and rhetoric, forms of music and movement, as well as visual components are deployed to convey evolving messages; (3) by considering key performances held outside of the prosenium stage, we will gain exposure to alternative theatrical spaces in Asian and diasporic communities that reform performing conventions, reconfigure staging environments, and renegotiate cultural values. In this manner, we will together gain an appreciation for the aesthetic devices, thematic concerns, and production politics of East Asian theatres and their global reproductions. Class materials include drama, production videos, and invited zoom sessions with Asian theatre practitioners and directors who live in the U.S. and other diasporic communities. All materials are in English. No language prerequisite. Funded by the Global Initiatives Venture Fund, this course includes an all-expense-paid travel component, a cultural and academic exchange project titled "Redefining Amateurism: Experiential Learning with Student Theatre in Contemporary China," which will bring up to eight Williams students to Nanjing, China during the Spring Break (3/23-4/3/2025). Students will participate in workshops with playwrights and theater-makers in contemporary China and engage in black-box theater productions with students from Nanjing University and Shanghai Theatre Academy. This travel component is OPTIONAL for students taking this course. However, students enrolled in this class will receive priority consideration to be included in the free travel project. Selection criteria include active participation, excellent performance in the course, etc.

Class Format: Funded by the Global Initiatives Venture Fund, this course includes an all-expense-paid travel component, which will bring up to eight Williams students to Nanjing, China during the Spring Break (3/23-4/3/2025). This travel component is OPTIONAL for students taking this course. However, students enrolled in this class will receive priority consideration to be included in the free travel project. Selection criteria include active participation, excellent performance in the course, etc.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) three small projects (papers and audio/video essays); 3) a take-home midterm; and 4) Poster presentation based on students' final projects.

Prerequisites: None; open to all. No knowledge of Asian languages required, though students with advanced Asian language proficiency are encouraged to work with primary sources if they wish.

Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Theatre majors; Comp Lit majors; Concentrators in Asian Studies or Asian American Studies.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 275(D1) THEA 271(D1) COMP 271(D1) ASIA 275(D1) AAS 275(D2)

Difference, Power, and Equity Notes: This course examines the power dynamics of spectacle and cacophony and how theatre provided a cultural space that engaged all strata of East Asian societies, thereby masking class and ethnic divisions within these nation-states, while also presenting a distinct image of "China," "Japan," and "Korea" to be consumed in the West. Students will learn ways in which "traditional" theatre productions affirm or subvert Western biases against Asians.

Attributes: AAS Non-Core Electives GBST East Asian Studies

Spring 2025
CHIN 301 (F) Upper-Intermediate Chinese I

The goal of this course is to continue developing students' overall language proficiency. However, special emphasis will be on strengthening students' reading and writing proficiency in standard written Chinese, the grammar and vocabulary of which differ considerably from colloquial Chinese introduced during the first two years of instruction. Students will continue to improve reading proficiency in both simplified and traditional characters. Conducted in Mandarin.

Class Format: The class meets four days per week, twice in lecture (75 mins) and twice in conference (50 mins).

Requirements/Evaluation: Evaluation will be based on daily classroom performance, short essays, presentations, homework, quizzes, unit tests, and a final exam (oral and written).

Prerequisites: CHIN 202 or permission of instructor. Students who have never taken a Chinese language course at Williams should complete the Chinese Placement Evaluation in GLOW before registering for this course.

Enrollment Limit: 12

Enrollment Preferences: Current or perspective majors in the Department of Asian Languages, Literatures, and Cultures; Asian Studies Concentrators.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

CHIN 312 (F) Introduction to Classical Chinese

This course is an introduction to the grammar and basic vocabulary of Classical Chinese, the standard written language of China from around the seventh century BCE through the 1920s (and for many centuries an important written language in Japan, Korea, and Vietnam as well). Aspects of
Classical Chinese continue to play a role in both written (e.g., in newspaper, academic, and legal writing) and in spoken (e.g., proverbs and aphorisms) modern Chinese. Our work in this course will be based on reading, translating, and discussing philosophical, political, literary, and historical anecdotes from the Spring and Autumn (770-481 BCE) through the Han (206 BCE-220 CE) periods, as they served as the foundation for the language. We will conduct discussions of grammatical and philological issues primarily in English and most of our translation work will be from Classical Chinese into English. We will, however, frequently discuss the points of intersection between Classical and Modern Chinese. Students are required to have completed CHIN 202 or the equivalent. Students who have extensive reading knowledge of Chinese characters through other languages (such as Japanese) may also take this course with the instructor's permission.

Requirements/Evaluation: Classroom performance, homework, quizzes, tests, and a final exam
Prerequisites: CHIN 202 or extensive reading knowledge of Chinese characters through other languages
Enrollment Limit: 40
Enrollment Preferences: Students who have completed CHIN 202 or have extensive reading knowledge of Chinese characters through other languages
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

CHIN 421 (F) Chinese Societies through the lens of COVID-19

**Cross-listings:** GBST 386 / ASIA 421

**Primary Cross-listing**

The COVID-19 pandemic has profoundly changed the world. How did the Chinese-speaking regions in Asia, including Mainland China, Taiwan, and Singapore, respond to the pandemic during its earlier years? How did their responses reflect the political and economic systems as well as the cultural values of Asian societies? What were the effects of these responses on the regions and people's daily lives? In this course, students will gain a deeper understanding of Chinese-speaking societies through an analysis of the "public" and "private" literature pertaining to the lived experiences of the COVID-19 pandemic. Through readings and discussions of various materials such as government records, scientific publications, journalistic writings, personal diaries, and online narratives, students will explore a wide range of issues related to the politics, economy, public health, and sociocultural issues of Asian societies. Simultaneously, Chinese language learners will further enhance their language proficiency and intercultural competency by engaging in complex discourse in the target language. All readings and discussions are in Chinese.

**Requirements/Evaluation:** Evaluation will be based on CLASS performance, homework, two short papers (4-5 pages), and one longer paper (8-10 pages).

**Prerequisites:** CHIN 402 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Asian Studies, Global Studies and Public Health concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

CHIN 425 (S) Becoming Taiwan: Social, Cultural, and Economic Discourses of Modern Day Taiwan

**Cross-listings:** ASIA 425

**Primary Cross-listing**

Nestled in East Asia, Taiwan stands as a dynamic island home to a populace of 23 million. From 1949, when the Nationalist Party (KMT) retreated to Taiwan after the Chinese Civil War, to becoming one of the Four Asian Tigers in the latter half of the 20th century, Taiwan has developed into a multifaceted society through an array of social/cultural/economic changes associated with industrialization, globalization and identity formation.
Throughout this course, we will delve into pivotal moments that have shaped contemporary Taiwanese society, drawing insights from literary works, films, journalistic exposés, and academic discourse. Through group discussions and individual projects, students will not only acquire specialized vocabulary but also hone their ability to dissect and debate complex ideas in Mandarin pertaining to the aforementioned themes. Crafted in a semi-tutorial format, this course aims to cultivate linguistic proficiency ranging from Advanced Low to Advanced Mid as outlined by the ACTFL proficiency guidelines. To enrich the learning experience, language partnerships will be forged in collaboration with a graduate program in Chinese pedagogy based in Taiwan, offering further opportunities for in-depth engagement with course materials.

Class Format: Mandarin Chinese will be the instructional language for this course. Semi-tutorial format, students will meet as a large group on one day for linguistic development and three to four people groups on other days for discussions.

Requirements/Evaluation: quizzes, presentations, posting of discussion questions, two position papers (3 pages) and one final paper (5 pages)

Prerequisites: CHIN 402 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Majors in Chinese; DALLC; Asian Studies Concentration; seniors.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 427 (F) Spring Grass: A Peek into Inequality in China (DPE) (WS)

Cross-listings: WGSS 127 / ASIA 127

Primary Cross-listing

Spring Grass (Chuncao) is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (gaige kaifang) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues. Through close readings of the novel, the eponymous TV drama series, documentaries, and films depicting rural life and women's roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls' right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong's proclamation "women can hold up half of the sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (nannü bu pingdeng) and the urban/rural-gap (chengxiang chabie) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: For all students, active participation in tutorial meetings and an online writing portfolio as the final project. For CHIN students, four 4- or 5-page tutorial papers and revisions in Chinese, four 2-page critiques. For ASIA/WGSS students, five 5-page tutorial papers in English, five 2-page critiques, one revised paper.

Prerequisites: For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.

Enrollment Limit: 10
**Enrollment Preferences:** Enrollment priorities will be given to Chinese language learners who register under CHIN, and to freshmen and sophomores who register under ASST or WGSS.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 127(D2) CHIN 427(D1) ASIA 127(D1)

**Writing Skills Notes:** Writing is taught using the writing-as-process pedagogical approach. The writing process consists of invention, composition, and revision. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. The instructor gives detailed feedback to students' drafts and students are required to turn in revisions. At the end of the semester, students will compile an online writing portfolio to showcase their best works.

**Difference, Power, and Equity Notes:** The issue of "inequality," including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such inequality.

*Not offered current academic year*

**CHIN 428 (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films**

**Cross-listings:** ASIA 228 / COMP 297

**Primary Cross-listing**

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

**Requirements/Evaluation:** attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

**Prerequisites:** None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428

**Enrollment Limit:** 10

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; COMP majors; Asian Studies Concentration

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 228(D1) CHIN 428(D1) COMP 297(D1)

**Writing Skills Notes:** Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner's paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

**Difference, Power, and Equity Notes:** This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and pasts; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

Students registered for CHIN 101-102 are required to attend and pass the Chinese Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program. Check your class schedule to confirm enrollment.

Requirements/Evaluation: regular attendance and active participation

Prerequisites: Chinese 101

Grading: pass/fail option only

Materials/Lab Fee: one Xerox packet

Not offered current academic year

CHIN 99  (W)  Independent Study: Chinese
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
Department Mission Statement and Curricular Goal

The mission of the department is to produce “global citizens” with multilingual abilities, intercultural communicative competence, and multicultural leadership skills, who will be able to make contributions in different sectors of society in a globalized and diverse world. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

• Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.

• Read and analyze basic texts written in Classical Chinese.

• Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.

• Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.

• Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.

• Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

The Major

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

• Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.

• Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.

• Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.

• Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.

• Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.
THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.

- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.

- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.

- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.

- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

LANGUAGE PLACEMENT

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their language study at the college should complete a placement evaluation before pre-registering for a language course. More information about the Chinese placement evaluation can be found at https://chinese.williams.edu/faq/. Students who wish to take the Japanese placement test should contact the Japanese faculty.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in
Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student’s grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Fellowships for Summer Study in Asia which fund selected students’ summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar’s office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

“DALLC Majors and Faculty” (open to all current and prospective Chinese, Japanese, or East Asian Languages and Cultures majors): https://glow.williams.edu/enroll/AWTMXP

“Asia-Related Funding Opportunities” (open to all students who would like to seek internal or external funding related to Asia): https://glow.williams.edu/enroll/PGJHAC

“Special Interest Chinese” (open to all students interested in Chinese language and culture): https://glow.williams.edu/enroll/XEYMPG

“Special Interest Japanese” (open to all students interested in Japanese language and culture): https://glow.williams.edu/enroll/DAYTN3
Chair: Professor Man He

Cecilia Chang, Frederick Latimer Wells Professor of Chinese; Masashi Harada, Assistant Professor of Japanese; Man He, Associate Professor of Chinese; Shinko Kagaya, Professor of Japanese; Cornelius C. Kubler, Stanfield Professor of Asian Studies; Christopher M. B. Nugent, John W. Chandler Professor of Chinese; Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese; Li Yu, Herbert H. Lehman Professor of Chinese

Visitors: Yumemi Hanaki, Visiting Lecturer in Japanese; Xiaoming Hou, Visiting Assistant Professor of Chinese; Ju-Yin Wang, Visiting Lecturer in Chinese; Language Fellows: Xuechan Dai, Yen-Yu Lin; Teaching Associate: Mei Ki (Lina) Law

Department Mission Statement and Curricular Goal

The mission of the department is to produce “global citizens” with multilingual abilities, intercultural communicative competence, and multicultural leadership skills, who will be able to make contributions in different sectors of society in a globalized and diverse world. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR
In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.). Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

LANGUAGE PLACEMENT

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their language study at the college should complete a placement evaluation before pre-registering for a language course. More information about the Chinese placement evaluation can be found at https://chinese.williams.edu/faq/. Students who wish to take the Japanese placement test should contact the Japanese faculty.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in working for their thesis by the end of the fall semester of their junior year.
Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. **JAPN 101 (F) Elementary Japanese**

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer-assisted learning materials will be used extensively. Classes consist of a combination of “act” classes, conducted exclusively in Japanese, where students use the language in various types
of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

JAPN 101 and 102 constitute an integral, indivisible year-long course. Students who register for a year-long course are required to complete both semesters of that course within the same academic year. Students who fail to take and pass the second half of a year-long course will incur a course deficiency.

**Class Format:** fact classes, three hours per week; act classes three hours per week

**Requirements/Evaluation:** daily classroom performance, homework, quizzes, chapter tests, interview tests, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** If the course is overenrolled, priority will be given to first-year students, sophomores, and DALLC majors.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** students registered for JAPN 101-102 are required to attend and pass the sustaining program during the Winter Study period; credit granted only if both semesters (JAPN 101 and 102) are taken

**Distributions:** (D1)

---

**JAPN 102 (S) Elementary Japanese**

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used to facilitate learning. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture. JAPN 101 and 102 constitute an integral, indivisible year-long course. Students who register for a year-long course are required to complete both semesters of that course within the same academic year. Students who fail to take and pass the second half of a year-long course will incur a course deficiency.

**Class Format:** fact classes, three hours per week; act classes three hours per week

**Requirements/Evaluation:** daily classroom performance, homework, quizzes, chapter tests, interview tests, and a final exam

**Prerequisites:** JAPN 101

**Enrollment Limit:** 20

**Enrollment Preferences:** If the course is overenrolled, priority will be given to first-year students, sophomores, and DALLC majors.

**Distributions:** (D1)

---

**JAPN 131 (F) Introduction to Japanese Formal Linguistics**
Cross-listings: ASIA 131

Primary Cross-listing

This course provides a comprehensive introduction to the theoretical study of the Japanese language. We will delve into various aspects of linguistic theory, exploring speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meaning (semantics). Throughout, we will primarily juxtapose Japanese with English to deepen our understanding. By the end, we will not only grasp the fundamentals but also gain practical skills to delve into applied linguistics with confidence. This includes areas such as language acquisition, pragmatics, psycholinguistics, neurolinguistics, sociolinguistics, historical linguistics, language change, and cross-linguistic variation. While there is no prerequisite, having some proficiency in Japanese would enhance your experience.

Class Format: combination of lecture and discussion
Requirements/Evaluation: quizzes, problem sets, a paper, a presentation, a mid-term exam, and a final exam
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
JAPN 131(D1) ASIA 131(D1)
Attributes: Linguistics

JAPN 201 (F) Intermediate Japanese

This course is a continuation of First-Year Japanese 101-102, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.

Class Format: fact classes, three hours per week; act classes three hours per week
Requirements/Evaluation: daily performance, homework, quizzes, chapter tests, interview tests, and a final exam
Prerequisites: JAPN 101-102 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: If the course is overenrolled, priority will be given to first-year students, sophomores, and DALLC majors.
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)

JAPN 202 (S) Intermediate Japanese

This course is a continuation of Japanese 201, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.

Class Format: fact classes, three hours per week; act classes three hours per week
Requirements/Evaluation: daily performance, homework, quizzes, chapter tests, interview tests, and a final exam
Prerequisites: JAPN 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: If the course is overenrolled, priority will be given to first-year students, sophomores, and DALLC majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2025

LEC Section: 01  TR 11:20 am - 12:35 pm

CON Section: 02  MWF 11:00 am - 11:50 am

JAPN 223 (S) Japanese Food Culture in a Global Context  (DPE)

Cross-listings: COMP 223

Primary Cross-listing

The bourgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethinic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.

Requirements/Evaluation: active class participation, three response papers, two small written report (including class presentations), and one research paper and presentation

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 223(D1)  COMP 223(D1)

Difference, Power, and Equity Notes: This course explores the complex relationship between food and culture in and out of Japan, in relation to a variety of topics such as modernization, nation-building, militarization, globalization, environmentally sustainable development, and popular culture. Students will have the opportunity to critically analyze how various social/cultural, historical, and political contexts shaped and unveiled (in)difference, (dis)power, and (in)equity in food production and consumption.

Not offered current academic year

JAPN 301 (F) Upper-Intermediate Japanese

This course is a continuation of Japanese 201 and 202. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

Class Format: three 75-minute classes

Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam

Prerequisites: JAPN 202 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: If the course is overenrolled, priority will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, Asian Studies concentrators.

Expected Class Size: 8
**JAPN 302 (S) Upper-Intermediate Japanese**
This course is a continuation of Japanese 301. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. In this course, students work on the reading skills for comprehending primary source materials and expository prose of intermediate difficulty; the communication skills for conducting practical conversations and presentations; and the listening skills for interpreting various types of information.

**Class Format:** three 75-minute classes

**Requirements/Evaluation:** daily performance, homework, quizzes, a midterm, and a final exam

**Prerequisites:** JAPN 301 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** If the course is overenrolled, priority will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, Asian Studies concentrators.

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

---

**JAPN 401 (F) Advanced Japanese**
This course is a continuation of Japanese 301 and 302. Students will develop the four skills of speaking, listening, reading, and writing in the discussion of social issues in contemporary Japan. Topics may vary according to the level of the students.

**Class Format:** three 75-minute classes

**Requirements/Evaluation:** daily performance, homework, quizzes, and projects (presentation and paper)

**Prerequisites:** JAPN 302 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** If the course is overenrolled, priority will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, Asian Studies concentrators.

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

---

**JAPN 402 (S) Advanced Japanese**
A continuation of Japanese 401, developing speaking, listening, reading, and writing skills in the discussion of social issues in contemporary Japan. Topics may vary according to the level of the students.

**Class Format:** three 75-minute classes

**Requirements/Evaluation:** daily performance, homework, quizzes and projects (presentation and paper)
Prerequisites: JAPN 401 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: If the course is overenrolled, priority will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, Asian Studies concentrators.

Winter Study

Winter Study
The popularity of sake, a traditional Japanese alcohol made from rice, has been rapidly growing worldwide, accompanied by recent advancements in its quality. For instance, an increasing number of restaurants in major cities -- not only Japanese establishments but also those serving other cuisines such as Chinese, French, and Italian -- now offer sake. This trend is partly due to sake's versatility in complementing a wide array of foods, including Western food like cheese, with the same efficacy as wine. However, sake's versatility in flavor also underscores a challenge associated with sake: many people are unfamiliar with the various flavor profiles of different types of sake or which dishes pair well with it. This course addresses these inquiries by providing insights from a sake sommelier (i.e., the course instructor) while covering topics such as the fundamentals of alcohol, sake production methods, the history of sake, flavor profiles of sake, and techniques for enjoying sake (e.g., storage methods, serving temperatures, appropriate vessels for different types of sake, and food pairings). Additionally, students will have the opportunity to make amazake, a non-alcoholic beverage derived from sake production byproducts, as well as Japanese dishes incorporating sake (with the alcohol evaporated during cooking).

Class Format: There are cooking sessions.

Requirements/Evaluation: Research on the course contents and its presentation as well as regular attendance, active participation, assignments

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Students who have taken JAPN courses and/or students who major in Asian Studies and the Department of Asian Languages, Literatures, and Cultures, if the course is overenrolled

Expected Class Size: 20

Grading: Not offered current academic year
Program in Asian Studies
(Dept I & II)
Chair: Anne Reinhardt, Professor of History

Advisory Committee:
- Sarah Allen, Chair and Associate Professor of Comparative Literature
- George Crane, Edward S. Greenbaum 1910 Professor of Political Science
- Kim Gutschow, Senior Lecturer in Religion and Anthropology/Sociology
- Aparna Kapadia, Associate Professor of History
- Cornelius C. Kubler, Stanfield Professor of Asian Studies
- Joel Lee, Assistant Professor of Anthropology
- Man He, Assistant Professor of Chinese
- Christopher Nugent, Professor of Chinese
- Annie Reinhardt, Professor of History
- Li Yu, Professor of Chinese

The interdisciplinary Program in Asian Studies invites students to explore the vast and diverse area that is Asia through individually designed concentrations that can include coursework in anthropology, art, history, language, performance, political science, religion, and literature.

Students will have the opportunity to:
- Gain knowledge about the societies and cultures of Asia.
- Appreciate the diversity in, connections among, and interactions between, different regions of Asia.
- Develop in-depth knowledge of a particular aspect of Asia—thematically, disciplinarily, or geographically.
- Understand how “Asia” and “Asian Studies” have been constituted.
- Hone skills in research or creative endeavor.

CONCENTRATION REQUIREMENTS

The concentration is composed of six courses:
- one (1) required course: ASIA 210. This course draws upon interdisciplinary work from the humanities and social sciences that critically investigates how “Asia” and “Asian Studies” have been conceived and, in the case of “Asian Studies,” practiced as a field of inquiry. Ideally this course would be taken in the sophomore or junior year, after students have taken at least one Asian Studies related course.
- a three (3) course curricular focus, which could center either on a region or country interdisciplinarily (e.g. South Asia via history, anthropology, and art) or on a theme inter-regionally (e.g. Imperialism/Colonialism in Asia; Art and Performance in Asia). Each student would specify a curricular focus in consultation with a faculty advisor.
- two (2) additional courses relating to Asia. These courses may be used to further develop the chosen curricular focus, or to bring greater disciplinary or geographic breadth to the concentration. One or both of these courses may be Asian language courses.
- a research or creative project capstone and symposium. A research paper or performance/exhibit done within one of the courses included in the concentration. (This is not an extra course, but a requirement for a research or performance project as a part of the concentration). Senior concentrators will present their work to a gathering of fellow concentrators and faculty at the Senior Asian Studies Symposium, to be held in the Spring semester of each year. They will be asked to reflect upon how their projects fit into their Asian Studies concentrations, which will give them the opportunity to tie that work into their goals within the concentration and what they have gained from the concentration more broadly.

In order to maximize breadth, among the five classes that comprise the curricular focus and electives at least two (and not necessarily more) different disciplines and at least two regions or countries of Asia (China, Japan, Korea, Taiwan, East Asia, Southeast Asia, South Asia) must be covered.

STUDY ABROAD
With permission of the faculty advisor, as many as two courses from a study abroad program may be counted toward the concentration.
FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your program typically pre-approve courses for concentration credit?

Yes.

What criteria will typically be used/required to determine whether a student may receive concentration credit for a course taken while on study away?

Course title and description, complete syllabus including readings/assignments.

Does your program place restrictions on the number of concentration credits that a student might earn through study away?

Yes, two courses.

Does your program place restrictions on the types of courses that can be awarded credit towards your concentration?

Approved courses only.

Are there specific concentration requirements that cannot be fulfilled while on study away?

Yes. ASIA 210 must be taken at Williams.

Are there specific concentration requirements in your program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Not in particular. Students are always strongly encouraged to consult with the program faculty ahead of time to plan on what courses to take during study away and what courses to take upon return.

HONORS

For students interested in graduating with honors in Asian Studies, a thesis completed over one semester and a Winter is required, above and beyond the six-course concentration. Thesis proposals are due to the Advisory Committee in the Spring for a fall thesis in the next academic year, and in the Fall for a spring thesis in that academic year.

ASIA 103  (F)  Introduction to East Asian Art

Cross-listings:  ARTH 103

Secondary Cross-listing

This course offers an introduction to the artistic traditions of China, Korea, and Japan, from the prehistoric era to the present day. Following a chronological order, the course surveys important artworks that represent major developments in medium, style, and subject matter in the three cultures, while paying attention to the movement of objects and art techniques across the region. Key themes of the course include bronzes, lacquerware, ceramics, tomb building, Buddhist reliquaries, ink painting, wood-block printmaking, and timber frame architecture. Students will learn about the development of art and artisanal practices in East Asia, while gaining a broader understanding of the continuity and discontinuity of the local artistic traditions in relation to the region’s history, politics, religion, and culture. East Asia boasts a history of art that stretches five thousand years. In addition to gaining an overview of important artistic traditions in the region through the lectures, students will develop visual analysis skills and engage with critical methodologies in East Asian art through closelooking exercises and discussion-driven case studies during sections. The course pays special attention to how the constant cross-cultural exchanges between China, Japan, and Korea contributed to the development of art in unique ways across time. What is the shape of “East Asian art”? How does art help define East Asia culturally? And what does it tell us about East Asia’s past, present, and future? Exploring these questions through art, students gain an objectbased understanding of the civilizations in East Asia. The curriculum also integrates objects from the Williams College Museum of Art.

Class Format:  A viewing session at the Williams College Museum of Art.

Requirements/Evaluation:  Attendance and participation (25%), two 2-3 page artwork analysis essays (20%), four quizzes (10%), a midterm exam (20%), and a final exam (25%).

Prerequisites:  None

Enrollment Limit:  45

Enrollment Preferences:  Art history majors are prioritized if the course over-enrolls.

Expected Class Size:  30

Grading:  yes pass/fail option, yes fifth course option

ASIA 105  (S)  Arts of South Asia  (DPE)

Cross-listings: ARTH 105

Secondary Cross-listing

South Asia, which includes the modern-day nations of Afghanistan, Pakistan, India, Bangladesh, Sri Lanka, Nepal, Bhutan and Maldives, is often compared to the European continent. Regional societies in the Indian "subcontinent" are as distinct from each other as those of Italy, Germany and France. Similarly, they also differ in their language, dress, diet, rituals and politics. However, parallel to the wealth of diversity, South Asia also demonstrates a rich history of interconnectedness. This complex web of culture, language, religion and politics is best manifested in the arts of the region. How does visual culture reflect regional variations? How does a survey of artistic style and iconography help uncover networks of exchange across South Asia? What role did the arts play in the expression of religious traditions such as Buddhism, Hinduism, Jainism and Islam? With these questions in mind, this course is designed as a survey of the arts of South Asia starting with the height of the Indus Valley Civilization in 2600 BCE and ending in 1857 CE, a date that marks the cessation of independent rule in South Asia. Using the study of architecture, painting, sculpture and textiles, students will learn how to make stylistic and iconographic analyses, while also improving their art historical writing and analytic skills.

Prerequisites: none, open to all students

Enrollment Limit: 60

Enrollment Preferences:  First years, sophomores and juniors

Expected Class Size:  48

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 105(D1) ARTH 105(D1)

Difference, Power, and Equity Notes: In addition to a survey, the course also highlights the conceptual differences between the arts of South Asia and Western constructs of art and culture. The survey will analyze how South Asian art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. The course will encourage students to challenge longstanding biases and assumptions when studying these artworks.

Attributes: GBST South + Southeast Asia Studies

Not offered current academic year

ASIA 109  (S)  The Art of Yoga: Practice, Philosophy, Politics, Possibilities  (DPE)

Cross-listings: THEA 109

Secondary Cross-listing

This course offers an immersive, interdisciplinary approach to hatha yoga, the branch of yoga that emphasizes bodily techniques for channeling energy, and achieving balance and quietude. It has been practiced and theorized variously in South Asia since ancient times. More recently, beginning in the late 19th century, it has been popularized throughout the globe, and has served as a source of inspiration for artists in various disciplines, including the theatre. Our work will follow four interrelated paths that will provide a broad context for our own experience and offer us tools for developing creativity: 1) We will dedicate ourselves to the careful study of the physical practice of yoga asanas, giving emphasis to biomechanical principles of alignment. Our study will include some basics of yoga anatomy; 2) We will study some allied philosophical principles, as they emerge from the Sanskrit text, Patanjali's Yoga Sutras, and some current commentaries on that text, by means of expanding the significance of our practice to
all areas of our lives; 3) We will attend to the cultural politics of yoga by discussing new scholarship on its ancient origins as well as critical inquiry about how issues of appropriation, Orientalism, and racism shape its current manifestations; 4) We will examine how artists have incorporated elements of yoga into their practice. To explore how yoga might support our own artistic and innovative thinking, we will pair our practice with creative exercises. In this way, the course aims to explore the relationship of theory and practice. It will be of interest to students in the arts and anyone interested in fostering artistry and the imagination. Students must be prepared to engage in a physical practice of asana, as well as commit to reading, writing, and discussion. No previous experience with yoga is required.

Requirements/Evaluation: Students will write 3-page weekly papers, either in response to readings or embodied exercises, or the tutorial partner's essay. Written feedback will be given by instructor. Students will be expected to demonstrate that they are regularly practicing outside of class both by the quality of questions they bring to our sessions together, as well as their continuous refinement of the poses. Students will not be evaluated in relation to a standard, but according to their own dedicated and steady progress with respect to the experience of yoga practice. The evaluation process includes attendance.

Prerequisites: Prospective students will be asked to submit an online form with questions about their interest in the class.

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to first-year students.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $50 for yoga mat, belt, and balls.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 109(D1) ASIA 109(D1)

Difference, Power, and Equity Notes: Throughout the course we will reflect on the ways in which the knowledge created through yogic practice and philosophy disrupts and provincializes European epistemological systems. Moreover, we will engage in critical inquiry into the ways in which the global popularity of yoga is shaped by colonial legacies of Orientalist representation, as well as contemporary modes of cultural appropriation and consumerism.

Spring 2025
TUT Section: T1 TBA Shanti Pillai

ASIA 111 (S) The Asia-Pacific War (WS)

Cross-listings: HIST 112

Secondary Cross-listing

The "Asia-Pacific War," as it is known in Japan, raged from the full-scale Japanese invasion of China in 1937 until Japan's total defeat in 1945. This war, though certainly tied to the Allied war against Germany and Italy, was viewed by many participants at the time as truly a war apart due to the immense distances involved, the gleeful, racism-fueled brutality on both sides of the conflict, and the resultant abuses of POWs, use of atomic weapons, and other atrocities. Students will explore the intersection of colonialism, racism and opportunism that fed the conflagration, and the remarkable rapprochement between American and Japanese former enemies immediately after the war. It will examine in depth the roles of China and the USSR in this conflict, which are often mentioned but functionally ignored in the West. It will cover the various warzones and home fronts, focusing as much as possible on conveying the experiences of participants through primary sources. It will likewise seek to bridge the analysis of the military and socio-political sides of this conflict, which are often treated as distinct, by drawing on key academic works in the field.

Requirements/Evaluation: Weekly meetings with professor and one peer partner; 5-page papers (6 total); 2-page critiques of partner's papers (6 total)

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: History majors and Asian Studies concentration students, then everyone else.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
HIST 112(D2) ASIA 111(D2)

Writing Skills Notes: Students will alternate weekly between writing 5-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners.

TUT Section: T1  Cancelled

ASIA 112  (S)  Musics of Asia
Cross-listings: MUS 112

Secondary Cross-listing

This course offers an introduction to the great diversity of Asian music. Our survey will span from East Asia (China, Korea, and Japan) to Southeast Asia (Thailand and Indonesia) to the Indian subcontinent, Central Asia (Tibet and Afghanistan), to the Middle East (Iran and the Arabian peninsula), and will end with the extension of Asian music across North Africa and into Eastern Europe. Within this broad survey, we will focus on selected and representative musical cultures and genres. In each section of the course, aspects of cultural context (including music's function in religious life and its relationship to the other arts), will be emphasized. While our focus will be on the traditional and classical musics of these cultures, we will also consider the current musical scene. Encounters with this music will include attendance at live performances when possible.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on four tests and two papers

Prerequisites: none; no musical experience necessary

Enrollment Limit: 20

Enrollment Preferences: if overenrolled preference will be given to sophomores and juniors

Expected Class Size: 20

ASIA 117  (F)  Bombay/Mumbai: Making of a Modern Metropolis  (WS)
Cross-listings: GBST 117 / HIST 117

Secondary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.
**Requirements/Evaluation:** assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (10-12 pages). All writing assignments are structured to build up the final paper.

**Prerequisites:** First years and sophomores only

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar.

**Expected Class Size:** 12-15

**Grading:** no pass/fail option, no fifth course option

**Writing Skills Notes:** Weekly reading response (2 pages), several short papers leading to a final research paper. Peer reviews and instructor feedback of all written work to improve writing skills and opportunities to write several drafts.

**Attributes:** GBST South + Southeast Asia Studies GBST Urbanizing World HIST Group B Electives - Asia

Not offered current academic year

**ASIA 127 (F) Spring Grass: A Peek into Inequality in China** (DPE) (WS)

**Cross-listings:** WGSS 127 / CHIN 427

**Secondary Cross-listing**

*Spring Grass (Chuncao)* is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (*gaige kaifang*) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues.

Through close readings of the novel, the eponymous TV drama series, documentaries, and films depicting rural life and women's roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls' right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong's proclamation "women can hold up half of the sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (nannü bu pingdeng) and the urban/rural-gap (chengxiang chabie) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

**Requirements/Evaluation:** For all students, active participation in tutorial meetings and an online writing portfolio as the final project. For CHIN students, four 4- or 5-page tutorial papers and revisions in Chinese, four 2-page critiques. For ASIA/WGSS students, five 5-page tutorial papers in English, five 2-page critiques, one revised paper.

**Prerequisites:** For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.

**Enrollment Limit:** 10

**Enrollment Preferences:** Enrollment priorities will be given to Chinese language learners who register under CHIN, and to freshmen and sophomores who register under ASST or WGSS.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 127(D2) CHIN 427(D1) ASIA 127(D1)

Writing Skills Notes: Writing is taught using the writing-as-process pedagogical approach. The writing process consists of invention, composition, and revision. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. The instructor gives detailed feedback to students’ drafts and students are required to turn in revisions. At the end of the semester, students will compile an online writing portfolio to showcase their best works.

Difference, Power, and Equity Notes: The issue of “inequality,” including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such inequality.

ASIA 130 (S) Basic Cantonese
Cross-listings: CHIN 131
Secondary Cross-listing
An introduction to Standard Cantonese, a major regional language of southern China which is spoken by over 70 million people in Hong Kong, Macao, Guangdong, and Guangxi as well as by many overseas Chinese in Southeast Asia, Hawaii, and North America. Due to the pervasive influence of Hong Kong as well as the economic transformation of Guangdong Province, the prestige of Cantonese within greater China rose steadily in the period 1980-2010 and it continues to be an important language today. Our focus in this course will be on developing basic listening and speaking skills, though some attention will also be paid to written Cantonese, including the special characters which have been used for centuries to write colloquial Cantonese, which have become even more widely used in Hong Kong since 1997. Since students will ordinarily possess prior proficiency in Mandarin, a rather closely related language, they should be able to attain in one semester approximately the same proficiency level that is attained in the first two semesters of Mandarin.

Class Format: dialog performance, drills, communicative exercises, oral reading, questions, and discussion
Requirements/Evaluation: Evaluation is based on classroom performance, quizzes, unit tests, and an oral and written final exam.
Prerequisites: CHIN 202 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Chinese and East Asian Languages & Cultures majors as well as Asian Studies concentrators
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 130(D1) CHIN 131(D1)
Not offered current academic year

ASIA 131 (F) Introduction to Japanese Formal Linguistics
Cross-listings: JAPN 131
Secondary Cross-listing
This course provides a comprehensive introduction to the theoretical study of the Japanese language. We will delve into various aspects of linguistic theory, exploring speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meaning (semantics). Throughout, we will primarily juxtapose Japanese with English to deepen our understanding. By the end, we will not only grasp the fundamentals but also gain practical skills to delve into applied linguistics with confidence. This includes areas such as language acquisition, pragmatics, psycholinguistics, neurolinguistics, sociolinguistics, historical linguistics, language change, and cross-linguistic variation. While there is no prerequisite, having some proficiency in Japanese would enhance your experience.

Class Format: combination of lecture and discussion
Requirements/Evaluation: quizzes, problem sets, a paper, a presentation, a mid-term exam, and a final exam
Prerequisites: none
Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Fall 2024

SEM Section: 01  TF 1:10 pm - 2:25 pm  Masashi Harada

ASIA 152  (S) Basic Taiwanese/Southern Min

Cross-listings: CHIN 152

Secondary Cross-listing

This course constitutes an introduction to Taiwanese, the majority language of Taiwan, which is essentially the same as the native language of Xiamen, China and environs. Different varieties of this language, which is also known as Amoy, Hokkien, Fukienes, and Southern Min are spoken by about 50 million people in Taiwan, southern Fujian, the Philippines, Indonesia, Malaysia, and Singapore. Suppressed in Taiwan by the Japanese from 1895-1945 and by the KMT Chinese government from 1945 through the 1970s, Taiwanese--in both its spoken and written forms--has been experiencing a fascinating revival in recent decades. The most divergent of all the Sinitic languages, this language is of special linguistic interest because it has preserved a number of features of Old Chinese. Our focus will be on developing basic listening and speaking skills, though we will also study some of the special characters used to write Taiwanese. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Since students in the course will ordinarily possess prior proficiency in Mandarin, a related language, we should be able to cover in one semester about as much as is covered in the first two semesters of Mandarin. Classes will include dialog performance, drills, communicative exercises, and oral reading and discussion of written Taiwanese.

Requirements/Evaluation: classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: CHIN 301 or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: if course is over-enrolled, preference given to majors in CHIN, EALC, JAPN and concentrators in Asian Studies

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ASIA 153  (F) Japanese Film

Cross-listings: COMP 153

Secondary Cross-listing

From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but we'll focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. All texts are translated or subtitled. All levels welcome.

Requirements/Evaluation: attendance & participation, a few short response assignments, two 5-page papers, in-class test
ASIA 162 (S) Languages of East Asia

Cross-listings: ANTH 162 / CHIN 162 / GBST 162

Secondary Cross-listing
A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? How are they used in Asian American speech communities? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice
Requirements/Evaluation: three quizzes, two 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper
Prerequisites: none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)
Enrollment Limit: 20
Enrollment Preferences: open to all with preference to first-year students and sophomores as well as majors/concentrators in CHIN, JAPN, EALC, ANTH, ASIA and GBST
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

ASIA 201 (F)  Accelerated Chinese on Special Topics for Heritage Speakers

Cross-listings: CHIN 200

Secondary Cross-listing

This course is tailor designed for students who already possess intermediate-level proficiency in speaking Chinese but lack the basic reading and writing skills, commonly referred to as heritage speakers of Chinese. They will make accelerated progress in their literacy skills through this course and be able to take either CHIN 202 or CHIN 302 in the spring semester. Adopting a semi-tutorial format (a mix of group classes and two/three-people classes), this course aims to provide differentiated instruction to heritage learners of varying proficiency levels whose Chinese speaking and listening abilities exceed their reading and writing skills. This tailored course will help students effectively expand their literacy skills while helping to solidify the linguistic foundation for continuous proficiency advancement. The main theme of the course is focused on the experiences of Chinese Americans in a global context. Students will gain a deeper understanding of Chinese culture by way of individual projects that are meaningful and relevant to their intellectual interests. Students who are placed into CHIN 102 or 202 at the beginning of the fall semester should consider taking this course in the fall.

Class Format: Semi-tutorial format, students will meet as a large group in most weeks for linguistic development and two-to-three-people groups in some weeks for project-based discussions.

Requirements/Evaluation: Active participation in class, homework, quizzes, essays, oral presentations, and a final project

Prerequisites: Students must complete the Chinese Placement Evaluation in GLOW before registering for this course

Enrollment Limit: 12

Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, concentrators in the Program of Asian Studies, and then to first-year students and sophomores

ASIA 202 (F)  De-Centering Imperial China, 960-1800

Cross-listings: HIST 212

Secondary Cross-listing

The history of China from 960-1800 can be told as the story of a continuous, enduring culture and polity. This long period was nevertheless one in which the definition and contours of "China" were constantly contested. In this survey course, we will examine the political forms, institutions, and developments in culture, society, and economy that are characteristic of the Song (960-1279), Yuan (1279-1368), Ming (1368-1644), and early Qing (1644-1800) Dynasties alongside the Inner, Central, East, and Southeast Asian polities and cultures which interacted with, accommodated and repeatedly conquered centers of Chinese power over this time (Tanguts, Khitans, Mongols, and Jurchens/Manchus, among others). Gaining a historical perspective on power relationships within this diverse region will help us to understand the different ways in which Asia participated in changing world systems throughout this period. This course combines brief lectures with discussion of predominantly primary source readings.

Requirements/Evaluation: 3 short essays, midterm quiz, final exam or paper

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History majors and Asian Studies concentrators if overenrolled

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

ASIA 203 (S) Modern Japan

Cross-listings: HIST 203

Secondary Cross-listing

This course is intended to familiarize you with the history of modern Japan, the world's third-largest economy and a dynamic influence on global culture. We will begin during the Edo Period (1600-1868), during which feudal (e.g., the status system) and more modern (e.g., a consumer society) features of Japanese life developed alongside each other. We will then examine the Meiji Restoration and explore how the Imperial Japanese state led Japan through modernization into total defeat by 1945. The course then looks at economic recovery and societal change during the postwar period, taking us up to the present day. Students will become familiar with several significant shifts in interpretation of key aspects of Japanese history. We will cover the rise and demise of the erroneous "national seclusion" narrative, the legislation of Japanese Emperor's divinity, and the debate over Japan's supposed ethnic and cultural distinctiveness. We will focus especially closely on the roles of class, gender, imperialism and foreign contacts in modern Japanese history. You are expected to critically analyze assigned primary and secondary sources and to communicate your ideas to your classmates effectively both orally and in writing. You are also expected to collaborate with your classmates to complete group activities. You will also conduct limited original archival research.

Class Format: This class features an immersive simulation, in which students will simulate the Meiji Restoration. The final project is a collaborative research project and presentation working with Japan-related sources from Williams's Special Collections.

Requirements/Evaluation: Class participation, two 5-6 page essays, immersive simulation midterm, collaborative final research presentation

Prerequisites: None

Enrollment Limit: 40

Enrollment Preferences: History majors, Asian Studies concentrators, then all others

Expected Class Size: 20-25

Grading: yes pass/fail option, yes fifth course option

ASIA 206 (S) Chinese Painting

Cross-listings: ARTH 208

Secondary Cross-listing

This course surveys the Chinese painting tradition, from the second half of the first millennium BCE to the present. Following a dynastic timeline, the course covers important painting genres including funerary, religious, figures and portraiture, landscape, ink, bird-and-flower, and oil painting and considers them in relation to the shifting historical and cultural context of China. Key themes of the course include the relationship between the art of painting and religious beliefs, political ideology, self-expression, premodern painting theories and criticism, and encounters between the East and the West. As is the case with other cultures, the art of painting in China is shaped by both the painter and its time. In addition to an overview of the history of Chinese painting, students will develop skills in visually analyzing the style, the composition, and the brushstrokes of various painting genres, while gaining an understanding of how painting responded to different historical and cultural conditions in China. The course also pays special attention to primary sources on painting, through which students will learn to think about Chinese painting in its original artistic and intellectual context.

Class Format: A painting viewing session at the Williams College Museum of Art.

Requirements/Evaluation: Attendance and participation (20%), ungraded painting responses (due before every session, 20%), a short paper (4-6
pages, double-spaced, 15%), a mid-term exam (15%), and a final research paper with presentation (8-10 pages, double-spaced, 30%).

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: Art history majors are prioritized if the course over-enrolls.

ASIA 208 (F) The U.S. and Afghanistan: A Post-Mortem (DPE)

Cross-listings: GBST 208 / ANTH 208

Secondary Cross-listing

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

Requirements/Evaluation: grading will be determined by class participation, two short (500 word) essays, and a 15-page research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference

ASIA 213 (S) Modern China, 1600-Present

Cross-listings: HIST 213

Secondary Cross-listing

China's presence continues to grow in our world today, but contemporary China also evinces complex contradictions: a market economy promoted by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course examines China's historical engagement with the modern world to offer perspective on its current conditions. We will begin with the Qing (1644-1911) conquest of China and consolidation of a multi-ethnic empire, and investigate China's encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, and the often turbulent history of the People's Republic. Throughout, we will examine themes of social, economic, intellectual, and cultural change through predominantly primary source reading and analysis.

Requirements/Evaluation: class participation, two short papers, two essays, a midterm and a self-scheduled final exam

Prerequisites: none; open to all

Enrollment Limit: 40

Enrollment Preferences: open to all; preference to History or Asian Studies majors only if overenrolled

Expected Class Size: 30-40

Grading: yes pass/fail option, yes fifth course option

ASIA 215 (S) Foundations of Confucian Thought (DPE) (WS)

Cross-listings: CHIN 215 / REL 295

Secondary Cross-listing

How should people treat each other? What constitutes human nature and does it tend towards good or evil? How should we organize society, by focusing on laws and regulations, or on ritual and moral guidance? What is the nature of moral rulership? What is the proper relationship between the individual and larger units of society, from the family to the state? These are some of the key questions that the school of thought that has come to be known as "Confucianism" addresses. As the dominant moral and political philosophy for thousands of years in much of East Asia, Confucianism has shaped our world, past and present, in innumerable ways. In this class we will focus on the foundational texts of the Confucian tradition: the Analects (purported to record the words of Confucius himself), Mengzi (often romanized as "Mencius"), and Xunzi. Beyond those questions noted above, we will further examine how these texts construct their arguments; how they were first composed, compiled, and circulated; how they employ such key concepts as "humaneness" (ren), "moral power" (de), and "ritual propriety" (li); and how they functioned as part of the larger philosophical, linguistic, political, and historical context that we now think of as "early China."

Requirements/Evaluation: Evaluation is based on writing assignments (3-4 pages, 5-6 pages, and 10-12 pages) and participation in class discussions.

Prerequisites: None.

Enrollment Limit: 19

Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; current or prospective Asian Studies concentrators; and Religion majors.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 215(D1) REL 295(D2) ASIA 215(D1)

Writing Skills Notes: Writing will include short writing assignments (1 paragraph, 3-4 pages, and 5-6 pages) that will involve drafts, feedback and revision, and one longer final paper of 10-12 pages that will involve close consultation with the instructor during the writing process.

Difference, Power, and Equity Notes: Throughout the course we will examine how these texts deal with issues of differentials of power, both political and social, in a range of contexts. In particular, we will discuss how these texts conceptualize political and social power and how they see hierarchy and difference functioning in both beneficial and deleterious ways in society.

ASIA 216 (F) Asian/American Identities in Motion (DPE)

Cross-listings: AAS 216 / AMST 213 / DANC 216 / GBST 214 / THEA 216

Secondary Cross-listing

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian American (including South Asian) communities are cultivated, expressed, and contested. Students will engage with how social and historical contexts influence the processes through which dance practices are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies to engage with issues such as nation formation, racial and ethnic identity politics, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include screenings, movement workshops, and discussion with guest artists and scholars. No previous dance experience is required.

Requirements/Evaluation: reading responses, in-class writing assignments, participation in discussions and presentations, two 5-6 page essays, and a final cumulative essay assignment.

Prerequisites: none

Enrollment Limit: 15
**Enrollment Preferences:** first years and sophomores  
**Expected Class Size:** 10  
**Grading:** no pass/fail option, no fifth course option

**Cross-listings:** HIST 217  
**Secondary Cross-listing**  

This course is intended to familiarize students with the premodern history of Japan, roughly defined as before the Meiji Restoration of 1868 and the modernizing reforms it unleashed. We will examine the archipelago's natural environment and the human impact thereon. We will explore the creation of "Japan" as a coherent political and cultural unit, key figures and works of Japanese culture and the shift in cultural production from elite patronage to the market. We will examine the Imperial institution and gendered aspects of Japanese private and public life, tracing the changing role Japanese women played in both spheres. We will also pay close attention to the rise of the samurai, both as warriors and political elites, and Japan's relationship with foreign lands and peoples. Students will become familiar with several significant shifts in interpretation of key aspects of Japanese history, such as the growing appreciation of the roles of non-elites in history, and the shift away from the "national seclusion" understanding of Japanese foreign relations.  

**Class Format:** discussion  
**Requirements/Evaluation:** Class participation; Semester-long immersive simulation, where groups of students produce bi-weekly, 2-page collective response papers (6 total); 5-6 page assigned reading-based and research papers (2 total); Final research presentation or self-scheduled final exam (1 total)  
**Prerequisites:** None

**ASIA 221 (S) South Asia: Colonialism to Independence, 1750-1947 CE**  
**Cross-listings:** HIST 221 / GBST 221  
**Secondary Cross-listing**  

What did colonialism look like in India, Britain's most valuable and populous possession for over two hundred years? How did the British establish their
rule over the vast subcontinent? And how did the people who lived there experience and finally overthrow colonial rule? This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from c. 1750 to 1947. This period spans the decline of the Mughal Empire through British colonial rule, South Asians’ struggle for independence, and the Partition of India. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and podcasts. One objective of this course is to introduce students to the different political and social processes that led to the creation of India and Pakistan; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: This class is combination of lectures and discussions. Student participation will be an essential component of the class and the overall evaluation

Requirements/Evaluation: class participation, responses papers (2-3 pages), mid-term and final exam

ASIA 226 (F) Chinese Film and Its Significant Others (DPE)

Cross-listings: CHIN 226 / COMP 296

Secondary Cross-listing

From the first "wows" that the short films invoked at a Shanghai teahouse in 1896, Chinese films have made successive wonders that straddle reality and fantasy, technological modernity and shadow-making craft, aesthetic experiments and monetary yearnings, global investments and local interest. This seminar will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) Pre-class discussion posts based on reading (Graded as Complete or Incomplete); 3) Three short papers (3 pages); and 4) the final group project (including a presentation, and a paper or other form of project. Students will be graded both individually and as a group).

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in Department of Asian Languages, Literatures, and Cultures; Comp Lit majors; those with Asian Studies Concentration.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

ASIA 228 (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films  (DPE) (WS)

Cross-listings: CHIN 428 / COMP 297

Secondary Cross-listing

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical “pasts” remembered, forgotten, and subverted in a literary “presence”? This tutorial explores the politics of memory in contemporary literatures and films from the People’s Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these “post” societies represent state-sponsored narratives of remembrance, dissidents’ collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until today. Course readings include “root-seeking”, “new realist”, “avant-garde” and “hooligan” novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three “post” societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

Prerequisites: None for students taking the course under ASST and COMP 297;  CHIN 402 or permission of the instructor for students taking CHIN 428

Enrollment Limit: 10

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; COMP majors; Asian Studies Concentration

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 228(D1) CHIN 428(D1) COMP 297(D1)

Writing Skills Notes: Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner’s paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and pasts; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these “post” societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

ASIA 230 Performance Practices of India  (DPE)

This course explores ancient and contemporary performance practices in India. Our objects of study will include the text and performance of Sanskrit plays, contemporary and experimental theater productions, as well as forms of dance and ritual. We will discuss dramaturgical structure, staging, acting conventions, gender representation, performer training, the experience and role of the audience, as well as mythological and political themes. Thinking historically and ethnographically, we will seek to understand the aesthetics and social purposes of these practices, in addition to the relationship that performance has with everyday life, contested concepts of the nation, and caste. Throughout the semester we will interrogate the
ways in which Western categories such as "classical," "folk," "religious," "traditional," and even the distinction between "dance/theater/music/visual arts" are not indigenous or accurate concepts for organizing thinking about performance in this part of the world.

Requirements/Evaluation: Evaluation will be based on participation in discussion, reading responses, an oral presentation, and one 10-page paper.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference for seniors and juniors

Expected Class Size: 12

Grading:

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: We will examine British colonial edicts that prohibited performance practices as a form of social control as well as in the name of Christian morality. From here we will explore how upper-caste Independence era artists and leaders sought to reinvent the arts as vessels of "Indian" identity, at the cost of further marginalizing hereditary performance communities. We will also interrogate how the Indian state has promoted narrow visions of "femininity" and how artists contest religious nationalism.

ASIA 234 (S) Arts of Tibet -- Sacred Abode of the Himalayas

Cross-listings: ARTH 234

Secondary Cross-listing

This course surveys the art and culture of Tibet from the time of the introduction of Buddhism in the seventh century to the modern period. Traditionally understood as the divine abode of Avalokitesvara, the bodhisattva who embodies the compassion of all buddha in Buddhist cosmology, Tibet was also fantasized as the immortal realm of "Shangri-la" by western interpreters. In this course, we will begin by examining the imagination and representation of Tibet and its culture in modern western discourses, and then shift the focus to the development of artistic forms of Tibet in the context of Tibet's history and religious movements, from ancient times to the present.

Class Format: A viewing session at museums, possibly at the Williams College Museum of Art, the MFA Boston, or the MET, pending planning and approval.

Requirements/Evaluation: In addition to attendance and participation, students will be graded on two ungraded quizzes, one movie response (1-2 pages, double-spaced), one midterm, and one final project (curating a mock exhibition or a 10-page double-spaced research paper along with a prospectus and a presentation).

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: Majors and concentrations are prioritized if the course overenrolls.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 239 (F) Taswirkhana: Technique and Practice of Indian Drawing and Painting (DPE)

Cross-listings: ARTH 235 / ARTS 244

Secondary Cross-listing

Small in scale but vast in its representation, the world of Indian painting is famous for its stylized naturalism and mastery of line. It is an artistic practice whose legacy stretches back to at least the first century CE. This studio course will introduce students to the technique and practice of traditional Indian drawing and painting. The course is designed as a workshop in which students will learn to use materials and techniques of this art form. By
engaging with a non-western traditional practice, the aim of the course is to expose students to a pluralistic engagement with art making. Students will learn paper and pigment preparation, as well as the basics of traditional drawing and painting techniques. The class will learn from studying a selection of original masterworks of Indian art from the Williams College Museum of Art that will be displayed in the Object Lab. Working with original artworks will help students situate the hands-on study of Indian painting practice alongside exemplary historical examples.

Requirements/Evaluation: Class participation, discussions and critiques, successful completion of all assignments and attendance

Prerequisites: none, open to all students

Enrollment Limit: 12

Enrollment Preferences: Instructor permissions requires. If the course over enrolls preference will be given to studio art and art history majors.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $400

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 239(D1) ARTH 235(D1) ARTS 244(D1)

Difference, Power, and Equity Notes: The course invites students to engage with a pluralistic studio practice that is in stark contrast to mainstream modern and contemporary art practices. The course will follow a traditional, Indian workshop-style format which has its own particular rules and unique visual vocabulary. From the material preparation of pigments, paper and brushes, to the techniques of drawing and painting, the course will introduce students to an alternative, non-Western, mode of art making.

ASIA 241  (S) Colonialism and Underdevelopment in South Asia  (DPE) (QFR)

Cross-listings: ECON 240

Secondary Cross-listing

British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to revisit the controversy.

Requirements/Evaluation: essays (one every other week) and responses to partner's essays will be evaluated

Prerequisites: one course in ECON

Enrollment Limit: 10

Enrollment Preferences: Economics major, prior course on South Asia

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 241(D2) ECON 240(D2)

Difference, Power, and Equity Notes: Issues of difference, power, and equity are at the heart of any analysis of colonialism, hence the DPE designation.

Quantitative/Formal Reasoning Notes: Students will write six essays, in which they will employ economic models and engage with quantitative evidence, so the course satisfies the QFR requirement.

Is religious identity necessarily singular and unambiguous? The jinn - Islamic spirits born of fire - are sought out for their healing and other powers not only by Muslims in India, but by Hindus, Christians and Sikhs, as well. In parts of Bengal statues of the Hindu goddess Durga are traditionally sculpted by Muslim artisans. Buddhist pilgrimage sites in Sri Lanka contain tombs of Muslim Sufi saints and shrines of Hindu deities. South Asia - where a fifth of humanity lives - provides some of the most striking examples of pluralism and religiously composite culture in our contemporary world. Yet at the same time, strident religious majoritarianism has been a defining feature of the politics of India, Pakistan and Sri Lanka for decades, and haunts Nepal and Bangladesh as well. Are these two modes of religious being - pluralistic and composite on the one hand, singular and majoritarian on the other - reflective of two different conceptions of selfhood? What if we turn from questions of community and identity to questions of unseen power and the sacred? This course is an exploration of lived religion in South Asia. It is simultaneously a study of popular Hinduism, Buddhism and Islam and an introduction to the anthropology of religion. Centered on in-depth studies of popular sites of 'syncretic' ritual practice (shared across religious difference) as well as studies of mass mobilizations that seek to align the religious community with the nation, we approach from multiple angles what the sacred might mean in modernity.

Requirements/Evaluation: weekly (1 page) posts on readings, two short (5 page) papers, and one (12-14 page) final research paper.

Prerequisites: Interest in the topic!

Enrollment Limit: 20

Enrollment Preferences: Students in all fields of study are most welcome; if overenrolled, priority will be given to majors in Anthropology, Sociology, Religion and Asian Studies.

ASIA 243 (F) Islamic Law: Past and Present

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

ASIA 244  (S)  Mind and Persons in Indian Thought

Cross-listings:  PHIL 245 / REL 244

Secondary Cross-listing

In this course, we follow the Indian philosophical conversation concerning the self and the nature of consciousness, particularly as they are found in its various Yogic traditions. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central questions that have challenged philosophers in both traditions.

ASIA 249  (S)  Political Power in Contemporary China

Cross-listings:  PSCI 247

Secondary Cross-listing

The People's Republic of China has experienced rapid and extensive economic, social and cultural transformation over the past forty years. Its political system, however, is little changed. The Communist Party still monopolizes power and works hard to suppress organized opposition. Political dissent has taken various forms since 1979 but the regime has found ways to repress and divert it. Yet, in spite of the state's efforts, opposition and dissent continue to bubble to the surface. The course will review the political development of the PRC since 1949 and, then, focus on the dynamics of political contention and regime persistence since the Tiananmen Crisis of 1989.

Requirements/Evaluation:  2-3 short papers and a final exam

ASIA 252  Comparative Politics of South Asia

South Asia is home to around 2 billion people (over 24% of the world), making it the most populous and densely populated region in the world. The region is also one of the poorest in the world and lags in human development. Ethnic, linguistic, and religious diversity is offset by common cultural traditions and practices that serve to unite the people of the Indian Subcontinent. The course introduces students to the comparative politics of South Asia, highlighting the complexities and potential of the region. Every week we explore a different component of South Asian politics. The course covers the creation of the states of modern South Asia, partition and independence, democratization, electoral politics and political parties, economic and social development, ethnic identity and conflict, and the contemporary regional challenges of democratic backsliding and climate change.

ASIA 253 (F) Love and Death in Modern Japanese Literature and Visual Culture

Modern Japanese literature is filled with compelling love stories that are variously passionate and poignant, tragic or uplifting, heartwarming or twisted, and sometimes all of the above. This course offers a survey of modern Japanese fiction and visual culture through the lens of the love story, beginning with tales of doomed lovers that were popular in the eighteenth-century kabuki and puppet theaters, and moving through a range of other relationships, including parental love and sacrifice, sex and the occult, and romance at an advanced age. We will focus on novels and short stories by canonical modern authors like Tanizaki, Kawabata, and Mishima, as well as contemporary popular fiction by writers like Murakami Haruki and Murakami Ryu. We will also give significant attention to popular visual culture, including puppet theater, comics, animation, and film. The class and the readings are in English.

Requirements/Evaluation: attendance and participation, 2-4 short response assignments, one test, one or two 5-page papers, and an ungraded creative project
Prerequisites: none; no familiarity with Japanese language or culture is required
Enrollment Limit: 25

ASIA 255 (F) Buddhism: Ideas and Practices

Cross-listings: ANTH 255 / REL 255

Secondary Cross-listing
This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: discussion

ASIA 258 (F) Buddhism, Social Change, & Reproductive Justice in the Anthropocene (DPE) (WS)

Cross-listings: REL 258 / ANTH 258 / WGSS 225

Secondary Cross-listing
This course considers how three women profoundly shaped the Buddha's life and legacy in terms of social change & reproductive justice. Our central characters are Maya--the Buddha's mother, who died shortly after delivering him; Pajapati--the Buddha's stepmother & aunt who raised him; and Yasodhara--his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha's day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha's day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

Requirements/Evaluation: Attendance, writing weekly essays or written feedback. There are no grades first half of the semester but weekly feedback on writing.

Prerequisites: none, but a course in ANTH or REL is preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, REL, WGSS majors and ASIA concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
Writing Skills Notes: We write every week—either 1500 word lead essays, or written feedback (and oral responses) to the lead essay and weekly text. We have a mid semester 'writing chat' with the instructor where we discuss strengths and weakness of individual student writing.

Difference, Power, and Equity Notes: We explore the three women who left a lasting legacy on the Buddha's teachings and practices in terms of gender egalitarianism, social justice, and reproductive justice. Our historical genealogy explores how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice.

ASIA 266  (S)  Confession and Deception in Japanese Literature

Cross-listings: COMP 266

Secondary Cross-listing

Situated at the origins of Japanese literature are the beautiful and revealing diaries of ladies in waiting at the tenth-and eleventh-century court. Yet one of the most famous of these women turned out to be a man. For the next thousand years, Japanese literary tradition would place a premium on confessional writing, but the distortions and concealments of these narrators (and the authors hiding behind them) would always prove at least as interesting as the revelations. This course examines several centuries of Japanese literature to ask whether you can ever put your true self into writing; along the way I will ask you what you reveal, conceal, discover, or reinvent about yourself when you write about literature for a class like this. Texts will range from classical and medieval court literature by Sei Shônagon and Lady Nijô, through autobiographical and confessional novels by Sôseki, Tanizaki, Mishima, and Abe Köbô, to documentary and subculture films like The New God and Kamikaze Girls. The class and the readings are in English; no familiarity with Japanese language or culture is required.

Requirements/Evaluation: attendance and participation, a few short response assignments, one test, two 5-page papers, and an ungraded creative project

Prerequisites: none; no familiarity with Japanese language or culture is required

ASIA 269  (F)  Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience  (DPE)  (WS)

Cross-listings: STS 269 / REL 269 / ANTH 269

Secondary Cross-listing

This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians, and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness for clinicians, therapists, and educators—all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation practices all semester, while learning to better appreciate our own minds, emotions, and relationships.

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: A prior class or some experience with meditation is recommended

Enrollment Limit: 10
Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

ASIA 275 (S) Acting Out: Performativity, Production, and Politics in East Asian Theatres (DPE)

Cross-listings: CHIN 275 / THEA 271 / COMP 271 / AAS 275

Secondary Cross-listing

"Asian Theaters," for those in the West, can conjure up a variety of exotic impressions: spectacle and cacophony, mysterious masks and acrobatic bodies, exquisite styles and strangely confusing conventions. Although Asian theaters have been studied systematically in the West for at least a century, the West has never truly left its "othering" look at them. Yet, what is "different" for the West is bedrock for Asian cultures. Theatre, one of the most important and dynamic forms of cultural production and communication, has actively involved all strata of Asian societies for a millennium. How to explain theatre's continued presence and relevance for Asian nations? What do the traditions of Kun, Kabuki, and P'ansori reveal about the cultures and communities in which they were created?

This course seeks to understand from the Asian perspective, rather than "exoticize" and "other," musical and dance theatres from China, Japan, and Korea. Examining the evolving presentations of signature dramas dating from the sixteenth to the eighteenth centuries, we will act out Asian theatres in the following ways: (1) by reading the original plays in translation in tandem with their contemporary and intercultural reproductions, we will explore how Asian theatres fare in the era of globalization within and beyond national borders; (2) by revealing the "technologies" of writing, reading, acting, and staging these plays in different cultural milieus, we will consider what kinds of language and rhetoric, forms of music and movement, as well as visual components are deployed to convey evolving messages; (3) by considering key performances held outside of the proscenium stage, we will gain exposure to alternative theatrical spaces in Asian and diasporic communities that reform performing conventions, reconfigure staging environments, and renegotiate cultural values. In this manner, we will together gain an appreciation for the aesthetic devices, thematic concerns, and production politics of East Asian theatres and their global reproductions. Class materials include drama, production videos, and invited zoom sessions with Asian theatre practitioners and directors who live in the U.S. and other diasporic communities. All materials are in English. No language prerequisite. Funded by the Global Initiatives Venture Fund, this course includes an all-expense-paid travel component, a cultural and academic exchange project titled "Redefining Amateurism: Experiential Learning with Student Theatre in Contemporary China," which will bring up to eight Williams students to Nanjing, China during the Spring Break (3/23-4/3/2025). Students will participate in workshops with playwrights and theater-makers in contemporary China and engage in black-box theater productions with students from Nanjing University and Shanghai Theatre Academy. This travel component is OPTIONAL for students taking this course. However, students enrolled in this class will receive priority consideration to be included in the free travel project. Selection criteria include active participation, excellent performance in the course, etc.

Class Format: Funded by the Global Initiatives Venture Fund, this course includes an all-expense-paid travel component, which will bring up to eight Williams students to Nanjing, China during the Spring Break (3/23-4/3/2025). This travel component is OPTIONAL for students taking this course. However, students enrolled in this class will receive priority consideration to be included in the free travel project. Selection criteria include active participation, excellent performance in the course, etc.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) three small projects (papers and audio/video essays); 3) a take-home midterm; and 4) Poster presentation based on students' final projects.

Prerequisites: None; open to all. No knowledge of Asian languages required, though students with advanced Asian language proficiency are encouraged to work with primary sources if they wish.

ASIA 278  (S)  Tantra

**Cross-listings:** REL 278

**Secondary Cross-listing**

_Tantra_—a term shrouded in mystique and controversy—often finds itself fetishized in the Euro-American imagination, conjuring images of transgressive sex, illicit substances, antinomian violence, and the spiritualization of the erotic, the terrifying, and the sublime. This course aims to demystify Tantra and—by locating it in various political, economic, religious, aesthetic, and philosophical contexts—explore its rich, complex history and practices beyond the sensationalist stereotypes. First and foremost, we also devote significant attention to understanding Tantra’s intricate connection to what is referred to as "Esoteric" Buddhism. Our exploration will also ask, what did Tantra look like in practice? How have tantric traditions related to Hindu, Buddhist, and Occult movements? What philosophical assumptions does Tantra rest on? What ethical issues does it evoke? How has Tantra been connected to transgressive notions of gender and desire? How has Tantra been related to the body? What were its connection to ideals of sovereignty? What has been the relationship between Tantra and magic? By tracing the evolution and adaptation of Tantra and Esoteric Buddhism across different cultures and time periods, this course takes a global historical approach, focusing on three key geographies: South Asia, where Tantra has deep roots and complex entanglements; medieval Japan, where Esoteric Buddhism developed unique forms and practices; and modern international Occult movements, where Tantra has been reimagined and integrated into new spiritual contexts. By critically engaging with primary and secondary sources, and by diving deeply into the philosophical and ethical dimensions of Tantra, this course will challenge students to engage critically with the foundational beliefs and moral dilemmas intrinsic to tantric practices in different cultural and historical contexts. We will scrutinize the philosophical underpinnings that sustain various tantric philosophical systems, including approaches to dualism, the nature of reality and embodiment, the function of language, and the pursuit of enlightenment. Ethical considerations are paramount, as we explore how tantric traditions have navigated the boundaries of societal norms through transgressive practices, raising questions about consent, power dynamics, and the redefinition of purity and impurity. The course will also examine radical tantric notions of gender and desire, challenges to conventional morality, and their potential to subvert established hierarchies and notions of sovereignty. Lastly, we will continuously strive to subvert simplistic ideas of authenticity.

**Requirements/Evaluation:** Readings, weekly critical responses, 10-12 page research paper.

**Prerequisites:** none.

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion majors and Asian Studies concentrators.

**Expected Class Size:** 15

Spring 2025
ASIA 279  (S)  Islam on the Indian Ocean

Cross-listings: REL 279 / CAOS 279 / ARAB 279

Secondary Cross-listing
While colonial and Eurocentric geographies speak in terms of continental separation, historically the continents of Africa and Asia have been connected to one another through a dual link: Islam and the Indian Ocean. Indian Ocean trade and travel have historically connected East Africa, the Arabian Peninsula, South Asia, and South East Asia, shaping the lives of people and communities who lived not only along the coasts but also inland. This course focuses on these transregional connections, looking at the Indian ocean as a connective space that binds people and regions together rather than separating them. The course will also examine the role of Islam as a religious, economic, social and political force that brought together Muslim communities throughout the regions along the Indian ocean. In exploring these connections, the course will cover a broad historical period, from the 7th century with the rise of Islam to European colonialism and the emergence of a global economy in the nineteenth century.

ASIA 291  (F)  Red Chamber Dreams: Reading China's Greatest Novel  (WS)

Cross-listings: COMP 291

Secondary Cross-listing
Since it first began to circulate in manuscript in the mid-eighteenth century, Cao Xueqin's novel Story of the Stone (Shitou ji), also called Dream of the Red Chamber (Honglou meng), has captured the imaginations of readers young and old with its sprawling story of the coming-of-age of members of a wealthy family on the cusp of ruin. As critically acclaimed as it is beloved, Story of the Stone is widely regarded as China's greatest novel due to the intricacy of its narrative, the complexity of its characters, and the sophistication with which it deals with themes as varied as romance, enlightenment, sexuality and gender identity, and the construction of public and private spaces. The focus of this tutorial will be reading the 120-chapter novel. Students will have the option to read either in Chinese or English (though papers and class discussion will be in English). We will also read scholarly literature to learn about some of the major critical approaches to the novel, and about its enduring importance in the Chinese literary tradition.

Requirements/Evaluation: Tutorial papers (including revisions); responses to tutorial partners’ papers; engagement in in-class discussion.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: Comparative literature majors and prospective majors; Asian Studies concentrators.

ASIA 310 (S) Everyday Modernity in Japan

Cross-listings: HIST 317

Secondary Cross-listing

This course asks one overarching question: What is everyday life like in modern Japan? There, one often hears the words "modern" contrasted with "traditional." When talking about Japan itself, the former is usually coded as "western," and the latter as "Japanese." Many Japanese politicians and cultural authorities, with the help of Orientalist westerners, are happy to highlight this distinction to promote notions of Japanese uniqueness. However, though modernization in Japan did usher in tremendous, often traumatic changes, not every aspect of "modern" Japanese life came from the west, and not all western imports were/are unwelcome. Moreover, many cultural imports, such as concrete buildings and the consumption of red meat, are now interwoven into the fabric of daily life in Japan. This course examines the complex history of modernity in Japan within living memory, highlighting on its presence in the daily lives of ordinary residents of Japan. What do people eat? Where do they live? How do they think about themselves and their neighbors? We will start with the Pacific War (1937-45), but focus especially closely on postwar and contemporary Japan. We will first get a sense of the chronology and major themes in Japanese history from this time period, then explore five units, "sites of modernity" that zoom in on different but interrelated aspects of ordinary Japanese life: 1) Total War, 2) The City, 3) Work, 4) Food, 5) Race and Ethnicity. Sources and data will be drawn from scholarly works, videos, movies, websites, maps, brochures and ephemera, as well as other sources. Students will analyze these sources, discuss them and complete various assignments.

Requirements/Evaluation: Discussion participation, in-class exam, two 6-page analytic essays, job application assignment, syllabus unit design assignment

ASIA 312 (S) The Mughal Empire: Power, Art, and Religion in India

Cross-listings: REL 312 / GBST 312 / HIST 312

Secondary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

Requirements/Evaluation: participation, several short essays, one final paper

ASIA 313  (F)  The People's Republic: China since 1949
Cross-listings:  HIST 313
Secondary Cross-listing
This course provides a close examination of the six decades of the history of the People's Republic of China, from the 1949 Revolution to the present day. Through readings and discussion, we will explore the multiple political, economic, social, and cultural factors that contributed to the idealism of the "golden age" of Communist Party leadership (1949-65), the political violence of the Cultural Revolution (1966-76), the profound transformation of the Reform Era (1978-present) as well as the motors of change in China today. Course materials will include films, novels, and ethnographies, as well as secondary analyses. Please note that this is a discussion seminar and not a survey course.

Requirements/Evaluation:  active class participation, several short papers and a final research paper
Prerequisites:  none (HIST 213 recommended)
Enrollment Limit:  25
Enrollment Preferences:  junior and senior History and Asian Studies majors

ASIA 315  (F)  Minorities and the State in Modern East Asia  (DPE)
Cross-listings:  HIST 315
Secondary Cross-listing
This course examines the relationships between minority peoples and the institution of the state in East Asia, focusing mostly but not exclusively on the early modern and modern periods (17th-20th centuries). We will explore the histories of the Ainu people of Japan, the "Small Peoples" of Russian Siberia, the Tibetan, Uighur and riverine communities of Mainland China, as well as the Hill Peoples of Southeast Asia. It also examines non-indigenous minority groups, such as conquest elites, mixed-race communities, and others. We will analyze how the transition to modernity, evolving understandings of race, gender, class, nation, the impact of imperialism and globalization all influenced the history of East Asian minority peoples. What, if anything, do all of these groups have in common? What do their histories reveal about the history of East Asia and of the countries in which they live? How are the lives of minority groups in East Asia changing today? What can their experiences reveal to us about the larger world? The class is structured as a reading-intensive seminar. Students will engage in and lead discussions, compose reading reaction papers and a final analytical essay. Students will be expected to use scholarly works in order to construct cogent, relevant arguments, which they will communicate both orally and in writing. Students will evaluate primary sources in order to engage with the people they study as directly as possible. Students will lead discussions on complex topics and develop as leaders and team members in professional settings. This course will present students with an opportunity to hone critical thinking and information literacy skills to a high level. All of you will have to analyze and process complex and often contradictory information, certainly in your personal lives and very likely in your professional lives.

Class Format:  This discussion-intensive class requires students to lead several discussion sections during the semester.
Requirements/Evaluation:  Map assignment, discussion participation, leading discussion (four times), three-page response essays (five times), final six-page research essay or presentation
Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: History majors, Asian Studies concentrators, then all others

Expected Class Size: 15-20

Grading: yes pass/fail option, yes fifth course option

ASIA 318 (S) A History of the Samurai

Cross-listings: HIST 316

Secondary Cross-listing

It is difficult to find a person unaware of the samurai. However, most people, both in Japan and abroad, engage with their idealized images rather than as an actual historical phenomenon. The aim of this course is to bring the samurai to life as a distinct status group that left an indelible mark on the history of Japan, and thereby to separate fact from fiction. We will also explore the creation of iconic images of the samurai, which continue to influence worldwide popular culture. We will use academic readings, primary sources, and other media to examine the samurai from their origins during the Heian period (8th to 12th centuries) to their official dissolution in the late 19th century. We will focus on their development as a special status group and explore how they managed to maintain their corporate identity for so long. We will trace the evolution of the samurai from rural enforcers to territorial magnates to bureaucrats. This evolution affected and was affected by the development of samurai warfare, ethics, aesthetics, religious practices, ideas relating to gender roles and other aspects of samurai life, which we will explore. We will see how these ideas and practices mediated their relations with household, society, and government. Finally, we will examine why samurai status was abolished at the start of the Meiji period, and how former samurai transformed into modern citizens. Students will engage in discussion, write essays, and complete immersive historical simulation assignments.

Class Format: This class features a semester-long immersive historical simulation where students work in teams to create samurai clans and navigate historical, as well as historically plausible, scenarios.

Requirements/Evaluation: Class participation, map creation assignment, four 2-page essays, semester-long immersive simulation (Samurai clan creation), final: choice of 6-page essay or in-class exam

Prerequisites: None

ASIA 319 (F)  Gender and the Family in Chinese History  (DPE)
Cross-listings:  HIST 319 / WGSS 319

Secondary Cross-listing

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generation, and sexuality in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and child-rearing practices associated with traditional ideals of family. We will also examine the wide variety of "heterodox" practices that existed alongside these ideals, debates over and critiques of gender, family, and sexuality in the twentieth century and in China today.

Requirements/Evaluation:  active participation in discussions and group work, short skills-based writing assignments (2-4 pgs) and short essays (5-7 pgs) leading toward a final paper (10-15 pages).
Prerequisites:  none; open to first year-students with instructors permission
Enrollment Limit:  25
Enrollment Preferences:  History and WGSS majors; Asian Studies concentrators.

ASIA 321 (S)  A Global History of Manga and Anime
Cross-listings:  HIST 321

Secondary Cross-listing

Japanese comic books and cartoons are known throughout the world by their Japanese names: "manga" and "anime." This is no accident, but a reflection of their enormous global popularity. Why are they so popular? How can we use them as historical sources for Japanese history and society? What do they reveal about the place of Japan in today's global culture? How did these two phenomena emerge and develop, and how do they influence each other? This class will explore these and other related questions through readings, screenings, discussion, and original research. It will trace the evolution of manga and anime from traditional Japanese (kibyoshi, ukyo-e and kawaraban) and western (comic strips and Disney films) influences, and the explosion of their popularity after World War II. We will use manga and anime, especially "girls" (shojo) anime and manga as windows onto the intersection of Japanese and global society, economy and politics.

Requirements/Evaluation:  class participation (assessed weekly), weekly prep/response assignments (12 total), 8-9 page research and class-reading based essays (2 total), original research presentation for final assignment (1 total).
Prerequisites:  None
Enrollment Limit:  25

ASIA 324 (F) Japanese Art and Visual Culture: Private/Public/Pop (WS)

Cross-listings: ARTH 525 / ARTH 324 / COMP 324

Secondary Cross-listing

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanō screen painting; nō, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

Class Format: Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

Requirements/Evaluation: For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

Prerequisites: No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one another.

Enrollment Limit: 10

Enrollment Preferences: Graduate Art students, followed by undergraduates majoring in Art History or Comparative Literature.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 525(D1) ASIA 324(D1) ARTH 324(D1) COMP 324(D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by tackling similar problems from different angles. Students will receive detailed feedback from the instructor on each paper, addressing argument, organization, and style, as well as peer feedback.

(See requirements for details about the number and type of assignments.)

ASIA 325 (S) The Arts of the Book in Asia (WS)

Cross-listings: ARTH 325

Secondary Cross-listing

From palm leaf manuscripts to scrolls to Islamic codices, books have long served as vehicles of religious, cultural and artistic exchange in Asia. Owing both to their portability and status as finely crafted art objects, books have transmitted ideas across the continent, spreading courtly styles of painting from China to India, esoteric Buddhist teachings from Kashmir to Tibet and Mongolia, as well as the Quranic arts of calligraphy and illumination from Islamic South Asia to Southeast Asia. This co-taught seminar will highlight the interwoven history of book arts as it developed and disseminated across different regions of Asia. The course will also introduce students to the major art forms of the book, such as painting, calligraphy and illumination. The aim of the seminar is to understand the book as object while also investigating its content and its larger cultural significance. A number of class meetings will take place in the Chapin Library, where students will have the opportunity to study original manuscripts from the Special Collections. The course will culminate in an exhibition at Chapin Library which the students will curate using the Special Collections holdings.

Requirements/Evaluation: 3 essays, a final project/paper based on museum objects, wall label

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: preference will be given to Art and Asian Studies Majors, and then to students of any major interested in the art and culture of Asia

Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 325(D1) ASIA 325(D1)

Writing Skills Notes: Over the course of the semester students will write three papers at five pages each, culminating in a well-developed, focused final project. Students will be given extensive feedback on each assignment regarding grammar, style, and argument. The final paper will be part of a larger project in which students will work together to curate a small exhibition using the Chapin Library's Asian holdings. Each student will be asked to write a wall label for their selected object.

ASIA 345 (F) The Meaning of Life and Politics in Ancient Chinese Thought

Cross-listings: PSCI 345

Secondary Cross-listing

How can we live a good life? What standards should we use to judge how political power is constituted and used? This class will involve students in close reading of, and exegetical writing about, core texts of ancient Chinese philosophy in English translation. The purpose is to gain an understanding of a number of different perspectives on life and politics, especially Confucianism, Legalism and Daoism. While the primary focus will be on the meaning of the texts in the context of their own times, contemporary applications of core concepts will also be considered. The class will begin with background readings, since no prior work in Chinese philosophy or history is assumed. Then the class will read significant portions of the following canonical works: Yijing, Analects, Mencius, Daodejing, Zhuangzi, and Han Feizi.

Requirements/Evaluation: two 5-page papers and one 15-page paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference to seniors but all are welcome.

ASIA 351 (S) Disinterest in the Bhagavad Gita

Cross-listings: ENGL 353 / COMP 313 / REL 353

Secondary Cross-listing

In this course, students will read the Bhagavad Gita alongside selected responses to it. These responses range from philosophical and theological commentaries written in Sanskrit by Shankaracharya, Abhinavagupta, and Ramanuja, to later “Bhakti” poetic responses in other Indian languages, to 18th and 19th century European aesthetic and political commentary (Herder, Schlegel, Hegel), to the work of 20th century commentators like M.K. Gandhi, B.G. Tilak, B.R. Ambedkar and D.D. Kosambi. We will examine the Gita's theory of action and the place of disinterest in this theory. We will inquire into the social, metaphysical, and political conditions of possibility of such disinterestedness, and think about disinterestedness itself as a condition for political action and aesthetic experience. Finally, we will reflect on how such a comparative history of interpretation might help us model a dialectical history of thought.

Requirements/Evaluation: Weekly meetings, weekly reading; weekly essay or response. Attendance in 2-3 lectures over the semester.

Prerequisites: No prerequisites

Enrollment Limit: 10
**Enrollment Preferences:** Majors in English and Comparative Literature; Religion, Classics, or Philosophy majors; Sophomores looking to major in any of these.

**ASIA 353 (F) Separation: An Introduction to Postcolonial Literature** (DPE)

**Cross-listings:** COMP 350 / ENGL 352

**Secondary Cross-listing**

Few themes in the history of human societies have produced as much writing as that of separation—from a lover, from one's homeland, from God(s). In the past two centuries, this theme has been central to representing experiences of exile and migration in the wake of the colonially mediated transition to world capitalism. In this course, we will take up the theme of separation as a privileged point of entry into postcolonial literature and towards understanding the multiple meanings of "postcoloniality." We will encounter examples in which this theme shapes critical thought and helps imagine new modes of existence, as well as those in which the grief of separation shades into such overpowering melancholy that writing becomes impossible. We will also look at what the preoccupation with separation can tell us about the ways human beings relate to human and non-human objects, and how they make and experience history. To think through these issues, we will read nineteenth and twentieth century works dealing with experiences of love, ecstasy, migrancy, and exile, composed in diverse geographical, socio-political, and linguistic contexts. We will read works (novels, poems, memoirs, essays) and watch films from South Asia, Egypt, the Caribbeans, the US, and Europe, composed in multiple languages (English, Hindi, Urdu, Persian, French, Arabic, Bengali and Malyalam).

**Requirements/Evaluation:** mid-term paper (6-page), participation in class discussions and one roundtable, final paper (15-page)

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors, then sophomores considering the major

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASIA 353(D1) COMP 350(D1) ENGL 352(D1)

**Difference, Power, and Equity Notes:** This course examines how the political impact of colonization upon both "colonizer" and "colonized" gets expressed in literary productions of the nineteenth and the twentieth centuries. It explores the way these literary works understand the axes of social identity that shape oppression and inequity—coloniality, race, caste, gender—as constitutive of the unevenly developing world of capitalism. The concepts upon which the course focuses are essential to contemporary social critique.

**Attributes:** ENGL Literary Histories C

**ASIA 354 (F) Nationalism in East Asia**

**Cross-listings:** PSCI 354 / HIST 318

**Secondary Cross-listing**
Nationalism is a major political issue in contemporary East Asia. From anti-Japanese demonstrations in China, to tensions on the Korea peninsula, to competitive elections in Taiwan, to controversies in Japan about how history is portrayed in high school textbooks, national identity is hotly debated and politically mobilized all across the region. This course begins with an examination of the general phenomena of nationalism and national identity and their historical development in East Asia. It then considers how nationalism is manifest in the contemporary politics and foreign relations of China, Japan, South Korea, North Korea and Taiwan.

Requirements/Evaluation: 2-3 short papers; final exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: in the following order, seniors, juniors, sophomores, then first-years
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 356  (S) Democratization in India and Pakistan
Cross-listings: GBST 357 / PSCI 356
Secondary Cross-listing
Democratization has had both successes and failures in postcolonial South Asia. The region is home to the world's largest democracy in India, often cited as an unlikely and puzzling success story. At the same time, periods of democratic rule in Pakistan and Bangladesh are broken up by military interference, Sri Lanka's democracy is plagued by ethnic conflict, and Afghanistan has been unable to sustain democracy due to weak state institutions. What explains this diverse and uneven pattern of democracy in South Asia? The course delves into theories on political parties, ethnic politics, electoral institutions, civil-military relations, political violence, state-building, inter-state conflict, and civil wars to understand the variation in regime type in the region. It covers domestic and international factors that lead to democratization and democratic backsliding. We will focus on the role of political parties in democratization; the emergence of political dynasties; changes in the characteristics of the political elite; investigate claims of democratic deepening; and examine the effect of inter-state wars, land disputes, and insurgencies on democratic stability in the region.
Requirements/Evaluation: three 5 to 7-page papers or one research paper; presentation; class participation
Prerequisites: previous course in political science or permission of the instructor
Enrollment Limit: 16
Enrollment Preferences: preference given to political science majors
Expected Class Size: 14
Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

ASIA 411  (S) Han Dynasty Art in the Ancient World
Cross-listings: ARTH 411
Secondary Cross-listing
Although the Han Empire (206 BCE-220 CE) is credited for defining the "Han ethnic identity" or the so-called "Chinese-ness" as we know it today, its culture was also richly cosmopolitan, marked by constant interaction with the outside world. This course considers Han dynasty art from a transregional perspective by examining artworks that attest to rigorous artistic exchanges with foreign cultures, ranging from the luxury items imported...
from the Hellenistic, the Central Asian, and the Steppe cultures and their domestic adaptations, to the exported Han artworks excavated in the South East and the East Asian regions. These objects illustrate the Han Empire's growing awareness of its neighboring states and the ambition to visually assert itself as a powerful and open "universal empire." Students will learn about important artistic trends during one of the most international periods in ancient China, while gaining a materially-based vision of a globalizing ancient world bound closer than ever by the rise of the "Silk Roads" and maritime trade. The course is divided into five main sections following the logic of space. Beginning with the Han Empire (the "Center"), the seminar covers key themes in the development of Han art over four centuries. Assuming the viewpoint of the Han Empire, the course then examines the artistic exchanges with civilizations in the West (the Mediterranean and the Central Asian cultures) and moves clockwise to the North (the Steppe cultures), the East (Korea and Japan), and finally the South (maritime trade with South East Asian states). This arrangement of the syllabus is designed to help the students grasp and internalize the dynamic cultural contacts in a more embodied manner, while providing a working version of a spatial "grid" for navigating the students in their own exploration of the history of art in the ancient global world.

Class Format: A potential field trip to museums, possibly in New York or Boston, pending planning and approval.

Requirements/Evaluation: In addition to attendance and active participation in seminar discussions, each student will present on a topic of choice for two of the five main sections outlined in the course description (each 15-20 mins). Students will also write a final research paper on a topic of choice (15-20 pages, double-spaced) in consultation with the instructor and present their findings to the class (20 mins).

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Art history majors concentrating on Asian or ancient art are prioritized if the course over-enrolls.

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 415 (S) The Shosoin Imperial Treasury

Cross-listings: ARTH 413

Secondary Cross-listing

Constructed in the eighth century to house artifacts associated with Emperor Shomu (reigned 724-749) and Empress Komyo (701-760), the Shosoin Imperial Treasury in Nara, Japan, preserves some of the finest examples of art objects produced across different cultural regions along the Silk Road, spanning Central Asia to Japan, from the sixth through the eighth century. Focusing on a selection of artworks, including painting, calligraphy, textiles, lacquerware, ceramics, glass, and metalwork, among others, this seminar examines issues of cross-cultural transmission of objects, artistic techniques, and cultural knowledge in the global medieval world, while also exploring the manners in which these artifacts visually and materially shaped kingship in eighth-century Japan and East Asia. Special attention is also paid to how recent relevant discoveries in archaeology and conservation science could contribute to art historical discourses.

Requirements/Evaluation: Attendance and active participation in discussions (30%), two presentations on a topic of choice (20% total), final paper proposal with annotated bibliography (10%), and final research paper with presentation (40% total, 30% paper and 10% presentation).

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Art history majors are prioritized if the course over-enrolls.

ASIA 417 (F) The Treaty System and Treaty Ports of China, 1840-1945

Cross-listings: HIST 417

Secondary Cross-listing

China in the nineteenth and early twentieth centuries was not colonized by a single Western power; instead several Western powers (and later Japan) exercised domination over China through a system of "unequal treaties" that granted them special privileges within Chinese territory. The years (1842-1943) in which these treaties were in effect is often called "The Century of Humiliation" by contemporary Chinese nationalists: a period of weakness that the rising Chinese nation still strives to overcome. The system imposed by these nineteenth century treaties, however, was a complex amalgam of legal, commercial, and residence privileges for foreigners in China that played a significant role in shaping the modern nation. One the most recognizable features of this system was the treaty port—an urban center designated as open to foreign residence, trade, and shipping. Extending from an initial five open ports to nearly fifty by the turn of the century, these ports became commercial and industrial centers that connected China to the global economy and created novel spaces of culture, labor, society, and politics. In this research seminar, we will use of several recent online collections of English-language primary source material to investigate the role of the treaty system and the treaty ports in modern Chinese history. The seminar will begin with an exploration of the historiography of the treaty system and "foreign presence" and culminate in an original research paper on a related topic of each student's choice. Throughout, we will work on general and specific research methods.

Class Format: This is a research seminar. Our goal will be to produce a 20-30 page original research paper by the end of the semester. In addition to discussion of readings, considerable time in class will be spend on research methods.

Requirements/Evaluation: Active participation in class discussion and activities; several short papers (5-7 pages) leading to a final research paper (20-30 pages)

Prerequisites: no prerequisites

Enrollment Limit: 20

Enrollment Preferences: Senior History majors, History majors, Asian Studies concentrators

ASIA 421 (F) Chinese Societies through the lens of COVID-19

Cross-listings: GBST 386 / CHIN 421

Secondary Cross-listing

The COVID-19 pandemic has profoundly changed the world. How did the Chinese-speaking regions in Asia, including Mainland China, Taiwan, and Singapore, respond to the pandemic during its earlier years? How did their responses reflect the political and economic systems as well as the cultural values of Asian societies? What were the effects of these responses on the regions and people's daily lives? In this course, students will gain a deeper understanding of Chinese-speaking societies through an analysis of the "public" and "private" literature pertaining to the lived experiences of the COVID-19 pandemic. Through readings and discussions of various materials such as government records, scientific publications, journalistic writings, personal diaries, and online narratives, students will explore a wide range of issues related to the politics, economy, public health, and sociocultural issues of Asian societies. Simultaneously, Chinese language learners will further enhance their language proficiency and intercultural competency by engaging in complex discourse in the target language. All readings and discussions are in Chinese.

Requirements/Evaluation: Evaluation will be based on CLASS performance, homework, two short papers (4-5 pages), and one longer paper (8-10 pages).

Prerequisites: CHIN 402 or permission of instructor

Enrollment Limit: 12
Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Asian Studies, Global Studies and Public Health concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ASIA 425  (S) Becoming Taiwan: Social, Cultural, and Economic Discourses of Modern Day Taiwan

Cross-listings: CHIN 425

Secondary Cross-listing

Nestled in East Asia, Taiwan stands as a dynamic island home to a populace of 23 million. From 1949, when the Nationalist Party (KMT) retreated to Taiwan after the Chinese Civil War, to becoming one of the Four Asian Tigers in the latter half of the 20th century, Taiwan has developed into a multifaceted society through an array of social/cultural/economic changes associated with industrialization, globalization and identity formation. Throughout this course, we will delve into pivotal moments that have shaped contemporary Taiwanese society, drawing insights from literary works, films, journalistic exposés, and academic discourse. Through group discussions and individual projects, students will not only acquire specialized vocabulary but also hone their ability to dissect and debate complex ideas in Mandarin pertaining to the aforementioned themes. Crafted in a semi-tutorial format, this course aims to cultivate linguistic proficiency ranging from Advanced Low to Advanced Mid as outlined by the ACTFL proficiency guidelines. To enrich the learning experience, language partnerships will be forged in collaboration with a graduate program in Chinese pedagogy based in Taiwan, offering further opportunities for in-depth engagement with course materials.

Class Format: Mandarin Chinese will be the instructional language for this course. Semi-tutorial format, students will meet as a large group on one day for linguistic development and three to four people groups on other days for discussions.

Requirements/Evaluation: quizzes, presentations, posting of discussion questions, two position papers (3 pages) and one final paper (5 pages)

Prerequisites: CHIN 402 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Majors in Chinese; DALLC; Asian Studies Concentration; seniors.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ASIA 481  (F) History of Taiwan  (WS)

Cross-listings: HIST 481

Secondary Cross-listing

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the
distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Requirements/Evaluation: weekly papers and critiques
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: History and Asian Studies majors/concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year
How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. Williams Astronomy courses are for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astronomy major and the Astrophysics major, both administered by the Department of Physics and Astronomy, are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Williams Astronomy site can be found at astronomy.williams.edu.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

- Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond
- Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)
- Two 400-level Astronomy courses
- Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement
- Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics
- Mathematics 140 Calculus II
- Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. A typical path through the major will begin with Physics 141, which is suitable for students with one year of high school physics and a background in calculus. However, students without high school physics may begin with Physics 131, and students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of
Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.

THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Department of Physics and Astronomy to determine their most appropriate route through the major. An essential ingredient in such students’ undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Physics 141 is recommended for students with one year of high school physics and a background in calculus. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

**Major Requirements for Astrophysics**

- Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond
- Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement
- Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics
- Physics 201 Electricity and Magnetism
- Physics 202 Waves and Optics
- Physics/Mathematics 210 Mathematical Methods for Scientists
- Physics 301 Introductory Quantum Physics
- Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus
- Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following:
  - Astronomy 211 Astronomical Observing and Data Analysis
  - Physics 302 Statistical Physics
  - Physics 402T Applications of Quantum Mechanics
Physics 405T Electromagnetic Theory

Physics 411T Classical Mechanics;

Physics 418 Gravity

The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

Honors candidates will also be required to attend departmental colloquium talks.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

STUDY ABROAD

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then
ASTR 101 (F) Stars: From Suns to Black Holes

Have you ever wondered what makes the Sun and stars shine and what they are made of? Do they evolve, and if so, how do they change? What are black holes, and how can they form? How do we find planets around other stars? Astronomy 101, a non-major, general introduction to the part of contemporary astronomy that includes how stars form and die, will provide answers to these questions. We will pay special attention to exciting discoveries made in the past decade. Thousands of exoplanets have been discovered, with their atmospheres being studied in detail by the James Webb Space telescope. For the first time, gravitational waves from merging black holes have been detected. In this course we will discuss the basic methods and instruments used in these and other astronomical observations and what they can teach us about the life cycle of stars. We will discuss what happens at the centers of stars, how stars evolve, and why some stars explode and form neutron stars and black holes. This course is independent of and on the same level as ASTR 102 (solar system) and 104 (galaxies/cosmology); students who have taken these courses are welcome.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester.

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 48;12/lab

Enrollment Preferences: first and second-year students

Expected Class Size: 30/lec

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

ASTR 102 (S) Our Solar System and Others

What makes Earth different from all the other planets? What have NASA's Curiosity and Perseverance on Mars found about that planet's past running water and suitability for life? How has knowledge about Pluto and the outer solar system been transformed by NASA's flybys? Will asteroids or comets collide with the Earth again? What is the new James Webb Space Telescope revealing about exoplanets and their atmospheres? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system (and the systems of planets around other stars), will provide answers to these questions and more. We will cover the historical development of humanity's understanding of planetary systems, examining contributions by Copernicus, Galileo, Newton, Einstein, and others and the more recent discoveries of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and space telescopes such as the Hubble, James Webb, and Kepler/K2/TESS missions. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observing TAs will be available for consultation, in addition to the instructors, throughout the semester.
ASTR 104 (S) The Milky Way Galaxy and the Universe Beyond

How was the Universe created, and how has it evolved to its presently observed structure? This course will start at the Big Bang, the beginning of everything, and move forward from there. About five centuries ago Galileo Galilei used his own primitive telescope to make many astronomical discoveries: observing the moons of the Jupiter, craters on the Moon, and Sun spots to name a few. Galileo also noticed that stars are not spread on the celestial sphere at random but form a disk like structure, which we now call the Milky Way Galaxy -- our cosmic home. Almost a hundred years ago Edwin Hubble discovered that the Universe contains many galaxies and that they are moving away from each other. Hubble discovered that the Universe -- the largest physical object -- expands, so it had a beginning. In this course we will explore the tools and techniques that astronomers use to study stars and galaxies. From the discovery of the Milky Way to the expanding Universe, we will cover the key concepts and discoveries that have shaped our understanding of the cosmos. During recent decades astronomers have made exciting -- and unsettling -- new discoveries: it turns out that most of matter in the Universe does not emit light and most probably is composed of particles of unknown origin, and that the expansion of the Universe is now accelerating, pushed by a mysterious dark energy. At this point, astronomers have evidence to show that at early epochs the Universe was very dense and very hot. This early epoch is called the Big Bang. How the Big Bang happened is not known yet but there are several interesting hypotheses that our Universe could be one of many. This course will introduce important highlights in the observation and interpretation of remarkable astronomical phenomena and explore these many mysteries.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. Current astronomical discoveries will be discussed at the beginning of each class and by email throughout the semester.

Requirements/Evaluation: two hour tests, a final exam, lab reports, and an observing portfolio
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: first-years
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Unit Notes: non-major course
Distributions: (D3)

ASTR 111 (F) Introduction to Astrophysics (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the
other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

**Class Format:** The class has weekly afternoon laboratory sessions, which will alternate between 'hands-on' activities and problem-solving/discussion sessions. Nighttime observing sessions will occur throughout the semester.

**Requirements/Evaluation:** weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio

**Prerequisites:** a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

**Enrollment Limit:** 28; 14/lab

**Enrollment Preferences:** potential Astronomy majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

---

**ASTR 206 (S) Astrobiology (QFR)**

This course will focus on the development of complex life and its observational signatures, both on Earth and on other worlds. We will first investigate the conditions that have led to the development of complex life on Earth. We will view Earth over time from an outsider's perspective and challenge preconceptions about the basic requirements for life. We will also explore the 'hot spots' in the search for life beyond Earth in our Solar System. Observations in the next decade may reveal biosignatures in the atmospheres of exoplanets. We will learn about these future observations, while also interacting with current research-grade data for other planets and learning about the methods used to constrain the physical conditions on other worlds. Using quantitative models, we will test the stability of Earth-like planets to the variable and potentially hostile conditions of evolving solar systems.

**Requirements/Evaluation:** weekly problem sets, one paper, two mid-term exams, and a final exam

**Prerequisites:** Math 130 and at least one prior physical science course (either Astronomy, Physics, Geosciences, or Chemistry), or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Science majors, with preference given to students majoring in Astronomy, Astrophysics, or Geosciences

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** In this course students will make quantitative comparisons between environmental conditions on Earth, other planetary bodies, and models. The students will also examine observations regarding the detection and characterization of planetary bodies, including contemporary data.

---

**ASTR 211 (S) Astronomical Observing and Data Analysis (QFR)**

How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific
data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24" telescope and from data archives.

**Class Format:** discussion, computer lab work, and observing

**Requirements/Evaluation:** weekly problem sets, lab work, and observing projects

**Prerequisites:** MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

**Enrollment Limit:** 14

**Enrollment Preferences:** Astronomy or Astrophysics majors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

*Not offered current academic year*

### ASTR 220 (S) New Discoveries with the James Webb Space Telescope

Launched in December 2021, the James Webb Space Telescope (JWST) has delivered new views of the universe and is reshaping our understanding of our solar system, planets around other stars, star formation, and galaxies in the early universe. The beautifully detailed images have also generated intense public interest and are often the subject of science articles in the news. Through JWST's new observations, this course will explore both cutting-edge astronomical science and science communication. We will focus on open questions in each of JWST's four themes: Other Worlds, Star Lifecycle, Galaxies Over Time, and Early Universe. We will discuss the science behind these questions, recent discoveries, and how astronomers are using JWST to learn more. We will also learn about astronomical observations, how JWST works, and how astronomers collect and evaluate scientific evidence. Students will discuss how discoveries are communicated to the public, analyze stories in popular media, and create their own versions of public astronomy communications.

**Requirements/Evaluation:** weekly homework questions and short writing assignments, class participation, mid-term written article, and final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Astronomy/Astrophysics majors and prospective majors, sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** non-major course

**Distributions:** (D3)

### ASTR 240 (F) Great Astronomers and Their Original Publications (WS)

**Cross-listings:** STS 240 / LEAD 240

**Primary Cross-listing**

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (*Principia Mathematica*: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are
often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams' Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452)
Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 240(D3) STS 240(D2) LEAD 240(D2)
Writing Skills Notes: Comments on submitted papers will aid in writing skills
Attributes: LEAD Facets or Domains of Leadership

ASTR 330  (S)  The Nature of the Universe
This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves, galaxies and quasars, dark matter, and the formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a multiverse.
Class Format: lecture/discussion, three hours per week
Requirements/Evaluation: two midterm exams, a small observing portfolio, occasional quizzes, and a final exam
Prerequisites: none
Enrollment Limit: 48
Enrollment Preferences: open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors; preference given to seniors
Expected Class Size: 25
Grading: yes pass/fail option, no fifth course option
Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors
Distributions: (D3)
Not offered current academic year

ASTR 402  (S)  Between the Stars: The Interstellar Medium  (QFR)
The matter between the stars--the interstellar medium--tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to
measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of “forbidden” lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

**Class Format:** Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.

**Requirements/Evaluation:** weekly problem sets, 10-page final paper, and observing projects

**Prerequisites:** ASTR 111 and PHYS 201 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** juniors and seniors

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

Spring 2025

TUT Section: T1  TBA  Anne Jaskot

**ASTR 404 (S) Unsolved Problems in Galaxy Evolution**

In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.

**Requirements/Evaluation:** student's papers, responses to the partner's papers, and problem sets

**Prerequisites:** ASTR 111 and PHYS 142 or 151 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Juniors and Seniors

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

Not offered current academic year

**ASTR 410 (S) Compact Stellar Remnants: White Dwarfs, Neutron Stars and Black Holes**

A star is a very interesting, very complicated physical object. Properties of stars and their evolutionary paths depend on an intricate interplay of different physical phenomena with gravity, nuclear interactions, radiation processes and even quantum and relativistic effects playing important roles. Using basic physics we will construct simple models of stars and discuss their evolution, concentrating on the key physical processes that play the dominant role at different evolutionary stages. We will discuss late stages of stellar evolution and concentrate on the basic properties of three possible remnants: white dwarfs, neutron stars and black holes. Radio and X-ray pulsars, supernovae including Type Ia and Gamma Ray Bursts will be discussed as well as observational confirmation of existence of black holes. We will explore extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences. We will also discuss the recent exciting detection of gravitational waves by the LIGO/VIRGO laser interferometric detectors.

**Class Format:** discussion three hours per week

**Requirements/Evaluation:** classroom participation, homework assignments, a midterm exam and a final exam
Prerequisites: PHYS 201 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: physics, astrophysics, and astronomy majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Not offered current academic year

ASTR 413 (F) Building Stars: A Physical Model of Stellar Structure (QFR)
How does the Sun shine? How does the Sun evolve with time? What physical processes determine the power output of the Sun? In this course we will explore our modern understanding of how stars work, and why they have a range of sizes, temperatures, and luminosities. As we go, we will discuss the laws of physics at work in our Sun and other stars. Over the course of the semester, we will build a working computer model of the Sun using the basic laws of nuclear fusion, radiative transfer, thermal mechanics, and hydrostatic equilibrium.

Class Format: Lectures will include time for computer programming work
Requirements/Evaluation: weekly problem sets, weekly coding homework assignments, two mid-term exams, and a final project
Prerequisites: PHYS 142 or 151, any prior class that makes use of programming, or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Astronomy, Astrophysics, or Physics majors, with first preference to Astronomy or Astrophysics majors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: In this course, students will use differential equations and numerical coding techniques to test and explore the relationships between physical laws using the Sun and other stars as examples. They will make quantitative comparisons between their calculations and observed stellar properties.

Winter Study

ASTR 16 (W) An infinity of worlds: planets and the search for life in the universe
Less than a generation ago, we wondered, as we had for millions of years before, whether there were any other planets at all. Now, we are privileged to be in the first generation of humans to know that many of the points of light dusting our night sky are host to orbiting worlds, some of which may be like our Earth. In this course, we will explore the techniques that are being used to discover these new worlds. We will make our own contributions to this great age of discovery, by using NASA spacecraft data to search for new planets. This course, aimed at non-majors, will deal with the science of planet hunting, the astounding diversity of planets known to exist, the emerging science of astrobiology, and the enduring question of "are we alone?" through works of science fiction and cutting-edge research. Coursework will consist of readings from popular science books aimed at a general audience, science-fiction short stories, and excerpts from science-fiction novels, in addition to 1-2 relevant feature films. The primary mode of instruction will be 6 hours per week of in-person class meetings including lectures, small-group activities, and optional evening observing sessions at the rooftop telescope (weather permitting). Evaluation will be based on a final 10-page paper, the topic and format of which is extremely broad.

Requirements/Evaluation: Paper(s) or report(s)
Prerequisites: None
Enrollment Limit: 24
Enrollment Preferences: If overenrolled, preference will be given to first years and sophomores. I am willing to open a second section if enrolment
Expected Class Size: NA
Grading: pass/fail only
Unit Notes: Rob Wittenmyer '98 is Professor of astrophysics at the University of Southern Queensland in Australia. He is a veteran planet hunter with more than 100 published planet discoveries.
Materials/Lab Fee: $75

Not offered current academic year

ASTR 31 (W) Senior Research: Astronomy
To be taken by students registered for Astronomy 493, 494.
Grading: pass/fail only
Not offered current academic year

ASTR 32 (W) Senior Research: Astrophysics
Cross-listings: PHYS 32
Primary Cross-listing
To be taken by students registered for Astrophysics 495, 496.
Class Format: independent study
Grading: pass/fail only
This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 32 ASTR 32
Not offered current academic year

ASTR 99 (W) Independent Study: Astronomy or Astrophysics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Grading: pass/fail only
Not offered current academic year
How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. Williams Astronomy courses are for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astronomy major and the Astrophysics major, both administered by the Department of Physics and Astronomy, are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Williams Astronomy site can be found at astronomy.williams.edu.

**ASTRONOMY MAJOR**

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

**Major Requirements for Astronomy**

- Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond
- Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)
- Two 400-level Astronomy courses
- Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement
- Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics
- Mathematics 140 Calculus II
- Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. A typical path through the major will begin with Physics 141, which is suitable for students with one year of high school physics and a background in calculus. However, students without high school physics may begin with Physics 131, and students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of
Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.

THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Department of Physics and Astronomy to determine their most appropriate route through the major. An essential ingredient in such students’ undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Physics 141 is recommended for students with one year of high school physics and a background in calculus. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics

Physics 301 Introductory Quantum Physics

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus

Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following:

Astronomy 211 Astronomical Observing and Data Analysis

Physics 302 Statistical Physics

Physics 402T Applications of Quantum Mechanics
The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

Honors candidates will also be required to attend departmental colloquium talks.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

STUDY ABROAD

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then
learned they wouldn’t:

None to date.

ASTR 101 (F) Stars: From Suns to Black Holes

Have you ever wondered what makes the Sun and stars shine and what they are made of? Do they evolve, and if so, how do they change? What are black holes, and how can they form? How do we find planets around other stars? Astronomy 101, a non-major, general introduction to the part of contemporary astronomy that includes how stars form and die, will provide answers to these questions. We will pay special attention to exciting discoveries made in the past decade. Thousands of exoplanets have been discovered, with their atmospheres being studied in detail by the James Webb Space telescope. For the first time, gravitational waves from merging black holes have been detected. In this course we will discuss the basic methods and instruments used in these and other astronomical observations and what they can teach us about the life cycle of stars. We will discuss what happens at the centers of stars, how stars evolve, and why some stars explode and form neutron stars and black holes. This course is independent of and on the same level as ASTR 102 (solar system) and 104 (galaxies/cosmology); students who have taken these courses are welcome.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester.

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 48; 12/lab

Enrollment Preferences: first and second-year students

Expected Class Size: 30/lec

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

LAB Section: 03 T 2:30 pm - 4:00 pm Kevin Flaherty
LAB Section: 04 W 1:00 pm - 2:30 pm Kevin Flaherty
LAB Section: 05 W 2:30 pm - 4:00 pm Kevin Flaherty

ASTR 102 (S) Our Solar System and Others

What makes Earth different from all the other planets? What have NASA's Curiosity and Perseverance on Mars found about that planet's past running water and suitability for life? How has knowledge about Pluto and the outer solar system been transformed by NASA's flybys? Will asteroids or comets collide with the Earth again? What is the new James Webb Space Telescope revealing about exoplanets and their atmospheres? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system (and the systems of planets around other stars), will provide answers to these questions and more. We will cover the historical development of humanity's understanding of planetary systems, examining contributions by Copernicus, Galileo, Newton, Einstein, and others and the more recent discoveries of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and space telescopes such as the Hubble, James Webb, and Kepler/K2/TESS missions. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observing TAs will be available for consultation, in addition to the instructors, throughout the semester.
ASTR 104 (S) The Milky Way Galaxy and the Universe Beyond

How was the Universe created, and how has it evolved to its presently observed structure? This course will start at the Big Bang, the beginning of everything, and move forward from there. About five centuries ago Galileo Galilei used his own primitive telescope to make many astronomical discoveries: observing the moons of the Jupiter, craters on the Moon, and Sun spots to name a few. Galileo also noticed that stars are not spread on the celestial sphere at random but form a disk like structure, which we now call the Milky Way Galaxy -- our cosmic home. Almost a hundred years ago Edwin Hubble discovered that the Universe contains many galaxies and that they are moving away from each other. Hubble discovered that the Universe -- the largest physical object -- expands, so it had a beginning. In this course we will explore the tools and techniques that astronomers use to study stars and galaxies. From the discovery of the Milky Way to the expanding Universe, we will cover the key concepts and discoveries that have shaped our understanding of the cosmos. During recent decades astronomers have made exciting -- and unsettling -- new discoveries: it turns out that most of matter in the Universe does not emit light and most probably is composed of particles of unknown origin, and that the expansion of the Universe is now accelerating, pushed by a mysterious dark energy. At this point, astronomers have evidence to show that at early epochs the Universe was very dense and very hot. This early epoch is called the Big Bang. How the Big Bang happened is not known yet but there are several interesting hypotheses that our Universe could be one of many. This course will introduce important highlights in the observation and interpretation of remarkable astronomical phenomena and explore these many mysteries.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. Current astronomical discoveries will be discussed at the beginning of each class and by email throughout the semester.

Requirements/Evaluation: two hour exams, a final exam, lab reports, and an observing portfolio

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first-years

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

ASTR 111 (F) Introduction to Astrophysics (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the
other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

**Class Format:** The class has weekly afternoon laboratory sessions, which will alternate between 'hands-on' activities and problem-solving/discussion sessions. Nighttime observing sessions will occur throughout the semester.

**Requirements/Evaluation:** weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio

**Prerequisites:** a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

**Enrollment Limit:** 28; 14/lab

**Enrollment Preferences:** potential Astronomy majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

---

**ASTR 206 (S) Astrobiology** (QFR)

This course will focus on the development of complex life and its observational signatures, both on Earth and on other worlds. We will first investigate the conditions that have led to the development of complex life on Earth. We will view Earth over time from an outsider's perspective and challenge preconceptions about the basic requirements for life. We will also explore the 'hot spots' in the search for life beyond Earth in our Solar System. Observations in the next decade may reveal biosignatures in the atmospheres of exoplanets. We will learn about these future observations, while also interacting with current research-grade data for other planets and learning about the methods used to constrain the physical conditions on other worlds. Using quantitative models, we will test the stability of Earth-like planets to the variable and potentially hostile conditions of evolving solar systems.

**Requirements/Evaluation:** weekly problem sets, one paper, two mid-term exams, and a final exam

**Prerequisites:** Math 130 and at least one prior physical science course (either Astronomy, Physics, Geosciences, or Chemistry), or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Science majors, with preference given to students majoring in Astronomy, Astrophysics, or Geosciences

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** In this course students will make quantitative comparisons between environmental conditions on Earth, other planetary bodies, and models. The students will also examine observations regarding the detection and characterization of planetary bodies, including contemporary data.

---

**ASTR 211 (S) Astronomical Observing and Data Analysis** (QFR)

How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific
data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24" telescope and from data archives.

Class Format: discussion, computer lab work, and observing

Requirements/Evaluation: weekly problem sets, lab work, and observing projects

Prerequisites: MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

Enrollment Limit: 14

Enrollment Preferences: Astronomy or Astrophysics majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

Not offered current academic year

ASTR 220  (S)  New Discoveries with the James Webb Space Telescope

Launched in December 2021, the James Webb Space Telescope (JWST) has delivered new views of the universe and is reshaping our understanding of our solar system, planets around other stars, star formation, and galaxies in the early universe. The beautifully detailed images have also generated intense public interest and are often the subject of science articles in the news. Through JWST's new observations, this course will explore both cutting-edge astronomical science and science communication. We will focus on open questions in each of JWST's four themes: Other Worlds, Star Lifecycle, Galaxies Over Time, and Early Universe. We will discuss the science behind these questions, recent discoveries, and how astronomers are using JWST to learn more. We will also learn about astronomical observations, how JWST works, and how astronomers collect and evaluate scientific evidence. Students will discuss how discoveries are communicated to the public, analyze stories in popular media, and create their own versions of public astronomy communications.

Requirements/Evaluation: weekly homework questions and short writing assignments, class participation, mid-term written article, and final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Astronomy/Astrophysics majors and prospective majors, sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: non-major course

Distributions: (D3)

ASTR 240  (F)  Great Astronomers and Their Original Publications  (WS)

Cross-listings: STS 240 / LEAD 240

Primary Cross-listing

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (Principia Mathematica: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are
often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); George Ellery Hale (Mt. Wilson Observatory 100" telescope, 1917; Palomar Observatory 200" telescope, 1948), Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams' Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452)
Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 240(D3) STS 240(D2) LEAD 240(D2)
Writing Skills Notes: Comments on submitted papers will aid in writing skills
Attributes: LEAD Facets or Domains of Leadership

ASTR 330  (S) The Nature of the Universe
This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves, galaxies and quasars, dark matter, and the formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a multiverse.
Class Format: lecture/discussion, three hours per week
Requirements/Evaluation: two midterm exams, a small observing portfolio, occasional quizzes, and a final exam
Prerequisites: none
Enrollment Limit: 48
Enrollment Preferences: open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors; preference given to seniors
Expected Class Size: 25
Grading: yes pass/fail option, no fifth course option
Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors
Distributions: (D3)
Not offered current academic year

ASTR 402  (S) Between the Stars: The Interstellar Medium  (QFR)
The matter between the stars--the interstellar medium--tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to
measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

**Class Format:** Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.

**Requirements/Evaluation:** weekly problem sets, 10-page final paper, and observing projects

**Prerequisites:** ASTR 111 and PHYS 201 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** juniors and seniors

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

Spring 2025

**TUT Section:** T1 TBA Anne Jaskot

**ASTR 404 (S) Unsolved Problems in Galaxy Evolution**

In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.

**Requirements/Evaluation:** student's papers, responses to the partner's papers, and problem sets

**Prerequisites:** ASTR 111 and PHYS 142 or 151 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Juniors and Seniors

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**Not offered current academic year**

**ASTR 410 (S) Compact Stellar Remnants: White Dwarfs, Neutron Stars and Black Holes**

A star is a very interesting, very complicated physical object. Properties of stars and their evolutionary paths depend on an intricate interplay of different physical phenomena with gravity, nuclear interactions, radiation processes and even quantum and relativistic effects playing important roles. Using basic physics we will construct simple models of stars and discuss their evolution, concentrating on the key physical processes that play the dominant role at different evolutionary stages. We will discuss late stages of stellar evolution and concentrate on the basic properties of three possible remnants: white dwarfs, neutron stars and black holes. Radio and X-ray pulsars, supernovae including Type Ia and Gamma Ray Bursts will be discussed as well as observational confirmation of existence of black holes. We will explore extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences. We will also discuss the recent exciting detection of gravitational waves by the LIGO/VIRGO laser interferometric detectors.

**Class Format:** discussion three hours per week

**Requirements/Evaluation:** classroom participation, homework assignments, a midterm exam and a final exam
**Prerequisites:** PHYS 201 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** physics, astrophysics, and astronomy majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

Not offered current academic year

**ASTR 413 (F) Building Stars: A Physical Model of Stellar Structure (QFR)**

How does the Sun shine? How does the Sun evolve with time? What physical processes determine the power output of the Sun? In this course we will explore our modern understanding of how stars work, and why they have a range of sizes, temperatures, and luminosities. As we go, we will discuss the laws of physics at work in our Sun and other stars. Over the course of the semester, we will build a working computer model of the Sun using the basic laws of nuclear fusion, radiative transfer, thermal mechanics, and hydrostatic equilibrium.

**Class Format:** Lectures will include time for computer programming work

**Requirements/Evaluation:** weekly problem sets, weekly coding homework assignments, two mid-term exams, and a final project

**Prerequisites:** PHYS 142 or 151, any prior class that makes use of programming, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Astronomy, Astrophysics, or Physics majors, with first preference to Astronomy or Astrophysics majors

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** In this course, students will use differential equations and numerical coding techniques to test and explore the relationships between physical laws using the Sun and other stars as examples. They will make quantitative comparisons between their calculations and observed stellar properties.

Winter Study ---------------------------------------------------------

ASTR 16 (W) An infinity of worlds: planets and the search for life in the universe
Less than a generation ago, we wondered, as we had for millions of years before, whether there were any other planets at all. Now, we are privileged to be in the first generation of humans to know that many of the points of light dusting our night sky are host to orbiting worlds, some of which may be like our Earth. In this course, we will explore the techniques that are being used to discover these new worlds. We will make our own contributions to this great age of discovery, by using NASA spacecraft data to search for new planets. This course, aimed at non-majors, will deal with the science of planet hunting, the astounding diversity of planets known to exist, the emerging science of astrobiology, and the enduring question of "are we alone?" through works of science fiction and cutting-edge research. Coursework will consist of readings from popular science books aimed at a general audience, science-fiction short stories, and excerpts from science-fiction novels, in addition to 1-2 relevant feature films. The primary mode of instruction will be 6 hours per week of in-person class meetings including lectures, small-group activities, and optional evening observing sessions at the rooftop telescope (weather permitting). Evaluation will be based on a final 10-page paper, the topic and format of which is extremely broad.
Requirements/Evaluation: Paper(s) or report(s)
Prerequisites: None
Enrollment Limit: 24
Enrollment Preferences: If overenrolled, preference will be given to first years and sophomores. I am willing to open a second section if enrolment
Expected Class Size: NA
Grading: pass/fail only

Unit Notes: Rob Wittenmyer '98 is Professor of astrophysics at the University of Southern Queensland in Australia. He is a veteran planet hunter with more than 100 published planet discoveries.

Materials/Lab Fee: $75
Attributes: STUX Winter Study Student Exploration

Not offered current academic year

Advisory Committee

- Lois M. Banta, Halvorsen Professor for Distinguished Teaching and Research of Biology
- Pei-Wen Chen, Associate Professor of Biology
- Amy Gehring, Philip and Dorothy Schein Professor of Chemistry, Director of the Science Center
- Katie M. Hart, Assistant Professor of Chemistry
- Tim J. Lebestky, Associate Professor of Biology, Chair of Neuroscience Program; affiliated with: Biology, Neuroscience
- David W. Loehlin, Assistant Professor of Biology
- Luana S. Maroja, Professor of Biology, Chair of Biochemistry & Molecular Biology Program; affiliated with: Biology, BIMO (Biochemistry and Molecular Biology)
- Robert M. Savage, Chair of Biology and Charles L. MacMillan Professor in Natural Sciences
- Steven J. Swoap, Howard B. Schow ’50 and Nan W. Schow Professor of Biology
- Claire S. Ting, Professor of Biology
- Damian Turner, Assistant Professor of Biology

Biochemistry and molecular biology are dynamic fields that lie at the forefront of science. Through elucidation of the structure and function of biologically important molecules (such as nucleic acids, lipids, proteins, and carbohydrates) these disciplines have provided important insights and advances in the fields of molecular engineering (recombinant DNA technology, “intelligent” drug design, “in vitro evolution”), genomics and proteomics, signal transduction, immunology, developmental biology, and evolution.

The Biochemistry and Molecular Biology Program is designed to provide students with an opportunity to explore living systems in molecular terms. Biochemistry and molecular biology are at the interface between the chemical and biological methods of looking at nature; therefore, the program draws heavily from these disciplines. While chemistry is concerned with the relationship between molecular structure and reactions, and biology focuses on cells and organisms, biochemistry and molecular biology probe the details of the structures and interactions of molecules in living systems in order to provide the foundation for a better understanding of biological molecules both individually and as members of more complex structures.

PROGRAM

While aspects of biochemistry and molecular biology can be very diverse, a common set of chemical and biological principles underlie the more advanced topics. With this in mind, the program has been structured to provide the necessary background in chemistry and biology and the opportunity to study the many facets of the modern areas of the biochemical sciences. Students interested in the Biochemistry and Molecular Biology Program should plan their course selection carefully. Since it is expected that Biochemistry 321 and 322 would be taken in the junior year, students are advised to take the prerequisites for those courses in both chemistry and biology during their first two years at Williams. While the program is open to all students, it is expected that it will appeal primarily to majors in biology and chemistry because of the number of courses required in those fields. In addition to taking the required courses, students planning to complete the Biochemistry and Molecular Biology Program are strongly encouraged to elect courses in mathematics and physics.

The following interdepartmental courses serve as the core of the Biochemistry and Molecular Biology Program. BIMO 321 and 322 provide a comprehensive introduction to biochemistry. BIMO 401, the capstone course for the concentration, provides students the opportunity to examine the current scientific literature in a wide variety of BIMO-related research areas.

To complete the concentration in Biochemistry and Molecular Biology, a student must complete all of the required courses listed below, take at least one elective in biology and one elective in chemistry from the list below, and attend at least eight Biology and/or Chemistry Department colloquia. Since the Chemistry Department counts two biology courses and the Biology Department counts two chemistry courses toward the majors (each of which can be completed with only eight other courses), a student majoring in either chemistry or biology would have to take only two or three additional courses to complete the program.

Required Courses

BIMO 321 / BIOL 321 / CHEM 321(F) LEC Biochemistry I: Structure and Function of Biological Molecules
Taught by: B. Thuronyi
Elective Courses

Students can check with the program chair to see if other courses not listed here might count as electives.

**Biology Courses**

**Biology 303 (Fall) Lecture**
Taught by: Cynthia Holland

**Biology 305 (Spring) Lecture**
Taught by: TBA

**Biology 308 (Fall) Lecture**
Taught by: Claire Ting

**Biology 312 / Neuroscience 312 Lecture**
Taught by: Heather Williams

**Biology 313 Lecture**
Taught by: Damian Turner

**Biology 315 (Spring) Lecture**
Taught by: Lois Banta

**Biology 319 / Chemistry 319 / Computer Science 319 / Mathematics 319 / Physics 319 Seminar**
Integrative Bioinformatics, Genomics, and Proteomics Lab
Taught by: Lois Banta

**Biology 326 Lecture**
Cellular Assembly and Movement
Taught by: Pei-Wen Chen

**Biology 330 Lecture**
Genomes: Structure, Function, Evolution
Taught by: David Loehlin

**Biology 407 / Neuroscience 347 Seminar**
Neurobiology of Emotion
Taught by: Tim Lebestky

**Biology 408 (Spring) Seminar**
RNA Worlds
Taught by: David Loehlin
Colloquium Requirement

Concentrators must attend at least eight Biology and/or Chemistry Department colloquia. The Biology and Chemistry Departments hold colloquia on Friday afternoons during the fall and spring semesters. Scientists from other academic or research institutions are invited to present their research to students and faculty. There are approximately a dozen colloquium offered each semester among which BIMO concentrators may choose. Attendance at the honors student research presentations and the Biology/BIMO Alumni Reunion poster session also count toward the colloquium requirement. Concentrators may receive credit for colloquia attended during any of their semesters at Williams College.

BIMO 321 (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: BIOL 321 / CHEM 321

Primary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports
Prerequisites: BIOL 101, CHEM 200 and CHEM 201; or either CHEM 155 or 256 and CHEM 251

Enrollment Limit: 12/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 36

Grading: no pass/fail option, no fifth course option

Unit Notes: Cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 321(D3) BIMO 321(D3) CHEM 321(D3)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

Attributes: BIGP Courses BIMO Required Courses

Fall 2024

LEC Section: 01 MWF 10:00 am - 10:50 am B Thuronyi
LAB Section: 02 T 1:00 pm - 5:00 pm
LAB Section: 03 W 1:00 pm - 5:00 pm
LAB Section: 04 R 1:00 pm - 5:00 pm

BIMO 322 (S) Biochemistry II: Metabolism (QFR)

Cross-listings: CHEM 322 / BIOL 322

Primary Cross-listing
This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: Lecture three hours per week and laboratory three hours per week.

Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

Prerequisites: BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor

Enrollment Limit: 48

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIMO 322(D3) CHEM 322(D3) BIOL 322(D3)

Quantitative/Formal Reasoning Notes: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

Attributes: BIGP Courses BIMO Required Courses

Spring 2025
BIMO 401 (S) Topics in Biochemistry and Molecular Biology (WS)
This seminar course involves critical reading, analysis, and discussion of papers from the current biochemistry and molecular biology literature. Specific topics vary from year to year but are chosen to illustrate the importance of a wide range of both biological and chemical approaches to addressing important questions in the biochemical and molecular biological fields. To facilitate discussion, students will prepare written critiques analyzing the data and conclusions of the chosen literature.

Class Format: three hours per week

Requirements/Evaluation: class presentations and discussion, frequent short papers, and a final paper

Prerequisites: BIOL 202 and BIMO 321

Enrollment Limit: 12

Enrollment Preferences: those completing the BIMO concentration; open to others with permission of instructor

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: The critical analysis of published papers in the biochem literature, as expressed in clear and succinct writing, is a key learning goal for the course. The students write seven literature critiques (typically 5-6 pages long) throughout the semester. While the specific topic each week differs, the parameters of the assignment are the same each time, allowing students to progressively improve their writing. I provide extensive written feedback on each critique, returned before the next due date

Attributes: BIMO Required Courses

Winter Study 佛山

BIMO 99 (W) Independent Study: Biochemistry and Molecular Biology
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
Bioinformatics, genomics, and proteomics are rapidly advancing fields that integrate the tools and knowledge from biology, chemistry, computer science, mathematics, physics, and statistics in research at the intersection of the biological and informational sciences. Inspired by the enormous amount of biological data that are being generated from the sequencing of genomes, these new fields will help us pose and answer biological questions that have long been considered too complex to address. Research in genomics, proteomics, and bioinformatics will also significantly impact society affecting medicine, culture, economics, and politics.

The Bioinformatics, Genomics, and Proteomics curriculum involves faculty from the Biology, Chemistry, Computer Science, Mathematics/Statistics, and Physics departments and was designed to provide students with an understanding of these revolutionary new areas of investigation. Students interested in graduate work in bioinformatics, genomics, and proteomics should take the BiGP courses and their prerequisites. Interested students are also encouraged to participate in independent research with members of the advisory faculty as they explore the development of these new fields.
The Biology curriculum has been designed to provide students with a broad base for understanding principles governing life processes at all levels, from biochemistry and cell biology to physiology to ecology and behavior. Courses emphasize fundamentals common to all sub-disciplines including the coupling of structure to function, the transfer of energy in living systems, communication, and the molding of diversity by the evolutionary process. In upper-level courses and in independent and honors research, students have the opportunity to investigate areas at the frontiers of modern biology.

Although the Biology major is specifically designed to provide a balanced curriculum in the broader context of the liberal arts, it is also excellent preparation for graduate studies in the life sciences and in the health professions.

MAJOR REQUIREMENTS

In order to make the major accessible to students with diverse interests, required courses are kept to a minimum. The Biology major is satisfied by nine courses, as follows:

BIOL 101 The Cell
BIOL 102 The Organism

Any two 200-level electives with labs in which at least one faculty member is a member of the Williams College Biology Department. (Tutorials may not be used to fulfill this requirement.)

Any two 300-level electives. (Both of these must have an associated lab component).

Any one 400-level seminar course. (Honors thesis BIOL 493-494 do not fulfill this requirement).
Any two more courses which can be at the 200-, 300- or 400-level, OR one such course plus two semesters of Organic Chemistry (CHEM 156 and 251) OR General Chemistry II and Organic Chemistry I (CHEM 200 and 201).

Note: Independent study courses and AMS 311 (same as Biology 231) do not fulfill the 300-level or 400-level course requirements. WIOX 316 Biology: Evolution, in the Williams Oxford Program qualifies for major credit at the 200-level.

COURSE SELECTION AND PLACEMENT

It is preferable for students who plan to major in biology, or think they may be interested in doing so, to take Biology 101, 102 during their first year at Williams. It is also possible to begin the Biology major during the sophomore year, although students should understand that it may require taking two or more biology courses during several semesters.

Students interested in biology, whether or not they intend to major in it, are encouraged to take Biology 101, 102. It is also possible, with permission of the instructor, to take Biology 203 Ecology, Biology 204 Animal Behavior and Biology 220 Field Botany without prerequisite. Other 100-level biology courses are designed specifically for students who do not intend to take additional upper-level courses in biology. All of these courses satisfy the Division III distribution requirement.

It is recommended beginning students enroll in Biology 101 and 102 in sequence. Students may take Biology 102 prior to taking Biology 101, but both must be completed to major in Biology. Students with unusually strong backgrounds in biology, such as those with outstanding performance on the College Board Biology Advanced Placement Test, may be permitted to elect a sophomore-level course in lieu of Biology 101 and/or Biology 102 upon successful completion of a departmental qualifying exam, administered during First Days.

The Biology Department encourages majors to have breadth in their course selections. Biology encompasses a wide spectrum of disciplines and uses different methodologies to approach research questions. Yet advances in each discipline of biology increasingly inform thinking throughout the field. We encourage biology majors to gain exposure to diverse conceptual frameworks and methodologies through their choice of courses.

COURSES RELATED TO THE BIOLOGY MAJOR

Students planning to pursue their interest in biology and related fields after completing their undergraduate degrees are strongly encouraged to take one year of chemistry, at least one semester of mathematics (a course in statistics is recommended), and one semester of physics. Students may wish to check the requirements for graduate admission at relevant universities, and are also encouraged to consult with the Biology Department’s graduate school advisor about prerequisites for admission to graduate programs.

BIOCHEMISTRY AND MOLECULAR BIOLOGY

Students interested in Biochemistry and Molecular Biology (BIMO) should consult the general statement under Biochemistry and Molecular Biology.

BIOINFORMATICS, GENOMICS AND PROTEOMICS

Students interested in Bioinformatics, Genomics and Proteomics (BiGP) should consult the general statement under Bioinformatics, Genomics and Proteomics. Biology majors interested in this field are strongly encouraged to enroll in Integrative Bioinformatics, Genomics, and Proteomics (Biology 319).

NEUROSCIENCE

Students interested in Neuroscience (NSCI) should consult the general statement under Neuroscience.

PUBLIC HEALTH

Students interested in Public Health (PH) should consult the general statement under Public Health.

ENVIRONMENTAL STUDIES

Students interested in Environmental Studies (ENVI) should consult with Biology faculty members associated with the program and the general statement under Environmental Studies.

THE DEGREE WITH HONORS IN BIOLOGY

In order to be recommended for the degree with honors, a Biology major is normally expected to have completed the equivalent of two semesters and a winter study (031) of independent research culminating in a thesis which demonstrates outstanding achievement of an original and innovative nature. Although the presentation of a thesis and associated oral presentation in the fall and poster defense in the spring are required for consideration for a degree with honors, their completion should not be interpreted as a guarantee of a degree with honors. The principal considerations in admitting a student to the program of independent honors research will be mastery of fundamental material and skills, ability to pursue independent study successfully, and demonstrated interest and motivation. Students interested in participating in the honors program should consult with the department early in the winter study semester of the junior year; approval must be received before spring registration in the junior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in her/his lab vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory.
The minimum course requirements for a degree with honors in Biology are Biology 101, Biology 102, two 200-level biology courses with labs, two 300-level biology courses (each of which must have a laboratory associated with it), one 400-level biology course, Biology 493, Biology 494, WSP 031, and any other two courses in biology (or any other one course and two semesters of Chemistry: Chemistry 200/201 or Chemistry 156/251). Note: A student who has a double major cannot count any course twice. For example, if a student is a Biology and Chemistry major, Organic Chemistry can only be counted in one of the two majors.

In addition to the normal honors route, which includes two semesters (Biology 493-494) and a winter study of research (WSP 031) during senior year, students have the option, subject to the approval of their thesis advisor, to begin the honors research during winter study junior year or during the second semester junior year. In general, thesis students who start during WSP or spring semester of their junior year are working on a project that requires winter or spring field work. Students beginning honors in winter study of junior year would take Biology 494 in the spring of their junior year followed by Biology 493 in the fall of their senior year; students beginning honors during the second semester of junior year would take Biology 494 that semester, followed by Biology 493 in the fall of senior year and winter study research in the winter of the senior year.

STUDY ABROAD

Students planning on majoring in Biology are strongly advised to take Biology 202 and/or Biology 203 and/or Biology 212 before going abroad, since these courses are prerequisites for many upper-level courses. Biology majors studying abroad may receive credit toward the major for at most two 200-level electives. Students should meet with the Department’s study abroad advisor to discuss study abroad options.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. We usually want to see a syllabus.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, ideally complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Only two of the nine major course credits can be taken somewhere other than Williams.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Courses taken for major credit anywhere other than Williams will only count as 200-level elective credit, regardless of the level or format of the course.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Two 200-level lab courses, 300-level lab courses, and 400-level senior seminar.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Biology 202, Biology 203 and Biology 212 are only offered in the fall. Those late to the major need to be aware of this as these courses are prerequisites for most upper division courses.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

Courses that are focused on clinical areas of study, and courses in environmental studies that focus on policy or sociology rather than biology, would not be granted credit in biology.

CREDIT FOR COURSES AT OTHER INSTITUTIONS

Students who enroll in study away programs may receive credit for up to two 200-level electives towards the biology major. Courses must be pre-approved by the Biology Department Study Away Advisor.

Students wishing to satisfy prerequisites for courses offered by the Biology Department with courses taken at other institutions should consult, in person, with a member of the Biology Department, prior to registering for the course that requires a prerequisite. Such consultations will include a review of the course syllabi and the transcripts of the relevant previous college work, and students should bring these materials with them.

RESEARCH AND THESIS COURSES

Individual research projects must be approved by the department. Application should be made to the department prior to spring registration.
BIOL 100  (W)  Biology of Exercise and Nutrition
This class, intended for the non-scientist, focuses on the impact of exercise and nutrition on the human body. We will discuss topics such as how different types of training influence exercise performance; the changes that occur in the cardiovascular system during an exercise routine; an examination of the inherent limits of the body to perform aerobic and anaerobic tasks; and long-term health consequences of a lifetime of activity or inactivity. We will also examine how nutrition and metabolism affect body composition. For example, we will rigorously and scientifically scrutinize the use of "fad" diets as a means to lose weight.

Class Format: Daily 10:15am-noon and 1:30-3:30pm
Requirements/Evaluation: Two examinations will make up 1/2 of the grade, with the other 1/2 of the grade from laboratory assignments. Laboratory assignments include pre-lab questions and post-lab data analysis.
Prerequisites: Permission of a dean.
Enrollment Limit: 15
Enrollment Preferences: students who need to make up a deficiency
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both BIOL 100 and BIOL 41.

BIOL 101  (F)  The Cell
This course investigates cell structure and function as a consequence of evolutionary processes, and it stresses the dynamic properties of living systems. Topics include an introduction to biological molecules and enzyme action, membrane structure and function, energy exchange and design of metabolic systems, expression of genetic information, protein trafficking, cell signaling, the cell cycle, and cancer. Student-designed laboratory experiments and discussions based on primary biology literature will highlight how biological knowledge is created and understood.

Class Format: 3 hours of lecture per week and one laboratory/discussion per week (3 hours).
Requirements/Evaluation: Exams, lab reports, discussion assignments, and discussion participation
Prerequisites: none
Enrollment Limit: 45/lecture
Enrollment Preferences: first-year students
Expected Class Size: 180
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Attributes: BIMO Required Courses NSCI Required Courses

LAB Section: 06   T 1:00 pm - 3:50 pm   Janis E. Bravo
BIOL 102  (S)  The Organism
This course focuses upon the developmental and evolutionary processes that have given rise to a wide diversity of multicellular organisms. We consider many levels of biological organization, from molecular and cellular to individuals and populations in our examination of evolutionary concepts. Topics include meiosis and sexual reproduction, developmental and evolutionary mechanisms, and speciation with representative examples from a diversity of plants and animals. Readings are drawn from a variety of sources, including the recent primary literature. Although BIOL 101 is not a prerequisite for BIOL 102, students are expected to have basic knowledge of the cell and cellular processes, including: the structure and function of the cell, nucleic acids and proteins; as well as mechanisms of transcription, translation, and the regulation of genes.

BIOL 134  (F)  The Tropics: Biology and Social Issues  (DPE)

Cross-listings: CAOS 134

Primary Cross-listing

Biology and Social Issues of the Tropics explores the biological dimensions of social and environmental issues in tropical societies, focusing specifically on the tropics of Africa, Asia, Latin America, Oceania, and the Caribbean. Social issues are inextricably bound to human ecologies and their environmental settings. Each section of the course provides the science behind the issues and ends with options for possible solutions, which are debated by the class. The course highlights differences between the tropics and areas at higher latitudes while also emphasizing global interconnectedness. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing biodiversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment, and global climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social and environmental issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam

Prerequisites: none

Enrollment Limit: 62

Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

Expected Class Size: 62

Grading: no pass/fail option, no fifth course option

Unit Notes: Does not count for credit in the Biology major.

Distributions: (D3)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134(D3) CAOS 134(D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference—different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

Attributes: ENVI Natural World Electives  GBST African Studies  PHLH Biomedical Determinants of Health  

Not offered current academic year

BIOL 135  (F)  Evolution as Fact and Theory
This course examines evolution as a science and its current and historical importance. Lectures focus on the evidence for evolution, the main evolutionary forces (natural selection and others) and the diversification processes that generate biodiversity. We will also explore recent evolutionary trends and discussions such as human evolution, heritability, personalized genomics, antibiotic and pesticide resistance, climate change, and the conflict between creationists and evolutionists. The course has a required day trip to the American Museum of Natural History in NYC.

Requirements/Evaluation: exams, panel discussion, short papers and participation

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: Non biology majors, 1st year students

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Unit Notes: may not be taken as credit towards the Biology major; not open to students who took BIOL 305

Distributions: (D3)

Not offered current academic year

BIOL 202  (F)  Genetics  (QFR)

Genetics, classically defined as the study of heredity, is today a multidisciplinary field whose principles provide critical insight and tools to most areas of biology and medicine. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. A primary focus of the course is on students developing familiarity with problem solving, the logic and quantitative reasoning required to understand how genetic mechanisms lead to biological patterns. The laboratory part of the course provides an experimental introduction to modern genetic analysis as well as introductions to interpreting genetic reasoning in the primary research literature. Laboratory experiments include investigating chromosome structure using microscopy, mapping a mutation to the genome by integrating multiple streams of evidence, and determining the structure of a DNA plasmid using molecular tools.

Class Format: Lecture: three hours per week, Lab: three hours per week.

Requirements/Evaluation: bi-weekly problem sets; weekly laboratory exercises and laboratory reports; three exams

Prerequisites: BIOL 101 and 102

Enrollment Limit: 120

Enrollment Preferences: students interested in the Biology major

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course develops quantitative skills through solving problems. Students learn to apply basic calculations and logic to predict the outcomes of biological systems, for example, describing the likelihood that an individual will be affected by an inherited disease. Application of quantitative and logical analysis contributes to a large component of the in-class work and the graded material for the class, in the form of problem sets, exams, and data analysis for lab reports.

BIOL 203  (F)  Ecology  (QFR)

Cross-listings: ENVI 203
Primary Cross-listing

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 203(D3) ENVI 203(D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to linear models, multidimensional data analysis and contingency tables.

BIOL 204 (S) Animal Behavior

Making sense of what we see while watching animals closely is both an enthralling pastime and a discipline that draws on many aspects of biology. Explanations can be found on many levels: evolutionary theory tells us why certain patterns have come to exist, molecular biology can help us understand how those patterns are implemented, neuroscience gives insights as to how the world appears to the behaving animal, endocrinology provides information on how suites of behaviors are regulated. The first part of the course focuses upon how descriptive studies provide the basis for formulating questions about behavior as well as the statistical methods used to evaluate the answers to these questions. We then consider the behavior of individuals, both as it is mediated by biological mechanisms and as it appears from an evolutionary perspective. The second half of the course is primarily concerned with the behaviors of groups of animals, concentrating upon the selection pressures that drive animals toward a particular social system.

Class Format: six hours per week

Requirements/Evaluation: quizzes, exams, and lab reports

Prerequisites: BIOL 102, or PSYC 101, or permission of instructor

Enrollment Limit: 32

Enrollment Preferences: Biology majors and Neuroscience concentrators

Expected Class Size: 32

Grading: yes pass/fail option, no fifth course option

Spring 2025
BIOL 205  (S)  Physiology
This course explores animal physiology—the principles and mechanisms by which animals live and function. Across the semester we will survey a variety of physiological processes including intracellular communication, animal movement, circulation, gas exchange, ion/water balance, digestion and metabolism, and thermoregulation. We will explore these topics from the level of cells and tissues to the whole organism, surveying a wide variety of animals with a focus on vertebrates. Laboratories provide practical experience in the experimental measurement and analysis of physiological parameters in animal models and in human subjects.

Requirements/Evaluation: Daily practice problems, problem sets, midterm exams, laboratory exercises, and a final exam
Prerequisites: BIOL 101; open to first-year students only with permission of instructor
Enrollment Limit: 72
Enrollment Preferences: Seniors, then juniors, then sophomores.
Expected Class Size: 72
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

BIOL 206  (S)  Marine Biology
The oceans impact almost all life and processes on Earth. In this course we will explore the astounding diversity of life in the world's oceans, from the smallest photosynthetic microbes on the planet to the largest animals that weigh almost 200 tons. Using an integrative approach that spans from the molecular to the organismal to the ecological levels, we will focus on the biology of marine organisms, and their interactions and interrelationships. Topics including primary production, reproduction, acclimation to stresses, adaptation, and evolution will be discussed in the context of environments such as the open oceans, coastal waters, rocky intertidal zones, coral reefs, and the deep sea. We will emphasize how recent scientific advances have revolutionized our understanding of marine organisms and explore solutions to global challenges, including climate change and ocean acidification, pollution, sustainable fishing and aquaculture, and habitat conservation.

Requirements/Evaluation: two exams, one two-page research paper, one final project with a three-page written component and an oral presentation component, participation in discussions, laboratory assignments
Prerequisites: Biology 101 and Biology 102, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: Biology majors: seniors who need a second 200-level course for the major, and then juniors who need a second 200-level course for the major
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D3)

BIOL 209  (F)  Animal Communication  (WS)
Cross-listings: NSCI 209
Animal communication systems come in as many varieties as the species that use them. What they have in common are a sender that encodes information into a physical signal and a receiver that senses the signal, extracts the information, and adjusts its subsequent behavior accordingly. This tutorial will consider all aspects of communication, using different animal systems to explore different aspects of the biology of signaling. Topics will include the use of syntax to carry meaning in chickadee calls, synchronous signaling by fireflies, gestural communication by primates, long-distance chemical attractants that allow male moths to find the object of their desire, and cultural evolution within learned signaling systems.

Requirements/Evaluation: evaluation will be based on five 5-page papers, five short response papers, and the student's effectiveness in tutorial discussions.

Prerequisites: BIOL 101 and 102; open to sophomores, juniors, and seniors

Enrollment Limit: 10

Enrollment Preferences: Biology majors and Neuroscience concentrators who need a Biology elective to complete the concentration; then sophomores.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

NSCI 209(D3) BIOL 209(D3)

Writing Skills Notes: This course is a tutorial, and each student will write five position papers and five response papers. Extensive feedback will be provided; students will be required to rewrite one position paper, and may rewrite any of them.

BIOL 211 (S) Paleobiology

Cross-listings: GEOS 212

Secondary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: One day field trip to the the Paleozoic of New York State

Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final research project presented in poster form.

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 24

Enrollment Preferences: sophomores, and junior GEOS majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)
BIOL 212 (F) Neuroscience

Cross-listings: NSCI 201 / PSYC 212

Secondary Cross-listing

This course is designed to give an overview of the field of neuroscience progressing from a molecular level onwards to individual neurons, neural circuits, and ultimately regulated output behaviors of the nervous system. Topics include a survey of the structure and function of the nervous system, basic neurophysiology and neurochemistry, development, learning and memory, sensory and motor systems, and clinical disorders. Throughout the course, many examples from current research in neuroscience are used to illustrate the concepts being considered. The lab portion of the course will emphasize a) practical hands-on exercises that amplify the material presented in class; b) interpreting and analyzing data; c) presenting the results in written form and placing them in the context of published work; and d) reading and critiquing scientific papers.

Requirements/Evaluation: Evaluation will be based on participation in discussion groups, exercises, problem sets and quizzes performed in small groups, lab reports, midterm exams, and a final exam.

Prerequisites: PSYC 101 or BIOL 101; open to first-year students only with permission of instructor

Enrollment Limit: 72

Enrollment Preferences: Sophomores and Biology and Psychology majors

Expected Class Size: 72

Grading: yes pass/fail option, no fifth course option

BIOL 220 (S) Field Botany and Plant Natural History

Cross-listings: ENVI 220

Primary Cross-listing

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, the cultural and economic uses of plants and how plants shape our world. The course covers the role of plants in ameliorating global climate change, their importance in contributing to sustainable food production and providing solutions to pressing environmental problems. Throughout we emphasize the critical role of biodiversity and its conservation. The labs cover field identification, natural history and the ecology of local species.

Class Format: both field and indoor laboratories

Requirements/Evaluation: Based on two hour exams, field quizzes, a final project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 24
**Biological Anthropology**

**Course Title:** Biological Anthropology

**Course Code:** BIOL 231

**Course Description:** This course is an introduction to the field of biological anthropology, which explores the biological basis of human diversity and its relationship to human societies. The course covers topics such as human evolution, biological variation, and cultural diversity. Students will gain an understanding of the principles of biological anthropology and how they are applied to understand human societies.

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

**Materials/Lab Fee:** There is a charge for the lab manual ($25); the sketchbook ($7) and hand lens ($23) can be self-provided or purchased from the department.

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**BIOL 231 (F)(S) Marine Ecology**

**Cross-listings:** CAOS 311

**Secondary Cross-listing**

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

**Class Format:** including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** none

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course is only offered through Williams-Mystic Coastal and Ocean Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

BIOL 303 (F) Pharmacology
Pharmacology explores how molecules interact with biological systems to elicit a response. Roughly half of modern medicines are derived from metabolites with origins in nature, including drugs used to treat cancers and heart disease. In this course, we will consider these natural origins from plant, microbial, and animal sources, as well as how and why organisms synthesize these molecules. We will follow the path of molecules from biosynthesis in one organism to ingestion by another, to interactions with proteins in the body, to metabolism, and ultimately to excretion. Close examination of the molecular interactions between metabolites and proteins will allow us to explore how metabolite binding alters protein function and how genetic variation impacts bioactivity. In the first half of the semester, laboratory experiments will investigate caffeine metabolism using in vitro pharmacokinetic assays and protein structure analysis; these experiments lead up to a multi-week independent project in the second half of the semester. Readings for the lecture will come from the primary literature.

Class Format: Three hours of lecture; three hours of lab with the possibility of occasional experiments outside of the scheduled lab time.
Requirements/Evaluation: Three exams, short response papers based on in-class paper discussions, a lab notebook, a lab report based on an independent project, and an oral presentation.
Prerequisites: BIOL 202 or any two 200-level Biology courses
Enrollment Limit: 20
Enrollment Preferences: senior and then junior Biology majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
BIOL 305 (S) Evolution (QFR)
This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and adaptation). Topics include micro-evolutionary models, natural and sexual selection, speciation, the inference of evolutionary history, evolutionary medicine among others.

Requirements/Evaluation: independent research project, problem sets, participation in discussions and exams

Prerequisites: BIOL 102 and one 200 level BIOL course

Enrollment Limit: 24

Enrollment Preferences: Seniors and biology majors

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: We will use mathematical models to study population genetics.

LAB Section: 03 Cancelled

BIOL 308 (F) Integrative Plant Biology: Fundamentals and New Frontiers
Plants are one of the most successful groups of organisms on Earth and have a profound impact on all life. Successful use of plants in addressing global problems and understanding their role in natural ecosystems depends on fundamental knowledge of the molecular mechanisms by which they grow, develop, and respond to their environment. This course will examine the molecular physiology of plants using an integrative approach that considers plants as dynamic, functional units in their environment. Major emphasis will be on understanding fundamental plant processes, such as photosynthesis, growth and development, water transport, hormone physiology, and flowering, from the molecular to the organismal level. Environmental effects on these processes will be addressed in topics including photomorphogenesis, stress physiology, mineral nutrition, and plant-microbe interactions. Discussions of original research papers will examine the mechanisms plants use to perform these processes and explore advances in the genetic engineering of plants for agricultural, environmental, and medical purposes. Laboratory activities stress modern approaches and techniques used in investigating plant physiological processes.

Class Format: six hours per week

Requirements/Evaluation: short papers, lab reports and exams

Prerequisites: BIOL 101 and BIOL 102, or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: Biology majors

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)
BIOL 312 (F) Sensory Biology

Cross-listings: NSCI 312

Primary Cross-listing

How do animals sense properties of the physical world? How do they convert physical or chemical energy to a signal within a cell that carries information? How is that information represented? What are the limits on what can be sensed? We will look for answers to these questions by investigating the molecular and cellular mechanisms of sensory transduction and how these mechanisms constrain the types of information that the nervous system encodes and processes. We will also ask how natural selection shapes the type of sensory information that animals extract from the world, and what adaptations allow some species to have "special" senses. Some of the examples we will consider are: bat echolocation (hair cells in the ear), detecting visual motion (amacrine cells in the mammalian retina), the constant reshaping of the olfactory system (chemical mapping of odors), what makes a touch stimulus noxious, and enhanced color vision (in birds, bees, and shrimp). Laboratory exercises will focus on the nematode C. elegans, an important model system, to explore and extend how we understand touch, temperature sensation, chemosensation, and light sensation.

Requirements/Evaluation: Four take-home exams, an independent group research project (proposal, followed by results/discussion), presentation about a non-standard sensory system, many short online quizzes, and lab + class participation.

Prerequisites: BIOL 101 and either BIOL 212/NSCI 201 or BIOL 205

Enrollment Limit: 24

Enrollment Preferences: Preference to senior Biology majors who need a 300-level course; then to senior Neuroscience concentrators who need a Group A elective; then to Biology majors. Not open to students who have taken Biology 213.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Primary Cross-listing

How does an animal experience its environment? What mechanisms allow an animal to select and generate behaviors? In this course we will use a comparative approach to examine how nervous systems have evolved to solve problems inherent to an animal’s natural environment. We will discuss how animals sense physical and chemical properties of their surroundings and convert this information to a signal encoded in their brain. We will explore how nervous systems of diverse species are adapted to extract sensory information that is relevant to their survival—such as sound, light, and smell. We will also examine how neural circuits control muscles to generate motor behaviors such as locomotion and vocalization and how sensory information is integrated to influence behavior. To highlight the discovery process, we will read and discuss primary research articles that complement course content. During labs we will use a variety of approaches such as electrophysiology, optogenetics, behavior, and data analysis to understand sensory and motor systems in several different organisms.

Requirements/Evaluation: Participation in class and lab, several take-home exams, independent group research project and presentation, and short written class and lab assignments.

Prerequisites: BIOL 212 or BIOL 205

Enrollment Limit: 24

Enrollment Preferences: Senior, then junior, Biology majors and NSCI concentrators who need a 300-level course or a NSCI elective

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

BIOL 315 (S) Microbiology: Diversity, Cellular Physiology, and Interactions

The Covid pandemic and the alarming spread of antibiotic resistant bacteria are but two of the reasons for the resurgence of interest in the biology of viruses and microorganisms. This course will examine microbes from the perspectives of cell structure and function, genomics, and evolution. A central theme will be the adaptation of bacteria as they evolve to fill specific ecological niches, with an emphasis on microbe: host interactions that lead to pathogenesis. We will consider communication among bacteria as well as between bacteria and their environment. Topics include: microbial development, population dynamics, metagenomics, bioremediation, plant and animal defenses against infection, and bacterial strategies to subvert the immune system. We will also discuss a few viral examples, including SARS-CoV2, in the context of pathogen-host co-evolution and the immune system. In the lab, major projects will focus on the mammalian gut microbiome and the isolation and characterization of bacteria from natural environments. The lab experience will culminate in multi-week independent investigations. Readings will be comprised primarily of articles from the primary literature.

Class Format: lectures three hours a week and laboratory three hours a week

Requirements/Evaluation: three exams/writing assignments, responses to thought questions on readings, a lab report/notebook, and an oral presentation

Prerequisites: BIOL 202 or 203

Enrollment Limit: 24

Enrollment Preferences: senior and then junior Biology majors

Expected Class Size: 24
BIOL 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)

**Cross-listings:** CHEM 319 / CSCI 319 / PHYS 319 / MATH 319

**Primary Cross-listing**

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** The lab for this course will meet for two afternoons per week. Some lab sessions will be shorter than 3 hours.

**Requirements/Evaluation:** lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors, then juniors, then sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

BIOL 319(D3) CHEM 319(D3) CSCI 319(D3) PHYS 319(D3) MATH 319(D3)

**Quantitative/Formal Reasoning Notes:** Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

**Attributes:** BIGP Courses BIMO Interdepartmental Electives

Not offered current academic year

BIOL 320 (S) Ecosystem ecology in the Anthropocene

**Cross-listings:** ENVI 320 / GEOS 320

**Primary Cross-listing**

Ecosystem ecology provides a framework for understanding the multidirectional interactions between biological organisms and their physical environments, and provides critical insight into our approaches for managing resource use in an era of anthropogenic change. In this class, we will explore the biological and biogeochemical underpinnings of ecosystem carbon and nutrient cycling. Topics will include interactions between species composition and ecosystem function, nutrient use efficiency, resource transformations, ecosystem management and restoration, and feedbacks to
global change. Lecture content will be supported by regular discussions of the primary literature. Labs will introduce students to field and laboratory techniques to study resource and energy flow in local ecosystems, as well as approaches to project design, hypothesis development, data collection, and analysis. The laboratory program will culminate with a multi-week independent project.

**Class Format:** lectures, discussions, and a weekly lab

**Requirements/Evaluation:** Evaluation will be based on lab assignments, discussion participation, three exams, and an independent project

**Prerequisites:** BIOL/ENVI 203 or GEOS 208 or BIOL 211 or GEOS 212

**Enrollment Limit:** 20

**Enrollment Preferences:** Biology majors, then Environmental studies majors/concentrators or Geosciences majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

*This course is cross-listed and the prefixes carry the following divisional credit:*

**BIOL 321 (F) Biochemistry I: Structure and Function of Biological Molecules** (QFR)

**Cross-listings:** BIMO 321 / CHEM 321

**Secondary Cross-listing**

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

**Class Format:** lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation:** quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

**Prerequisites:** BIOL 101, CHEM 200 and CHEM 201; or either CHEM 155 or 256 and CHEM 251

**Enrollment Limit:** 12/lab

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size:** 36

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Cannot be counted towards the Biology major in addition to BIOL 222

**Distributions:** (D3) (QFR)

*This course is cross-listed and the prefixes carry the following divisional credit:*

BIOL 321(D3) BIMO 321(D3) CHEM 321(D3)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

Fall 2024
**BIOL 322 (S) Biochemistry II: Metabolism (QFR)**

**Cross-listings:** BIMO 322 / CHEM 322

**Secondary Cross-listing**

This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

**Class Format:** Lecture three hours per week and laboratory three hours per week.

**Requirements/Evaluation:** several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

**Prerequisites:** BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor

**Enrollment Limit:** 48

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size:** 48

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** cannot be counted towards the Biology major in addition to BIOL 222

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIMO 322(D3) CHEM 322(D3) BIOL 322(D3)

**Quantitative/Formal Reasoning Notes:** The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

**BIOL 326 (S) Cellular Assembly and Movement**

This course will focus on how multi-protein complexes are assembled to control key cellular processes in eukaryotic systems: 1) protein sorting and trafficking, 2) establishment and maintenance of cell architecture, and 3) mitosis, cell migration and tissue morphogenesis that require coordination of the membrane transport and cytoskeleton. The course will highlight involvement of these processes in pathological conditions. Laboratories will use mammalian tissue culture as a model system to study cellular functions. Important techniques in cell biology will be introduced in the first half of the semester; in the second half of the term, students will conduct a multi-week independent project. Textbook readings will be supplemented with primary literature.

**Class Format:** lectures, three hours a week; laboratory, three hours a week. The laboratory projects will require additional time outside of class hours.
Requirements/Evaluation: three exams, in-class discussion of papers, lab reports, an oral presentation and research paper based on an independent lab research project

Prerequisites: BIOL 202 or BIOL 212 or BIOL 222

Enrollment Limit: 24

Enrollment Preferences: senior and junior Biology majors

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives

Not offered current academic year

BIOL 329 (F) Conservation Biology

Cross-listings: ENVI 339

Primary Cross-listing

Conservation Biology focuses on protection of the Earth's biodiversity. This course starts with an overview of biodiversity including patterns of species richness, causes of species loss (extinction), and the critical contributions of biodiversity to ecosystem function and human welfare. Then we analyze ways to conserve biodiversity at the genetic, population, species and community/ecosystem levels. Labs are field oriented, and focus on local New England communities and ecosystems. Labs emphasize knowing the dominant species in each system; they also stress how to collect and analyze the field data on ecological community structure and function that are critical to test hypotheses that relate to different conservation goals.

Class Format: lectures, discussions, and a weekly lab.

Requirements/Evaluation: Evaluation will be based on lab assignments and reports, discussion participation, two exams and an independent project.

Prerequisites: BIOL 203/ENVI 203 or BIOL 220 or BIOL 305 or permission of instructor.

Enrollment Limit: 24

Enrollment Preferences: Biology majors, Environmental Studies majors, seniors, and juniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 330 (S) Genomes: Structure, Function, Evolution

Genome sequencing technologies have opened the "book of life" to biologists. But making sense of genomes is still a work in progress. This course will examine central features of genomes, their evolution, and their contribution to human diseases such as cancer. Genome biology is a new field, and this presents the opportunity to learn science as it is being done. Biologists working today started out knowing nothing about core features of genomes, such as why most of the DNA is repetitive, or why segments of genes get removed in the RNA, or why silenced genes wake up in cancer cells. They began to find meaning by adopting dual perspectives of function and neutral evolution. Students will learn to walk these same paths and learn to evaluate for themselves what genome complexity means. In lab, students will develop hands-on and computational skills for investigating genome structural variation, then apply them in the second half of the semester in independent lab investigations.

Class Format: lectures, three hours a week; laboratory, three hours a week.

Requirements/Evaluation: Written responses to readings in primary literature; three take-home written exams; two laboratory reports; oral presentation of an independent laboratory project.

Prerequisites: BIOL 202

Enrollment Limit: 24
Enrollment Preferences: Biology majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the biology major.

Distributions: (D3)

Attributes: BIGP Courses BIMO Interdepartmental Electives

Not offered current academic year

**BIOL 337 (F) Evolutionary Ecology (QFR)**

Evolutionary ecology is an interdisciplinary field that integrates concepts in genetics, adaptation, and ecology to understand how evolution operates in the context of ecological communities. This course provides an overview of the discipline including foundational concepts in evolutionary demography, phenotypic plasticity, and population genetics. It also explores how breakthroughs in these topics provide a framework for advances in our understanding of the evolution of reproductive timing and ageing, interspecific interactions (e.g., competition, predation), cooperation, and altruism. The course combines lectures, readings, in-class discussion, and a lab section that includes a mixture of field, computer, and lab projects. Laboratories will give students practical, hands-on experience in how to develop, plan, and carry out evolutionary ecology research from start to finish.

Class Format: lecture, 3 hours per week; laboratory and discussion, 3 hours per week

Requirements/Evaluation: Evaluation will be based on lab assignments, two exams, discussion participation, and a written paper.

Prerequisites: BIOL 102, plus either BIOL 202 or BIOL 203 or equivalent

Enrollment Limit: 24

Enrollment Preferences: preference given to biology majors, seniors, and juniors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: Satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Evolutionary ecology uses concepts in genetics and ecology to understand how the frequency of alleles in a population changes over time. These changes are formalized in equations that describe these processes. Students will gain experience in utilizing these equations to describe, analyze, and predict the evolutionary outcome of ecological interactions for both theoretical and experimental purposes. Thus, the students will gain experience in solving systems of equations using algebra and in stat

Not offered current academic year

**BIOL 407 (S) Neurobiology of Emotion**

Cross-listings: NSCI 347

Primary Cross-listing

Emotion is influenced and governed by a number of neural circuits and substrates, and emotional states can be influenced by memory, cognition, and many external stimuli. We will read and discuss articles about mammalian neuroanatomy associated with emotion as defined by classic lesion studies, pharmacology, electrophysiology, fMRI imaging, knockout and optogenetic mouse studies, for investigating neural circuit function in order to gain an understanding of the central circuits and neurotransmitter systems that are implicated in emotional processing. We will focus initially on the neural circuits involved in fear, as a model for how human and animal emotion and physiology is studied, with special sessions on emotional responses to music and art, as well as discussions about burgeoning neurobiological research into the emotion of disgust. The larger goal of the course is to give students opportunities and experience in critical evaluation and discussion of primary scientific literature, and to develop and refine strategies on how to use scientific evidence in building arguments in essays.

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL212/NSCI201; open to juniors and seniors. Sophomores must get instructor’s consent prior to enrolling.

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not taken a 400-level Biology course; then to eligible NSCI concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option
BIOL 408 (S) RNA Worlds

RNA is known best as the message cells use to turn genes into proteins. Yet investigations of several unusual genetic phenomena over the past few decades did not find protein-coding genes, but instead uncovered non-coding RNAs with a cornucopia of functions. Today, biologists have begun to develop a framework for how RNA’s non-coding functions play central roles in immune defense and genetic conflicts, in gene regulation and cancer. We will develop our own understanding of the power of small noncoding RNA to protect the genome and direct cellular processes through reading and discussion of primary scientific literature. We will learn how this emerging perspective of RNA’s non-coding functions helps to resolve genetic mysteries and has opened the door to RNA-based medications.

Class Format: discussion, three hours per week

Requirements/Evaluation: class participation and 4 three-page papers

Prerequisites: BIOL 202; open to juniors and seniors

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not taken a 400-level course

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

BIOL 414 (F) Life at Extremes: Molecular Mechanisms

All organisms face variability in their environments, and the molecular and cellular responses to stresses induced by environmental change often illuminate otherwise hidden facets of normal physiology. Moreover, many organisms have evolved unique molecular mechanisms, such as novel cellular compounds or macromolecular structural modifications, which contribute to their ability to survive continuous exposure to extreme conditions, such as high temperatures or low pH. This course will examine how chaperonins, proteases, and heat- and cold-shock proteins are regulated in response to changes in the external environment. We will then consider how these and other molecular mechanisms function to stabilize DNA and proteins- and, ultimately, cells and organisms. Other extreme environments, such as hydrothermal vents on the ocean floor, snow fields, hypersaline lakes, the intertidal zone, and acid springs provide further examples of cellular and molecular responses to extreme conditions. Biotechnological applications of these molecular mechanisms in areas such as protein engineering will also be considered. Class discussions will focus upon readings from the primary literature.

Class Format: discussion three hours per week

Requirements/Evaluation: several short papers, participation in class discussions and course notebook

Prerequisites: open to juniors and seniors who are Biology majors; all other students interested in this course should contact the professor; BIOL 202 recommended

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not taken a 400-level course; then junior Biology majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)
BIOL 417  (S)  Translational Immunology: From Bench to Bedside

Recent advances in the field of immunology have led to the development of new approaches to prevent and treat diseases that affect millions of people worldwide. Drugs that modulate the body’s natural immune response have become powerful tools in treating major diseases—inflection, autoimmunity and cancer. This course will use readings from the primary literature to explore central themes involved in translating basic research to new clinical and therapeutic approaches. Topics will include vaccine development, autoimmunity and cancer immunotherapy.

Requirements/Evaluation:  Class participation and 4 essays
Prerequisites:  BIOL 202; open to juniors and seniors
Enrollment Limit:  12
Enrollment Preferences:  senior biology majors who have not taken a 400-level course; then juniors
Expected Class Size:  12
Grading:  no pass/fail option,  no fifth course option

BIOL 419  (S)  Secrets of Enzymes: Fidelity, Promiscuity, and Disease

Living organisms have spent the past 4 billion years evolving proteins and enzymes that perform basic cellular functions to support life. Over time, duplications and mutations of these enzymes have led to novel reactions, pathways, and chemistries. To gain an appreciation for these molecular catalysts, we will start by considering how enzymes are synthesized and how errors are introduced and naturally corrected. The course will focus on how enzymes such as CRISPR/Cas9 act as ‘molecular scissors’ to cut DNA and how these enzymes are used to correct errors. We will explore the implications of this field in active areas of biomedical, agricultural, and ecological research. Discussions and writing assignments will focus on reading and critiquing the scientific literature.

Class Format: discussion three hours per week
Requirements/Evaluation:  three 3-page papers, a 3-page original research proposal, and participation in discussions
Prerequisites:  BIOL 202 recommended
Enrollment Limit:  12
Enrollment Preferences:  senior Biology majors that have not had a 400-level course, followed by senior Biology majors, then junior Biology majors
Expected Class Size:  12
Grading:  no pass/fail option,  yes fifth course option
Distributions:  (D3)
Attributes:  BIMO Interdepartmental Electives

BIOL 420  (S) Mathematical Biology  (QFR)

Cross-listings:  MATH 412

Secondary Cross-listing

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible
biological applications may include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Requirements/Evaluation: problem sets, quizzes/exams, participation, final project and paper

Prerequisites: MATH 250 and MATH 309, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: preference for senior math/stats major and also based on an interest statement

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 412(D3) BIOL 420(D3)

Quantitative/Formal Reasoning Notes: The course will introduce methods for developing and analyzing mathematical models.

LEC Section: 01    TR 9:55 am - 11:10 am    Julie C. Blackwood

BIOL 421  (S)  Thermoregulation: From Molecules to Organisms

Thermal physiology involves the study of molecular events, organ systems, and organism-environmental interactions that are involved with heat production and temperature maintenance. The area of thermal physiology has been around for over 100 years. However, only in the last 5-7 years has the science progressed to understanding basic fundamental mechanisms for generating and regulating heat production. This tutorial will focus on four questions: 1) how do organisms generate heat? 2) how do organisms sense the temperature in the environment? 3) how do organisms integrate information about the environment (temperature, humidity, time of day, etc.) with internal information (deep body temperature, energy stores, etc.) to regulate their metabolic production of heat? 4) how do animals make "the decision" to enter a state of torpor?

Requirements/Evaluation: five 4- to 5-page papers; five 1- to 2-page response papers; tutorial presentations; contribution to the intellectual enterprise

Prerequisites: BIOL 205 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: senior Biology majors that have not had a 400-level course, followed by senior Biology majors, followed by junior Biology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

Attributes: NSCI Group C Electives

Not offered current academic year

BIOL 427  (F)  The Nitrogen Problem

Nitrogen (N) is a critical component of the proteins and DNA on which living organisms depend, and its availability has historically limited growth in many land ecosystems. In the early 20th century, the development of the Haber-Bosch process, which converts atmospheric dinitrogen gas to biologically-useable ammonium, and the subsequent production of synthetic N fertilizers fundamentally changed the global N landscape. Widespread fertilizer use led to dramatic increases in agricultural yields, which has contributed to our ability to feed and sustain a growing human population, but also generated acute ecological externalities. In this seminar, we will use the primary literature to understand the ways in which a century of fertilizer use has changed the global N cycle, and the effects of those changes on plant (and animal) physiology, community composition and biodiversity, soil biogeochemistry, and aquatic ecosystem health. We will then consider the promises and challenges of new strategies to improve ecosystem N management while supporting robust food production in our changing climate. Discussions and writing assignments will focus on reading and critiquing the scientific literature. Course will culminate with the preparation of a five page grant proposal, with opportunities for peer review and revision.

Requirements/Evaluation: Class participation, two three-page papers, five page grant proposal.
BIOL 436  (F)  Metabolites as Messengers
Beyond the genome, transcriptome, and proteome is the metabolome, the suite of small-molecule metabolites present in a biological sample. These molecules are not simply the products of the proteome nor a collection of cellular fuels and wastes. In this seminar, we will investigate metabolites as signals that influence cellular processes. Biochemistry and molecular biology textbooks often emphasize the proteins that mediate cellular communication. Of course, specialized metabolites like neurotransmitters and certain hormones are well known to regulate information flow between cells. But what about molecules that participate in the metabolic processes of almost every cell--how can these intermediary metabolites be used as signals? How do they communicate acutely and with specificity? What role do they play in sensing (or promoting) environmental change? And how can metabolites be regulated to override their typical fates in metabolic pathways and serve as signals? We'll examine these questions and more at the levels of inter-organellar, intercellular, and inter-organismal metabolic communication by reading the primary scientific literature together. Familiarity with typical mechanisms of cellular communication and/or physiology (BIOL 205) is recommended but not required.

Class Format: Discussion, three hours per week
Requirements/Evaluation: class participation and three to five papers of length 3-5 pages each
Prerequisites: BIOL 222 or 322; open to juniors and seniors
Enrollment Limit: 12
Enrollment Preferences: senior Biology majors who have not taken a 400-level course
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives
Not offered current academic year

BIOL 437  (F)  Neural Flexibility: plasticity, modulation and evolution
Animals must adapt their behaviors to match their environment in order to survive and reproduce. How does the nervous system mediate behavioral change that occurs in seconds, hours, months, or millions of years? In this course we will use a comparative approach to explore how neural circuits control behavioral flexibility over a range of timescales. We will first discuss circuits that control behavioral switches that occur very rapidly based on environmental and social stimuli. Next, we will consider the role that internal state and identity play in modulating neuronal circuits over an organism’s lifetime to influence behavioral decisions. Finally, we will examine how evolution tinkers with neural circuits to lead to behavioral change over very long timescales. Throughout the course we will explore how modifications to neural circuits—including connectivity, synaptic plasticity, neuromodulation and neuron physiology—can lead to differences in behavior and ask if there are connections between common mechanisms underlying behavioral change across timescales. Discussions and assignments in this course will focus on reading and critically evaluating primary scientific literature.

Requirements/Evaluation: class participation and three to five papers of length 3-5 pages each
Prerequisites: BIOL 212 or BIOL 205
Enrollment Limit: 12
Enrollment Preferences: senior Biology majors who have not taken a 400-level course
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
BIOL 438 (F) Species Interactions Under Global Change

Cross-listings: CAOS 438

Primary Cross-listing

Anthropogenic changes to the world's ecosystems often have clear effects on the abundance and distribution of species. These effects, however, do not occur in a vacuum: changes in any given species' presence, abundance, or behavior can cascade into large and surprisingly context-dependent effects on the interactions of other organisms. In this course we will examine competitive, mutualistic, and antagonistic interactions in the Anthropocene from the species pair to community scale. We will explore the ecological and evolutionary mechanisms underlying the outcomes of these interactions, examining patterns including phenological mismatch, species invasions, and anthropogenic land use change. Classes will focus on critical evaluation of evidence from the primary literature, drawing on examples from community ecology, disease dynamics, and global change biology.

Requirements/Evaluation: class participation and three to five papers of length 3-5 pages each

Prerequisites: BIOL 203 or BIOL 204 or BIOL 329 or permission from instructor

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not taken a 400-level course, open to juniors and seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

CAOS 438(D3) BIOL 438(D3)

BIOL 440 (S) Cell Signaling and Tissue Engineering: A Potential Fountain of Youth?

It is a long quest of mankind to have a healthy and long life but it is inevitable that our bodies lose function due to injury, disease or as we grow old. At the heart of tissue engineering is the idea that we can restore tissue function by replacing with or rebuild the right structure. To artificially generate tissues, organs or even organisms, one fundamental question must be addressed: How do our different organs, composed of cells with the identical genetic information, develop into such functionally different organs? Through the lens of tissue engineering, we will explore the mechanism by which cells sense the surrounding physical and chemical cues, and respond by changing their gene expression and consequent behaviors. We will devote most of our discussion to the scientific rationale and challenges of tissue engineering. Topics to be covered include 3D organoids in regenerative medicine, disease modeling, biobanking and drug discovery, computational modeling of stem cell dynamics, tissue growth and pattern formation, mechanotransduction, biomaterial fabrication, immunomodulation and cultured meat. Bioengineering of bone and cartilage, cardiovascular and nervous systems, etc. will be presented as case studies to illustrate details of certain aspects of tissue engineering in the broader context of the overall strategic approach used to solve a clinical problem. We will also consider the role of social factors like legislative regulation, health care philosophy, ethics and economics in the process of moving concept into the clinic and market.

Requirements/Evaluation: six 4-5 page papers; six 1-2 page response papers; tutorial presentations; contribution to the intellectual enterprise

Prerequisites: BIOL202 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Junior and seniors, with preference to senior Biology majors who have not had a 400-level course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
Writing Skills Notes: Each student will write six 4-5 page papers that address questions given by the professor and six 1-2 page critiques of their tutorial partner's papers, either adding to or refuting the main points made. Both papers and critiques will receive feedback from professor regarding structure, style and argument. As a final assignment, each student will write a paper that requires synthesizing/revising their ideas from the previous five papers and also a peer review of their partner's final paper.

BIOL 477 (S) Evolution of Species Coexistence
How can two or more species coexist if they compete for the same resources? Or when one preys on the other? Understanding species coexistence has been central to ecology since its inception. The question is important because species diversity is a defining characteristic of natural ecosystems. This course provides an in depth look into the theoretical and empirical evidence for species coexistence. It also explores how the evolution of interacting species can change the identity and number of species in a community thereby playing a key role in determining and maintaining species diversity. Finally, the course will address how this body of theory and empirical evidence can be used to predict how we might expect diversity to change with increases in human-caused disruptions to the natural environment.

Requirements/Evaluation: Evaluation will be based on participation in discussions, several short papers, and presentations.
Prerequisites: BIOL/ENVI 203
Enrollment Limit: 12
Enrollment Preferences: Biology seniors who have not yet taken a 400 level course
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

BIOL 493 (F) Senior Thesis Research: Biology
Each student prepares a thesis under the supervision of a member of the department. Thesis work can begin either in the spring of the junior or the fall of the senior year, and includes the Winter Study period of the senior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in their lab vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory. This is part of a full-year thesis (493-494).

Requirements/Evaluation: Written thesis, poster presentation at the end of the year, oral presentation in October of the senior year.
Prerequisites: Students must apply during the first week in February of their junior year to pursue an Honors thesis in Biology.
Enrollment Limit: 30
Enrollment Preferences: Senior Biology majors
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Unit Notes: Senior majors are required to participate in Biology Colloquium, which is scheduled for most Fridays at 1:10 pm.

### Winter Study

**BIOL 13 (W) Intro to Animal Tracking**

Course focuses on identification based on tracks and sign found in the field. Course work includes weekly readings, small group study sites, 1) 6 hour
day field trip, 3 page research paper, field test and small group power point presentation.

**Requirements/Evaluation:** Paper(s) or report(s); Presentation(s); Other: Field test

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Seniors to freshman

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Dan Yacobellis has taught tracking for over two decades and has been leading this WSP for Williams for over 10 years. He holds a level 3
Cyber Tracker North America certification. Dan is also the founder of Tamakoce Wilderness programs in upstate NY

**Materials/Lab Fee:** $75

**Attributes:** EXPE Experiential Education Courses  SLFX Winter Study Self-Expression  STUX Winter Study Student Exploration  WELL Winter Study
Wellness

Not offered current academic year

---

### BIOL 22 (W) Introduction to Biological Research

An experimental research project will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20
hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students
and sophomores, and requires the permission of the instructor.

**Class Format:** Independent study

**Requirements/Evaluation:** A 10-page paper

**Prerequisites:** None. Students may not register until they have a confirmed placement in a Williams Biology lab. The instructor will work with student
to identify possible mentors, but it is the student's responsibility to talk to the mentor and get approval.

**Enrollment Limit:** 18

**Enrollment Preferences:** First years and sophomores

**Expected Class Size:** NA

**Grading:** pass/fail only
BIOL 24 (W) Introduction to Ecology and Evolutionary Biology Research
An experimental research project in ecology/evolutionary biology will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20 hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.

Requirements/Evaluation: A 10-page paper.
Prerequisites: None. Students may not register until they have a confirmed placement in a Williams Biology lab. The instructor will work with student to identify possible mentors, but it is the student's responsibility to talk to the mentor and get approval.

Enrollment Limit: 12
Enrollment Preferences: First years and sophomores
Expected Class Size: 8
Grading: pass/fail only

BIOL 27 (W) Introduction to Molecular and Cell Biology and Biochemistry Research
An experimental research project in molecular or cellular biology/biochemistry will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20 hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.

Requirements/Evaluation: A 10-page paper.
Prerequisites: None. Students may not register until they have a confirmed placement in a Williams Biology lab. The instructor will work with student to identify possible mentors, but it is the student's responsibility to talk to the mentor and get approval.

Enrollment Limit: 12
Enrollment Preferences: First years and sophomores
Expected Class Size: 8
Grading: pass/fail only

BIOL 28 (W) Introduction to Research in Neuroscience and Organismal Biology
An experimental research project in neurobiology/organismal biology will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20 hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.

Requirements/Evaluation: A 10-page paper.
Prerequisites: None. Students may not register until they have a confirmed placement in a Williams Biology lab. The instructor will work with student to identify possible mentors, but it is the student's responsibility to talk to the mentor and get approval.

Enrollment Limit: 12
Enrollment Preferences: First years and sophomores.
Expected Class Size: 8
Grading: pass/fail only

BIOL 31 (W) Senior Thesis: Biology
Continuation of Senior Honors thesis research. Required of all thesis students.

Prerequisites: Honors thesis student
Enrollment Limit: 33
Enrollment Preferences: To be taken by students registered for Biology 493, 494.
Expected Class Size: NA
Grading: pass/fail only
Attributes: EXPE Experiential Education Courses STUX Winter Study Student Exploration

BIOL 99 (W) Independent Study: Biology
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
MAJOR

Through a variety of individual courses and sequential programs, the department provides an opportunity for students to explore the nature and significance of chemistry, an area of important achievement in our quest for knowledge about ourselves and the world around us. The student of chemistry is able to become aware of the special viewpoint of chemists, the general nature of chemical investigation, some of its important results, how these results are expressed, and something of their significance within the fields of science and in the area of human endeavor as a whole. The Chemistry major provides excellent preparation for graduate study in chemistry, biochemistry, chemical engineering, environmental science, materials science, medicine, and the medical sciences.

A major in chemistry can be achieved in several ways, preferably beginning in the student’s first year at Williams, but also beginning in the sophomore year. For students who are interested in fulfilling pre-medical requirements and/or pursuing study abroad, we strongly recommend consultation with the chemistry department as early as possible in order to plan a course of study. Building on a foundation in general chemistry, organic chemistry, and physical chemistry, a student elects additional advanced courses to complete a major that is consistent with their background in other sciences, interests, and goals. A student’s program can emphasize any subdiscipline of chemistry including biochemistry, environmental, inorganic, materials, organic, and physical chemistry. Students considering a major in chemistry should consult with a member of the department as early as possible in order to plan a program which best suits their interests and abilities and which makes full use of their previous preparation.

For students beginning their chemistry studies in Fall 2023 or later.

Most students will begin their study in the department in Chemistry 101 (Concepts of Chemistry), which may be taken in the fall or the spring semester. For students with little or no high school chemistry, we offer Chemistry 100 (Chemistry Matters) in the fall semester as preparation for Chemistry 101 in the spring semester. All students interested in taking Chemistry 100 or Chemistry 101 must complete a brief departmental survey to assist in determining the best first semester placement. After Chemistry 101, students will take Chemistry 200 (Advanced Concepts in Chemistry) and Chemistry 201 (Introduction to Organic Chemistry), in either order. After completing these courses, students can move into elective courses.

Completion of a Chemistry major requires nine semester chemistry courses beginning with Chemistry 101. Chemistry 100 can count as one of
these courses. Alternatively, two approved courses from adjacent sciences (those with significant chemical and/or quantitative content) from Biology, Computer Science, Geosciences, Mathematics, Physics, or Statistics can count towards one of their required Chemistry credits. Only one course designated as pass/fail may be counted towards the major. Chemistry 242 (Intermediate Organic Chemistry) is required for the major, as is at least one course selected from Chemistry 361, 363, 364, 366, or 367. Starting at the 300 level, at least three of the courses taken must have a laboratory component. The specific courses selected, will depend on each student’s future plans and interests, and can be determined in consultation with the chair or major advisor. In addition, the department has a number of “Independent Research Courses” which, while they do not count toward completion of the major, provide a unique opportunity to pursue an independent research project under the direction of a faculty member.

Required Foundational Courses

101 Concepts of Chemistry
200 Advanced Chemical Concepts
201 Organic Chemistry: Introductory Level
242 Organic Chemistry: Intermediate Level (required for the major)

For students who began their chemistry studies in Fall 2022 or earlier.

All students begin their study in the department with either Chemistry 151, 153, or 155 in the fall semester. Placement at the introductory level is based upon responses on the departmental survey and consultation with the faculty; results of the College Board Advanced Placement Test or the International Baccalaureate Exam are also taken into account.

The first year is completed with Chemistry 156. In the second year at the introductory level, students take Chemistry 251 and Chemistry 256 (those students who complete 155 are exempted from 256). Completion of a Chemistry major requires either nine semester chemistry courses or eight semester chemistry courses plus two approved courses from adjacent sciences (those with significant chemical and/or quantitative content) from Biology, Computer Science, Geosciences, Mathematics, Physics, or Statistics. Only one course designated as pass/fail may be counted towards the major. For all majors, at least one must be selected from Chemistry 361, 363, 364, 366, or 367. Starting at the 300 level, at least three of the courses taken must have a laboratory component. The specific courses selected, will depend on each student’s future plans and interests, and can be determined in consultation with the chair or major advisor. In addition, the department has a number of “Independent Research Courses” which, while they do not count toward completion of the major, provide a unique opportunity to pursue an independent research project under the direction of a faculty member.

Foundational Courses

Second Year

Fall: 251 Organic Chemistry: Intermediate Level
Spring: 256 Advanced Chemical Concepts (or 300-level if completed 155)

Elective Courses

319 Integrative Bioinformatics, Genomics, and Proteomics Lab
321 Biochemistry I-Structure and Function of Biological Molecules
322 Biochemistry II-Metabolism
324 Enzyme Kinetics and Reaction Mechanisms
326 Chemical and Synthetic Biology
335 Inorganic/Organometallic Chemistry
336 Materials Chemistry
338 Bioinorganic Chemistry: Metals in Living Systems
341 Toxicology and Cancer
342 Synthetic Organic Chemistry
343 Medicinal Chemistry
344 Physical Organic Chemistry
348 Polymer Chemistry
For the purpose of assisting students in selecting a program consistent with their interests and possible continuation of their studies at the graduate level, the following groupings of electives and faculty advisors are suggested. However, a case can be made for selecting courses from the different groups.

**Biochemistry:** Chemistry 321, Chemistry 322, Chemistry 324, Chemistry 326, Chemistry 341, Chemistry 364, Chemistry 367. Students interested in biochemistry should consult with Professors Gehring, Hart, Rawle, or Thuronyi.

**Environmental Chemistry:** Chemistry 363, Chemistry 361, Chemistry 364, Chemistry 366. Students interested in environmental chemistry should consult with Professor Carrasquillo.

**Inorganic Chemistry:** Chemistry 335, Chemistry 336, Chemistry 338, Chemistry 361, Chemistry 364, Chemistry 366. Students interested in inorganic chemistry should consult with Professors C. Goh, Green, or Park.

**Materials Chemistry:** Chemistry 335, Chemistry 336, Chemistry 348, Chemistry 361, Chemistry 364, Chemistry 366. Students interested in materials science should consult with Professors S. Goh or Park.

**Organic Chemistry:** Chemistry 341, Chemistry 342, Chemistry 343, Chemistry 344, Chemistry 348, Chemistry 363, Chemistry 364, Chemistry 361, Chemistry 366. Students interested in organic chemistry should consult with Professors S. Goh, Green, Smith, Thuronyi, or Turek.

**Physical Chemistry:** Chemistry 361, Chemistry 364, Chemistry 366, Chemistry 368T. Students interested in physical chemistry should consult with Professors Augenbraun, Carrasquillo, or Peacock-López.

While any accepted route through the major would permit a student to proceed to graduate study in chemistry, four electives should be considered a minimum, and at least a semester of research is strongly recommended.

The department’s curriculum is approved by the American Chemical Society (ACS), a professional body of academic, industrial, and research chemists. The ACS suggests the following courses for someone considering graduate study or work in chemistry or a related area:

For students beginning in 2023 or later: CHEM 101, CHEM 200, CHEM 201, CHEM 242

For students beginning in 2022 or earlier: CHEM 151, CHEM 156, CHEM 251, CHEM 256

At the upper level, the ACS recommends 321, 335, 364, (one of 361, 366 or 367) and at least 3 courses (all of which must have a laboratory component or at least one must be a research course of 393 or above) from our remaining upper level electives: 319, 322, 324, 326, 335, 341, 342, 343, 344, 348, 361, 363, 366, 367, 368T, 393, 394, 397, 398, 493, 494, 498, BIMO 401. Students are strongly encouraged (though not required) to pursue independent research in some form. In addition, students have also completed 2 semesters of calculus and 2 semesters of physics. Students completing these requirements can be designated Certified ACS Majors.

**BIOCHEMISTRY AND MOLECULAR BIOLOGY (BIMO)**

Students interested in Biochemistry and Molecular Biology should consult with the general statement under the Biochemistry and Molecular Biology Program (BIMO) in the Courses of Instruction. Students interested in completing the BIMO program are also encouraged to complete the biochemistry courses within the chemistry major by taking 321, 322, 324, 326, and 367 in addition to the first and second year required courses.

**BIOINFORMATICS, GENOMICS, AND PROTEOMICS (BiGP)**

Students interested in Bioinformatics, Genomics, and Proteomics should consult the general statement under Bioinformatics, Genomics, and
Proteomics in the Courses of Instruction. Students interested in these areas are also encouraged to complete the biochemistry courses within the chemistry major by taking 319, 321, 322, 324 and 367 in addition to the first and second year required courses.

THE DEGREE WITH HONORS IN CHEMISTRY

The degree with honors in Chemistry provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, and to report on the nature of the work in two short oral presentations and in a written thesis.

Chemistry majors who are candidates for the degree with honors take the following in addition to a major outlined above:

Chemistry 493-W31-494 Senior Research and Thesis

The principal considerations in admitting a student to a program of independent research are mastery of fundamental materials and skills, ability to pursue independent study successfully, and demonstrated student interest and motivation. In addition, to enroll in these courses leading to a degree with honors, a student must have at least a B- average in all chemistry courses or the permission of the chair. At the end of the first semester of the senior year, the department reviews the student’s progress and determines whether the student is a candidate for a degree with honors. The designation of a degree with honors in Chemistry or a degree with highest honors in Chemistry is based primarily on a departmental evaluation of the accomplishments in these courses and on the quality of the thesis. Completion of the research project in a satisfactory manner and preparation of a well-written thesis usually results in a degree with honors. In cases where a student has demonstrated unusual commitment and initiative resulting in an outstanding thesis based on original results, combined with a strong record in all of their chemistry courses, the department may elect to award a degree with highest honors in Chemistry.

EXCHANGE AND TRANSFER STUDENTS

Students from other institutions wishing to register for courses in chemistry involving college-level prerequisites should do so in person with a member of the Chemistry Department. Registration should take place by appointment during the spring semester prior to the academic year in which courses are to be taken. Students are requested to have with them transcripts of the relevant previous college work.

COURSES FOR NON-MAJORS WITH NO PREREQUISITES

Students with principal interests outside of the sciences may extend a secondary school foundation in chemistry by electing a basic two-semester introductory course of a general nature or they may elect semester courses designed for non-majors. All courses in chemistry satisfy the divisional distribution requirement.

STUDY ABROAD

Students who wish to complete a chemistry major (or chemistry requirements for pre-medical study) as well as to study abroad during their junior year are encouraged to begin taking chemistry in their first semester at Williams, and should consult with members of the department as early as possible.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. We can give provisional approval in some cases if enough detail is available, but we always ask to see the details after the course is completed before signing off on the major credit.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus, including readings/assignments, and complete description of laboratory program. The biggest question is whether or not there is a lab component of the course and whether it is sufficient to fulfill the equivalent lab experience of Williams courses.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No official restrictions, but we advise our students to take the majority of their chemistry courses at Williams.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. We have several special requirements. Only one non-lab class can be used toward the upper-level major requirements. This is usually the restriction that causes difficulty with study abroad—where appropriate lab courses may not be available. One of the lab courses must also meet our departmental “quantitative requirement.” In principle, this could be met by a course taken abroad, but we would likely be more conservative in authorizing this equivalency.

Are there specific major requirements that cannot be fulfilled while on study away?

No. In principle, all major requirements could be filled abroad, but laboratory programs abroad are not always sufficiently rigorous to meet our
standards. We look for at least 40 hours of wet-lab time for the lab component. Importantly, this cannot be work in a professor's research lab, but must be "exercises" giving our students practice with standard techniques and methods of analysis.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The lab requirements that I've mentioned above are the main complicating factors. Also our first two years of ("introductory") chemistry courses are taught in an unconventional way. If a student had not yet completed all four of those courses before studying abroad, they would need to be aware of special timing that might complicate things. For our first two years of instruction, we teach one semester of introductory chemistry followed by two semesters of organic chemistry, and top things off with a final semester of a course that is somewhat specific to Williams. There are ways to take "equivalent" courses elsewhere, but we would need to work very closely with the student to ensure that all of the pieces fit together appropriately.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date, but there may have been times when the lab component of a course was not sufficient and we were only able to assign major credit for a non-lab course instead of a course-with-a-lab.

CHEM 100  (F)  Chemistry Matters  (QFR)
Chemistry matters! From fueling the world's economy to preventing the next pandemic to forecasting future climate change, chemistry touches all aspects of daily life. This course provides an introduction to chemical principles and applications for students with little or no high school chemistry background. Through the lens of contemporary issues and applications (e.g. energy, environment, materials, medicine, etc.), students will be introduced to concepts fundamental to studying matter at the molecular level. Particular emphasis will be placed on skills essential for students to understand chemistry in these contexts, including quantitative reasoning and the development of chemical literacy and intuition. Laboratory meetings will be used to reinforce lecture material through experimentation at the bench and active learning exercises.

Class Format: lecture, three times per week and laboratory, three hours per week
Requirements/Evaluation: problem set assignments, laboratory work and analysis, quizzes/exams and a final assessment
Prerequisites: Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement).
Enrollment Limit: 32; 16/lab
Enrollment Preferences: First-year students with little or no high school chemistry experience.
Expected Class Size: 32
Grading: yes pass/fail option, no fifth course option
Unit Notes: CHEM 100 may be taken concurrently with MATH 102--see under Mathematics; CHEM 100 or its equivalent is a prerequisite to CHEM 101.
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular problem sets and in class activities in which quantitative/formal reasoning skills are practiced.

Fall 2024
LEC Section: 01    MWF 9:00 am - 9:50 am    Katie M. Hart
LAB Section: 02    W 1:00 pm - 4:00 pm
LAB Section: 03    R 1:00 pm - 4:00 pm

CHEM 101  (F)(S)  Concepts of Chemistry  (QFR)
This course broadens and deepens the foundation in chemistry of students who have had one or more years of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, the model of an atom, Lewis structures and VSEPR, and gas laws is expected. Principal topics for this course include modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory periods will largely focus on experiment design, data analysis, literature, scientific writing, and other skills critical to students' development as
scientists. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamentals of chemistry as part of their general education. This course may be taken pass/fail; however, students who are considering graduate study in science or in the health professions should elect to take this course for a grade.

**Class Format:** lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation:** problem sets and/or quizzes, laboratory work, and exams

**Prerequisites:** Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement) or CHEM 100.

**Enrollment Limit:** 45; 16/lab

**Enrollment Preferences:** first-year students

**Expected Class Size:** 45/lecture

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** CHEM 101 or its equivalent is a prerequisite for both CHEM 200 and CHEM 201 and is required for the BIMO concentration.

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

**Attributes:** BIMO Required Courses

**CHEM 115 (F) AIDS: The Disease and Search for a Cure**

**Cross-listings:**

**Primary Cross-listing**

Since the discovery of the human immunodeficiency virus (HIV-1) in 1983, modern techniques of molecular biology have revealed much about its structure and life cycle. The intensity of the scientific investigation directed at HIV-1 is unprecedented in history. We now know more about this virus than any other pathogen. However, the early optimism concerning the prospects for an effective AIDS vaccine has not yet materialized, and HIV strains that are resistant to drug therapies are common. We are now four decades into the AIDS pandemic, and the World Health Organization estimates that there are more than 38 million HIV-infected persons worldwide. After an introduction to chemical structure, we examine the molecular biology of the HIV virus, the molecular targets of anti-HIV drugs, and the prospects for a cure. We look at how HIV-1 interacts with the human immune system and discuss strategies for developing an effective HIV vaccine.

**Class Format:** three hours per week

**Requirements/Evaluation:** problem sets, a midterm, quizzes, a final exam, and a presentation/discussion

**Prerequisites:** none; designed for the non-science major who does not intend to pursue a career in the natural sciences

**Enrollment Limit:** 32

**Enrollment Preferences:** seniors, juniors, sophomores, then first-year students
Expected Class Size: 32
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
CHEM 115(D3)

Attributes: PHLH Biomedical Determinants of Health
Not offered current academic year

CHEM 200 (S) Advanced Chemical Concepts (QFR)
This course treats an array of topics in modern chemistry, emphasizing broad concepts that connect and weave through the various subdisciplines of the field—biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. It provides the necessary background in chemical science for students who are planning advanced study or a career in chemistry, biological science, geoscience, environmental science, or a health profession. Topics include coordination complexes, thermodynamics, electrochemistry, and kinetics. Laboratory sections will give students hands-on experience involving synthesis, characterization, and reactivity studies of coordination and organic complexes; spectroscopic analyses; thermodynamics; electrochemistry; and kinetics. Students will hone their skills in the presentation of results through written reports and worksheets.

Class Format: lecture, three times per week and laboratory, four hours per week
Requirements/Evaluation: homework assignments, laboratory work, quizzes, midterm exam, and a final exam
Prerequisites: CHEM 101
Enrollment Limit: 35; 16/lab
Enrollment Preferences: first-year students, then sophomores
Expected Class Size: 35
Grading: no pass/fail option, no fifth course option
Unit Notes: CHEM 200 is required for the BIMO concentration
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.
Attributes: BIMO Required Courses

LAB Section: 06 R 1:00 pm - 5:00 pm
LAB Section: 07 T 8:00 am - 12:00 pm

CHEM 201 (F) Organic Chemistry: Introductory Level (QFR)
This course provides the necessary background in organic chemistry for students who are planning advanced study or a career in chemistry, the biological sciences, or the health professions. It initiates the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. Specific topics include basic organic structures and bonding, delocalization and conjugation, acidity & basicity, nucleophilic addition and substitution reactions, stereochemistry and molecular energetics. The theory and interpretation of infrared (IR) and nuclear magnetic resonance (NMR) spectroscopy, as well as the fundamentals of molecular modeling as applied to organic molecules are presented. The coordinated laboratory work includes organic synthesis, purification and separation techniques, as well as characterization by IR and NMR spectroscopy.

Class Format: lecture, three times per week and laboratory, four hours per week
Requirements/Evaluation: quantitative problem solving, laboratory performance, three midterm exams, and a final exam
Prerequisites: CHEM 101 or CHEM 151, 153, or 155

Enrollment Limit: 40; 12/lab

Enrollment Preferences: Seniors, juniors, sophomores, first-year students

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem solving in which quantitative/formal reasoning skills are practiced and evaluated.

Attributes: BIMO Required Courses

CHEM 242 (S) Organic Chemistry: Intermediate Level

This course is a continuation of CHEM 156/201 and it concludes the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. Specific topics include radical chemistry, an introduction to mass spectrometry and ultraviolet spectroscopy, the theory and chemical reactivity of conjugated and aromatic systems, the concepts of kinetic and thermodynamic control, an extensive treatment of the chemistry of the carbonyl group, alcohols, ethers, polyfunctional compounds, the concept of selectivity, the fundamentals of organic synthesis, an introduction to carbohydrates, carboxylic acids and derivatives, acyl substitution reactions, amines, and an introduction to amino acids, peptides, and proteins. The coordinated laboratory work includes application of the techniques learned in the introductory level laboratory, along with new functional group analyses, to the separation and identification of several unknown samples. Skills in analyzing NMR, IR, and MS data are practiced and further refined.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: midterm exams, problem sets, laboratory performance, including written lab reports, and a final exam

Prerequisites: CHEM 200 and CHEM 201 (or CHEM 156); or permission of instructor

Enrollment Limit: 40; 12/lab

Enrollment Preferences: seniors, juniors, then sophomores

**Secondary Cross-listing**

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** The lab for this course will meet for two afternoons per week. Some lab sessions will be shorter than 3 hours.

**Requirements/Evaluation:** lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors, then juniors, then sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 319(D3) CHEM 319(D3) CSCI 319(D3) PHYS 319(D3) MATH 319(D3)

**Quantitative/Formal Reasoning Notes:** Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

**Attributes:** BIGP Courses  BIMO Interdepartmental Electives

Not offered current academic year

CHEM 321  (F) Biochemistry I: Structure and Function of Biological Molecules  (QFR)

**Cross-listings:** BIOL 321 / BIMO 321

**Secondary Cross-listing**

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.
Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101, CHEM 200 and CHEM 201; or either CHEM 155 or 256 and CHEM 251

Enrollment Limit: 12/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 36

Grading: no pass/fail option, no fifth course option

Unit Notes: Cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 321(D3) BIMO 321(D3) CHEM 321(D3)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

Attributes: BIGP Courses BIMO Required Courses

LAB Section: 04 R 1:00 pm - 5:00 pm

CHEM 322 (S) Biochemistry II: Metabolism (QFR)

Cross-listings: BIMO 322 / BIOL 322

Secondary Cross-listing

This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: Lecture three hours per week and laboratory three hours per week.

Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

Prerequisites: BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor

Enrollment Limit: 48

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIMO 322(D3) CHEM 322(D3) BIOL 322(D3)

Quantitative/Formal Reasoning Notes: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

Attributes: BIGP Courses BIMO Required Courses
CHEM 324 (F) Enzyme Kinetics and Reaction Mechanisms

Enzymes are complex biological molecules capable of catalyzing chemical reactions with very high efficiency, stereo-selectivity and specificity. The study of enzymatically-catalyzed reactions gives insight into the study of organic reaction mechanisms in general, and into the topic of catalysis especially. This course explores the methods and frameworks for determining enzymatic reaction mechanisms. These methods are based on a firm foundation of organic reaction mechanisms and chemical kinetics. We will investigate the major types of biochemical reactions, focusing on their catalytic mechanisms and how those mechanisms can be elucidated. We will lay the foundation for this mechanistic consideration with discussion of transition state theory, structure-reactivity relationships, steady state and pre-steady kinetics, use of isotopes, genetic modification, and other tools for probing enzymatic reactions. We will also examine the catalytic roles of a variety of vitamins and cofactors.

Class Format: three hours per week

Requirements/Evaluation: problem sets, quizzes, a midterm exam, a paper, and a final exam

Prerequisites: CHEM/BIOL/BIMO 321 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Chemistry majors or BIMO concentrators

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives

Not offered current academic year

CHEM 326 (S) Chemical and Synthetic Biology

This course surveys the rapidly evolving, interdisciplinary and interconnected fields of chemical and synthetic biology. Chemical biology uses precise molecular-level manipulations to influence living systems from the bottom up, often by introducing components that are foreign to nature. Synthetic biology takes advantage of existing molecular technology and adopts an engineering mindset to reprogram life. Students will achieve literacy through immersion in chemical and synthetic biology. We will prioritize broad exposure to these fields, their vocabulary, culture, practices and ideas, through extensive engagement with the primary literature that expert practitioners use to teach themselves. The course model is instructor-facilitated peer-to-peer instruction, emphasizing skills important for autonomous and collaborative work in real-world scientific and professional fields. Topics we will cover include synthetic genomes, metabolic engineering, chemical synthesis and manipulation of biomacromolecules, directed evolution, and reworking of the central dogma of biology.

Class Format: two and a half hours of whole-class meetings and one hour of small-group meetings per week and online discussion using Perusall

Requirements/Evaluation: Course work includes consistent and intensive engagement with primary literature, discussions, weekly short presentations, formal and informal writing assignments, and an independent research project. The workload is designed to be distributed evenly throughout the semester. There are no exams. The course will be specifications-graded.

Prerequisites: CHEM/BIOL/BIMO 321 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: seniors, then junior Chemistry and Biology majors with a demonstrated interest in chemical or synthetic biology

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives
CHEM 335 (S) Inorganic/Organometallic Chemistry
This course covers fundamental aspects of the chemistry of main group elements and transition metals, and highlights how these properties are key to understanding the roles of these elements in applications such as the catalysis of synthetic organic transformations, the functions of enzymatic processes, the production of commodity chemicals such as plastics, and the actions of metal-based drugs such as cis-platin. The course introduces concepts of symmetry and group theory, and their systematic application to the study of the structure, bonding, and spectroscopy of inorganic and organometallic compounds. The course also covers the kinetics and mechanism of selected inorganic and organometallic reactions. Class discussions will involve exploration of the primary literature and review articles around recent developments and applications in inorganic chemistry, such as finding molecular solutions to water oxidation, the capture of solar energy, to cancer treatments and the optimization of industrial-scale reactions.
Class Format: lecture, three hours per week and laboratory, four hours per week
Requirements/Evaluation: problem sets, exams, presentation, group-based literature reviews, and laboratory work
Prerequisites: CHEM 155 or CHEM 256 and CHEM 251; or CHEM 200 and CHEM 201
Enrollment Limit: 16; 8 lab
Enrollment Preferences: senior and junior chemistry majors
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
Distributions: (D3)

CHEM 336 (F) Materials Chemistry
Materials have defined much of what is possible in our daily lives. Materials scientists are at the center of imagining and delivering progress, as they improve existing materials and develop new ones to meet today's needs. Materials science focuses on the relationships between the structure, processing, properties, and performance of materials. In this course, we will explore how the properties and potential applications of a solid are related to its atomic and molecular structure, as well as to its organization on larger length scales than are traditionally considered in chemistry. We will cover a variety of different types of materials including metals, ceramics, polymers, and composites. We will examine some of the latest developments in materials science, including new strategies for the synthesis of materials on different length scales, as well as a variety of potential applications of emerging technologies.
Class Format: lecture, three hours per week
Requirements/Evaluation: problem sets, reviews of research articles, two exams, and oral presentations
Prerequisites: CHEM 155 or CHEM 256 and CHEM 251; or CHEM 200 and CHEM 201
Enrollment Limit: 20
Enrollment Preferences: Chemistry majors
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D3)
Attributes: MTSC Courses

LEC Section: 01 TR 8:30 am - 9:45 am  Lee Y. Park

CHEM 342 (S) Synthetic Organic Chemistry
The origins of organic chemistry are to be found in the chemistry of living things and the emphasis of this course is on the chemistry of
naturally-occurring compounds. This course presents the logic and practice of chemical total synthesis while stressing the structures, properties and preparations of terpenes, polyketides and alkaloids. Modern synthetic reactions are surveyed with an emphasis on the stereochemical and mechanistic themes that underlie them. To meet the requirements for the semester's final project, each student chooses an article from the recent synthetic literature and then analyzes the logic and strategy involved in the published work in a final paper. A summary of this paper is also presented to the class in a short seminar. There will be no laboratory component in 2022. Instead, one of the three class meetings each week will focus on discussion and presentation of reactions, mechanisms, and syntheses from the chemical literature.

Class Format: lecture, three hours per week and conference, 1.5 hours per week
Requirements/Evaluation: problem sets, midterm exams, class participation, class presentations, and a final project
Prerequisites: CHEM 155 or CHEM 256 and CHEM 251 or permission of instructor; or CHEM 200 and CHEM 242 or permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Chemistry majors, seniors and juniors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives

Not offered current academic year

CHEM 344 (S) Physical Organic Chemistry
The structure of a molecule is inherently linked to its reactivity, and these correlations form the basis for understanding organic reaction mechanisms. This course advances the understanding from previous organic courses through a detailed examination of the concepts that underlie these structure/reactivity relationships, including molecular strain and stability, acid/base chemistry, steric and electronic effects, and aromaticity. These concepts will also be explored in the context of specific classes of reaction mechanisms. Classical and modern experimental and theoretical tools used to elucidate reaction mechanisms will also be presented, including reaction kinetics, isotope effects, and linear free energy relationships. By studying the primary literature, we will see how these experiments have been applied to the elucidation of reaction mechanism, while also learning to design a set of experiments for study of mechanisms of contemporary interest.

Class Format: lecture, three times per week and laboratory, four hours per week
Requirements/Evaluation: problem sets, exams, laboratory reports, presentations, and class participation
Prerequisites: CHEM 155 or CHEM 256 and CHEM 251; or CHEM 200 and CHEM 201
Enrollment Limit: 8
Enrollment Preferences: Chemistry majors: seniors, juniors, sophomores
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives

CHEM 345 (F) Supramolecular Organic Chemistry
Supramolecular chemistry is the study of chemical systems, often with practical applications, that are composed of two or more molecular components held together by non-covalent interactions. More specifically, we will focus on the use of “synthetic influence” over organic compounds and reactions to make tailor-made building blocks that will produce functional molecular assemblies. The various analytical methodologies used to probe these relatively weaker and more dynamic chemical systems will be studied. We will also examine (and be inspired by) the supramolecular chemistry found in nature, as the field was originally defined by the host-guest interactions used to explain receptor-substrate binding in many biological systems. Today, the field has intersected with numerous disciplines which we will explore; these include analytical molecular recognition and sensing, self-assembly molecular engineering, catalysis, and organic-based molecular devices, among others. We will also explore more complex
supramolecular topics such as dynamic covalent chemistry and the mechanical bond. Students will be expected to delve into the chemical literature and analyze the research of pioneering chemists in the field (past and present) by choosing one prominent journal article, culminating in a final literature review paper.

Class Format: lecture/discussion
Requirements/Evaluation: problem sets, research article review homework assignments, class/discussion participation, exams, and a final literature review paper
Prerequisites: CHEM 251 and CHEM 256
Enrollment Limit: 20
Enrollment Preferences: Chemistry majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Not offered current academic year

CHEM 348 (S) Polymer Chemistry
From synthetic to natural macromolecules, we encounter polymers everywhere and every day. This course explores the multitude of synthetic techniques available and discusses how structure defines function. Topics include polymer types, concept of molecular weight, structure-property relationships and polymer synthesis methods including condensation and chain (anionic, cationic, radical) polymerizations. Fundamentals of composition and physical properties of polymers, and methods of characterization are also covered. Examples of polymer functionalization, self-assembly, and surface modification are also discussed.

Class Format: lecture, three hours per week and laboratory, four hours per week
Requirements/Evaluation: problem sets, participation, two exams, laboratory work, and a final project
Prerequisites: CHEM 251 or CHEM 242
Enrollment Limit: 12/lab
Enrollment Preferences: Chemistry majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives  MTSC Courses

CHEM 361 (S) Quantum Chemistry and Chemical Dynamics (QFR)
This course introduces quantum mechanics, which serves as the basis for understanding molecular structure and spectroscopy. We will begin by discussing the Schrodinger wave equation and then apply this to understanding the translational, vibrational, and rotational structure of molecules. This leads to a discussion of atomic/molecular electronic structure and spectroscopy. Computational methods will be taught to illustrate key quantum mechanical concepts, interpret experimental data, and extend hypotheses. Applications will be chosen from contemporary research fields, including photochemistry, laser spectroscopy, environmental/atmospheric chemistry, organometallic chemistry, and physical organic chemistry.

Requirements/Evaluation: class participation, problem sets, exams, and laboratory work
Prerequisites: CHEM 155 or CHEM 256; or CHEM 200; or permission of instructor; and strongly recommend MATH 150 or MATH 151
Enrollment Limit: 16; 8/lab
Enrollment Preferences: seniors, then juniors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFC requirement and relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

CHEM 363  (F)  Environmental Fate of Organic Chemicals
Cross-listings: ENVI 363
Primary Cross-listing
This course introduces students to the methods used to assess the risks posed by organic chemicals to human, animal, and ecosystem health. Our goal is to develop a quantitative understanding for how specific features of organic molecular structure directly dictate a given molecule's environmental fate. We will begin by using thermodynamic principles to estimate the salient physiochemical properties of molecules (e.g., vapor pressure, solubility, charging behavior, etc.) that impact the distribution, or partitioning, of organic chemicals between air, water, soils, and biota. Then, using quantitative structure activity relationships, we will predict the degradation kinetics resulting from natural nucleophilic, photochemical, and biological processes that determine chemical lifetime in the environment.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: weekly problem sets, laboratory exercises, two midterm exams, a final exam, participation in lecture and lab

Prerequisites: CHEM 155 or CHEM 256 and CHEM 156; or CHEM 200 and CHEM 201

Enrollment Limit: 12

Enrollment Preferences: junior and senior Chemistry and Environmental Studies majors with a demonstrated interest in environmental chemistry

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

CHEM 364  (S) Instrumental Methods of Analysis
Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today's analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

Class Format: lecture, two times per week and laboratory, four hours per week

Requirements/Evaluation: Weekly data analysis, laboratory assignments and reports, readings for class, problem sets, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project
Prerequisites: CHEM 251 and CHEM 256 (or permission of instructor); or CHEM 200 and CHEM 201 (can be taken concurrently with CHEM 201)

Enrollment Limit: 16/lab

Enrollment Preferences: Chemistry and Environmental Studies majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

**CHEM 366 (F) Thermodynamics and Statistical Mechanics (QFR)**

The thermodynamic laws provide us with our most powerful and general scientific principles for predicting the direction of spontaneous change in physical, chemical, and biological systems. This course develops the concepts of energy, entropy, free energy, temperature, heat, work, and chemical potential within the framework of classical and statistical thermodynamics. The principles developed are applied to a variety of problems: chemical reactions, phase changes, energy technology, industrial processes, and environmental science. Laboratory experiments provide quantitative and practical demonstrations of the theory of real and ideal systems studied in class.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: class participation, oral presentations, problem sets, laboratory work, and an independent project

Prerequisites: CHEM 155 or CHEM 256; or CHEM 200; and basic knowledge of applied integral and differential calculus

Enrollment Limit: 16/lab

Enrollment Preferences: Chemistry majors: seniors, juniors, then sophomores

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFC requirement and relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

LAB Section: 02 T 1:00 pm - 5:00 pm Enrique Peacock-López

**CHEM 367 (S) Biophysical Chemistry**

In this course, physical chemistry concepts are presented from the viewpoint of their practical application to a set of biochemical problems, which are explored side-by-side in the lecture and highly-integrated lab program. Major emphasis is placed on quantitative thermodynamic models of equilibrium processes, and students will learn how to develop and apply mathematical models to data. The main topics covered include: 1) conformations of biological macromolecules and the forces that stabilize them; 2) spectroscopic techniques for the study of structure and function; and 3) macromolecular interactions and binding.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: problem sets and/or quizzes, laboratory work, and exams

Prerequisites: CHEM 155 or CHEM 256 and CHEM 251; or CHEM 200 and CHEM 201; and BIMO 321 (or permission of instructor), with MATH 140 or equivalent preferred

Enrollment Limit: 18; 9/lab

Enrollment Preferences: junior and senior Chemistry majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option
CHEM 368 (S) Computational Chemistry and Molecular Spectroscopy (QFR)
This tutorial provides an introduction to the principles of computational quantum mechanics and their application to problems of chemical interest such as chemical bonding, chemical reactivity, and molecular spectroscopy. Emphasis is placed upon modern electronic structure calculations, their fundamentals, practical considerations, interpretation, and applications to current research questions. Under guidance in sessions and through independent work, students will use computational methods to explore assigned weekly research problems. The research results will be presented to and discussed with the tutorial partner at the end of each week.

Requirements/Evaluation: tutorial participation, presentations, and submitted papers
Prerequisites: CHEM 361 or equivalent background in Physics
Enrollment Limit: 10
Enrollment Preferences: Chemistry majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFC requirement with problem sets for assignments in which quantitative/formal reasoning skills are practiced.

CHEM 10  Zymurgy

An introduction to the science, history, and practice of brewing beer. This course aims to supply the general chemical concepts and hands-on technical experience necessary to enable creative brewing and an appreciation of diverse beer styles. Lecture topics include the biochemistry of yeast, sanitary practices, analytical methods, malt types and preparation, extract vs. all-grain brewing, hops, water chemistry, the chemistry of off-flavors, and beer judging. In the lab, students progress from brewing a commercially available extract kit to producing a full-grain brew of their own original recipe. The class will also meet professional brewers and microbiologists during a private tour of a local brewery.

Requirements/Evaluation: Evaluation is based on class/lab participation, a 10-page paper, and a final presentation

Prerequisites: Must be 21 years of age

Enrollment Limit: 12

Enrollment Preferences: Preference is given to students with a strong background/aptitude in the sciences, and to those who express the earliest and most compelling interest by email to Professor Smith.

Expected Class Size: 12

Grading:

Materials/Lab Fee: $500

CHEM 11  Time Travel in Fact, Fiction, and Film

Time travel has intrigued humans for, well, quite some time! This fascination with the future, the past, and our (in)ability to move between them at will shows up in countless books, TV shows, and films. In this course, we will explore both the scientific understanding of time and the fictional depiction of time travel in popular media. On the side of "fact," we will learn about Einstein's theories of relativity, what they imply about time, and how to resolve the apparent paradoxes that they pose. On the side of "fiction," we will watch and analyze movies selected from among: "Back to the Future," "Bill and Teds Excellent Adventure," "Interstellar," "Harry Potter and the Prisoner of Azkaban," or others chosen by the class.

Requirements/Evaluation: Final paper critiquing the portrayal of time travel in a book or film of the student's choosing

Prerequisites: None. While previous experience with relativity theory (e.g. at the level of PHYS 142) may be useful, no previous science courses are required.

Enrollment Limit: 16

Enrollment Preferences: Demonstrated interest/curiosity

Expected Class Size: 8

Grading:

Not offered current academic year

CHEM 12  (W)  The Practice and Processes of Making Pottery

This course will introduce students to creative methods of working with clay and glazes to create functional pottery, and to the materials and processes of ceramics. Classes will take place in a working Williamstown pottery studio with potter's wheels and space for hand-building and discussions. Studio lessons are designed to stimulate creativity and discovery. Instruction and projects will be tailored to each student's interests, experiences, and abilities. Students will be encouraged to consider how value and beauty can be found in that which is incomplete, impermanent, and/or imperfect.

Genuineness and authenticity will be encouraged and valued. We will learn about the origins and properties of clay and glaze materials and about how combinations of materials and the high temperature processes result in mature clay bodies and glazes. We will study the major components of glazes and how the manipulation of these materials changes how glazes appear and function. Evaluation for this course will include a final project, and the critical review of the same. Assessment will take place during individual discussion with the instructor during the construction and finishing processes and in a structured, group critique where finished work will be evaluated by all members of the class through a group discussion led by the instructor. No previous experience is necessary. The only prerequisite for this course is an honest interest in learning about the making and chemistry of pottery.
Studio time will likely be afternoons and early evenings, with an optional weekend session to accommodate schedules. Class time is about 12 hours weekly, and may include some outside of class reading and other assignments.

Requirements/Evaluation: Creative project(s)

Prerequisites: None; no pottery making experience or science background are necessary; students are encouraged to submit a brief description of their interest in participating

Enrollment Limit: 10

Enrollment Preferences: Level of enthusiasm for learning the craft, materials, and processes of pottery

Expected Class Size: 10

Grading: pass/fail only

Unit Notes: Tim Duncan has been making pottery for over 30 years. He teaches in a home studio that accommodates up to 10 students, and focuses on creating lessons that stimulate creativity and discovery.

Materials/Lab Fee: $233

Attributes: EXPE Experiential Education Courses SLFX Winter Study Self-Expression

Not offered current academic year

CHEM 16 (W) Glass and Glassblowing

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students. Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time. The first and last classes are required, so make your travel plans accordingly.

Requirements/Evaluation: class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by email to Professor Thoman

Expected Class Size: 10

Grading: pass/fail only

Unit Notes: Jay Thoman is the J. Hodge Markgraf Professor of Chemistry, Emeritus. He has taught this course many times.

Materials/Lab Fee: $135

Attributes: EXPE Experiential Education Courses SLFX Winter Study Self-Expression STUX Winter Study Student Exploration WELL Winter Study Wellness

Not offered current academic year

CHEM 18 (W) Introduction to Research in Biochemistry

An independent experimental project in biochemistry is carried out in collaboration with a member of the Department with expertise in biochemistry. Biochemistry is a branch of chemistry that deals with the molecular details of living systems including the interaction of biologically important molecules. In the Chemistry Department, studies are underway to investigate the structure/function relationship of proteins, the interaction between proteins and RNA and DNA, the molecular basis of bacterial gene regulation, the lipid composition of model membranes, and the molecular underpinnings of viral infection.

Requirements/Evaluation: a 10 page paper or equivalent assignment

Prerequisites: Completion of a Chemistry introductory level course and permission of the instructor and department; interested students must consult with the faculty instructor.

Enrollment Limit: 4

Enrollment Preferences: expression of student interest

Expected Class Size: NA
CHEM 20 (W) Introduction to Research in Inorganic Chemistry
Students in this course will carry out an independent research project in collaboration with a member of the Department with expertise in inorganic chemistry. Representative projects include the synthesis and study of polymers to encapsulate heavy metals with an eye to environmental remediation and the synthesis of coordination complexes as models of enzymes and as catalysts for the oxidation of organic compounds. The interdisciplinary nature of the project will expose students to a range of inorganic and organic synthetic protocols and analytical and spectroscopic techniques for the characterization of new materials and the monitoring of catalysis. In addition to lab work, participants will engage in an exploration of careers in chemistry and a discussion of topics of interest to chemists, such as ethics and creating a diverse workforce.

Requirements/Evaluation:  a 10-page paper
Prerequisites:  Completion of a Chemistry introductory level course and permission of the instructor and department; interested students must consult with the faculty instructor.
Enrollment Limit:  8
Enrollment Preferences:  expression of student interest
Expected Class Size:  NA
Grading:  pass/fail only

CHEM 23 (W) Introduction to Research in Organic Chemistry
An independent experimental project in polymer organic chemistry is carried out in collaboration with a member of the Department. Representative projects focus on controlled synthesis of block copolymers as self-assembled nanocarriers. Students involved in this work will learn techniques involved in organic synthesis, including analysis by NMR, IR, and SEC.

Requirements/Evaluation:  10-page paper
Prerequisites:  Completion of a Chemistry introductory level course and permission of the instructor and department; interested students must consult with the faculty instructor.
Enrollment Limit:  4/lab
Enrollment Preferences:  expression of student interest
Expected Class Size:  NA
Grading:  pass/fail only

CHEM 24 (W) Introduction to Research in Physical Chemistry
An independent experimental or theoretical project in physical chemistry is carried out in collaboration with a member of the Department with expertise in physical chemistry. Current research projects in the Department include computer modeling of non-linear, chaotic chemical and biochemical systems, atmospheric chemical dynamics, molecular modeling of water clusters, molecular dynamics simulations, and laser spectroscopy of chlorofluorocarbon substitutes.

Requirements/Evaluation:  10-page paper
Prerequisites:  Completion of a Chemistry introductory level course and permission of the instructor and department; interested students must consult with the faculty instructor.
Enrollment Limit:  6
Enrollment Preferences:  expression of student interest
Expected Class Size:  NA
Grading:  pass/fail only

Attributes:  EXPE Experiential Education Courses  STUX Winter Study Student Exploration
CHEM 31 (W) Senior Research and Thesis: Chemistry
To be taken by students registered for Chemistry 493, 494.

Requirements/Evaluation: None
Prerequisites: None
Enrollment Limit: 20
Enrollment Preferences: students registered for Chemistry 493, 494
Expected Class Size: NA
Grading: pass/fail only

Not offered current academic year

CHEM 99 (W) Independent Study: Chemistry
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
Department Mission Statement and Curricular Goal

The mission of the department is to produce “global citizens” with multilingual abilities, intercultural communicative competence, and multicultural leadership skills, who will be able to make contributions in different sectors of society in a globalized and diverse world. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.
THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

LANGUAGE PLACEMENT

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their language study at the college should complete a placement evaluation before pre-registering for a language course. More information about the Chinese placement evaluation can be found at https://chinese.williams.edu/faq/. Students who wish to take the Japanese placement test should contact the Japanese faculty.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in
Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student’s grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Fellowships for Summer Study in Asia which fund selected students’ summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar’s office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

“DALLC Majors and Faculty” (open to all current and prospective Chinese, Japanese, or East Asian Languages and Cultures majors):
https://glow.williams.edu/enroll/AWTMXP

“Asia-Related Funding Opportunities” (open to all students who would like to seek internal or external funding related to Asia):
https://glow.williams.edu/enroll/PGJHAC

“Special Interest Chinese” (open to all students interested in Chinese language and culture): https://glow.williams.edu/enroll/XEYMPG

“Special Interest Japanese” (open to all students interested in Japanese language and culture): https://glow.williams.edu/enroll/DAYTN3

---

**CHIN 101 (F) Basic Chinese**

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China, the de facto official language of Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing at about the 200-character level. The relationship between language and
culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively. CHIN 101 and CHIN 102 constitute an integral, indivisible year-long course. Students who register for a year-long course are required to complete both semesters of that course within the same academic year. Students who fail to take and pass the second half of a year-long course will incur a course deficiency.

**Class Format:** (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral and silent reading, questions and discussion in Chinese, translation and explanation in English as needed.

**Requirements/Evaluation:** classroom performance, homework, quizzes, unit tests, and an oral and written final exam

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** If the course is overenrolled, priority will be given to first-year students, sophomores, and majors in the Department of Asian Languages, Literatures & Cultures.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** Course credit is granted only if both semesters (CHIN 101 and CHIN 102) as well as the Winter Study Sustaining Program, which is taken in addition to a regular Winter Study course, are taken and passed.

**Distributions:** (D1)

---

**CHIN 102 (S) Basic Chinese**

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China, China and Taiwan, and one of the de facto official languages of Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing at about the 500-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively. Traditional characters will be introduced. CHIN 101 and CHIN 102 constitute an integral, indivisible year-long course. Students who register for a year-long course are required to complete both semesters of that course within the same academic year. Students who fail to take and pass the second half of a year-long course will incur a course deficiency.

**Class Format:** (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral and silent reading, questions and discussion in Chinese, translation and explanation in English as needed.

**Requirements/Evaluation:** attendance and participation, daily quizzes in the form of dialog or reading performance, homework, regular unit tests, and oral and written exams.

**Prerequisites:** CHIN 101 and WSP Sustaining Program or equivalent. Students who have never taken a Chinese language course at Williams should complete the Chinese Placement Evaluation in GLOW before registering for this course.

**Enrollment Limit:** 12

**Enrollment Preferences:** If the course is overenrolled, first priority will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; and second priority will be given to first-year students and sophomores.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** Course credit is granted only if both semesters (101 and 102) as well as the Winter Study Sustaining Program, which is taken in addition to a regular Winter Study course, are taken and passed.

**Distributions:** (D1)
CHIN 131  (S)  Basic Cantonese
Cross-listings:  ASIA 130

Primary Cross-listing

An introduction to Standard Cantonese, a major regional language of southern China which is spoken by over 70 million people in Hong Kong, Macao, Guangdong, and Guangxi as well as by many overseas Chinese in Southeast Asia, Hawaii, and North America. Due to the pervasive influence of Hong Kong as well as the economic transformation of Guangdong Province, the prestige of Cantonese within greater China rose steadily in the period 1980-2010 and it continues to be an important language today. Our focus in this course will be on developing basic listening and speaking skills, though some attention will also be paid to written Cantonese, including the special characters which have been used for centuries to write colloquial Cantonese, which have become even more widely used in Hong Kong since 1997. Since students will ordinarily possess prior proficiency in Mandarin, a rather closely related language, they should be able to attain in one semester approximately the same proficiency level that is attained in the first two semesters of Mandarin.

Class Format:  dialog performance, drills, communicative exercises, oral reading, questions, and discussion

Requirements/Evaluation:  Evaluation is based on classroom performance, quizzes, unit tests, and an oral and written final exam.

Prerequisites:  CHIN 202 or permission of instructor

Enrollment Limit:  12

Enrollment Preferences:  Chinese and East Asian Languages & Cultures majors as well as Asian Studies concentrators

Expected Class Size:  12

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 130(D1) CHIN 131(D1)

Not offered current academic year

---

CHIN 152  (S)  Basic Taiwanese/Southern Min
Cross-listings:  ASIA 152

Primary Cross-listing

This course constitutes an introduction to Taiwanese, the majority language of Taiwan, which is essentially the same as the native language of Xiamen, China and environs. Different varieties of this language, which is also known as Amoy, Hokkien, Fukienese, and Southern Min are spoken by about 50 million people in Taiwan, southern Fujian, the Philippines, Indonesia, Malaysia, and Singapore. Suppressed in Taiwan by the Japanese from 1895-1945 and by the KMT Chinese government from 1945 through the 1970s, Taiwanese--in both its spoken and written forms--has been experiencing a fascinating revival in recent decades. The most divergent of all the Sinitic languages, this language is of special linguistic interest because it has preserved a number of features of Old Chinese. Our focus will be on developing basic listening and speaking skills, though we will also study some of the special characters used to write Taiwanese. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Since students in the course will ordinarily possess prior proficiency in Mandarin, a related language, we should be able to cover in one semester about as much as is covered in the first two semesters of Mandarin. Classes will include dialog performance, drills, communicative exercises, and oral reading and discussion of written Taiwanese.

Requirements/Evaluation:  classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites:  CHIN 301 or permission of the instructor

Enrollment Limit:  15

Enrollment Preferences:  if course is over-enrolled, preference given to majors in CHIN, EALC, JAPN and concentrators in Asian Studies

Expected Class Size:  10

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 152(D1) CHIN 152(D1)

Not offered current academic year
CHIN 162  (S)  Languages of East Asia
Cross-listings:  ANTH 162 / ASIA 162 / GBST 162

Primary Cross-listing
A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? How are they used in Asian American speech communities? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice
Requirements/Evaluation:  three quizzes, two 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper
Prerequisites:  none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)
Enrollment Limit:  20
Enrollment Preferences:  open to all with preference to first-year students and sophomores as well as majors/concentrators in CHIN, JAPN, EALC, ANTH, ASIA and GBST
Expected Class Size:  15
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 200  (F)  Accelerated Chinese on Special Topics for Heritage Speakers
Cross-listings:  ASIA 201

Primary Cross-listing
This course is tailor designed for students who already possess intermediate-level proficiency in speaking Chinese but lack the basic reading and writing skills, commonly referred to as heritage speakers of Chinese. They will make accelerated progress in their literacy skills through this course and be able to take either CHIN 202 or CHIN 302 in the spring semester. Adopting a semi-tutorial format (a mix of group classes and two/three-people classes), this course aims to provide differentiated instruction to heritage learners of varying proficiency levels whose Chinese speaking and listening abilities exceed their reading and writing skills. This tailored course will help students effectively expand their literacy skills while helping to solidify the linguistic foundation for continuous proficiency advancement. The main theme of the course is focused on the experiences of Chinese Americans in a global context. Students will gain a deeper understanding of Chinese culture by way of individual projects that are meaningful and relevant to their intellectual interests. Students who are placed into CHIN 102 or 202 at the beginning of the fall semester should consider taking this course in the fall.

Class Format: Semi-tutorial format, students will meet as a large group in most weeks for linguistic development and two-to-three-people groups in some weeks for project-based discussions.
Requirements/Evaluation:  Active participation in class, homework, quizzes, essays, oral presentations, and a final project
Prerequisites:  Students must complete the Chinese Placement Evaluation in GLOW before registering for this course
Enrollment Limit:  12
Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, concentrators in the Program of Asian Studies, and then to first-year students and sophomores

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 201(D1) CHIN 200(D1)

Fall 2024

LEC Section: 01 MR 2:35 pm - 3:50 pm Cecilia Chang

CHIN 201 (F) Intermediate Chinese I

Intermediate Chinese I and II are designed to consolidate the foundations built in Basic Chinese and continue developing students’ skills in aural comprehension, speaking, reading, writing, and intercultural communication. Upon completion of the courses, students should be able to speak Chinese with fluency on everyday topics, reach a literacy level of 1000 characters (approximately 1200 common words written in both traditional and simplified characters), read materials written in simple standard written Chinese, and produce both orally and in writing short compositions on everyday topics. Traditional characters will be introduced. Conducted in Mandarin.

Class Format: Students will do dialog performance and communicative exercises in the speaking/listening classes. We will do read-aloud, questions and answers in the reading/writing classes.

Requirements/Evaluation: attendance and active participation, daily quizzes in the form of speaking or reading performances, homework, regular unit tests, and a final exam (including both oral and written portions)

Prerequisites: CHIN 102 or permission of instructor. Students who have never taken a Chinese language course at Williams should complete the Chinese Placement Evaluation in GLOW before registering for this course.

Enrollment Limit: 12

Enrollment Preferences: Priorities will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, first-year students and sophomores, then to juniors and seniors.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Fall 2024

LEC Section: 01 MWF 9:00 am - 9:50 am TR 8:55 am - 9:45 am Ju-Yin Wang

CHIN 215 (S) Foundations of Confucian Thought (DPE) (WS)
Cross-listings: REL 295 / ASIA 215

Primary Cross-listing
How should people treat each other? What constitutes human nature and does it tend towards good or evil? How should we organize society, by focusing on laws and regulations, or on ritual and moral guidance? What is the nature of moral rulship? What is the proper relationship between the individual and larger units of society, from the family to the state? These are some of the key questions that the school of thought that has come to be known as "Confucianism" addresses. As the dominant moral and political philosophy for thousands of years in much of East Asia, Confucianism has shaped our world, past and present, in innumerable ways. In this class we will focus on the foundational texts of the Confucian tradition: the Analects (purported to record the words of Confucius himself), Mengzi (often romanized as "Mencius"), and Xunzi. Beyond those questions noted above, we will further examine how these texts construct their arguments; how they were first composed, compiled, and circulated; how they employ such key concepts as "humaneness" (ren), "moral power" (de), and "ritual propriety" (li); and how they functioned as part of the larger philosophical, linguistic, political, and historical context that we now think of as "early China."

Requirements/Evaluation: Evaluation is based on writing assignments (3-4 pages, 5-6 pages, and 10-12 pages) and participation in class discussions.

Prerequisites: None.
Enrollment Limit: 19
Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; current or prospective Asian Studies concentrators; and Religion majors.

Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
CHIN 215(D1) REL 295(D2) ASIA 215(D1)

Writing Skills Notes: Writing will include short writing assignments (1 paragraph, 3-4 pages, and 5-6 pages) that will involve drafts, feedback and revision, and one longer final paper of 10-12 pages that will involve close consultation with the instructor during the writing process.

Difference, Power, and Equity Notes: Throughout the course we will examine how these texts deal with issues of differentials of power, both political and social, in a range of contexts. In particular, we will discuss how these texts conceptualize political and social power and how they see hierarchy and difference functioning in both beneficial and deleterious ways in society.

Not offered current academic year

CHIN 217 (S) The Literature of Early China (WS)
Cross-listings: ASIA 209 / COMP 211

Primary Cross-listing
From poems on forbidden trysts and tales of bloody battles to aphorisms about filial piety and essays on moral governance, the literature of early China spans a wide range of topics and genres. In this course we will read, discuss, and write about literary works from the period stretching from approximately 600 BCE to the end of the Han empire in the third century CE, including poems, narratives, and philosophical works. All readings will be in English.

Requirements/Evaluation: Evaluation is based on writing assignments (1 paragraph, 3-4 pages, 5-6 pages, and 8-10 pages) and participation in class discussions.
Prerequisites: None
Enrollment Limit: 19

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; current or prospective majors in Comparative Literature; and current or prospective concentrators in Asian Studies.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Counts as a core elective for majors in Asian Languages, Literatures, and Cultures.

Distributions: (D1) (WS)

CHIN 226  (F)  Chinese Film and Its Significant Others  (DPE)

Cross-listings: ASIA 226 / COMP 296

Primary Cross-listing

From the first "wows" that the short films invoked at a Shanghai teahouse in 1896, Chinese films have made successive wonders that straddle reality and fantasy, technological modernity and shadow-making craft, aesthetic experiments and monetary yearnings, global investments and local interest. This seminar will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) Pre-class discussion posts based on reading (Graded as Complete or Incomplete); 3) Three short papers (3 pages); and 4) the final group project (including a presentation, and a paper or other form of project. Students will be graded both individually and as a group).

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in Department of Asian Languages, Literatures, and Cultures; Comp Lit majors; those with Asian Studies Concentration.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
CHIN 226(D1) ASIA 226(D1) COMP 296(D1)

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the clashes and negotiations between Western media technological modernities and Chinese indigenous understanding of shadows, visuality, and sound. By discussing various films produced from mainland China, Hong Kong, Taiwan, and other diaspora areas from 1920 to now, this course asks students to explore how cinema invokes (and erases) differences, and consolidates (and challenges) hegemonic notions of nation, gender, and class.

Fall 2024
SEM Section: 01    TF 2:35 pm - 3:50 pm     Man He
Primary Cross-listing

"Asian Theaters," for those in the West, can conjure up a variety of exotic impressions: spectacle and cacophony, mysterious masks and acrobatic bodies, exotic styles and strangely confusing conventions. Although Asian theaters have been studied systematically in the West for at least a century, the West has never truly left its "othering" look at them. Yet, what is "different" for the West is bedrock for Asian cultures. Theatre, one of the most important and dynamic forms of cultural production and communication, has actively involved all strata of Asian societies for a millennium. How to explain theatre's continued presence and relevance for Asian nations? What do the traditions of Kun, Kabuki, and P'ansori reveal about the cultures and communities in which they were created? This course seeks to understand from the Asian perspective, rather than "exoticize" and "other," musical and dance theatres from China, Japan, and Korea. Examining the evolving presentations of signature dramas dating from the sixteenth to the eighteenth centuries, we will act out Asian theatres in the following ways: (1) by reading the original plays in translation in tandem with their contemporary and intercultural reproductions, we will explore how Asian theatres fare in the era of globalization within and beyond national borders; (2) by revealing the "technologies" of writing, reading, acting, and staging these plays in different cultural milieus, we will consider what kinds of language and rhetoric, forms of music and movement, as well as visual components are deployed to convey evolving messages; (3) by considering key performances held outside of the prosenium stage, we will gain exposure to alternative theatrical spaces in Asian and diasporic communities that reform performing conventions, reconfigure staging environments, and renegotiate cultural values. In this manner, we will together gain an appreciation for the aesthetic devices, thematic concerns, and production politics of East Asian theatres and their global reproductions. Class materials include drama, production videos, and invited zoom sessions with Asian theatre practitioners and directors who live in the U.S. and other diasporic communities. All materials are in English. No language prerequisite. Funded by the Global Initiatives Venture Fund, this course includes an all-expense-paid travel component, a cultural and academic exchange project titled "Redefining Amateurism: Experiential Learning with Student Theatre in Contemporary China," which will bring up to eight Williams students to Nanjing, China during the Spring Break (3/23-4/3/2025). Students will participate in workshops with playwrights and theater-makers in contemporary China and engage in black-box theater productions with students from Nanjing University and Shanghai Theatre Academy. This travel component is OPTIONAL for students taking this course. However, students enrolled in this class will receive priority consideration to be included in the free travel project. Selection criteria include active participation, excellent performance in the course, etc.

Class Format: Funded by the Global Initiatives Venture Fund, this course includes an all-expense-paid travel component, which will bring up to eight Williams students to Nanjing, China during the Spring Break (3/23-4/3/2025). This travel component is OPTIONAL for students taking this course. However, students enrolled in this class will receive priority consideration to be included in the free travel project. Selection criteria include active participation, excellent performance in the course, etc.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) three small projects (papers and audio/video essays); 3) a take-home midterm; and 4) Poster presentation based on students' final projects.

Prerequisites: None; open to all. No knowledge of Asian languages required, though students with advanced Asian language proficiency are encouraged to work with primary sources if they wish.

Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Theatre majors; Comp Lit majors; Concentrators in Asian Studies or Asian American Studies.

Expected Class Size: 15

Spring 2025
CHIN 301 (F) Upper-Intermediate Chinese I
The goal of this course is to continue developing students' overall language proficiency. However, special emphasis will be on strengthening students' reading and writing proficiency in standard written Chinese, the grammar and vocabulary of which differ considerably from colloquial Chinese introduced during the first two years of instruction. Students will continue to improve reading proficiency in both simplified and traditional characters. Conducted in Mandarin.

Class Format: The class meets four days per week, twice in lecture (75 mins) and twice in conference (50 mins).

Requirements/Evaluation: Evaluation will be based on daily classroom performance, short essays, presentations, homework, quizzes, unit tests, and a final exam (oral and written).

Prerequisites: CHIN 202 or permission of instructor. Students who have never taken a Chinese language course at Williams should complete the Chinese Placement Evaluation in GLOW before registering for this course.

Enrollment Limit: 12

Enrollment Preferences: Current or perspective majors in the Department of Asian Languages, Literatures, and Cultures; Asian Studies Concentrators.

CHIN 312 (F) Introduction to Classical Chinese
This course is an introduction to the grammar and basic vocabulary of Classical Chinese, the standard written language of China from around the seventh century BCE through the 1920s (and for many centuries an important written language in Japan, Korea, and Vietnam as well). Aspects of
Classical Chinese continue to play a role in both written (e.g., in newspaper, academic, and legal writing) and in spoken (e.g., proverbs and aphorisms) modern Chinese. Our work in this course will be based on reading, translating, and discussing philosophical, political, literary, and historical anecdotes from the Spring and Autumn (770-481 BCE) through the Han (206 BCE-220 CE) periods, as they served as the foundation for the language. We will conduct discussions of grammatical and philological issues primarily in English and most of our translation work will be from Classical Chinese into English. We will, however, frequently discuss the points of intersection between Classical and Modern Chinese. Students are required to have completed CHIN 202 or the equivalent. Students who have extensive reading knowledge of Chinese characters through other languages (such as Japanese) may also take this course with the instructor's permission.

Requirements/Evaluation: Classroom performance, homework, quizzes, tests, and a final exam
Prerequisites: CHIN 202 or extensive reading knowledge of Chinese characters through other languages
Enrollment Limit: 40
Enrollment Preferences: Students who have completed CHIN 202 or have extensive reading knowledge of Chinese characters through other languages

**CHIN 421 (F) Chinese Societies through the lens of COVID-19**

**Cross-listings:** GBST 386 / ASIA 421

**Primary Cross-listing**

The COVID-19 pandemic has profoundly changed the world. How did the Chinese-speaking regions in Asia, including Mainland China, Taiwan, and Singapore, respond to the pandemic during its earlier years? How did their responses reflect the political and economic systems as well as the cultural values of Asian societies? What were the effects of these responses on the regions and people's daily lives? In this course, students will gain a deeper understanding of Chinese-speaking societies through an analysis of the "public" and "private" literature pertaining to the lived experiences of the COVID-19 pandemic. Through readings and discussions of various materials such as government records, scientific publications, journalistic writings, personal diaries, and online narratives, students will explore a wide range of issues related to the politics, economy, public health, and sociocultural issues of Asian societies. Simultaneously, Chinese language learners will further enhance their language proficiency and intercultural competency by engaging in complex discourse in the target language. All readings and discussions are in Chinese.

**Requirements/Evaluation:** Evaluation will be based on CLASS performance, homework, two short papers (4-5 pages), and one longer paper (8-10 pages).

**Prerequisites:** CHIN 402 or permission of instructor

**Enrollment Limit:** 12

**CHIN 425 (S) Becoming Taiwan: Social, Cultural, and Economic Discourses of Modern Day Taiwan**

**Cross-listings:** ASIA 425

**Primary Cross-listing**

Nestled in East Asia, Taiwan stands as a dynamic island home to a populace of 23 million. From 1949, when the Nationalist Party (KMT) retreated to Taiwan after the Chinese Civil War, to becoming one of the Four Asian Tigers in the latter half of the 20th century, Taiwan has developed into a multifaceted society through an array of social/cultural/economic changes associated with industrialization, globalization and identity formation.
Throughout this course, we will delve into pivotal moments that have shaped contemporary Taiwanese society, drawing insights from literary works, films, journalistic exposés, and academic discourse. Through group discussions and individual projects, students will not only acquire specialized vocabulary but also hone their ability to dissect and debate complex ideas in Mandarin pertaining to the aforementioned themes. Crafted in a semi-tutorial format, this course aims to cultivate linguistic proficiency ranging from Advanced Low to Advanced Mid as outlined by the ACTFL proficiency guidelines. To enrich the learning experience, language partnerships will be forged in collaboration with a graduate program in Chinese pedagogy based in Taiwan, offering further opportunities for in-depth engagement with course materials.

Class Format: Mandarin Chinese will be the instructional language for this course. Semi-tutorial format, students will meet as a large group on one day for linguistic development and three to four people groups on other days for discussions.

Requirements/Evaluation: quizzes, presentations, posting of discussion questions, two position papers (3 pages) and one final paper (5 pages)

Prerequisites: CHIN 402 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Majors in Chinese; DALLC; Asian Studies Concentration; seniors.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

SEM Section: 01 TF 1:10 pm - 2:25 pm Cecilia Chang

CHIN 427 (F) Spring Grass: A Peek into Inequality in China (DPE) (WS)

Cross-listings: WGSS 127 / ASIA 127

Primary Cross-listing

Spring Grass (Chuncao) is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (gaige kaifang) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues. Through close readings of the novel, the eponymous TV drama series, documentaries, and films depicting rural life and women's roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls’ right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong's proclamation "women can hold up half of the sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (nannü bu pingdeng) and the urban/rural-gap (chengxiang chabie) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: For all students, active participation in tutorial meetings and an online writing portfolio as the final project. For CHIN students, four 4- or 5-page tutorial papers and revisions in Chinese, four 2-page critiques. For ASIA/WGSS students, five 5-page tutorial papers in English, five 2-page critiques, one revised paper.

Prerequisites: For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.

Enrollment Limit: 10
Enrollment Preferences: Enrollment priorities will be given to Chinese language learners who register under CHIN, and to freshmen and sophomores who register under ASST or WGSS.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 127(D2) CHIN 427(D1) ASIA 127(D1)

Writing Skills Notes: Writing is taught using the writing-as-process pedagogical approach. The writing process consists of invention, composition, and revision. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. The instructor gives detailed feedback to students' drafts and students are required to turn in revisions. At the end of the semester, students will compile an online writing portfolio to showcase their best works.

Difference, Power, and Equity Notes: The issue of "inequality," including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such inequality.

Not offered current academic year

CHIN 428 (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films (DPE) (WS)

Cross-listings: ASIA 228 / COMP 297

Primary Cross-listing

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant-reading textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

Prerequisites: None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428

Enrollment Limit: 10

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; COMP majors; Asian Studies Concentration

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 228(D1) CHIN 428(D1) COMP 297(D1)

Writing Skills Notes: Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner’s paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and pasts; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

MAJOR
Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

**Route A:** (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language. (2) Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

**Route B:** (1) One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223). (2) Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302. (3) Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

**Classics Colloquium:** All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

**THE DEGREE WITH HONORS IN CLASSICS**
Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

**COURSE NUMBERING SYSTEM**
**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on previous experience.
Classical Studies Courses: The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS 101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

STUDY AWAY
We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No, but students should consult with the department about language sequences.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:
None to date.

CLAS 101 (F) Greek Literature: Performance, Conflict, Desire
Cross-listings: COMP 101 / THEA 104 / DANC 101

Primary Cross-listing
In the Iliad, Paris' desire for the famously beautiful Helen leads to the Trojan War, the devastating conflict between the Trojans and the Greeks retold and reimagined time and again in ancient Greek literature. The stories of Troy and its aftermath were performed not only as epic poems (as in the Iliad and the Odyssey), but also re-enacted by singing and dancing choruses, dramatized on the tragic stage, and recounted in oratory. Beginning with the Homeric epics, this course explores the recurring and ever-shifting debates, longings, hostilities, and aspirations that drive Greek literature and shape its reception, with a particular focus on questions of performance context and audience. Our attention to sound, movement, and staging will be enriched by consideration of select examples from the rich reception history of Greek myth in modern theater and dance. The nexus of performance, conflict, and desire will also give us a distinct perspective on many important topics within the study of Greek culture, including the embodiment of personal and collective identities, the workings of Athenian democracy, and the development of literary genres. This course will include readings from,
e.g., Homer, Sappho, Herodotus, Aeschylus, Sophocles, Euripides, Aristophanes, Thucydides, and Plato, as well as viewings of relevant performance works. All readings are in translation.

Requirements/Evaluation: midterm and final exam; brief (one or two pages) written assignments; participation in class.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Classics majors, first years, sophomores

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

LEC Section: 01 TR 9:55 am - 11:10 am Sarah E. Olsen

CLAS 102 (S) Roman Literature: Gender, Virtue, Empire

Cross-listings: COMP 108

Primary Cross-listing

In the first book of Vergil's Aeneid, the god Jupiter prophesies the foundation and the greatness of Rome: "I place no limits on their fortunes and no time; I grant them empire without end." Yet elsewhere in this epic account of Rome's origins, this promise of unlimited power for the descendants of Romulus seems to be seriously abridged. Some readers have seen, not only in the Aeneid but throughout classical Roman literature, a persistent tendency to inscribe the decay and disintegration of Roman power into the very works that proclaim and celebrate Roman preeminence. This course explores the ancient Romans' own interpretations of their past, their present, and their destiny: the humble beginnings of their city, its rise to supreme world power, and premonitions of its decline. Related topics for our consideration will include Roman constructions of gender, the location and expression of virtue in the public and private spheres, the connections and conflicts between moral probity and political success, the exercise of individual power versus action on behalf of the commonwealth, the absorption of foreign customs and peoples into Rome, the management of literal and imaginary frontiers, and other anxieties of empire. We will read selections and complete works by a wide variety of Roman authors, including Cicero, Catullus, Caesar, Vergil, Sallust, Horace, Ovid, Seneca, and Tacitus. All readings will be in translation.

Class Format: discussion

Requirements/Evaluation: short written assignments, midterm and final exams with essays, and contributions to class discussion

Prerequisites: none

Enrollment Limit: 25

Not offered current academic year

CLAS 105 (F) Telling Tales in Ancient Greece (WS)

Cross-listings: COMP 104

Primary Cross-listing

One-eyed monsters, magical spells, and trips to the moon: Greek literature is replete with tales of fantastic creatures and wild adventures. These ancient stories give us valuable opportunities to explore early understandings of "fiction," the development of narrative, and the construction of the storyteller in both poetry and prose. In this course, we will read texts from Homer's Odyssey (8th cent. BCE) to Heliodorus' Aethiopica (4th cent. CE),
alongside a range of scholarly approaches to them. We will pay particular attention to the prose fiction of the Roman imperial era, including both the texts traditionally called the "ancient novel" as well as the various forms of biography, ethnography, and mythography adjacent to them. Throughout, we will explore narratives and representations of gender, sexuality, race/ethnicity, class, and cultural identity, reflecting on how our primary sources engage with their complex social and political contexts. All readings will be in English.

**Requirements/Evaluation:** regular tutorial papers and response, discussion in tutorial meetings

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first years, sophomores

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**CLAS 111 (F) Oracle, Prophecy, Possession: Commun(icat)ing with Divine Powers**

**Cross-listings:** REL 111

**Secondary Cross-listing**

This course explores a set of practices and contexts in which humans have sought to interact with divine powers. We shall ask how humans interact with divine powers through the techniques of spirit possession, prophecy, and consulting with oracles. Importantly, we shall also ask how these interactions reveal and produce what it is to be human, with attention to differences among humans and the relation between humans and nonhuman forces (divine powers but also natural forces and other animals). The bulk of the course will focus on ancient examples from cultural contexts near the Mediterranean Sea, but we shall also consider other geographical regions and some modern practices and contexts. Ideal for students interested in ancient religions but also those interested in questions of power, agency, and how the ways that we imagine what it means to be human involve questions about nonhuman forces (whether imagined in religious, scientific, philosophical, or other terms).

**Class Format:** the class will include 1 or more field trips

**Requirements/Evaluation:** weekly GLOW posts; 2 3-page papers; 1 collaborative project; 1 final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** first-year students, then second-year students, then majors in religion or classics

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**CLAS 202 (S) Greek Tragedy (DPE)**

**Cross-listings:** THEA 220 / COMP 220

**Primary Cross-listing**

Ancient Greek tragedy was a cultural phenomenon deeply embedded in its 5th-century Athenian context, yet it is also a dramatic form that resonates powerfully with 21st-century artists and audiences. This course examines tragedy on both levels. We will read such plays as Aeschylus' *Agamemnon,*
Sophocles' Electra, and Euripides' Medea in English translation, considering their literary and dramatic features as well as their relationship to civic, social, and ritual contexts. We will discuss such topics as the construction of gender and identity on the dramatic stage, the engagement between tragedy and other literary genres, and the distinctive styles of the three major Athenian playwrights. We will also survey a set of recent productions and adaptations of these plays, with a particular focus on how modern playwrights and producers use Greek tragedy to explore justice, power, race, gender, status, and sexuality. We will consider how a dramatic form largely produced by and for Athenian citizen men became a creative resource for a remarkably diverse range of 21st-century artists, and explore how modern productions offer fresh perspectives on ancient material. All readings will be in English.

Requirements/Evaluation: class participation, several essays, brief oral presentations

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Classics, Comp Lit, and Theater majors; first-years; sophomores

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

THEA 220(D1) CLAS 202(D1) COMP 220(D1)

Difference, Power, and Equity Notes: This course considers the questions of justice and power central to the performance of tragedy in the ancient Greek world, as well as the manifold ways in which 21st-century artists have used Greek drama to explore the modern construction of race, gender, class, and sexuality. Students will also examine how theater can operate both as a form of institutional power and as a space for exposing, critiquing, and reimagining dominant cultural narratives.

Not offered current academic year

CLAS 203  (F)  History of Ancient Greek Philosophy

Cross-listings: PHIL 201

Secondary Cross-listing

Very few people believe that everything is water, that we knew everything before birth, that philosophers ought to rule the state, or that the earth is at the center of the cosmos. Why then should we spend our time studying people who in addition to having these surprising beliefs have been dead for 2500 years? First of all, Greek thinkers, especially Plato and Aristotle, radically shaped the trajectory of western thought in every area of philosophy. No one can have an adequate understanding of western intellectual history without some familiarity with the Greeks, and we might think that an understanding of our intellectual history can deepen our understanding of our own situation. More importantly, many of the thinkers that we will read in this class are simply excellent philosophers, and it is worthwhile for anyone interested in philosophical problems to read treatments of these problems by excellent philosophers. We will begin the course by looking briefly at some of the Presocratic philosophers active in the Mediterranean world of the seventh through fifth centuries BCE, and some of the sophists active in the fifth century. We will then turn to several of Plato's dialogues, examining Plato's portrayal of Socrates and his development of a new and profoundly powerful philosophical conception. Finally, we will examine some of Aristotle's works on metaphysics, epistemology and ethics, considering some of the ways Aristotle's thought responds to that of predecessors.

Requirements/Evaluation: There will be a midterm and final exam. There will also be short writing assignments.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Philosophy and Classics Majors.

Expected Class Size: 15-20

Grading: no pass/fail option, yes fifth course option

Unit Notes: Philosophy majors must take either PHIL 201 or PHIL 202 (and are encouraged to take both)

Fall 2024
CLAS 209 (F) From Alexander to Cleopatra: Remodeling the Mediterranean World

Cross-listings: ARTH 230

Primary Cross-listing

The period between Alexander the Great (323 B.C.) and Cleopatra (30 B.C.), like our own, was characterized by internationalism, migration, wide-ranging cultural values and religious practices, and ethnically diverse urban populations. Large numbers of non-Greeks came under the control of newly established Hellenistic kingdoms, while in the west Rome's emergence as a superpower offered both new opportunity and danger. The Hellenistic world was a place of vibrant change in the spheres of art, architecture, urban planning, and public spectacle. In this course, we will consider the art and archaeology of this period in their political, social, and religious contexts, focusing on the visual language of power and royalty; developments in painting, sculpture, mosaics, and monumental architecture; interactions between Greeks and non-Greeks; and the impact of Greek culture in Rome.

Requirements/Evaluation: class participation, map quizzes, three short papers, mid-term exam, and a final paper

Prerequisites: none

Enrollment Limit: 40

Not offered current academic year

CLAS 210 (S) Art and Experience in Ancient Rome

Cross-listings: ARTH 211

Primary Cross-listing

To see and be seen—it could be argued that this was the very definition of Roman culture. Much like today, spectacle and the dissemination of images lay at the heart of political and social life. The visual arts were crucial both to how the Romans rehearsed their identity and goals as a community, and to how individual Romans communicated their achievements and values. In this course, lectures on the art and architecture of ancient Rome (ca. 300 B.C.-A.D. 400) will provide the backdrop for an investigation into the role visual culture played in the lives of all Romans, including slaves and former slaves, women and children. Special topics will include the funeral and funerary portraiture; the military triumph and monuments of victory; the house as a site of memory; the use of images on coins; participation in religious celebrations; displays of war booty and prisoners of war; experience and audience at the racetrack and in the amphitheater; the spectacle of food and dining; and the Roman street as both contested space and a place for art. Readings will include a combination of primary and secondary sources. All readings are in translation.

Requirements/Evaluation: attendance and preparation, quizzes/short writing assignments, two exams, and a final project

Prerequisites: none

Enrollment Limit: 35

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

CLAS 213 (F) The Human Figure in the Ancient Mediterranean

Cross-listings: ARTH 213

Secondary Cross-listing

From the earliest representations in the third millennium BCE until the end of the Roman period in the fifth century CE the human body remained the foremost choice of subject for artists, patrons, critics, and the public in the ancient Mediterranean world. This course will consider cultural ideas about the body in antiquity, and trace their repercussions in the modern era. Over the course of the semester we will concentrate on 12 case studies, each representing a specific concept from an area of the Mediterranean. Topics include the "shining bodies" of bare-chested potentates in Egypt and the ancient Near East, statues that give the dead voice, the perfection and humanity of the bodies of the gods, ancient Greek science and the nude goddess, the pathos of Hellenistic athletes, and the interpretative challenge of the ambiguous and sensuous marble forms of the Barberini Faun or the Sleeping Hermaphrodite, both found in Roman contexts. We'll consider the cross-influences of ideas about gender, class, race and the body coded in public and private art. Reading material will include ancient literature in translation as well as contemporary critical essays. Evaluation will be based on participation in discussion and group presentations, short response paper, tests on images, and a final 8-page research paper. Engaged library research of original paper topics will be supported throughout the semester.

Class Format: Lecture and Discussion

Requirements/Evaluation: participation in discussion and group presentations, short response paper, tests on images, a final 8-page research paper.

CLAS 214 (S) Athletics and Literature in Ancient Greece (WS)

Cross-listings: COMP 284

Primary Cross-listing

The modern Olympic games are one of the most visible traces of ancient Greek influence on contemporary culture. Less well-known, however, are the complex and challenging poems (originally songs) of Pindar and Bacchylides that celebrated the victors of the archaic Greek games. These victory odes are a rich source for the study of Greek culture, from their vivid descriptions of heroic feats to their philosophical claims about human life and divine favor. Athletic competition provides the impetus for these songs and constitutes one of their major themes, yet their significance extends far beyond a single athlete or festival. In this course, we will interrogate the relationship between athletics and literary production in the ancient Greek world. We will use both primary and secondary sources to develop familiarity with major festivals, games, events, and figures, and use that knowledge to contextualize our analysis of Greek literature. Ancient Greek athletic discourse will thus provide an entry point to broader reflections on the literary construction and representation of the body and its movement, as well as the interplay between literature and its cultural contexts.

Requirements/Evaluation: brief writing assignments, essays, class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: majors, first-years, sophomores

Expected Class Size: 19
Grading: no pass/fail option, no fifth course option  
Distributions: (D1) (WS)  

This course is cross-listed and the prefixes carry the following divisional credit:  
CLAS 214(D1) COMP 284(D1)  

Writing Skills Notes: Weekly (pass/fail) writing assignments (1-2 pages), five graded essays (two of which will be revisions and expansions of previous work, 4-5 pages each), regular in-class workshops on writing style and essay structure. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.  

Not offered current academic year  

CLAS 215  (F)  Roman Homes and Gardens  
For ancient Romans, the house was far more than a private dwelling intended only for a nuclear family and close friends. Instead, it was a place where many different social roles--those of the homeowners themselves, as well as their dependents, enslaved workers, business partners, and political rivals--were enacted and expressed. The garden also had a crucial part to play, communicating a special relationship with the natural world, with travel lands, or with the divine. In this course, we will examine a wide range of Roman homes and gardens from 250 BCE-300 CE (including shepherds' huts and military camps, apartments and townhouses, villas and palaces), traveling to different geographical regions, both throughout Italy (especially, Pompeii, Herculaneum, and Rome), but also to Britain, Croatia, Israel, Spain, and Tunisia. Using a multi-disciplinary approach, this seminar will explore the archaeology, history, decoration, and social practices of these physical spaces, as well as their deployment as powerful cultural symbols in ancient life and literature--and in later historical periods, too. All readings are in translation.  

Requirements/Evaluation: class participation, short written assignments, and a final project. Students should also plan to take 1-2 field trips to local sites and museums.  
Prerequisites: none  
Enrollment Limit: 20

CLAS 222  (F)  Greek History  
Cross-listings: HIST 222  
Primary Cross-listing  
This course covers the history of ancient Greece from the Bronze Age Minoan and Mycenaean palace civilizations to the Roman conquest of the East Mediterranean (c. 1500-1 BC). We will study the development, expansion, and interactions of Greek society and its cultural expressions through a wide variety of textual sources and archaeological evidence across the Mediterranean basin and West Asia. How did the Greek world conceptualize and enact various modes of individual and collective status, construct political systems from one-man rule to popular democracy, and grapple with issues of memory and identity? How did the Greek world deal with victory and defeat, imperialism and subjugation, freedom and slavery, upheaval and decline? How should we approach the mythology about the origins of humanity, or the subsequent development of natural science and philosophy from Ionia to Athens and beyond? Why has this past continued to work as a mirror in subsequent periods, even up to our modern day? From the collapse of the Mycenaean palaces to the building of the Athenian acropolis, from autocratic warlords to the birth of democracy, from wandering merchants to Hellenistic kings, from Hesiod to Herodotus, Socrates, and Thucydides, this course will seek to reconstruct and understand the trajectory of ancient Greek society and culture from its early inception to its subjugation under Roman rule. All readings will be in translation.  
Class Format: discussion  
Requirements/Evaluation: contributions to class discussions, occasional short written assignments, quizzes, a midterm, a final exam.

CLAS 223 (S) Roman History

Cross-listings: HIST 223 / LEAD 223

Primary Cross-listing

The history of ancient Rome can be seen as an account of formative events, practices, and thought in the history of western culture; it also is the history of the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until modern times. By studying Roman history from Rome's emergence in central Italy in the 7th century BCE through the reign of the emperor Constantine in the early fourth century CE, we will see the complex and fascinating results of an ambitious, self-confident nation's evolution, transformation, and expansion throughout the Mediterranean world. We will consider questions such as, How did a republic with an aversion to autocratic rule and devotion to libertas understand its existence as an imperial power as well as its own elite's dominant rule over Romans and non-Romans alike? How and why did the Roman republic and its deeply entrenched republican ideology give way to the effective rule by one man, Augustus, and the increasingly monarchical rule of the emperors who followed? Did Roman political life in the later republic cause the violence that left it in crisis, or did the persistence of violence in Roman life account for the nature of Roman politics? Who were the non-elites of Rome, Italy, and the Roman empire that often get left in the shadows in our ancient sources? Who were the important writers, politicians, poets, philosophers, and innovators whose works constitute a rich cultural heritage worthy of both appreciation and critique? Throughout the course there will be an emphasis on the problems of historical and cultural interpretation, on how the Roman experience is relevant to our own, and, importantly, on the pleasures of historical investigation. Readings for this course will include a variety of original sources, a range of scholarly essays on specific topics, and a textbook that will provide our chronological framework.

Requirements/Evaluation: Class preparation and participation, quizzes, a midterm, a final exam, and occasional short written assignments.

CLAS 233 (S) Animals in Ancient Literature

Humans are animals, but we tend to view animals as the ultimate other. They delight and terrify us, providing infinite vehicles for the imagination: ways of being other than human and other than civilized, ways of confronting that which seems inhuman in ourselves. In this class, we will read a selection of ancient texts that approach animals in different ways: as inverted humans, as predators, as prey, as agents of the gods, as laborers, as friends, and as a revelation of the ugly truth about our own "human" nature. Primary source readings will be paired with modern scholarly works from classics, comparative literature, and animal studies. We will think about why ancient authors used images of animals in such diverse ways and about our own relationships with animals in modern life, enriching our study with field trips. This is a seminar and will be conducted through discussion and writing workshops, with little to no lecture.

Requirements/Evaluation: weekly reading responses; several short writing assignments; a final paper of 10-15 pages in two drafts; active participation in seminar discussion
**Prerequisites:** None  
**Enrollment Limit:** 25  
**Enrollment Preferences:** Classics majors, then COMP and ENVI majors; senior majors have priority, followed by juniors, sophomores, and first-year students  
**Expected Class Size:** 15

**CLAS 237 (S) The Life of Ancient Cities: Building, Belonging, Trading and Dying in Greece and Rome**

**Cross-listings:** HIST 237

**Primary Cross-listing**

In this course we explore ancient urbanism, investigating Greco-Roman cities from the early archaic period through late antiquity. By analyzing a variety of primary sources -- literature, visual art, inscriptions, papyri, building remains -- dating from 750 B.C. to 300 A.D. and ranging geographically from Spain to central Asia, we will think critically about problems such as communal belonging, spatial interaction, social exclusion, monuments, memories, and identities in urban contexts. Athens and Rome will beckon along the way, but numerous places around the Mediterranean basin and beyond will feature prominently, including Pompeii in southern Italy, Olynthus in Macedonia, Cyrene in North Africa, Ephesus and Priene in western Asia Minor, Alexandria and Berenike in Egypt, and Dura Europos and Ai Khanoum in Central Asia. Every week, we will tackle a core question associated with life in the ancient city: the challenges of urban design, the tensions associated with civic membership, the consolidation of political institutions, the conflicts brought about by trade and migration, the role of religion, the effects of war, the universal reality of social exclusion, cultural expressions of life and death, and the impact of sudden natural catastrophes, among others.

**Requirements/Evaluation:** Class participation in discussion, various written assignments leading toward the development and completion of a research paper on a topic of the student's choosing.

**CLAS 241 (S) Sex and Gender in Ancient Greece and Rome**

**Cross-listings:** COMP 241 / WGSS 241

**Primary Cross-listing**

From the household to the marketplace, from sacred spaces to the political arena, sexuality and gender shaped a broad range of attitudes and actions in the ancient Mediterranean world. This course investigates a variety of discourses and practices around sexuality and gender in ancient Greece and Rome with the aim of promoting students' capacity to evaluate claims and dismantle false assumptions about the continuity of the "classical" past with contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragic and comic drama, epic and lyric poetry, handbooks, epitaphs, novels and biography in order to better understand how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological frameworks through which we approach the primary sources.

**Requirements/Evaluation:** five to six weekly tutorial papers, five to six responses, a midterm self-evaluation and conference with instructor, a
mid-length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper

Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: majors or intended majors in Classics, WGSS, and Comparative Literature
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:

CLAS 243 (S) The Nature of Work
Cross-listings: ARTH 245 / COMP 285

Primary Cross-listing
Work is something that touches the lived experience and historical realities of almost every human being in every time and place. But how did ancient Mediterranean societies and cultures define and deploy the concepts of "work" and "working," as both an activity and as discourse? This is a question that has received remarkably little attention, in part since modern scholars have all too often followed the lead of elite authors, who obscure the nature of work through their focus on its products: agricultural prosperity, material luxury, urban grandeur, etc. In this course, we will seek to shed light on the world of work in antiquity, to better understand both the experiences of those who worked for a living across an array of spheres and professions, and the value of work as a cultural, aesthetic, and literary concept. Special topics will include: the place of work in conceptions of a "golden age"; the literary topoi of work (like the idle shepherd or the virtuous peasant); representations of "heroic work" (most famously, the Labors of Hercules); the elision or erasure of non-elite labor for elite audiences in art and text; the iconography of work in painting, mosaic, and sculpture; and investigations into specific trades, crafts, and other forms of "making" (from midwifery to shoe making). Readings will be a combination of primary and secondary sources. All readings will be in translation.

Requirements/Evaluation: class participation; several short writing assignments; final paper
Prerequisites: none
Enrollment Limit: 24
Enrollment Preferences: Classics majors, Art History majors, Comp Lit majors, and intending majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 245(D1) COMP 285(D1) CLAS 243(D1)

Not offered current academic year

CLAS 270 (S) Reading Jesus, Writing Gospels: Christian Origins in Context (WS)
Cross-listings: REL 270 / COMP 263

Secondary Cross-listing
What were the religious and cultural landscapes in which Christianity emerged? How did inhabitants of the ancient Mediterranean world speak about the concept and significance of religion? How have scholars of early Christianity answered these questions? What are the implications of their reconstructions of early Christian history? The course is divided into four parts. The first part establishes the course's interpretive approach. The second part of this course explores aspects of the formation of Christianity from its origins as a Jewish movement until its legalization. The third part of the course focuses on the earliest literature produced to memorialize Jesus. The final part of the course emphasizes modern interpretations of Jesus and the movement of which he was a part; here we shall be examining how scholars make use of ancient materials to frame their arguments and the modern contexts and legacies of making meaning out of biblical and other ancient materials.

Class Format: lecture/discussion
Requirements/Evaluation: three 3-page papers (with revisions), one 5- to 7-page paper (that builds on one of the earlier 3 page papers), and a final
Prerequisites: none; open to all

Enrollment Limit: 19

Enrollment Preferences: sophomores, especially potential majors in Religion, Classics, and Comparative Literature

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 270(D2) CLAS 270(D1) COMP 263(D1)

Writing Skills Notes: Students will write a series of short essays, with required revisions, to develop their skills in close reading of ancient texts and interpretive analysis of modern scholarship about Christian origins. In each successive section of the course, writing from the prior unit will inform the subsequent papers.

Not offered current academic year

CLAS 306 (S) The Good Life in Greek and Roman Ethics

Cross-listings: PHIL 306

Secondary Cross-listing

Most thoughtful human beings spend a good deal of time musing about how we ought to live and about what counts as a good life for a human being. The philosophers of ancient Greece and Rome were among the first thinkers to develop rigorous arguments in response to such musings. Much of the moral philosophy produced in Greece and Rome remains as relevant today as when it was written. In this course, we will examine some central texts in ancient Greek and Roman moral philosophy. We will begin by reading some of Plato's early dialogues and his Republic. We will then turn to Aristotle's Nicomachean Ethics. We will then examine writings in the Stoic and Epicurean traditions, as well as Cicero's On the Ends of Good and Evil. As we proceed through the course, we will look at the way in which each thinker characterizes happiness, virtue and the relation between the two. We will also pay close attention to the way in which each of these thinkers takes the practice of philosophy to play a key role in our realization of the good human life.

Requirements/Evaluation: several short response pieces; a final paper of 10-15 pages; active participation in seminar discussion

Prerequisites: Phil 201 will be helpful but is not necessary.

Enrollment Limit: 15

Enrollment Preferences: Philosophy majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 306(D2) CLAS 306(D1)

Attributes: PHIL History Courses

Not offered current academic year

CLAS 330 (S) Plato (WS)

Cross-listings: PHIL 330

Secondary Cross-listing

Plato is one of the most important and influential thinkers in the history of the western tradition. His depiction of the trial and death of Socrates is one of the classics of western literature, and his views on ethics and politics continue to occupy a central place in our discussions 2400 years after they were written. It is, in fact, quite difficult to get through any course of study in the liberal arts without some familiarity with Plato. Nevertheless, comparatively few people realize that the views we commonly think of as "Platonic" represent only one strand in Plato's thought. For example, we commonly attribute to Plato a theory of the Forms on the basis of his claims in the so-called "middle dialogues" (mainly Republic, Phaedo, and Symposium). However, in his philosophically more sophisticated and notoriously difficult later dialogues (such as the Parmenides, Philebus, Sophist and Statesman), Plato engages in radical criticism and revision of his earlier views. In this course, we will spend the first third of the semester attempting to understand the
metaphysics and epistemology in Plato's middle dialogues. We will spend the balance of the semester coming to grips with Plato's arguments in the later dialogues. We will read several complete dialogues in translation, and will also read a wide variety of secondary source material.

Class Format: lecture/discussion; this class will be a roughly equal mixture of lectures, student presentations, and seminar discussion

Requirements/Evaluation: students will be expected to prepare a seminar presentation, to write several focused short analytical pieces, and to write a 15- to 20-page term paper in multiple drafts

Prerequisites: PHIL 101, PHIL 102 or permission of instructor; a prior course in logic will be extremely helpful, but is not necessary

Enrollment Limit: 15

Enrollment Preferences: upper-level Philosophy and Classics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
CLAS 330(D1) PHIL 330(D2)

Writing Skills Notes: Instructor will provide regular commentary on papers.

Attributes: PHIL History Courses

Not offered current academic year

CLAS 436 (F) Interspecies beings: demigods and monsters in art and culture, ancient to modern

Cross-listings: ARTH 511

Secondary Cross-listing

Horse-men, cat-women, bull-men, mermaids, snake-people: interspecies creatures are everywhere in ancient Greek and Roman art and poetry. Embodied in satyrs, sphinxes, centaurs, nymphs, and other part-human, part-animal beings is an alternative evolutionary and cultural history. In it, humans and animals live as one. There is no distinction between nature and culture. Male and female are equal. The industrial revolution never happens. This course traces the history of interspecies beings from their origin in ancient Greek art and poetry until today. Three points are important: 1) the relationship between the imagery and ancient political theory about "primitive" life; 2) evolving conceptions of biology and the environment, and 3) the role played by interspecies beings in the conceptualization of what is possible in art. The first half of the course examines the origins and character of interspecies beings in works of ancient art such as the Parthenon, and in ancient writers including Hesiod and Ovid. We examine relevant religious practices, materialist conceptions of nature, and biological theories of speciation, in Empedokles, On nature, Euripides' Bakchai, Plato's Phaidros, and Lucretius' De rerum natura. The second half of the course investigates the survival of classical monsters in the work of early-modern artists such as Botticelli, Michelangelo, Titian, and Dürer, and the rediscovery of ancient materialist theory. We consider the role played by interspecies beings in the formation of late modernism in art and literature. Key texts include Rousseau and Hobbes, Nietzsche's Birth of Tragedy, Mallarmé's "L'Apres midi d'une faun," and Stoppard's Arcadia. Problems include the relationship between nympha and sex-workers in Manet, the meaning of the Minotaur in Picasso, and the interest in interspecies beings in the work of women surrealists such as Leonora Carrington. We conclude with contemporary popular culture such as the Hunger Games.

Class Format: Lecture and discussion.

Requirements/Evaluation: The requirements of the course include: attendance and participation in discussion; preparing summaries/analyses of reading assignments for discussions; one presentation on a research project, and one 20-page paper on the research project.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Priority goes to graduate students in art history. If space is available, senior art-history majors, classics majors, and environmental studies majors may enroll.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: This course will satisfy the seminar requirement in art history.

Distributions: (D1)

Winter Study -----------------------------------------------

CLAS 11 (W) Fundamentals of Baking
Baking is at once both precise and intuitive. This course will empower novice bakers with the knowledge and confidence to make baking their own. We will focus on the "how" and "why" of baking to understand what's occurring as each ingredient goes into the mix. Students will bake alongside the instructor as well as on their own, tweaking, troubleshooting, and customizing recipes. Over three weeks, students will experiment with cookies, quick breads, and cakes, and the final week will be dedicated to a project of their own choosing. Readings will supplement this hands-on course.

Requirements/Evaluation: Presentation(s)
Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Students with little to no baking experience will receive priority. If the course is overenrolled, students will be asked to submit a short application.

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: Caleb Wolfson-Seeley bakes at Caretaker Farm in Williamstown.

Materials/Lab Fee: $40

Attributes: EXPE Experiential Education Courses

Not offered current academic year

CLAS 13  (W)  Advanced Techniques in Baking
This course will build upon students’ basic baking skills to increase confidence and understanding of more technically challenging topics. Students will expand their repertoire, refine techniques with tips and advice, and have fun baking in a community atmosphere. Over three weeks, students will experiment with bread, laminated pastry, and pies and tarts, and the final week will be dedicated to a project of their own choosing. Readings will supplement this hands-on course.

Requirements/Evaluation: Presentation(s)

Prerequisites: Students should be comfortable with basic baking techniques.

Enrollment Limit: 12

Enrollment Preferences: Students who took Fundamentals of Baking during a previous Winter Study will receive priority. If the course is overenrolled, students will be asked to submit a short application.

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: Caleb bakes at Caretaker Farm in Williamstown.

Materials/Lab Fee: $40

Attributes: EXPE Experiential Education Courses

Not offered current academic year

CLAS 31  (W)  Senior Thesis: Classics
May be taken by students registered for Classics 493-494.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year

CLAS 99  (W)  Independent Study: Classics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

MAJOR

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

Route A: (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language. (2) Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

Route B: (1) One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223). (2) Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302. (3) Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

Classics Colloquium: All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

COURSE NUMBERING SYSTEM

Language Courses: The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on
Classical Studies Courses: The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS 101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

STUDY AWAY

We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No, but students should consult with the department about language sequences.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

CLGR 101 (F) Introduction to Greek

This course is the first half of a full-year sequence designed to introduce students to the exciting and rewarding process of reading ancient Greek texts in their original language. We will focus on Attic Greek, the dialect of the Greek language that was spoken in Athens during the Classical period (5th and 4th centuries BCE) and in which some of the most famous works of Greek literature (e.g., the tragedies of Aeschylus, Sophocles, and Euripides and the dialogues of Plato) were composed. But this course will provide a solid foundation in Greek grammar and syntax for students interested in studying other dialects (e.g., the distinctive Greek of the Homeric epics, or the koine of the New Testament) as well. For the fall semester, we will work on developing a firm grasp of Greek nouns, verbs, and adjectives, as well as learning some of the most common ways of constructing complex sentences. From the very beginning, students will have opportunities to apply their knowledge by translating brief excerpts from original Greek sources.

Requirements/Evaluation: frequent quizzes, tests, and a final exam
Prerequisites: none; designed for students who are beginning Greek or have studied less than two years of Greek in secondary school; students with some previous experience in Greek may want to enroll in CLGR 102 only (consult the department)

Enrollment Limit: 15

Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores

Expected Class Size: 8-10

Grading: no pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLGR 101 and 102) are taken

Distributions: (D1)

Fall 2024

LEC Section: 01    MWF 11:00 am - 12:15 pm    Sarah E. Olsen

CLGR 102  (S)  Introduction to Greek

This course is the second half of a full-year sequence designed to introduce students to the exciting and rewarding process of reading ancient Greek texts in their original language. We will focus on Attic Greek, the dialect of the Greek language that was spoken in Athens during the Classical period (5th and 4th centuries BCE) and in which some of the most famous works of Greek literature (e.g., the tragedies of Aeschylus, Sophocles, and Euripides and the dialogues of Plato) were composed. But this course will provide a solid foundation in Greek grammar and syntax for students interested in studying other dialects (e.g., the distinctive Greek of the Homeric epics, or the koine of the New Testament) as well. In the spring semester, we will continue our study of the Greek language as we begin translating longer stretches of Greek poetry, historiography, oratory, and/or narrative fiction. By the end of the year, students are prepared to move on to intermediate-level Greek reading courses.

Requirements/Evaluation: frequent quizzes, tests, and a final exam

Prerequisites: CLGR 101 or permission of department

Enrollment Limit: 15

Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores

Expected Class Size: 8-10

Grading: no pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLGR 101 and 102) are taken

Distributions: (D1)

Spring 2025

LEC Section: 01    MWF 11:00 am - 12:15 pm    Felipe Soza

CLGR 201  (F)  Intermediate Greek

This course will be based on readings from Plato’s Crito and Hesiod’s Theogony in their original Greek. These texts will give you a taste of both Classical prose and Archaic poetry and enable you to improve your ability to read, comprehend, and translate ancient Greek literature. Plato and Hesiod also offer important and influential perspectives on the origins, connections, effects, and value of justice and religion. Students who successfully complete this course will be well-prepared for advanced study of Greek language and literature.

Requirements/Evaluation: Evaluation will be based on classroom participation, quizzes and exams, and take-home assignments (including, e.g., essays and brief prose composition tasks).

Prerequisites: CLGR 101-102 or two years of Greek in secondary school

Enrollment Limit: 12

Enrollment Preferences: Classics majors and intended Classics majors

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)
CLGR 401 (S) Homer

The Homeric epics (Iliad and Odyssey) are foundational works of ancient Greek literature. They offer valuable insight into early Greek society, religion, and culture, and constitute some of our earliest representations of the most famous Greek gods and heroes. The narratives about the Trojan War and its aftermath attributed to Homer also shape much of later Greek literature, both poetry and prose. In this course, we will read extensive selections from Homeric poetry in its original Greek, along with additional readings (primary and/or secondary) in English.

Requirements/Evaluation: class participation, short written exercises and/or oral reports, midterm and final exams, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2025

SEM Section: 01  MR 2:35 pm - 3:50 pm  Sarah E. Olsen

CLGR 403 (F) Poetry and Revolution in Archaic Greece

Taken together, the historian Herodotus and the Greek lyric poets (Alcaeus, Solon, Pindar, and others) offer a fascinating window into the tumultuous world of archaic Greece: a period of colonial expansion, political experimentation, and artistic innovation. In this course, we will read selections from both Herodotus’ Histories and archaic Greek lyric, in order to understand how these two genres can work together to illuminate Greek cultural discourse during this pivotal era. Students will improve their ability to read Greek poetry and prose in multiple dialects, and deepen their understanding of Greek history and literary style.

Class Format: recitation/discussion

Requirements/Evaluation: midterm and final exam, class participation, final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors and intending majors

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2024

LEC Section: 01  TF 1:10 pm - 2:25 pm  Sarah E. Olsen

CLGR 404 (S) Tragedy

This course will focus on reading, in Greek, a complete tragedy by Sophocles or Euripides. It will thus improve your ability to read and analyze Greek poetry in a variety of styles and meters. While focusing on questions of particular importance for the play we are reading in Greek, we will also situate that play in a larger context by exploring, for instance: aspects of the social and political situations in and for which fifth-century tragedies were first produced; the several performance genres out of which tragedy was created; developments in the physical characteristics of the theater and in elements of staging and performance; problems of representation particularly relevant to theatrical production and performance.

Requirements/Evaluation: contributions to class, exams, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 15
Enrollment Preferences: Classics majors, students continuing the Greek sequence

Expected Class Size: 13

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 406 (F) Aristophanes and Plato
This course explores Aristophanes' comedy *Clouds* and Plato's dramatic dialogue *Apology of Socrates* through close reading, commentary, translation, and analysis. Together, these texts provide a point of entry for grasping the political and social processes that culminated in the trial, conviction, and execution of Socrates in 399 BCE because "he corrupts the youth and does not recognize the gods the city recognizes (Apology 28b-c)." More broadly, these texts open up perspectives on how scientific inquiry, Socratic conversation, and rhetorical education were viewed in fifth-century Athens and prime us to reconsider core questions ranging from the proper methods, purpose, and stakes of scientific and rhetorical education to the proper role of tradition in familial and civic life and the costs of nonconformity.

Requirements/Evaluation: Evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper.

Prerequisites: CLGR 201 or instructor permission

Enrollment Limit: 12

Enrollment Preferences: intending or declared Classics majors

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 412 (F) Herodotus
This course will focus on the reading in Greek of Herodotus' Histories, his multivalent and deeply human account of how and why several hundred years of contact and conflict between the Greek city-states and non-Greek peoples to the east culminated in the Persian invasion of Greece. We will explore the ways in which his rich narrative style and intellectual landscape reflect the influence of Greek and near-eastern oral traditions, Ionian philosophical thought, Greek tragedy, and contemporary Athenian rhetoric and philosophy. We will also study his use of anthropological methods, ethnography, and geography in explaining human events. Among the many themes that permeate his work, we will pay special attention to the working of divine versus human justice, the mutability of human affairs, the nature of authority, the role of family, and the quest for wisdom.

Requirements/Evaluation: class participation, two short written assignments, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 422 (S) Crete in the Ancient Greek Imagination
The island of Crete appears across ancient Greek literature as a place of mythic origins, monstrosity, and technological marvels. It plays a paradoxical role as an origin point for quintessentially-Greek practices, such as the paean (hymn to Apollo), as well as a site of difference and even perversion. The god Zeus and the half-human, half-bull Minotaur were both, after all, born on Crete. In this course, we will explore the representation of Crete and Cretans in Greek poetry, including hexameter epic (Homer, the *Homeric Hymns*), lyric (Bacchylides), and tragedy (Euripides' *Hippolytus*). The range of reading selections will improve students' understanding of ancient Greek grammar and syntax, and deepen their appreciation of different metrical patterns, dialects, and genres. They will also enable us to consider how the representation of Crete functioned as a way for poets to articulate various elements of Greek identity. In addition to advancing their understanding of Greek language and literature, students in this course will learn about the
history, geography, and culture of Crete in the Archaic and Classical periods as it relates to our literary sources, and complete research projects on significant Cretan sites in Greek art, literature, and culture. All students enrolled in this course will have the option of participating in a short-term travel course to Crete in May, conducted in collaboration with CLLA 422.

Requirements/Evaluation: class participation, translation exams, seminar paper and presentation

Prerequisites: CLGR 201

Enrollment Limit: 10

Enrollment Preferences: Classics majors and intending majors

Expected Class Size: 4

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

Winter Study

CLGR 99 (W) Independent Study: Greek

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

MAJOR

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

**Route A:** (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language. (2) Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

**Route B:** (1) One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223). (2) Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302. (3) Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

**Classics Colloquium:** All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

**THE DEGREE WITH HONORS IN CLASSICS**

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

**COURSE NUMBERING SYSTEM**

**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on previous experience.
Classical Studies Courses: The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS 101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

STUDY AWAY
We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No, but students should consult with the department about language sequences.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

CLLA 101 (F) Introduction to Latin
This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid’s Metamorphoses) and prose (e.g., Piny’s Letters).

Requirements/Evaluation: frequent quizzes, classroom exercises, two midterms, a final project
Prerequisites: none; this course is designed for the student with no previous preparation in Latin or with only a little Latin who wishes a refresher; students with some previous experience in Latin may want to enroll in CLLA 102 only (consult the department)

Enrollment Limit: 15

Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores

Expected Class Size: 8-10
Grading: yes pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLLA 101 and 102) are taken

Distributions: (D1)

Fall 2024

LEC Section: 01  MWF 11:00 am - 12:15 pm  Marissa A. Henry

CLLA 102 (S) Introduction to Latin

This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid's Metamorphoses) and prose (e.g., Piny's Letters).

Class Format: recitation/discussion

Requirements/Evaluation: attendance and participation, frequent quizzes, tests, classroom exercises, and a final exam

Prerequisites: CLLA 101 or permission of department

Enrollment Limit: 18

Enrollment Preferences: Students who have completed CLLA 101

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLLA 101 and 102) are taken

Distributions: (D1)

Spring 2025

LEC Section: 01  MWF 11:00 am - 12:15 pm  Nicole G. Brown

CLLA 201 (F) Intermediate Latin: The Late Republic

This course aims to strengthen skills gained in previous study. In order to develop greater fluency and familiarity with classical Latin, we will read, translate, and analyze Cicero's Pro Caelio and selected short poems of Catullus. Both authors are brilliant stylists, though each writes in a very different mode. Taken together, these texts offer an excellent introduction to the expressive capacity of Latin in prose and verse. They also open up intriguing overlapping perspectives on the social, sexual, and political mores of late Republican Rome. We will consider the cultural context and implications of these texts as time permits.

Requirements/Evaluation: Engaged participation in class, occasional quizzes and short written assignments, a midterm and final exam

Prerequisites: CLLA 101-102 or 3-4 years of Latin in secondary school; consult the department

Enrollment Limit: 12

Enrollment Preferences: Classics majors and prospective majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2024

SEM Section: 01  MWF 10:00 am - 10:50 am  Marissa A. Henry

CLLA 302 (S) Vergil's Aeneid

This course is a comprehensive introduction to Vergil's Aeneid. Students will develop their ability to read and translate the Latin text of the poem, while at the same time exploring the major interpretive issues surrounding the definitive Roman epic. Through a combination of close reading and large-scale analysis, we will investigate the poem's literary, social, and political dimensions with special attention to Vergil's consummate poetic craftsmanship.
CLLA 405 (S) Livy and Tacitus: Myth, History and Morality in Ancient Rome

We will begin the semester in mythical Rome by reading selections from Book 1 of Livy's history in which Roman values, practices and institutions are given their origin stories, and the mythical figures of Rome's past are established as moral exempla for Rome's present. We will examine how Livy deploys the storyteller's art to excite his readers' pathos, indignation and sympathy; we will examine as well how he constructs Rome's past through the filter of his own Augustan present. Writing more than a century after Livy, Tacitus offers a different and jaded view of Augustus and his legacy, one conditioned by his own experiences living through the terrors of the reign of Domitian. His compressed and fastidious prose is the vehicle for complex and gripping accounts of imperial scandals and tragedies as well as of individual acts of heroism and nobility. We will read primarily selections from Tacitus' Annals as well as selections from either his Germania or Agricola.

Class Format: discussion
Requirements/Evaluation: Evaluation will be based on class preparation and participation, an 8- to 10-page paper, a midterm, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 6-8
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Not offered current academic year

CLLA 406 (F) Horace's Odes

This course will explore the poetic delights of Horace's extraordinary experiment in crafting Latin personal verse using Greek lyric forms. We will immerse ourselves in the poems' intricate construction and examine how they engage such themes as love and friendship, landscape and memory, youth and old age, politics, and morality. At the same time, we will consider the variety of voices and perspectives within the poems and their complex relationship both to Greek and Latin poetic traditions and to Horace's own contemporary world. The goal throughout is to investigate the literary, social, political, and philosophical dimensions of the odes, as well as their consummate poetic artistry.

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 15
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Not offered current academic year

CLLA 409 (F) Seneca and the Self
This course considers ethical and literary dimensions of self-fashioning, self-examination, and the conception of selfhood in the Stoic philosophy of the younger Seneca through close reading of extensive selections from his philosophical works and tragedies. The focus of this course lies squarely in the first century CE and on the analysis of Seneca's own texts. We begin, however, with an introduction to the ethics of Roman Stoicism through the personae theory of Panaetius as transmitted by Cicero's De Officiis. Moreover, we will read and discuss reflections on selfhood from some of Seneca's most famous philosophical and literary heirs, including Montaigne, Emerson, and Foucault, both to enrich our understanding of his work and to gain an appreciation of his considerable influence on later writing about the self.

Requirements/Evaluation: class participation, several short written and oral assignments, midterm and final exams, and a final paper
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Expected Class Size: 5-10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

CLLA 411 (S) Advanced Latin: Apuleius
In this class, we will study Apuleius' hilarious and disturbing Latin novel, Metamorphoses or The Golden Ass. This work explores the themes of curiosity, witchcraft, transformation, animality, and religious conversion through the figure of Lucius, a man who accidentally turns himself into a donkey and remains trapped in this body through various trials and adventures. We will translate the famous inset narrative of "Cupid and Psyche," as well as reading the entire work in English. Our time in class will be spent translating together and discussing readings, which will also include selections from contemporary scholarship and a modern novel inspired by this narrative, C.S. Lewis' Till We Have Faces. As the final component, students will complete a creative project consisting of their own creative work in any medium inspired by the novel and a commentary that engages closely with the Latin text.

Requirements/Evaluation: class participation; periodic translation quizzes; two short writing assignments; final creative project
Prerequisites: CLLA 302 or instructor permission
Enrollment Limit: 15
Enrollment Preferences: Classics majors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

CLLA 414 (F) Vergil's Eclogues and Georgics
This course will explore the two major works of Vergil that precede the Aeneid: the Eclogues, a series of ten pastoral poems that range widely across personal, political, and mythological themes; and the Georgics, a longer didactic poem in four books that uses an agricultural framework to examine issues of life, death, power, suffering, and love. The goal throughout is to investigate the literary, political, and social dimensions of the poems with special attention to their relationship to earlier models, as well as their exquisite poetic craftsmanship

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Classics majors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
CLLA 422  (S) Crete in the Ancient Roman Imagination

Appeals to origins "long ago" and "far away" occur as a basis for positive cultural claims in ancient literature, but also function to banish or contain taboo desires and practices by placing them safely beyond the limits of civilized time and place. For the Romans, the island of Crete fulfilled both these roles. In this course, we will explore the representation of Crete and Cretans in several authors and genres, with special attention to Catullus 64 and Ovid's *Metamorphoses*. We will consider how representations of Crete helped our authors navigate perennial tensions at Rome between philhellenism and xenophobia and attend to the complex play of poetic intertextuality among Roman texts as well as their intimate engagement with Greek predecessors. Moreover, to complement our literary investigation, students will gain familiarity with the history of Roman rule on the island from its establishment as a province in 67 BCE through late antiquity, and will consider vestiges of the Roman imperial presence that endured much longer. Students will research Roman activity on Crete with an emphasis on material culture as well as written sources. All students enrolled in this course will have the option of participating in a short-term travel course to Crete in May, conducted in collaboration with CLGR 422.

Requirements/Evaluation: class participation, translation quizzes and exams, occasional short writing assignments, seminar paper and presentation

Prerequisites:  CLLA 302

Enrollment Limit:  10

Enrollment Preferences: Classics majors and intending majors

Expected Class Size:  6

Grading: yes pass/fail option, yes fifth course option

Distributions:  (D1)

Not offered current academic year

Winter Study -------------------------------

CLLA 99  (W) Independent Study: Latin

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
CONCENTRATION IN COASTAL AND OCEAN STUDIES

Understanding the oceans, the coasts, and our interactions with both is critical in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. The oceans control the planet's weather, they supply about 20% of the world's food, and ocean-going cargo ships carry 90% of international trade goods. More than a third of the global population lives within some tens of kilometers of the coast, and about 10% of the world's people could be directly impacted by sea level rise in the coming decades. Williams run the Williams-Mystic Program, one of the nation's few interdisciplinary semesters investigating the multifaceted ocean and coastal system via the humanities, social sciences, and physical sciences; and Coastal and Ocean Studies (CaOS) provides an on-campus structure for students to weave the Williams-Mystic curriculum into an interdisciplinary concentration.

Candidates for the concentration in Coastal and Ocean Studies must complete a minimum of seven courses: the four Williams-Mystic courses (which cover history, literature, science, and policy of the coasts and oceans); an oceanography course, an elective, and a 400-level Senior Seminar. The Williams-Mystic courses require a semester away at the Williams-Mystic Program, and the remainder of the concentration is completed on campus.

Students who have completed other study-away programs that emphasize marine studies should consult with the program chair about the possibility of completing the Coastal and Ocean Studies concentration. More information can be found on the Coastal and Ocean Studies web page, and the CaOS curriculum is summarized on this information sheet.

Course requirements (7 courses in all)

One foundational oceanographic course from the following list:

- CAOS/ENVI/GEOS 104 Oceanography
- CAOS/GEOS 110/ENVI 109 Oceans and Society
- CAOS/GEOS 201 Oceanographic Processes

Four core courses across the humanities, science, and social sciences (taken at Williams-Mystic):

- CAOS/ENGL 231 Literature of the Sea
- CAOS 311/BIOL 231 Marine Ecology OR CAOS/GEOS 210 Oceanographic Processes
- CAOS/ENVI 351/ PSCI 319 Marine Policy
- CAOS/HIST 352 America and the Sea, 1600-Present

One capstone Course
